For purposes of subdivision (ii) of this subparagraph, the number of employers maintaining the plan is determined by treating any employers described in section 414(b) (relating to a controlled group of corporations) or any employers described in section 414(c) (relating to trades or businesses under common control), whichever is applicable, as if such employers are a single employer. See § 1.411(a)–5(b)(3) for rules relating to the time when an employer maintains a plan. A master or prototype plan is not a section 413(c) plan unless such a plan is described in this subparagraph. Similarly, the mere fact that a plan, or plans, utilizes a common trust fund or otherwise pools plan assets for investment purposes does not, by itself, result in a particular plan being treated as a section 413(c) plan.

(3) Additional rules. (i) If a plan is a collectively bargained plan described in § 1.413–1(a), the rules of section 413(c) and this section do not apply, and the rules of section 413(b) and § 1.413–1 do apply to the plan.

(ii) The special rules of section 413(b)(1) and § 1.413–1(b) relating to the application of section 410, other than the rules of section 410(a), do not apply to a section 413(c) plan. Thus, for example, the minimum coverage requirements of section 410(b) are generally applied to a section 413(c) plan on an employer-by-employer basis, taking into account the generally applicable rules such as section 401(a)(5) and section 414(b) and (c).

(iii) The special rules of section 413(b)(2) and § 1.413–1(c) (relating to (A) section 401(a)(4) and prohibited discrimination, and (B) 411(d)(3) and vesting required on termination, partial termination, or discontinuance of contributions) do not apply to a section 413(c) plan. Thus, for example, the determination of whether or not there is a termination, within the meaning of section 411(d)(3), of a section 413(c) plan is made solely by reference to the rules of sections 411(d)(3) and 413(c)(3).

(iv) The qualification of a section 413(c) plan, at any relevant time, under section 401(a), 403(a) or 405(a), as modified by section 413(c) and this section, is determined with respect to all employers maintaining the section 413(c) plan. Consequently, the failure by one employer maintaining the plan (or by the plan itself) to satisfy an applicable qualification requirement will result in the disqualification of the section 413(c) plan for all employers maintaining the plan.

(4) Effective dates. Except as otherwise provided, section 413(c) and this section apply to a plan for plan years beginning after December 31, 1953.

(b) Participation. Section 410(a) and the regulations thereunder shall be applied as if all employees of each of the employers who maintain the plan were employed by a single employer.

(c) Exclusive benefit. In the case of a plan subject to this section, the exclusive benefit requirements of section 401(a) shall be applied to the plan in the same manner as under section 413(b)(3) and § 1.413–1(d).

(d) Vesting. Section 411 and the regulations thereunder shall be applied as if all employers who maintain the plan constituted a single employer. The application of any rules with respect to breaks in service under section 411 shall be made under regulations prescribed by the Secretary of Labor. Thus, for example, all the hours which an employee worked for each employer maintaining the plan would be aggregated in computing the employee's hours of service under the plan. See also 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

[T.D. 7501, 42 FR 42340, Aug. 23, 1977, as amended by 42 FR 47198, Sept. 20, 1977; T.D. 7654, 44 FR 65065, Nov. 9, 1979]

§ 1.414(b)–1 Controlled group of corporations.

(a) Definition of controlled group of corporations. For purposes of this section, the term "controlled group of corporations" has the same meaning as is assigned to the term in section 1563(a) and the regulations thereunder, except that (1) the term "controlled group of corporations" shall not include an "insurance group" described in section 1563(a)(4), and (2) section 1563(e)(3)(C) (relating to stock owned by certain employees' trusts) shall not apply. For purposes of this section, the term "members of a controlled group" means two or more corporations connected through stock ownership described in section 1563(a) (1), (2), or (3), whether or not such corporations are "component members of a controlled group" within the meaning of section 1563(b). Two or more corporations are members of a controlled group at any time such corporations meet the requirements of section 1563(a) (as modified by this paragraph). For purposes of this section, if a corporation is a member of more than one controlled group of corporations, such corporation shall be treated as a member of each controlled group.

(b) Single plan adopted by two or more members. If two or more members of a controlled group of corporations adopt a single plan for a plan year, then the minimum funding standard provided in section 412, the tax imposed by section 4971, and the applicable limitations provided by section 404(a) shall be determined as if such members were a single employer. In such a case, the amount of such items and the allocable portion attributable to each member shall be determined in the manner provided in regulations under sections 412, 4971, and 404(a).

(c) Cross reference. For rules relating to the application of sections 401, 408(k), 410, 411, 415, and 416 with respect to two or more trades or businesses which are under common control, see section 414(c) and the regulations thereunder.

[T.D. 8179, 53 FR 6605, March 2, 1988]

§ 1.414(c)–1 Commonly controlled trades or businesses.

For purposes of applying the provisions of sections 401 (relating to qualified pension, profit-sharing, and stock bonus plans), 408(k) (relating to simplified employee pensions), 410 (relating to minimum participation standards), 411 (relating to minimum vesting standards), 415 (relating to limitations on benefits and contributions under qualified plans), and 416 (relating to top-heavy plans), all employees of two or more trades or businesses under common control within the meaning of § 1.414(c)-2 for any period shall be treated as employed by a single employer. See sections 401, 408(k), 410, 411, 415, and 416 and the regulations thereunder for rules relating to employees of trades or businesses which are under common control. See § 1.414(c)-5 for effective date.

[T.D. 8179, 53 FR 6606, March 2, 1988]

§ 1.414(c)–2 Two or more trades or businesses under common control.

(a) In general. For purposes of this section, the term "two or more trades or businesses under common control" means any group of trades or businesses which is either a "parent-subsidiary group of trades or businesses under common control" as defined in paragraph (b) of this section, a "brother-sister group of trades or businesses under common control" as defined in paragraph (c) of this section, or a "combined group of trades or businesses under common control" as defined in paragraph (d) of this section. For purposes of this section and §§ 1.414(c)-3 and 1.414(c)-4, the term "organization" means a sole proprietorship, a partnership (as defined in section 7701(a)(2)), a trust, an estate, or a corporation.

(b) Parent-subsidiary group of trades or businesses under common control—(1) In general. The term "parent-subsidiary group of trades or businesses under common control" means one or more chains of organizations conducting trades or businesses connected through ownership of a controlling interest with a common parent organization if—

(i) A controlling interest in each of the organizations, except the common parent organization, is owned (directly and with the application of § 1.414(c)-4(b)(1), relating to options) by one or more of the other organizations; and

(ii) The common parent organization owns (directly and with the application of § 1.414(c)-4(b)(1), relating to options) a controlling interest in at least one of the other organizations, excluding, in computing such controlling interest, any direct ownership interest by such other organizations.

(2) Controlling interest defined—(i) Controlling interest. For purposes of paragraphs (b) and (c) of this section, the phrase "controlling interest" means:

(A) In the case of an organization which is a corporation, ownership of stock possessing at least 80 percent of total combined voting power of all classes of stock entitled to vote of such corporation or at least 80 percent of the total value of shares of all classes of stock of such corporation;

(B) In the case of an organization which is a trust or estate, ownership of an actuarial interest of at least 80 percent of such trust or estate;

(C) In the case of an organization which is a partnership, ownership of at least 80 percent of the profits interest or capital interest of such partnership; and

(D) In the case of an organization which is a sole proprietorship, ownership of such sole proprietorship.

(ii) Actuarial interest. For purposes of this section, the actuarial interest of each beneficiary of trust or estate shall be determined by assuming the maximum exercise of discretion by the fiduciary in favor of such beneficiary. The factors and methods prescribed in § 20.2031-7 or § 20.2031-10 (Estate Tax Regulations), whichever is appropriate, for use in ascertaining the value of an interest in property for estate tax purposes shall be used

for purposes of this subdivision in determining a beneficiary's actuarial interest.

(c) **Brother-sister group of trades or businesses under common control—(1) In general.** The term "brother-sister group of trades or businesses under common control" means two or more organizations conducting trades or businesses if (i) the same five or fewer persons who are individuals, estates, or trusts own (directly and with the application of § 1.414(c)-4) a controlling interest in each organization, and (ii) taking into account the ownership of each such person only to the extent such ownership is identical with respect to each such organization, such persons are in effective control of each organization. The five or fewer persons whose ownership is considered for purposes of the controlling interest requirement for each organization must be the same persons whose ownership is considered for purposes of the effective control requirement.

(2) **Effective control defined.** For purposes of this paragraph, persons are in "effective control" of an organization if—

(i) In the case of an organization which is a corporation, such persons own stock possessing more than 50 percent of the total combined voting power of all classes of stock entitled to vote or more than 50 percent of the total value of shares of all classes of stock of such corporation;

(ii) In the case of an organization which is a trust or estate, such persons own an aggregate actuarial interest of more than 50 percent of such trust or estate;

(iii) In the case of an organization which is a partnership, such persons own an aggregate of more than 50 percent of the profits interest or capital interest of such partnership; and

(iv) In the case of an organization which is a sole proprietorship, one of such persons owns such sole proprietorship.

(d) **Combined group of trades or businesses under common control.** The term "combined group of trades or businesses under common control" means any group of three or more organizations, if (1) each such organization is a member of either a parent-subsidiary group of trades or businesses under common control or a brother-sister group of trades or businesses under common control, and (2) at least one such organization is the common parent organization of a parent-subsidiary group of trades or businesses under common control and is also a member of a brother-sister group of trades or businesses under common control.

(e) **Examples.** The definitions of parent-subsidiary group of trades or businesses under common control, brother-sister group of trades or businesses under common control, and combined group of trades or businesses under common control may be illustrated by the following examples.

Example (1). (a) The ABC partnership owns stock possessing 80 percent of the total combined voting power of all classes of stock entitled to voting of S corporation. ABC partnership is the common parent of a parent-subsidiary group of trades or businesses under common control consisting of the ABC partnership and S Corporation.

(b) Assume the same facts as in (a) and assume further that S owns 80 percent of the profits interest in the DEF Partnership. The ABC Partnership is the common parent of a parent-subsidiary group of trades or businesses under common control consisting of the ABC Partnership, S Corporation, and the DEF Partnership. The result would be the same if the ABC Partnership, rather than S, owned 80 percent of the profits interest in the DEF Partnership.

Example (2). L Corporation owns 80 percent of the only class of stock of T Corporation, and T, in turn, owns 40 percent of the capital interest in the GHI Partnership. L also owns 80 percent of the only class of stock of N Corporation and N, in turn, owns 40 percent of the capital interest in the GHI Partnership. L is the common parent of a parent-subsidiary group of trades or businesses under common control consisting of L Corporation, T Corporation, N Corporation, and the GHI Partnership.

Example (3). ABC Partnership owns 75 percent of the only class of stock of X and Y Corporations; X owns all the remaining stock of Y, and Y owns all the remaining stock of X. Since interorganization ownership is excluded (that is, treated as not outstanding) for purposes of determining whether ABC owns a controlling interest of at least one of the other organizations, ABC is treated as the owner of stock possessing 100 percent of the voting power and value of all classes of stock of X and of Y for purposes of paragraph (b)(1)(ii) of this section. Therefore, ABC is the common parent of a parent-subsidiary group of trades or businesses under common control consisting of the ABC Partnership, X Corporation, and Y Corporation.

Example (4). Unrelated individuals A, B, C, D, E, and F own an interest in sole proprietorship A, a capital interest in the GHI Partnership, and stock of corporations M, W, X, Y, and Z (each of which has only one class of stock outstanding) in the following proportions:

	ORGANIZATIONS						
Individuals	A	GHI	M	W	X	Y	Z
A	100%	50%	100%	60%	40%	20%	60%
B.........	—	40%	—	15%	40%	50%	30%
C.........	—	—	—	—	10%	10%	10%
D	—	—	—	25%	—	20%	—
E.........	—	10%	—	—	10%	—	—
	100%	100%	100%	100%	100%	100%	100%

Under these facts the following four brother-sister groups of trades or businesses under common control exist: GHI, X and Z; X, Y and Z; W and Y; A and M. In the case of GHI, X, and Z, for example, A and B together have effective control of each organization because their combined identical ownership of GHI, X and Z is greater than 50%. (A's identical ownership

of GHI, X and Z is 40% because A owns at least a 40% interest in each organization. B's identical ownership of GHI, X and Z is 30% because B owns at least a 30% interest in each organization.) A and B (the persons whose ownership is considered for purposes of the effective control requirement) together own a controlling interest in each organization because they own at least 80% of the capital interest of partnership GHI and at least 80% of the total combined voting power of corporations X and Z. Therefore, GHI, X and Z comprise a brother-sister group of trades or businesses under common control. Y is not a member of this group because neither the effective control requirement nor the 80% controlling interest requirement are met. (The effective control requirement is not met because A's and B's combined identical ownership in GHI, X, Y and Z (20% for A and 30% for B) does not exceed 50%. The 80% controlling interest test is not met because A and B together only own 70% of the total combined voting power of the stock of Y.) A and M are not members of this group because B owns no interest in either organization and A's ownership of GHI, X and Z, considered alone, is less than 80%.

Example (5). The outstanding stock of corporations U and V, which have only one class of stock outstanding, is owned by the following unrelated individuals:

	Corporations	
	U	V
Individuals	(percent)	(percent)
A	12	12
B	12	12
C	12	12
D	12	12
E	13	13
F	13	13
G	13	13
H	13	13
	100	100

Any group of five of the shareholders will own more than 50 percent of the stock in each corporation, in identical holdings. However, U and V are not members of a brother-sister group of trades or businesses under common control because at least 80 percent of the stock of each corporation is not owned by the same five or fewer persons.

Example (6). A, an individual, owns a controlling interest in ABC Partnership and DEF Partnership. ABC, in turn, owns a controlling interest in X Corporation. Since ABC, DEF, and X are each members of either a parent-subsidiary group or a brother-sister group of trades or businesses under common control, and ABC is the common parent of a parent-subsidiary group of trades or businesses under common control consisting of ABC and X, and also a member of a brother-sister group of trades or businesses under common control consisting of ABC and DEF, ABC Partnership, DEF Partnership, and X Corporation are members of the same combined group of trades or businesses under common control.

[T.D. 8179, 53 FR 6606, March 2, 1988]

§ 1.414(c)–3 Exclusion of certain interests or stock in determining control.

(a) In general. For purposes of § 1.414(c)-2(b) (2) (i) and (c)(2), the term "interest" and the term "stock" do not include an interest which is treated as not outstanding under paragraph (b) of this section in the case of a parent-subsidiary group of trades or businesses under common control or under paragraph (c) of this section in the case of a brother-sister group of trades or businesses under common control. In addition, the term "stock" does not include treasury stock or nonvoting stock which is limited and preferred as to dividends. For definitions of certain terms used in this section, see paragraph (d) of this section.

(b) Parent-subsidiary group of trades or businesses under common control—(1) In general. If an organization (hereinafter in this section referred to as "parent organization") owns (within the meaning of paragraph (b)(2) of this section)—

(i) In the case of a corporation, 50 percent or more of the total combined voting power of all classes of stock entitled to vote or 50 percent or more of the total value of shares of all classes of stock of such corporation.

(ii) In the case of a trust or an estate, an actuarial interest (within the meaning of § 1.414(c)-2(b)(2)(ii)) of 50 percent or more of such trust or estate, and

(iii) In the case of a partnership, 50 percent or more of the profits or capital interest of such partnership, then for purposes of determining whether the parent organization or such other organization (hereinafter in this section referred to as "subsidiary organization") is a member of a parent-subsidiary group of trades or businesses under common control, an interest in such subsidiary organization excluded under paragraph (b) (3), (4), (5), or (6) of this section shall be treated as not outstanding.

(2) Ownership. For purposes of paragraph (b)(1) of this section, a parent organization shall be considered to own an interest in or stock of another organization which it owns directly or indirectly with the application of paragraph (b)(1) of § 1.414(c)-4 and—

(i) In the case of a parent organization which is a partnership, a trust, or an estate, with the application of paragraphs (b) (2), (3), and (4) of § 1.414(c)-4, and

(ii) In the case of a parent organization which is a corporation, with the application of paragraph (b)(4) of § 1.414(c)-4.

(3) Plan of deferred compensation. An interest which is an interest in or stock of the subsidiary organization held by a trust which is part of a plan of deferred compensation (within the meaning of section 406(a)(3) and the regulations thereunder)

for the benefit of the employees of the parent organization or the subsidiary organization shall be excluded.

(4) Principal owners, officers, etc. An interest which is an interest in or stock of the subsidiary organization owned (directly and with the application of § 1.414(c)-4) by an individual who is a principal owner, officer, partner, or fiduciary of the parent organization shall be excluded.

(5) Employees. An interest which is an interest in or stock of the subsidiary organization owned (directly and with the application of § 1.414(c)-4) by an employee of the subsidiary organization shall be excluded if such interest or such stock is subject to conditions which substantially restrict or limit the employee's right (or if the employee constructively owns such interest or such stock, the direct or record owner's right) to dispose of such interest or such stock and which run in favor of the parent or subsidiary organization.

(6) Controlled exempt organization. An interest which is an interest in or stock of the subsidiary organization shall be excluded if owned (directly and with the application of § 1.414(c)-4) by an organization (other than the parent organization):

(i) To which section 501 (relating to certain educational and charitable organizations which are exempt from tax) applies, and

(ii) Which is controlled directly or indirectly (within the meaning of paragraph (d)(7) of this section) by the parent organization or subsidiary organization, by an individual, estate, or trust that is a principal owner of the parent organization, by an officer, partner, or fiduciary of the parent organization, or by any combination thereof.

(c) Brother-sister group of trades or businesses under common control—(1) In general. If five or fewer persons (hereinafter in this section referred to as "common owners") who are individuals, estates, or trusts own (directly and with the application of § 1.414(c)-4)—

(i) In the case of a corporation, 50 percent or more of the total combined voting power of all classes of stock entitled to vote or 50 percent or more of the total value of shares of all classes of stock or such corporation,

(ii) In the case of a trust or an estate, an actuarial interest (within the meaning of § 1.414(c)-2(b)(2)(ii)) of 50 percent or more of such trust or estate, and

(iii) In the case of a partnership, 50 percent or more of the profits or capital interest of such partnership, then for purposes of determining whether such organization is a member of a brother-sister group of trades or businesses under common control, an interest in such organization excluded under paragraph (c) (2), (3), or (4) of this section shall be treated as not outstanding.

(2) Exempt employees' trust. An interest which is an interest in or stock of such organization held by an employees' trust described in section 401(a) which is exempt from tax under section 501(a) shall be excluded if such trust is for the benefit of the employees of such organization.

(3) Employees. An interest which is an interest in or stock of such organization owned (directly and with the application of § 1.414(c)-4) by an employee of such organization shall be excluded if such interest or stock is subject to conditions which run in favor of a common owner of such organization or in favor of such organization and which substantially restrict or limit the employee's right (or if the employee constructively owns such interest or stock, the direct or record owner's right) to dispose of such interest or stock.

(4) Controlled exempt organization. An interest which is an interest in or stock of such organization shall be excluded if owned (directly and with the application of § 1.414(c)-4) by an organization:

(i) To which section 501(c)(3) (relating to certain educational and charitable organizations which are exempt from tax) applies, and

(ii) Which is controlled directly or indirectly (within the meaning of paragraph (d)(7) of this section) by such organization, by an individual, estate, or trust that is a principal owner of such organization, by an officer, partner, or fiduciary of such organization, or by any combination thereof.

(d) Definitions—(1) Employee. For purposes of this section, the term "employee" has the same meaning such term is given in section 3306(i) of the Code (relating to definitions for purposes of the Federal Unemployment Tax Act).

(2) Principal owner. For purposes of this section, the term "principal owner" means a person who owns (directly and with the application of § 1.414(c)-4)—

(i) In the case of a corporation, 5 percent or more of the total combined voting power of all classes of stock entitled to vote in such corporation or 5 percent of more of the total value of shares of all classes of stock of such corporation;

(ii) In the case of a trust or estate, an actuarial interest of 5 percent or more of such trust or estate; or

(iii) In the case of a partnership, 5 percent or more of the profits or capital interest of such partnership.

(3) Officer. For purposes of this section, the term "officer" includes the president, vice-presidents, general manager, treasurer, secretary, and comptroller of a corporation, and any other person who performs duties corresponding to those normally performed by persons occupying such positions.

(4) Partner. For purposes of this section, the term "partner" means any person defined in section 7701(a)(2) (relating to definitions of partner).

(5) Fiduciary. For purposes of this section and § 1.414(c)-4, the term "fiduciary" has the same meaning as such term is given in section 7701(a)(6) and the regulations thereunder.

(6) Substantial conditions. (i) In general. For purposes of this section, an interest in or stock of an organization is subject to conditions which substantially restrict or limit the right to dispose of such interest or stock and which run in favor of another person if the condition extends directly or indirectly to such person preferential rights with respect to the acquisition of the direct owner's (or the record owner's) interest or stock. For a condition to be in favor of another person it is not necessary that such person be extended a discriminatory concession with respect to price. A right of first refusal with respect to an interest or stock in favor of another person is a condition which substantially restricts or limits the direct or record owner's right of disposition which runs in favor of such person. Further, any legally enforceable condition which prohibits the direct or record owner from disposing of his or her interest or stock without the consent of another person will be considered to be a substantial limitation running in favor of such person.

(ii) Special rule. For purposes of paragraph (c)(3) of this section only, if a condition which restricts or limits an employee's right (or direct or record owner's right) to dispose of his or her interest or stock also applies to the interest or stock in such organization held by a common owner pursuant to a bonafide reciprocal purchase arrangement, such condition shall not be treated as a substantial limitation or restriction. An example of a reciprocal purchase arrangement is an agreement whereby a common owner and the employee are given a right of first refusal with respect to stock of the employer corporation owned by the other party. If, however, the agreement also provides that the common owner has the right to purchase the stock of the employer corporation owned by the employee in the event the corporation should discharge the employee for reasonable cause, the purchase arrangement would not be reciprocal within the meaning of this subdivision.

(7) Control. For purposes of paragraphs (b)(6) and (c)(4) of this section, the term "control" means control in fact. The determination of whether there exists control in fact will depend upon all of the facts and circumstances of each case, without regard to whether such control is legally enforceable and irrespective of the method by which such control is exercised or exercisable.

(e) Examples. The provisions of this section may be illustrated by the following examples:

Example (1). ABC Partnership owns 70 percent of the capital interest and of the profits interest in the DEF Partnership. The remaining capital interest and profits interest in DEF is owned as follows: 4 percent by A (a general partner in ABC), and 26 percent by D (a limited partner in ABC). ABC satisfies the 50-percent capital interest or profits interest ownership requirement of paragraph (b)(1)(iii) of this section with respect to DEF. Since A and D are partners of ABC, under paragraph (b)(4) of this section the capital and profits interests in DEF owned by A and D are treated as not outstanding for purposes of determining whether ABC and DEF are members of a parent-subsidiary group of trades or businesses under common control under § 1.414 (c)-2(b). Thus, ABC is considered to own 100 percent (70% 0170) of the capital interest and profits interest in DEF. Accordingly, ABC and DEF are members of a parent-subsidiary group of trades or businesses under common control.

Example (2). Assume the same facts as in example (1) and assume further that A owns 15 shares of the 100 shares of the only class of stock of S Corporation and DEF Partnership owns 75 shares of such stock. ABC satisfies the 50 percent stock requirement of paragraph (b)(1)(i) of this section with respect to S since ABC is considered as owning 52.5 percent (70 percent × 75 percent) of the S stock with the application of § 1.414 (c)-4(b)(2). Since A is a partner of ABC, the S stock owned by A is treated as not outstanding for purposes of determining whether S is a member of a parent-subsidiary group of trades or businesses under common control. Thus, DEF Partnership is considered to own stock possessing 88.2 percent (75% 0185) of the voting power and value of the S stock. Accordingly, ABC Partnership, DEF Partnership, and S Corporation are members of a parent-subsidiary group of trades or businesses under common control.

Example (3). ABC Partnership owns 60 percent of the only class of stock of Corporation Y. D, the president of Y, owns the remaining 40 percent of the stock of Y. D has agreed that if she offers her stock in Y for sale she will first offer the stock to ABC at a price equal to the fair market value of the stock on the first date the stock is offered for sale. Since D is an employee of Y within the meaning of section 3306(i) of the Code and her stock in Y is subject to a condition which substantially restricts or limits her right to dispose of such stock and runs in favor of ABC Partnership, under paragraph

(b)(5) of this section such stock is treated as not outstanding for purposes of determining whether ABC and Y are members of a parent-subsidiary group of trades or businesses under common control. Thus, ABC Partnership is considered to own stock possessing 100 percent of the voting power and value of the stock of Y. Accordingly, ABC Partnership and Y Corporation are members of a parent-subsidiary group of trades or businesses under common control. The result would be the same if D's husband, instead of D, owned directly the 40 percent stock interest in Y and such stock was subject to a right of first refusal running in favor of ABC Partnership.

(f) Exception—(1) In general. If an interest in an organization (including stock of a corporation) is owned by a person directly or with the application of the rules of paragraph (b) of § 1.414 (c)-4 and such ownership results in the membership of that organization in a group of two or more trades or businesses under common control for any period, then the interest will not be treated as an excluded interest under paragraph (b) or (c) of this section if the result of applying such provisions is that the organization is not a member of a group of two or more trades or businesses under common control for the period.

(2) Example. The provisions of this paragraph may be illustrated by the following example:

Example. Corporation P owns directly 50 of the 100 shares of the only class of stock of corporation S. A, an officer of P, owns directly 30 shares of S stock which P has an option to acquire. If, under paragraph (b)(4) of this section, the 30 shares owned directly by A are treated as not outstanding, P would be treated as owning stock possessing only 71 percent (50/70) of the total voting power and value of S stock, and S should not be a member of a parent-subsidiary group of trades or businesses under common control. However, because the 30 shares owned by A that P has an option to purchase are considered as owned by P under paragraph (b)(2) of this section, and that ownership plus P's direct ownership of 50 shares result in S's membership in a parent-subsidiary group of trades or businesses under common control for 1985, the provisions of this paragraph apply. Therefore, A's stock is not treated as an excluded interest and S is a member of a parent-subsidiary group consisting of P and S.

[T.D. 8179, 53 FR 6607, March 2, 1988; T.D. 8179, 53 FR 8302, March 14, 1988]

§ 1.414(c)–4 Rules for determining ownership.

(a) In general. In determining the ownership of an interest in an organization for purposes of § 1.414(c)-2 and § 1.414(c)-3, the constructive ownership rules of paragraph (b) of this section shall apply, subject to the operating rules contained in paragraph (c). For purposes of this section the term "interest" means: in the case of a corporation, stock; in the case of a trust or estate, an actuarial interest; in the case of a partnership, an interest in the profits or capital; and in the case of a sole proprietorship, the proprietorship.

(b) Constructive ownership—(1) Options. If a person has an option to acquire any outstanding interest in an organization, such interest shall be considered as owned by such person. For this purpose, an option to acquire an option, and each one of a series of such options shall be considered as an option to acquire such interest.

(2) Attribution from partnerships—(i) General. An interest owned, directly or indirectly, by or for a partnership shall be considered as owned by any partner having an interest of 5 percent or more in either the profits or capital of the partnership in proportion to such partner's interest in the profits or capital, whichever such proportion is greater.

(ii) Example. The provisions of paragraph (b)(2)(i) of this section may be illustrated by the following example:

Example. A, B, and C, unrelated individuals, are partners in the ABC Partnership. The partners' interest in the capital and profits of ABC are as follows:

(In percent)

Partner	Capital	Profits
A	36	25
B	60	71
C	4	4

The ABC Partnership owns the entire outstanding stock (100 shares) of X Corporation. Under paragraph (b)(2)(i) of this section, A is considered to own the stock of X owned by the partnership in proportion to his interest in capital (36 percent) or profits (25 percent), whichever such proportion is greater. Therefore, A is considered to own 36 shares of X stock. Since B has a greater interest in the profits of the partnership than in the capital, B is considered to own X stock in proportion to his interest in such profits. Therefore, B is considered to own 71 shares of X stock. Since C does not have an interest of 5 percent or more in either the capital or profits of ABC, he is not considered to own any shares of X stock.

(3) Attribution from estates and trusts—(i) In general. An interest in an organization (hereinafter called an "organization interest") owned, directly or indirectly, by or for an estate or trust shall be considered as owned by any beneficiary of such estate or trust who has an actuarial interest of 5 percent or more in such organization interest, to the extent of such actuarial interest. For purposes of this subparagraph, the actuarial interest of each beneficiary shall be determined by assuming the maximum exercise of discretion by the fiduciary in favor of such beneficiary and the maximum use of the organization interest to satisfy the beneficiary's rights. A beneficiary of an estate or trust who

cannot under any circumstances receive any part of an organization interest held by the estate or trust, including the proceeds from the disposition thereof, or the income therefrom, does not have an actuarial interest in such organization interest. Thus, where stock owned by a decedent's estate has been specifically bequeathed to certain beneficiaries and the remainder of the estate has been specifically bequeathed to other beneficiaries, the stock is attributable only to the beneficiaries to whom it is specifically bequeathed. Similarly a remainderman of a trust who cannot under any circumstances receive any interest in the stock of a corporation which is a part of the corpus of the trust (including any accumulated income therefrom or the proceeds from a disposition thereof) does not have an actuarial interest in such stock. However, an income beneficiary of a trust does have an actuarial interest in stock if he has any right to the income from such stock even though under the terms of the trust instrument such stock can never be distributed to him. The factors and methods prescribed in § 20.2031-7 or § 20.2031-10 (Estate Tax Regulations), whichever is appropriate for use in ascertaining the value of an interest in property for estate tax purposes shall be used for purposes of this subdivision in determining a beneficiary's actuarial interest in an organization interest owned directly or indirectly by or for an estate or trust.

(ii) Special rules for estates. (A) For purposes of this paragraph (b)(3) with respect to an estate, property of a decedent shall be considered as owned by his or her estate if such property is subject to administration by the executor or administrator for the purposes of paying claims against the estate and expenses of administration notwithstanding that, under local law, legal title to such property vests in the decedent's heirs, legatees or devisees immediately upon death.

(B) For purposes of this paragraph (b)(3) with respect to an estate, the term "beneficiary" includes any person entitled to receive property of a decedent pursuant to a will or pursuant to laws of descent and distribution.

(C) For purposes of this paragraph (b)(3) with respect to an estate, a person shall no longer be considered a beneficiary of an estate when all the property to which he or she is entitled has been received by him or her, when he or she no longer has a claim against the estate arising out of having been a beneficiary, and when there is only a remote possibility that it will be necessary for the estate to seek the return of property from him or her or to seek payment from him or her by contribution or otherwise to satisfy claims against the estate or expenses of administration.

(iii) Grantor trusts, etc. An interest owned, directly or indirectly, by or for any portion of a trust of which a person is considered the owner under subpart E, part I, subchapter J of the Code (relating to grantors and others treated as substantial owners) is considered as owned by such person.

(4) Attribution from corporations—(i) General. An interest owned, directly or indirectly, by or for a corporation shall be considered as owned by any person who owns (directly and, in the case of a parent-subsidiary group of trades or businesses under common control, with the application of paragraph (b)(1) of this section, or in the case of a brother-sister group of trades or business under common control, with the application of this section), 5 percent or more in value of the stock in that proportion which the value of the stock which such person so owns bears to the total value of all the stock in such corporation.

(ii) Example. The provisions of paragraph (b)(4)(i) of this section may be illustrated by the following example:

Example. B, an individual, owns 60 of the 100 shares of the only class of outstanding stock of corporation P. C, an individual, owns 4 shares of the P stock, and corporation X owns 36 shares of the P stock. Corporation P owns, directly and indirectly, 50 shares of the stock of corporation S. Under this subparagraph, B is considered to own 30 shares of the S stock ($60/100 \times 50$), and X is considered to own 18 shares of S stock ($36/100 \times 50$). Since C does not own 5 percent or more in the value of P stock, he is not considered as owning any of the S stock owned by P. If in this example, C's wife had owned directly 1 share of the P stock, C and his wife would each be considered as owning 5 shares of the P stock, and therefore C and his wife would be considered as owning 2.5 shares of the S stock ($5/100 \times 50$).

(5) Spouse—(i) General rule. Except as provided in paragraph (b)(5)(ii) of this section, an individual shall be considered to own an interest owned, directly or indirectly, by or for his or her spouse, other than a spouse who is legally separated from the individual under a decree of divorce, whether interlocutory or final, or a decree of separate maintenance.

(ii) Exception. An individual shall not be considered to own an interest in an organization owned, directly or indirectly, by or for his or her spouse on any day of a taxable year of such organization, provided that each of the following conditions are satisfied with respect to such taxable year:

(A) Such individual does not, at any time during such taxable year, own directly any interest in such organization;

(B) Such individual is not a member of the board of directors, a fiduciary, or an employee of such organization and does not participate in the management of such organization at any time during such taxable year;

(C) Not more than 50 percent of such organization's gross income for such taxable year was derived from royalties, rents, dividends, interest, and annuities; and

(D) Such interest in such organization is not, at any time during such taxable year, subject to conditions which substantially restrict or limit the spouse's right to dispose of such interest and which run in favor of the individual or the individual's children who have not attained the age of 21 years. The principles of § 1.414(c)-3(d)(6)(i) shall apply in determining whether a condition is a condition described in the preceding sentence.

(iii) Definitions. For purposes of paragraph (b)(5)(ii)(C) of this section, the gross income of an organization shall be determined under section 61 and the regulations thereunder. The terms "interest", "royalties", "rents", "dividends", and "annuities" shall have the same meaning such terms are given for purposes of section 1244(c) and § 1.1244(c)-1(e)(1).

(6) Children, grandchildren, parents, and grandparents—(i) Children and parents. An individual shall be considered to own an interest owned, directly or indirectly, by or for the individual's children who have not attained the age of 21 years, and if the individual has not attained the age of 21 years, an interest owned, directly or indirectly, by or for the individual's parents.

(ii) Children, grandchildren, parents, and grandparents. If an individual is in effective control (within the meaning of § 1.414(c)-2(c)(2)), directly and with the application of the rules of this paragraph without regard to this subdivision, of an organization, then such individual shall be considered to own an interest in such organization owned, directly or indirectly, by or for the individual's parents, grandparents, grandchildren, and children who have attained the age of 21 years.

(iii) Adopted children. For purposes of this section, a legally adopted child of an individual shall be treated as a child of such individual.

(iv) Example. The provisions of this subparagraph (6) may be illustrated by the following example:

Example—(A) Facts. Individual F owns directly 40 percent of the profits interest of the DEF Partnership. His son, M, 20 years of age, owns directly 30 percent of the profits interest of DEF, and his son, A, 30 years of age, owns directly 20 percent of the profits interest of DEF. The 10 percent remaining of the profits interest and 100 percent of the capital interest of DEF is owned by an unrelated person.

(B) F's ownership. F owns 40 percent of the profits interest in DEF directly and is considered to own the 30 percent profits interest owned directly by M. Since, for purposes of the effective control test contained in paragraph (b)(6)(ii) of this section, F is treated as owning 70 percent of the profits interest of DEF, F is also considered as owning the 20 percent profits interest of DEF owned by his adult son, A. Accordingly, F is considered as owning a total of 90 percent of the profits interest in DEF.

(C) M's ownership. Minor son, M. owns 30 percent of the profits interest in DEF directly, and is considered to own the 40 percent profits interest owned directly by his father, F. However, M is not considered to own the 20 percent profits interest of DEF owned directly by his brother, A, and constructively by F, because an interest constructively owned by F by reason of family attribution is not considered as owned by him for purposes of making another member of his family the constructive owner of such interest. (See paragraph (c)(2) of this section.) Accordingly, M is considered as owning a total of 70 percent of the profits interest of the DEF Partnership.

(D) A's ownership. Adult son, A, owns 20 percent of the profits interest in DEF directly. Since, for purposes of determining whether A effectively controls DEF under paragraph (b)(6)(ii) of this section, A is treated as owning only the percentage of profits interest he owns directly, he does not satisfy the condition precedent for the attribution of the DEF profits interest from his father. Accordingly, A is considered as owning only the 20 percent profits interest in DEF which he owns directly.

(c) Operating rules—(1) In general. Except as provided in paragraph (c)(2) of this section, an interest constructively owned by a person by reason of the application of paragraph (b) (1), (2), (3), (4), (5), or (6) of this section shall, for the purposes of applying such paragraph, be treated as actually owned by such person.

(2) Members of family. An interest constructively owned by an individual by reason of the application of paragraph (b) (5) or (6) of this section shall not be treated as owned by such individual for purposes of again applying such subparagraphs in order to make another the constructive owner of such interest.

(3) Precedence of option attribution. For purposes of this section, if an interest may be considered as owned under paragraph (b)(1) of this section (relating to option attribution) and under any other subparagraph of paragraph (b) of this section, such interest shall be considered as owned by such person under paragraph (b)(1) of this section.

(4) Examples. The provisions of this paragraph may be illustrated by the following examples:

Example (1). A, 30 years of age, has a 90 percent interest in the capital and profits of DEF Partnership. DEF owns all the outstanding stock of corporation X and X owns 60 shares of the 100 outstanding shares of corporation Y. Under paragraph (c)(1) of this section, the 60 shares of Y constructively owned by DEF by reason of paragraph (b)(4) of this section are treated as actually owned by DEF for purposes of applying paragraph (b)(2) of this section. Therefore, A is considered as owning 54 shares of the Y stock (90 percent of 60 shares).

Example (2). Assume the same facts as in example (1). Assume further that B, who is 20 years of age and the brother of A, directly owns 40 shares of Y stock. Although the stock of Y owned by B is considered as owned by C (the father of A and B) under paragraph (b)(6)(i) of this section, under paragraph (c)(2) of this section such stock may not be treated as owned by C for purposes of applying paragraph (b)(6)(ii) of this section in order to make A the constructive owner of such stock.

Example (3). Assume the same facts as in example (2), and further assume that C has an option to acquire the 40 shares of Y stock owned by his son, B. The rule contained in paragraph (c)(2) of this section does not prevent the reattribution of such 40 shares to A because, under paragraph (c)(3) of this section, C is considered as owning the 40 shares by reason of option attribution and not by reason of family attribution. Therefore, since A is in effective control of Y under paragraph (b)(6)(ii) of this section, the 40 shares of Y stock constructively owned by C are reattributed to A. A is considered as owning a total of 94 shares of Y stock.

[T.D. 8179, 53 FR 6609, March 2, 1988; T.D. 8179, 53 FR 8302, March 14, 1988]

§ 1.414(c)–5 Effective date.

(a) General rule. Except as provided in paragraph (b), (c), (e), or (f) of this section, the provisions of § 1.414(b)-1 and §§ 1.414(c)-1 through 1.414 (c)-4 shall apply for plan years beginning after September 2, 1974.

(b) Existing plans. In the case of a plan in existence on January 1, 1974, unless paragraph (c) of this section applies, the provisions of "§ 1.414 (b)-1 and §§ 1.414(c)-1 through 1.414(c)-4 shall apply for plan years beginning after December 31, 1975. For definition of the term "existing plan", see § 1.410(a)-2(c).

(c) Existing plans electing new provisions. In the case of a plan in existence on January 1, 1974, for which the plan administrator makes an election under § 1.410 (a)-2 (d), the provisions of § 1.414 (b)-1 and §§ 1.414 (c)-1 through 1.414 (c)-4 shall apply to the plan years elected under § 1.410 (a)-2 (d).

(d) Application. For purposes of the Employee Retirement Income Security Act of 1974, the provisions of § 1.414 (b)-1 and §§ 1.414 (c)-1 through 1.414 (c)-4 do not apply for any period of time before the plan years described in paragraph (a), (b), or (c) of this section, whichever is applicable.

(e) Special rule. Notwithstanding paragraph (a), (b), or (c) of this section, § 1.414 (c)-3 (f) is effective April 1, 1988.

(f) Transitional rule—(1) In general. The amendments made by T.D. 8179 apply to the plan years or period described in paragraphs (a), (b), or (c) of this section, whichever is applicable.

(2) Exception. In the case of a plan year or period beginning before March 2, 1988, if an organization—

(i) Is a member of a brother-sister group of trades or businesses under common control under § 11.414 (c)-2 (c), as in effect before removal by T.D. 8179 ("old group"), for such plan year or period, and

(ii) Is not such a member for such plan year or period because of the amendments made by such Treasury decision,

such member (whether or not a corporation) nevertheless will be treated as a member of such old group for purposes of section 414(c) for that plan year or period to the extent provided in § 1.1563-1 (d)(2). Also, such member will be treated as a member of an old group for all purposes of the Code for such plan year or period if all the organizations (whether or not corporations) that are members of the old group meet all the requirements of §1.1563-1 (d)(3) with respect to such plan year or period.

[T.D. 8179, 53 FR 6611, March 2, 1988]

§ 1.414(e)–1 Definition of church plan.

(a) General rule. For the purposes of part I of subchapter D of chapter 1 of the Code and the regulations thereunder, the term "church plan" means a plan established and at all times maintained for its employees by a church or by a convention or association of churches (hereinafter included within the term "church") which is exempt from tax under section 501(a), provided that such plan meets the requirements of paragraphs (b) and (if applicable) (c) of this section. If at any time during its existence a plan is not a church plan because of a failure to meet the requirements set forth in this section, it cannot thereafter become a church plan.

(b) Unrelated businesses—(1) In general. A plan is not a church plan unless it is established and maintained primarily for the benefit of employees (or their beneficiaries) who are not em-

ployed in connection with one or more unrelated trades or businesses (within the meaning of section 513).

(2) Establishment or maintenance of a plan primarily for persons not employed in connection with one or more unrelated trades or businesses. (i)(A) A plan, other than a plan in existence on September 2, 1974, is established primarily for the benefit of employees (or their beneficiaries) who are not employed in connection with one or more unrelated trades or businesses if on the date the plan is established the number of employees employed in connection with the unrelated trades or businesses eligible to participate in the plan is less than 50 percent of the total number of employees of the church eligible to participate in the plan.

(B) A plan in existence on September 2, 1974, is to be considered established as a plan primarily for the benefit of employees (or their beneficiaries) who are not employed in connection with one or more unrelated trades or businesses if it meets the requirements of both paragraphs (b)(2)(ii)(A) and (B) (if applicable) in either of its first 2 plan years ending after September 2, 1974.

(ii) For plan years ending after September 2, 1974, a plan will be considered maintained primarily for the benefit of employees of a church who are not employed in connection with one or more unrelated trades or businesses if in 4 out of 5 of its most recently completed plan years—

(A) Less than 50 percent of the persons participating in the plan (at any time during the plan year) consist of and in the same year

(B) Less than 50 percent of the total compensation paid by the employer during the plan year (if benefits or contributions are a function of compensation) to employees participating in the plan is paid to,

employees employed in connection with an unrelated trade or business. The determination that the plan is not a church plan will apply to the second year (within a 5 year period) for which the plan fails to meet paragraph (b)(2)(ii)(A) or (B) (if applicable) and to all plan years thereafter unless, taking into consideration all of the facts and circumstances as described in paragraph (b)(2)(iii) of this section, the plan is still considered to be a church plan. A plan that has not completed 5 plan years ending after September 2, 1974, shall be considered maintained primarily for the benefit of employees not employed in connection with an unrelated trade or business unless it fails to meet paragraphs (b)(2)(ii)(A) and (B) in at least 2 such plan years.

(iii) Even though a plan does not meet the provisions of paragraph (b)(2)(ii) of this section, it nonetheless will be considered maintained primarily for the benefit of employees who are not employed in connection with one or more unrelated trades or businesses if the church maintaining the plan can demonstrate that based on all of the facts and circumstances such is the case. Among the facts and circumstances to be considered in evaluating each case are:

(A) The margin by which the plan fails to meet the provisions of paragraph (b)(2)(ii) of this section, and

(B) Whether the failure to meet such provisions was due to a reasonable mistake as to what constituted an unrelated trade or business or whether a particular person or group of persons were employed in connection with one or more unrelated trades or businesses.

(iv) For purposes of this section, an employee will be considered eligible to participate in a plan if such employee is a participant in the plan or could be a participant in the plan upon making mandatory employee contributions to the plan.

(3) Employment in connection with one or more unrelated trades or businesses. An employee is employed in connection with one or more unrelated trades or businesses of a church if a majority of such employee's duties and responsibilities in the employ of the church are directly or indirectly related to the carrying on of such trades or businesses. Although an employee's duties and responsibilities may be insignificant with respect to any one unrelated trade or business, such employee will nonetheless be considered as employed in connection with one or more unrelated trades or businesses if such employee's duties and responsibilities with respect to all of the unrelated trades or businesses of the church represent a majority of the total of such person's duties and responsibilities in the employ of the church.

(c) **Plans of two or more employers.** The term "church plan" does not include a plan which, during the plan year, is maintained by two or more employers unless—

(1) Each of the employers is a church that is exempt from tax under section 501(a), and

(2) With respect to the employees of each employer, the plan meets the provisions of paragraph (b)(2)(ii) of this section or would be determined to be a church plan based on all the facts and

circumstances described in paragraph (b)(2)(iii) of this section.

Thus, if with respect to a single employer the plan fails to meet any provision of this paragraph, the entire plan ceases to be a church plan unless that employer ceases maintaining the plan for all plan years beginning after the plan year in which it receives a final notification from the Internal Revenue Service that it does not meet the provisions of this paragraph. If the employer does cease maintaining the plan in accordance with this paragraph, the fact that the employer formerly did maintain the plan will not prevent the plan from being a church plan for prior years.

(d) Special rule. (1) Notwithstanding paragraph (c)(1) of this section, a plan maintained by a church and one or more agencies of such church for the employees of such church and of such agency or agencies, that is in existence on January 1, 1974, shall be treated as a church plan for plan years ending after September 2, 1974, and beginning before January 1, 1983, provided that the plan is described in paragraph (c) of this section without regard to paragraph (c)(1) of this section, and the plan is not maintained by an agency which did not maintain the plan on January 1, 1974.

(2) For the purposes of section 414(e) and this section, an agency of a church means an organization which is exempt from tax under section 501 and which is either controlled by, or associated with, a church. For example, an organization, a majority of whose officers or directors are appointed by a church's governing board or by officials of a church, is controlled by a church within the meaning of this paragraph. An organization is associated with a church if it shares common religious bonds and convictions with that church.

(e) Religious orders and religious organizations. For the purpose of this section the term "church" includes a religious order or a religious organization if such order or organization (1) is an integral part of a church, and (2) is engaged in carrying out the functions of a church, whether as a civil law corporation or otherwise.

(f) Separately incorporated fiduciaries. A plan which otherwise meets the provisions of this section shall not lose its status as a church plan because of the fact that it is administered by a separately incorporated fiduciary such as a pension board or a bank.

(g) Cross reference. (1) For rules relating to treatment of church plans, see section 410(c), 411(e), 412(h), 4975(g), and the regulations thereunder.

(2) For rules relating to church plan elections, see section 410(d) and the regulations thereunder.

[T.D. 7688, 45 FR 20797, March 31, 1980]

§ 1.414(f)–1 Definition of multiemployer plan.

(a) **General rule.** For purposes of part I of subchapter D of chapter 1 of the Code and the regulations thereunder, a plan is a multiemployer plan for a plan year if all of the following requirements are satisfied:

(1) **Number of contributing employers.** More than one employer is required by the plan instrument or other agreement to contribute (or to have contributions made on its behalf) to the plan for the plan year.

(2) **Collective bargaining agreement.** The plan is maintained for the plan year pursuant to one or more collective bargaining agreements between employee representatives and more than one employer.

(3) **Amount of contributions.** Except as provided by paragraph (c) of this section (relating to the special rule for contributions exceeding 50 percent), the amount of contributions made under the plan for the plan year by or on behalf of each employer is less than 50 percent of the total amount of contributions made under the plan for such plan year by or on behalf of all employers.

(4) **Benefits.** The plan provides that the amount of benefits payable with respect to each employee participating in the plan is determined without regard to whether or not his employer continues as a member of the plan. If benefits accrued as a result of the participant's service with his employer during a period before such employer was a member of the plan, this requirement does not apply to the amount of those benefits, except that this requirement does apply to the amount of those benefits (i) which are accrued benefits derived from employee contributions, or (ii) which are accrued under a plan maintained by an employer prior to the time such employer became a member of the plan to which the requirements of this paragraph (a) are applied.

(5) **Other requirements.** The plan satisfies such other requirements as the Secretary of Labor by regulations prescribes under the authority of section 414(f)(1)(E) of the Code and section 3(37) of the Employee Retirement Income Security Act of 1974 (Pub. L. 93–406, 88 Stat. 839). See 29 CFR 2510.3–37.

(b) Special rules—(1) Amount of contributions. For purposes of paragraphs (a)(3) and (c) of this section, the amount of contributions made under the plan for the plan year by or on behalf of each employer shall be the sum of such contributions made on or before the last day of the plan year. For purposes of determining whether contributions are made on or before the last day of the plan year, the rule of section 412(c)(10) and the regulations thereunder (relating to the treatment of certain contributions made after the last day of the plan year as made on such last day) shall apply.

(2) Benefits. (i) For purposes of paragraph (a)(4) of this section, certain benefit amounts are treated as accrued as a result of the participant's service with an employer during a period before such employer was a member of the plan. The amount of such a benefit so treated is the difference (if any) between two calculated amounts. The first calculated amount is the participant's total accrued benefit calculated under the plan as of the date the employer ceased to be a member of the plan. The second calculated amount is the participant's accrued benefit calculated without regard to his service with such employer during the period before such employer was a member of the plan. However, under a special limitation, this difference may not exceed the benefit a participant accrued from service before his employer became a member of the plan. For purposes of this limitation, this benefit is the benefit accrued as of the date the employer ceases to be a member of the plan. An employer shall be deemed to be a member of the plan in a plan year if the employer is required by the plan instrument or other agreement to contribute (or to have contributions made on its behalf) to the plan for such plan year or if an employee of the employer accrues a benefit, on account of service with the employer during such plan year, under the plan for that plan year.

(ii) The provisions of paragraphs (a)(4) and (b)(2)(i) of this section are illustrated by the following example:

Example. On January 1, 1976, employer W became a member of the noncontributory XYZ pension plan which uses the calendar year as the plan year. W did not maintain any plan prior to that date. The plan provided for benefits of $4 per month per year of service (including service with W before January 1, 1976). On January 1, 1980, following adoption of a new collective bargaining agreement, the benefits were increased to $12 per month per year of service for all years of service (including service with W before January 1, 1976). On January 1, 1991, W ceased to be a member of the plan.

A, an employee of W, had 15 years of service before January 1, 1976, 4 years of service between January 1, 1976, and December 31, 1979, and 11 years of service between January 1, 1980, and December 31, 1990. On December 31, 1990, A's accrued benefit was $360 per month ($12 per month × 30). On January 1, 1991, the portion of A's accrued benefit retained and the portion forfeited under the terms of the XYZ pension plan were determined as follows:

Years	Monthly accrued benefit retained	Monthly accrued benefit forfeited
Before Jan. 1, 1976	....	$12 × 15 years = $180
Jan. 1, 1976 to Dec. 31, 1979	$4 × 4 years = $16	$8 × 4 years = $32
Jan. 1, 1980 to Dec. 31, 1990	$12 × 11 years = $132	....
Total	$148	$212

The XYZ plan does not satisfy the requirements of paragraphs (a)(4) and (b)(2)(i) of this section because no benefit can be forfeited with respect to service after W began participating in the plan. Thus, the maximum accrued benefit that may be forfeited is $180 per month (the accrued benefit with respect to A's service prior to January 1, 1976). Therefore, in order for the plan to meet the requirements of paragraphs (a)(4) and (b)(2)(i) of this section, the plan must provide for A's accrued benefit after W ceased to be a member of the plan to be at least $180 per month ($360 per month total accrued benefit less $180 per month benefit accrued for service prior to W's membership in the plan).

(iii) For purposes of paragraphs (a)(4) and (b)(2) of this section, if an employer for a period employs two or more individuals who, solely by reason of their employment, are participants in the plan and who do not belong to the same collective bargaining unit, the dates on which the employer became and ceased to be a member of the plan shall be determined separately on a class basis for individuals who belong to separate collective bargaining units, as separate classes, and for individuals who do not belong to a collective bargaining unit, as a further single separate class. Thus, such dates shall be determined with respect to individuals as a class who belong to the same collective bargaining unit (or who do not belong to a collective bargaining unit) without consideration of the employment by the employer of, or the participation in the plan by, other individuals (who do not belong to such collective bargaining unit and who may belong to another collective bargaining unit) or whether the employer is a member of the plan with respect to such other individuals. In no event, however, may service not attributable to service with a particular collective bargaining unit be disregarded under paragraphs (a)(4) and (b)(2) of this section merely because the employer ceases to maintain the plan with respect to such unit. Thus, for example, paragraphs (a)(4) and (b)(2) of

this section do not permit the disregard of a period of service of an individual belonging to a collective bargaining unit prior to the time the employer became a member of the plan with respect to such unit to the extent that, during such period of service, the individual belonged to another collective bargaining unit with respect to which the employer was a member of the plan.

(3) Controlled groups. For purposes of section 414(f) and this section, all corporations which are members of a controlled group of corporations (within the meaning of section 1563(a) and the regulations thereunder, but determined without regard to section 1563(e)(3)(C) and the regulations thereunder) are deemed to be one employer.

(c) Contributions exceeding 50 percent. If a plan was a multiemployer plan as defined in this section for any plan year (including plan years ending prior to September 3, 1974), "75 percent" shall be substituted for "50 percent" in applying paragraph (a)(3) of this section for subsequent plan years until the first plan year following a plan year in which the amount contributed by or on behalf of one employer is 75 percent or more of the total amount of contributions made under the plan for that plan year by or on behalf of all of the employers making contributions. In such case "75 percent" shall not again be substituted for "50 percent" until the plan has met the requirements of paragraph (a) of this section (determined without regard to this paragraph) for one plan year.

(d) Examples. The application of this section is illustrated by the following examples. For purposes of these examples, assume that the plan meets the requirements of paragraphs (a)(1), (2), (4), and (5) of this section for each plan year.

Example (1). On January 1, 1970, U, V, and W, three employers none of which is a member of a controlled group of corporations with any of the other two employers, establish a plan with a plan year corresponding to the calendar year. U, V, and W each contribute less than one-half of the total contributions made under the plan for each of the years 1970, 1971, and 1972. For the years 1973, 1974, and 1975, U contributes 70 percent and V and W each contribute 15 percent of the total contributions made under the plan for each year. The plan is a multiemployer plan under section 414(f) and this section for 1975 because no employer has contributed 75 percent or more of the total amount contributed for each of the plan years subsequent to 1972.

Example (2). (i) **First plan year.** On January 1, 1975, X, Y, and Z, three employers none of which is a member of a controlled group of corporations with any of the other two employers, establish a plan with a plan year corresponding to the calendar year. X, Y, and Z each contribute less than one-half of the total contributions made under the plan for 1975. The plan is a multiemployer plan for 1975 because it meets the 50 percent contribution requirement of paragraph (a)(3) of this section.

(ii) **Second plan year.** For the second plan year, 1976, X contributes 70 percent and Y and Z each contribute 15 percent of the total contributions made under the plan. The plan is a multiemployer plan for 1976 because it was a multiemployer plan for the preceding plan year and satisfies the 75 percent contribution requirement of paragraph (c) of this section.

(iii) **Third plan year.** For the third plan year, 1977, X contributes 80 percent and Y and Z each contribute 10 percent of the total contributions made under the plan. The plan is not a multiemployer plan for 1977 because it fails to satisfy the 75 percent contribution requirement of paragraph (c) of this section.

(iv) **Fourth plan year.** For the fourth plan year, 1978, Y contributes 60 percent and X and Z each contribute 20 percent of the total contributions made under the plan. The 75 percent contribution requirement of paragraph (c) of this section does not apply. The plan is not a multiemployer plan for 1978 because it fails to satisfy the 50 percent contribution requirement of paragraph (a)(3) of this section.

(v) **Fifth plan year.** For the fifth plan year, 1979, X, Y, and Z each contribute less than one-half of the total contributions made under the plan. The 75 percent contribution requirement of paragraph (c) of this section does not apply. The plan is a multiemployer plan for 1979 because it again meets the 50 percent contribution requirement of paragraph (a)(3) of this section.

(vi) **Sixth plan year.** For the sixth plan year, 1980, the plan will continue to be a multiemployer plan, provided that no employer contributes 75 percent or more of the total amount of contributions made under the plan for the plan year.

(e) Retention of records. (1) For plan years ending prior to September 3, 1974, a plan may be required to furnish proof that it met the requirements of section 414(f) and this section for each plan year ending prior to that date to the extent necessary to show the applicability of the 75 percent test provided in paragraph (c) of this section.

(2) For plan years ending after September 2, 1974, a plan may be required to furnish proof that it met the requirements of section 414(f) and this section for 6 immediately preceding plan years.

[T.D. 7552, 43 FR 29940, July 12, 1978]

§ 1.414(g)–1 Definition of plan administrator.

(a) In general. For purposes of part I of subchapter D of chapter 1 of the Code and the regulations thereunder, if the instrument under which the plan is operated for a plan year specifically designates a person or a group of persons as plan administrator, the person or group of persons collectively is the plan administrator for the plan year. The instrument may specifically designate a plan administrator—

(1) By name,

(2) By reference to the person or group of persons holding a named position or positions,

(3) By reference to a procedure established under the terms of the instrument pursuant to which a plan administrator is designated, or

(4) By reference to the person or group of persons charged with specific responsibilities of plan administrator. Consistent with the provisions of section 405(c)(1) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1105(c)(1)), a plan may provide for the allocation of specific responsibilities of plan administrator among named persons and for named persons to designate others to carry out such responsibilities. A person or group of persons may be designated as plan administrator in accordance with the rules of this paragraph even though the person or group of persons does not carry the specific title "plan administrator". In the absence of a person or group of persons designated as the plan administrator (individually, collectively, or by designation of different specific administrative responsibilities), the plan administrator for the plan year is the person or group of persons specified in paragraph (b) of this section.

(b) Plan administrator not specifically designated. If no person or group of persons is specifically designated as the plan administrator for a plan year by the instrument under which the plan is operated, the plan administrator for such year is the person or group of persons determined under the following rules:

(1) Single employer. In the case of a plan maintained by a single employer, the employer is the plan administrator. If the employer is a corporation, the corporation is the plan administrator. However, the corporation's board of directors may authorize a person or group of persons to fulfill responsibilities of the corporation as plan administrator. In the absence of such authorization, any corporate officer authorized under law, corporate by-laws, or resolution of the board of directors to act on behalf of the corporation with respect to contracts of a value equivalent to the fair market value of the assets of the plan shall be presumed to have authority to fulfill responsibilities of the corporation as plan administrator. For purposes of this paragraph (b)(1), "employer" means the "employer" as defined in section 3(5) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1003(5)).

(2) Employee organization. In the case of a plan maintained by an employee organization, the employee organization is the plan administrator.

(3) Group representing the parties. In the case of a plan maintained by two or more employers, or jointly by one or more employers and one or more employee organizations, the association, committee, joint board of trustees, or other similar group of representatives of the parties who maintain the plan, as the case may be, is the plan administrator. For purposes of this subparagraph (3), a plan shall be considered maintained by two or more employers or jointly by one or more employers and one or more employee organizations only if none of the parties has the express power, under the terms of the instrument under which the plan is operated, to terminate the plan unilaterally.

(4) Person in control of assets. In any case where a plan administrator may not be determined by application of paragraphs (a) and (b)(1), (2), and (3) of this section, the plan administrator is the person or persons actually responsible, whether or not under the terms of the plan, for the control, disposition, or management of the cash or property received by or contributed to the plan, irrespective of whether such control, disposition, or management is exercised directly by such person or persons or indirectly through an agent or trustee designated by such person or persons.

[T.D. 7618, 44 FR 27657, May 11, 1979]

§ 1.414(*l*)–1 Mergers and consolidations of plans or transfers of plan assets.

(a) In general—(1) Scope of the regulations. Sections 401(a)(12) and 414(*l*) apply only to plans to which section 411 applies without regard to section 411(e)(2). Thus, for example, these sections do not apply to a governmental plan within the meaning of section 414(d); a church plan, within the meaning of section 414(e), for which there has not been made the election under section 410(d) to have the participation, vesting, funding, etc. requirements apply; or a plan which at no time after September 2, 1974, provided for employer contributions.

(2) General rule. Under section 414(*l*),

(i) A trust which forms a part of a plan will not constitute a qualified trust under section 401, and

(ii) A plan will not be treated as being qualified under section 403(a) and 405(a), unless, in the case of a merger or consolidation (as defined in paragraph (b)(2) of this section), or a transfer of assets or liabilities (as defined in paragraph (b)(3) of this section), the following condition is satisfied. This condition requires that each participant receive benefits on a termination basis (as defined in paragraph (b)(5) of this section) from the plan immediately after the merger, consolidation or transfer

which are equal to or greater than the benefits the participant would receive on a termination basis immediately before the merger, consolidation, or transfer.

(b) Definitions. For purposes of this section:

(1) Single plan. A plan is a "single plan" if and only if, on an ongoing basis, all of the plan assets are available to pay benefits to employees who are covered by the plan and their beneficiaries. * * * For purposes of the preceding sentence, all the assets of a plan will not fail to be available to provide all the benefits of a plan merely because the plan is funded in part or in whole with allocated insurance instruments. A plan will not fail to be a single plan merely because of the following:

(i) The plan has several distinct benefit structures which apply either to the same or different participants,

(ii) The plan has several plan documents,

(iii) Several employers, whether or not affiliated, contribute to the plan,

(iv) The assets of the plan are invested in several trusts or annuity contracts, or

(v) Separate accounting is maintained for purposes of cost allocation but not for purposes of providing benefits under the plan.

However, more than one plan will exist if a portion of the plan assets is not available to pay some of the benefits. This will be so even if each plan has the same benefit structure or plan document, or if all or part of the assets are invested in one trust with separate accounting with respect to each plan.

(2) Merger or consolidation. The terms "merger" or "consolidation" means the combining of two or more plans into a single plan. A merger or consolidation will not occur merely because one or more corporations undergo a reorganization (whether or not taxable). Furthermore, a merger or consolidation will not occur if two plans are not combined into a single plan, such as by using one trust which limits the availability of assets of one plan to provide benefits to participants and beneficiaries of only that plan.

(3) Transfer of assets or liabilities. A "transfer of assets or liabilities" occurs when there is a diminution of assets or liabilities with respect to one plan and the acquisition of these assets or the assumption of these liabilities by another plan. For example, the shifting of assets or liabilities pursuant to a reciprocity agreement between two plans in which one plan assumes liabilities of another plan is a transfer of assets or liabilities. However, the shifting of assets between several funding media used for a single plan (such as between trusts, between annuity contracts, or between trusts and annuity contracts) is not a transfer of assets or liabilities.

(4) Spinoff. The term "spinoff" means the splitting of a single plan into two or more plans.

(5) Benefits on a termination basis. (i) The term "benefits on a termination basis" means the benefits that would be provided exclusively by the plan assets pursuant to section 4044 of the Employee Retirement Income Security Act of 1974 ("ERISA") and the regulations thereunder if the plan terminated. Thus, the term does not include benefits that are guaranteed by the Pension Benefit Guaranty Corporation, but not provided by the plan assets.

(ii) For purposes of determining the benefits on a termination basis, the allocation of assets to various priority categories under section 4044 of ERISA must be made on the basis of reasonable actuarial assumptions. The assumptions used by the Pension Benefit Guaranty Corporation as of the date of the merger or spinoff are deemed reasonable for this purpose.

(iii) If a change in the benefit structure of a plan in conjunction with a merger, consolidation, or transfer of assets or liabilities alters the benefits on a termination basis, the change should be designated, at the time the merger, consolidation, or transfer occurs, to be effective either immediately before or immediately after that occurrence. In the event that no designation is made, the change in the benefit structure will be deemed to occur immediately after the merger, consolidation, or transfer of assets or liabilities.

(6) Lower funded plan. (i) The term "lower funded plan" generally means the plan which, immediately prior to the merger, would have its assets exhausted in a higher priority category than the other plan.

(ii) Where two plans, immediately prior to the merger, would have their assets exhausted in the same priority category of section 4044 of ERISA in the event of termination, the lower funded plan is the one in which the assets would satisfy a lesser proportion of the liability allocated to that priority category.

(7) Priority category. The term "priority category" means the category of benefits described in each paragraph of section 4044(a) of ERISA.

References to higher or highest priority categories refer to those priority categories which receive the first allocation of assets, *i.e.* the lowest paragraph numbers in section 4044(a).

(8) Separate accounting of assets. The term "separate accounting of assets" means the maintenance of an asset account with respect to a given group of participants which is:

(i) Credited with contributions made to the plan on behalf of the participants and with its allocable share of investment income, if any, and

(ii) Charged with benefits paid to the participants, and with its allocable share of investment losses or expenses.

(9) Present value of accrued benefit. For purposes of this section, the present value of an accrued benefit must be determined on the basis of reasonable actuarial assumptions. For this purpose, the assumptions used by the Pension Benefit Guaranty Corporation as of the date of the merger or spinoff are deemed reasonable.

(10) Valuation of plan assets. In determining the value of a plan's assets, the standards set forth in regulations prescribed by the Pension Benefit Guaranty Corporation (29 CFR Part 2611) shall be applied.

(11) Date of merger or spinoff. The actual date of a merger or spinoff shall be determined on the basis of the facts and circumstances of the particular situation. For purposes of this determination, the following factors, none of which is necessarily controlling, are relevant:

(i) The date on which the affected employees stop accruing benefits under one plan and begin coverage and benefit accruals under another plan.

(ii) The date as of which the amount of assets to be eventually transferred is calculated.

(iii) If the merger or spinoff agreement provides that interest is to accrue from a certain date to the date of actual transfer, the date from which such interest will accrue.

(c) Application of section 414(*l*)—(1) Two or more plans. (i) Section 414(*l*) does not apply unless more than a single plan is involved. It also does not apply unless at least a single plan assumes liabilities from another plan or obtains assets from another plan (as in a merger or spinoff). For purposes of section 414(*l*), a transfer of assets or liabilities will not be deemed to occur merely because a defined contribution plan is amended to become a defined benefit plan. This rule will apply even if, under the facts and circumstances of a particular case, a termination of the defined contribution plan will be considered to have occurred for purposes of other provisions of the Code.

(ii) The requirements of this subparagraph may be illustrated as follows:

Example. After acquiring Corporation B, Corporation A amends Corporation B's defined benefit plan (Plan B) to provide the same benefits as Corporation A's defined benefit plan (Plan A). The assets of Plan B are transferred to the trust containing the assets of Plan A in such a manner that the assets of each plan: (1) are separately accounted for, and (2) are not available to pay benefits of the other plan. Because of condition (2) there are still two plans and, therefore, a merger did not occur. As a result, section 414(*l*) does not apply. If at some later date Corporation A were to sell Corporation B and transfer the assets of Plan B that were separately accounted for to another trust or to an annuity contract solely for the purpose of providing Plan B's benefits, this transfer would also not involve section 414(*l*). This is so because Plan B was a separate plan before the entire transaction and because no plan assumed liabilities or obtained assets from another plan. If, on the other hand, Corporation A merged Plan A and Plan B at the time of the acquisition of Corporation B by deleting condition (2) above, then section 414(*l*) would apply both to the merger of Plan A and Plan B and to the spinoff of Plan B from the merged plan. The spinoff would have to satisfy the requirements of paragraph (n) of this section, even if the assets attributable to Plan A and Plan B were separately accounted for in order to allocate funding costs.

(2) Multiemployer plans. Except to the extent provided by regulations of the Pension Benefit Guaranty Corporation, section 414(*l*) does not apply to any transaction to the extent that participants either before or after that transaction are covered under a multiemployer plan within the meaning of section 414(f). Until these regulations are issued, section 414(*l*) does not apply to any of the following situations:

(i) A multiemployer plan is split into two or more plans, one or more of which are not multiemployer plans, or (ii) A single employer plan is merged into a multiemployer plan.

Therefore, if some (but not all) of the participants in a single employer plan become participants in a multiemployer plan under an agreement in which the multiemployer plan assumes all the liabilities of the single employer plan with respect to these participants and in which some or all of the assets of the single employer plan are transferred to the multiemployer plan, section 414(*l*) applies, but only with respect to the participants in the single employer plan who did not transfer to the multiemployer plan.

(d) Merger of defined contribution plans. In the case of a merger of two or more defined contribution plans, the requirements of section

414(l) will be satisfied if all of the following conditions are met:

(1) The sum of the account balances in each plan equals the fair market value (determined as of the date of the merger) of the entire plan assets.

(2) The assets of each plan are combined to form the assets of the plan as merged.

(3) Immediately after the merger, each participant in the plan as merged has an account balance equal to the sum of the account balances the participant had in the plans immediately prior to merger.

(e) Merger of defined benefit plans—(1) General rule. Section 414(l) compares the benefits on a termination basis before and after the merger. If the sum of the assets of all plans is not less than the sum of the present values of the accrued benefit (whether or not vested) of all plans, the requirements of section 414(l) will be satisfied merely by combining the assets and preserving each participant's accrued benefits. This is so because all the accrued benefits of the plan as merged are provided on a termination basis by the plan as merged. However, if the sum of the assets of all plans is less than the sum of the present values of the accrued benefits (whether or not vested) in all plans, the accrued benefits in the plan as merged are not provided on a termination basis.

(2) Special schedule of benefits. Generally, for some participants, the benefits provided on a termination basis for the plan as merged would be different from the benefits provided on a termination basis in the plans prior to merger if the assets were merely combined and if each participant retained his accrued benefit. Some participants would, therefore, receive greater benefits on a termination basis as a result of the merger and some other participants would receive smaller benefits. Accordingly, the requirements of section 414(l) would not be satisfied unless the distribution on termination were modified in some manner to prevent any participant from receiving smaller benefits on a termination basis as a result of the merger. This is accomplished through modifying the application of section 4044 of ERISA by inserting a special schedule of benefits.

(f) Operational rules for the special schedule. The application of section 4044 of ERISA as modified by the schedule of benefits is accomplished by the following steps:

(1) Section 4044 is applied in the plan as merged through the priority categories fully satisfied by the assets of the lower funded plan immediately prior to the merger.

(2) The assets in the plan as merged are then allocated to the next priority category as a percentage of the value of the benefits that would otherwise be allocated to that priority category. That percentage is the ratio of (i) the assets allocated to the first priority category not fully satisfied by the lower funded plan immediately prior to the merger to (ii) the assets that would have been allocated had that priority category been fully satisfied.

(3) A schedule of benefits is formed listing participants and scheduled accrued benefits. The scheduled accrued benefit is the excess of the benefits provided on a termination basis with respect to any participant from the plans immediately prior to the merger, over the benefits provided on a termination basis in subparagraphs (1) and (2) of this paragraph immediately after the merger. After allocating the assets in accordance with subparagraph (2) of this paragraph, the assets are allocated to the schedule of benefits as follows:

(i) First the assets are allocated to the scheduled benefits to the extent that the participant would have benefits provided in subparagraph (4) of this paragraph if there were no scheduled benefits.

(ii) Then the assets are allocated to the scheduled benefits to the extent that the participant would have benefits provided pursuant to subparagraph (5) of this paragraph if there were no scheduled benefits.

These assets should be allocated first to those scheduled benefits that are in the highest priority category under section 4044.

(4) The assets are then allocated to those benefits in the priority category described in subparagraph (2) of this paragraph with respect to which assets were not allocated. This allocation is made to the extent that these benefits are not associated with benefits in the schedule.

(5) Finally, the assets are allocated in accordance with section 4044 with respect to priority categories lower than the priority category described in subparagraph (4) of this paragraph. This allocation is made to the extent that these benefits are not associated with benefits in the schedule.

(g) Successive mergers—(1) In general. In the case of a current merger of a defined benefit plan with another defined benefit plan which as a result of a previous merger has a special schedule, the

rules of paragraphs (e) and (f) of this section apply as if the schedule were considered a category described in section 4044 of ERISA. Thus, a second schedule may be formed as a result of the current merger. The second schedule will be inserted in the priority category of section 4044 described in paragraph (f)(2) of this section as of the date of the current merger. This priority category may be higher, lower, or within the schedule of benefits existing on account of a previous merger. If this priority schedule is inserted within a schedule of benefits, a new single schedule of benefits replacing the old schedule of benefits would in effect be created.

(2) Allocation of assets. Assets in the new schedule of benefits are allocated as follows:

(i) First to the benefits remaining in the old schedule to the extent that there are assets immediately prior to the second merger to satisfy the original benefits,

(ii) Then to the benefits provided on a termination basis from the plans immediately prior to the second merger to the extent that they are not provided before the schedule after the second merger or in subdivision (i) of this subparagraph,

(iii) Then to benefits remaining in the original schedule not included in subdivision (i) of this subparagraph.

(h) De minimis rule for merger of defined benefit plan—(1) In general. In the case of a merger of a defined benefit plan ("smaller plan") whose liabilities (*i.e.*, the present value of accrued benefits, whether or not vested) are less than 3 percent of the assets of another defined benefit plan ("larger plan") as of at least one day in the larger plan's plan year in which the merger of the two plans occurs, section 414(*l*) will be deemed to be satisfied if the following condition is met. The condition requires that a special schedule of benefits (consisting of all the benefits that would be provided by the smaller plan on a termination basis just prior to the merger) be payable in a priority category higher than the highest priority category in section 4044 of ERISA. Assets will be allocated to that schedule in accordance with the allocation of assets to scheduled benefits in paragraph (f)(3) of this section.

(2) Application to a series of mergers. In the case of a series of such mergers in a given plan year of the larger plan, the rule described in subparagraph (1) of this paragraph will apply only if the sum of the liabilities (whether or not vested) assumed by the larger plan are less than 3 percent of the assets of the larger plan as of at least one day in the plan year of the larger plan in which the mergers occurred.

(3) Application to a merger occurring over more than one plan year. In the case of a merger of a smaller plan or a portion thereof with a larger plan designed to occur in steps over more than one plan year of the larger plan, the entire transaction will be deemed to occur in the plan year of the larger plan which contains the first of these steps.

(4) Liabilities of the smaller plan. For purposes of subparagraphs (2) and (3) of this paragraph, mergers satisfying paragraphs (e), (f) or (g) of this section will be ignored in determining the sum of the liabilities assumed by the larger plan.

(i) Data maintenance—(1) Alternative to the special schedule. In the case of a merger which would require the creation of a special schedule in order to satisfy section 414(*l*), the schedule need not be created at the time of the merger if data sufficient to create the schedule is maintained. The schedule would only have to be created in the event of a subsequent plan termination or a subsequent spinoff. In that case the schedule must be determined as of the date of the merger.

(2) Required data. The data that must be maintained depends on the plan, and care should be taken to ensure that all necessary data is maintained. Furthermore, in order to take advantage of the data maintenance alternative provided in this paragraph, an enrolled actuary must certify to the plan administrator that each element of data necessary to determine the schedule as of the date of the merger is maintained. This certification must be based either upon the enrolled actuary's independent examination of the data, or upon his reliance, which under the circumstances of the particular situation must be reasonable, upon a written statement of the plan administrator concerning what data is actually being maintained.

(j) Five year rule—(1) Limitation on the required use of the special schedule. A plan will not fail to satisfy the requirements of section 414(*l*) merely because the effects of the special schedule created pursuant to paragraphs (e)(2) or (h) of this section are ignored 5 years after the date of a merger. Furthermore, the date maintained pursuant to paragraph (i) of this section need not be maintained for more than 5 years after the merger, if the plan does not have a spinoff or a termination within 5 years.

(2) Illustration. If Plans A and B merge to form Plan AB and if Plan AB merges with Plan C 3 years later to form Plan ABC and if Plan ABC

terminates 4 years later, the data relating to the merger of Plans A and B need not be maintained for more than 5 years after the merger of Plans A and B. In addition, after 5 years have elapsed after the merger of Plans A and B, the effect of any special schedule created by the merger of Plans A and B on the schedule created by the merger of Plans AB and C may be ignored in determining the later schedule.

(k) **Examples.** The provisions of paragraphs (e) through (j) of this section may be illustrated by the following examples:

Example (1). Plan A, whose assets are $220,000, is to be merged with Plan B, whose assets are $200,000. Plan A has three employees. Plan B has two employees. If Plans A and B were to terminate just prior to the merger, the benefits provided on a termination basis would be as follows:

Plan A

Priority category of section 4044 of ERISA	(1)—Annual accrued benefits			(2)—Present value of accrued benefits			(3)—Fair market value of assets allocated to priority category	(4)—Benefits on a termination basis		
	EE_1	EE_2	EE_3	EE_1	EE_2	EE_3		EE_1	EE_2	EE_3
3	$10,000	......	......	$120,000	....	....	$120,000	$10,000	......	......
4	2,000	$4,000	......	24,000	$44,000	....	68,000	2,000	$4,000	......
5	....	3,000	$4,000	....	33,000	$40,000	32,000	....	[1]1,315	[2]$1,753
6	....	......	1,000	....	....	10,000	....	....	......	......
Total	....	......	......	....	....	....	220,000	12,000	5,315	1,753

[1] $3,000 × $32,000 ÷ $73,000 i.e. accrued benefit × assets available for priority category 5—Total present value of accrued benefits in category 5.
[2] $4,000 × $32,000 ÷ $73,000.

Plan B

Priority category of section 4044 of ERISA	(1)—Annual accrued benefits					(2)—Present value of accrued benefits					(3)—Fair market value of assets allocated to priority category	(4)—Benefits on a termination basis				
	EE_1	EE_2	EE_3	EE_4	EE_5	EE_1	EE_2	EE_3	EE_4	EE_5		EE_1	EE_2	EE_3	EE_4	EE_5
3	....	....	......	$15,000	.....	....	....	....	$195,000	......	$195,000	....	....	....	$15,000	.....
4	....	....	......	......	$5,000	....	....	....	....	$50,000	5,000	....	....	....	......	[1]$500
5	....	....	......	......	8,000	....	....	....	....	80,000	....	....	....	....	......	.....
Total	....	....	....	......	.....	....	....	....	....	......	200,000	....	....	....	15,000	500

[1] $5,000 ÷ $5,000 × $50,000.

Because Plan B's assets are exhausted in a higher priority category than Plan A's assets, Plan B is the lower funded plan. A schedule will, therefore, be inserted in Priority Category 4 of the plan as merged after providing 10% of the benefits provided in category 4, *i.e.* the ratio of $5,000 assets in Plan B allocated to category 4 to the $50,000 liability in category 4. The schedule would be constructed as follows:

EE	(1)—Benefits on a termination basis before merger	(2)—Benefits provided from priority categories higher than Category 4	(3)—10% of benefits provided in priority Category 4	(4)—Benefits provided before schedule (2) + (3)	(5)—Schedule of benefits (1) − (4)
1	$12,000	$10,000	$200	$10,200	$1,800
2	5,315	....	400	400	4,915
3	1,753	....	....	....	1,753
4	15,000	15,000	....	15,000	....
5	500	....	500	500	....

Example (2). The facts are the same as in Example (1). The plan, however, terminates one year later. Furthermore, no employee has accrued additional benefits during the year except that the $2,000 benefit for EE_1 that was originally in category 4 is now in category 3. The assets would be allocated to the priority categories to the extent that there are assets to cover the following benefits.

Priority termination category	EE_1	EE_2	EE_3	EE_4	EE_5
3	$12,000	....	....	$15,000	....
10% of 4	....	$400	....	....	$500
Schedule of benefits included in balance of Category 4	....	3,600	....	....	....
Schedule of benefits included in Category 5	....	1,315	$1,753	....	....
Schedule of benefits included in Category 6	....	....	....	....	....
Balance of Category 4 not included in schedule	....	....	....	....	4,500
Balance of Category 5 not included in schedule	....	1,685	2,247	....	8,000
Balance of Category 6 not included in schedule	....	....	1,000	....	....

(*l*) **Merger of defined benefit and defined contribution plan.** In the case of a merger of a defined benefit plan with a defined contribution plan, one of the plans before the merger should be converted into the other type of plan (*i.e.*, the defined benefit converted into a defined contribution or the defined contribution converted into a defined benefit) and either paragraph (d) or paragraphs (e) through (j) of this section, whichever is appropriate, should be applied.

(m) **Spinoff of a defined contribution plan.** In the case of a spinoff of a defined contribution plan, the requirements of section 414(*l*) will be satisfied if after the spinoff—

(1) The sum of the account balances for each of the participants in the resulting plans equals the account balance of the participant in the plan before the spinoff, and

(2) The assets in each of the plans immediately after the spinoff equals the sum of the account balances for all participants in that plan.

(n) **Spinoff of a defined benefit plan—(1) General rule.** In the case of a spinoff of a defined benefit plan, the requirements of section 414(*l*) will be satisfied if—

(i) All of the accrued benefits of each participant are allocated to only one of the spun off plans, and

(ii) The value of the assets allocated to each of the spun off plans is not less than the sum of the present value of the benefits on a termination basis in the plan before the spinoff for all participants in that spun off plan.

(2) **De minimis rule.** In the case of a spin off the requirements of section 414(*l*) will be deemed to be satisfied if the value of the assets spun off—

(i) Equals the present value of the accrued benefits spun off (whether or not vested), and

(ii) In conjunction with other assets spun off during the plan year in which the spinoff occurs in accordance with this subparagraph, is less than 3 percent of the assets as of at least one day in that year. Spinoffs occurring in previous or subsequent plan years are ignored if they are not part of a single spinoff designed to occur in steps over more than one plan year.

(3) **Special temporary rule.** In the case of a defined benefit plan maintained for different groups of employees, which is a single plan (as defined in paragraph (b)(1) of this section) and under which there has been separate accounting of assets for each group, a spinoff of the plan on or before July 1, 1978, into a separate plan for each group will be deemed to satisfy section 414(*l*) if—

(i) All the liabilities with respect to each group of employees are allocated to a separate plan for that group of employees, and

(ii) The assets that are separately accounted for with respect to each group of employees are allocated to the separate plan for that group of employees.

For purposes of this subparagraph, a separate accounting of assets will not be considered to have occurred to the extent that the assets allocated to each single plan are determined by an historical re-creation of benefits, contributions, investment gains, etc.

(*o*) **Transfers of assets or liabilities.** Any transfer of assets or liabilities will for purposes of section 414(*l*) be considered as a combination of separate mergers and spinoffs using the rules of paragraphs (d), (e) through (j), (*l*), (m), or (n) of this section, whichever is appropriate. Thus, for example, if in accordance with the transfer of one or more employees, a block of assets and liabilities are transferred from Plan A to Plan B, each of which is a defined benefit plan, the transaction will be considered as a spinoff from Plan A and a merger of one of the spinoff plans with Plan B. The spinoff and merger described in the previous sentence would be subject to the requirements of paragraphs (n) and (e) through (j) of this section respectively.

[T.D. 7638, 44 FR 48195, Aug. 17, 1979]

§ 1.414(q)–1T Highly compensated employee (temporary).

The following questions and answers relate to the definition of "highly compensated employee" provided in section 414(q). The definitions and rules provided in these questions and answers are provided solely for purposes of determining the group of highly compensated employees.

Table of contents.

Q-1: To what employee benefit plans and statutory provisions is the definition of highly compensated employee contained in section 414(q) applicable?

A-1: (a) In general. This definition is applicable to statutory provisions that incorporate the definition by reference.

(b) Qualified retirement plans—(1) In general. Generally, this definition is incorporated in many of the nondiscrimination requirements applicable to pension, profit-sharing, and stock bonus plans qualified under section 401(a). See, e.g., the nondiscrimination provisions of sections 401(a) (4) and (5), 401(k)(3), 401(*l*), 401(m), 406(b), 407(b), 408(k), 410(b) and 411(d)(1). The definition is also incorporated by certain other provisions with respect to such plans, including the aggregation rules of section 414(m) and section 4975 (tax on prohibited transactions).

(2) Not applicable where not incorporated by reference. This definition is not applicable to qualified plan provisions that do not incorporate it. See, e.g., section 415 (limitations on contributions and benefits), with the exception of section 415(c)(3)(C) and 415(c)(6) (special rules for permanent and total disability and employee stock ownership plans respectively).

(c) Other employee benefit plans or arrangements. This definition is incorporated by various sections relating to employee benefit provisions. See, e.g., section 89 (certain other employee benefit plans), section 106 (accident and health plans), 117(d) (qualified tuition reduction), section 125 (cafeteria plans), section 129 (dependent care assistance programs), section 132 (certain fringe benefits), section 274 (certain entertainment, etc. expenses), section 423(b) (employee stock purchase plan provisions), section 501(c) (17) and (18) (certain exempt trusts providing benefits to employees), and section 505 (certain exempt organizations or trusts providing benefits to individuals). See the respective sections for the applicable effective dates.

(d) ERISA. This definition is not determinative with respect to any provisions of Title I of the Employee Retirement Income Security Act of 1974 (ERISA), unless it is explicitly incorporated by reference (e.g., section 408(b)(1)(B)).

Q-2: Who is a highly compensated employee?

A-2: The group of employees (including former employees) who are highly compensated employees consists of both highly compensated active employees (see A-3 of this § 1.414(q)-1T) and highly compensated former employees (see A-4 of this § 1.414(q)-1T). In many circumstances, highly compensated active employees and highly compensated former employees are considered separately in applying the provisions for which the definition of highly compensated employees in section 414(q) is applicable. Specific rules with respect to the treatment of highly compensated active employees and highly compensated former employees will be provided in the regulations with respect to the sections to which the definition of highly compensated employees is applicable.

Q-3: Who is a highly compensated active employee?

A-3: (a) General rule. For purposes of the year for which the determination is being made (the determination year), a highly compensated active employee is any employee who, with respect to the employer, performs services during the determination year and is described in any one or more of the following groups applicable with respect to the look-back year calculation and/or determination year calculation for such determination year. See A-14 for rules relating to the periods for which the look-back year calculation and determination year calculation are to be made.

(1) Look-back year calculation.

(i) 5-percent owner. The employee is a 5-percent owner at any time during the look-back year (i.e., generally, the 12-month period immediately preceding the determination year; see A-14. (See A-8 of this § 1.414(q)-1T.)

(ii) Compensation above $75,000. The employee receives compensation in excess of $75,000 during the look-back year.

(iii) Compensation above $50,000 and top-paid group. The employee receives compensation in excess of $50,000 during the look-back year and is a member of the top-paid group for the look-back year. (See A-9 of this § 1.414(q)-1T.)

(iv) Officer. The employee is an "includible officer" during the look-back year. (See A-10 of this § 1.414(q)-1T.)

(2) Determination year calculation.

(i) 5-percent owner. The employee is a 5-percent owner at any time during the determination year. (See A-8 of this § 1.414(q)-1T.)

(ii) Top-100 employees. The employee is both (A) described in paragraph (a)(1)(i), (ii) and/or (iv) of this A-3, when such paragraphs are modified to substitute the determination year for the look-back year, and (B) one of the 100 employees who receive the most compensation from the employer during the determination year.

(b) Rounding and tie-breaking rules. In making the look-back year and determination year calculations for a determination year, it may be necessary for an employer to adopt a rule for rounding calculations (e.g., in determining the number of employees in the top-paid group). In addition, it may be necessary to adopt a rule breaking ties among two or more employees (e.g., in identifying those particular employees who are in the top-paid group or who are among the 100 most highly compensated employees). In such cases, the employer may adopt any rounding or tie-breaking rules it desires, so long as such rules are reasonable, nondiscriminatory, and uniformly and consistently applied.

(c) Adjustments to dollar thresholds—(1) Indexing of dollar thresholds. The dollar amounts in paragraph (a)(1) (i) and (ii) of this A-3 are indexed at the same time and in the same manner as the section 415(b)(1)(A) dollar limitation for defined benefit plans.

(2) Applicable dollar threshold. The applicable dollar amount for a particular determination year or look-back year is the dollar amount for the calendar year in which such determination year or look-back year begins. Thus, the dollar amount for purposes of determining the highly compensated active employees for a particular look-back year is based on the calendar year in which such look-back year begins, not the calendar year in which such look-back year ends or in which the determination year with respect to such look-back year begins.

(d) Employees described in more than one group. An individual who is a highly compensated active employee for a determination year, by reason of being described in one group in paragraph (a) of this A-3, under either the look-back year calculation or the determination year calculation, is not disregarded in determining whether another individual is a highly compensated active employee by reason of being described in another group under paragraph (a). For example, an individual who is a highly compensated active employee for a determination year, by reason of being a 5-percent owner during such year, who receives compensation in excess of $50,000 during both the look-back year and the determination year, is taken into account in determining the group of employees who are highly compensated active employees for such determination year by reason of receiving more than $50,000, and being in the top-paid group under either or both the look-back year calculation or determination year calculation for such determination year.

(e) Examples. The following examples, in which the determination year and look-back year are the calendar year, are illustrative of the rules in paragraph (a) of this A-3. For purposes of these examples, the threshold dollar amounts in paragraph (a)(1) (ii) and (iii) of this A-3 are not increased pursuant to paragraph (c) of this A-3.

Example (1). Employee A, who is not at any time a 5-percent owner, an officer, or a member of the top-100 within the meaning of paragraph (a)(1) (i), or (iv), or (a)(2) (i) or (ii), but who was a member of the top-paid group for each year, is included in or excluded from the highly compensated groups as specified below for the following years:

Year	Compensation	Status	Comments
1986	$45,000	N/A	Although prior to 414(q) effective date, 1986 constitutes the look-back year for purposes of determining the highly compensated group for the 1987 determination year.
1987	80,000	Excl	Excluded because A was not an employee described in paragraph (a)(1)(ii) or (iii) of this A–3 for the look-back year (1986).

Year	Compensation	Status	Comments
1988	80,000	Incl	Included because A was an employee described in paragraph (a)(1)(ii) or (iii) of this A–3 for the look-back year (1987).
1989	45,000	Incl	Included because A was an employee described in paragraph (a)(1)(ii) or (iii) of this A–3 for the look-back year (1988).
1990	45,000	Excl	Excluded because A was not an employee described in paragraph (a)(1)(ii) or (iii) of this A–3 for the look-back year (1989).

Example (2). Assuming the same facts as those given in Example (1), except that A is a member of the top-100 employees within the meaning of paragraph (a)(2)(ii) of this A-3 for the 1987 year and 1990 year, the results are as follows:

Year	Compensation	Status	Comments
1986	$45,000	N/A	Although prior to 414(q) effective date, 1986 constitutes the look-back year for purposes of determining the highly compensated group for the 1987 determination year.
1987	80,000	Incl	Included because A was an employee described in paragraph (a)(1)(ii) or (iii) of this A–3 for the determination year (1987) and was described in paragraph (a)(2)(ii) of this A–3 in that year.
1988	80,000	Incl	Included because A was an employee described in paragraph (a)(1)(ii) or (iii) of this A–3 for the look-back year (1987).
1989	45,000	Incl	Included because A was an employee described in paragraph (a)(1)(ii) or (iii) of this A–3 for the look-back year (1988).
1990	45,000	Excl	Excluded even though in top-100 employees during 1990 determination year because A was not an employee described in paragraph (a)(1)(ii) or (iii) of this A–3 for the look-back year (1989) or for the determination year (1990).

A-4: Who is a highly compensated former employee?

Q-4: (a) General rule. Except to the extent provided in paragraph (d) of this A-4, a highly compensated former employee for a determination year is any former employee who, with respect to the employer, had a separation year (as defined in A-5 of this § 1.414(q)-1T) prior to the determination year and was a highly compensated active employee as defined in A-3 of this § 1.414(q)-1T for either such employee's separation year or any determination year ending on or after the employee's 55th birthday. Thus, for example, an employee who is a highly compensated active employee for such employee's separation year, by reason of receiving over $75,000 during the look-back year, is a highly compensated former employee for determination years after such employee's separation year.

(b) Special rule for employees who perform no services for the employer in the determination year. For purposes of this rule, employees who perform no services for an employer during a determination year are treated as former employees. Thus, for example, an employee who performed no services for the employer during a determination year, by reason of a leave of absence during such year, is treated as a former employee for such year.

(c) Dollar amounts for pre-1987 determination years. For determination years beginning before January 1, 1987, the dollar amounts in paragraph (a)(1)(B) and (C) of A-2 of this § 1.414(q)-1T are $75,000 and $50,000 respectively.

(d) Special rule for employees who separated from service before January 1, 1987—(1) Election of special rule. Employers may elect to apply paragraph (d)(2) of this A-4 in lieu of paragraph (a) of this A-4 in determining whether former employees who separated from service prior to January 1, 1987, are highly compensated former employees. If this election is made with respect to any qualified plan, it must be provided for in the plan. If the employer makes this election with respect to any employee benefit plan, such election must be used uniformly for all purposes for which the section 414(q) definition is applicable. The election, once made, cannot be changed without the consent of the Commissioner.

(2) Special definition of highly compensated former employee. A highly compensated former employee includes any former employee who separated from service with the employer prior to January 1, 1987, and was described in any one or more of the following groups during either the employee's separation year (or the year preceding such separation year) or any year ending on or after such individual's 55th birthday (or the last year ending before such employee's 55th birthday):

(i) 5-percent owner. The employee was a 5-percent owner of the employer at any time during the year.

(ii) Compensation amount. The employee received compensation in excess of $50,000 during the year.

The determinations provided for in this paragraph (b)(2) may be made on the basis of the calendar year, the plan year, or any other twelve month period selected by the employer and applied on a reasonable and consistent basis.

(e) Rules with respect to former employees—(1) In general. For specific provisions with respect to the treatment of former employees and of highly compensated former employees, refer to the rules with respect to which the section 414(q) definition of highly compensated employee is applicable.

(2) Former employees excluded in determining top-paid group, top-100 employees and includible officers. Former employees are not included in the top-paid group, the group of the top-100 employees, or the group of includible officers for purposes of applying section 414(q) to active employees. In addition, former employees are not counted as employees for purposes of determining the number of employees in the top-paid group.

Q-5: What is a separation year for purposes of section 414(q)?

A-5: (a) Separation year—(1) In general. The separation year generally is the determination year during which the employee separates from service with the employer. For purposes of this rule, an employee who performs no services for the employer during a determination year will be treated as having separated from service with the employer in the year in which such employee last performed services for the employer. Thus, for example, an employee who performs no services for the employer by reason of being on a leave of absence throughout the determination year is considered to have separated from service with the employer in the year in which such employee last performed services prior to beginning the leave of absence.

(2) Deemed separation. An employee who performs services for the employer during a determination year may be deemed to have separated from service with the employer during such year pursuant to the rules in paragraph (a)(3) of this A-5. Such deemed separation year is relevant for purposes of determining whether such employee is a highly compensated former employee after such employee actually separates from service, not for purposes of identifying such employee as either an active or former employee. Because employees to whom the provisions of paragraph (a)(2) of this A-5 apply are still performing services for the employer during the determination year, they are treated as active employees. Thus, for example, an employee who has a deemed separation year in 1989, a year during which he was a highly compensated employee, who continues to work for the employer until he retires from employment in 1995, is an active employee of the employer until 1995 and is either highly compensated or not highly compensated for any determination year during such period based on the rules with respect to highly compensated active employees. For determination years after the year of such employee's retirement, such employee is a highly compensated former employee because such employee was a highly compensated active employee for the deemed separation year.

(3) Deemed separation year. An employee will be deemed to have a separation year if, in a determination year prior to attainment of age 55, the employee receives compensation in an amount less than 50% of the employee's average annual compensation for the three consecutive calendar years preceding such determination year during which the employee received the greatest amount of compensation from the employer (or the total period of the employee's service with the employer, if less).

(4) Leave of absence. The deemed separation rules contained in paragraph (a)(2) and (3) of this A-5 apply without regard to whether the reduction in compensation occurs on account of a leave of absence.

(b) Deemed resumption of employment. An employee who is treated as having a deemed separation year by reason of the provisions of paragraph (a) of this A-5 will not be treated as a highly compensated former employee (by reason of such deemed separation year) after such employee actually separates from service with the employer if, after such deemed separation year, and before the year of actual separation, such employee's services for and compensation from the employer for a determination year increase significantly so that such employee is treated as having a deemed resumption of employment. The determination of whether an employee who has incurred a deemed separation year has an increase in services and compensation sufficient to result in a deemed resumption of employment will be made on the basis of all the surrounding facts and circumstances pertaining to each individual case. At a minimum, there must be an increase in compensation from the employer to the extent that such compensation would not result in a deemed separation year under the tests in paragraph (a)(2) of this A-5

using the same three-year period taken into account in such paragraph.

(c) Examples. Paragraphs (a) and (b) of this A-5 are illustrated by the following examples based on calendar years. For purposes of these examples the threshold dollar amounts in A-5(a) of this § 1.414(q)-1T have not been increased pursuant to A-5(b) of this § 1.414(q)-1T.

Example (1). Assume that in 1990 A is a highly compensated employee of X by reason of having earned more than $75,000 during the 1989 look-back year. In 1987, 1988 and 1989, A's years of greatest compensation received from X, A received $76,000, $80,000 and $79,000 respectively. In February of 1990, A received $30,000 in compensation. Because A's compensation during the 1990 determination year is less than 50% of A's average annual compensation from X during A's high three prior determination years, A is deemed to have a separation year during the 1990 determination year pursuant to the provisions of paragraph (a) of this A-5. Since A is a highly compensated employee for X in 1990, A's deemed separation year, A will be treated as a highly compensated former employee after A actually separates from service with the employer unless A experiences a deemed resumption of employment within the meaning of paragraph (b) of this A-5.

Example (2). Assume that in 1990 A is a highly compensated employee by reason of having been an officer (with annual compensation in excess of the section 415(c)(1)(A) dollar limitation) during the 1989 look-back year. A's compensation from X during 1990 is $37,000. A's average compensation from X for the three-year period ending with or within January, 1990, was $60,000. A's compensation during the 1990 determination year is not less than 50% of the compensation earned during the test period. Therefore, A is not deemed to have a separation year under paragraph (a)(2)(i) of this A-5.

Example (3). Assume that in 1990 C is 35 and a highly compensated employee of Z for the reasons given in Example (1) with the same compensation set forth in that example. During 1990, C leaves C's 40 hour a week position as director of the actuarial division of Z and starts working as an actuary for the same division, producing actuarial reports approximately 15 to 20 hours a week, approximately half of these hours at home. C contemplates returning to full-time employment with Z when C's child enters school. During the 1990 determination year, C's compensation is less than 50% of C's compensation during her high three preceding determination years. Therefore, C has a deemed separation year during the 1990 determination year. In 1991 C commences working 32 hours a week for X at X's place of business and receives compensation in an amount equal to 80 percent of her average annual compensation during her high three prior determination years. The C's increased compensation, considered in conjunction with the reasons for the reduction in service, the nature and extent of the services performed before and after the reduction in services, and the lack of proximity of C's age to age 55 at the time of the reduction are sufficient to establish that C has a deemed resumption of employment within the meaning of paragraph (b) of this A-5. Therefore, when C separates from service with the employer, C will not be treated as a highly compensated former employee by reason of C's deemed separation year in 1990.

Q-6: Who is the employer?

A-6: (a) Aggregation of certain entities. The employer is the entity employing the employees and includes all other entities aggregated with such employing entity under the aggregation requirements of section 414(b), (c), (m) and (*o*). Thus, the following entities must be taken into account as a single employer for purposes of determining the employees who are "highly compensated employees" within the meaning of section 414(q):

(1) All corporations that are members of a controlled group of corporations (as defined in section 414(b)) that includes the employing entity.

(2) All trades or businesses (whether or not incorporated) that are under common control (as defined in section 414(c)) which group includes the employing entity.

(3) All organizations (whether or not incorporated) that are members of an affiliated service group (as defined in section 414(m)) that includes the employing entity.

(4) Any other entities required to be aggregated with the employing entity pursuant to section 414(*o*) and the regulations thereunder.

(b) Priority of aggregation provisions. The aggregation requirements of paragraph (a) of this A-6 and of A-7(b) of this section with respect to leased employees are applied before the application of any of the other provisions of section 414(q) and this section.

(c) Line of business rules. The section 414(r) rules with respect to separate lines of business are not applicable in determining the group of highly compensated employees.

Q-7: Who is an employee for purposes of section 414(q)?

A-7: (a) General rule. Except as provided in paragraph (b) of this A-7, the term "employee" for purposes of section 414(q) refers to individuals who perform services for the employer and are either common-law employees of the employer or self-employed individuals who are treated as employees pursuant to section 401(c)(1). This rule with respect to the inclusion of certain self-employed individuals in the group of highly compensated employees is applicable whether or not such individuals are eligible to participate in the plan or benefit arrangement being tested.

(b) Leased employees—(1) In general. The term "employee" includes a leased employee who is treated as an employee of the recipient pursuant to the provisions of section 414(n)(2) or 414(*o*)(2). Employees that an employer treats as leased employees under section 414(n), pursuant to the requirements of section 414(*o*), are considered to be leased employees for purposes of this rule.

(2) Safe-harbor exception. For purposes of qualified retirement plans, if an employee who would be a leased employee within the meaning of section 414(n)(2) is covered in a safe-harbor plan described in section 414(n)(5) (a qualified money purchase pension plan maintained by the leasing organization), and not otherwise covered under a qualified retirement plan of the employer, then such employee is excluded from the term "employee" unless the employer elects to include such employee pursuant to the provisions of paragraph (4) of this paragraph (b).

(3) Other employee benefit plans. The exception in paragraph (b)(2) of this A-7 is not applicable to the determination of the highly compensated employee group for purposes of the sections enumerated in section 414(n)(3)(C). Thus, for example, a leased employee covered by a safe-harbor plan is considered to be an employee in applying the nondiscrimination provisions of section 89 to statutory benefit plans. Consequently, an employer with leased employees covered in a safe-harbor plan may have 2 groups of highly compensated employees, one with respect to its retirement plans and another with respect to its statutory benefit plans.

(4) Election with respect to leased employee exclusion. An employer may elect to include the employees excepted under the provisions of paragraph (b)(2) of this A-7 in determining the highly compensated group with respect to an employer's retirement plans. Thus, for example, by electing to forego the exception in paragraph (b)(2) of this A-7, an employer may achieve more uniform highly compensated employee groups for purposes of its retirement plans and welfare benefit plans. The election to include such employees must be made on a reasonable and consistent basis and must be provided for in the plan.

Q-8: Who is a 5-percent owner of the employer?

A-8: An employee is a 5-percent owner of the employer for a particular year if, at any time during such year, such employee is a 5-percent owner as defined in section 416(i)(B)(i) and § 1.416-1 A T-17&18. Thus, if the employer is a corporation, a 5-percent owner is any employee who owns (or is considered as owning within the meaning of section 318) more than 5 percent of the value of the outstanding stock of the corporation or stock possessing more than 5 percent of the total combined voting power of all stock of the corporation. If the employer is not a corporation, a 5-percent owner is any employee who owns more than 5 percent of the capital or profits interest in the employer. The rules of subsections (b), (c), and (m) of section 414 do not apply for purposes of determining who is a 5-percent owner. Thus, for example, an individual who is a 5-percent owner of a subsidiary corporation that is part of a controlled group of corporations within the meaning of section 414(b) is treated as a 5-percent owner for purposes of these rules.

Q-9: How is the "top-paid group" determined?

A-9: (a) General rule. An employee is in the top-paid group of employees for a particular year if such employee is in the group consisting of the top 20 percent of the employer's employees when ranked on the basis of compensation received from the employer during such year. The identification of the particular employees who are in the top-paid group for a year involves a two-step procedure:

(1) The determination of the number of employees that corresponds to 20 percent of the employer's employees, and

(2) The identification of the particular employees who are among the number of employees who receive the most compensation during this year.

Employees who perform no services for the employer during a year are not included in making either of these determinations for such year.

(b) Number of employees in the top-paid group —(1) Exclusions. The number of employees who are in the top-paid group for a year is equal to 20 percent of the total number of active employees of the employer for such year. However, solely for purposes of determining the total number of active employees in for a year, the employees excluded in paragraphs (i), (ii), and (iii) of this paragraph (b)(1) are disregarded.

(i) Age and service exclusion. The following employees are excluded on the basis of age or service absent an election by the employer pursuant to the rules in paragraph (b)(2) of this A-9:

(A) Employees who have not completed 6 months of service by the end of such year. For purposes of this paragraph (A), an employee's service in the immediately preceding year is added to service in the current year in determining whether the exclusion is applicable with respect to a particular employee in the current year. For example, given a plan with a calendar determination year, if employee A commences work August 1, 1989, and terminates employment May 31, 1990, A may be excluded under this paragraph (b)(1)(i)(A) in 1989 because A completed only 5 months of service by December 31, 1989. However, A cannot be excluded pursuant to this rule in

1990 because A has completed 10 months of service, for purposes of this rule, by the end of 1990.

(B) Employees who normally work less than 17½ hours per week as defined in paragraph (d) of this A-9 for such year.

(C) Employees who normally work during less than 6 months during any year as defined in paragraph (e) of this A-9 for such year.

(D) Employees who have not had their 21st birthdays by the end of such year.

(ii) Nonresident alien exclusion. Employees who are nonresident aliens and who receive no earned income (within the meaning of section 911(d)(2)) from the employer that constitutes income from sources within the United States (within the meaning of section 861(a)(3)) are excluded.

(iii) Collective bargaining exclusion—(A) In general. Except as provided in paragraph (B) of this paragraph (b)(1)(iii), employees who are included in a unit of employees covered by an agreement that the Secretary of Labor finds to be a collective bargaining agreement between employee representatives and the employer, which agreement satisfies section 7701(a)(46) and § 301.7701-17T (Temporary), are included in determining the number of employees in the top-paid group.

(B) Percentage exclusion provision. If 90 percent or more of the employees of the employer are covered under collective bargaining agreements that the Secretary of Labor finds to be collective bargaining agreements between employee representatives and the employer, which agreements satisfy section 7701(a)(46) and § 301.7701-17T (Temporary), and the plan being tested covers only employees who are not covered under such agreements, then the employees who are covered under such collective bargaining agreements are not counted in determining the number of noncollective bargaining employees who will be included in the top-paid group for purposes of testing such plan. In addition, such employees are not included in the top-paid group for such purposes. Thus, if the conditions of this paragraph (b)(1)(iii)(B) are satisfied, a separate calculation is required to determine the number and identity of noncollective bargaining employees who will be highly compensated employees by reason of receiving over $50,000 and being in the top-paid group of employees for purposes of testing those plans that cover only noncollective bargaining employees.

(2) Alternative exclusion provisions—(i) Age and service exclusion election. An employer may elect, on a consistent and uniform basis, to modify the permissible exclusions set forth in paragraph (b)(1)(i) (A), (B), (C), and (D) of this A-9 by substituting any shorter period of service or lower age than that specified in such paragraph. These exclusions may be modified to substitute a zero service or age requirement.

(ii) Election not to apply percentage exclusion provision. An employer may elect not to exclude employees under the rules in paragraph (b)(1)(iii)(B) of this A-9.

(iii) Method of election. The elections in this paragraph (b)(2) must be provided for in all plans of the employer and must be uniform and consistent with respect to all situations in which the section 414(g) definition is applicable to the employer. Thus, with respect to all plan years beginning in the same calendar year, the employer must apply the test uniformly for purposes of determining its top-paid group with respect to all its qualified plans and employee benefit plans and for purposes of the line of business rules set forth in section 414(r). If either election is changed during the determination year, no recalculation of the look-back year based on the new election is required, provided the change in election does not result in discrimination in operation.

(c) Identification of top-paid group members. With the exception of the paragraph (b)(1)(iii) of this A-9 exclusion for certain employees covered by collective bargaining agreements, the exclusions in paragraph (b)(1) of this A-9 are not applicable for purposes of identifying the particular employees in the top-paid group. Thus, for example, even if an employee who normally works for less than 17½ hours is excluded in determining the number of employees in the top-paid group such employee may be a member of the top-paid group. Similarly, if during a determination year, employee A receives over $75,000 and is one of the top-100 employees ranked by compensation, then employee A is a highly compensated active employee for such determination year. This is true even though employee A has worked less than six months and thus may be excluded in determining the number of persons in the top-paid group for the determination year.

(d) Example. Paragraphs (b) and (c) of this A-9 are illustrated by the following example:

Example. Employer X has 200 active employees during the 1989 determination year, 100 of whom normally work less than 17½ hours per week during such year and 80 of whom normally work less than 15 hours per week during such year. X elects to exclude all employees who normally work less than 15 hours per week in determining the number of employees in the top-paid group. Thus, X excludes 80 employees in determining the number of employees in the top-paid group. X's top-paid group for the 1989 determination year consists of 20%

of 120 or 24 employees. All 200 of X's employees must then be ranked in order by compensation received during the year, and the 24 employees X paid the greatest amount of compensation during the year are top-paid employees with respect to X for the 1989 determination year.

(e) 17½ hour rule—(1) In general. The determination of whether an employee normally works less than 17½ hours per week is made independently for each year based on the rules in paragraph (e)(2) and (3) of this A-9. In making this determination, weeks during which the employee did not work for the employer are not considered. Thus, for example, if an employee normally works twenty hours a week for twenty-five weeks during the fall and winter school quarters, 10 hours a week for the 12 week spring quarter, and does not work for the employer during the three-month summer quarter, such employee is treated as normally working more than 17½ hours per week under the rule of this paragraph (e).

(2) Deemed above 17½ . An employee who works 17½ hours a week or more, for more than fifty percent of the total weeks worked by such employee during the year, is deemed to normally work more than 17½ hours a week for purposes of this rule.

(3) Deemed below 17½ . An employee who works less than 17½ hours a week for fifty percent or more of the total weeks worked by such employee during the year is deemed to normally work less than 17½ hours a week for purposes of this rule.

(4) Application. The determination provided for in paragraph (e)(1), (2), and (3) of this A-9 may be made separately with respect to each employee, or on the basis of groups of employees who fall within particular job categories as established by the employer on a reasonable basis. For example, under the rule of this paragraph (e)(4) an employer may exclude all office cleaning personnel if, for the year in question, the employees performing this function normally work less than 17½ hours a week. This is true even though one or more employees within this group normally work in excess of 17½ hours. The election to make this determination on the basis of individuals or groups is operational and does not require a plan provision.

(5) Application based on groups. (i) Groups of employees who perform the same job are not required to be considered as one category for purposes of the rule in paragraph (e)(4) of this A-9. Thus, for example, an employer supermarket may determine its highly compensated employees by excluding part-time grocery checkers if such personnel normally work less than 17½ hours a week while continuing to include full-time personnel performing this function. In general, 80 percent of the positions within a particular job category must be filled by employees who normally work less than 17½ hours a week before any employees may be excluded under this rule on the basis of their membership in that job category.

(ii) Alternatively, an employer may exclude employees who are members of a particular job category if the median number of hours of service credited to employees in that category during a determination or look-back year is 500 or less.

(f) 6-month rule—(1) In general. The determination of whether employees normally work during not more than 6 months in any year is made on the basis of the facts and circumstances of the particular employer as evidenced by the employer's customary experience in the years preceding the determination year. An employee who works on one day during a month is deemed to have worked during that month.

(2) Application of prior year experience. In making the determination under this paragraph (f), the experience for years immediately preceding the determination year will generally be weighed more heavily than that of earlier years. However, this emphasis on more recent years is not appropriate if the data for a particular year reflects unusual circumstances. For example, if fishermen working for employer X worked 9 months in 1987 and 1988, 8 months in 1989, and then, because of abnormal ice conditions, worked only 5 months in 1990, such fishermen could not be excluded under this rule in 1990. Furthermore, the data with respect to 1990 would not be weighed more heavily in making a determination with respect to subsequent years.

(3) Individual or group basis. This determination may be made separately with respect to each employee or on the basis of groups of employees who fall within particular job categories in the manner set forth in paragraph (e)(4) of this A-8.

Q-10. For purposes of determining the group of highly compensated employees, which employees are officers and which officers must be included in the highly compensated group?

A-10: (a) In general. Subject to the limitations set forth in paragraph (b) of this A-10 and the top-100 employee rule set forth in A-2, an employee is an includible officer for purposes of this section and is a member of the group of highly compensated employees if such employee is an officer of the employer (within the meaning of section 416(i) and § 1.416-1 A-T 13 & A-T 15) at

any time during the determination year or look-back year and receives compensation during such year that is greater than 150 percent of the dollar limitation in effect under section 415(c)(1)(A) for the calendar year in which the determination or look-back year begins. In addition, an officer who does not meet the 415(c)(1)(A) dollar limitation requirement may be an includible officer based on the minimum inclusion rules set forth in paragraph (c) of this A-10.

(b) Maximum limitation—(1) In general. Nor more than 50 employees (or, if lesser, the greater of 3 employees or 10 percent of the employees without regard to any exclusions) shall be treated as officers for purposes of this provision in determining the group of highly compensated employees for any determination year or look-back year.

(2) Total number of employees. The total number of employees for purposes of the limitation in this paragraph (b) is the number of employees the employer has during the particular determination year or look-back year. For purposes of this A-10, employees include only those individuals who perform services for the employer during the determination or look-back year. The exclusions applicable for purposes of determining the number of employees in the top-paid group are not applicable for purposes of the limitations in this paragraph (b).

(3) Inclusion ranking. If the number of the employer's officers who satisfy paragraph (a) of this A-10 during either the determination year or the look-back year exceeds the limitation under this paragraph (b), then the officers who will be considered as includible officers for purposes of this rule are those who receive the greatest compensation from the employer during such determination or look-back year. The definition of compensation in A-13 is to be used for this purpose.

(c) Minimum inclusion rule. This paragraph (c) is applicable when no officer of the employer satisfies the compensation requirements of paragraph (a) of this A-10 during either a determination year or look-back year. In such case, the highest paid officer of the employer for such year is treated as a highly compensated employee by reason of being an officer, without regard to the amount of compensation paid to such officer in relation to the section 415(c)(1)(A) dollar amount for the year. This is true whether or not such employee is also a highly compensated employee on any other basis. Thus, for example, if no officer of employer X meets the compensation requirements of paragraph (a) of this A-10 during the 1989 look-back year, and employee A is both the highest paid officer during such year and a 5-percent owner, employee A is treated as an includible officer satisfying the minimum inclusion rules of this paragraph.

(d) Separate application. The maximum and minimum officer inclusion rules of paragraphs (b) and (c) of this A-10 apply separately with respect to the determination year calculation and the look-back year calculation. Thus, for example, if no officer of employer X receives compensation above the threshold amount in paragraph (a) of this A-10 during either the determination year or look-back year, application of the minimum inclusion rule would result in the officer of employer X who received the greatest compensation during the look-back year being treated as a highly compensated employee and, in addition, the officer of employer X who receives the most compensation during the determination year would be included in the highly compensated group if such officer is also in the top-100 employees of employer X for such year. Thus, two officers may be treated as highly compensated active employees for a determination year by reason of the provisions of the minimum inclusion rule.

Q-11: To what extent must family members who are employed by the same employer be aggregated for purposes of section 414(q)?

A-11: (a) Family aggregation—(1) In general. Aggregation is required with respect to an employee who is, during a particular determination year or look-back year, a family member (as defined in A-12) of either (i) a 5-percent owner who is an active or former employee or (ii) a highly compensated employee who is one of the ten most highly compensated employees ranked on the basis of compensation paid by the employer during such year.

(2) Aggregation of contributions or benefits. As prescribed in regulations under the provisions to which section 414(q) is applicable, a family member and a 5-percent owner or top-10 highly compensated employee aggregated under this rule are generally treated as a single employee receiving an amount of compensation and a plan contribution or benefit that is based on the compensation, contributions, and benefits of such family member and 5-percent owner or top-10 highly compensated employee.

(b) Exclusion status irrelevant. Family members are subject to this aggregation rule whether or not they fall within the categories of employees that may be excluded for purposes of determining the number of employees in the top-paid group and

whether or not they are highly compensated employees when considered separately.

(c) Order of determination—(1) Determination of highly compensated employees. The determination of which employees are highly compensated employees and which highly compensated employees are among the ten most highly compensated employees in making the look-back year calculation or the determination year calculation for a determination year will be made prior to the application of the rules in paragraph (a) of this A-11.

(2) Determination of top-paid group and top-100 employees. The determination of the number and identity of employees in the top-paid group under the look-back year calculation or the determination year calculation for a determination year and the identity of individuals in the top-100 employees under the determination year calculation for a determination year is made prior to application of the rules in paragraph (a) of this A-11.

(d) Determination period. The rules under paragraph (a) of this A-11 apply separately to the determination year and the look-back year. Thus, assuming there are no 5-percent owners, if employees A, B, C, D, E, F, G, H, I and J are the top 10 highly compensated employees in the 1988 look-back year, and employees F, G, H, I, J, K, L, M, N and O are the top 10 highly compensated employees in the 1989 determination year, then family aggregation would be required with respect to all fifteen of such employees (i.e. employees A, B, C, D, E, F, G, H, I, J, K, L, M, N, and O).

Q-12: Which individuals are family members for purposes of the aggregation rules in section 414(a)(6)(A) and A-11?

A-12: (a) Definition of family member. Individuals who are family members for purposes of these provisions include, with respect to any employee or former employee, such employee's or former employee's spouse and lineal ascendants or descendants and the spouses of such lineal ascendants and descendants. In determining whether an individual is a family member with respect to an employee or former employee, legal adoptions shall be taken into account.

(b) Test period. If an individual is a family member with respect to an employee or former employee on any day during the year, such individual is treated as a family member for the entire year. Thus, for example, if an individual is a family member with respect to an employee on the first day of a year, such individual continues to be a family member with respect to such employee throughout the year even though their relationship changes as a result of death or divorce.

Q-13: How is "compensation" determined for purposes of determining the group of "highly compensated employees."

A-13: (a) In general. For purposes of section 414(q), the term "compensation" means compensation within the meaning of section 415(c)(3) without regard to sections 125, 402(a)(8), and 402(h)(1)(B) and, in the case of employer contributions made pursuant to a salary reduction agreement, without regard to section 403(b). Thus, compensation includes elective or salary reduction contributions to a cafeteria plan, cash or deferred arrangement or tax-sheltered annuity.

(b) Determination period. For purposes of determining the group of highly compensated employees, compensation must be calculated on the basis of the applicable period for the determination year and look-back year respectively.

(c) Compensation taken into account. Only compensation received by an employee during the determination year or during the look-back year is considered in determining whether such employee is a highly compensated active employee under either the look-back year calculation or determination year calculation for such determination year. Thus, compensation is not annualized for purposes of determining an employee' compensation in the determination year or the look-back year in applying the rules of paragraph (a) of this A-13.

Q-14: What periods must be used for determining who is a highly compensated employee for a determination year?

A-14: (a) Determination year and look-back year—(1) In general. For purposes of determining the group of highly compensated employees for a determination year, the determination year calculation is made on the basis of the applicable year of the plan or other entity for which a determination is being made and the look-back year calculation is made on the basis of the twelve month period immediately preceding such year. Thus, in testing plans X and Y of an employer, if plan X has a calendar year plan year and plan Y has a July 1 to June 30 plan year, the determination year calculation and look-back year calculation for plan X must be made on the basis of the calendar year. Similarly, the determination year calculation and look-back year calculation for plan Y must be made on the basis of the July 1 to June 30 year.

(2) Applicable year. For purposes of this A-14, the applicable year is the plan year of the qualified plan or other employee benefit arrangement to

which the definition of highly compensated employees is applicable as defined in the written plan document or otherwise identified in regulations pursuant to sections to which the definition of highly compensated employees is applicable. To the extent that the definition of highly compensated employees is applicable to entities of other arrangements that do not have an otherwise identified plan year, then either the calendar year of the employer's fiscal year may be treated as the plan year.

(3) Look-back year. The look-back year is never less than a twelve month period.

(b) Calendar year calculation election—(1) In general. An employer may elect to make the look-back year calculation for a determination year on the basis of the calendar year ending with or within the applicable determination year (or, in the case of a determination year that is shorter than twelve months, the calendar year ending with or within the twelve-month period ending with the end of the applicable determination year). In such case, the employer must make the determination year calculation for the determination year on the basis of the period (if any) by which the applicable determination year extends beyond such calendar year (i.e., the lag period). If the applicable year for which the determination is being made is the calendar year, the employer still may elect to make the calendar year calculation election under this A-14(b). In such case, the look-back year calculation is made on the basis of the calendar year determination year and, because there is no lag period, a separate determination year calculation under A-3(a)(2) of this § 1.414(q)-1 is not required.

(2) Lag period calculation. In making the determination year calculation under A-3(a)(2) of this § 1.414(q)-1 on the basis of the lag period, the dollar amounts applicable under A-3(a)(1) (B) and (C) of this § 1.414(q)-1 are to be adjusted by multiplying such dollar amounts by a fraction, the numerator of which is the number of calendar months that are included in the lag period and the denominator of which is twelve.

(3) Determination of active employees. An employee will be considered an active employee for purposes of a determination year for which the calendar year calculation election is in effect so long as such employee performs services for the employer during the applicable year for which the determination is being made. This is the case even if such employee does not perform services for the employer during the lag-period for such determination year.

(4) Election requirement. If the employer elects to make the calendar year calculation election with respect to one plan, entity, or arrangement, such election must apply with respect to all plans, entities, and arrangements of the employer. In addition, such election must be provided for in the plan.

(c) Change in applicable years. Where there is a change in the applicable year for which a determination is being made with respect to a plan entity, or other arrangement that is not subject to the calendar year calculation election, the look-back year calculation for the short applicable year is to be made on the basis of the twelve month period preceding the short applicable year (i.e., generally, the old applicable year) and the determination year calculation for the short applicable year is to be made on the basis of the short applicable year. In addition, the dollar amounts under A-3(a)(1) (B) and (C) are to be adjusted for such determination year calculation as if the short applicable year were a lag period under paragraph (b)(2) of this A-14.

(d) Example. The following examples illustrates the rules of this A-14:

Example 1.

Employer X has a single plan (Plan A) with an April 1 to March 31 plan year. Employer X makes no election to use the calendar year for the determination period. Therefore, in determining the group of highly compensated employees for the April 1, 1989 to March 31, 1990 plan year, the determination year is the plan year ending March 31, 1990 and the look-back year is the plan year ending March 31, 1989.

Example 2.

Assume the same facts given above. With respect to the plan year beginning in 1990, employer X elects to use the calendar year for the determination period. Therefore, in determining the group of highly compensated employees for the April 1, 1990 to March 31, 1991 plan year, the lag-period determination year is the period from January 1, 1991, through March 31, 1991, and the applicable look-back year is the 1990 calendar year.

Example 3.

Employer Y has a single plan (Plan B) with a calendar plan year. With respect to the plan year beginning in 1990, employer Y elects to make the look-back year calculation for the 1990 determination year on the basis of the calendar year ending with or within the 1990 determination year. Because employer Y's determination year is the 1990 calendar year there is no lag period and employer Y determines the group of highly compensated employees for purposes of the 1990 calendar plan year on the basis of such plan year alone.

Q-15: Is there any transition rule in determining the group of highly compensated employees for 1987 and 1988?

A-15: (a) In general. Solely for purposes of section 401(k)(3) and (m)(2) and solely for twelve-month plan years beginning in 1987 and 1988, an

eligible employer may elect to define the group of highly compensated employees as the group consisting of 5-percent owners of the employer at any time during the plan year and employees who receive compensation in excess of $50,000 during the plan year. This rule would apply in lieu of the look-back year calculation and determination year calculation otherwise applicable under A-3(a) of this § 1.44(q)-1. In addition, an eligible employer may elect to make the determinations permitted under this transition rule on the basis of the calendar year ending in the plan year and the period by which such plan year extends beyond such calendar year, in accordance with the rules of A-14(b), in lieu of making the determinations under this transition rule on the basis of the plan year for which the determinations are being made.

(b) Eligible employers. An employer is an eligible employer under this A-15 if such employer satisfies both of the following requirements:

(1) The employer does not maintain any top-heavy plan within the meaning of section 416 at any time during 1987 and 1988; and

(2) Under each plan of the employer to which section 401(k)(3) or 401(m)(2) is applicable, the group of eligible employees that comprises the highest 25% of eligible employees ranked on the basis of compensation includes at least one employee whose compensation is $50,000 or below. This requirement must be met separately with respect to each such plan of the employer.

(c) Uniformity requirement. An eligible employer may not make the election under paragraph (a) of this A-15 unless the election applies to all of the plans maintained by the employer to which section 401(k)(3) or 401(m)(2) applies.

(d) Election requirements. This election is operational and does not require a plan provision.
[T.D. 8173, 53 FR 4967, Feb. 19, 1988]

§ 1.414(s)–1T Compensation (temporary).

The following questions and answers relate to the definition of compensation provided in section 414(s). The definitions and rules provided in these questions and answers are provided solely for purposes of defining "compensation" under this section.

Table of Contents

Q-1: What is the basic definition of compensation for purposes of section 414(s) and when is this definition applicable?

A-1: (a) In general. For purposes of section 414(s), the term "compensation" means compensation received during the applicable period by the employee from the employer, other than compensation in the form of qualified or previously qualified deferred compensation, that (taking into account the provisions of this chapter) is currently includible in gross income for income tax purposes. See A-3 and A-4 of this § 1.414(s)-1 for adjustments and alternatives to this basis definition.

(b) For purposes of this section, the "applicable period" is the period of time specified under the particular rule for which the section 414(s) definition of compensation is applicable. Thus, the regulations applicable to a particular rule that utilizes the section 414(s) definition of compensation will specify the applicable period under section 414(s) for purposes of such rule.

(c) Applicability. The definition in paragraph (a) of this A-1 is generally applicable for purposes of applying the nondiscrimination rules of sections 401 through 419A (including the actual deferral percentage test for a cash or deferred arrangement and the actual contribution percentage test for employee and employer matching contributions contained in section 401(k)(3) and 401(m)(3) respectively). However, the definition of compensation in paragraph (a) of this A-1 does not apply to sections that specifically define compensation in a different manner. Examples of provisions for which the section 414(s) definition of compensation is not applicable include, but are not limited to, the definition of highly compensated employees contained in section 414(q), the limitations on benefits and contributions set forth in section 415, and the deduction provisions of section 404(a) and (b).

Q-2: How is compensation determined for self-employed individuals within the meaning of section 401(c)(1)?

A-2: The basis definition of compensation, for purposes of self-employed individuals, is earned income (as defined in section 401(c)(1)) for the applicable period (as defined in A-1(c) of this § 1.414(s)-1) derived from such individual's trade or business.

Q-3: May an employer elect to treat certain deferrals as compensation?

A-3: Yes. An employer may elect to include in the basic definition of compensation all elective contributions made by the employer on behalf of its employees that are not includible in the gross income of an employee under sections 125, 402(a)(8), 402(h), or 403(b). This election must be made on a consistent and uniform basis with respect to all employees and all plans of the employer for any particular year, must be made on a reasonable and consistent basis from year to year, and must be provided for in the plan. The employer may change this election provided such change does not result in discrimination in favor of highly compensated employees.

Q-4: What, if any, alternative definitions of compensation may be used by an employer?

A-4: (a) Alternative basic definitions. For applicable periods beginning in 1987 and 1988, an employer may elect to use the following alternative definitions of compensation in lieu of the basic definition set forth in A-1 of this section. Any such election must be provided for in the plan and made on a reasonable and consistent basis from year to year. An employer may change an election made under this A-4(a) provided such change does not result in discrimination in favor of highly compensated employees.

(1) W-2 compensation. Compensation received during the applicable period (as defined in A-1(c) of this § 1.414(s)-1) by the employee from the employer that is required to be reported as wages on the employee's Form W-2 for income tax purposes. This election may include or exclude all amounts that are not currently includible in the employee's gross income by reason of the application of sections 125, 402(a)(8), 402(h)(1)(B) or 402(b), provided such total inclusion or exclusion is made on a consistent and uniform basis with respect to all plans of the employer for any particular year, made on a reasonable and consistent basis from year to year, and provided for in the plan. The employer may change this inclusion or exclusion election provided such change does not result in discrimination in favor of highly compensated employees.

(2) Section 415 compensation. Compensation as defined in § 1.415-2(d)(1)&(2) received during the applicable period (as defined in A-1(c) of this § 1.414(s)-1) by the employee from the employer.

(b) Alternative definitions—(1) In general. In lieu of the basic definition of compensation set forth in A-1 of this § 1.414(s)-1 (and in lieu of the alternative basic definitions set forth in (a) of this A-4), an employer may elect to use an alternative definition of compensation. Any such alternative definition is permissible under section 414(s) only if it is described in A-4(b)(2) and satisfies the nondiscrimination rule set forth in A-4(b)(3).

(2) Available alternative definitions of compensation—(i) Regular or base salary or wages. Regular or base salary or wages (excluding overtime and bonuses) received during the applicable period (defined in A-1(c) of this § 1.414(s)-1) by the employee from the employer.

(ii) Regular or base salary or wages plus overtime and/or bonuses. Regular or base salary or wages, plus either or both overtime and/or bonuses, received during the applicable period (defined in A-1(c) of this § 1.414(s)-1) by the employee from the employer.

(iii) Commissioner may make additional definitions available. The Commissioner may, consistent with the provisions of this section, make additional definitions of compensation available under this A-4(b). Any such additional definition is permissible under section 414(s) only if such definition satisfies the nondiscrimination rule set forth in A-4(b)(3).

(3) Nondiscrimination rule. An alternative definition of compensation described in A-4(b)(2) satisfies this rule only if the compensation percentage for the employer's highly compensated employees is not greater than the compensation percentage for the employer's other employees. The compensation percentage for a group of employees is calculated by averaging the separately calculated compensation ratios for each employee in the group. An employee's compensation ratio is calculated by dividing the amount of the employee's compensation that is included in the alternative definition by the amount of such employee's compensation that is included in the basic definition of compensation (set forth in A-1 of this § 1.414(s)-1 or (a) of this A-4) for the applicable period (defined in A-1(c) of this section).

[T.D. 8173, 53 FR 4975, Feb. 19, 1988]

§ 1.415–1 General rules with respect to limitations on benefits and contributions under qualified plans.

(a) **Trusts.** Under sections 415 and 401(a)(16), a trust which forms part of a pension, profit-sharing or stock bonus plan will not be qualified under section 401(a) if any one of the following conditions exists:

(1) The annual benefits under a defined benefit plan with respect to any participant for any limita-

tion year exceed the limitations of section 415(b) and § 1.415–3.

(2) The contributions and other additions credited under a defined contribution plan with respect to any participant for any limitation year exceed the limitations of section 415(c) and § 1.415–6.

(3) Where an individual has at any time participated in a defined benefit plan and also has at any time participated in a defined contribution plan maintained by the same employer, the trust has been disqualified under section 415(g) and § 1.415–9.

(b) Certain annuities and accounts—(1) In general. Except as provided in paragraph (c) of this section, an annuity, account, etc., listed in section 415(a)(2) will not be considered to be described in the otherwise applicable section unless—

(i) It satisfies the requirements of § 1.415–3 (relating to limitations on benefits), § 1.415–6 (relating to limitations on contributions and other additions) or § 1.415–7 (relating to limitations where an individual has at any time participated in a defined contribution plan and also has at any time participated in a defined benefit plan maintained by the same employer), whichever is applicable, and

(ii) It has not been disqualified under § 1.415–9 (relating to disqualification of plans and trusts).

(2) Special rule for section 403(b) annuity contracts. (i) With respect to an annuity contract described in section 403(b), the provisions of subparagraph (1) of this paragraph apply only to that portion of the contract which exceeds the limitations of § 1.415–3, § 1.415–6 and § 1.415–7, whichever is applicable.

(ii) In addition, where the amount of the contribution under the section 403(b) annuity contract exceeds the applicable limitation, the exclusion allowance described in section 403(b)(2)(A) is reduced in the manner described in § 1.415–6(e)(1)(ii).

(3) Cross references to additional rules for section 403(b) annuity contracts. For additional rules relating to section 403(b) annuity contracts, see—

(i) Section 1.415–1(f)(2) (relating to the plan year for such annuity contracts),

(ii) Section 1.415–2(b)(7) (relating to the limitation year for such annuity contracts),

(iii) Section 1.415–6(e) (relating to the applicability of the alternative limitations described in section 415(c)(4) to such annuity contracts),

(iv) Sections 1.415–7(c)(2) and 1.415–7(h) (relating to rules for such annuity contracts for purposes of computing the defined contribution plan fraction),

(v) Section 1.415–8(d) (relating to rules for such annuity contracts for purposes of combining plans), and

(vi) Section 1.415–9(c) (relating to rules for such annuity contracts for purposes of determining the amount of a disqualified contribution to the annuity contract).

(c) Certain accounts, annuities and bonds established for non-employed spouse. Paragraph (b) of this section is not applicable to an account, annuity or bond as described in section 408(a), 408(b) or 409, respectively established for the benefit of the spouse of the individual who contributes to it for any year for which a deduction is allowable for the individual under section 220. For a special effective date with respect to this paragraph, see paragraph (f)(3) of this section.

(d) Plan provisions—(1) In general. Although no specific plan provision is required under section 415 in order for a plan to establish or maintain its qualification, the plan provisions must preclude the possibility that the limitations imposed by section 415 will be exceeded. For example, a plan may include provisions which automatically freeze or reduce the rate of benefit accrual (in the case of a defined benefit plan) or the annual addition (in the case of a defined contribution plan) to a level necessary to prevent the limitations from being exceeded with respect to any participant. For rules relating to this type of plan provision and the definitely determinable benefit requirement for pension plans, see § 1.401(a)–1(b)(1).

(2) Special rule for profit-sharing and stock bonus plans. The use of a plan provision by a profit-sharing or stock bonus plan which automatically freezes or reduces the amount of annual additions to insure that the limitations of section 415 will not be exceeded must comply with the requirement set forth in § 1.401–1(b)(1)(ii) and (iii) that such plans provide a definite predetermined formula for allocating the contributions made to the plan among the participants. Thus, if the operation of this provision involves discretionary action on the part of the employer, the definite predetermined allocation formula requirement will be violated. For example, if two defined contribu-

tion plans of one employer otherwise provide for aggregate contributions which may exceed the limits of section 415(c), the plan provisions must specify (without involving employer discretion) which plan will reduce contributions and allocations to prevent an excess annual addition and how the reduction will occur.

(e) Rules for plans maintained by more than one employer—(1) Plans described in section 413(b) or section 413(c). This subparagraph provides for participants of a plan described in section 413(c) or section 413(b) (other than a plan described in section 414(f)). For purposes of applying the limitations of section 415 with respect to a participant of an employer maintaining the plan, benefits or contributions attributable to such participant from all of the employers maintaining the plan must be taken into account. Furthermore, in applying the limitations of section 415 with respect to such a participant, the total compensation received by the participant from all of the employers maintaining the plan may be taken into account.

(2) Plans described in section 414(f). (i) This subparagraph provides rules for participants of a multiemployer plan described in section 414(f). For purposes of applying the limitations of section 415 with respect to a participant of an employer maintaining the plan, only the benefits or contributions provided by the employer of such participant shall be taken into account. The benefits provided by an employer under such a plan shall equal the excess of the plan benefit over the plan benefit computed as if the participant had no covered service with that employer.

(ii) As an alternative to applying the limitations of section 415 with respect to a participant of an employer maintaining the multiemployer plan in the manner described in subdivision (i) of this subparagraph, the rules described in subparagraph (1) of this paragraph may be used for purposes of applying the section 415 limitations in connection with that participant.

(iii) For rules relating to the limitation year for a multiemployer plan, see § 1.415–2(b)(6). See also § 1.415–8(e) for a special rule relating to the aggregation of multiemployer plans.

(f) Rules relating to the effective date of section 415—(1) In general. Except as otherwise provided in this paragraph, §§ 1.415–1 through 1.415–10 are applicable for plan years beginning after 1975 and for limitation years ending with or within plan years beginning after 1975. However, for all such plan years and limitation years through the plan year beginning before January 7, 1981, a reasonable interpretation of the rules set forth in section 415 of the Code and in Rev.Rul. 75–481, 1975–2 C.B. 188, may be relied upon.

(2) Plan year for certain annuity contracts and individual retirement plans. For purposes of section 415 and §§ 1.415–1 through 1.415–10—

(i) An annuity contract described in section 403(b) shall be considered to have a plan year coinciding with the taxable year of the individual on whose behalf the contract has been purchased, and

(ii) An individual retirement plan (as described in section 7701(a)(37)) shall be considered to have a plan year coinciding with the taxable year of the individual on whose behalf the plan is maintained,

unless the individual demonstrates to the satisfaction of the Commissioner that a different 12 month period should be considered to be the plan year.

(3) Special effective date for certain accounts, annuities and bonds established for non-employed spouse. Notwithstanding subparagraph (1) of this paragraph, the provisions of section 415(a)(3) and paragraph (c) of this section are not applicable until taxable years beginning after December 31, 1976.

(4) Special rules for certain defined contribution plans with respect to the first limitation year to which section 415 applies. In the case of a defined contribution plan whose plan year does not coincide with the limitation year, the rules of this subparagraph shall be effective with respect to applying the limitations described in section 415(c) and § 1.415–6 for the first limitation year to which section 415 and §§ 1.415–1 through 1.415–10 apply.

(i) Annual additions (as defined in section 415(c)(2) and § 1.415–6(b)) which are allocated under the plan prior to the first day of the first plan year to which section 415 and §§ 1.415–1 through 1.415–10 are effective do not have to be taken into account.

(ii) The amount of compensation (as defined in § 1.415–2(d)) taken into account in applying the limitations may include compensation for the entire limitation year.

(5) Special effective date for special benefit limitation with respect to certain collectively bargained plans. Notwithstanding subparagraph (1) of this paragraph, section 415(b)(7) is not applicable until limitation years beginning after December 31, 1978.

(6) Special effective date for excess contributions to section 403(b) annuity contracts. (i) Notwithstanding subparagraph (1) of this paragraph, the provisions of § 1.415–6(e)(1)(ii) (relating to the manner in which contributions to a section 403(b) annuity contract which exceed the limitations of section 415(c)(1) are treated) are only applicable to taxable years beginning after January 24, 1980.

(ii) For all prior taxable years for which the limitations of section 415 are applicable to section 403(b) annuity contracts, any contribution to the account of an individual under a section 403(b) annuity contract for a taxable year which exceeds the limitations of section 415(c)(1), instead of being treated in the manner described in § 1.415–6(e)(1)(ii), shall reduce the exclusion allowance under section 403(b)(2) for such taxable year to the extent of the excess.

(7) Special effective date for rules relating to change of limitation year. Notwithstanding subparagraph (1) of this paragraph, the provisions of § 1.415–2(b)(4) (relating to the effect of a change of the limitation year) are required to be applied only for changes in limitation years which occur after January 7, 1981. These provisions may also be used for all prior changes in limitation years. However, if the provisions of § 1.415–2(b)(4) are not used for changes in limitation years which occur prior to January 7, 1981, the requirements of § 2.01(4) of Rev.Rul. 75–481, 1975–2 C.B. 188, shall be applicable with respect to such changes.

(8) Special effective date for TRASOP's. The limitations of section 415 apply to an Employee Stock Ownership Plan under section 301(d) of the Tax Reduction Act of 1975 ("TRASOP"). The earliest date on which the first plan year of a TRASOP may begin is January 22, 1974. Therefore, notwithstanding subparagraph (1) of this paragraph, the limitations of section 415 are applicable for TRASOP plan years beginning before 1975 and for limitation years ending with or within plan years beginning before 1975. However, the aggregation rules of § 1.415–8 do not apply to a limitation year of a TRASOP ending with or within a plan year beginning before 1975.

(9) Transitional rules. For special transitional rules, see—

(i) Section 1.415–4 (relating to a transitional rule for defined benefit plans),

(ii) Section 1.415–7(b)(2) (relating to the defined benefit plan fraction applicable to certain participants),

(iii) Section 1.415–7(d) (relating to transitional rules for the defined contribution plan fraction), and

(iv) Section 1.415–7(g) (relating to a special rule for certain plans in effect on September 2, 1974).

(g) Supersession. Section 11.415(c)(4)–1 (relating to special elections for section 403(b) annuity contracts purchased by educational organizations, hospitals and home health service agencies) of the Temporary Income Tax Regulations under the Employee Retirement Income Security Act of 1974 is superseded by this section and §§ 1.415–2 through 1.415–10.

[T.D. 7748, 46 FR 1697, Jan. 7, 1981]

§ 1.415–2 Definitions and special rules.

(a) General application. Unless otherwise provided in the appropriate section, for purposes of §§ 1.415–1 through 1.415–10, the following definitions and special rules shall apply.

(b) Limitation year—(1) In general. (i) Unless the election described in subdivision (ii) of this subparagraph is made, the limitation year, with respect to any qualified plan maintained by the employer, is the calendar year.

(ii) Instead of using the calendar year, an employer may elect to use any other consecutive twelve month period as the limitation year. This includes a fiscal year with an annual period varying from 52 to 53 weeks, so long as the fiscal year satisfies the requirements of section 414(f). If the case of a group of employers which constitute either a controlled group of corporations (within the meaning of section 414(b) as modified by section 415(h)) or trades or businesses (whether or not incorporated) which are under common control (within the meaning of section 414(c) as modified by section 45(h)), the election to use a consecutive twelve month period other than the calendar year as the limitation year must be made by all members of the group that maintain a qualified plan.

(2) Method of election to use a limitation year other than the calendar year or to change limitation year. (i) The election described in subparagraph (1)(ii) of this paragraph shall be made by the adoption of a written resolution by the employer. This requirement is satisfied if the election is made in connection with the adoption, by the employer, of the plan or any amendments to such plan.

(ii) This resolution will not be considered a change of the limitation year, if it is adopted or modified on or before the later of the adoption date of the first amendment conforming an existing plan to the Employee Retirement Income Security Act of 1974, or December 31, 1976.

(3) **Election of multiple limitation years.** Any employer that maintains more than one qualified plan may elect to use different limitation years for each such plan in accordance with rules determined by the Commissioner. The rule described in this subparagraph also applies to a controlled group of employers (within the meaning of section 414(b) or (c), as modified by section 415(h)).

(4) **Effect of change of limitation year.** (i) Once established, the limitation year may be changed only by making the election in the manner described in subparagraph (2) of this paragraph.

(ii) Any change in the limitation year must be a change to a twelve-month period commencing with any day within the current limitation year.

(iii) For purposes of this paragraph, the limitations of section 415 are to be applied in the normal manner to the new limitation year. Moreover, the limitations of section 415 are to be separately applied to a "limitation period" which begins with the first day of the current limitation year and which ends on the day before the first day of the first limitation year for which the change is effective. The dollar limitation with respect to this limitation period is determined by multiplying (A) the applicable dollar limitation for the calendar year in which the limitation period ends by (B) a fraction, the numerator of which is the number of months (including any fractional parts of a month) in the limitation period, and the denominator of which is 12. This adjustment of the dollar limitation only applies to a defined contribution plan.

(iv) For a special effective date with respect to this paragraph, see § 1.415–1(f)(7).

(v) The provisions of this subparagraph may be illustrated by the following example:

Example. In 1981, an employer with a qualified defined contribution plan using the calendar year as the limitation year elects to change the limitation year to a period beginning July 1 and ending June 30. Because of this change, the plan must satisfy the limitations of section 415(c) for the limitation period beginning January 1, 1981 and ending June 30 of that year. In applying the limitations of section 415(c) to this limitation period, the amount of compensation taken into account may only include compensation for this period. Furthermore, the dollar limitation for this period is the otherwise applicable dollar limitation for calendar year 1981, multiplied by $6/12$.

(5) **Limitation year for years prior to effective date.** The limitation year for all years prior to the effective date of section 415 is the consecutive twelve-month period which corresponds to the first limitation year of a plan after the effective date of section 415. (See paragraph (b)(1) of this section for rules relating to the determination of a plan's limitation year.)

(6) **Limitation year for multiemployer plans.** In the case of a multiemployer plan (as defined in section 414(f)), the limitation year is the calendar year unless the plan administrator elects otherwise under paragraph (b)(2) of this section.

(7) **Limitation year for individuals on whose behalf section 403(b) annuity contracts have been purchased.** (i) The limitation year of an individual on whose behalf a section 403(b) annuity contract has been purchased by an employer is determined in the following manner.

(ii) If the individual is not in control (within the meaning of section 414(b) or (c) as modified by section 415(h)) of any employer, the limitation year is the calendar year. However, the individual may elect to change the limitation year to another twelve-month period. To do this, the individual must attach a statement to his income tax return filed for the taxable year in which the change is made. Any change in the limitation year must comply with the rules set forth in paragraph (b)(4) of this section.

(iii) If the individual is in control (within the meaning of section 414(b) or (c) as modified by section 415(h)) of an employer, the limitation year is to be the limitation year of that employer.

(8) **Limitation year for individuals on whose behalf individual retirement plans are maintained.** The limitation year of an individual on whose behalf an individual retirement plan (as described in section 7701(a)(37)) is maintained shall be determined in the manner described in paragraph (b)(7) of this section.

(c) **Defined benefit and defined contribution plan—(1) Defined benefit plan.** A "defined benefit plan" means a plan described in section 414(j).

(2) **Defined contribution plan.** A "defined contribution plan" means a plan described in section 414(i). It includes a money purchase pension plan (as described in § 1.401–1(b)(1)(i)), such as a target benefit plan (as described in § 1.410(a)–4(a)(1)). A hybrid plan (as defined in section 414(k)) is to be treated as a defined contribution plan to the extent that benefits payable

under the plan are based upon the individual account of the participant.

(d) Compensation—(1) Items includable as compensation. For purposes of applying the limitations of section 415, the term "compensation" includes—

(i) The participant's wages, salaries, fees for professional service and other amounts received for personal services actually rendered in the course of employment with an employer maintaining the plan (including, but not limited to, commissions paid salesmen, compensation for services on the basis of a percentage of profits, commissions on insurance premiums, tips and bonuses).

(ii) In the case of a participant who is an employee within the meaning of section 401(c)(1) and the regulations thereunder, the participant's earned income (as described in section 401(c)(2) and the regulations thereunder).

(iii) For purposes of subdivisions (i) and (ii) of this subparagraph, earned income from sources outside the United States (as defined in section 911(b)), whether or not excludable from gross income under section 911 or deductible under section 913.

(iv) Amounts described in sections 104(a)(3), 105(a) and 105(h), but only to the extent that these amounts are includable in the gross income of the employee.

(v) Amounts described in section 105(d), whether or not these amounts are excludable from the gross income of the employee under that section.

(vi) Amounts paid or reimbursed by the employer for moving expenses incurred by an employee, but only to the extent that these amounts are not deductible by the employee under section 217.

(vii) The value of a non-qualified stock option granted to an employee by the employer, but only to the extent that the value of the option is includable in the gross income of the employee for the taxable year in which granted.

(viii) The amount includable in the gross income of an employee upon making the election described in section 83(b).

(2) Items not includable as compensation. The term "compensation" does not include items such as—

(i) Contributions made by the employer to a plan of deferred compensation to the extent that, before the application of the section 415 limitations to that plan, the contributions are not includable in the gross income of the employee for the taxable year in which contributed. In addition, employer contributions made on behalf of an employee to a simplified employee pension described in section 408(k) are not considered as compensation for the taxable year in which contributed to the extent such contributions are deductible by the employee under section 219(b)(7). Additionally, any distributions from a plan of deferred compensation are not considered as compensation for section 415 purposes, regardless of whether such amounts are includable in the gross income of the employee when distributed. However, any amounts received by an employee pursuant to an unfunded non-qualified plan may be considered as compensation for section 415 purposes in the year such amounts are includable in the gross income of the employee.

(ii) Amounts realized from the exercise of a non-qualified stock option, or when restricted stock (or property) held by an employee either becomes freely transferable or is no longer subject to a substantial risk of forfeiture (see section 83 and the regulations thereunder).

(iii) Amounts realized from the sale, exchange or other disposition of stock acquired under a qualified stock option.

(iv) Other amounts which receive special tax benefits, such as premiums for group term life insurance (but only to the extent that the premiums are not includable in the gross income of the employee), or contributions made by an employer (whether or not under a salary reduction agreement) towards the purchase of an annuity contract described in section 403(b) (whether or not the contributions are excludable from the gross income of the employee).

(3) Compensation in limitation year. The compensation (as defined in subparagraph (1) of this paragraph) actually paid or made available to a participant within the limitation year is the compensation used for purposes of applying the limitations of section 415.

(4) Election to use compensation accrued during limitation year. Instead of using the compensation actually paid or made available to a participant during the limitation year, an employer may elect to use the compensation accrued for an entire limitation year for purposes of applying the limitations of section 415. In the case of a group of employers which constitute either a controlled group of corporations (within the meaning of sec-

tion 414(b) as modified by section 415(h)) or trades or businesses (whether or not incorporated) which are under common control (within the meaning of section 414(c) as modified by section 415(h)), the election to use accrued compensation must be made by all members of the group that maintain a qualified plan. Once an election is made, it remains in effect until it is revoked by the employer or group of employers. The election is made or revoked by the adoption of a written resolution by the employer or group of employers. The written resolution requirement described in the preceding sentence is satisfied if the election is made in connection with the adoption, by the employer, or employers, of the plan or any amendments to such plan. The rule described in this subparagraph does not apply to a section 403(b) annuity contract or to an individual retirement plan (as described in section 7701(a)(37)).

(5) Effect of change in method of determining compensation. If, in a particular limitation year, a previously effective election to use accrued compensation is revoked or an election to use accrued compensation is made, any amounts taken into account for compensation purposes for any preceding limitation year may not be counted again in determining compensation for the particular limitation year.

(6) Special rule for employees of controlled group of corporations or trades or businesses under common control. In the case of an employee of two or more corporations which are members of a controlled group of corporations (as defined in section 414(b) as modified by section 415(h)), the term "compensation" for such employee includes compensation from all employers which are members of the group, regardless of whether the employee's particular employer has a qualified plan. This special rule is also applicable to an employee of two or more trades or businesses (whether or not incorporated) which are under common control (as defined in section 414(c) as modified by section 415(h)).

(7) Special rule when section 403(b) annuity is aggregated with qualified plan of controlled employer. If a section 403(b) annuity contract is combined or aggregated with a qualified plan of a controlled employer in accordance with either § 1.415–7(h)(2)(i) or § 1.415–8(d)(2), the following rules apply:

(i) In applying separately the limitations of section 415(b) or (c) to the qualified plan and the limitations of section 415(c) and the exclusion allowance of section 403(b)(2)(A) to the section 403(b) annuity, compensation from the controlled employer may not be aggregated with compensation from the employer purchasing the section 403(b) annuity.

(ii) However, in applying the limitations of section 415(c) in connection with the combining of the section 403(b) annuity with a qualified defined contribution plan or section 415(e) in connection with the aggregating of the section 403(b) annuity with a qualified defined benefit plan, the total compensation from both employers may be taken into account.

(8) Safe harbor rule with respect to plan's definition of compensation. If a plan defines compensation for purposes of applying the limitations of section 415 to include only those items specified in subparagraph (1)(i) of this paragraph and to exclude all those items listed in subparagraph (2) of this paragraph, if applicable, the plan will automatically be considered to be using a definition of compensation which satisfies section 415(c)(3) and these regulations.

[T.D. 7748, 46 FR 1698, Jan. 7, 1981]

§ 1.415–3 Limitations for defined benefit plans.

(a) General rules—(1) Maximum limitations. Under section 415(b) and this section, to satisfy the provisions of section 415(a) for any limitation year, the annual benefit (as defined in paragraph (b)(1)(i) of this section) to which a participant is entitled at any time under a defined benefit plan may not, during the limitation year, exceed the lesser of—

(i) $75,000, or

(ii) 100 percent of the participant's average compensation for his high 3 years of service.

As required in § 1.415–1(d), in order to satisfy the limitations on benefits of this section, the plan provisions must preclude the possibility that any annual benefit exceeding these limitations will be payable at any time. Thus, a plan may fail to satisfy the limitations of this section even though no participant has actually accrued a benefit in excess of these limitations.

(2) Adjustment to dollar limitation. The dollar limitation described in section 415(b)(1)(A) and paragraph (a)(1)(i) of this section is adjusted for cost of living increases under section 415(d) and § 1.415–5(a). The adjusted figure is effective as of January 1 of each calendar year and is applicable to limitation years that end during that calendar year.

(3) Average compensation for high 3 years of service. For purposes of applying the limitation on benefits described in this section, a participant's high 3 years of service is the period of 3 consecutive calendar years (or, the actual number of consecutive years of employment for those employees who are employed for less than 3 consecutive years with the employer) during which the employee had the greatest aggregate compensation (as defined in § 1.415–2(d)) from the employer. For purposes of this subparagraph, in determining a participant's high 3 years, the plan may use any 12 month period instead of the calendar year provided that it is uniformly and consistently applied.

(b) Definitions of terms—(1) Annual benefit. (i) The term "annual benefit" means a benefit which is payable annually in the form of a straight life annuity under a plan. Such benefit does not include any benefits attributable to either employee contributions or rollover contributions (as defined in sections 402(a)(5), 403(a)(4), 408(d)(3) and 409(b)(3)(C)). Additionally, in applying the limitations on benefits described in paragraph (a)(1) of this section to the annual benefit of a participant, it is immaterial if the participant works beyond the normal retirement age as determined under the terms of the plan. Thus, for example, if an individual, who is subject to the dollar limitation of section 415(b)(1)(A) ($110,625 for 1980), retires in 1980 after working past the plan's normal retirement age of 65, the plan may only provide such individual with an annual benefit of $110,625 in 1980 and not the actuarial equivalent of the amount the individual would have been entitled to receive at age 65 in order to comply with the section 415(b) limitations.

(ii) If the plan provides for a benefit which is not payable in the form of a straight life annuity, the benefit is adjusted in accordance with paragraph (c) of this section for purposes of applying the limitations on benefits described in paragraph (a)(1) of this section.

(iii) If rollover contributions are made to the plan, the annual benefit attributable to these contributions is determined on the basis of reasonable actuarial assumptions. See paragraph (d) of this section for rules relating to employee contributions.

(iv) For purposes of this paragraph, when there is a transfer of assets or liabilities from one qualified plan to another, the annual benefit attributable to the assets transferred does not have to be taken into account by the transferee plan in applying the limitations of section 415. The annual benefit payable on account of the transfer for any individual that is attributable to the assets transferred will be equal to the annual benefit transferred on behalf of such individual multiple by a fraction, the numerator of which is the total assets transferred and the denominator of which is the total liabilities transferred.

(2) Retirement benefit. For purposes of this section, the term "retirement benefit" means a benefit provided under the terms of a defined benefit plan which is subject to the limitations of section 415(b) and this section.

(c) Adjustment where form of benefit is other than straight life annuity—(1) In general. (i) Where a defined benefit plan provides a retirement benefit in any form other than a straight life annuity, the plan benefit is adjusted to a straight life annuity beginning at the same age which is the actuarial equivalent of such benefit in accordance with rules determined by the Commissioner. This adjustment is for purposes of applying the limitations on benefits described in paragraph (a)(1) of this section to the annual benefit of the participant.

(ii) Examples of benefits that are not in the form of a straight life annuity are an annuity which includes a post-retirement death benefit and an annuity providing for a guaranteed number of payments.

(2) Certain benefits to which no adjustment is required. For purposes of the adjustment described in subparagraph (1) of this paragraph, the following values are not taken into account:

(i) The value of a qualified joint and survivor annuity (as defined in section 401(a)(11)(G)(iii) and the regulations thereunder) provided by the plan to the extent that such value exceeds the sum of (A) the value of a straight life annuity beginning on the same date and (B) the value of any post-retirement death benefits which would be payable even if the annuity was not in the form of a joint and survivor annuity.

(ii) The value of benefits that are not directly related to retirement benefits (such as pre-retirement disability and death benefits and post-retirement medical benefits).

(iii) The value of benefits provided by the plan which reflect post-retirement cost of living increases to the extent that such increases are in accordance with section 415(d) and § 1.415–5.

(3) Examples. The provisions of subparagraph (2)(i) of this paragraph may be illustrated by the following examples:

Example (1). (i) Corporation ABC maintains a defined benefit plan that provides a benefit in the form of a joint and 100% survivor annuity with a 10 year certain feature. The value of this benefit is equal to 126% of the value of the same amount payable as a straight life annuity beginning on the same date. If the benefit were payable in the form of a joint and 100% survivor annuity, without a 10 year certain feature, its value would be equal to only 123% of the value of the same amount payable as a straight life annuity beginning on the same date. If the benefit were payable with a 10 year certain feature, but without the joint and 100% survivor aspect, its value would equal 110% of the value of the same amount payable as a straight life annuity beginning on the same date. Thus, the value of the post-retirement death benefits which would be payable even if the annuity were not in the form of a joint and survivor annuity is 10%.

(ii) Under subparagraph (2)(i) of this paragraph, the values which may be excluded for purposes of the adjustment required by subparagraph (1) of this paragraph are as follows: The value of the joint and survivor annuity provided by the plan (126%) to the extent that such value exceeds the sum of, the value of the straight life annuity beginning on the same date (100%) and the value of the post-retirement death benefits (10%). Therefore, the value of the joint and survivor annuity provided by the plan exceeds the value of the straight life annuity with the 10 year certain feature by 16% (126%–110%).

(iii) Although 16% of the excess benefit attributable to the annuity provided by this plan may, consequently, be ignored (because this represents the value added to the 10 year certain and life annuity benefit by the joint survivor feature), 10% of such excess benefit (the value added to the straight life annuity benefit by the 10 year certain feature) must be taken into account for purposes of adjusting the benefit under the plan to an actuarially equivalent straight life annuity. Thus, for example, if ABC Corporation were to provide a benefit equal to 95% of a participant's compensation for the high three years of service, the limitation of section 415(b)(1)(B) would be exceeded because the benefit under the plan would be the actuarial equivalent of a straight life annuity equal to 105% of a participant's compensation for the high three years.

Example (2). Corporation XYZ maintains a nondiscriminatory defined benefit plan that provides a benefit which is equal to 100% of a participant's compensation for his high 3 years of service. For married participants, the benefit is payable in the form of a joint and 100% survivor annuity. While for participants who are not married, the benefit is payable in the form of a straight life annuity. The plan also provides that married participants can elect to receive their benefits in the form of a lump sum distribution which is the actuarial equivalent of a joint and 100% survivor annuity. The special rule set forth in subparagraph (2)(i) of this paragraph only applies, however, if the benefit is payable in the form of a qualified joint and survivor annuity. Any other forms of optional benefits must be adjusted to a straight life annuity in accordance with subparagraph (1) of this paragraph. Accordingly, because the benefit payable under the plan in the form of a lump sum distribution is the actuarial equivalent of a straight life annuity which is greater than 100% of a participant's compensation for his high 3 years, the limitation of section 415(b)(1)(B) has been exceeded.

(d) Employee contributions—(1) Mandatory contributions. Where a defined benefit plan provides for mandatory employee contributions (as defined in section 411(c)(2)(C)), the annual benefit attributable to such contributions is not taken into account for purposes of applying the limitations on benefits described in paragraph (a) of this section. The annual benefit attributable to mandatory contributions is determined by using the factors described in section 411(c)(2)(B) and the regulations thereunder, regardless of whether section 411 applies to that plan.

However, the mandatory employee contributions are considered a separate defined contribution plan maintained by the employer that is subject to the limitations on contributions and other additions described in § 1.415–6. (See § 1.415–7 for provisions relating to the limitations applicable where an employer maintains a defined benefit and defined contribution plan for the same employee.)

(2) Voluntary contributions. Where a defined benefit plan provides for voluntary employee contributions, these contributions are considered a separate defined contribution plan maintained by the employer which is subject to the limitations on contributions and other additions described in § 1.415–6. (See § 1.415–7 for provisions relating to the limitations applicable where an employer maintains a defined benefit and defined contribution plan for the same employee.)

(3) Example: The provisions of this paragraph may be illustrated by the following example:

Example. A is a participant in a defined benefit plan maintained by his employer. Under the terms of the plan A must make contributions to the plan in a stated amount to accrue benefits derived from employer contributions. These contributions are mandatory employee contributions within the meaning of section 411(c)(2)(C) and, thus, the annual benefit attributable to these contributions does not have to be taken into account for purposes of testing the annual benefit derived from employer contributions against the applicable limitation on benefits. However, these contributions are considered a separate defined contribution plan maintained by A's employer. Accordingly, with respect to the current limitation year: (1) the limitation on benefits (as described in paragraph (a)(1) of this section) is applicable to the annual benefit attributable to employer contributions to the defined benefit plan; (2) the limitation on contributions and other additions (as described in § 1.415–6) is applicable to the defined contribution plan consisting of A's mandatory contributions; and (3) the provisions of § 1.415–7 (relating to the limitations where the employer maintains a defined benefit and defined contribution plan for the same employee) are applicable to the defined benefit and defined contribution plan in which A participates. These same limitations would also apply. If, instead of providing for mandatory employee contributions the plan permitted voluntary employee contributions, since both voluntary and mandatory employee contributions are treated as separate defined contribution plans maintained by the employer.

(e) Adjustment where benefit begins before age 55. Where a defined benefit plan provides a

retirement benefit beginning before age 55, the plan benefit is adjusted to the actuarial equivalent of a benefit beginning at age 55 in accordance with rules determined by the Commissioner. This adjustment is only for purposes of applying the dollar limitation described in section 415(b)(1)(A) to the annual benefit of the participant.

(f) Total annual benefits not in excess of $10,000—(1) In general. The annual benefit (without regard to the age at which benefits commence) payable with respect to a participant under any defined benefit plan is not considered to exceed the limitations on benefits described in section 415(b)(1) and in paragraph (a)(1) of this section if—

(i) The retirement benefits derived from employer contributions payable with respect to the participant under the plan and all other defined benefit plans of the employer do not in the aggregate exceed $10,000 for the limitation year, or for any prior limitation year, and

(ii) The employer has not at any time, either before or after the effective date of section 415, maintained a defined contribution plan in which the participant participated.

(2) Special rule with respect to participants in multiemployer plans. The special $10,000 exception set forth in subparagraph (1) of this paragraph is applicable to a participant in a multiemployer plan described in section 414(f) without regard to whether that participant ever participated in one or more other plans maintained by an employer who also maintains the multiemployer plan, provided that none of such other plans were maintained as a result of collective bargaining involving the same employee representative as the multiemployer plan.

(3) Special rule with respect to employee contributions. For purposes of subparagraph (1)(ii) of this paragraph, if a defined benefit plan provides for employee contributions, whether voluntary or mandatory, these contributions will not be considered a separate defined contribution plan maintained by the employer. Thus, a contributory defined benefit plan may utilize the special dollar limitation provided for in this paragraph.

(4) Computation of $10,000 amount. For purposes of subparagraph (1)(i) of this paragraph, the value of the retirement benefit payable under the plan is not adjusted upward for early retirement provisions and benefits which are not in the form of a straight life annuity (whether or not directly related to retirement benefits).

(5) Examples. The application of this paragraph may be illustrated by the following examples:

Example (1). B is a participant in a defined benefit plan maintained by this employer, X Corporation, which provides for a benefit payable in the form of a straight life annuity beginning at age 65. B's compensation for his high 3 years of service is $6,000. The plan does not provide for employee contributions and at no time has B been a participant in a defined contribution plan maintained by X. With respect to the current limitation year, B's retirement benefit under the plan is $9,500. Because B's retirement benefit does not exceed $10,000 and because B has at no time participated in a defined contribution plan maintained by X, the benefits payable under the plan are not considered to exceed the limitation on benefits otherwise applicable to B ($6,000). This result would remain the same, even if, under the terms of the plan, B's normal retirement age were age 50 or if the plan provided for employee contributions.

Example (2). Assume the same facts as in example (1), except that the plan provides for a benefit payable in the form of a life annuity with a 10 year certain feature. Assume that after the adjustment described in paragraph (c) of this section, B's annual benefit under the plan for the current limitation year is $10,500. However, for purposes of applying the special rule provided in this paragraph for total benefits not in excess of $10,000, there is no adjustment required if the retirement benefit payable under the plan is not in the form of a straight life annuity. Therefore, because B's retirement benefit does not exceed $10,000, B may receive the full $9,500 benefit without the otherwise applicable benefit limitations of this section being exceeded.

(g) Special rule for service of less than 10 years—(1) In general. Where a participant has less than 10 years of service with the employer at the time the participant begins to receive retirement benefits under the plan, the benefit limitations described in section 415(b)(1) and (4) and paragraphs (a)(1) and (f)(1) of this section are to be reduced by multiplying the otherwise applicable limitation by a fraction—

(i) The numerator of which is the number of years of service with the employer as of, and including, the current limitation year, and

(ii) The denominator of which is 10. For purposes of this subparagraph, the term "year of service" is to be determined on a reasonable and consistent basis.

(2) Examples. The provision of this paragraph may be illustrated by the following examples:

Example (1). C begins employment with Acme Corporation on January 1, 1977, at the age of 58. Acme maintains only a noncontributory defined benefit plan which provides for a straight life annuity beginning at age 65 and uses the calendar year for the limitation and plan year. Acme has never maintained a defined contribution plan. C becomes a participant in Acme's plan on January 1, 1978 and works through December 31, 1983, when he is age 65. C begins to receive benefits under the plan in 1984. C's average compensation for his high 3 years of service is $20,000. Furthermore, under the terms of

Acme's plan, for purposes of computing C's nonforfeitable percentage in his accrued benefit derived from employer contributions, C has only 7 years of service with Acme (1977–1983). Therefore, because C has less than 10 years of service with Acme at the time he begins to receive benefits under the plan, the maximum permissible annual benefit payable with respect to C is only \$14,000 (\$20,000 × 7/10).

Example (2). Assume the same facts as in example (1), except that C's average compensation for his high 3 years is \$8,000. Because C has less than 10 years of service with Acme at the time he begins to receive benefits, the maximum benefit payable with respect to C would be reduced to \$5,600 (\$8,000 × 7/10). However, the special rule for total benefits not in excess of \$10,000, provided in paragraph (f) of this section, is applicable in this case. Accordingly, C may receive an annual benefit of \$7,000 (\$10,000 × 7/10) without the benefit limitations of this section being exceeded.

Example (3). ABC corporation maintains a defined benefit plan. Instead of adjusting the benefit limitations in accordance with the method described in subparagraph (1) of this paragraph, the plan provides that the plan administrator may make the necessary adjustment by multiplying the otherwise applicable limitation by a fraction—(1) the numerator of which is the number of completed months of service with the employer, and (2) the denominator of which is 120. The plan further provides that a completed month of service with the employer is any calendar month in which the employee is credited with at least 83 hours of service. Provided that an hour of service is determined in a manner that is reasonable and consistent, the plan may use this alternative rule for making the adjustment required when a participant has less than 10 years of service with the employer at the time he begins to receive benefits under the plan.

(h) Benefits under certain collectively bargained plans. For a special rule affecting the compensation limitation described in section 415(b)(1)(B) and paragraph (a)(1)(ii) of this section, see section 415(b)(7). For a special effective date with respect to this rule, see § 1.415–1(f)(5).

[T.D. 7748, 46 FR 1700, Jan. 7, 1981]

§ 1.415–4 Transitional rule for defined benefit plans.

(a) In general. If all of the conditions described in paragraph (b) of this section are satisfied, the annual benefit payable to an individual who was a participant in a defined benefit plan at any time before October 3, 1973, will not be considered to exceed the limitations of section 415(b) and § 1.415–3(a). In the case of an individual who was a participant in more than one defined benefit plan at any time before October 3, 1973, the annual benefit payable to that individual from each plan will be deemed not to exceed the limitations of section 415(b) and § 1.415–3(a) if the benefit from each plan satisfies all of the conditions described in paragraph (b) of this section.

(b) Conditions for application of transitional rule. The conditions are—

(1) The annual benefit payable to the participant does not exceed 100 percent of that participant's annual rate of compensation (as defined in paragraph (c) of this section) on October 2, 1973, or, if earlier, as of the date the participant separated from the service of the employer.

(2) The annual benefit payable to the participant does not exceed the annual benefit which would have been payable to the participant at any time if—

(i) All the terms and conditions of the plan which were actually in effect on October 2, 1973 (or if earlier, on the date the participant separated from the service of the employer) had remained in effect, and

(ii) The participant's compensation taken into account for determining benefits under the plan for any period after October 2, 1973, did not exceed his annual rate of compensation (as defined in paragraph (c) of this section) on that date.

(3) The annual benefit payable to a participant who separated from the service of the employer before October 2, 1973, does not exceed the participant's nonforfeitable accrued benefit under the plan as of the date he separated from service.

(c) Special rules—(1) Annual rate of compensation. For purposes of this section, a participant's annual rate of compensation for a particular calendar year shall be the greater of—

(i) The participant's compensation for that calendar year as determined in accordance with the rules provided in § 1.415–2(d), or

(ii) The compensation which would be used to determine benefits under the plan if the employee separated from the service of the employer on October 2, 1973, or, if earlier, the employee's actual date of separation from the service of the employer.

(2) Cost-of-living adjustments. (i) If the plan, as in existence on October 2, 1973, provided for a post-retirement cost of living adjustment to benefits, the adjustment may be taken into account in determining the participant's allowable benefit under paragraph (b) of this section. However, under paragraph (b)(2) of this section, if a plan is amended after October 2, 1973 to provide for cost-of-living benefit increases for retired participants, the transitional rule of this section will not apply to any increased benefit attributable to the amendment.

(ii) Any cost-of-living increase in the dollar limitation described in section 415(b)(1)(A) under section 415(d) and § 1.415–5(a) may be taken advantage of by an individual who is otherwise using the transitional rule set forth in this section. Thus, for example, if, due to cost-of-living increases under section 415(d) and § 1.415–5(a), the dollar limitation for 1981 is greater than $110,625, to the extent allowed under section 415(b), a plan may provide that an individual who is otherwise receiving a benefit of $110,625 per year under the transitional rule of this section, may receive the greater amount in 1981.

(3) Retirement benefit beginning before age 55. If a defined benefit plan provides a retirement benefit beginning before age 55, no actuarial adjustment of the benefit which can be provided under the transitional rule of this section is required to be made.

(4) Retirement benefit payable in a form other than a straight life annuity. If a defined benefit plan, as in existence on October 2, 1973, provided a retirement benefit in a form other than a straight life annuity, no actuarial adjustment (as otherwise required under § 1.415–3(c)) of the benefit which can be provided under the transitional rule of this section is required to be made. However, if the plan is amended after October 2, 1973, to provide a benefit of greater value than the benefit provided under the plan as of October 2, 1973, the transitional rule of this section will not apply to the increase in the value of the benefit attributable to the amendment. (See paragraph (b)(2)(i) of this section.)

(d) Examples. The provisions of this section may be illustrated by the following examples:

Example (1). N, a participant in a noncontributory defined benefit plan maintained by his employer, retired on February 17, 1969, and became eligible to receive benefits under the plan. At that time, N had attained age 65, the normal retirement age under the plan. N's annual rate of compensation on February 17, 1969, was $90,000. Under the terms of the plan, as in effect on February 17, 1969, N was entitled to an annual benefit of $86,000, which was N's accrued nonforfeitable benefit as of that date. Because the annual benefit payable with respect to N (i) does not exceed 100 percent of N's compensation on February 17, 1969, (ii) does not exceed the annual benefit to which N was entitled on retirement, and (iii) did not exceed N's nonforfeitable accrued benefit on retirement, the plan may provide an annual benefit of $86,000 with respect to N for limitation years to which section 415 applies without violating the limitations imposed by section 415(b) and § 1.415–3.

Example (2). Assume the same facts as in example (1) except that on February 17, 1969, when N retired and became eligible to receive benefits under the plan, N had not attained the age of 55. Because the adjustment required under section 415(b)(2)(C) for retirement benefits beginning before age 55 is only applicable to the dollar limitation described in section 415(b)(1)(A), under paragraph (c)(3) of this section, no actuarial adjustment of the annual benefit of $86,000 payable with respect to N is required to be made. Therefore, the plan may pay annual benefits of $86,000 to N, even though N retires and is eligible to receive benefits before age 55.

[T.D. 7748, 46 FR 1703, Jan. 7, 1981]

§ 1.415–5 Cost of living adjustments for defined benefit plans.

(a) Dollar limitation—(1) In general. Under section 415(d)(1)(A), the dollar limitation described in section 415(b)(1)(A) applicable to defined benefit plans for limitation years to which section 415 applies is adjusted annually to take into account increases in the cost of living. The adjustment of the dollar limitation is made by multiplying an annual adjustment factor by $75,000. For purposes of this paragraph, the annual adjustment factor is to be determined by the Commissioner.

(2) Effective date of adjustment. The adjusted dollar limitation applicable to defined benefit plans is effective as of January 1 of each calendar year and applies with respect to limitation years ending with or within that calendar year.

(3) Application of adjusted figure. The adjusted dollar limitation is applicable to employees who are participants in a defined benefit plan and to employees who have retired or otherwise terminated their service under the plan with a nonforfeitable right to accrued benefits, regardless of whether they have actually begun to receive such benefits. However, for purposes of this subparagraph, the annual benefit payable to a terminated participant, which is otherwise limited by the dollar limitation, may only be increased in accordance with cost-of-living adjustments of the dollar limitation if the plan specifically provides for such post-retirement adjustments.

(b) Average compensation for high 3 years of service limitation—(1) In general. Under section 415(d)(1)(C), with regard to participants who have separated from service with a nonforfeitable right to an accrued benefit, the compensation limitation described in section 415(b)(1)(B) applicable to limitation years to which section 415 applies may be adjusted annually to take into account increases in the cost of living. For any limitation year beginning after the separation occurs, the adjustment of the compensation limitation is made by multiplying the annual adjustment factor (as defined in paragraph (b)(2) of this section) by the compensation limitation applicable to the participant in the limitation year he separated from the

service of the employer. In the case of a participant who has separated from service prior to the first limitation year to which section 415 applies, the cost-of-living adjustment of the compensation limitation under this paragraph for all limitation years prior to the effective date of section 415 is to be determined as provided by the Commissioner. For purposes of the adjustment described in this subparagraph, the annual benefit payable to a terminated participant, which is otherwise limited by the compensation limitation, may only be increased in accordance with cost-of-living adjustments of the compensation limitation if the plan specifically provides for such post-retirement adjustments.

(2) Annual adjustment factor for compensation limitation. For any limitation year beginning after the separation occurs, the annual adjustment factor is a fraction, the numerator of which is the adjusted dollar limitation for the limitation year in which the compensation limitation is being adjusted and the denominator of which is the adjusted dollar limitation for the limitation year in which the participant separated from service. In determining the adjusted dollar limitation for purposes of computing the annual adjustment factor under this subparagraph, the rule provided in paragraph (a)(2) of this section (relating to the effective date of the adjusted dollar limitation) shall be applicable.

(3) Example. The provisions of this paragraph may be illustrated by the following example:

Example. X is a participant in a qualified defined benefit plan maintained by his employer. The plan has a calendar year limitation year. Under the terms of the plan, X is entitled to a benefit consisting of a straight life annuity equal to 100 percent of X's compensation for his high 3 years of service. X's average compensation for his high 3 years is $20,000. X separates from the service of his employer on October 3, 1980, with a nonforfeitable right to his accrued benefit, and begins to receive benefit payments on November 1, 1980. Assume that the adjusted dollar limitation for 1980 is $100,000 and that the adjusted dollar limitation for 1981 is $110,000. For the limitation year beginning January 1, 1981 (the first limitation year beginning after X separates from service), the compensation limitation applicable to X may be adjusted for cost of living increases by multiplying the annual adjustment factor by $20,000. The annual adjustment factor for this limitation year is a fraction, the numerator of which is $110,000 (the adjusted dollar limitation for the limitation year in which the compensation limitation is being adjusted) and the denominator of which is $100,000 (the adjusted dollar limitation for the limitation year in which X separates from service). Thus, for the limitation year beginning January 1, 1981, if the plan provides for post-retirement cost of living adjustments, X's maximum annual benefit could be increased to $22,000 ($110,000/$100,000 × $20,000).

(c) Automatic cost of living adjustments of dollar limitation—(1) General rule. A defined benefit plan may include a provision which provides for an annual automatic cost-of-living adjustment of the dollar limitation described in section 415(b)(1)(A) in accordance with paragraph (a) of this section. However, the provision may only provide for scheduled annual increases in the dollar limitation which become effective no sooner than the date determined in accordance with paragraph (a)(2) of this section.

(2) Example. The provisions of this paragraph may be illustrated by the following example:

Example. Plan A is a defined benefit plan. Effective January 1, 1976, the plan was amended to limit all participants' annual plan benefits, determined on a straight life annuity basis, to $75,000. The amendment also provides that, "as of January 1, of each calendar year, the dollar limitation as determined by the Commissioner of Internal Revenue for that calendar year will become effective as the Maximum Permissible Dollar Amount of the plan for that calendar year. The Maximum Permissible Dollar Amount for a calendar year applies to limitation years ending with or within that calendar year." The amendment providing for an automatic cost-of-living adjustment of the dollar limitation of Plan A is an example of a provision which satisfies the requirements of subparagraph (1) of this paragraph.

[T.D. 7748, 46 FR 1704, Jan. 7, 1981]

§ 1.415–6 Limitation for defined contribution plans.

(a) General rules—(1) Maximum limitations. Under section 415(c) and this section, to satisfy the provisions of section 415(a) for any limitation year, the annual additions (as defined in paragraph (b) of this section credited to the account of a participant in a defined contribution plan (as defined in section 414(i)), for the limitation year may not exceed the lesser of—

(i) $25,000, or

(ii) 25 percent of the participant's compensation (as defined in subparagraph (3) of this paragraph) for the limitation year.

(2) Adjustment to dollar limitation. The dollar limitation described in section 415(c)(1)(A) and subparagraph (1)(i) of this paragraph is adjusted for cost of living increases under section 415(d) and paragraph (d) of this section. The adjusted figure is effective as of January 1 of each calendar year and applies to limitation years that end during that calendar year.

(3) Participant's compensation. For purposes of this section, the term "participant's compensation" for any limitation year has the same meaning as set forth in § 1.415–2(d). The term "participant's compensation" includes all compensation actually paid or made available to the individual for the entire limitation year even though the

individual may not have been a participant for the entire limitation year.

(4) **Section 403(b) annuity contracts.** For special rules with respect to section 403(b) annuity contracts purchased by educational organizations, hospitals and home health service agencies, see paragraph (e) of this section.

(b) **Annual additions—(1) In general.** For purposes of this section, the term "annual additions" means the sum, credited to a participant's account for any limitation year, of—

(i) Employer contributions,

(ii) The lesser of the amount of employee contributions in excess of 6% of his compensation (as defined in paragraph (a)(3) of this section) for the limitation year, or one half of the employee contributions for that year, and

(iii) Forfeitures.

(2) **Employer contributions.** (i) For purposes of paragraph (b)(1)(i) of this section, the term "annual additions" includes employer contributions which are made under the plan. Furthermore, the Commissioner may in an appropriate case, considering all of the facts and circumstances treat transactions between the plan and the employer or certain allocations to participants' accounts as giving rise to annual additions.

(ii) If, in a particular limitation year, an employer contributes an amount to a participant's account because of an erroneous forfeiture in a prior limitation year, or because of an erroneous failure to allocate amounts in a prior limitation year, the contribution will not be considered an annual addition with respect to the participant for that particular limitation year, but will be considered an annual addition for the limitation year to which it relates. An example of a situation in which an employer contribution might occur under the circumstances described in the preceding sentence is a retroactive crediting of service for an employee under 29 CFR 2530.200(b)–2(a)(3) (regulations promulgated by the Department of Labor) in accordance with an award of back pay. For purposes of this subdivision, if the amount so contributed in the particular limitation year takes into account actual investment gains attributable to the period subsequent to the year to which the contribution relates, the portion of the total contribution which consists of such gains is not considered as an annual addition for any limitation year. The rule described in this subdivision is only applicable for purposes of applying the limitations of section 415.

(iii) The restoration of an employee's accrued benefits by the employer in accordance with section 411(a)(3)(D) or section 411(a)(7)(C) will not be considered an annual addition for the limitation year in which the restoration occurs. (See § 1.411(a)–7(d)(6)(iii)(B).)

(iv) The transfer of funds from one qualified plan to another will not be considered an annual addition for the limitation year in which the transfer occurs.

(v) In the case of a defined contribution plan (such as a money purchase pension plan) to which an employer makes a contribution in order to reduce an accumulated funding deficiency (as defined in section 412(a)), the contribution will be considered an annual addition for the limitation year when the contribution was otherwise required to have been made. The special rule provided in the preceding sentence is available however, only if the contribution is allocated to those participants who would have received an addition if the contribution had been timely made. For purposes of determining the amount of the annual addition under this subdivision, any reasonable amount of interest paid by the employer is disregarded. However, any interest paid by the employer that is in excess of a reasonable amount, as determined by the Commissioner, is taken into account as an annual addition for the limitation year when the contribution was otherwise required to have been made.

(vi) In the case of a defined contribution plan (such as a money purchase pension plan) for which there has been a waiver of the minimum funding standard in a prior limitation year in accordance with section 412(d), that portion of an employer contribution in a subsequent limitation year which, if not for the waiver, would have otherwise been required in the prior limitation year under section 412(a) will be considered an annual addition for the prior limitation year. For purposes of determining the amount of such annual addition for the prior limitation year, any reasonable amount of interest paid by the employer in addition to the actual make-up contribution is disregarded. However, any interest paid by the employer that is in excess of a reasonable amount, as determined by the Commissioner, is taken into account as an annual addition for the prior limitation year.

(3) **Employee contributions.** For purposes of paragraph (b)(1)(ii) of this section, the term "annual additions" includes, to the extent employee

contributions would otherwise be taken into account under this section as an annual addition, mandatory employee contributions (as defined in section 411(c)(2)(C) and the regulations thereunder) as well as voluntary employee contributions. The term "annual additions" does not include—

(i) Rollover contributions (as defined in section 402(a)(5), 403(a)(4), 408(d)(3) and 409(b)(3)(C)).

(ii) Repayments of loans made to a participant from the plan.

(iii) Repayments of amounts described in section 411(a)(7)(B) (in accordance with section 411(a)(7)(C)) and section 411(a)(3)(D) (see § 1.411(a)–7(d)(6)(iii)(B)).

The direct transfer of employee contributions from one qualified plan to another.

However, the Commissioner may in an appropriate case, considering all of the facts and circumstances, treat transactions between the plan and the employee or certain allocations to participants' accounts as giving rise to annual additions.

(4) Contributions other than cash. For purposes of this paragraph, a contribution by the employer or employee of property other than cash will be considered to be a contribution in an amount equal to the fair market value (as defined in § 20.2031–1 of the Estate Tax Regulations) of the property on the date the contribution is made. The contribution described in this subparagraph may, however, constitute a prohibited transaction within the meaning of section 4975(c)(1).

(5) Forfeitures. With respect to a particular limitation year, forfeitures (as well as any income attributable to the forfeiture) will be considered to be an annual addition to the plan if such forfeitures are allocated to the account of the participant as of any day within that limitation year.

(6) Excess annual additions. If as a result of the allocation of forfeitures, a reasonable error in estimating a participant's annual compensation, or under other limited facts and circumstances which the Commissioner finds justify the availability of rules set forth in this subparagraph, the annual additions under the terms of a plan for a particular participant would cause the limitations of section 415 applicable to that participant for the limitation year to be exceeded, the excess amounts shall not be deemed annual additions in that limitation year if they are treated in accordance with any one of the following subdivisions:

(i) The excess amounts in the participant's account must be allocated and reallocated to other participants in the plan. However, if the allocation or reallocation of the excess amounts pursuant to the provisions of the plan causes the limitations of section 415 to be exceeded with respect to each plan participant for the limitation year, then these amounts must be held unallocated in a suspense account. If a suspense account is in existence at any time during a particular limitation year, other than the limitation year described in the preceding sentence, all amounts in the suspense account must be allocated and reallocated to participants' accounts (subject to the limitations of section 415) before any employer contributions and employee contributions which would constitute annual additions may be made to the plan for that limitation year.

(ii) The excess amounts in the participant's account must be used to reduce employer contributions for the next limitation year (and succeeding limitation years, as necessary) for that participant if that participant is covered by the plan of the employer as of the end of the limitation year. However, if that participant is not covered by the plan of the employer as of the end of the limitation year, then the excess amounts must be held unallocated in a suspense account for the limitation year and allocated and reallocated in the next limitation year to all of the remaining participants in the plan in accordance with the rules set forth in paragraph (b)(6)(i) of this section. Furthermore, the excess amounts must be used to reduce employer contributions for the next limitation year (and succeeding limitation years, as necessary) for all of the remaining participants in the plan. For purposes of this subdivision, excess amounts may not be distributed to participants or former participants.

(iii) The excess amounts in the participant's account must be held unallocated in a suspense account for the limitation year and allocated and reallocated in the next limitation year to all of the participants in the plan in accordance with the rules provided in paragraph (b)(6)(i) of this section. The excess amounts must be used to reduce employer contributions for the next limitation year (and succeeding limitation years, as necessary) for all of the participants in the plan. For purposes of this subdivision, excess amounts may not be distributed to participants or former participants.

(iv) Notwithstanding subdivisions (i), (ii) or (iii) of this subparagraph, the plan may provide for the return of employee contributions (whether voluntary or mandatory), to the extent that the return would reduce the excess amounts in the participant's account. However, the return of mandato-

ry employee contributions may result in discrimination in favor of employees who are officers, shareholders or highly compensated. If the plan does not provide for the return of gains attributable to the returned employee contributions, such earnings will be considered as an employee contribution for the limitation year in which the returned contribution was made. If a suspense account is in existence at any time during the limitation year in accordance with this subparagraph, investment gains and losses and other income may, but need not, be allocated to the suspense account. To the extent that investment gains or other income or investment losses are allocated to the suspense account, the entire amount allocated to participants from the suspense account, including any such gains or other income or less any losses, is considered as the annual addition. See § 1.401(a)–2(b) for provisions relating to the disposition of a suspense account in existence upon termination of a plan.

(7) **Time when annual additions credited.** (i) For purposes of this paragraph, an annual addition is credited to the account of a participant for a particular limitation year if it is allocated to the participant's account under the terms of the plan as of any date within that limitation year. However, an amount is not deemed allocated as of any date within a limitation year if such allocation is dependent upon participation in the plan as of any date subsequent to such date.

(ii) For purposes of this subparagraph, employer contributions shall not be deemed credited to a participant's account for a particular limitation year, unless the contributions are actually made to the plan no later than 30 days after the end of the period described in section 404(a)(6) applicable to the taxable year with or within which the particular limitation year ends. If, however, contributions are made by an employer exempt from Federal income tax under section 501(a), the contributions must be made to the plan no later than the 15th day of the sixth calendar month following the close of the taxable year (or fiscal year, if no taxable year) with or within which the particular limitation year ends.

(iii) For purposes of this subparagraph, employee contributions, whether voluntary or mandatory, shall not be deemed credited to a participant's account for a particular limitation year, unless the contributions are actually made to the plan no later than 30 days after the close of that limitation year. However, in the case of employee contributions to an employee stock ownership plan which meets the requirements of either section 301(d) of the Tax Reduction Act of 1975 (89 Stat. 38, § 1.46–7) and the regulations thereunder (§ 1.46–8) or section 409A and the regulations thereunder, such contributions shall be deemed credited to a participant's account in the limitation year for which the contribution is allocated to that account under the terms of the plan, provided that the contributions, or pledges to make the contributions, are actually made no later than the period described in section 404(a)(6) applicable to the taxable year with or within which the particular limitation year ends.

(iv) For purposes of this paragraph, amounts contributed to an individual retirement plan (as described in section 7701(a)(37)) are treated as allocated to the individual's account as of the last day of the limitation year ending with or within the taxable year for which the contribution is made.

(c) **Examples.** The provisions of paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example (1). P is a participant in a qualified profit-sharing plan maintained by his employer, ABC Corporation. The limitation year for the plan is the calendar year. P's compensation (as defined in paragraph (a)(3) of this section) for the current limitation year is $20,000 consisting exclusively of salary. Because the compensation limitation described in section 415(c)(1)(B) applicable to P for the current limitation year is lower than the dollar limitation described in section 415(c)(1)(A) (as adjusted for cost of living increases), the maximum annual addition which can be allocated to P's account for the current limitation year is $5,000 (25 percent of $20,000).

Example (2). Assume the same facts as in Example (1), except that P's compensation for the current limitation year is $140,000. The maximum amount of annual additions that may be allocated to P's account in the current limitation year may not exceed the lesser of $35,000 (25 percent of $140,000) or the dollar limitation as in effect as of January 1 of the calendar year in which the current limitation year ends.

Example (3). Assume the same facts as in Example (1), except that P's compensation for the current limitation year consists of $20,000 salary and a bonus which is paid to P after the end of the current limitation year. Because the bonus was not actually paid or made available to P within the current limitation year, P's compensation for that year, for purposes of computing the compensation limitation described in section 415(c)(1)(B), may not include the bonus. However, if ABC Corporation had elected under § 1.415–2(d)(4) to use the compensation accrued for the current limitation year, then the amount of the bonus which accrued within the current limitation year could have been taken into account.

Example (4). Employer N maintains a qualified profit-sharing plan which uses the calendar year as its plan year and its limitation year. N's taxable year is a fiscal year beginning June 1 and ending May 31. Under the terms of the profit-sharing plan maintained by N, employer contributions are made to the plan two months after the close of N's taxable year and are allocated as of the last day of the plan year ending within the taxable year. Thus, employer contributions for the 1977 calen-

dar year limitation year are made on July 31, 1978 (the date that is two months after the close of N's taxable year ending May 31, 1978) and are allocated as of December 31, 1977. Because the employer contributions are actually made to the plan no later than 30 days after the end of the period described in section 404(a)(6) with respect to N's taxable year ending May 31, 1978, the contributions will be considered annual additions for the 1977 calendar year limitation year.

Example (5). Assume the same facts as in example (4), except that the plan year for the profit-sharing plan maintained by N is the 12-month period beginning on March 1 and ending on February 28. Under the terms of the plan, an employer contribution which is made to the plan on July 31, 1978, is allocated to participants' accounts as of February 28, 1978. Because the last day of the plan year is in the 1978 calendar year limitation year, and because, under the terms of the plan, employer contributions are allocated to participants' accounts as of the last day of the plan year, the contributions are considered annual additions for the 1978 calendar year limitation year.

Example (6). XYZ Corporation maintains a profit-sharing plan to which a participant may make voluntary employee contributions for any year not to exceed 10 percent of the participant's compensation for the year. The plan permits a participant to make retroactive make-up contributions for any year for which he contributed less than 10 percent of compensation. XYZ uses the calendar year as the plan year and the limitation year. Under the terms of the plan, voluntary employee contributions are credited to a participant's account for a particular limitation year if such contributions are allocated to the participant's account as of any date within that limitation year. Participant A's compensation is as follows:

Limitation year and compensation

1976	$10,000
1977	$12,000
1978	$14,000
1979	$16,000

Participant A makes no voluntary employee contributions during limitation years 1976, 1977 and 1978. On October 1, 1979, participant A makes a voluntary employee contribution of $5,200 (10 percent of A's aggregate compensation for limitation years 1976, 1977, 1978 and 1979 of $52,000). Under the terms of the plan, $1,000 of this 1979 contribution is allocated to A's account as of limitation year 1976; $1,200 is allocated to A's account of limitation year 1977; $1,400 is allocated to A's account as of limitation year 1978, and $1,600 is allocated to A's account as of limitation year 1979. However, under the rule set forth in paragraph (b)(7)(iii) of this section, employee contributions will not be considered credited to a participant's account for a particular limitation year for section 415 purposes unless the contributions are actually made to the plan no later than 30 days after the close of that limitation year. Thus, A's voluntary employee contribution of $5,200 made on October 1, 1979 would be considered as credited to A's account only for the 1979 calendar year limitation year, notwithstanding the plan provisions. (See section 415(c)(2)(B) and paragraph (b)(1)(ii) of this section for provisions relating to the amount of A's contribution that would be considered an annual addition to A's account for the 1979 calendar year limitation year.)

(d) Cost-of-living adjustment for defined contribution plans—(1) In general. Under section 415(d)(1)(B), the dollar limitation described in section 415(c)(1)(A) applicable to limitation years to which section 415 applies is adjusted annually to take into account increases in the cost of living. See § 1.415–5(a) for the procedure for making this adjustment and the effective date of the adjusted dollar limitation.

(2) Automatic adjustments with respect to dollar limitation. A defined contribution plan may include a provision which provides for an annual automatic cost of living adjustment of the dollar limitation described in section 415(c)(1)(A).

(e) Special election for section 403(b) contracts purchased by educational organizations, hospitals and home health service agencies—(1) In general. (i) An annuity contract described in section 403(b) is treated as a defined contribution plan for purposes of the limitations on contributions imposed by section 415. Thus, section 403(b) annuity contracts are subject to the rules regarding the amount of annual additions which may be made to a participant's account for any limitation year under section 415(C)(1) and paragraph (a)(1) of this section. Section 403(b) annuity contracts are also subject to the limitations imposed by section 403(b)(2)(A) with respect to the amount of employer contributions for the purchase of an annuity contract that may be excluded from the gross income of the employee on whose behalf the annuity contract is purchased. Therefore, unless a special election has been made as described in section 415(c)(4) and subparagraph (2) of this paragraph, the excludable amount of a contribution toward the purchase of a section 403(b) annuity contract for a particular taxable year is the lesser of the exclusion allowance computed under section 403(b)(2)(A) for that taxable year or the limitation imposed by section 415(c)(1) for the limitation year ending with or within that taxable year.

(ii) If the amount of contributions for an individual under a section 403(b) annuity contract for a taxable year exceeds the limitation of section 415(c)(1), then for purposes of computing the exclusion allowance under section 403(b)(2)(A) for future taxable years, the excess contribution is considered as an amount contributed by the employer for an annuity contract which was excludable from the employee's gross income for a prior taxable year under section 403(b)(2)(A)(ii). Thus, for future taxable years the exclusion allowance under section 403(b)(2)(A) is reduced by the amount of the excess contribution even though that amount was not excludable from the employee's gross income in the taxable year when it was made. For a special effective date for the rule provided in this subdivision, see § 1.415–1(f)(6).

(iii) For purposes of the limitation imposed by section 415(c)(1), the amount contributed toward the purchase of a section 403(b) annuity contract is treated as allocated to the employee's account as of the last day of the limitation year ending with or within the taxable year during which the contribution is made.

(iv) For rules relating to the limitation year applicable to an individual on whose behalf a section 403(v) annuity contract has been purchased, see § 1.415–2(b)(7).

(2) *Alternative limitations.* (i) Under section 415(c)(4) and this paragraph, a special election is permitted with respect to section 403(b) annuity contracts (including custodial accounts treated as section 403(b) annuity contracts) purchased by educational organizations (as described in section 170(b)(1)(A)(ii)), home health service agencies (as described in paragraph (e)(2)(vi) of this section) and hospitals. Instead of the compensation limitation described in section 415(c)(1)(B) otherwise applicable to the amount of annual additions that may be made to the account of a participant in a defined contribution plan in any limitation year, an individual on whose behalf a section 403(b) annuity contract has been purchased may elect to have substituted for such limitation the amounts described in subparagraph (3) ("(A) election limitation") or (4) ("(B) election limitation") of this paragraph. Instead of the exclusion allowance determined under section 403(b)(2)(A) otherwise applicable for the taxable year with or within which the limitation year ends to an individual on whose behalf a section 403(b) annuity contract has been purchased, an individual may elect to have substituted for such exclusion allowance the amount described in paragraph (e)(5) ("(C) election limitation") of this section. The election shall be made at the time and in the manner prescribed in subparagraph (6) of this paragraph.

(ii) With respect to any limitation or taxable year, an election by an individual to have any one of the alternative limitations described in paragraph (e)(3), (4) or (5) of this section apply to contributions made on his behalf by the employer with respect to any section 403(b) annuity contract precludes an election to have any other of the alternative limitations apply for any future limitation or taxable year with respect to any section 403(b) annuity contract purchased by any employer of such individual.

(iii) With respect to any limitation year, an election by an individual to have paragraph (e)(3) of this section ("(A) election limitation") apply to contributions made on his behalf by the employer with respect to any section 403(b) annuity contract precludes an election to have any of the alternative limitations apply for any future limitation or taxable year with respect to any section 403(b) annuity contract purchased by any employer of such individual.

(iv) Any election made under this paragraph is irrevocable.

(v) The election made by the individual under this paragraph shall be controlling for all prior taxable years in which, in accordance with § 11.415(c)(4)–1(b), the individual had taken advantage of an alternative limitation, even if inconsistent with the alternative limitation used in determining income tax liability for those taxable years under that section. An individual, who took advantage of an alternative limitation under § 11.415(c)(4)–1(b) which is inconsistent with the one finally elected, may correct this inconsistency for each prior open taxable year in either of two ways. The individual may redetermine income tax liability as though none of the alternative limitations applied for that taxable year. Alternatively, the individual may recompute income tax liability for the particular taxable year in a manner consistent with the alternative limitation elected by the individual under this paragraph rather than the limitation originally used in accordance with § 11.415(c)(4)–1(b). Furthermore, if an individual, who had taken advantage of an alternative limitation in prior taxable years under § 11.415(c)(4)–1(b), elects under this paragraph not to have any of the alternative limitations apply, the individual, will, nevertheless, be considered to have elected the alternative limitation used under § 11.415(c)(4)–1(b). However, the rule described in the preceding sentence is not applicable if the individual recomputes income tax liability for all prior open taxable years in which an alternate limitation was taken advantage of under § 11.415(c)(4)–1(b) as though none of the alternative limitations applied for those taxable years. For purposes of section 6654 (relating to the failure of an individual to pay estimated tax), a difference in tax for such years resulting from a difference in these limitations is not treated as an underpayment. This rule only applies to the extent the difference in tax is due to the election of one of the alternative limitations or to a final election not to use one of the alternative limitations.

(vi) For purposes of this paragraph, a home health service agency is an organization described in section 501(c)(3) which is exempt from tax

under section 501(a) and which has been determined by the Secretary of Health, Education and Welfare to be a home health service agency under section 1395x(*o*) of Title 42 of the United States Code.

(3) "(A) election limitation." For the limitation year that ends with or within the taxable year in which an individual eligible to make a special election separates from the service of his employer (and only for that limitation year), the "(A) election limitation" is the exclusion allowance computed under section 403(b)(2)(A) for the individual's taxable year in which the separation occurs (without regard to section 415). However, in determining this limitation, there may only be taken into account the individual's years of service for the employer (as defined in section 403(b)(4) and the regulations thereunder) and contributions made by the employer (as described in section 403(b)(2)(A)(ii) and regulations thereunder) during the period of years (not exceeding 10) ending on the date of separation. For purposes of this subparagraph, all service for the employer performed within the period beginning ten years before the date of separation and ending on the separation date must be taken into account. However, the "(A) election limitation" may not exceed the dollar limitation described in section 415(c)(1)(A) (as adjusted for cost-of-living increases under section 415(d)(1) and paragraph (d) of this section) applicable to the individual for the limitation year.

(4) "(B) election limitation." For any limitation year with respect to an individual eligible to make a special election, the "(B) election limitation" is equal to the least of the following amounts—

(i) $4,000, plus 25 percent of the participant's includible compensation (as defined in section 403(b)(3) and the regulations thereunder) for the taxable year with or within which the limitation year ends.

(ii) The amount of the exclusion allowance determined under section 403(b)(2)(A) and the regulations thereunder for the taxable year with or within which the limitation year ends.

(iii) $15,000.

(5) "(C) election limitation." For any taxable year with respect to an individual eligible to make a special election, the "(C) election limitation" is the lesser of the dollar limitation described in section 415(c)(1)(A) (as adjusted for cost-of-living increases under section 415(d)(1) and paragraph (d) of this section) or the compensation limitation described in section 415(c)(1)(B) applicable to the individual for the limitation year ending with or within that taxable year. For purposes of determining the compensation limitation under this subparagraph for a particular limitation year, the term "compensation" has the same meaning as set forth in § 1.415–2(d).

(6) Time and method of making election. (i) With respect to any taxable year, an election by an individual to take advantage of any of the alternative limitations described in subparagraphs (3), (4) or (5) of this paragraph is made by determining income tax liability for that taxable year in a way which is consistent with one of the alternative limitations. However, an individual is only considered to have made an election for a taxable year when the use of one of the alternative limitations is necessary to support the exclusion from gross income reflected in the individual's income tax return for that taxable year.

(ii) In the case of an individual who, in accordance with § 11.415(c)(4)–1(b), took advantage of one of the alternative limitations for prior taxable years, the election described in this paragraph to take advantage of an alternative limitation will be effective only if the following two conditions are satisfied. The first condition is that the election must be made (in the manner described in subdivision (i) of this subparagraph) in the individual's income tax return for the taxable year immediately following the taxable year in which final regulations under section 415 are published in the Federal Register. The second condition is that if the individual's election is different from the limitation used under § 11.415(c)(4)–1(b) in determining income tax liability for prior taxable years, the individual must correct this inconsistency by recomputing income tax liability for all such prior open taxable years in accordance with paragraph (e)(2)(v) of this section. See paragraph (e)(2)(v) of this section for rules relating to an individual who had taken advantage of an alternative limitation in prior taxable years under § 11.415(c)(4)–1(b) but does not elect any of the alternative limitations for the taxable year immediately following the taxable year in which final regulations under section 415 are published in the Federal Register.

(iii) This subdivision provides a special rule for those individuals who, in accordance with § 11.415(c)(4)–1(b), took advantage of one of the alternative limitations for prior taxable years, but who are not participating in a section 403(b) annuity program in the taxable year following the taxable year in which final regulations under sec-

tion 415 are published in the Federal Register. In such a situation, the election described in this paragraph to take advantage of an alternative limitation (or, alternatively, not to elect any of the alternative limitations) is made by the individual by attaching a statement to the income tax return for the taxable year following the taxable year in which final section 415 regulations are published in the Federal Register. The statement must include the individual's name, address, Social Security number, the name of the section 403(b) annuity program in which the individual participated and a statement indicating the election being made. See paragraph (e)(2)(v) of this section for rules relating to the situation where the individual described in this subdivision chooses not to elect any of the alternative limitations.

(7) **Examples:** The provisions of this paragraph may be illustrated by the following examples:

Example (1). Doctor M is an employee of H Hospital (an organization described in section 501(c)(3) and exempt from taxation under section 501(a)) for the entire 1976 calendar year. M is not in control of any employer within the meaning of section 414(b) or (c), as modified by section 415(b). M uses the calendar year as the taxable year and limitation year. M has includable compensation (as defined in section 403(b)(3) and the regulations thereunder) and compensation (as defined in paragraph (a)(3) of this section) for taxable year 1976 of $30,000, and M has 4 years of service (as defined in § 1.403(b)–1(f)) with H as of December 31, 1976. During M's prior service with H, H had contributed a total of $12,000 on M's behalf for annuity contracts described in section 403(b), which amount was excludable from M's gross income for such prior years. Thus, for the limitation year ending with or within taxable year 1976, M's exclusion allowance determined under section 403(b)(2)(A) is $12,000 ((.20 × $30,000 4)—$12,000). The limitation imposed by section 415(c)(1) that is applicable to M for limitation year 1976 is the lesser of $26,825 (the amount described in section 415(c)(1)(A) adjusted under section 415(d)(1)(b) for limitation year 1976) or $7,500 (the amount described in section 415(c)(1)(B)). Absent the special elections provided in section 415(c)(4) and this paragraph $7,500 would be the maximum contribution H could make for annuity contracts described in section 403(b) on M's behalf for limitation year 1976 without increasing M's gross income for taxable year 1976. However, because H is an organization described in section 415(c)(4), M may make a special election with respect to amounts contributed by H on M's behalf for section 403(b) annuity contracts for 1976. Assume that M does not separate from the service of H during 1976 and that, therefore, the "(A) election limitation" described in section 415(c)(4)(A) and subparagraph (3) of this paragraph is not available to M. If M elects the "(B) election limitation" for 1976, H could contribute $11,500 on M's behalf for annuity contracts described in section 403(b) for that year (the least of $11,500 (the amount described in section 415(c)(4)(B)(i))); $12,000 (the amount described in section 415(c)(4)(B)(ii)); and $15,000 (the amount described in section 415(c)(4)(B)(iii)). If M elects the "(C) election limitation" for 1976, H could only contribute up to $7,500 (the lower of the amounts described in section 415(c)(1)(A) or (B)) for section 403(b) annuity contracts on M's behalf for 1976 without increasing M's gross income for that year.

Example (2). Assume the same facts as in example (1) except that H had contributed a total of $18,000 on M's behalf for annuity contracts in prior years, which amount was excludable from M's gross income for such prior years. Accordingly, for 1976, M's exclusion allowance determined under section 403(b)(2)(A) is $6,000 ((.20 × $30,000 × 4)—$18,000). The limitation imposed by section 415(c)(1) applicable to M for 1976, is $7,500 (the lesser of the amount described in section 415(c)(1)(A) or (B)). Absent the special elections provided in section 415(c)(4) and this paragraph, $6,000 would be the maximum amount H could contribute for annuity contracts described in section 403(b) on M's behalf for 1976 without increasing M's gross income for that year. However, if M elects the "(C) election limitations" for 1976, H may contribute up to $7,500 without increasing M's gross income for that year.

Example (3). G, a teacher, is an employee of E, an educational organization described in section 170(b)(1)(A)(ii). G uses the calendar year as the taxable year and G uses the 12-month consecutive period beginning July 1 as the limitation year. G has includible compensation (as defined in section 403(b)(3) and the regulations thereunder) for taxable year 1976 of $12,000 and G has compensation (as defined in paragraph (a)(3) of this section) for the limitation year ending with or within taxable year 1976 of $12,000. G has 20 years of service (as defined in § 1.403(b)–1(f)) as of May 30, 1976, the date G separates from the service of E. During G's service with E before taxable year 1976, E had contributed $34,000 toward the purchase of a section 403(b) annuity contract on G's behalf, which amount was excludable from G's gross income for such prior years. Of this amount, $19,000 was so contributed and excluded during the 10 year period ending on May 30, 1976. For the taxable year 1976, G's exclusion allowance determined under section 403(b)(2)(A) is $14,000 ((.20 × $12,000 × 20)—$34,000). Absent the special elections described in section 415(c)(4) and this paragraph, $3,000 (the lesser of G's exclusion allowance for taxable year 1976 or the section 415(c)(1) limitation applicable to G for the limitation year ending with or within such taxable year) would be the maximum excludable contribution E could make for section 403(b) annuity contracts on G's behalf for the limitation year ending with or within taxable year 1976. However, because E is an organization described in section 415(c)(4), G may make a special election with respect to amounts contributed on G's behalf by E for section 403(b) annuity contracts for the limitation year ending with or within taxable year 1976.

Because G has separated from the service of E during such taxable year, G may elect the "(A) election limitation" as well as the "(B) election limitation" or the "(C) election limitation." If G elects the "(A) election limitation" for the limitation year ending with or within taxable year 1976, E could contribute up to $5,000 ((.20 × $12,000 × 10)—$19,000) on G's behalf for section 403(b) annuity contracts for such limitation year without increasing G's gross income for the taxable year with or within which such limitation year ends. If G elects the "(B) election limitation" for such limitation year, E could contribute $7,000 (the least of $7,000, the amount described in section 415(c)(4)(B)(i)); $14,000 (the amount described in section 415(c)(4)(B)(ii)); and $15,000 (the amount described in section 415(c)(4)(B)(iii)). If G elects the "(C) election limitation" for taxable year 1976, E could contribute $3,000 (the lesser of the amounts described in section 415(c)(1)(A) or (B)).

(f) Special rules with respect to the application of section 415(c)(1)(B) with section 404(e)(4). For special rules relating to the application of the compensation limitation described in section 415(c)(1)(B) with the minimum allowable deduction described in section 404(e)(4) in the case of a

plan which provides contributions for employees, some or all of whom are employees within the meaning of section 401(c)(1), see the regulations under section 404(e).

(g) Special rules for employee stock ownership plans—(1) General definitions. For purposes of this paragraph—(i) An employee stock ownership plan is a plan which meets the requirements of either section 4975(e)(7) and the regulations thereunder, or whichever of the following is applicable: section 301(d) of the Tax Reduction Act of 1975 (89 Stat. 38, 26 CFR 1.46–7) and the regulations thereunder (26 CFR 1.46–8) or section 409A and the regulations thereunder.

(ii) The term "employer securities" means, in the case of an employee stock ownership plan within the meaning of section 4975(e)(7) and the regulations thereunder, qualifying employer securities within the meaning of section 4975(e)(8), that are also described in section 301(d)(9)(A) of the Tax Reduction Act of 1975 and the regulations thereunder or section 409A(*l*) and the regulations thereunder, whichever is applicable. In the case of an employee stock ownership plan described in section 301(d)(2) of the Tax Reductions Act of 1975 or section 409A, whichever is applicable, such term means employer securities within the meaning of section 301(d)(9)(A) of that Act and the regulations thereunder or section 409A(*l*) and the regulations thereunder, which ever is applicable.

(iii) An individual is considered to own more than 10 percent of the employer's stock if, without regard to stock held under the employee stock ownership plan, the individual owns (after application of section 1563(e), relating to constructive ownership of stock) more than 10 percent of the total combined voting power of all classes of stock entitled to vote or more than 10 percent of the total value of shares of all classes of stock.

(2) Special dollar limitation. In the case of an employee stock ownership plan which meets the requirements of paragraph (g)(3) of this section, the applicable dollar limitation for a limitation year equals the sum of—

(i) The dollar amount described in section 415(c)(1)(A) (and so adjusted for that limitation year), and

(ii) The lesser of the amount determined under paragraph (g)(2)(i) of this section or the amount of employer securities within the meaning of paragraph (g)(1)(ii) of this section contributed to the employee stock ownership plan.

(3) Employee stock ownership plans to which the special dollar limitation applies. For purposes of this paragraph, the special dollar limitation is only applicable to an employee stock ownership plan for a particular limitation year for which no more than one-third of the employer contributions for the limitation year are allocated to employees who are officers, shareholders owning more than 10 percent of the employer's stock (as determined under subparagraph (1)(iii) of this paragraph), or whose compensation for the limitation year exceeds twice the dollar amount described in section 415(c)(1)(A) (as adjusted for cost-of-living increases under section 415(d)(1) and paragraph (d) of this section).

(4) Cash contributions treated as contributions of employer securities. For purposes of the special dollar limitation—

(i) In the case of an employee stock ownership plan in which the employer makes cash contributions which are used in a direct acquisition of employer securities, the cash contributions are treated as a contribution of employer securities for the limitation year, provided that the securities are employer securities within the meaning of paragraph (g)(1)(ii) of this section and are allocated to participants under the terms of the plan as of any date within that limitation year. However, this subdivision is not applicable unless the following two conditions are satisfied. The first condition is that the employer must contribute the cash to the plan no later than 30 days after the end of the period described in section 404(a)(6) applicable to the taxable year with or within which the particular limitation year ends. The second condition is that the employer securities must be purchased no later than 60 days after the end of the period described in the preceding sentence.

(ii) In the case of an employee stock ownership plan to which an exempt loan as described in § 54.4975–7(b) has been made, the employer's contribution of both principal and interest used to repay the exempt loan for the limitation year will be treated as a contribution of employer securities for that limitation year, provided that the securities allocated to participants are employer securities within the meaning of paragraph (g)(1)(ii) of this section.

(5) Amounts considered as annual additions. For purposes of applying the limitations of section 415(c)(1) and this section and for the special dollar limitation, in the case of an employee stock ownership plan to which an exempt loan as described in § 54.4975–7(b) has been made, the amount of

employer contributions which is considered an annual addition for the limitation year is calculated with respect to employer contributions of both principal and interest used to repay the exempt loan for that limitation year.

(6) **Examples.** The provisions of this paragraph may be illustrated by the following examples:

Example (1). Employee N is a participant in an employee stock ownership plan maintained by his employer, M Corporation, which meets the requirements of section 4975(e)(7) and the regulations thereunder. The plan also meets the requirements set forth in subparagraph (3) of this paragraph. M does not maintain any other qualified plan. The limitation year for the plan is the calendar year. For 1977, N has compensation (as defined in paragraph (a)(3) of this section) of $160,000. Without the special dollar limitation described in subparagraph (2) of this paragraph, under section 415(c)(1), N could only have annual additions of $28,175 (the lesser of the dollar limitation described in section 415(c)(1)(A) as adjusted for cost of living increases ($28,175) or the compensation limitation described in section 415(c)(1)(B) (25% of $160,000 = $40,000)) made to his account for the 1977 limitation year. Under the special dollar limitation, N would be able to have annual additions of $56,350 ($28,175 × 2) made to his account for the 1977 limitation year, provided that amounts contributed in excess of $28,175 consist solely of employer securities. However, N is also subject to the compensation limitation described in section 415(c)(1)(B). Therefore, even under the special dollar limitation, N may only have annual additions of $40,000 made to his account for the 1977 limitation year: *Provided*, That amounts contributed in excess of $28,175 consist solely of employer securities within the meaning of paragraph (g)(1)(ii) of this section.

Example (2). Assume the same facts as in example (1), except that N's compensation for 1977 is $300,000. Because the compensation limitation (25% of $300,000 = $75,000) is greater than the special dollar limitation of $56,350, N can have annual additions of $56,350 made to his account for the 1977 limitation year, provided that amounts contributed in excess of $28,175 consist solely of employer securities.

(h) **Special rules for level premium annuity contracts under plans benefiting owner-employees—(1) In general.** The compensation limitation described in section 415(c)(1)(B) will not be less than the contribution described in section 401(e) which is made for the benefit of an owner-employee (within the meaning of section 401(c)(3)) for a limitation year provided that—

(i) The annual additions with respect to such owner-employee for the limitation year consist solely of the contributions described in this paragraph, and

(ii) The owner-employee is not a participant at any time during the limitation year in a defined benefit plan maintained by the employer.

(2) **Application of the non-discrimination rules.** In the case of a plan which provides contributions for employees who are not owner-employees, that plan will not be treated as failing to satisfy the non-discrimination rules of section 401(a)(4) merely because contributions made on behalf of employees who are not owner-employees are not permitted to exceed the compensation limitation described in section 415(c)(1)(B).

(3) **Additional rules.** For additional rules concerning contributions described in section 401(e), see § 1.401(e)–4.

[T.D. 7748, 46 FR 1705, Jan. 7, 1981]

§ 1.415–7 Limitation in case of defined benefit and defined contribution plan for same employee.

(a) **Overall limitation—(1) In general.** Under section 415(e) and this section, in any case in which an individual has at any time participated in a defined benefit plan and also has at any time participated in a defined contribution plan maintained by the same employer, to satisfy the provisions of section 415(a), the sum of the defined benefit plan fraction (as defined in paragraph (b) of this section) and the defined contribution plan fraction (as defined in paragraph (c) of this section) with respect to that participant for any limitation year may not exceed 1.4.

(2) **Application of overall limitation to employee stock ownership plan.** An employee stock ownership plan which qualifies for, and takes advantage of, the special dollar limitation provided in section 415(c)(6) and § 1.415–6(g) is still subject to the 1.4 limitation of paragraph (a)(1) of this section.

(b) **Defined benefit plan fraction—(1) In general.** For purposes of paragraph (a) of this section, the defined benefit plan fraction applicable to a participant for any limitation year is a fraction—

(i) The numerator of which is the projected annual benefit (as defined in subparagraph (3) of this paragraph) of the participant under the plan (determined as of the close of the limitation year), and

(ii) The denominator of which is the projected annual benefit (as defined in subparagraph (3) of this paragraph) of the participant under the plan (determined as of the close of the limitation year) if the plan provided such participant the maximum benefit allowable under § 1.415–3.

In the event a participant has participated in more than one defined benefit plan maintained by the employer, the numerator of the defined benefit plan fraction is the sum of the projected annual benefits under all of the defined benefit plans.

(2) **Participants described in section 2004(d)(2) of the Employee Retirement Income Security Act**

of 1974. For purposes of this paragraph, in the case of a participant described in section 2004(d)(2) of the Employee Retirement Income Security Act of 1974 (Pub.L. 93–406, 88 Stat. 987), the defined benefit plan fraction applicable to such participant is deemed not to exceed 1.0 for any limitation year to which section 415 and this section apply.

(3) Projected annual benefit. For purposes of this section, a participant's "projected annual benefit" is equal to the annual benefit (as defined in § 1.415–3(b)(1)(i)) to which a participant in a defined benefit plan would be entitled under the terms of the plan based upon the following assumptions:

(i) The participant will continue employment until reaching normal retirement age as determined under the terms of the plan (or current age, if that is later).

(ii) The participant's compensation for the limitation year under consideration will remain the same until the date the participant attains the age described in subdivision (i) of this subparagraph.

(iii) All other relevant factors used to determine benefits under the plan for the limitation year under consideration will remain constant for all future limitation years.

(c) Defined contribution plan fraction—(1) In general. For purposes of paragraph (a) of this section, the defined contribution plan fraction applicable to a participant for any limitation year is a fraction—

(i) The numerator of which is the sum of the annual additions to the participant's account as of the close of the limitation year and for all prior limitation years, and

(ii) The denominator of which is the sum of the maximum amount of annual additions which could have been made under section 415(c) and § 1.1415–6(a) (determined without regard to the special dollar limitation provided for employee stock ownership plans under section 415(c)(6) and § 1.415–6(g)) for the limitation year and for each prior limitation year of the participant's service with the employer (regardless of whether a plan was in existence during those years).

For purposes of this paragraph, the term "annual additions" has the same meaning as set forth in § 1.415–6(b).

(2) Special rules for certain annuity contracts and individual retirement plans. (i) Except as provided in subdivision (ii) of this subparagraph, in computing the defined contribution plan fraction applicable to an individual on whose behalf a section 403(b) annuity contract has been purchased, the amount which is included in the denominator of such fraction for a particular limitation year is the maximum amount which could have been contributed under the limitations of section 415(c) and § 1.415–6(a) applicable to the individual for the particular limitation year. However, if the individual elects an alternative limitation described in either section 415(c)(4)(A) or section 415(c)(4)(B) for a particular limitation year, the denominator of the fraction for such limitation year is the maximum amount which could have been contributed under the applicable limitations of section 415(c) and § 1.415–6(a), as modified by the alternative limitation elected.

(ii) This subdivision provides a rule for computing the defined contribution plan fraction with respect to an individual on whose behalf a section 403(b) annuity has been purchased prior to commencing employment with an employer which the individual controls (within the meaning of section 414(b) or (c), as modified by section 415(h)) and which maintains a defined benefit plan. In this situation, the controlled employer is considered to be maintaining the section 403(b) annuity contract as a defined contribution plan under the rules of paragraph (h)(2)(i) of this section. However, for all years prior to commencing employment with the controlled employer, the individual does not have any years of service (within the meaning of subparagraph (1)(ii) of this paragraph) with that employer. Thus, for each limitation year in which such individual did not have a year of service with the controlled employer, the denominator of the defined contribution plan fraction applicable to the individual is deemed to equal the numerator of that fraction.

(iii) The rules described in this paragraph also apply to an individual on whose behalf an individual retirement plan (as described in section 7701(a)(37)) has been maintained.

(iv) See paragraph (h)(4) of this section for special rules relating to the aggregation of a section 403(b) annuity contract and a qualified plan.

(d) Special transitional rules for defined contribution plan fraction. For purposes of determining the defined contribution plan fraction under paragraph (c) of this section for any limitation year beginning after December 31, 1975, the following rules shall apply with respect to limitation years before the first limitation year to which section 415 and this section apply.

(1) The aggregate amount taken into account under paragraph (c)(1)(i) of this section in determining the numerator of the defined contribution plan fraction is deemed not to exceed the aggregate amount taken into account under paragraph (c)(1)(ii) of this section in determining the denominator of the fraction. Thus, for example, if the aggregate amount of actual annual additions to the plan for all such limitation years is $500,000, while the aggregate amount in the denominator is $250,000, under the rule set forth in this subparagraph, the defined contribution plan fraction is $250,000 divided by $250,000, or 100 percent.

(2) The amount taken into account under section 415(c)(2)(B)(i) for each such limitation year is an amount equal to—

(i) The amount by which the aggregate amount of employee contributions (whether voluntary or mandatory) for all limitation years beginning before January 1, 1976, during which the employee was a participant in the plan exceeds 10 percent of the employee's aggregate compensation from the employer for all such limitation years, divided by

(ii) The number of full limitation years (counting any part of a limitation year as a full limitation year) beginning before January 1, 1976, during which the employee was a participant in the plan. Therefore, for purposes of computing the numerator of a participant's defined contribution plan fraction for limitation years beginning after December 31, 1975, no employee contributions made to the plan before the first limitation year to which section 415 and this section apply are taken into account as annual additions if the aggregate amount of the contributions does not exceed 10 percent of the employee's aggregate compensation from the employer for all limitation years prior to the first such limitation year.

(3) The special transitional rule concerning employee contributions provided for in paragraph (d)(2) of this section does not apply to any employee contributions (whether voluntary or mandatory) made on or after October 2, 1973, to the extent that these contributions exceed the maximum amount of employee contributions permitted under the plan as in effect on October 2, 1973. For purposes of the preceding sentence, plan amendments approved by the Internal Revenue Service before October 2, 1973, and actually put into effect before January 1, 1974, are considered in effect on October 2, 1973. Therefore, for purposes of computing the numerator of the defined contribution plan fraction for limitation years beginning after December 31, 1975, employee contributions made between October 2, 1973 and prior to the first limitation year to which section 415 and this section apply which exceed the maximum amount the employee was permitted to contribute under the provisions of the plan as in effect on October 2, 1973, are taken into account as annual additions (within the meaning of § 1.415–6(b)(1)(ii)).

(4) For purposes of this paragraph, the participant's aggregate compensation for all years (whichever are applicable under either paragraph (d)(1) or (2) of this section) with the employer before the first limitation year to which section 415 applies equals the product of the participant's compensation during the first limitation year to which section 415 applies times the number of such applicable years. However, this special rule is available only if records necessary for the determination of the participant's aggregate compensation for all such applicable years with the employer before the first limitation year to which section 415 applies are not available.

(e) **Examples.** The provisions of paragraphs (a) through (d) of this section may be illustrated by the following examples:

Example (1). (i) S is an employee of T Corporation and is a participant in both the noncontributory defined benefit plan and noncontributory defined contribution plan maintained by the corporation. S became an employee of T on July 1, 1966. S became a participant in the defined benefit plan maintained by T on January 1, 1968 and he became a participant in the defined contribution plan maintained by T on January 1, 1970. T uses the calendar year as the limitation year for both plans. The current limitation year is 1978. S's compensation (as defined in § 1.415–2(d)) from T is as follows:

Limitation year	Compensation
1966	$3,000
1967	6,000
1968	6,000
1969	8,000
1970	8,000
1971	8,000
1972	9,000
1973	10,000
1974	10,000
1975	11,000
1976	11,000
1977	12,000
1978	12,000

(ii) S's projected annual benefit (as defined in paragraph (b)(3) of this section) as of the close of the current limitation year under the terms of the plan is $9,000. S's compensation for the current limitation year is $12,000. Therefore, the defined benefit plan fraction applicable to S for the current limitation year is .75 or 75 percent (9,000÷12,000). S's defined contribution compensation limitation (as described in section 415(c)(1)(B)) for the current limitation year is $3,000 (25 percent of $12,000). For all limitation years beginning before January 1, 1978, the maximum aggregate amount of annual additions which could have been allocated to S's account under

the defined contribution plan is $25,500 (aggregate compensation of $102,000 for all years of service with T Corporation × 25 percent). Assume that annual additions totaling $11,400 have been allocated to S's account as of the end of the current limitation year. Therefore, S's defined contribution plan fraction as of the end of the current limitation year equals

$11,400 ÷ $25,500 + $3,000 = $11,400 ÷ $28,500 = 40 or 40 percent

Because the sum (115 percent) of the defined benefit plan fraction (75 percent) and the defined contribution plan fraction (40 percent) applicable to S for the current limitation year does not exceed 140 percent, the limitations of section 415(e) and this section are not exceeded.

Example (2). Assume the same facts as in example (1) except that the defined contribution plan maintained by T Corporation provides for mandatory employee contributions of 6% of compensation and voluntary employee contributions of 10% of compensation. Assume further that S made the maximum allowable employee contributions under the plan for each limitation year (including the current limitation year) during which he was a participant. For limitation years beginning before January 1, 1976, S made total employee contributions of $8,960. However because of the special transitional rule applicable to the defined contribution plan fraction with respect to employee contributions for limitation years beginning before January 1, 1976 (as described in paragraph (d)(2) of this section), only $560 of the total employee contributions of $8,960 made by S will be considered an annual addition for each of those limitation years in which S was a participant in the plan total employee contributions for limitation years in which S participated in the plan beginning before January 1, 1976 of $8,960 minus $5,600 (10 percent of total compensation of $56,000 for such years) divided by 6 (the number of such years in which S was a participant in the plan). Thus, in determining the numerator of the defined contribution plan fraction applicable to S, because S was a participant in the plan for 6 limitation years beginning before January 1, 1976, the total amount of employee contributions that must be taken into account as annual additions for such limitation years is $3,360 ($560 × 6). For limitation years beginning after January 1, 1976, S made contributions of $1,760 (for limitation year 1976), $1,920 (for limitation year 1977) and $1,920 (for limitation year 1978, the current limitation year). The amount of annual additions attributable to such contributions under section 415(c)(2)(B) is $880 (for limitation year 1976). $960 (for limitation year 1977) and $960 (for the current limitation year), for a total of $2,800. Thus, the defined contribution plan fraction applicable to S for the current limitation year is

$3,360 + $2,800 + $11,400 ÷ $28,500 = $17,560 ÷ $28,500 = 62 or 62 percent

Because the sum (137 percent) of the defined benefit plan fraction (75 percent) and the defined contribution plan fraction (62 percent) applicable to S for the current limitation year does not exceed 140 percent, the limitations of section 415(e) and this section are not exceeded.

Example (3). (i) A is an employee of M Corporation and is a participant in both the noncontributory defined benefit plan and noncontributory defined contribution plan maintained by the corporation. A became an employee of M on January 1, 1969 and immediately became a participant in both plans. M uses the calendar year as the limitation year for both plans. The current limitation year is 1978. A's compensation (as defined in § 1.415–2(d)) from M is as follows:

Limitation year	Compensation
1969	$100,000
1970	120,000
1971	130,000
1972	160,000
1973	200,000
1974	240,000
1975	280,000
1976	320,000
1977	400,000
1978	460,000

(ii) A is a participant described in section 2004(d)(2) of the Employee Retirement Income Security Act of 1974. A's projected annual benefit (as defined in paragraph (b)(3) of this section) as of the close of the current limitation year under the terms of the defined benefit plan is $100,000. The defined benefit dollar limitation (as described in section 415(b)(1)(A)) applicable to A for the current limitation year is $90,150. Absent the provisions of paragraph (b)(2) of this section, the defined benefit plan fraction applicable to A for the current limitation year would be 1.11 or 111 percent. However, under the provisions of paragraph (b)(2) of this section, for purposes of computing the overall 1.4 limitation imposed by section 415(e) and this section applicable to A for the current limitation year and all future limitation years, A's defined benefit plan fraction is considered to equal 1.0 or 100 percent.

(iii) A's defined contribution dollar limitation (as described in section 415(c)(1)(A)) for the current limitation year is $30,050. For the 9 limitation years ending before January 1, 1978, the maximum amount of annual additions which could have been allocated to A's account under the defined contribution plan is $230,000 ($25,000 × 7, plus $26,825 (adjusted figure for 1976) and $28,175 (adjusted figure for 1977)). Assume that annual additions totaling $60,000 ($10,000 of this amount being attributable to the current limitation year) have been allocated to A's account as of the close of the current limitation year. A's defined contribution plan fraction computed as of the end of the current limitation year is .23 or 23 percent

$60,000 ÷ $230,000 + $30,050 = 23 or 23 percent

Because the sum (123 percent) of the defined benefit plan fraction (1.0 or 100 percent) and the defined contribution plan fraction (.23 or 23 percent) for the current limitation year does not exceed 1.4 or 140 percent, the limitations of section 415(e) and this section are not violated.

Example (4). (i) J is an employee of M Corporation and is the only participant in the defined contribution plan maintained by the corporation. M uses the calendar year as the limitation year for the plan. The current limitation year is 1980. For all limitation years prior to 1980, the maximum allowable contribution was made to the plan. Thus, J's defined contribution plan fraction as of the end of 1979 is 1.0 or 100 percent. In 1980, before any contributions had been made to the defined contribution plan, the defined contribution plan is converted into a defined benefit plan. The defined benefit plan provides a benefit in the form of a straight life annuity equal to 50% of a participant's compensation for the high 3 years of service, but not less than the amount purchasable by J's account balance. J's average compensation for the high 3 years is $50,000.

(ii) As a result of the conversion of the defined contribution plan into the defined benefit plan, J becomes subject to the 1.4 limitation of section 415(e) and this section because he has at one time participated in a defined contribution plan and has at one time participated in a defined benefit plan maintained by M. Although the defined contribution plan is no longer in existence, J must still take the defined contribution plan fraction into account. A defined contribution plan fraction must continue to be taken into account regardless of whether the

plan has been converted into another plan or whether the plan is terminated and distributions are made to participants.

(iii) Even though J is subject to the limitations of section 415(e) and this section, in computing the defined benefit plan fraction, the special rule set forth in § 1.415–3(b)(1)(iv) is applicable based on the facts of this example. That rule provides that when there is a transfer of assets or liabilities from one qualified plan to another, the annual benefit attributable to the assets transferred does not have to be taken into account by the transferee plan in applying the limitations of section 415. (For purposes of section 415, a conversion of a defined contribution plan into a defined benefit plan is considered such a transfer.) Assume that one-half of J's annual benefit under the defined benefit plan is attributable to the assets transferred from the defined contribution plan. This means that by applying the special rule set forth in § 1.415–3(b)(1)(iv), only one-half of J's projected annual benefit must be taken into account in computing J's defined benefit plan fraction. Accordingly, because J's defined benefit plan fraction is only 25 percent (½ of 50% of high 3 years of compensation ($12,500) divided by 100% of high 3 years of compensation ($50,000)) and not 50 percent (which would have been the case absent) the special rule of § 1.415–3(b)(1)(iv), the 140 percent limitation of section 415(e) and this section is not violated.

(f) Special rules where records are not available for past periods—(1) In general. The rules described in paragraph (f)(2) and (3) of this section apply only if the plan is unable to compute the defined contribution plan fraction because of the unavailability of records with respect to limitation years ending before the first limitation year to which section 415 applies to the plan.

(2) Defined contribution plan fraction for first limitation year to which section 415 applies to a plan. For purposes of paragraph (c) of this section, the defined contribution plan fraction for the first limitation year to which section 415 and this section apply to a plan equals the following fraction:

(i) The numerator of the fraction is the sum of the participant's account balance as of the valuation date under the plan immediately preceding November 2, 1975, plus any additions to the participant's account made subsequent to that valuation date and through the end of the first limitation year to which section 415 applies to the plan. In determining the participant's account balance as of the valuation date under the plan immediately preceding November 2, 1975, for purposes of this subdivision, one-half of all employee contributions (whether voluntary or mandatory) are not taken into account.

(ii) The denominator of the fraction is the sum of the maximum allowable annual additions under section 415(c) and § 1.415–6 for each limitation year, including the first limitation year to which section 415 applies to the plan, in which the participant had a year of service with the employer (see § 1.415–3(g)(1) for rules relating to the determination of a year of service). In determining the maximum allowable annual additions for purposes of this subdivision, the compensation limitation (as described in section 415(c)(1)(B)) taken into account for all of such limitation years is the applicable compensation limitation for the first limitation year to which section 415 applies to the plan and the dollar limitation taken into account for each such limitation year is the dollar limitation described in section 415(c)(1)(A), as adjusted for cost-of-living increases under section 415(d)(1)(B).

(3) Defined contribution plan fraction for future limitation years. For purposes of paragraph (c) of this section, with respect to all limitation years after the first limitation year to which section 415 applies to the plan, the defined contribution plan fraction for the current limitation year equals a fraction. The numerator of the fraction is the amount determined under paragraph (g)(2)(i) of this section, plus any subsequent annual additions made to the participant's account through the end of the current limitation year. The denominator of the fraction equals the sum of—

(i) The amount determined under subparagraph (2)(ii) of this paragraph, plus

(ii) The sum of the maximum allowable annual additions under section 415(c) and § 1.415–6 for the current limitation year and all prior limitation years beginning after the end of the first limitation year to which section 415 applies to the plan.

(g) Special rule for certain plans in effect on date of enactment. In the case of an individual who, on September 2, 1974, was a participant in a defined benefit and defined contribution plan maintained by the same employer and with respect to whom the sum of the defined benefit plan fraction and the defined contribution plan fraction for the limitation year during which such date falls (determined as of the close of that limitation year) exceeded 140 percent, the sum of such fractions may continue to exceed 140 percent for any particular future limitation year, but only if the conditions set forth in paragraph (g)(1) and (2) of this section are satisfied:

(1) The defined benefit plan fraction of the participant computed as of the close of the particular limitation year does not exceed such fraction computed as of the close of the limitation year during which September 2, 1974, falls.

(2) After September 2, 1974.

(i) No employer contributions are allocated to the participant's account under any defined contribution plan,

(ii) No forfeitures arising under any defined contribution plan are allocated to the participant's account,

(iii) No voluntary employee contributions are made by the participant under any defined contribution or defined benefit plan, and

(iv) No mandatory employee contributions are made by the participant under any defined contribution plan.

(h) Special rules for section 403(b) annuity contracts—(1) In general. For purposes of section 415, the following rules shall apply:

(i) In the case of an annuity contract described in section 403(b), the participant, on whose behalf the annuity contract is purchased, is considered to have exclusive control of the annuity contract. Accordingly, the participant, and not the participant's employer who purchased the section 403(b) annuity contract, is deemed to maintain the annuity contract.

(ii) Any contributions by the employer for an annuity contract described in this subparagraph are not taken into account in computing the defined contribution plan fraction applicable to the participant for the limitation year.

(2) Special rules under which the employer is deemed to maintain the annuity contract. (i) The provisions of this paragraph and not paragraph (h)(1) of this section apply for a particular limitation year with respect to a participant on whose behalf a section 403(b) annuity contract is purchased, if that participant is in control of any employer within the meaning of section 414(b) or (c), as modified by section 415(h). Under these circumstances, the section 403(b) annuity contract for the benefit of the participant is treated as a defined contribution plan maintained by both the controlled employer and the participant for that limitation year.

(ii) The provisions of this paragraph also apply for a particular limitation year if a participant on whose behalf a section 403(b) annuity contract is purchased has elected, under section 415(c)(4)(D) and § 1.415–6(e)(6), to have the provisions of section 415(c)(4)(C) and § 1.415–6(e)(5) apply for the taxable year with or within which such limitation year ends. In such a case, the exclusion allowance determined under section 403(b)(2)(A) is not applicable to the annuity contract for the particular limitation year, and the annuity contract is treated as a defined contribution plan maintained by both the employer and the participant for that limitation year.

(iii) For purposes of the limitations of section 415(e) and this section, where a section 403(b) annuity contract is treated as a defined contribution plan maintained by the employer under this subparagraph, any contributions made for the annuity contract for a participant are taken into account in computing the defined contribution plan fraction applicable to that participant for the limitation year. Thus, for example, if a doctor is employed by an educational organization which provides him with a section 403(b) annuity contract and also maintains a private practice as a shareholder owning more than 50 percent of a professional corporation, any qualified defined benefit plan of the professional corporation must be aggregated with the section 403(b) annuity contract for purposes of applying the limitations of section 415(e) and this section.

(3) Special rule with respect to salary reduction agreements. The rules provided in this paragraph are applicable whether or not the section 403(b) annuity contract is purchased in connection with a salary reduction agreement between the employer and participant.

(4) Special rules relating to the aggregation of the annuity contract with a qualified plan. (i) Where a section 403(b) annuity contract is aggregated with a qualified defined benefit plan in a limitation year because of the application of the rules of paragraph (h)(2) of this section, all contributions made to the annuity contract for a participant in prior limitation years shall be taken into account in computing the participant's defined contribution plan fraction. However, the rule described in the preceding sentence is not applicable if the aggregation is solely attributable to the participant's election to have the provisions of section 415(c)(4)(C) apply. Accordingly, in any case in which aggregation is required as a result of the application of paragraph (h)(2)(ii) of this section, all contributions made to the annuity contract for a participant in prior limitation years in which paragraph (h)(1) of this section was applicable do not have to be taken into account in computing the defined contribution plan fraction applicable to the participant.

(ii) Any contributions made to a section 403(b) annuity contract for a participant in any limitation year in which the rules of paragraph (h)(2)(ii) of this section are applicable shall be taken into

account in subsequent limitation years even though the rules of such paragraph are no longer applicable.

(iii) See paragraph (c)(2) of this section for special rules relating to the defined contribution plan fraction for a participant on whose behalf a section 403(b) annuity contract has been purchased.

(5) Examples. The application of this paragraph may be illustrated by the following examples:

Example (1). A is employed by a hospital which is described in section 501(c)(3) and exempt from tax under section 501(a). The hospital purchases an annuity contract described in section 403(b) on A's behalf for the current limitation year. The hospital also maintains a qualified defined benefit plan during the current limitation year in which A is a participant, but it does not maintain a qualified defined contribution plan during that limitation year. With respect to the annuity contract, A does not elect to have the provisions of section 415(c)(4)(C) apply for the current limitation year. Also, A is not in control of any employer within the meaning of section 414(b) or (c), as modified by section 415(h). For purposes of section 415, under subparagraph (1) of this paragraph, A is considered to have exclusive control of the annuity contract. Therefore, because A (and not the hospital) is treated as maintaining the annuity contract and because the hospital does not maintain any defined contribution plan, the limitations of section 415(e) and this section are not applicable to A for either the annuity contract or the hospital's defined benefit plan for the current limitation year.

Example (2). Assume the same facts as in example (1), except that the hospital also maintains a qualified defined contribution plan during the limitation year in which A is a participant. Because the hospital is not considered to be maintaining the section 403(b) annuity contract, contributions made to the annuity contract on behalf of A during the current limitation year by the hospital are not taken into account in computing the defined contribution plan fraction applicable to A for the plans maintained by the hospital for that limitation year.

Example (3). Assume the same facts as in example (1), except that A has elected to have the provisions of section 415(c)(4)(C) apply to the annuity contract for the current limitation year. Under the special rules contained in subparagraph (2) of this paragraph, the annuity contract is treated as a defined contribution plan maintained by the hospital as well as a defined contribution plan maintained by A. Accordingly, because the hospital is also maintaining a qualified defined benefit plan, the limitations of section 415(e) and this section are applicable to A for the annuity contract and the defined benefit plan maintained by the hospital in the current limitation year.

Example (4). J is employed by a hospital which is described in section 501(c)(3) and exempt from tax under section 501(a). The hospital purchases an annuity contract described in section 403(b) on J's behalf for the current limitation year. The hospital does not maintain any qualified plans during that limitation year. However, for the limitation year, J is in control (within the meaning of section 414(b) or (c), as modified by section 415(h)) of employer M. M maintains a qualified defined benefit plan during that limitation year. Under the special rules contained in subparagraph (2) of this paragraph, the annuity contract is treated as a defined contribution plan maintained by M (the controlled employer) as well as a defined contribution plan maintained by J. Therefore, because M is also maintaining a qualified defined benefit plan, the limitations of section 415(e) and this section are applicable to J for the annuity contract and the defined benefit plan maintained by M in the current limitation year.

(i) Special rules for individual retirement plans. For purposes of section 415, an individual on whose behalf an individual retirement plan (as described in section 7701(a)(37)) is maintained is considered to have exclusive control of such plan. Therefore, the individual is treated as maintaining such plan. However, if that individual is in control of any employer within the meaning of section 414(b) or (c), as modified by section 415(h), the individual retirement plan for the benefit of such individual is treated as a defined contribution plan maintained by both the controlled employer and such individual.

[T.D. 7748, 46 FR 1711, Jan. 7, 1981]

§ 1.415–8 Combining and aggregating plans.

(a) In general. Under section 415(f) and this section, for purposes of applying the limitations of section 415(b), (c), and (e) applicable to a participant for a particular limitation year—

(1) All qualified defined benefit plans (without regard to whether a plan has been terminated) ever maintained by the employer will be treated as one defined benefit plan, and

(2) All qualified defined contribution plans (without regard to whether a plan has been terminated) ever maintained by the employer will be treated as one defined contribution plan.

(b) Annual compensation taken into account where employer maintains more than one defined benefit plan. If more than one qualified defined benefit plan is being aggregated under paragraph (a) of this section for a particular limitation year, in applying the defined benefit compensation limitation (as described in section 415(b)(1)(B)) to the annual benefit of a participant under each plan, the participant's high 3 years of compensation is determined in accordance with § 1.415–3(a)(3).

(c) Affiliated employers. Any qualified defined benefit plan or qualified defined contribution plan maintained by any member of a controlled group of corporations (within the meaning of section 414(b) as modified by section 415(h)) or by any trade or business (whether or not incorporated) under common control (within the meaning of section 414(c) as modified by section 415(h)) is

deemed maintained by all such members or such trades or businesses.

(d) Section 403(b) annuity contracts—(1) In general. In the case of an annuity contract described in section 403(b), except as provided in subparagraph (2) of this paragraph, the participant on whose behalf the annuity contract is purchased is considered to have exclusive control of the annuity contract. Accordingly, the participant, and not the participant's employer who purchased the section 403(b) annuity contract, is deemed to maintain the annuity contract.

(2) Special rules under which the employer is deemed to maintain the annuity contract. If a participant on whose behalf a section 403(b) annuity contract is purchased has elected to have the provisions of section 415(c)(4)(C) and § 1.415-6(e)(5) apply for a taxable year, the annuity contract is treated as a defined contribution plan maintained by both the employer that purchased the annuity contract and the participant on whose behalf it was purchased for the limitation year which ends during such taxable year. Even if the election under section 415(c)(4)(C) is not made, where a participant, on whose behalf a section 403(b) annuity contract is purchased, is in control of any employer within the meaning of section 414(b) or (c) as modified by section 415(h) for a limitation year, the annuity contract for the benefit of the participant is treated as a defined contribution plan maintained by both the controlled employer and the participant for that limitation year. Thus, for example, if a doctor is employed by an educational organization which provides him with a section 403(b) annuity contract and also maintains a private practice as a shareholder owning more than 50 percent of a professional corporation, any qualified defined contribution plan of the professional corporation must be combined with the section 403(b) annuity contract for purposes of applying the limitations of section 415(c) and § 1.415-6. For purposes of this paragraph, it is immaterial whether the section 403(b) annuity contract is purchased as a result of a salary reduction agreement between the employer and the participant.

(e) Multiemployer plans. Multiemployer plans, as defined in section 414(f), shall not be aggregated with other multiemployer plans. However, where an employer maintains both a plan which is not a multiemployer plan and a multiemployer plan, the plan which is not a multiemployer plan shall be aggregated (based on its limitation year) with the multiemployer plan to the extent that benefits provided under the multiemployer plan are provided by such employer with respect to a common participant. See § 1.415-1(e)(2) for a rule relating to the computation of the benefits provided by an employer under a section 414(f) multiemployer plan.

(f) Special rules for combining certain plans, etc. If a plan, annuity contract or arrangement is subject to a special limitation in addition to, or instead of, the regular limitations described in section 415(b) or (c), and is combined under this section with a plan which is subject only to the regular section 415(b) or (c) limitations, the following rules shall apply:

(1) Each plan, annuity contract or arrangement which is subject to a special limitation must meet its own applicable limitation and each plan subject to the regular limitations of section 415 must meet its applicable limitation.

(2) The combined limitations shall be the larger of the applicable limitations.

(g) Special priority rule for TRASOP's. For a special rule concerning allocations to a participant's account under an Employee Stock Ownership Plan under section 301(d) of the Tax Reduction Act of 1975, see § 1.46-6(d)(6)(v).

(h) Examples. The provisions of this section may be illustrated by the following examples:

Example (1). M is an employee of ABC Corporation and XYZ Corporation. ABC maintains a qualified noncontributory defined benefit plan in which M participates and XYZ maintains a qualified defined contribution plan in which M participates. ABC Corporation and XYZ Corporation are members of a controlled group of corporations within the meaning of section 414(b) as modified by section 415(h). Because ABC Corporation and XYZ Corporation are members of a controlled group of corporations within the meaning of section 414(b) as modified by section 415(h), M is treated as being employed by a single employer. Thus, M's annual benefit under the defined benefit plan maintained by ABC may not exceed the limitations of section 415(b) and § 1.415-3; the annual additions to M's account under the defined contribution plan maintained by XYZ may not exceed the limitations of section 415(c) and § 1.415-6; and, in addition, the two plans may not exceed the limitations of section 415(e) and § 1.415-7.

Example (2). Assume the same facts as in example (1), except that the qualified defined benefit plan maintained by ABC Corporation provides for employee contributions (whether mandatory or voluntary). Under § 1.415-3(d), ABC Corporation will be considered to be maintaining a defined contribution plan consisting of M's contributions to the defined benefit plan. For purposes of applying the limitations of section 415(e) and § 1.415-7, the qualified defined benefit plan maintained by ABC must be combined with the defined contribution plan which ABC is considered to maintain. In addition, because corporations ABC and XYZ are members of a controlled group of corporations (within the meaning of section 414(b), as modified by section 415(h)), for purposes of applying the limitations of section 415(c) and § 1.415-6, the qualified defined contribution plan maintained by XYZ must be com-

bined with the defined contribution plan which ABC is considered to be maintaining and the defined contribution plans (as combined) must be aggregated with the qualified defined benefit plan maintained by ABC for purposes of the limitations imposed by section 415(e) and § 1.415–7.

[T.D. 1716, 46 FR 1715, Jan. 7, 1981]

§ 1.415–9 Disqualification of plans and trusts.

(a) In general. Under section 415(g) and this section, with respect to a particular limitation year, a plan (and the trust forming part of the plan) is disqualified in accordance with the rules provided in paragraph (b) of this section, if any of the following conditions exist:

(1) Annual additions (as defined in § 1.415–6(b)) with respect to the account of any participant in a qualified defined contribution plan maintained by the employer exceed the limitations of section 415(c) and § 1.415–6.

(2) The annual benefit (as defined in § 1.415–3(b)(1)) of a participant in a qualified defined benefit plan maintained by the employer exceeds the limitations of section 415(b) and § 1.415–3.

(3) The combination of annual additions with respect to the account of any participant in a qualified defined contribution plan and the projected annual benefit payable with respect to such participant in a qualified defined benefit plan maintained by the employer exceeds the limitations of section 415(e) and § 1.415–7.

For purposes of this paragraph, the determination of whether a plan or a combination of plans exceeds the limitations imposed by section 415 for a particular limitation year is, except as otherwise provided, made by taking into account the aggregation of plan rules provided in sections 415(f) and 414(b) and (c) (as modified by section 415(h)).

(b) Rules for disqualification of plans and trusts—(1) In general. Any plan (including a trust which forms part of such plan) that is disqualified in a particular limitation year under the rules set forth in this paragraph, shall be disqualified as of the first day of the first plan year containing any portion of the particular limitation year.

(2) Single plan. In the case of a single qualified defined benefit plan maintained by the employer that provides an annual benefit (as defined in § 1.415–3(b)(1)) in excess of the limitations of section 415(b) and § 1.415–3 for any particular limitation year, such plan is disqualified in that limitation year. Similarly, if the employer only maintains a single defined contribution plan under which annual additions (as defined in § 1.415–6(b)) allocated to the account of any participant exceed the limitations of section 415(c) and § 1.415–6 for any particular limitation year, such plan is also disqualified in that limitation year.

(3) More than one plan. In the event that the limitations of section 415(b) and § 1.415–3, or section 415(c) and § 1.415–6 are exceeded for a particular limitation year with respect to any participant because of the application of the aggregation rules of section 415(f)(1) or section 414(b) or (c), as modified by section 415(h), one or more of the plans shall be disqualified in accordance with the rules set forth in this subparagraph. Similarly, if the limitations of section 415(e) and § 1.415–7 are exceeded for a particular limitation year with respect to any participant because of the application of such aggregation rules (although if an individual participates in a defined contribution and defined benefit plan maintained by the same employer, these limitations may be exceeded even without the application of such aggregation rules), one or more of the plans shall be disqualified in accordance with the following rules:

(i) If there are two plans and one of the plans has been terminated at any time including the last day of the particular limitation year, the plan which has not been so terminated (whether or not that plan is a multiemployer plan described in section 414(f)) is disqualified in that limitation year.

(ii) If there are two plans and neither plan has been terminated at any time including the last day of the particular limitation year, and if one of the plans is a multiemployer plan described in section 414(f), the plan which is not a multiemployer plan is disqualified in that limitation year. For purposes of the preceding sentence, the determination of whether a plan is a multiemployer plan described in section 414(f) is made as of the last day of the particular limitation year.

(iii) If there are two plans of an employer and neither plan has either been terminated at any time including the last day of the particular limitation year or determined to be a multiemployer plan described in section 414(f) as of such day, the employer may elect, in a manner determined by the Commissioner, the plan that is disqualified. If the two plans described in this subdivision are involved because of the application of section 414(b) or (c), as modified by section 415(h), the employers of the controlled group may elect, in a manner determined by the Commissioner, the plan

that is disqualified. However, the election described in the preceding sentence is not effective unless made by all of the employers within the controlled group. For purposes of this subdivision, the elected plan is disqualified in the particular limitation year.

(iv) If the election described in subdivision (b)(3)(iii) of this paragraph is not made with respect to the two plans described in such subdivision, the Commissioner, taking into account all of the facts and circumstances, shall have the discretion to determine the plan that is disqualified in the particular limitation year. In making this determination, some of the factors that will be taken into account include, but are not limited to, the number of participants in each plan and the amount of benefits provided on an overall basis by each plan.

(v) If more that two plans are involved, a plan or plans shall be disqualified in the particular limitation year in accordance with the principles contained in this subparagraph.

(4) Special rules for simplified employee pension. If there are two or more plans and if one of the plans is a simplified employee pension (as defined in section 408(k)), the simplified employee pension shall not be disqualified until all of the other plans have been disqualified. However, if one of the plans has been terminated, the simplified employee pension shall be disqualified before the terminated plan. For purposes of this subparagraph, the disqualification of a simplified employee pension means that the simplified employee pension is no longer described under section 408(k).

(c) Special rules concerning section 403(b) annuity contracts—(1) In general. If aggregating or combining a section 403(b) annuity contract and a qualified plan causes the applicable limitations of section 415 to be exceeded, the exclusion allowance under section 403(b)(2) shall be adjusted first to the extent necessary to satisfy such limitations.

(2) Aggregating section 403(b) annuity contract and qualified defined benefit plan. In the event that aggregating a section 403(b) annuity contract and a qualified defined benefit plan causes the limitations of section 415(e) and § 1.415–7 to be exceeded with respect to a participant for a particular limitation year, the amount of the contribution to the annuity contract in excess of such limitations is treated as a disqualified contribution and therefore includable in the gross income of the participant for the taxable year with or within which that limitation year ends. Furthermore, for purposes of computing the exclusion allowance under section 403(b)(2)(A) for future taxable years with respect to such participant, the disqualified contribution is treated as an amount contributed by the employer for an annuity contract which was excludable from the participant's gross income under section 403(b)(2)(A)(ii). Thus, for future taxable years, the exclusion allowance will be reduced by the amount of the disqualified contribution even though such amount was not excludable from the participant's gross income in the taxable year when it was made. See § 1.415–7(c)(2) for special rules relating to the defined contribution plan fraction applicable to an individual on whose behalf a section 403(b) annuity contract has been purchased.

(3) Combining section 403(b) annuity contract and qualified defined contribution plan. In the event that combining a section 403(b) annuity contract and a qualified defined contribution plan under the provisions of section 415(f)(1)(B) causes the limitations of section 415(c) and § 1.415–6 applicable to a participant under the defined contribution plan to be exceeded for a particular limitation year, the excess of the contributions to the annuity contract plus the annual additions to the plan over such limitations is treated as a disqualified contribution to the annuity contract and therefore includable in the gross income of the participant for the taxable year with or within which that limitation year ends. Furthermore, for purposes of computing the exclusion allowance under section 403(b)(2)(A) for future taxable years with respect to such participant, the disqualified contribution is treated an an amount contributed by the employer for an annuity contract which was excludable from the participant's gross income under section 403(b)(2)(A)(ii). Thus, for future taxable years, the exclusion allowance will be reduced by the amount of the disqualified contribution even though such amount was not excludable from the participant's gross income in the taxable year when it was made.

(4) Examples. The provisions of this paragraph may be illustrated by the following examples:

Example (1). N is employed by a hospital which purchases an annuity contract described in section 403(b) on N's behalf for the current limitation year. The current limitation year is N's first year of service with the hospital. Solely for the purpose of illustrating the rules set forth in this paragraph, assume that N is in control of the hospital within the meaning of section 414(b) or (c), as modified by section 415(h). Therefore, under section 415(e)(5), the section 403(b) annuity contract is treated as a defined contribution plan maintained by the hospital and N. The hospital also maintains a qualified defined contribution plan during the current limitation year in which N participates, but it does not maintain any other qualified plan.

N's compensation (within the meaning of § 1.415–2(d)) from the hospital for the current limitation year is $20,000. N does not elect any of the alternative limitations provided in section 415(c)(4) for the section 403(b) annuity contract. For the current limitation year, the hospital contributes $3,000 for the section 403(b) annuity contract on N's behalf, which is within the limitations applicable to N under the annuity contract (*i.e.*, the lesser of the exclusion allowance under section 403(b)(2)(A) ($4,000) or the limitations of section 415(c)(1) ($5,000)). The hospital also contributes $3,000 to the qualified plan on N's behalf for the current limitation year (which represents the only annual additions allocated to N's account under the plan for such year), which is within the $5,000 limitation of section 415(c)(1) applicable to N under the plan. However, under section 415(f)(1)(B), for purposes of applying the limitations of section 415(c) and § 1.415–6, the hospital is considered to maintain only one defined contribution plan and thus, all contributions to the annuity contract and to the regular plan must be combined. Because the total combined contributions ($6,000) exceed the section 415(c) limitation applicable to N under the plan ($5,000), under the special rules contained in this paragraph, $1,000 of the $3,000 contributed to the section 403(b) annuity contract is considered a disqualified contribution and therefore currently includable in N's gross income. Furthermore, in computing N's exclusion allowance for the section 403(b) annuity contract for future taxable years, besides the $3,000 contributed to the qualified plan, the $3,000 contributed for the section 403(b) annuity contract is also considered an amount contributed by the employer and excludable from N's gross income for purposes of section 403(b)(2)(A)(ii), even though only $2,000 of this amount was excludable from N's gross income.

Example (2). Assume the same facts as in example (1), except that instead of the defined contribution plan the hospital maintains a qualified defined benefit plan during the current limitation year in which N participates. Because the hospital is considered to be maintaining a defined contribution plan (in the form of a section 403(b) annuity contract) in addition to its defined benefit plan, the limitations of section 415(e) and § 1.415–7 are applicable to N for the current limitation year. If N's defined benefit plan fraction for the current limitation year is 1.0, then to satisfy the limitations of section 415(e) and § 1.415–7, N's defined contribution plan fraction may not exceed .4 for the current limitation year. This means that only $2,000 (*i.e.* 40% of $5,000—the applicable limitation to N for the annuity contract under the special rule set forth in § 1.415–7(c)(2)(i)) could have been contributed to the annuity contract on N's behalf for the current limitation year without violating the 1.4 limitation of section 415(e) and § 1.415–7. However, because the hospital contributed $3,000 to the section 403(b) annuity contract on N's behalf, under the special rules contained in this paragraph, $1,000 of this amount is considered a disqualified contribution and therefore currently includable in N's gross income. Furthermore, in computing N's exclusion allowance for the section 403(b) annuity contract for future taxable years, the $3,000 contributed to the annuity contract is considered the amount contributed by the employer and excludable from N's gross income for purposes of section 403(b)(2)(A)(ii), even through only $2,000 of this amount was excludable from N's gross income.

[T.D. 7748, 46 FR 1716, Jan. 7, 1981]

§ 1.415–10 Special aggregation rules.

(a) General rules relating to aggregation of plans during limitation year—(1) Scope of aggregation rules. This section provides rules for those situations in which two or more existing plans, which previously were unaggregated, are aggregated during a particular limitation year on or after the effective date of section 415 and these regulations, and as a result, the limitations of section 415(b), (c) or (e) are exceeded for that limitation year. The rules described in this section are also applicable with respect to the aggregation of benefits under a multiemployer plan described in section 414(f) that previously were not required to be aggregated.

(2) Controlling date of aggregation. For purposes of this section, plans which are not aggregated as of the first day of a limitation year will not be considered aggregated for that limitation year. Notwithstanding the preceding sentence, if a section 403(b) annuity contract is aggregated with a qualified plan because of the election by the individual on whose behalf the annuity contract is purchased to have the provisions of section 415(c)(4)(C) apply for the taxable year, the annuity contract and the plan are deemed to be aggregated as of the first day of the limitation year ending with or within such taxable year.

(3) Aggregation of additions and benefits. If plans are aggregated under this section, the following rules shall apply:

(i) All annual additions credited to a participant's account under a defined contribution plan prior to the aggregation of such plan shall be taken into account in computing the participant's defined contribution plan fraction for purposes of applying the limitations of section 415(e) to the aggregated plans.

(ii) The annual benefit or projected annual benefit (whichever is applicable) of a participant under a defined benefit plan prior to the aggregation of such plan shall be taken into account for purposes of applying the limitations of section 415(b) or section 415(e) to the aggregated plans.

(iii) For a special rule relating to the aggregation of contributions to a section 403(b) annuity contract upon the aggregation of the annuity contract with a qualified plan, see § 1.415–7(h)(4)(i).

(b) Aggregation of defined benefit plans. In the case of an individual who is a participant in two or more defined benefit plans and with respect to whom the limitations of section 415(b) and § 1.415–3 are exceeded for a particular limitation year because of the aggregation of the plans for that limitation year, the limitations of section 415(b) and § 1.415–3 may be exceeded for that limitation year and for future limitation years provided that there is no increase in the partici-

pant's accrued benefit derived from employer contributions during the period within which these limitations are being exceeded.

(c) Aggregation of defined benefit and defined contribution plan. In the case of an individual who has at any time participated in a defined benefit plan and also has at any time participated in a defined contribution plan and with respect to whom the limitations of section 415(e) and § 1.415–7 are exceeded for a particular limitation year because of the aggregation of the plans for that limitation year, the limitations of section 415(e) and § 1.415–7 may be exceeded for that limitation year and for future limitation years provided that the following conditions are complied with during that period:

(1) The participant's accrued benefit derived from employer contributions in the defined benefit plan is not increased.

(2) No employer contributions are allocated to the participant's account under any defined contribution plan.

(3) No forfeitures arising under any defined contribution plan are allocated to the participant's account.

(4) No voluntary employee contributions are made by the participant under any defined benefit or defined contribution plan.

(5) No mandatory employee contributions are made by the participant under any defined contribution plan.

(d) Limitation year for aggregated plans. If the plans which are aggregated under this section have different limitation years, subparagraph (1) or (2) of this paragraph must be complied with.

(1) The relevant employer or employers must elect the limitation year that is to be controlling. This election shall be made by the adoption of a written resolution by the employer or employers. See § 1.415–2(b)(4) for rules relating to a change in the limitation year.

(2) The employer or employers may continue to use different limitation years for each plan in accordance with rules determined by the Commissioner.

If, in accordance with paragraph (d)(1) of this section, one limitation year is elected, and if the plans which are aggregated covered at least one common participant prior to being aggregated, that limitation year shall be applicable for past years for purposes of computing the defined contribution fraction for those years. For special rules relating to the computation of the defined contribution plan fraction where records are not available for past periods, see § 1.415–7(f).

(e) The provisions of this section may be illustrated by the following examples:

Example (1). J is an employee of two unrelated corporations, N and M. Each corporation has a qualified defined benefit plan in which J participates. Each plan provides a benefit which is equal to 75 percent of a participant's average compensation for his high 3 years of service and is payable in the form of a straight life annuity beginning at age 65. J's average compensation (within the meaning of § 1.415–2(d)) for his high three years of service from each corporation is $80,000. Each plan uses the calendar year for the limitation and plan year. In July, 1978, N Corporation becomes a wholly owned subsidiary of M Corporation, and as a result, J is treated as being employed by a single employer under section 414(b). Therefore, because section 415(f)(1)(A) requires that all defined benefit plans of an employer be treated as one defined benefit plan, the two plans must be aggregated for purposes of applying the limitations of section 415. (Although, under paragraph (a)(2) of this section, since the plans were not aggregated as of the first day of the 1978 limitation year (January 1, 1978), they will not be considered aggregated until the limitation year beginning January 1, 1979.) As a result of such aggregation, J becomes entitled to a combined benefit which is equal to $120,000, which is in excess of the section 415(b) dollar limitation for 1979 of $98,100. However, under paragraph (b) of this section, the limitations of section 415(b) and § 1.415–3 applicable to J may be exceeded in this situation without plan disqualification, so long as J's accrued benefit derived from employer contributions is not increased during the period within which the limitations are being exceeded.

Example (2). A, age 30, owns all of the stock of X Corporation and also owns 10 percent of the stock of Z Corporation. F, A's father, directly owns 75 percent of the stock of Z Corporation. Both corporations have qualified defined contribution plans in which A participates and both plans use the calendar year for the limitation and plan year. A's compensation (within the meaning of § 1.415–6(a)(3)) for 1976 is $40,000 from Z Corporation and $150,000 from X Corporation. During 1976, annual additions of $10,000 are credited to A's account under the plan of Z Corporation, while annual additions of $26,825 are credited to A's account under the plan of X Corporation. In both instances, the amount of annual additions represent the maximum allowable under section 415(c) and § 1.415–6. On July 15, 1976, F dies, and A inherits all of F's stock in Z in 1976. Because under section 414(b), A is considered to be in control of X and Z Corporations, the two plans must be aggregated for purposes of applying the limitations of section 415. However, even though A's total annual additions for 1976 are $36,825, the limitations of section 415(c) and § 1.415–6 are not violated for 1976, because, under paragraph (a)(2) of this section, the two plans are considered separate plans for that year since they were not aggregated as of the first day of that year.

[T.D. 1718, 46 FR 1718, Jan. 7, 1981]

§ 1.416–1 Questions and answers on top-heavy plans.

The following questions and answers relate to special rules for top-heavy plans under section 416 of the Internal Revenue Code of 1954, as added by

section 240 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub.L. 97–248) (TEFRA), and amended by sections 524 and 713(f) of the Tax Reform Act of 1984 (Pub.L. 98–369):

Table of Contents

G. General Provisions

G–1 Q. What requirement plans are subject to the top-heavy rules added to the Code by the Tax Equity and Fiscal Responsibility Act and amended by the Tax Reform Act of 1984?

A. All stock bonus, pension, or profit-sharing plans intended to qualify under section 401(a), annuity contracts described in section 403(a), and simplified employee pensions described in section 408(k) are subject to the new top-heavy rules added to the Code by the Tax Equity and Fiscal Responsibility Act and amended by the Tax Reform Act ("TRA") of 1984.

G–2 Q. Is a multiple employer plan subject to the top-heavy requirements of section 416?

A. A multiple employer plan is subject to the requirements of section 416, but only with respect to each individual employer. Thus, if twelve employers contribute to a multiple employer plan and the accrued benefits for the key employees of one employer exceed 60 percent of the accrued benefits of all employees for such employer, the plan is top-heavy with respect to that employer. A failure by the multiple employer plan to satisfy section 416 with respect to the employees of such employer means that all employers are maintaining a plan that is not a qualified plan.

G–3 Q. As of what date must plan amendments to comply with top-heavy rules be effective?

A. Amendments required to comply with the top-heavy rules must be effective as of the first day of the first plan year which begins after 1983. See § 1.401(b)–1 for the date by which such amendments must be adopted.

T. Top-Heaviness Determinations

T–1 Q. What factors must be considered in determining whether a plan is top-heavy?

A. (a) In order to determine whether a plan is top-heavy for a plan year, it is necessary to determine which employers will be treated as a single employer for purposes of section 416; what the determination date is for the plan year; which employees are or formerly were key employees; which former employees have not performed any service for the employer maintaining the plan at any time during the five-year period ending on the determination date; which plans of such employers are required or permitted to be aggregated to determine top-heavy status; and the present value of the accrued benefits (including distributions made during the plan year containing the determination date and the four preceding plan years) of key employees, former key employees, and non-key employees.

(b) All employers that are aggregated under section 414(b), (c), and (m) must be taken into account as a single employer for the plan year in question, and those employees in all plans maintained by the employers that are aggregated must be categorized as key employees, as former key employees, or as non-key employees. See Question and Answer T–12 for the determination of which employees are or were key employees. All plans maintained by the employers in which a key employee participates, and certain other plans, must then be aggregated (the required aggregation group). See Question and Answer T–6 for rules concerning required aggregation. Other plans may in some cases be aggregated with the required aggregation group. See Question and Answer T–7 for rules concerning such permissive aggregation.

(c) Once aggregated, all plans that are required to be aggregated will either be top-heavy or not top-heavy, depending upon whether the aggregation group is top-heavy. A plan or aggregation group will be considered top-heavy if the sum of the present value of the accrued benefits for key employees is more than 60 percent of the sum of the present value of accrued benefits of all employees.

(d) Except as otherwise stated, for purposes of section 416(g), an employee is an individual currently or formerly employed by an employer. Former key employees are non-key employees and are excluded entirely from the calculation to determine top-heaviness. In all cases, the present value of accrued benefits includes distributions made during the plan year containing the determination date and the preceding four plan years. See Questions and Answers T–24 and T–25 for rules concerning the account balances and present value of accrued benefits. For plan years beginning after December 31, 1984, the accrued benefit of an employee who has not performed any service for the employer maintaining the plan at any time during the five-year period ending on the determination date is excluded from the calculation to determine top-heaviness. However, if an employ-

ee performs no services for five years and then performs services, such employee's total accrued benefit is included in the calculation for top-heaviness.

T–2 Q. To what extent are multiemployer plans and multiple employer plans to which an employer makes contributions on behalf of its employees treated as plans of that employer for top-heavy purposes?

A. Multiemployer plans described in section 414(f) and multiple employer plans described in section 413(c) to which an employer makes contributions on behalf of its employees are treated as plans of that employer to the extent that benefits under the plan are provided to employees of the employer because of service with that employer.

T–3 Q. Must a collectively-bargained plan be aggregated with other plans of the employer to determine whether some or all of the employer's plans are top-heavy?

A. A collectively-bargained plan that includes a key employee of an employer must be included in the required aggregation group for that employer. See Question and Answer T–6 for rules concerning required aggregation. A collectively-bargained plan that does not include a key employee may be included in a permissive aggregation group. See Question and Answer T–7 for rules concerning permissive aggregation. However, the special rules in section 416(b), (c), or (d) applicable to top-heavy plans do not apply with respect to any employee included in a unit of employees covered by an agreement which the Secretary of Labor finds to be a collective-bargaining agreement between employee representatives and one or more employers if there is evidence that retirement benefits were the subject of good faith bargaining between such employee representatives and such employer or employers. In determining whether there is a collective-bargaining agreement between employee representatives and one or more employers, the additional condition of section 7701(a)(46) must be satisfied after March 31, 1984.

T–4 Q. How is a terminated plan treated for purposes of the top-heavy rules?

A. A terminated plan is treated like any other plan for purposes of the top-heavy rules. For purposes of section 416, a terminated plan is one that has been formally terminated, has ceased crediting service for benefit accruals and vesting, and has been or is distributing all plan assets to participants or their beneficiaries as soon as administratively feasible. Such a plan must be aggregated with other plans of the employer if it was maintained within the last five years ending on the determination date for the plan year in question and would, but for the fact that it terminated, be part of a required aggregation group for such plan year. Distributions which have taken place within the five years ending on the determination date must be accounted for in accordance with section 416(g)(3). No additional vesting, benefit accruals or contributions must be provided for participants in a terminated plan.

T–5 Q. How are frozen plans treated for purposes of the top-heavy rules?

A. For purposes of section 416, a frozen plan is one in which benefit accruals have ceased but all assets have not been distributed to participants or their beneficiaries. Such plans are treated, for purposes of the top-heavy rules, as any non-frozen plan. That is, such plans must provide minimum contributions or benefit accruals, limit the amount of compensation which can be taken into account in providing benefits, and provide top-heavy vesting. A frozen defined contribution plan may not be required to provide additional contributions because of the rule in section 416(c)(2)(B).

T–6 Q. What is a required aggregation group?

A. For purposes of determining whether the plans of an employer are top-heavy for a particular plan year, the required aggregation group includes each plan of the employer in which a key employee participates in the plan year containing the determination date, or any of the four preceding plan years. In addition, each other plan of the employer which, during this period, enables any plan in which a key employee participates to meet the requirements of section 401(a)(4) or 410 is part of the required aggregation group. This concept may be illustrated by the following examples:

Example (1). An employer maintains two plans. Key employees participate in one plan, but not in the other. If the plan containing key employees independently satisfies the coverage and non-discrimination rules of sections 410 and 401(a)(4), it may be tested independently to determine whether it is top-heavy. Also, the plan not covering key employees would not be part of a required aggregation group and would not need to be tested to determine whether it is top-heavy. However, if the plan containing key employees satisfies the coverage requirements of section 410(b) or the non-discrimination requirements of section 401(a)(4) only when it is considered together with the other plan in accordance with § 1.410(b)–1(d)(3), the plan not covering key employees would be part of the required aggregation group.

Example (2). A sole proprietor terminated a Keogh plan in 1981. In 1982, the sole proprietor incorporated and established a corporate plan with a calendar-year plan year. For purposes of determining whether the corporate plan is top-heavy for its 1984 plan year, the terminated Keogh plan and the corporate plan would be part of a required aggregation

group. The sole proprietor and the corporation would be treated as a single employer under section 414(c). Under Question and Answer T-4, the terminated plan would be aggregated with the corporate plan because it was maintained within the five-year period ending on the determination date for the 1984 plan year and because, but for the fact that it terminated, it would be aggregated with the corporate plan because it covered a key employee.

T-7 Q. What is a permissive aggregation group?

A. A permissive aggregation group consists of plans of the employer that are required to be aggregated, plus one or more plans of the employer that are not part of a required aggregation group but that satisfy the requirements of sections 401(a)(4) and 410 when considered together with the required aggregation group. This concept may be illustrated by the following examples:

Example (1). (a) An employer maintains two plans:

1. Plan A covers key employees and independently satisfies the requirements of sections 410 and 401(a)(4).

2. Plan B covers no key employees. It also independently satisfies the requirements of sections 410 and 401(a)(4).

(b) As indicated in Question and Answer T-6, Plan B is not required to be aggregated with Plan A. Further, if Plan B provided contributions or benefits that were not at least comparable to the contributions or benefits provided under Plan A, then Plan B could not be permissively aggregated with Plan A because the contributions and benefits would discriminate if the two plans were considered as a unit. However, if the benefits or contributions under Plan B were comparable to those under Plan A, the two plans would be permitted to be aggregated to determine whether or not the group consisting of both plans is top-heavy. If Plan A and Plan B are permitted to be aggregated, and if the permissive aggregation group is not top-heavy, then neither Plan A nor Plan B would be considered top-heavy.

Example (2). (a) Employer W maintains two plans.

1. Plan C covers salaried employees and independently satisfies the requirements of sections 410 and 401(a)(4).

2. Plan D covers employees who are included in a unit of employees covered by an agreement which the Secretary of Labor has found to be a collective-bargaining agreement between employee representatives and the employer and retirement benefits were bargained for between employee representatives and the employer.

(b) The fact that Plan D is a collectively-bargained plan does not necessarily mean that it may be permissively aggregated with Plan C. In order to be permissively aggregated with Plan C, Plan D must provide contributions or benefits with respect to service with Employer W that are at least comparable to the contributions or benefits provided under Plan C.

T-8 Q. May an employer permissively aggregate multiemployer plans, multiple employer plans and simplified employee pension plans to which the employer contributes with a plan covering key employees or a required aggregated group?

A. Yes. Multiemployer plans, multiple employer plans and simplified employee pensions to which an employer makes contributions may be permissively aggregated with a plan covering key employees or with a required aggregation group if the contributions or benefits provided under the multiemployer plan, multiple employer plan or simplified employee pension by the employer are comparable to the contributions or benefits provided under the plan covering key employees or the plans in the required aggregation group. In making this determination, only the employer's contribution to the simplified employee pension may be used.

T-9 Q. What plans will be treated as top-heavy if they are part of a required aggregation group that is top-heavy?

A. In the case of plans that are required to be aggregated, each plan in the required aggregation group will be top-heavy if the group is top-heavy. No plan in the required aggregation group will be top-heavy if the group is not top-heavy.

T-10 Q. If a required aggregation group is top-heavy, and one plan of the group satisfies the requirements of sections 416(b), (c), and (d), may other plans in the group include provisions which do not satisfy sections 416(b), (c) and (d)?

A. No. Each plan in a required aggregation group is top-heavy if the group is top-heavy. Thus, each plan must contain provisions satisfying the requirements of sections 416(b) and (d). If all the plans are defined contribution plans, only one plan need satisfy the requirements of section 416(c)(2) with respect to any non-key employee who participates in more than one of the plans. If all the plans are defined benefit plans, only one plan need satisfy the requirements of section 416(c)(1) with respect to any non-key employee who participates in more than one of the plans. However, in the case of non-key employees who do not participate in more than one plan, each plan must separately provide the applicable minimum contribution or benefit with respect to each such employee. See Question and Answer M-12 in the case of employees who are covered under both a defined benefit and a defined contribution plan.

T-11 Q. What plans will be treated as top-heavy if a permissive aggregation group is top-heavy?

A. If a permissive aggregation group is top-heavy, only those plans that are part of the required aggregation group will be subject to the requirements of section 416(b), (c) and (d). Plans that are not part of the required aggregation group will not be subject to these requirements. Thus, if an employer wishes to demonstrate that the plans maintained by the employer are not top-heavy, the

employer need consider only the required aggregation group. If, after considering the required aggregation group, it is determined that the plans are not top-heavy, the requirements of section 416(b), (c) and (d) will not apply to any of the plans. If, on the other hand, the plans required to be aggregated are top-heavy, the employer may wish to determine whether there are any plans that may be permissively aggregated to demonstrate that the plans are not top-heavy. Assuming that there are plans that are eligible for permissive aggregation, the employer may take these plans into consideration. If, after taking such plans into consideration, the net result is that the entire group is not top-heavy, the top-heavy requirements do not apply to any plan in the group.

T–12 Q. For purposes of determining whether a plan is top-heavy for a plan year, who is a key employee?

A. Under section 416(i)(1), a key employee is any employee (including any deceased employee) who at any time during the plan year containing the determination date for the plan year in question or the four preceding plan years (including plan years before 1984) is:

1. An officer of the employer having annual compensation from the employer for a plan year greater than 150 percent of the dollar limitation in effect under section 415(c)(1)(A) for the calendar year in which such plan year ends (see Questions and Answers T–13, T–14, and T–15),

2. One of the ten employees having annual compensation from the employer for a plan year greater than the dollar limitation in effect under section 415(c)(1)(A) for the calendar year in which such plan year ends and owning (or considered as owning within the meaning of section 318) both more than a ½ percent interest and the largest interests in the employer (see Question and Answer T–19),

3. A 5-percent owner of the employer, or

4. A 1-percent owner of the employer having annual compensation from the employer for a plan year more than $150,000 (see Questions and Answers T–16 and T–21).

An individual may be considered a key employee in a plan year for more than one reason. For example, an individual may be both an officer and one of the ten largest owners. However, in testing whether a plan or group is top-heavy, an individual's accrued benefit is counted only once. The terms key employee, former key employee, and non-key employee include the beneficiaries of such individuals. This Question and Answer is illustrated by the following examples:

Example (1). An employer maintains a calendar-year plan. An individual who was an employee of the employer and a 5-percent owner of the employer in 1986 was neither an employee nor an owner in 1987 or thereafter. Even though the individual is no longer an employee or owner of the employer, the individual would be treated as a key employee for purposes of determining whether the plan is top-heavy for each plan year through the 1991 plan year. However, for purposes of determining whether the plan is top-heavy for the 1992 plan year and for subsequent plan years, the individual would be treated as a former key employee.

Example (2). The facts are the same as in example (1), except that the individual died in early 1987 and his total benefit under the plan was distributed to his beneficiary in 1987. Such distribution would be treated as the accrued benefit of the individual for each year through the 1991 plan year. However, such individual would be treated as a former key employee for purposes of determining whether the plan is top-heavy for the 1992 plan year and for subsequent plan years. The conclusions are not affected by whether the beneficiary of the individual is a non-key employee or a key employee of the employer.

T–13 Q. For purposes of defining a key employee, who is an officer?

A. Whether an individual is an officer shall be determined upon the basis of all the facts, including, for example, the source of his authority, the term for which elected or appointed, and the nature and extent of his duties. Generally, the term officer means an administrative executive who is in regular and continued service. The term officer implies continuity of service and excludes those employed for a special and single transaction. An employee who merely has the title of an officer but not the authority of an officer is not considered an officer for purposes of the key employee test. Similarly, an employee who does not have the title of an officer but has the authority of an officer is an officer for purposes of the key employee test. In the case of one or more employers treated as a single employer under sections 414(b), (c), or (m), whether or not an individual is an officer shall be determined based upon his responsibilities with respect to the employer or employers for which he is directly employed, and not with respect to the controlled group of corporations, employers under common control or affiliated service group. A partner of a partnership will not be treated as an officer for purposes of the key employee test merely because he owns a capital or profits interest in the partnership, exercises his voting rights as a partner, and may, for limited purposes, be authorized and does in fact act as an agent of the partnership.

T–14 Q. For purposes of determining whether a plan is top-heavy for a plan year, how many officers must be taken into account?

A. There is no minimum number of officers that must be taken into account. Only individuals who are in fact officers within the meaning of Question and Answer T–13 must be considered. For example, a corporation with only one officer and two employees would have only one officer for purposes of section 416(i)(1)(A)(i). After aggregating all employees (including leased employees within the meaning of section 414(n)) of employers required to be aggregated under section 414(b), (c) or (m), there is a maximum limit to the number of officers that are to be taken into account as officers for the entire group of employers that are so aggregated. The number of employees an employer (including all employers required to be aggregated under section 414(b), (c), or (m)) has for the plan year containing the determination date is the greatest number of employees it had during that plan year or any of the four preceding plan years. For purposes of this Question and Answer, employees include only those individuals who perform services for the employer during a plan year. If the number of employees (including part-time employees) of all the employers aggregated under section 414(b), (c) or (m) is less than 30 employees, no more than three individuals shall be treated as key employees for the plan year containing the determination date by reason of being officers. If the number of employees of all organizations aggregated under section 414(b), (c) or (m) is greater than 30 but less than 500, no more than 10% of the number of employees will be treated as key employees by reason of being officers. (If 10% of the number of employees is not an integer, the maximum number of individuals to be treated as key employees by reason of being officers shall be increased to the next integer). If the number of employees of employers aggregated under section 414(b), (c) and (m) exceeds 500, no more than 50 employees are to be considered as key employees by reason of being officers. This limited number of officers is comprised of the individual officers, selected from the group of all individuals who were officers in the plan year containing the determination date or any one of the four preceding plan years, who had annual plan year compensation (in the officer year) in excess of 150 percent of the dollar limitation in effect under section 415(c)(1)(A) for the calendar year in which the plan year ends and who had the largest annual plan-year compensation in that five-year period. (The definition of compensation contained in Question and Answer T–21 is to be used for this purpose.) In determining the officers of an employer, an employee who is an officer shall be counted as an officer for key employee purposes without regard to whether the employee is a key employee for any other reason. However, in testing whether the plan(s) is top-heavy, an individual's present value of accrued benefits is counted only once.

Example. A company is testing to see if its plan is top-heavy for the 1985 plan year. In each year from 1980 through 1984 it has more than 500 employees. Assume that (1) because of rapid turnover among officers, the individuals who are officers each year are different from the individuals who are officers in any preceding year, and (2) the annual plan year compensation of each officer exceeds 150 percent of the dollar limitation in effect under section 415(c)(1)(A) for the calendar year in which the plan year ends. Under the limitations, only a total of 50 individuals would be considered to be key employees by virtue of being officers in testing for top-heaviness for the 1985 plan year. Further, the 50 individuals considered as key employees under this test would be determined by selecting the 50 out of 250 individuals (50 different officers each year) who had the highest annual plan-year compensation during the 1980–1984 period (while officers).

T–15 Q. For purposes of section 416, do organizations other than corporations have officers?

A. Yes. For purposes of the top-heavy rules, sole proprietorships, partnerships, associations, trusts, and labor organizations may have officers. This rule is effective for purposes of determining whether a plan is top-heavy for plan years which begin after February 28, 1985.

T–16 Q. Who is a 1-percent owner of the employer?

A. (a) If the employer is a corporation, a 1-percent owner is any employee who owns (or is considered as owning within the meaning of section 318) more than 1 percent of the value of the outstanding stock of the corporation or stock possessing more than 1 percent of the total combined voting power of all stock of the corporation. If the employer is not a corporation, a 1-percent owner is any employee who owns more than 1 percent of the capital or profits interest in the employer. The rules of subsections (b), (c), and (m) of section 414 do not apply for purposes of determining who is a 1-percent owner.

(b) For purposes of determining who is a 1-percent owner, 5-percent owner, or top-ten owner, value means fair market value taking into account all facts and circumstances.

T–17 Q. Who is a 5-percent owner of the employer?

A. If the employer is a corporation, a 5-percent owner is any employee who owns (or is considered as owning within the meaning of section 318) more than 5 percent of the value of the outstanding stock of the corporation or stock possessing more than 5 percent of the total combined voting power of all stock of the corporation. If

the employer is not a corporation, a 5-percent owner is any employee who owns more than 5 percent of the capital or profits interest in the employer. The rules of subsections (b), (c), and (m) of section 414 do not apply for purposes of determining who is a 5-percent owner.

T–18 Q. How do the rules of section 318 apply for purposes of determining ownership in an entity other than a corporation?

A. For purposes of determining ownership in an entity other than a corporation, the rules of section 318 apply in a manner similar to the way in which they apply for purposes of determining ownership in a corporation. For non-corporate interests, capital or profits interest must be substituted for stock.

T–19 Q. Which employees will be considered one of the top ten owners?

A. (a) For purposes of determining whether a plan is top-heavy for a plan year, the top ten owners are the ten employees who (1) own (or are considered as owning within the meaning of section 318) during the plan year containing the determination date or any of the four preceding plan years both more than a ½ percent ownership interest in value and the largest percentage ownership interests in value of any of the employers required to be aggregated under section 414(b), (c), or (m), and (2) have during the plan year of ownership annual plan year compensation from the employer more than the limitation in effect under section 415(c)(1)(A) for the calendar year in which such plan year ends. The five years for which the test is made will be referred to as the "testing period." An employee whose annual plan year compensation exceeds the section 415(c)(1)(A) limit in effect for the calendar year in which a plan year in the testing period ends who has an ownership interest greater than ½ percent in that plan year is considered to be one of the top ten owners unless at least ten other employees own a greater interest in the employer during any year of the testing period and have annual plan year compensation during such plan year of ownership greater than the section 415(c)(1)(A) limit in effect for the calendar year in which such plan year ends. Ownership each plan year is determined on the basis of percentage of ownership interest in total ownership value and not dollar amounts. Thus, an employee whose stock interest is valued at 15 percent of the total stock value of a corporation in year one that was worth $15,000 is ranked higher than an employee whose stock interest is valued at 5 percent of the total stock value of the same corporation in year three which is now worth $50,000.

(b) If an employee's ownership interest changes during a plan year, his ownership interest for the year is the largest interest owned at any time during the year. If two employees have the same ownership interest in the employer during the testing period, the employee having the largest annual compensation from the employer for the plan year during any part of which that ownership interest existed shall be treated as having a larger interest. Thus, if 25 employees each own 4 percent in value of the employer during the testing period, the 10 employees with the largest single plan year compensation during this period will be considered the top ten owners. For purposes of this Question and Answer, compensation has the meaning set forth in Question and Answer T–21. This Question and Answer is illustrated by the following examples:

Example 1. Corporation K maintains a calendar year defined contribution plan. On January 1, 1986, Corporation K has five owners who owned the following value percentages of K stock: A = 50%, B = 20%, C = 15%, D = 10%, and E = 5%. On June 30, 1987, the five owners of Corporation K sold all of their shares of stock. The new owners and their respective ownership percentages were: F = 40%, G = 30%, H = 10%, I = 10%, and J = 10%. Assume that, for 1986, A, B, C, D, and E had annual compensation from Corporation K greater than the section 415(c)(1)(A) limit and that, for 1987, F, G, H, I, and J also had compensation from Corporation K greater than the section 415(c)(1)(A) limit. For purposes of determining whether the plan is top-heavy for the 1991 plan year, the top ten owners will include A, B, C, D, E, F, G, H, I, and J because no 10 individuals during the testing period, 1986–1990, had a greater ownership interest than these individuals.

Example 2. Assume the same facts in Example 1, except that on June 1, 1988, F, G, H, I, and J sold their interests to new owners, K, L, M, N, and O. K, L, M, N, and O owned, respectively, 30%, 30%, 30%, 5% and 5% of the value of the shares of X. Assume also that for 1988 K, L, M, N, and O earned more than the section 415(c)(1)(A) limitation. For purposes of determining whether the plan is top-heavy for the 1991 plan year, the top ten owners will include: A, B, F, K, G, L, M, and C because these eight individuals owned the highest value percentages of the Corporation K stock. Since D, H, I, and J owned equal 10% interests in value, the two employees of this group who had the largest annual plan year compensation during the plan years of their ownership will be the last 2 top ten owners.

T–20 Q. For purposes of determining whether an employee is a key employee under section 416(i)(1)(A), what aggregation rules apply?

A. In the case of ownership percentages, each employer that would otherwise be aggregated under section 414(b), (c) and (m) is treated as a separate employer. (See section 416(i)(1)(C).) However, for purposes of determining whether an individual has compensation of $150,000, or whether an individual is a key employee by reason

of being an officer or a top ten owner, compensation from each entity required to be aggregated under sections 414(b), (c) and (m) is taken into account. These rules may be illustrated by the following example:

Example. An individual owns two percent of the value of a professional corporation, which in turn owns a 1/10th of 1 percent interest in a partnership. The entities must be aggregated in accordance with section 414(m). The individual performs services for the professional corporation and for the partnership. The individual receives compensation of $125,000 from the professional corporation and $26,000 from the partnership. The individual is considered to be a key employee with respect to the employer that comprises both the professional corporation and the partnership because he has a two percent interest in the professional corporation and because his combined compensation from both the professional corporation and the partnership is more than $150,000.

T–21 Q. For purposes of testing whether an individual has compensation of more than $150,000, what definition of compensation must be used?

A. The definition of compensation to be used is the definition in § 1.415–2(d). In the case of an individual, including a self-employed individual, § 1.415–2(d)(2)(i) excludes from compensation amounts contributed to a plan of deferred compensation. Alternatively, compensation that would be stated on an employee's Form W–2 for the calendar year that ends with or within the plan year may be used. A plan must use the same definition of compensation for all top-heavy purposes for which the definition in this Question and Answer must be used.

T–22 Q. In the case of an employer who maintains a single plan, when must the determination whether the plan is top-heavy be made?

A. Whether a plan is top-heavy for a particular plan year is determined as of the determination date for such plan year. The determination date with respect to a plan year is defined in section 416(g)(4)(C) as (1) the last day of the preceding plan year, or (2) in the case of the first plan year, the last day of such plan year. Distributions made and the present value of accrued benefits are generally determined as of the determination date. (See Questions and Answers T–24 and T–25 for more specific rules.)

T–23 Q. In the case of an aggregation group, when must the determination whether the group is top-heavy be made?

A. When two or more plans constitute an aggregation group in accordance with section 416(g)(2), the following procedures are used to determine whether the plans are top-heavy for a particular plan year. First, the present value of the accrued benefits (including distributions for key employees and all employees) is determined separately for each plan as of each plan's determination date. The plans are then aggregated by adding together the results for each plan as of the determination dates for such plans that fall within the same calendar year. The combined results will indicate whether or not the plans so aggregated are top-heavy. These rules may be illustrated by the following example:

Example. An employer maintains Plan A and Plan B, each containing a key employee. Plan A's plan year commences July 1 and ends June 30. Plan B's plan year is the calendar year. For Plan A's plan year commencing July 1, 1984, the determination date is June 30, 1984. For Plan B's plan year in 1985, the determination date is December 31, 1984. These plans are required to be aggregated. For each of these plans as of their respective determination dates, the present value of the accrued benefits for key employees and all employees are separately determined. The two determination dates, June 30, 1984, and December 31, 1984, fall within the same calendar year. Accordingly, the present values of accrued benefits as of each of these determination dates are combined for purposes of determining whether the group is top-heavy. If, after combining the two present values, the total results show that the group is top-heavy, Plan A will be top-heavy for the plan year commencing July 1, 1984, and Plan B will be top-heavy for the 1985 calendar year.

T–24 Q. How is the present value of an accrued benefit determined in a defined contribution plan?

A. The present value of accrued benefits as of the determination date for any individual is the sum of (a) the account balance as of the most recent valuation date occurring within a 12-month period ending on the determination date, and (b) an adjustment for contributions due as of the determination date. In the case of a plan not subject to the minimum funding requirements of section 412, the adjustment in (b) is generally the amount of any contributions actually made after the valuation date but on or before the determination date. However, in the first plan year of the plan, the adjustment in (b) should also reflect the amount of any contributions made after the determination date that are allocated as of a date in that first plan year. In the case of a plan that is subject to the minimum funding requirements, the account balance in (a) should include contributions that would be allocated as of a date not later than the determination date, even though those amounts are not yet required to be contributed. Thus, the account balance will include contributions waived in prior years as reflected in the adjusted account balance and contributions not paid that resulted in a funding deficiency. The adjusted account balance is described in Rev.Rul. 78–223, 1978–1 C.B. 125. Also, the adjustment in (b) should reflect the amount of any contribution

actually made (or due to be made) after the valuation date but before the expiration of the extended payment period in section 412(c)(10).

T–25 Q. How is the present value of an accrued benefit determined in a defined benefit plan?

A. The present value of an accrued benefit as of a determination date must be determined as of the most recent valuation date which is within a 12-month period ending on the determination date. In the first plan year of a plan, the accrued benefit for a current employee must be determined either (i) as if the individual terminated service as of the determination date or (ii) as if the individual terminated service as of the valuation date, but taking into account the estimated accrued benefit as of the determination date. For the second plan year of a plan, the accrued benefit taken into account for a current participant must not be less than the accrued benefit taken into account for the first plan year unless the difference is attributable to using an estimate of the accrued benefit as of the determination date for the first plan year and using the actual accrued benefit as of the determination date for the second plan year. For any other plan year, the accrued benefit for a current employee must be determined as if the individual terminated service as of such valuation date. For this purpose, the valuation date must be the same valuation date for computing plan costs for minimum funding, regardless of whether a valuation is performed that year.

T–26 Q. What actuarial assumptions are used for determining the present value of accrued benefits for defined benefit plans?

A. (a) There are no specific prescribed actuarial assumptions that must be used for determining the present value of accrued benefits. The assumptions used must be reasonable and need not relate to the actual plan and investment experience. The assumptions need not be the same as those used for minimum funding purposes or for purposes of determining the actuarial equivalence of optional benefits under the plan. The accrued benefit for each current employee is computed as if the employee voluntarily terminated service as of the valuation date. The present value must be computed using an interest and a post-retirement mortality assumption. Pre-retirement mortality and future increases in cost of living (but not in the maximum dollar amount permitted by section 415) may also be assumed. However, assumptions as to future withdrawals or future salary increases may not be used. In the case of a plan providing a qualified joint and survivor annuity within the meaning of section 401(a)(11) as a normal form of benefit, for purposes of determining the present value of the accrued benefit, the spouse of the participant may be assumed to be the same age as the participant.

(b) Except in the case where the plan provides for a nonproportional subsidy, the present value should reflect a benefit payable commencing at normal retirement age (or attained age, if later). Thus, benefits not relating to retirement benefits, such as pre-retirement death and disability benefits and post-retirement medical benefits, must not be taken into account. Further, subsidized early retirement benefits and subsidized benefit options must not be taken into account unless they are nonproportional subsidies. See Question and Answer T–27.

(c) Where the plan provides for a nonproportional subsidy, the benefit should be assumed to commence at the age at which the benefit is most valuable. In the case of two or more defined benefit plans which are being tested for determining whether an aggregation group is top-heavy, the actuarial assumptions used for all plans within the group must be the same. Any assumptions which reflect a reasonable mortality experience and an interest rate not less than five percent or greater than six percent will be considered as reasonable. Plans, however, are not required to use an interest rate in this range.

T–27 Q. In determining the present value of accrued benefits in a defined benefit plan, what standards are applied toward determining whether a subsidy is nonproportional?

A. A subsidy is nonproportional unless the subsidy applies to a group of employees that would independently satisfy the requirements of section 410(b). If two or more plans are considered as a unit for comparability purposes under § 1.410(b)–1(d)(3), subsidies may be necessary in both plans or else the subsidy may be nonproportional. Thus, for example, in the case of a plan which provides an early retirement benefit after age 55 and 20 years of service equal to the normal retirement benefit without actuarial reduction and if the employees who may conceivably reach age 55 with 20 years of service would, as a group, satisfy the requirements of section 410(b), that subsidy is proportional. However, in contrast, consider a plan that provides an early retirement benefit that is the actuarial equivalent of the normal retirement benefit. In determining the early retirement benefit, the plan imposes the section 415 limits only on the early retirement benefit (not on the normal retirement benefit before applying the early retirement reduction factors). In such a

plan, a participant with a normal retirement benefit (before limitation by section 415) in excess of the section 415 limits will receive a subsidized early retirement benefit, whereas a participant with a lower normal retirement benefit will not. Thus, such a benefit would be a nonproportional subsidy if the group of individuals who are limited by the limitations under section 415 do not, by themselves, constitute a cross section of employees that could satisfy section 410(b).

T–28 Q. For purposes of determining the present value of accrued benefits in either a defined benefit or defined contribution plan, are the accrued benefits attributable to employee contributions considered to be part of the accrued benefits?

A. The accrued benefits attributable to employee contributions are considered to be part of the accrued benefits without regard to whether such contributions are mandatory or voluntary. However, the amounts attributable to deductible employee contributions (as defined in section 72(*o*)(5)(A)) are not considered to be part of the accrued benefits.

T–29 Q. How are plans described in section 401(k) treated for purposes of the top-heavy rules?

A. No special top-heavy rules are provided for plans described in section 401(k), except a transitional rule. For plan years beginning after December 31, 1984, amounts which an employee elects to defer are treated as employer contributions for purposes of determining minimum required contributions under section 416(c)(2). However, for plan years beginning prior to January 1, 1985, amounts which an employee elects to have contributed to a plan described in section 401(k) are not treated as employer contributions for these purposes. A plan described in section 401(k) which is top-heavy must provide minimum contributions by the employer and limit the amount of compensation which can be taken into account in providing benefits under the plan.

T–30 Q. What distributions are added to the present value of accrued benefits in determining whether a plan is top-heavy for a particular plan year?

A. Under section 416(g)(3)(A), distributions made within the plan year that includes the determination date and within the four preceding plan years are added to the present value of accrued benefits of key employees and non-key employees in testing for top-heaviness. However, in the case of distributions made after the valuation date and prior to the determination date, such distributions are not included as distributions in section 416(g)(3)(A) to the extent that such distributions are included in the present value of the accrued benefits as of the valuation date. In the case of the distribution of an annuity contract, the amount of such distribution is deemed to be the current actuarial value of the contract, determined on the date of the distribution. Certain distributions that are rolled over by the employee are not included as distributions. See Question and Answer T–32. A distribution will not fail to be considered in determining the present value of accrued benefits merely because it was made before the effective date of section 416. For purposes of this question and answer, distributions mean all distributions made by a plan, including all distributions of employee contributions made during and before the plan year.

T–31 Q. Are benefits paid on account of death treated as distributions for purposes of section 416(g)(3)?

A. Benefits paid on account of death are treated as distributions for purposes of section 416(g)(3) to the extent such benefits do not exceed the present value of accrued benefits existing immediately prior to death; benefits paid on account of death are not treated as distributions for purposes of section 416(g)(3) to the extent such benefits exceed the present value of accrued benefits existing immediately prior to death. The distribution from a defined contribution plan (including the cash value of life insurance policies) of a participant's account balance on account of death will be treated as a distribution for purposes of section 416(g)(3).

T–32 Q. How are rollovers and plan-to-plan transfers treated in testing whether a plan is top-heavy?

A. The rules for handling rollovers and transfers depend upon whether they are unrelated (both initiated by the employee and made from a plan maintained by one employer to a plan maintained by another employer) or related (a rollover or transfer either not initiated by the employee or made to a plan maintained by the same employer). Generally, a rollover or transfer made incident to a merger or consolidation of two or more plans or the division of a single plan into two or more plans will not be treated as being initiated by the employee. The fact that the employer initiated the distribution does not mean that the rollover was not initiated by the employee. For purposes of determining whether two employers are to be treated as the same employer, all employers aggregated under section 414(b), (c) or (m) are treated as the same employer. In the case of unrelated

rollovers and transfers, (1) the plan making the distribution or transfer is to count the distribution as a distribution under section 416(g)(3), and (2) the plan accepting the rollover or transfer is not to consider the rollover or transfer as part of the accrued benefit if such rollover or transfer was accepted after December 31, 1983, but is to consider it as part of the accrued benefit if such rollover or transfer was accepted prior to January 1, 1984. In the case of related rollovers and transfers, the plan making the distribution or transfer is not to count the distribution or transfer under section 416(g)(3) and the plan accepting the rollover or transfer counts the rollover or transfer in the present value of the accrued benefits. Rules for related rollovers and transfers do not depend on whether the rollover or transfer was accepted prior to January 1, 1984.

T–33 Q. How are the aggregate defined benefit and defined contribution limits under section 415(e) affected by the top-heavy rules?

A. Section 416(h) modifies the aggregate limits in section 415(e) for super top-heavy plans and for top-heavy plans that are not super top-heavy but do not provide for an additional minimum contribution or benefit. A plan is a super top-heavy plan if the present value of accrued benefits for key employees exceeds 90% of the present value of the accrued benefits for all employees. In the case of a top-heavy aggregation group, the test is applied to all plans in the group as a whole. These present values are computed using the same rules as are used for determining whether the plan is top-heavy. In the case of a super top-heavy plan, in computing the denominators of the defined benefit and defined contribution fractions under section 415(e), a factor of 1.0 is used instead of 1.25 for all employees. In the case of a top-heavy plan that is not super top-heavy, the same rule applies unless each non-key employee who is entitled to a minimum contribution or benefit receives an additional minimum contribution or benefit. In the case of a defined benefit plan, the additional minimum benefit is one percentage point (up to a maximum of ten percentage points) for each year of service described in Question and Answer M–2 of the participant's average compensation for the years described in Question and Answer M–2. In the case of a defined contribution plan, the additional minimum contribution is one percent of the participant's compensation. If a plan does not provide the applicable additional one percent minimum or if a plan is super top-heavy, the factor of 1.25 may be used for an individual only if there are both no further accruals for that individual under any defined benefit plan and no further annual additions for that individual under any defined contribution plan until the combined fraction satisfies the rules of section 415(e) using the 1.0 factor for that individual. The rules contained in this Question and Answer apply for each limitation year that contains any portion of a plan year for which the plan is top-heavy. This Question and Answer may be illustrated by the following example:

Example. A Corporation maintains a profit-sharing plan and a defined benefit plan, and these plans constitute a required aggregation group. Both plans use the calendar year for the plan year and the limitation year under section 415. The plans were determined to be top-heavy for plan year 1986. The plans use the 1.25 factor under section 415(e), and non-key employees covered by both the profit-sharing and the defined benefit plan accrue, under the defined benefit plan, 3% of compensation for each year of service (up to a maximum of 30%). The plans become super top-heavy for the 1990 plan year. In order to satisfy section 415, no further accruals and no further annual additions may take place for any employee covered by both plans until the combined defined benefit-defined contribution fraction for such employee is less than 1.0, using the 1.0 factor in place of 1.25.

T–34 Q. May plans be permissively aggregated to avoid being super top-heavy?

A. Yes, plans may be permissively aggregated to avoid being super top-heavy.

T–35 Q. What provisions must be contained in a plan to comply with the top-heavy requirements?

A. Section 401(a)(10)(B) provides that a plan will qualify only if it contains provisions which will take effect if the plan becomes top-heavy and which meet the requirements of section 416. See Questions and Answers T–39 and T–40 for rules on what provisions must be included. Under section 401(a)(10)(B)(ii), regulations may waive this requirement for some plans. See Question and Answer T–38 for a description of plans that need not include such provisions.

T–36 Q. For an employer who has no employee who has participated or is eligible to participate in both a defined benefit and defined contribution plan (or a simplified employee pension, "SEP") of that employer, what provisions must be in the plan(s) to comply with the top-heavy requirements?

A. (a) If the defined benefit plan has no participants who are or could be participants in a defined contribution plan of the employer (or vice versa), the defined benefit plan (or defined contribution plan) need not include provisions describing the defined benefit or defined contribution fractions for purposes of section 415 and, thus, the plan need not contain provisions to determine

whether the plan is super top-heavy or to change any plan provisions if the plan becomes super top-heavy. Furthermore, if the plan contains a single benefit structure that satisfies the requirements of section 416(b), (c), and (d) for each plan year without regard to whether the plan is top-heavy for such year, the plan need not include separate provisions to determine whether the plan is top-heavy or that apply if the plan is top-heavy. If the plan's single benefit structure does not assure that section 416(b), (c), and (d) will be satisfied in all cases, then the plan must include three types of provisions.

(b) First, the plan must contain provisions describing how to determine whether the plan is top-heavy. These provisions must include (1) the criteria for determining which employees are key employees (or non-key employees), (2) in the case of a defined benefit plan, the actuarial assumptions and benefits considered to determine the present value of accrued benefits, (3) a description of how the top-heavy ratio is computed, (4) a description of what plans (or types of plans) will be aggregated in testing whether the plan is top-heavy, and (5) a definition of the determination date and the valuation date applicable to the determination date. These determinations must be based on standards that are uniformly and consistently applied and that satisfy the rules set forth in section 416 and these Questions and Answers. The provisions in (1) and (3) above may be incorporated in the plan by reference to the applicable sections of the Internal Revenue Code without adversely affecting the qualification of the plan. However, the plan must state the definition of compensation for purposes of determining who is a key employee.

(c) Second, the plan must specifically contain the following provisions that will become effective if the plan becomes top-heavy: vesting that satisfies the minimum vesting requirements of section 416(b), benefits that will not be less than the minimum benefits set forth in section 416(c), and the compensation limitation described in section 416(d). The compensation limitation described in section 416(d) may be incorporated by reference. If a plan always meets the requirements of either section 416(b), (c) or (d), the plan need not include additional provisions to meet any such requirements.

(d) Third, the plan must include provisions insuring that any change in the plan's benefit structure (including vesting schedules) resulting from a change in the plan's top-heavy status will not violate section 411(a)(10). Thus, if a plan ceases being top-heavy, certain restrictions apply with respect to the change in the applicable vesting schedule.

T–37 Q. For an employer who maintains or has maintained both a defined benefit and a defined contribution plan (or a simplified employee pension, "SEP") and some participants do or could participate in both types of plan, what provisions must be in the plans to comply with the top-heavy requirements?

A. If an employer maintains (or has maintained) both a defined benefit plan and a defined contribution plan (or SEP), and the plans have or could have participants who participate in both types of plans, then the plans must contain more provisions than those described in Question and Answer T–36. First, the plans may exclude rules to determine whether the plan is top-heavy (or to apply when the plan is top-heavy) only if both plans contain a single benefit structure that satisfies sections 416(b), (c), and (d) without regard to whether the plans are top-heavy. Second, unless the plans always satisfy the requirements of section 415(e) using the 1.0 factor in the defined benefit and defined contribution fractions as described in section 416(h)(i), the plans must include provisions similar to those in Question and Answer T–36 (for top-heavy) to determine whether the plan is super top-heavy and to satisfy section 416(h) if it is.

T–38 Q. Are any plans exempted from including top-heavy provisions?

A. Section 401(a)(10)(B) exempts governmental plans (as defined in section 414(d)) from the top-heavy requirements and provides that regulations may exempt certain plans from including the top-heavy provisions.

A plan need not include any top-heavy provisions if the plan: (1) is not top-heavy, and (2) covers only employees who are included in a unit of employees covered by a collective-bargaining agreement (if retirement benefits were the subject of good faith bargaining) or employees of employee representatives. The requirement set forth in section 7701(a)(46) must be met before an agreement will be considered a collective-bargaining agreement after March 31, 1984.

T–39 Q. Must ratios be computed each year to determine whether a plan is top-heavy?

A. No. In order to administer the plan, the plan administrator must know whether the plan is top-heavy. However, precise top-heavy ratios need not be computed every year. If, on examination, the Internal Revenue Service requests a demonstration as to whether the plan is top-heavy (or super top-heavy; see Question and Answer T–33)

the employer must demonstrate to the Service's satisfaction that the plan is not operating in violation of section 401(a)(10)(B). For purposes of any demonstration, the employer may use computations that are not precisely in accordance with this section but which mathematically prove that the plan is not top-heavy. For example, if the employer determined the present value of accrued benefits for key employees in a simplified manner which overstated that value, determined the present value for non-key employees in a simplified manner which understated that value, and the ratio of the key employee present value divided by the sum of the present values was less than 60 percent, the plan would not be considered top-heavy. This would be a sufficient demonstration because the simplified fraction could be shown to be greater than the exact fraction and, thus, the exact fraction must also be less than 60 percent.

Several methods that may be used to simplify the determinations are indicated below.

(1) If the top-heavy ratio, computed considering all the key employees and only some of the non-key employees, is less than 60 percent, then it is not necessary to accumulate employee data on the remaining non-key employees. Inclusion of additional non-key employees would only further decrease the ratio.

(2) If the number of key employees is known but the identity of the key employees is not known (i.e. if the only key employees are officers and the limit on officers is applicable), the numerator may be determined by using a hypothetical "worst case" basis. Thus, in the case of a defined benefit plan, if the numerator of the top-heavy ratio were determined assuming each key employee's present value of accrued benefits were equal to the maximum section 415 benefits at the age that would maximize such present value, that assumption would only overstate the present value of accrued benefits for key employees. Thus, if that ratio is less than 60 percent, the plan is not top-heavy and accurate data on the key employees need not be collected.

(3) If the employer has available present value of accrued benefit computations for key and non-key employees in a defined benefit plan, and these values differ from those that would be produced under Question and Answer T–25 only by inclusion of a withdrawal assumption, the present value for the key employees (but not the non-key employees) may be adjusted to a "worst case" value by dividing by the lowest possible probability of not withdrawing from plan participation before normal retirement age. If the top-heavy ratio based on this inflated key employee value is less than 60 percent, the present value need not be recomputed without the withdrawal assumption. The methods set forth in this answer may also be used to determine whether a plan is super top-heavy by inserting "90%" for "60%" in the appropriate places.

T–40 Q. Will a plan fail to qualify if it provides that the $200,000 maximum amount of annual compensation taken into account under section 416(d) for any plan year that the plan is top-heavy may be automatically increased in accordance with regulations under section 416?

A. No.

T–41 Q. If a plan provides benefits based on compensation in excess of $200,000 and the plan becomes top-heavy, must any accrued benefits attributable to this excess compensation be eliminated?

A. No. For any year that a plan is top-heavy, section 416(d) provides that compensation in excess of $200,000 must not be taken into account. However, a top-heavy plan may continue to provide for any benefits attributable to compensation in excess of $200,000 to the extent such benefits were accrued before the plan was top-heavy. Furthermore, section 411(d)(6) will be violated if any individual's pre-top-heavy benefit is reduced by either (1) a plan amendment adding the $200,000 restriction, or (2) an automatic change in the plan benefits structure imposing the $200,000 restriction due to the plan's becoming top-heavy.

T–42 Q. Under a top-heavy defined benefit plan, are the requirements of section 416(d) satisfied if the annual compensation of an employee taken into account to determine plan benefits is limited to the amount currently described in section 416(d) for years during which the plan is top-heavy but higher compensation is taken into account for years before the plan became top-heavy?

A. No. For the top-heavy plan to meet the requirements of section 416(d), compensation for all years, including years before the plan became top-heavy, that is taken into account to determine plan benefits must not exceed the amount currently described in section 416(d). However, if the accrued benefit as of the end of the last plan year before the plan became top-heavy (ignoring any plan amendments after that date) is greater than the accrued benefit determined by limiting compensation in accordance with section 416(d), that higher accrued benefit as of the end of the last plan year before the plan became top-heavy must

not be reduced. Providing such higher accrued benefit will not cause the plan to violate section 416(d).

T–43 Q. What happens to an individual who has ceased employment before a plan becomes top-heavy?

A. If an individual has ceased employment before a plan becomes top-heavy, such individual would not be required to receive any additional benefit accruals, contributions, or vesting, unless the individual returned to employment with the employer. See Questions and Answers V–3, M–4, and M–10. In addition, if the individual is receiving benefits based on annual compensation greater than $200,000, such benefits cannot be decreased.

V. Vesting Rules for Top-Heavy Plans

V–1 Q. What vesting must be provided under a top-heavy plan?

A. Under section 416(b), the accrued benefits attributable to employer contributions must be nonforfeitable in accordance with one of two statutory standards. Either such accrued benefits must be nonforfeitable after 3 years of service or the nonforfeitable portion of accrued benefits must be at least 20 percent after 2 years of service, 40 percent after 3 years of service, 60 percent after 4 years of service, 80 percent after 5 years of service, and 100 percent after 6 years of service. The accrued benefits attributable to employer contributions has the same meaning as under section 411(c) of the Code. As under section 411(a), the accrued benefits attributable to employee contributions must be nonforfeitable at all times.

V–2 Q. What service must be counted in determining vesting requirements?

A. All service required to be counted under section 411(a) must be counted for these purposes. All service permitted to be disregarded under section 411(a)(4) may similarly be disregarded under the schedules of section 416(b).

V–3 Q. What benefits must be subject to the minimum vesting schedule of section 416(b)?

A. All accrued benefits within the meaning of section 411(a)(7) must be subject to the minimum vesting schedule. These accrued benefits include benefits accrued before the effective date of section 416 and benefits accrued before a plan becomes top-heavy. However, when a plan becomes top-heavy, the accrued benefits of any employee who does not have an hour of service after the plan becomes top-heavy are not required to be subject to the minimum vesting schedule. Accrued benefits which have been forfeited before a plan becomes top-heavy need not vest when a plan becomes top-heavy.

V–4 Q. May a top-heavy plan provide a minimum eligibility requirement of the later of age 21 or the completion of 3 years of service and provide that all benefits are nonforfeitable when accrued?

A. Yes. For plan years which begin after December 31, 1984, a top-heavy plan may provide a minimum eligibility requirement of the later of age 21, or the completion of 3 years of service, and provide that all benefits are nonforfeitable when accrued. For plan years which begin before January 1, 1985, "25" may be substituted for "21" in the preceding sentence.

V–5 Q. What does nonforfeitable mean?

A. In general, nonforfeitable has the same meaning as in section 411(a). However, the minimum benefits required under section 416 (to the extent required to be nonforfeitable under section 416(b)) may not be forfeited under section 411(a)(3)(B) or (D). Thus, if benefits are suspended (ceased) during a period of reemployment, the benefit payable upon the subsequent resumption of payments must be actuarially increased to reflect the nonpayment of benefits during such period of re-employment.

V–6 Q. Will a class-year plan automatically satisfy the minimum vesting requirements in section 416(b) if it provides that contributions with respect to any plan year become nonforfeitable no later than the end of the third plan year following the plan year for which the contribution was made?

A. No. Although this vesting schedule is similar to the 3-year minimum vesting schedule permitted by section 416(b)(1)(A), it does not satisfy that minimum. The 3-year vesting schedule in section 416(b)(1)(A) requires that, after completion of 3 years of service, the entire accrued benefit of a participant be nonforfeitable. Under the class-year vesting schedule described above, a portion of a participant's accrued benefit (that portion attributable to contributions for the prior 3 years) is forfeitable regardless of the participant's years of service.

V–7 Q. When a top-heavy plan ceases to be a top-heavy, may the vesting schedule be altered to a vesting schedule permitted without regard to section 416?

A. When a top-heavy plan ceases to be top-heavy, the vesting schedule may be changed to one that would otherwise be permitted. However, in changing the vesting schedule, the rules described in section 411(a)(10) apply. Thus, the nonforfeit-

able percentage of the accrued benefit before the plan ceased to be top-heavy must not be reduced; also, any employee with five or more years of service must be given the option of remaining under the prior (i.e., top-heavy) vesting schedule.

M. Minimum Benefits under Top-heavy Plans

M–1 Q. Which employees must receive minimum contributions or benefits in a top-heavy plan?

A. Generally, every non-key employee who is a participant in a top-heavy plan must receive minimum contributions or benefits under such plan. However, see Questions and Answers M–4 and M–10 for certain exceptions. Different minimums apply for defined benefit and defined contribution plans.

M–2 Q. What is the defined benefit minimum?

A. (a) The defined benefit minimum requires that the accrued benefit at any point in time must equal at least the product of (i) an employee's average annual compensation for the period of consecutive years (not exceeding five) when the employee had the highest aggregate compensation from the employer and (ii) the lesser of 2% per year of service with the employer or 20%.

(b) For purposes of the defined benefit minimum, years of service with the employer are generally determined under the rules of section 411(a)(4), (5) and (6). However, a plan may disregard any year of service if the plan was not top-heavy for any plan year ending during such year of service, or if the year of service was completed in a plan year beginning before January 1, 1984.

(c) In determining the average annual compensation for a period of consecutive years during which the employee had the largest aggregate compensation, years for which the employee did not earn a year of service under the rules of section 411(a)(4), (5), and (6) are to be disregarded. Thus, if an employee has received compensation from the employer during years one, two, and three, and for each of these years the employee earned a year of service, then the employee's average annual compensation is determined by dividing the employee's aggregate compensation for these three years by three. If the employee fails to earn a year of service in the next year, but does earn a year of service in the fifth year, the employee's average annual compensation is calculated by dividing the employee's aggregate compensation for years one, two, three, and five by four. The compensation required to be taken into account is the compensation described in Question and Answer T–21. In addition, compensation received for years ending in plan years beginning before January 1, 1984, and compensation received for years beginning after the close of the last plan year in which the plan is top-heavy may be disregarded.

(d) The defined benefit minimum is expressed as a life annuity (with no ancillary benefits) commencing at normal retirement age. Thus, if post-retirement death benefits are also provided, the 2% minimum annuity benefit may be adjusted. (See Question and Answer M–3.) The 2% minimum annuity benefit may not be adjusted due to the provision of pre-retirement ancillary benefits. Normal retirement age has the same meaning as under section 411(a)(8).

(e) Any accruals of employer-derived benefits, whether or not attributable to years for which the plan is top-heavy, may be used to satisfy the defined benefit minimums. Thus, if a non-key employee had already accrued a benefit of 20 percent of final average pay at the time the plan became top-heavy, no additional minimum accruals are required (although the accrued benefit would increase as final average pay increased). Accrued benefits attributable to employee contributions must be ignored. Accrued benefits attributable to employer and employee contributions have the same meaning as under section 411(c).

M–3 Q. What defined benefit minimum must be received if an employee receives a benefit in a form other than a single life annuity or a benefit other than at normal retirement age?

A. If the form of benefit is other than a single life annuity, the employee must receive an amount that is the actuarial equivalent of the minimum single life annuity benefit. If the benefit commences at a date other than at normal retirement age, the employee must receive at least an amount that is the actuarial equivalent of the minimum single life annuity benefit commencing at normal retirement age. Thus, the employee may receive a lower benefit if the benefit commences before the normal retirement age and the employee must receive a higher benefit if the benefit commences after the normal retirement age. No specific actuarial assumptions are mandated providing different actuarial equivalents. However, the assumptions must be reasonable.

M–4 Q. Which employees must accrue a minimum benefit in a top-heavy defined benefit plan?

A. Each non-key employee who is a participant in a top-heavy defined benefit plan and who

has at least one thousand hours of service (or equivalent service as determined under Department of Labor regulations, 29 CFR 2530.200b–3) for an accrual computation period must accrue a minimum benefit in a top-heavy defined benefit plan for that accrual computation period. If the accrual computation period does not coincide with the plan year, a minimum benefit must be provided, if required, for both accrual periods within the top-heavy plan year. For a top-heavy plan that does not base accruals on accrual computation periods, minimum benefits must be credited for all periods of service required to be credited for benefit accrual. (See § 1.410(a)–7). A non-key employee may not fail to accrue a minimum benefit merely because the employee was not employed on a specified date. Similarly, a non-key employee may not fail to accrue a minimum benefit because either (1) an employee is excluded from participation (or accrues no benefit) merely because the employee's compensation is less than a stated amount, or (2) the employee is excluded from participation (or accrues no benefit) merely because of a failure to make mandatory employee contributions.

M–5 Q. Would the defined benefit minimum be satisfied if the plan provides a normal retirement benefit equal to the greater of the plan's projected formula or the projected minimum benefit and if benefits accrue in accordance with the fractional rule described in section 411(b)(1)(C)?

A. No. The fact that this fractional rule would not satisfy the defined benefit minimum may be illustrated by the following example. Consider a non-key employee, age 25, entering a top-heavy plan in which the projected minimum for the employee is greater than the projected benefit under the normal formula. Under the fractional rule, the employee's accrued benefit ten years later at age 35 would be 5% (20% × ($^{10}/_{40}$)). Under section 416, the employee's minimum accrued benefit after ten years of service must be at least 20%. Thus, because the 5% benefit is less than the 20% benefit required under section 416, such benefit would not satisfy the required minimum.

M–6 Q. What benefit must an employer provide in a top-heavy defined benefit employee pay-all plan?

A. The defined benefit minimum in an employee pay-all top-heavy plan is the same as that for a plan which has employer contributions. That is, the employer must provide the benefits specified in Question and Answer M–2.

M–7 Q. What is the defined contribution minimum?

A. The sum of the contributions and forfeitures allocated to the account of any non-key employee who is a participant in a top-heavy defined contribution plan must equal at least 3% of such employee's compensation (see Question and Answer T–21 for the definition of compensation) for that plan year or for the calendar year ending within the plan year. However, a lower minimum is permissible where the largest contribution made or required to be made for key employees is less than 3%. The preceding sentence does not apply to any plan required to be included in an aggregation group if such plan enables a defined benefit plan required to be included in such group to meet the requirements of section 401(a)(4) or 410. The contribution made or required to be made on behalf of any key employee is equal to the ratio of the sum of the contributions made or required to be made and forfeitures allocated for such key employee divided by the compensation (not in excess of $200,000) for such key employee. Thus, the defined contribution minimum that must be provided for any non-key employee for a top-heavy plan year is the largest percentage of compensation (not in excess of $200,000) provided on behalf of any key employee for that plan year (if the largest percentage of compensation provided on behalf of any key employee for that plan year is less than 3%).

M–8 Q. If an employer maintains two top-heavy defined contribution plans, must both plans provide the defined contribution minimum for each non-key employee who is a participant in both plans?

A. No. If one of the plans provides the defined contribution minimum for each non-key employee who participates in both plans, the other plan need not provide an additional contribution for such employees. However, the other plan must provide the vesting required by section 416(b) and must limit compensation (based on all compensation from all aggregated employers) in providing benefits as required by section 416(d).

M–9 Q. In the case of the waiver of minimum funding standards of section 412(d), how does section 416 treat the defined contribution minimum?

A. For purposes of determining the contribution that is required to be made on behalf of a key employee, a waiver of the minimum funding requirements is disregarded. Thus, if a defined contribution plan receives a waiver of the minimum funding requirement, and if the minimum contribution required under the plan without re-

gard to the waiver exceeds 3%, the exception described in Question and Answer M-7 does not apply even though no key employee receives a contribution in excess of 3% and even though the amount required to be contributed on behalf of the key employee has been waived. Also, a waiver of the minimum funding requirements will not alter the requirements of section 416. Thus, in the case of the top-heavy defined contribution plan in which the non-key employee must receive an allocation, a waiver of the minimum funding requirements may eliminate a funding violation and such waiver will preclude a violation under section 416 even though the required contribution is not made. However, the adjusted account balance (as described in Rev.Rul. 78-223, 1978-1 C.B. 125) of the non-key employees must reflect the required minimum contribution even though such contribution was not made.

M-10 Q. Which employees must receive the defined contribution minimum?

A. Those non-key employees who are participants in a top-heavy defined contribution plan who have not separated from service by the end of the plan year must receive the defined contribution minimum. Non-key employees who have become participants but who subsequently fail to complete 1,000 hours of service (or the equivalent) for an accrual computation period must receive the defined contribution minimum. A non-key employee may not fail to receive a defined contribution minimum because either (1) the employee is excluded from participation (or accrues no benefit) merely because the employee's compensation is less than a stated amount, or (2) the employee is excluded from participation (or accrues no benefit) merely because of a failure to make mandatory employee contributions or, in the case of a cash or deferred arrangement, elective contributions.

M-11 Q. May either the defined benefit minimum or the defined contribution minimum be integrated with social security?

A. No.

M-12 Q. What minimum contribution or benefit must be received by a non-key employee who participates in a top-heavy plan?

A. In the case of an employer maintaining only one plan, if such plan is a defined benefit plan, each non-key employee covered by that plan must receive the defined benefit minimum. If such plan is a defined contribution plan (including a target benefit plan), each non-key employee covered by the plan must receive the defined contribution minimum. In the case of an employer who maintains more than one plan, employees covered under only the defined benefit plan must receive the defined benefit minimum. Employees covered under only the defined contribution plan must receive the defined contribution minimum. In the case of employees covered under both defined benefit and defined contribution plans, the rules are more complicated. Section 416(f) precludes, in the case of employees covered under both defined benefit and defined contribution plans, either required duplication or inappropriate omission. Therefore, such employees need not receive both the defined benefit and the defined contribution minimums.

There are four safe harbor rules a plan may use in determining which minimum must be provided to a non-key employee who is covered by both defined benefit and defined contribution plans. Since the defined benefit minimums are generally more valuable, if each employee covered under both a top-heavy defined benefit plan and a top-heavy defined contribution plan receives the defined benefit minimum, the defined benefit and defined contribution minimums will be satisfied. Another approach that may be used is a floor offset approach (see Rev.Rul. 76-259, 1976-2 C.B. 111) under which the defined benefit minimum is provided in the defined benefit plan and is offset by the benefits provided under the defined contribution plan. Another approach that may be used in the case of employees covered under both defined benefit and defined contribution plans is to prove, using a comparability analysis (see Rev.Rul. 81-202, 1981-2 C.B. 93) that the plans are providing benefits at least equal to the defined benefit minimum. Finally, in order to preclude the cost of providing the defined benefit minimum alone, the complexity of a floor offset plan and the annual fluctuation of a comparability analysis, a safe haven minimum defined contribution is being provided. If the contributions and forfeitures under the defined contribution plan equal 5% of compensation for each plan year the plan is top-heavy, such minimum will be presumed to satisfy the section 416 minimums.

M-13 Q. An employer maintains a defined benefit plan and a profit-sharing plan. Both plans are top-heavy and are members of a required aggregation group. In order to meet the minimum contribution/minimum benefit requirements, the employer decides to contribute 5% of compensation to the profit-sharing plan. What happens if for a particular plan year there are no profits out of which to make contributions to the profit-sharing plan?

A. In this particular situation, in order to satisfy the requirements of section 416(c), the employer must provide the defined contribution minimum, 5% of compensation. This rule is an exception to the general rule that an employer cannot make a contribution to a profit-sharing plan if there are no profits. Alternatively, the employer may provide the defined benefit minimum for this year.

M–14 Q. What minimum contribution or benefit must be received by a non-key employee when he is covered under both a defined benefit plan and defined contribution plan (both of which are top-heavy) of an employer and the employer desires to use a factor of 1.25 in computing the denominators of the defined benefit and defined contribution fractions under section 415(e)?

A. In this particular situation, the employer may use one of the four rules set forth in Question and Answer M–12, subject to the following modifications. The defined benefit minimum must be increased by one percentage point (up to a maximum of ten percentage points) for each year of service described in Question and Answer M–2 of the participant's average compensation for the years described in Question and Answer M–2. The defined contribution minimum is increased to 7½ percent of compensation. If the floor offset or comparability analysis approach is used, the defined benefit minimum must be increased by one percentage point (up to a maximum of ten percentage points) for each year of service described in Question and Answer M–2 of the participant's average compensation for the years described in Question and Answer M–2.

M–15 Q. May an employer use a different method each year to meet the requirements of Question and Answer M–12 or Question and Answer M–14 without amending the plans each year?

A. No. An employer must set forth in the plan document the method he will use to meet the requirements of Question and Answer M–12 or M–14, as the case may be. If an employer desires to change the method, the plan document must be amended.

M–16 Q. Will target benefit plans be treated as defined benefit or defined contribution plans for purposes of the top-heavy rules?

A. Target benefit plans will be treated as defined contribution plans for purposes of the top-heavy rules.

M–17 Q. Can a plan described in section 412(i) (funded exclusively by level premium insurance contracts) also satisfy the minimum benefit requirements of section 416?

A. The accrued benefits provided for a non-key employee under most level premium insurance contracts might not provide a benefit satisfying the defined benefit minimum because of the lower cash values in early years under most level premium insurance contracts, and because such contracts normally provide for level premiums until normal retirement age. However, a plan will not be considered to violate the requirements of section 412(i) merely because it funds certain benefits through either an auxiliary fund or deferred annuity contracts, if the following conditions are met:

(1) The targeted benefit at normal retirement age under the level premium insurance contract is determined, taking into account the defined benefit minimum that would be required assuming the current top-heavy (or non top-heavy) status of the plan continues until normal retirement age; and

(2) The benefits provided by the auxiliary fund or deferred annuity contracts do not exceed the excess of the defined benefit minimum benefits over the benefits provided by the level premium insurance contract.

If the above conditions are satisfied, then the plan is still exempt from the minimum funding requirements under section 412 and may still utilize the special accrued benefit rule in section 411(b)(1)(F) subject to the following modifications: Although the portion of the plan funded by the level premium annuity contract is exempt from the minimum funding requirements, the portion funded by an auxiliary fund is subject to those requirements. (Thus, a funding standard account must be maintained and a Schedule B must be filed with the annual report). The accrued benefit for any participant may be determined using the rule in section 411(b)(1)(F) but must not be less than the defined benefit minimum.

[T.D. 7997, 49 FR 50646, Dec. 31, 1984]

§ 1.417(e)–1 Restrictions and valuations of distributions from plans subject to sections 401(a)(11) and 417.

(a) **Scope—(1) In general.** A plan does not satisfy the requirements of sections 401(a)(11) and 417 unless it satisfies the consent requirements, the determination of present value requirements and the other requirements set forth in this section. See section 401(a)(11) and § 1.401(a)-11A for other rules regarding the survivor annuity requirements.

(2) Additional requirements. See § 1.411(a)(11)-1(c)(6) for other rules applicable to the consent requirements.

(3) Accrued benefit. The definition of "accrued benefit" in § 1.411(a)(11)-1 applies when that term is used in this section.

(b) Consent, etc. requirements—(1) General rule. Generally plans may not commence the distribution of any portion of a participant's accrued benefit in any form unless the applicable consent requirements are satisfied. No consent of the participant or spouse is needed for distribution of a QJSA or QPSA after the benefit is no longer immediately distributable (after the participant attains (or would have attained if not dead) the later of normal retirement age (as defined in section 411(a)(8)) or age 62). No consent of the spouse is needed for distribution of a QJSA at any time. After the participant's death, a benefit may be paid to a nonspouse beneficiary without the beneficiary's consent. A distribution cannot be made at any time in a form other than a QJSA unless such QJSA has been waived by the participant and such waiver has been consented to by the spouse. A QJSA is an annuity that commences immediately. Thus, for example, a plan may not offer a participant separating from service at age 45 a choice only between a single sum distribution at separation of service and a joint and survivor annuity that satisfies all the requirements of a QJSA except that it commences at normal retirement age rather than immediately. To satisfy this section, the plan must also offer a QJSA (i.e., an annuity that satisfies all the requirements for a QJSA including the requirement that it commences immediately).

(2) Consent. (i) Written consent of the participant and, if the participant is married at the annuity starting date and the benefit is to be paid in a form other than a QJSA, the participant's spouse (or, if either the participant or the spouse has died, the survivor) is required before the commencement of the distribution of any part of an accrued benefit if the present value of the nonforfeitable benefit is greater than $3,500. No consent is valid unless the participant has received a general description of the material features, and an explanation of the relative values of, the optional forms of benefit available under the plan in a manner which would satisfy the notice requirements of section 417(a)(3). See § 1.401(a)-20 Q&A 36. No consent is required before the annuity starting date if the present value of the nonforfeitable benefit is not more than $3,500. If the present value of the accrued benefit at the time of any distribution exceeds $3,500, the present value of the accrued benefit at any subsequent time will be deemed to exceed $3,500.

(ii) In determining the present value of any nonforfeitable accrued benefit, a defined benefit plan is limited by the interest rate restriction as set forth in paragraph (d) of this section.

(3) Time of consent. A plan must provide participants with the written explanation of the QJSA required by section 417(a)(3) no less than 30 days and no more than 90 days before the annuity starting date. Written consent of the participant and the participant's spouse to the distribution must be made not more than 90 days before the annuity starting date.

(c) Permitted distributions. A plan may not require that a participant or surviving spouse begin to receive benefits without satisfying paragraph (b) of this section while such benefits are immediately distributable (see paragraph (b)(1) of this section). Once benefits are no longer immediately distributable, all benefits that the plan requires to begin must be provided in the form of a QJSA and QPSA unless the applicable written explanation, election and consent requirement of section 417 are satisfied.

(d) Present value requirement—(1) Requirements. For purpose of determining the present value of any accrued benefit and for purposes of determining the amount (subject to sections 411(c)(3) and 415) of any distribution including a single sum, a defined benefit plan is subject to the interest rate limitations described in subparagraph (2) of this paragraph (d) at the time set forth in subparagraph (3) of this paragraph (d). A plan amendment that changes the rate described in this paragraph (d) is subject to section 411(d)(6). The present value of any optional form of benefit cannot be less than the present value of the normal retirement benefit determined in accordance with this paragraph.

(2) Section 417 interest rate. The section 417 interest rate is (i) the rate or rates that would be used by the Pension Benefit Guaranty Corporation (PBGC) for a trusteed single-employer plan to value the participant's (or beneficiary's) vested benefit ("applicable interest rate") if the present value of such benefit does not exceed $25,000 and (ii) 120 percent of the applicable interest rate, as determined in accordance with (i) above, if such present value exceeds $25,000. In no event shall the present value determined by use of 120 percent of the applicable interest rate result in a present value less than $25,000. The applicable interest

rate may be a series of interest rates for any given date. For example, the applicable rate could be X percent for the first 5 years over which the benefits are valued, Y percent for the next succeeding 10 years and Z percent for the following years. In such case, 1.20 percent of the applicable interest rate would be 1.20 times X percent, 1.20 times Y percent and 1.20 times Z percent over the years described above. The applicable interest rates are the interest rates that would be used (as of the date of the distribution) by the PBGC for purposes of determining the present value of that benefit upon termination of an insufficient trusteed single-employer plan. Except as otherwise provided by the Commissioner, the applicable interest rates are determined by PBGC regulations. See 29 CFR Part 2619 for the applicable PBGC rates.

(3) Time for determining interest rate. (i) Except as provided in subdivision (ii), the section 417 interest rate limitations are determined on either the annuity starting date or the first day of the plan year that contains the annuity starting date. The plan must provide which date is applicable.

(ii) The plan may provide for the use of any other time for determining the interest rate provided that such time is not more than 120 days before the annuity starting date if such time is determined in a consistent manner and is applied uniformly to all participants.

(iii) The Commissioner may in revenue rulings, notices or other documents of general applicability prescribe other times for determining the section 417 interest rate limitations.

(iv) If a plan amendment changes the time for determining the section 417 interest rate, the amendment will not be treated as reducing an accrued benefit if the conditions of this subdivision (iv) are satisfied. Any distribution in the one-year period commencing at the time the plan amendment is effective (if the amendment is effective on or after the adoption date) must use the rate determined under the plan, either before or after the amendment, that results in the larger accrued benefit. If the plan amendment is adopted retroactively (that is, the amendment is effective prior to the adoption date), the plan must use the rate resulting in the larger accrued benefit for the period beginning with the effective date and ending one year after the adoption date.

(4) Determination of interest rates. (i) In the case of a defined benefit plan that uses a rate or rates in addition to the section 417 interest rate, the rate producing the greatest benefit must be used.

(ii) The same interest rate that is required to be used by the plan under this paragraph (d) to determine the amount of benefit must also be used to compute the present value of the benefit for purposes of determining whether consent for a distribution is required under paragraph (b) of this section.

(iii) **Example.** A qualified defined benefit plan provides that single sum distributions received on or before normal retirement age are to be determined using the lower of the rate(s) of interest guaranteed under a particular annuity contract of an unrelated insurance company or the applicable section 417 rates. The rates of interest guaranteed under the annuity contract are 10% for the first 5 years, 7.5% for the next 10 and 5% thereafter while the applicable section 417 interest rates would be 8% and 120% of such rate would be 9.6%. Because in some years over which a benefit is valued the interest rate under the PBGC rates would be the lower rate while in other years it would be the higher rate, the rate that must be used is the one that results in the greater plan benefit.

(5) Exceptions. This paragraph (d) (other than the reference to section 411(d)(6) requirements) does not apply to the amount of a distribution under a nondecreasing annuity payable for a period not less than the life of the participant or, in the case of a QPSA, the life of the surviving spouse. A nondecreasing annuity includes a QJSA, QPSA and an annuity that decreases merely because of the cessation or reduction of Social Security supplements or qualified disability payments (as defined in section 411(a)(9)).

(6) Defined contribution plans. Because the accrued benefit in a defined contribution plan equals the account balance, such plans are not subject to the interest rate requirements of this paragraph (d), even though they are subject to section 401(a)(11).

(e) Special rules for annuity contracts—(1) General rule. Any annuity contract purchased by a plan subject to section 401(a)(11) and distributed to or owned by a participant must provide that benefits under the contract are provided in accordance with the applicable consent, present value, and other requirements of sections 401(a)(11) and 417 applicable to the plan.

(f) Effective dates—(1) Annuity contracts. (i) Paragraph (e) of this section does not apply to contracts distributed to or owned by a participant prior to September 17, 1985, unless additional contributions are made under the plan by the employer with respect to such contracts.

(ii) In the case of a contract owned by the employer or distributed to or owned by a participant prior to the first plan year beginning after December 31, 1988, paragraph (e) of this section

shall be satisfied if the annuity contracts described therein satisfy the requirements in §§ 1.401(a)-11T and 1.417(e)-1T. The preceding sentence shall not apply if additional contributions are made under the plan by the employer with respect to such contracts on or after the beginning of the first plan year beginning after December 31, 1988.

(2) Interest rates. (i) A plan that uses the PBGC immediate interest rate as required by § 1.417(e)-1T(e) for distributions commencing in plan years beginning before January 1, 1987, shall be deemed to satisfy paragraph (d) of this section for such years.

(ii) For a special exception to the requirements of section 411(d)(6) for certain plan amendments that incorporate applicable interest rates, see section 1139(d)(2) of the Tax Reform Act of 1986.

(3) Other effective dates and transitional rules. (i) Except as otherwise provided, a plan will be treated as satisfying sections 401(a)(11) and 417 for plan years beginning before the first plan year that the requirements of section 410(b) as amended by TRA 86 apply to such plan, if the plan satisfied the requirements in §§ 1.401(a)-11T and 1.417(e)-1T.

(ii) See § 1.401(a)-20 for other effective dates and transitional rules that apply to plans subject to sections 401(a)(11) and 417.

[T.D. 8219, 53 FR 31854, Aug. 22, 1988]

§ 1.419–1T Treatment of welfare benefit funds (temporary).

Q–1: What does section 419 of the Internal Revenue Code provide?

A–1: Section 419 prescribes limitations upon deductions for contributions paid or accrued with respect to a welfare benefit fund. Under section 419 (a) and (b), an employer's contributions to a welfare benefit fund are not deductible under section 162 (relating to trade or business expenses) or section 212 (relating to expenses for production of income) but, if the requirements of section 162 or 212 are otherwise met, are deductible under section 419 for the taxable year of the employer in which paid to the extent of the welfare benefit fund's qualified cost (within the meaning of section 419(c)(1)) for the taxable year of the fund that relates to such taxable year of the employer. Under section 419(g), section 419 and this section shall also apply to the deduction by a taxpayer of contributions with respect to a fund that would be a welfare benefit fund but for the fact that there is no employer-employee relationship between the person providing the services and the person for whom the services are provided. Contributions paid to a welfare benefit fund after section 419 becomes effective with respect to such contributions are deemed to relate, first, to amounts accrued and deducted (but not paid) by the employer with respect to such fund before section 419 becomes effective with respect to such contributions and thus shall not be treated as satisfying the payment requirement of section 419. See paragraph (b) of Q&A-5 for special deduction limits applicable to employer contributions to welfare benefit funds with excess reserves.

Q–2: When do the deduction rules of section 419, as enacted by the Tax Reform Act of 1984, become effective?

A–2: (a) Section 419 generally applies to contributions paid or accrued with respect to a welfare benefit fund after December 31, 1985, in taxable years of employers ending after that date. See Q&A-9 of this regulation for special rules relating to the deduction limit for the first taxable year of a fiscal year employer ending after December 31, 1985.

(b) In the case of a welfare benefit fund which is part of a plan maintained pursuant to one or more collective bargaining agreements (1) between employee representatives and one or more employers, and (2) that are in effect on July 1, 1985 (or ratified on or before such date), sections 419 shall not apply to contributions paid or accrued in taxable years beginning before the termination of the last of the collective bargaining agreements pursuant to which the plan is maintained (determined without regard to any extension thereof agreed to after July 1, 1985). For purposes of the preceding sentence, any plan amendment made pursuant to a collective bargaining agreement relating to the plan which amends the plan solely to conform to any requirement added under section 511 of the Tax Reform Act of 1984 (i.e., requirements under sections 419, 419A, 512(a)(3)(E), and 4976) shall not be treated as a termination of such collective bargaining agreement. See § 1.419A-2T for special rules relating to the application of section 419 to collectively bargained welfare benefit funds.

(c) Notwithstanding paragraphs (a) and (b), section 419 applies to any contribution of a facility to a welfare benefit fund (or other contribution, such as cash, which is used to acquire, construct, or improve such a facility) after June 22, 1984, unless such facility is placed in service by the fund before January 1, 1987, and either (1) is acquired or improved by the fund (or contributed to the fund)

pursuant to a binding contract in effect on June 22, 1984, and at all times thereafter, or (2) the construction of which was begun by or for the welfare benefit fund before June 22, 1984. See Q&A-11 of this regulation for special rules relating to the application of section 419 to the contribution of a facility to a welfare benefit fund (and to the contribution of other amounts, such as cash, used to acquire, construct, or improve such a facility) before section 419 generally becomes effective with respect to contributions to the fund.

Q–3. What is a "welfare benefit fund" under section 419?

A–3. (a) A "welfare benefit fund" is any fund which is part of a plan, or method or arrangement, of an employer and through which the employer provides welfare benefits to employees or their beneficiaries. For purposes of this section, the term "welfare benefit" includes any benefit other than a benefit with respect to which the employer's deduction is governed by section 83(h), section 404 (determined without regard to section 404(b)(2)), section 404A, or section 463.

(b) Under section 419(e)(3) (A) and (B), the term "fund" includes any organization described in section 501(c) (7), (9), (17) or (20), and any trust, corporation, or other organization not exempt from tax imposed by chapter 1, subtitle A, of the Internal Revenue Code. Thus, a taxable trust or taxable corporation that is maintained for the purpose of providing welfare benefits to an employer's employees is a "welfare benefit fund."

(c) Section 419(e)(3)(C) also provides that the term "fund" includes, to the extent provided in regulations, any account held for an employer by any person. Pending the issuance of further guidance, only the following accounts, and arrangements that effectively constitute accounts, as described below, are "funds" within section 419(e)(3)(C).

A retired lives reserve or a premium stabilization reserve maintained by an insurance company is a "fund," or part of a "fund," if it is maintained for a particular employer and the employer has the right to have any amount in the reserve applied against its future years' benefit costs or insurance premiums. Also, if an employer makes a payment to an insurance company under an "administrative services only" arrangement with respect to which the life insurance company maintains a separate account to provide benefits, then the arrangement would be considered to be a "fund." Finally, an insurance or premium arrangement between an employer and an insurance company is a "fund" if, under the arrangement, the employer has a right to a refund, credit, or additional benefits (including upon termination of the arrangement) based on the benefit or claims experience, administrative cost experience, or investment experience attributable to such employer. However, an arrangement with an insurance company is not a "fund" under the previous sentence merely because the employer's premium for a renewal year reflects the employer's own experience for an earlier year if the arrangement is both cancellable by the insurance company and cancellable by the employer as of the end of any policy year and, upon cancellation by either of the parties, neither of the parties can receive a refund or additional amounts or benefits and neither of the parties can incur a residual liability beyond the end of the policy year (other than, in the case of the insurer, to provide benefits with respect to claims incurred before cancellation). The determination whether either of the parties can receive a refund or additional amounts or benefits or can incur a residual liability upon cancellation of an arrangement will be made by examining both the contractual rights and obligations of the parties under the arrangement and the actual practice of the insurance company (and other insurance companies) with respect to other employers upon cancellation of similar arrangements. Similarly, a disability income policy does not constitute a "fund" under the preceding provisions merely because, under the policy, an employer pays an annual premium so that employees who became disabled in such year may receive benefit payments for the duration of the disability.

Q–4: For purposes of determining the section 419 limit on the employer's deduction for contributions to the fund for a taxable year of the employer, which taxable year of the welfare benefit fund is related to the taxable year of the employer?

A–4: The amount of an employer's deduction for contributions to a welfare benefit fund for a taxable year of the employer is limited to the "qualified cost" of the welfare benefit fund for the taxable year of the fund that is related to such taxable year of the employer. The taxable year of the welfare benefit fund that ends with or within the taxable year of the employer is the taxable year of the fund that is related to the taxable year of the employer. Thus, for example, if an employer has a calendar taxable year and it makes contributions to a fund having a taxable year ending June 30, the "qualified cost" of the fund for the taxable year of the fund ending on June 30, 1986, applies to limit the employer's deduction for contributions to the fund in the employer's 1986 taxable year.

In the case of employer contributions paid directly to an account or arrangement with an insurance company that is treated as a welfare benefit fund for the purposes of section 419, the policy year will be treated as the taxable year of the fund. See Q&A-7 of this regulation for special section 419 rules relating to the coordination of taxable years for the taxable year of the employer in which a welfare benefit fund is established and for the next following taxable year of the employer.

Q–5: What is the "qualified cost" of a welfare benefit fund for a taxable year under section 419?

A–5: (a) Under section 419(c), the "qualified cost" of a welfare benefit fund for a taxable year of the fund is the sum of: (1) The "qualified direct cost" of such fund for such taxable year of the fund, and (2) the amount that may be added to the qualified asset account for such taxable year of the fund to the extent that such addition does not result in a total amount of such account as of the end of such taxable year of the fund that exceeds the applicable account limit under section 419A(c). However, in calculating the qualified cost of a welfare benefit fund for a taxable year of the fund, this sum is reduced by the fund's "after-tax income" (as defined in section 419(c)(4)) for such taxable year of the fund. Also, the qualified cost of a welfare benefit fund is reduced further under the provisions of paragraph (b) of this Q&A.

(b)(1) Pursuant to section 419A(i), notwithstanding section 419 and § 1.419-1T, contributions to a welfare benefit fund during any taxable year of the employer beginning after December 31, 1985, shall not be deductible for such taxable year to the extent that such contributions result in the total amount in the fund as of the end of the last taxable year of the fund ending with or within such taxable year of the employer exceeding the account limit applicable to such taxable year of the fund (as adjusted under section 419A(f)(7)). Solely for purposes of this subparagraph, (i) contributions paid to a welfare benefit fund during the taxable year of the employer but after the end of the last taxable year of the fund that relates to such taxable year of the employer, and (ii) contributions accrued with respect to a welfare benefit fund during the taxable year of the employer or during any prior taxable year of the employer (but not actually paid to such fund on or before the end of a taxable year of the employer) and deducted by the employer for such or any prior taxable year of the employer, shall be treated as an amount in the fund as of the end of the last taxable year of the fund that relates to the taxable year of the employer. Contributions that are not deductible under this subparagraph are in excess of the qualified cost of the welfare benefit fund for the taxable year of the fund that relates to the taxable year of the employer and thus are treated as contributed to the fund on the first day of the employer's next taxable year.

(2) Paragraph (b)(1) of this section shall not apply to contributions with respect to a collectively bargained welfare benefit fund within the meaning of § 1.419A-2T. In addition, paragraph (b)(1) of this section shall not apply to any taxable year of an employer beginning after the end of the earlier of the following taxable years: (i) the first taxable year of the employer beginning after December 31, 1985, for which the employer's deduction limit under section 419 (after the application of paragraph (b)(1) of this section) is at least equal to the qualified direct cost of the fund for the taxable year (or years) of the fund that relates to such first taxable year of the employer, or (ii) the first taxable year of the employer beginning after December 31, 1985, with or within which ends the first taxable year of the fund with respect to which the total amount in the fund as of the end of such taxable year of the fund does not exceed the account limit for such taxable year of the fund (as adjusted under section 419A(f)(7)).

(3) For example, assume an employer with a taxable year ending June 30 and a welfare benefit fund with a taxable year ending January 31. During its taxable year ending June 30, 1987, and on or before January 31, 1987, the employer contributes $250,000 to the fund, and during the remaining portion of its taxable year ending June 30, 1987, the employer contributes $200,000. The qualified direct cost of the fund for its taxable year ending January 31, 1987, is $500,000, the account limit applicable to such taxable year (after the adjustment under section 419A(f)(7)) is $750,000, and the total amount in the fund as of January 31, 1987, is $800,000. Before the application of this paragraph, the employer may deduct the entire $450,000 contribution for its taxable year ending June 30, 1987. However, under this paragraph, the excess of (i) the sum of the total amount in the fund as of January 31, 1987 ($800,000), and employer contributions to the fund after January 31, 1987, and on or before June 30, 1987 ($200,000), over (ii) the account limit applicable to the fund for its taxable year ending January 31, 1987 ($750,000), is $250,000. Thus, under this paragraph, only $200,000 of the $450,000 contribution the employer made during its taxable year ending June 30, 1987, is deductible for such taxable year. If the excess were $450,000 or greater, no portion of the $450,000 contribution would be deductible

by the employer for its taxable year ending June 30, 1987. Such nondeductible contributions are in excess of the fund's qualified cost for the taxable year related to the employer's taxable year and thus are deemed to be contributed on the first day of the employer's next taxable year.

(c) See Q&A-7 of this regulation for special rules relating to the calculation of the qualified cost of a welfare benefit fund for an Initial Fund Year and an Overlap Fund Year (as defined in Q&A-7). See Q&A-11 of this regulation for special rules relating to the application of section 419 to the contribution to a welfare benefit fund of a facility (and to the contribution of other amounts, such as cash, used to acquire, construct, or improve a facility) before section 419 generally becomes effective with respect to contributions to the fund. See § 1.419A-2T for special rules relating to certain collectively bargained welfare benefit funds.

Q–6: What is the "qualified direct cost" of a welfare benefit fund under section 419(c)(3)?

A–6: (a) Under section 419(c)(3), the "qualified direct cost" of a welfare benefit fund for any taxable year of the fund is the aggregate amount which would have been allowable as a deduction to the employer for benefits provided by such fund during such year (including insurance coverage for such year) if (1) such benefits were provided directly by the employer and (2) the employer used the cash receipts and disbursements method of accounting and had the same taxable year as the fund. In this regard, a benefit is treated as provided when such benefit would be includible in the gross income of the employee if provided directly by the employer (or would be so includible but for a provision of chapter 1, subtitle A, of the Internal Revenue Code excluding it from gross income). Thus, for example, if a calendar year welfare benefit fund pays an insurance company in July 1986 the full premium for coverage of its current employees under a term health insurance policy for the twelve month period ending June 30, 1987, the insurance coverage will be treated as provided by the fund over such twelve month period. Accordingly, only the portion of the premium for coverage during 1986 will be treated as a "qualified direct cost" of the fund for 1986; the remaining portion of the premium will be treated as a "qualified direct cost" of the fund for 1987. The "qualified direct cost" for a taxable year of the fund includes the administrative expenses incurred by the welfare benefit fund in delivering the benefits for such year.

(b) If, in a taxable year of a welfare benefit fund, the fund holds an asset with a useful life extending substantially beyond the end of the taxable year (e.g., buildings, vehicles, tangible assets, and licenses) and, for such taxable year of the fund, the asset is used in the provision of welfare benefits to employees, the "qualified direct cost" of the fund for such taxable year of the fund includes the amount that would have been allowable to the employer as a deduction under the applicable Code provisions (e.g., sections 168 and 179) with respect to the portion of the asset used in the provision of welfare benefits for such year if the employer had acquired and placed in service the asset at the same time the fund received and placed in service the asset, and the employer had the same taxable year as the fund. This rule applies regardless of whether the fund received the asset through a contribution of the asset by the employer or through an acquisition or the construction by the fund of the asset. For example, assume that in 1986 a calendar year employer contributes recovery property under section 168(c) to a welfare benefit fund with a calendar taxable year to be used in the provision of welfare benefits. The employer will be treated as having sold the property in such year and thus will recognize gain to the extent that the fair market value of the property exceeds the employer's adjusted basis in the property. In this regard, see section 1239(d). Also, the employer will be treated as having made a contribution to the fund in such year equal to the fair market value of the property. Finally, the qualified direct cost of the welfare benefit fund for 1986 will include the amount that the employer could have deducted in 1986 with respect to the portion of the property used in the provision of welfare benefits if the employer had acquired the property in 1986 and had placed the property in service when the fund actually placed the property in service. Similarly, for example, assume that in 1986 a welfare benefit fund purchases and places in service a facility to be used in the provision of welfare benefits. The qualified direct cost of the fund for 1986 will include the amount that the employer could have deducted with respect to such facility if the employer had purchased and placed in service the facility at the same time that the fund purchased and placed in service the facility.

(c) The qualified direct cost of a welfare benefit fund does not include expenditures by the fund that would not have been deductible if they had been made directly by the employer. For example, a fund's purchase of land in a year for an employee recreational facility will not be treated as

a qualified direct cost because, if made directly by the employer, the purchase would not have been deductible under section 263. See also sections 264 and 274.

(d) Notwithstanding the preceding paragraphs, the qualified direct cost of a welfare benefit fund with respect to that portion of a child care facility used in the provision of welfare benefits for a year will include the amount that would have been allowable to the employer as a deduction for the year under a straight-line depreciation schedule for a period of 60 months beginning with the month in which the facility is placed in service under rules similar to those provided for section 188 property under § 1.188-1(a). For purposes of this section, a "child care facility" is tangible property of a character subject to depreciation that is located in the United States and specifically used as an integral part of a "qualified child care center facility" within the meaning of § 1.188-1(d)(4).

(e) See Q&A-7 of this regulation for special section 419 rules relating to the calculation of the qualified direct cost of a welfare benefit fund for an Initial Fund Year and an Overlap Fund Year (as defined in Q&A-7). See Q&A-11 of this regulation for special rules relating to the contribution to a welfare benefit fund of a facility (and to the contribution of other amounts, such as cash, used to acquire, construct, or improve a facility) before section 419 generally becomes effective with respect to contributions to the fund.

Q–7: What special rules apply for purposes of determining the section 419 limit on the employer's deduction for contributions to a welfare benefit fund for the taxable year of the employer in which the fund is established and for the next following taxable year of the employer?

A–7: (a) If the taxable year of a welfare benefit fund is the same as the taxable year of the employer, there are no special rules that apply for purposes of determining the section 419 limit on an employer's deduction for contributions to the fund for either the taxable year of the employer in which the fund is established or the next following taxable year of the employer. However, if the taxable year of a welfare benefit fund is different from the taxable year of the employer, the general section 419 rules are modified by the special rules set forth below for purposes of determining the section 419 deduction limit for the taxable year of the employer in which a fund is established and for the next following taxable year of the employer.

(b) If a welfare benefit fund is established after December 31, 1985, during a taxable year of an employer and either (i) the first taxable year of the fund ends after the close of such taxable year of the employer, or (ii) the first taxable year of the fund is six months or less and ends before the close of such taxable year of the employer and the second taxable year of the fund begins before and ends after the close of such taxable year of the employer, the taxable year of the fund that contains the closing day of such taxable year of the employer will be treated as an "Overlap Fund Year." For purposes of determining the limit on the employer's deduction for contributions to a welfare benefit fund for the taxable year of the employer in which the fund was established, the period between the beginning of the fund's Overlap Fund Year and the end of the employer's taxable year in which the Overlap Fund Year began will be treated as a taxable year of the fund ("Initial Fund Year").

(c) The qualified cost of a welfare benefit fund for its Initial Fund Year will be equal to the qualified direct cost of the fund for such Initial Fund Year. The qualified cost of a fund for its Overlap Fund Year will be determined under the general rules of Q&A-5 of this regulation and section 419(c), with the exception that such qualified cost will be reduced by the employer contributions made during the Initial Fund Year and deductible by the employer for the taxable year of the employer in which the Overlap Fund Year of the fund begins.

(d) Assume that an employer with a calendar taxable year establishes on July 1, 1986, a welfare benefit fund with a taxable year ending on June 30. The fund's first taxable year from July 1, 1986, to June 30, 1987, is an Overlap Fund Year. The employer contributes $1,000 to the fund during its taxable year ending December 31, 1986 (i.e., during the period between July 1, 1986, and December 31, 1986, which is also the Initial Fund Year) and another $1,500 to the fund during its taxable year ending December 31, 1987. Assume further that the qualified direct cost of the fund for the Initial Fund Year is $900 and that the qualified cost for the Overlap Fund Year is $2,500 (prior to the reduction required by paragraph (c) of this Q&A). Under the special rules of paragraphs (b) and (c), the employer may deduct $900 for its taxable year ending on December 31, 1986, and $1,600 for its taxable year ending on December 31, 1987. If the qualified direct cost of the fund for the Initial Fund Year had been $1,050 and the qualified cost for the Overlap Fund Year had been $2,500 (prior to the reduction required by paragraph (c) of this Q&A), the employer's

deduction for its taxable year ending December 31, 1986, would have been $1,000 and its deduction for its taxable year ending December 31, 1987, would have been $1,500.

(e) Assume that an employer with a calendar taxable year establishes on March 1, 1986, a welfare benefit fund with a taxable year ending June 30. Thus, the fund has a short first taxable year ending June 30, 1986, an Overlap Fund Year from July 1, 1986, until June 30, 1987, and an ongoing June 30 taxable year. The employer contributes $1,750 to the fund during the employer's taxable year ending December 31, 1986—$750 during the short first taxable year of the fund and $1,000 during the Initial Fund Year (i.e., the period between July 1, 1986, and December 31, 1986)—and $1,500 to the fund during its taxable year ending December 31, 1987. Assume that the qualified cost of the fund for the short first taxable year of the fund is $800, the qualified direct cost for the Initial Fund Year is $900, and the qualified cost for the Overlap Fund Year is $2,500 (prior to the reduction required by paragraph (c) of this Q&A). Under the special rules of paragraphs (b) and (c), the employer may deduct $1,700 for its taxable year ending December 31, 1986, and $1,550 for its taxable year ending December 31, 1987.

Q-8: How does section 419 treat an employer's contribution with respect to a welfare benefit fund in excess of the applicable deduction limit for a taxable year of the employer?

A-8: (a) If an employer makes contributions to a welfare benefit fund in a taxable year of the employer and such contributions (when combined with prior contributions that are deemed under the rule of this Q&A and section 419(d) to have been made in such taxable year) exceed the section 419 deduction limit for such taxable year of the employer, the excess amounts are deemed to be contributed to the fund on the first day of the next taxable year of the employer. Such deemed contributions are combined with amounts actually contributed by the employer to the fund during the next taxable year and may be deductible for such year, subject to the otherwise applicable section 419 deduction limit for such year.

(b) Contributions to a welfare benefit fund on or before December 31, 1985, that were not deductible by the employer for any taxable year of the employer ending on or before December 31, 1985, or for the first taxable year of the employer ending after December 31, 1985, as pre-1986 contributions (see Q&A-9 of this regulation) are deemed to be contributed to the fund on January 1, 1986. However, see Q&A-11 of this regulation for special rules relating to the contribution to a welfare benefit fund of amounts (such as cash) used to acquire, construct, or improve a facility before section 419 generally becomes effective with respect to contributions to the fund. Generally, such contributions (to the extent that they were made after June 22, 1984 and on or before December 31, 1985) are treated as nondeductible pre-1986 contributions and are deemed to be contributed in the form of a facility at the same time as when the facility is placed in service by the fund.

Q-9: How does an employer with a fiscal taxable year calculate its deduction limit for contributions with respect to a welfare benefit fund for the first taxable year of the employer ending after December 31, 1985?

A-9: (a) If the first taxable year of an employer ending after December 31, 1985 (or, if applicable under paragraph (b) of Q&A-2 of this section, the first taxable year of an employer beginning after termination of the last of the collective bargaining agreements pursuant to which the fund is maintained) is a fiscal year, the employer's deduction for such taxable year for contributions to a welfare benefit fund that is not a collectively bargained welfare benefit fund under § 1.419A-2T is limited to the greater of the following two amounts: (1) The contributions paid to the fund during such first taxable year up to the qualified cost of the welfare benefit fund for the taxable year of the fund that relates to such taxable year of the employer, and (2) the contributions paid to the fund during the 1985 portion of such first taxable year of the employer ("the pre-1986 contributions") to the extent that such pre-1986 contributions are deductible under the rules governing the deduction of such contributions before section 419 generally becomes effective (including the rules set forth in Q&A-10 of this regulation, modified for purposes of this Q&A-9 by substituting "December 31, 1986" for "December 31, 1985" in paragraph (c)). See Q&A-11 of this regulation for special rules relating to the contribution to a welfare benefit fund of a facility (and to the contribution of other amounts, such as cash, used to acquire, construct, or improve such a facility) before section 419 generally becomes effective with respect to contributions to such fund.

(b) For example, assume that an employer with a taxable year ending June 30, contributes to a welfare benefit fund with a taxable year ending January 31. This employer contributes $1,000 to the fund between July 1, 1985, and December 31, 1985, and an additional $500 to the fund between

January 1, 1986, and June 30, 1986. Assume further that the qualified direct cost of the fund for the taxable year of the fund ending January 31, 1986, is $500 and that the qualified cost for such taxable year is $800. Under the deduction rule set forth above, the employer's deduction for its taxable year ending June 30, 1986, is the greater of two amounts: (1) The contributions made during such full taxable year ($1,500) up to the qualified cost of the fund with respect to such taxable year ($800), and (2) the pre-1986 contributions ($1,000) to the extent that such pre-1986 contributions are deductible under the pre-section 419 rules. In determining the extent to which the pre-1986 contributions are deductible under the pre-section 419 rules, the rules contained in Q&A-10 apply as though December 31, 1985, in paragraph (c) were December 31, 1986. Assuming that only $875 is deductible under the pre-section 419 rules, because $875 is greater than $800, this employer may deduct $875 for its first taxable year ending after December 31, 1985. This full $875 deduction for 1985 is deemed to consist entirely of pre-1986 contributions.

Q–10: How do the rules of sections 263, 446(b), 461(a), and 461(h) apply in determining whether contributions with respect to a welfare benefit fund are deductible for a taxable year?

A–10: (a) Both before and after the effective date of section 419 (see Q&A-2 of this regulation), an employer is allowed a deduction for taxable year for contributions paid or accrued with respect to a "welfare benefit fund" (as defined in Q&A-3 of this regulation and section 419(e)) only to the extent that such contributions satisfy the requirements of section 162 or 212. These requirements must be satisfied after the effective date of section 419 because 419 requires that (among other requirements) contributions to a welfare benefit fund satisfy the requirements of section 162 or 212.

(b) Except as provided in paragraphs (c) and (d), in determining the extent to which contributions paid or accrued with respect to welfare benefit fund satisfy the requirements of section 162 or 212 for a taxable year (both before and after section 419 generally becomes effective with respect to such contributions), the rules of sections 263, 446(b), 461(a) (including the rules that relate to the creation of an asset with a useful life extending substantially beyond the close of the taxable year), and 461(h) (to the extent that such section is effective with respect to such contributions) are generally applicable.

(c) Notwithstanding paragraph (b), under the authority of section 7805(b), the rules of sections 263, 446(b), and 461(a) shall not be applied in determining the extent to which an employer's contribution with respect to a welfare benefit fund is deductible under section 162 or 212 with respect to any taxable year of the employer ending on or before December 31, 1985, to the extent that, for such taxable year, (1) the contribution was made pursuant to a bona fide collective bargaining agreement requiring fixed and determinable contributions to a collectively bargained welfare benefit fund (as defined in § 1.419A-2T), or (2) the contribution was not in excess of the amount deductible under the principles of Revenue Rulings 69-382, 1969-2 C.B. 28; 69-478, 1969-2 C.B. 29; and 73-599, 1973-2 C.B. 40, modified as appropriate for benefits for active employees.

(d) Notwithstanding paragraph (b), in determining the extent to which contributions paid or accrued with respect to a welfare benefit fund are deductible under section 419, the rules of sections 263, 446(b), and 461(a) will be treated as having been satisfied to the extent that such contributions satisfy the otherwise applicable rules of section 419. Thus, for example, contributions to a welfare benefit fund will not fail to be deductible under section 419 merely because they create an asset with a useful life extending substantially beyond the close of the taxable year if such contributions satisfy the otherwise applicable requirements of section 419.

(e) In determining the extent to which contributions with respect to a welfare benefit fund satisfy the requirements of section 461(h) for any taxable year for which section 461(h) is effective, pursuant to the authority under section 461(h)(2), economic performance occurs as contributions to the welfare benefit fund are made. Solely for purposes of section 461(h), in the case of an employer's taxable year ending on or after July 18, 1984, and on or before March 21, 1986, contributions made to the welfare benefit fund after the end of such taxable year and on or before March 21, 1986 shall be deemed to have been made on the last day of such taxable year.

Q–11: What special section 419 rules apply to the payment or accrual with respect to a welfare benefit fund of a facility (and the payment or accrual of other amounts, such as cash, used to acquire, construct, or improve such a facility)?

A–11: (a)(1) In the case of an employer's payment or accrual with respect to a welfare benefit fund after June 22, 1984, and on or before December 31, 1985 (or, if applicable under paragraph (b) of Q&A-2 of this regulation, before section 419 generally becomes effective with respect to contri-

butions to such fund), of a facility, the rules of section 419, § 1.419-1T, and § 1.419A-2T generally apply to determine the extent to which such contribution is deductible by the employer for its taxable year of contribution. For this purpose, however, the facility is to be treated as the only contribution made to the fund and the qualified cost of the fund for the taxable year of the fund in which the facility was contributed is to be equal to the qualified direct cost directly attributable to the facility (as determined under Q&A-6 of this regulation). Also, for this purpose, the welfare benefit fund to which the facility was contributed may not be aggregated with any other fund. For purposes of this Q&A, "facility" means any tangible asset with a useful life extending substantially beyond the end of the taxable year (e.g., vehicles, buildings) and any intangible asset (e.g., licenses) related to a tangible asset, whether or not such asset is used in the provision of welfare benefits. See, however, paragraph (c) of Q&A-2 of this regulation for a binding contract exception.

(2) For example, assume that an employer and a welfare benefit fund each has a calendar taxable year and that, during 1985, the employer contributes to the fund $200,000 in cash and a facility with a fair market value of $100,000. Such facility is used in the provision of welfare benefits under the fund. The employer is treated as having sold the facility in such year and thus will recognize gain to the extent that the fair market value of the facility exceeds the employer's adjusted basis in the facility. In this regard, see section 1239(d). The extent to which the facility contribution is deductible by the employer for its 1985 taxable year is determined as though it were the only contribution made by the employer to the fund during such year and the qualified cost of the fund for the taxable year of the fund in which the contribution was made (i.e., the 1985 taxable year) were equal to the amount that would have been allowable to the employer as a deduction for such year under the applicable Code provisions with respect to the portion of the facility used in the provision of welfare benefits for such year if the employer had placed in service the facility at the time the fund placed in service the facility and if the employer had the same taxable year as the fund. If, under these assumptions, the employer would have been allowed a $10,000 deduction with respect to the facility for the 1985 taxable year, the fund's qualified cost for its 1985 taxable year would be only $10,000. Thus, only $10,000 of the $100,000 facility contribution would be deductible by the employer for its 1985 taxable year (i.e., the taxable year of the employer with or within which the applicable taxable year of the fund ends). However, in determining the extent to which the $200,000 in cash is deductible by the employer for its 1985 taxable year, the $100,000 facility is not to be disregarded. Thus, if under the applicable pre-section 419 rules the employer is allowed for 1985 a total deduction of only $175,000, the employer would be permitted a deduction for 1985 of $175,000 ($10,000 with respect to the facility and $165,000 of the cash contribution). The nondeductible portion of the cash contribution is to be treated as contributed to the fund on the first day of the next taxable year of the employer. If under the applicable pre-section 419 rules the employer were allowed a total deduction of $300,000 for 1985, the employer would be permitted a deduction for 1985 of only $210,000 ($10,000 with respect to the facility and the full $200,000 cash contribution).

(3) For example, assume that an employer has a June 30 taxable year and maintains a welfare benefit fund with a taxable year ending January 31. During the 1985 portion of its taxable year ending June 30, 1986, the employer contributes $50,000 in cash and a facility with a fair market value of $100,000; and during the 1986 portion of such taxable year, the employer contributes another $75,000 in cash to the fund. The facility is used in the provision of welfare benefits under the fund. Under the rules of Q&A-9 of this regulation, the employer's deduction for its June 30, 1986, taxable year is limited to the greater of the following two amounts: (i) The contributions paid to the fund during such taxable year ($225,000) up to the qualified cost of the fund for the taxable year of the fund ending January 31, 1986, and (ii) the contributions paid to the fund during the 1985 portion of the employer's taxable year ending June 30, 1986 ("the pre-1986 contributions") ($150,000) to the extent that such pre-1986 contributions are deductible under the rules governing the deduction of such contributions before section 419 is generally effective with respect to the fund. For purposes of this rule, the contribution of the facility on or before December 31, 1985, is to be treated as a pre-1986 contribution and the rules of section 419 and this Q&A are to be treated as rules governing the deduction of such contribution before section 419 generally becomes effective with respect to the fund. Thus, in determining the extent to which the facility is deductible as a pre-1986 contribution under the rules before section 419 generally becomes effective, the facility is treated as the only contribution to the welfare benefit fund and the qualified cost of such fund for the taxable year of the fund in which the facility was contributed is the amount that would have been allowable to the

employer as a deduction with respect to the portion of the facility used in the provision of welfare benefits if the employer had placed in service the facility at the same time that the fund placed in service the facility and the employer's taxable year ended on January 31, 1986.

(b)(1) The preceding rules shall also apply for purposes of determining when and the extent to which an employer may deduct contributions or other items and amounts after June 22, 1984 and on or before December 31, 1985 (or, if applicable under paragraph (b) of Q&A-2 of this regulation, before section 419 generally becomes effective with respect to contributions to the fund) that are not facilities (e.g., cash contributions) to a welfare benefit fund that are used by the fund to acquire, construct, or improve a facility. The most recent non-facility contributions made to a welfare benefit fund before the facility in question is placed in service by the fund (up to the fair market value of the facility at such time) are to be treated as used by the fund for the acquisition, construction, or improvement (as the case may be) of such facility. To the extent that contributions before such a facility is placed in service are not at least equal to the value of the facility at such time, contributions after such date (up to the value of the facility at the time it is placed in service) are treated as used for acquisition, construction, or improvement of the facility. Such non-facility contributions, to the extent that they were made after June 22, 1984, and on or before December 31, 1985 (or, if applicable under paragraph (b) of Q&A-2 of this regulation, before section 419 generally becomes effective with respect to contributions to the fund), are not deductible by the employer as non-facility contributions for any year. Instead, the employer is permitted a deduction with respect to such contributions only under the rules of this Q&A as though the employer had contributed a facility to the fund at the same time that the fund placed in service the facility in question and, at such time, the facility had a fair market value equal to the total of such non-facility contributions.

(2) For example, assume that an employer and a welfare benefit fund each has a calendar taxable year and during 1985 the fund acquired and placed in service a facility with a fair market value of $100,000 to be used in the provision of welfare benefits. Further, during July 1984 the employer contributed $150,000 in cash to the fund and, during the portion of 1985, before the facility was placed in service by the fund, the employer contributed another $75,000 in cash to the fund; during the remaining portion of 1985, the employer contributed $125,000 in cash. The facility is used in the provision of welfare benefits under the fund. Because $25,000 of the employer's 1984 contribution is treated under this rule as used for the acquisition of a facility, such $25,000 is not deductible by the employer for 1984. For purposes of determining the employer's deduction for 1985, the employer will be treated as having contributed $125,000 in cash and a facility with a fair market value of $100,000. The employer's deduction for its 1985 taxable year will be determined under the rules relating to the contribution of a facility after June 22, 1984, and on or before December 31, 1985.

(3) For example, assume that an employer and a welfare benefit fund each has a calendar taxable year and during 1986 the fund placed in service a facility with a fair market value of $100,000 to be used in the provision of welfare benefits. During 1985, the employer contributed $125,000 in cash to the fund. During the portion of 1986 before the facility was placed in service, the employer contributed $60,000 in cash, and during the remaining portion of 1986, the employer contributed another $75,000 in cash. The facility is used in the provision of welfare benefits under the fund. Because $40,000 of its 1985 cash contribution is treated under this rule as used for the acquisition of the facility, such $40,000 is not deductible by the employer for 1985. For purposes of determining the employer's deduction for 1986, the employer will be treated as though it had contributed a $40,000 facility to the fund at the time the fund placed the facility in service.

(c) For purposes of calculating the "existing excess reserve amount" under Q&A-1 of § 1.419A-1T and the "existing reserves for post-retirement medical or life insurance benefits" under Q&A-4 of § 1.512(a)-5T (but not the exempt function income under Q&A-3 of § 1.512(a)-5T), the amount set aside as of any applicable date is to be reduced to the extent that contributions originally included in such amount are subsequently treated under this Q&A as used for the acquisition, construction, or improvement of an asset excluded from the calculation of the total amount set aside under paragraph (b) of § 1.512(a)-5T (or would be so treated under this Q&A if it applied to such asset). The reduction required under this paragraph applies for purposes of calculating the "existing excess reserve amount" and the "existing reserves for post-retirement medical or life insurance benefits" for all taxable years of the welfare benefit fund.

[T.D. 8073, 51 FR 4323, Feb. 4, 1986; 51 FR 7262, March 3, 1986; T.D. 8073, 51 FR 11303, April 2, 1986]

§ 1.419A–1T Qualified asset account limitation of additions to account (temporary).

Q–1: What does the transition rule under section 419A(f)(7) provide?

A–1: Section 419A(f)(7) provides that, in the case of a welfare benefit fund that was in existence on July 18, 1984, the account limit (as determined under section 419A(c)) for each of the first four taxable years of the fund that relate to taxable years of the employer ending after December 31, 1985 (or, if applicable under paragraph (b) of Q&A-2 of § 1.419-1T, taxable years of the employer beginning after the termination of the last of the collective bargaining agreements pursuant to which the plan is maintained) shall be increased by the following percentages of the "existing excess reserve amount":

	Percent
First taxable year	80
Second taxable year	60
Third taxable year	40
Fourth taxable year	20

For purposes of this section, the "existing excess reserve amount" for any taxable year of a fund is the excess of (a) the assets actually set aside for purposes described in section 419A(a) at the close of the first taxable year of the fund ending after July 18, 1984 (calculated in the manner set forth in Q&A-3 of § 1.512(a)-3T, and adjusted under paragraph (c) of Q&A-11 of § 1.419-1T), reduced by employer contributions to the fund before the close of such first taxable year to the extent that such contributions are not deductible for the taxable year of the employer with or within which such taxable year of the fund ends and for any prior taxable year of the employer, over (b) the account limit which would have applied to the taxable year of the fund for which the excess is being computed (without regard to this transition rule). A welfare benefit fund is treated as in existence on July 18, 1984, for purposes of this transition rule only if amounts were actually set aside in such fund on such date to provide welfare benefits enumerated under section 419A.

[T.D. 8073, 51 FR 4329, Feb. 4, 1986; T.D. 8073, 51 FR 11303, April 2, 1986]

§ 1.419A–2T Qualified asset account limitation for collectively bargained funds (temporary).

Q–1: What account limits apply to welfare benefit funds that are maintained pursuant to a collective bargaining agreement?

A–1: Contributions to a welfare benefit fund maintained pursuant to one or more collective bargaining agreements and the reserves of such a fund generally are subject to the rules of sections 419, 419A, and 512. However, neither contributions to nor reserves of such a collectively bargained welfare benefit fund shall be treated as exceeding the otherwise applicable limits of section 419(b), 419A(b), or 512(a)(3)(E) until the earlier of: (i) The date on which the last of the collective bargaining agreements relating to the fund in effect on, or ratified on or before, the date of issuance of final regulations concerning such limits for collectively bargained welfare benefit funds terminates (determined without regard to any extension thereof agreed to after the date of issuance of such final regulations), or (ii) the date 3 years after the issuance of such final regulations.

Q–2: What is a welfare benefit fund maintained pursuant to a collective bargaining agreement for purposes of Q&A–1?

A–2: (1) For purposes of Q&A–1, a collectively bargained welfare benefit fund is a welfare benefit fund that is maintained pursuant to an agreement which the Secretary of Labor determines to be a collective bargaining agreement and which meets the requirements of the Secretary of the Treasury as set forth in paragraph 2 below.

(2) Notwithstanding a determination by the Secretary of Labor that an agreement is a collective bargaining agreement, a welfare benefit fund is considered to be maintained pursuant to a collective bargaining agreement only if the benefits provided through the fund were the subject of arms-length negotiations between employee representatives and one or more employers, and if such agreement between employee representatives and one or more employers satisfies section 7701(a)(46) of the Code. Moreover, the circumstances surrounding a collective bargaining agreement must evidence good faith bargaining between adverse parties over the welfare benefits to be provided through the fund. Finally, a welfare benefit fund is not considered to be maintained pursuant to a collective bargaining agreement unless at least 50 percent of the employees eligible to receive benefits under the fund are covered by the collective bargaining agreement.

(3) In the case of a collectively bargained welfare benefit fund, only the portion of the fund (as determined under allocation rules to be provided by the Commissioner) attributable to employees covered by a collective bargaining agreement, and from which benefits for such employees are pro-

vided, is considered to be maintained pursuant to a collective bargaining agreement.

(4) Notwithstanding the preceding paragraphs and pending the issuance of regulations setting account limits for collectively bargained welfare benefit funds, a welfare benefit fund will not be treated as a collectively bargained welfare benefit fund for purposes of Q&A–1 if and when, after July 1, 1985, the number of employees who are not covered by a collective bargaining agreement and are eligible to receive benefits under the fund increases by reason of an amendment, merger, or other action of the employer or the fund. In addition, pending the issuance of such regulations, for purposes of applying the 50 percent test of paragraph (2) to a welfare benefit fund that is not in existence on July 1, 1985, "90 percent" shall be substituted for "50 percent".

[T.D. 8034, 50 FR 27428, July 3, 1985]

Certain Stock Options

§ 1.421–1 Effective dates and meaning and use of certain terms.

(a) **Option.** (1) For the purpose of section 421, the term "option" includes the right or privilege of an individual to purchase stock from a corporation by virtue of an offer of the corporation continuing for a stated period of time, whether or not irrevocable, to sell such stock at a price determined under paragraph (d) of this section, such individual being under no obligation to purchase. Such right or privilege, when granted, must be evidenced in writing. The individual who has such right or privilege is referred to as the optionee and the corporation offering to sell stock under such an arrangement is referred to as the optionor. While no particular form of words is necessary, the written option should express, among other things, an offer to sell at the option price and the period of time during which the offer shall remain open.

(2) An option may be granted as part of or in conjunction with an employee stock purchase plan or subscription contract.

(3) An arrangement between a corporation and an employee may involve more than one option. For example, if a corporation on June 1, 1954, grants to an employee the right to purchase 1,000 shares of its stock on or after June 1, 1955, another 1,000 shares on or after June 1, 1956, and a further 1,000 shares on or after June 1, 1957, all shares to be purchased before June 1, 1958, provided the employee at the time of exercise of any of the purchase rights is employed by the corporation, such an arrangement will be construed as the grant to the employee on June 1, 1954, of three options, each for the purchase of 1,000 shares. Similarly, if a corporation grants to an employee on January 1, 1955, the right to purchase 1,000 shares of its stock at $85 per share during 1955, or at $75 per share during 1956, or at $65 per share during 1957, such an arrangement will be construed as the grant to the employee on January 1, 1955, of three alternative options, one option for the purchase of 1,000 shares at $85 per share during 1955, an alternative option for the purchase of 1,000 shares at $75 per share during 1956, and a third alternative option for the purchase of 1,000 shares at $65 per share during 1957.

(b) **Time and date of granting of option.** (1) For the purpose of section 421, the words "the date of the granting of the option" and "the time such option is granted", and similar phrases refer to the date or time when the corporation completes the corporate action constituting an offer of stock for sale to an individual under the terms and conditions of a restricted stock option. Ordinarily, if the corporate action contemplates an immediate offer of stock for sale to an individual or to a class including such individual, or contemplates a particular date on which such offer is to be made, the time or date of the granting of the option is the time or date of such corporate action if the offer is to be made immediately, or the date contemplated as the date of the offer, as the case may be. However, an unreasonable delay in the giving of notice of such offer to the individual or to the class will be taken into account as indicating that the corporation contemplated that the offer was to be made at the subsequent date on which such notice is given.

(2) If the corporation imposes conditions on the granting of an option (as distinguished from conditions governing the exercise of the option), such conditions shall be given effect in accordance with the intent of the corporation. A special rule is provided by section 421(d)(5) for options subject to stockholder approval. If the grant of an option is subject to approval by stockholders, the date of grant of the option shall be determined as if the option had not been subject to such approval. A condition which does not require corporate action, such as the approval of some regulatory or govern-

mental agency, for example, a stock exchange or the Securities and Exchange Commission, is ordinarily considered a condition upon the exercise of the option unless the corporate action clearly indicates that the option is not to be granted until such condition is satisfied. If an option is granted to an individual upon the condition that such individual will become an employee of the corporation granting the option or of its parent or subsidiary corporation, such option is not granted prior to the date the individual becomes such an employee.

(3) In general, conditions imposed upon the exercise of an option will not operate to make ineffective the granting of the option. For example, on June 1, 1954, the A Corporation grants to X, an employee, an option to purchase 5,000 shares of the corporation stock, exercisable by X on or after June 1, 1955, provided he is employed by the corporation on June 1, 1955. Such an option is granted to X on June 1, 1954.

(c) Stock. For the purpose of section 421, the term "stock" means capital stock of any class, including voting or nonvoting common or preferred stock. The term includes both treasury stock and stock of original issue. Special classes of stock authorized to be issued to and held by employees are within the scope of the term "stock" as used in section 421, provided such stock otherwise possesses the rights and characteristics of capital stock.

(d) Option price. (1) For the purpose of section 421, the term "option price" or "price paid under the option" means the consideration in money or property which, pursuant to the terms of the option, is the price at which the stock subject to the option is purchased.

(2)(i) With respect to its option price, a restricted stock option must, when granted, meet either of the following requirements:

(a) The option price must be fixed or determinable at the time the option is granted; or

(b) In the case of an option exercised during any taxable year of the optionee which begins after December 31, 1953, and ends after August 16, 1954, the option price must be determinable under a variable price option as defined in subdivision (ii) of this subparagraph.

An option which does not meet the requirements of either (a) or (b) of this subdivision when granted will not be treated as a restricted stock option unless it is subsequently changed to meet such requirements. In case of such a change, see paragraph (c)(2) of § 1.421–4.

(ii)(a) The term "variable price option" means an option under which the option price is determined by a formula in which the only variable is the fair market value of the stock at any time during a period of six consecutive months which includes the day on which such option is exercised. Except as provided in (b) of this subdivision, such formula may provide for determining such price by reference to such value on any particular day in such 6-month period, or by reference to an average value of the stock over either the whole of such 6-month period or over any shorter period included in such 6-month period. Such 6-month period may begin with, end with, or in any other manner span the day on which such option is exercised. Such formula may also depend upon factors other than such value of the stock, but such other factors must not be variable and must be fixed in the option when granted. For example, such formula may provide that the option price shall be 85 percent of the value of the stock on the day the option is exercised, but such price shall not be less than \$85, nor more than \$110. Another example of a formula which meets the requirements of this subdivision is a provision that the option price shall be 95 percent of the fair market value of the stock on the day the option is exercised but not more than \$95. However, the requirements of this subdivision are not met by a formula which provides that if the profits of the employer for the year do not exceed \$100,000, the option price shall be \$15 under the fair market value of the stock at the time the option is exercised, but if such profits exceed \$100,000, the option price shall be \$20 under such value of the stock. For an example of how to determine whether an option which contains a formula meeting the requirements of this subdivision also meets the requirement that the option price must be at least 85 percent of the fair market value of the stock at the time the option is granted, see paragraph (a)(1) of § 1.421–2.

(b) In the case of an option granted after September 30, 1958, the term "variable price option" does not include any option in which the formula provides for determining the option price by reference to the fair market value of the stock at any time before the option is exercised if such value may be greater than the average fair market value of the stock during the calendar month in which the option is exercised. Whether an option meets the requirement of this subdivision shall be determined solely by reference to the terms of the option, and the circumstances existing at the time the option is granted or exercised are immaterial.

Thus, an option, granted after September 30, 1958, and containing a pricing formula which takes into consideration the value of the stock at any time before the option is exercised, is subject to the new limitation and does not meet the requirement of this subdivision, even though the option price is not actually based upon such prior fair market value either at the time the option is exercised or at the time the option price is computed as if it were exercised for the purpose of applying the 85 percent test of section 421(d)(1)(A). For example, a formula which provides that the option price is to be 45 percent of the fair market value of the stock 30 days before the date on which the option is exercised, but not more than $85, will not qualify under this subdivision since under this formula the price may be determinable by reference to a higher prior value. On the other hand, a formula which provides that the option price is to be 90 percent of the average value of the stock during the month the option is exercised or the average value of the stock during the preceding month, whichever is lower, will qualify. In the case of an option granted after September 30, 1958, the only way that a formula which provides for determining the option price by reference to the fair market value of the stock at a time before the option is exercised can come within the requirement of this subdivision is to provide that the option price is to be determined by reference to such fair market value only if such fair market value is not greater than the average fair market value of the stock during the month in which the option is exercised. If under the terms of an option the price is to be determined by reference to the fair market value of the stock at a time before the option is exercised, whether such value is higher or lower than the average fair market value of the stock during the month the option is exercised, such option will not be considered a restricted stock option since the option price may be based upon the prior value of the stock when such value exceeds the average fair market value of the stock during the month the option is exercised. However, if an option provides for determining the option price by reference to a prior fair market value of the stock only when such value is lower than such average value of the stock, such option can qualify as a restricted stock option. The average fair market value of the stock during the month in which the option is exercised means such value during the calendar month the option is exercised and not merely during a 30- or 31-day period including the time the option is exercised. To compute the average fair market value of the stock for the month, it will be necessary to ascertain the fair market value of the stock for each day during the month, including those days which are not business days. In ascertaining the fair market value of the stock for each day, the generally accepted principles for ascertaining such value will be applied.

(e) **Exercise.** For the purpose of section 421, the term "exercise", when used in reference to an option, means the act of acceptance by the optionee of the offer to sell contained in the option. In general, the time of exercise is the time when there is a sale or a contract to sell between the corporation and the individual. An agreement or undertaking by the employee to make payments under a stock purchase plan does not constitute the exercise of an option so long as the payments made remain subject to withdrawal by the employee.

(f) **Transfer.** For the purpose of section 421, the term "transfer", when used in reference to the transfer to an individual of a share of stock pursuant to his exercise of a restricted stock option, means the transfer of ownership of such share, or the transfer of substantially all the rights of ownership. Such transfer must, within a reasonable time, be evidenced on the books of the corporation.

(g) **Effective dates.** Sections 1.421–1 through 1.421–5 are applicable only to options granted after February 26, 1945, and before January 1, 1964, and all references therein to sections of the Code are to the Internal Revenue Code of 1954, before the amendments made by section 221 of the Revenue Act of 1964 (78 Stat. 63). Section 1.421–6 is applicable only to options granted on or after February 26, 1945, and all references to sections of the Code are to the Internal Revenue Code of 1954, as amended. Sections 1.421–7 and 1.421–8 are applicable only to options granted after December 31, 1963, and all references therein to sections of the Code are to the Internal Revenue Code of 1954, as amended.

[T.D. 6500, 25 FR 11692, Nov. 26, 1960, as amended by T.D. 6527, 26 FR 410, Jan. 19, 1961; T.D. 6887, 31 FR 8786, June 24, 1966]

§ 1.421–2 Restricted stock option.

(a) **In general.** (1) A "restricted stock option" is an option granted after February 26, 1945, to an individual, for any reason connected with his employment by a corporation, if granted by the employer corporation or its parent or subsidiary corporation, to purchase stock of any of such corporations, but, except in the case of options described in subparagraph (2) of this paragraph, only if—

(i) At the time such option is granted the option price is at least 85 percent of the fair market value at such time of the stock subject to the option; and

(ii) Such option by its terms is not transferable by such individual otherwise than by will or by the laws of descent and distribution, and is exercisable, during his lifetime, only by him; and

(iii) Such individual, at the time the option is granted, does not own stock possessing more than 10 percent of the total combined voting power of all classes of stock either of the employer corporation or of its parent or subsidiary corporation; and

(iv) In the case of options granted after June 21, 1954, such option by its terms is not exercisable after the expiration of ten years from the date on which such option was granted.

For the purpose of applying the rule of subdivision (i) of this subparagraph if the option price is determined by a formula described in paragraph (d)(2)(ii) of § 1.421–1, the option price shall, notwithstanding any provision of the option, be computed as if such option is exercised on the day when it is granted. For example, if on June 15, 1959, an option is granted providing that the option price shall be $10 under the average fair market value of the stock during the month in which the option is exercised or the average fair market value of the stock during the preceding month, whichever is lower, and if on June 15, 1959, the value of the stock subject to the option is $100 a share, to determine if the option meets the requirement of subdivision (i) of this subparagraph, it is necessary to determine the average fair market value of the stock during the months of May and June 1959. If such lower average fair market value is $95 or more, the option meets the requirement of subdivision (i) of this subparagraph.

(2) Regardless of the extent to which the individual to whom the option is granted owns stock of either the employer corporation, or of its parent or subsidiary corporation, an option is a restricted stock option if—

(i) Such option is granted after February 26, 1945, to such individual, for any reason connected with his employment by a corporation, if granted by the employer corporation or its parent or subsidiary corporation, to purchase stock of any of such corporations; and

(ii) At the time such option is granted the option price is at least 110 percent of the fair market value at such time of the stock subject to the option; and

(iii) Such option by its terms is not transferable by such individual otherwise than by will or by the laws of descent and distribution, and is exercisable, during his lifetime, only by him; and

(iv) Such option by its terms is not exercisable after the expiration of five years from the date on which such option was granted, or such option is exercised before August 17, 1955.

(3) At the time the option is granted, the relationship between the individual to whom an option is granted and the corporation granting the option (or a corporation which is a parent or subsidiary thereof) must be the legal and bona fide relationship of employer and employee. For rules applicable to the determination whether the employer-employee relationship exists, see section 3401(c) and the regulations thereunder. An option granted before employment or after termination of employment is not a restricted stock option. As to the granting of an option conditioned upon employment, see paragraph (b)(2) of § 1.421–1. The option must be granted for a reason connected with the individual's employment by the corporation or by its parent or subsidiary corporation.

(4) An option may qualify as a restricted stock option only if, under the terms of the option, it is not transferable (other than by will or by the laws of descent and distribution) by the individual to whom it is granted, and is exercisable, during the lifetime of such individual, only by him. Accordingly, an option which is transferable by the individual to whom it is granted during his lifetime, or is exercisable during such individual's lifetime by another person, is not a restricted stock option. However, in case the option contains a provision permitting the individual to whom the option was granted to designate the person who may exercise the option after his death, neither such provision, nor a designation pursuant to such provision, disqualifies the option as a restricted stock option.

(5) Any reasonable valuation methods may be used for the purpose of determining whether at the time the option is granted the option price is at least 85 percent of the fair market value at such time of the stock subject to the option. Such methods include the valuation methods described in § 20.2031–2 of this chapter (Estate Tax Regulations).

(b) Ownership of 10 percent of stock. In determining the amount of stock owned by an individual, for the purpose of applying the 10 percent test

of section 421(d)(1)(C), stock of the employer corporation or of its parent or subsidiary owned (directly or indirectly) by or for such individual's brothers and sisters (whether by the whole or half blood), spouse, ancestors, and lineal descendants, shall be considered as owned by such individual. Also, for such purpose, if a domestic or foreign corporation, partnership, estate, or trust owns (directly or indirectly) stock of the employer corporation or of its parent or subsidiary, such stock shall be considered as being owned proportionately by or for the shareholders, partners, or beneficiaries of the corporation, partnership, estate, or trust. [T.D. 6500, 25 FR 11693, Nov. 26, 1960, as amended by T.D. 6527, 26 FR 411, Jan. 19, 1961]

§ 1.421–3 Exercise of restricted stock option.

(a) The special rules of income tax treatment provided in section 421(a) and (b) are applicable only if the following conditions exist with respect to the transfer of a share of stock to an individual:

(1) The share of stock is transferred to the individual pursuant to his exercise after 1949 of a restricted stock option; and

(2) At the time the option is exercised by him, the individual is an employee of the corporation granting such option (or parent or subsidiary thereof), or of a corporation (or parent or subsidiary thereof) which issued or assumed the option under section 421(g) (see paragraph (d) of § 1.421–4), or was an employee of any such corporations within three months before the date the option is exercised.

(b)(1) Section 421 is applicable to the exercise of a restricted stock option only if at the time the individual exercises the option he is a bona fide employee of the corporation granting the option, or of a corporation which is at the time the option is exercised a parent or subsidiary of such corporation, unless the old option has been assumed or a new option has been issued in its place under section 421(g). See paragraph (d) of § 1.421–4. In case of such an assumption of the old option or such issuance of a new option, the individual exercising the option must, at the time he exercises the option, be a bona fide employee of the corporation so assuming or issuing the option, or a parent or subsidiary of such corporation. Section 421 is also applicable if the individual exercising the option was a bona fide employee of any of such corporations within three months before the exercise of the option. For purposes of determining whether an individual meets the requirement of this subparagraph, the term "employer corporation", as used in section 421(d)(2) and (3), shall be read as "grantor corporation" or "corporation issuing or assuming a stock option in a transaction to which section 421(g) is applicable", as the case may be. Therefore, for purposes of the employment requirement, the determination of whether a corporation is a parent corporation or a subsidiary corporation is based upon whether the corporation is a parent or subsidiary of the corporation granting an option or of a corporation which issued or assumed an option under section 421(g).

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). On June 1, 1954, X Corporation granted a restricted stock option to A, an employee of X Corporation, to purchase a share of X stock. On February 1, 1955, X sold the plant where A was employed to M Corporation, an unrelated corporation, and A was employed by M. If A exercises this restricted stock option on June 1, 1955, section 421 is not applicable to such exercise, because on June 1, 1955, A is not employed by the corporation which granted the option or by a parent or subsidiary of such corporation. Nor was he employed by any of such corporations within three months before June 1, 1955.

Example (2). Assume the facts to be the same as in example (1), except that when A was employed by M Corporation, the option to purchase X stock was terminated, and was replaced by an option to buy M stock in such circumstances that M Corporation is treated as a corporation issuing an option under section 421(g). If A exercises the option to purchase the share of M stock on June 1, 1955, section 421 is applicable for A is then employed by a corporation which issued an option under section 421(g).

Example (3). Assume that P Corporation which owns all of the stock of S Corporation grants a restricted stock option to E, an employee of S Corporation. If E exercises the option, section 421 is applicable since E is employed by a corporation which is a subsidiary of the corporation which granted the restricted stock option.

(c)(1) The determination whether an option ultimately exercised is a restricted stock option is made as of the date such option is granted. An option which is a restricted stock option when granted does not lose its character as such an option by reason of subsequent events, and an option which is not a restricted stock option when granted does not become such an option by reason of subsequent events. See, however, § 1.421–4, relating to modification, extension, or renewal of an option.

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). S–1 Corporation is a subsidiary of S Corporation which, in turn, is a subsidiary of P Corporation. On June 1, 1954, P grants to an employee of P a restricted stock option to purchase a share of stock of S–1. On January 1, 1955, S sells a portion of the S–1 stock which it owns to an unrelated

corporation and, as of that date, S–1 ceases to be a subsidiary of S. On May 1, 1955, while still employed by P, the employee exercises his option to purchase a share of S–1 stock. The employee has exercised a restricted stock option.

Example (2). Assume P grants an option to an employee under the same facts as in example (1) above, except that on June 1, 1954, S–1 is not a subsidiary of either S or P. Such option is not a restricted stock option on June 1, 1954. On January 1, 1955, S purchases from an unrelated corporation a sufficient number of shares of S–1 stock to make S–1, as of that date, a subsidiary of S. On May 1, 1955, while still employed by P, the employee exercises his option to purchase a share of S–1 stock. The employee has not exercised a restricted stock option.

(d) For the rules applicable to an exercise of a restricted stock option by the estate of the individual to whom the option was granted, or by a person who acquired the option by bequest or inheritance or by reason of the death of such individual, see paragraph (d) of § 1.421–5.

[T.D. 6500, 25 FR 11694, Nov. 26, 1960, as amended by T.D. 6527, 26 FR 411, Jan. 19, 1961]

§ 1.421–4 Modification, extension, or renewal.

(a) In general. Section 421(e) provides the rules for determining whether a share of stock transferred to an individual upon his exercise of an option, after the terms thereof have been modified, extended, or renewed, is transferred pursuant to the exercise of a restricted stock option. Such rules and the rules of this section are applicable to modifications, extensions, or renewals (or to changes which are not treated as modifications) in the case of an exercise of an option in any taxable year of the optionee which begins after December 31, 1953, and ends after August 16, 1954.

(b) Effect of a modification, extension, or renewal. (1) Any modification, extension, or renewal of the terms of an option to purchase stock shall be considered as the granting of a new option.

(2) Except as otherwise provided in subparagraph (3) of this paragraph, in case of a modification, extension, or renewal of an option, the highest of the following values shall be considered to be the fair market value of the stock at the time of the granting of such option for the purpose of applying the rule of section 421(d)(1)(A)—

(i) The fair market value on the date of the original granting of the option,

(ii) The fair market value on the date of the making of such modification, extension, or renewal, or

(iii) The fair market value at the time of the making of any intervening modification, extension, or renewal.

(3)(i) The rules of subparagraph (2) of this paragraph do not apply if the aggregate of the monthly average fair market values of the stock subject to the option for the 12 consecutive calendar months preceding the month in which the modification, extension, or renewal occurs, divided by 12, is an amount less than 80 percent of the fair market value of such stock on the date of the original granting of the option or the date of the making of any intervening modification, extension, or renewal, whichever is the highest. In such case, any modification, extension, or renewal of the option is treated as the granting of a new option but only the fair market value of the stock subject to the option at the time of the modification, extension, or renewal is considered in determining whether the option is a restricted stock option. In the case of stocks listed on a stock exchange, the average fair market value of the stock for any month may be determined by adding the highest and lowest quoted selling prices during such month and dividing the sum by two. The method used for determining the average fair market value of the stock for any month must be used for all twelve months, except where it is shown that such method cannot be used for any month or does not clearly reflect the average fair market value of the stock for any such month.

(ii) The application of subdivision (i) of this subparagraph may be illustrated by the following example:

Example. On June 1, 1954, a restricted stock option was granted to purchase before July 1, 1955, a share of stock for $85. The fair market value of such stock on June 1, 1954, was $100. On June 15, 1955, when the fair market value of the stock is $60, such option is extended so that it is exercisable at any time before July 1, 1956, at $55 a share. The average fair market value of the stock subject to the option for each of the 12 calendar months preceding June 1955, is as follows:

1954	
June	$100
July	90
August	80
September	70
October	80
November	80
December	90
1955	
January	90
February	80
March	70
April	60
May	60

The aggregate of such values is $950. When this sum is divided by 12, the result is $79.17, which is an amount less

than 80 percent of the fair market value of the stock ($100) when the option was granted. Accordingly, when the option is extended on June 15, 1955, the option price could have been reduced as low as $51 (85 percent of the fair market value of the stock on such day) without disqualifying the option as a restricted stock option. If the aggregate fair market values of the stock so ascertained had amounted to $960 or more, the rules of subparagraph (2) of this paragraph would have been applicable with the result that any reduction in the option price would have disqualified the option as a restricted stock option.

(c) Definition of modification, extension, or renewal. (1) The time or date when an option is modified, extended, or renewed shall be determined, insofar as applicable, in accordance with the rules governing determination of the time or date of granting an option provided in paragraph (b) of § 1.421–1. For the purpose of section 421, the term "modification" means any change in the terms of the option which gives the optionee additional benefits under the option. For example, a change in the terms of the option, which shortens the period during which the option is exercisable, is not a modification. However, a change, which accelerates the time when the option is first exercisable, or which provides more favorable terms for the payment for the stock purchased under the option, is a modification. A mere change in the terms of the option, with respect to the number or price of the shares of stock subject to the option, to reflect a stock dividend or stock split-up is not a modification of the option. In case there is an assumption or substitution of the option by reason of certain corporate transactions, see paragraph (d) of this section. Where an option is amended solely to increase the number of shares subject to the option, such increase shall not be considered as a modification of the option, but shall be treated as the grant of a new option for the additional shares.

(2) Any change in the terms of an option for the purpose of qualifying the option as a restricted stock option grants additional benefits and, therefore, is a modification. For example, if an option was granted to purchase for $80 a share of stock, the fair market value of which was $100 at such time, and if later the option price is increased to $85 in order to meet the requirement of section 421(d)(1)(A), such change is a modification of the option, although the price is increased. Accordingly, the option, despite the change, is not a restricted stock option if the fair market value of the share is more than $100 when the price is increased. However, if the terms of an option are changed to provide that the optionee cannot transfer the option except by will or by the laws of descent and distribution, such change is not a modification, provided the option is at the same time changed so that it is not exercisable after the expiration of ten years from the date the option was granted.

(3) An extension of an option refers to the granting by the corporation to the optionee of an additional period of time within which to exercise the option beyond the time originally prescribed. A renewal of an option is the granting by the corporation of the same rights or privileges contained in the original option on the same terms and conditions. The rules of this paragraph apply as well to successive modifications, extensions, and renewals.

(d) Assumption or substitution of restricted stock options in connection with certain corporate transactions. (1) Where, by reason of a corporate transaction, as defined in this paragraph, an employer corporation, or its parent or subsidiary corporation, assumes an existing option, or issues a new option in place of the old option, such assumption or issuance is not a modification, if—

(i) The excess of the aggregate fair market value of the stock subject to the option immediately after such assumption or issuance over the aggregate option price is not more than the excess of the aggregate fair market value of the stock subject to the option immediately before such assumption or issuance over the aggregate option price, and

(ii) Such assumption of the old option, or issuance of the new option, does not give the optionee additional benefits under the option.

For the purpose of this paragraph, the term "corporate transaction" means a corporate merger, consolidation, purchase or acquisition of property or stock, separation, reorganization, or liquidation. Thus, for this purpose, a "corporate transaction" includes a taxable transaction (such as, a purchase of stock or property for cash) and any corporate reorganization (whether or not it comes within the definition of such term in section 368) and any corporate liquidation (whether or not section 332 is applicable).

(2)(i) Section 421(g) provides rules under which a new employer, or parent or subsidiary of a new employer, may by reason of a corporate transaction assume a restricted stock option granted by the former employer or parent or subsidiary thereof, or issue a new restricted stock option in place of the option granted by the former employer or parent or subsidiary thereof, without having such assumption or substitution considered a modification of the option. For example, section 421(g) may apply where there is a merger of X Corporation into Y Corporation and Y Corporation wishes to employ the employees of X Corporation and to

assume restricted stock options which had been granted to them by their former employer, X Corporation. Another example is where X Corporation forms a new subsidiary, Y Corporation, and transfers to it certain assets and employees, and where Y Corporation wishes to grant to such employees a restricted stock option to purchase its stock in place of the restricted stock option which they had to purchase stock of X Corporation.

(ii) Section 421(g) also provides rules under which a new parent or subsidiary corporation of the employer corporation may by reason of a corporate transaction assume a restricted stock option granted by the employer or parent or subsidiary thereof, or issue a new restricted stock option in place of the option granted by the employer or parent or subsidiary thereof, without having such assumption or substitution considered a modification of the option. Section 421(g) may apply, for example, where X Corporation acquires a new subsidiary, Y Corporation, by purchase of stock and desires to grant to the employees of Y Corporation a restricted stock option to buy stock of X Corporation in place of the restricted stock option which they have to purchase the stock of Y Corporation.

(iii) Section 421(g) applies only when the assumption or substitution occurs by reason of a corporate transaction as defined in this paragraph. Thus, section 421(g) may apply where as a result of a corporate transaction a restricted stock option can no longer be exercised, or if exercised, section 421 would not apply (see the first example in subdivision (i) of this subparagraph). Moreover, section 421(g) may apply in any case where the reason for the assumption or substitution grows out of a corporate transaction even though there could have been a valid exercise under section 421 of the original option (see the second example in subdivision (i) of this subparagraph and the example in subdivision (ii) of this subparagraph). However, a corporation which has issued an option may not substitute a new option for such option under section 421(g).

(3) For section 421(g) to apply, it is not necessary to show that the corporation assuming or substituting the option is under any obligation to do so. In fact, section 421(g) may apply where the option which is being assumed or replaced expressly provides that it will terminate upon the occurrence of certain corporate transactions. However, section 421(g) cannot be applied to revive a restricted stock option which, for reasons not related to the corporate transaction, expires before it can properly be assumed or replaced under section 421(g). For section 421(g) to apply, the assumed or substituted option must qualify as a restricted stock option.

(4) Section 421(g) does not apply if the terms of the assumed or substituted option confer on the employee more favorable benefits than he had under the old option. Thus, section 421(g) would not apply if the old option had just two years to run but the new option has more than two years to run.

(5) For the purpose of applying section 421(g), the assumption or substitution shall be considered to occur at the time that the optionee would, except for section 421(g), be considered to have been granted the option which the employer corporation, or parent or subsidiary thereof, is issuing or assuming. An assumption or substitution which occurs by reason of a corporate transaction may occur before or after the corporate transaction.

(6) In order to have a substitution of an option under section 421(g) the optionee must, in connection with the corporate transaction, lose his rights under the old option. There cannot be a substitution of a new option for an old option within the meaning of section 421(g) if it is contemplated that the optionee may exercise both the old option and the new option. It is not necessary, however, to have a complete substitution of a new option for the old option. For example, assume that X Corporation forms a new corporation, Y Corporation, by a transfer of certain assets and distributes the stock of Y Corporation to the shareholders of X Corporation. Assume further that E, an employee of X Corporation, is thereafter an employee of both X Corporation and Y Corporation. Y Corporation wishes to substitute an option to purchase some of its stock for the restricted stock option which employee E has entitling him to purchase 100 shares of the stock of X Corporation. The option to purchase the stock of X Corporation, at $42.50 a share, was granted when the stock had a fair market value of $50 a share, and the stock was worth $100 a share just before the distribution of the new corporation's stock to the shareholders of X Corporation. The stock of X Corporation and of Y Corporation is worth $50 a share just after such distribution, which also is the time of the substitution. On these facts an option to purchase 200 shares of stock of Y Corporation at $21.25 a share could be given to the employee in complete substitution for the old option. It would also be permissible to give the employee an option to purchase 100 shares of stock of Y Corporation at $21.25 a share in substitution for his

right to purchase 50 of the shares covered by the old option.

(7) Any reasonable methods may be used to determine the fair market value of the stock subject to the option immediately before the assumption or substitution and the fair market value of the stock subject to the option immediately after the assumption or substitution. Such methods include the valuation methods described in § 20.2031–2 of this chapter (the Estate Tax Regulations). In the case of stock listed on a stock exchange, the fair market value may be based on the last sale before and the first sale after the assumption or substitution if such sales clearly reflect the fair market value of the stock, or may be based upon an average selling price during a longer period, such as the day or week before, and the day or week after, the assumption or substitution. If the stocks are not listed, or if they are newly issued, it will be reasonable to base the determination on experience over even longer periods. In the case of a merger, consolidation, or other reorganization which is arrived at by arm's length negotiations, the fair market value of the stocks subject to the option before and after the assumption or substitution may be based upon the values assigned to the stock for purposes of the reorganization. For example, if in the case of a merger the parties treat each share of the merged company as being equal in value to a share of the surviving company, it will be reasonable to assume that the stocks are of equal value so that the substituted option may permit the employee to purchase at the same price one share of the surviving company for each share he could have purchased of the merged company.

(8) For the purpose of applying section 421(g), the determination of whether the parent-subsidiary relationship exists shall be based upon circumstances existing immediately after the corporate transaction.

(e) **Effect on qualification.** A restricted stock option may, as a result of a modification, extension, or renewal, thereafter cease to be a restricted stock option, or any option may, by modification, extension, or renewal, thereafter become a restricted stock option.

(f) **Examples.** The rule stated in section 421(e) may be illustrated by the following examples:

Example (1). On June 1, 1954, the X Corporation grants to an employee an option to purchase 100 shares of the stock of X Corporation at $90 per share, such option to be exercised on or before June 1, 1956. At the time the option is granted, the fair market value of the X Corporation stock is $100 per share. On February 1, 1955, before the employee exercises the option, X Corporation modifies the option to provide that the price at which the employee may purchase the stock shall be $80 per share. On February 1, 1955, the fair market value of the X Corporation stock is $90 per share. Under section 421(e), the X Corporation is deemed to have granted an option to the employee on February 1, 1955. Unless the value of the stock has substantially declined making paragraph (b)(3) of this section applicable, such option shall be treated as an option to purchase at $80 per share 100 shares of stock having a fair market value of $100 per share, that is, the higher of the fair market value of the stock on June 1, 1954, and on February 1, 1955. The exercise of such option by the employee after February 1, 1955, is not the exercise of a restricted stock option.

Example (2). On June 1, 1954, the X Corporation grants to an employee a restricted stock option to purchase 100 shares of X Corporation stock at $90 per share, exercisable after December 31, 1955, and on or before June 1, 1956. On June 1, 1954, the fair market value of X Corporation's stock is $100 per share. On February 1, 1955, X Corporation modifies the option to provide that the option shall be exercisable on or after February 1, 1955, and on or before June 1, 1956. On February 1, 1955, the fair market value of X Corporation stock is $110 per share. Under section 421(e), X Corporation is deemed to have granted an option to the employee on February 1, 1955, to purchase at $90 per share 100 shares of stock having a fair market value of $110 per share, that is, the higher of the fair market value of the stock on June 1, 1954, and on February 1, 1955. The exercise of such option by the employee is not the exercise of a restricted stock option.

Example (3). The facts are the same as in example (1), except that the employee exercised the option to the extent of 50 shares on January 15, 1955, before the date of the modification of the option. Any exercise of the option after February 1, 1955, the date of the modification, is not the exercise of a restricted stock option. See example (1) in this paragraph. The exercise of the option on January 15, 1955, pursuant to which 50 shares were acquired, is the exercise of a restricted stock option.

Example (4). On June 1, 1954, the X Corporation grants to an employee an option to purchase 100 shares of the stock of X Corporation at $80 per share, such option to be exercised on or before June 1, 1956. At the time the option is granted, the fair market value of the X Corporation stock is $100 per share. On February 1, 1955, before the employee exercises the option, the X Corporation modifies the option to provide that the number of shares of stock which the employee may purchase at $80 per share will be 250. On February 1, 1955, the fair market value of the X Corporation stock is $90 per share. Under these facts, the X Corporation has granted two options, one option (not a restricted stock option) with respect to 100 shares having been granted on June 1, 1954, and the other option (a restricted stock option) with respect to the additional 150 shares having been granted on February 1, 1955. In the absence of facts identifying which option is exercised first, the employee will be deemed to have exercised the options in the order in which they were granted.

[T.D. 6500, 25 FR 11694, Nov. 26, 1960]

§ 1.421–5 Operation of section 421.

(a) **Rules applicable to all restricted stock options—(1) In general.** If a share of stock is transferred to an individual pursuant to his timely exercise of a restricted stock option and is not disposed of by him within two years from the date

of the granting of the option nor within 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) after the transfer of such share to him, then, under section 421(a)—

(i) No income shall result at the time of the transfer of such share to the individual upon his exercise of the option with respect to such share;

(ii) No deduction under section 162 shall be allowable at any time to the employer corporation of such individual or its parent or subsidiary corporation, or to a corporation which assumed or issued the option under section 421(g), with respect to the share so transferred; and

(iii) No amount other than the option price shall be considered as received by any of such corporations for the share so transferred.

For the purpose of subdivisions (i), (ii), and (iii) of this subparagraph, each share of stock transferred pursuant to a restricted stock option is treated separately. For example, if an individual, while employed by a corporation granting him a restricted stock option, exercises the option with respect to part of the stock covered by the option, and if such individual exercises the balance of the option more than three months after leaving such employment, the application of section 421 to the stock obtained upon the earlier exercise of the option is not affected by the fact that the income taxes of the employer and the individual with respect to the stock obtained upon the later exercise of the option are not determined under section 421.

(2) Holding period. The special rules provided in section 421(a) are not applicable if the individual disposes of the share of stock within two years from the date the option is granted or within six months after the transfer of such share to him. Section 421 is not made inapplicable by a transfer within the 2-year or 1-year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) period if such transfer is not a disposition of the stock as defined in subparagraph (3) of this paragraph, for example, a transfer from the decedent to his estate or a transfer by bequest or inheritance. Similarly, a disposition by the executor, administrator, heir, or legatee is not a disposition by the decedent. In case a restricted stock option is exercised by the estate of the individual to whom the option was granted, or by a person who acquired the option by bequest or inheritance or by reason of the death of such individual, see paragraph (d) of this section.

(3) Disposition of stock. (i) For the purpose of section 421, the term "disposition" includes a sale, exchange, gift, or any transfer of legal title, but does not include—

(a) A transfer from a decedent to his estate or a transfer by bequest or inheritance; or

(b) An exchange which occurs in a taxable year of the optionee beginning after December 31, 1953, and ending after August 16, 1954, and to which is applicable section 354, 355, 356, or 1036 (or so much of section 1031 as relates to section 1036) or a corresponding provision of the Internal Revenue Code of 1939; or

(c) A mere pledge or hypothecation. However, a disposition of the stock pursuant to a pledge or hypothecation is a disposition by the individual, even though the making of the pledge or hypothecation is not such a disposition.

(ii) If an individual exercises a restricted stock option, a share of stock acquired pursuant to such exercise is not considered disposed of by the individual if such share is taken in the name of the individual and another person jointly with right of survivorship, or is subsequently transferred into such joint ownership, or is retransferred from such joint ownership to the sole ownership of the individual. However, any termination of such joint ownership is a disposition of such share, except to the extent that the individual reacquires ownership of the share. For example, if such individual and his joint owner transfer such share to another person, the individual has made a disposition of such share. Likewise, if a share of stock held in the joint names of such individual and another person is transferred to the name of such other person, there is a disposition of such share by the individual. If an individual exercises a restricted stock option and a share of stock is transferred to another or is transferred to such individual in his name as trustee for another, the individual has made a disposition of such share.

(4) Examples. The rules of section 421(a) may be illustrated by the following examples:

Example (1). On June 1, 1954, the X Corporation grants to E, an employee, a restricted stock option to purchase 100 shares of X Corporation stock at $95 per share. On that date, the fair market value of X Corporation stock is $100 per share. On June 1, 1955, while employed by X Corporation, E exercises the option in full and pays X Corporation $9,500, and on that day X Corporation transfers to E 100 shares of its stock having a fair market value of $12,000. Before June 1, 1956, E makes no disposition of the 100 shares so purchased. E realizes no income on June 1, 1955, with respect to the transfer to him of the 100 shares of X Corporation stock. X Corporation is not entitled to any deduction at any time with respect to

its transfer to E of the stock. E's basis for such 100 shares is $9,500.

Example (2). Assume, in example (1), that on August 1, 1956, two years and two months after the granting of the option and one year and two months after the transfer of the shares to him, E sells the 100 shares of X Corporation stock for $13,000, which is the fair market value of the stock on that date. For the taxable year in which the sale occurs, E realizes a gain of $3,500 ($13,000 minus E's basis of $9,500), which is treated as long-term capital gain.

Example (3). Assume, in example (2), that on August 1, 1956, E makes a gift of the 100 shares of X Corporation stock to his son. Such disposition results in no realization of gain to E either for the taxable year in which the option is exercised or the taxable year in which the gift is made. E's basis of $9,500 becomes the donee's basis for determining gain or loss.

Example (4). Assume, in example (1), that on May 1, 1956, one year and 11 months after the granting of the option and 11 months after the transfer of the shares to him, E sells the 100 shares of X Corporation stock for $13,000. The special rules of section 421(a) are not applicable to the transfer of the stock by X Corporation to E, because disposition of the stock was made by E within two years from the date the option was granted. See paragraph (e) of this section for the effect of a disqualifying disposition.

Example (5). Assume, in example (1), that E dies on September 1, 1955, owning the 100 shares of X Corporation stock acquired by him pursuant to his exercise on June 1, 1955, of the restricted stock option. On the date of death, the fair market value of the stock is $12,500. No income is realized by E by reason of the transfer of the 100 shares to his estate. If the stock is valued as of the date of E's death for estate tax purposes, the basis of the 100 shares in the hands of the executor is $12,500.

(b) Additional rules applicable where the option price is between 85 percent and 95 percent of the value of the stock—(1) In general. (i) If all the conditions necessary for the application of section 421(a) exist, section 421(b) provides additional rules which are applicable in cases where, at the time the restricted stock option is granted, the option price per share is less than 95 percent (but not less than 85 percent) of the fair market value of such share. In such case, upon the disposition of such share by the individual after the expiration of the 2-year and the 1-year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) periods, or upon his death while owning such share (whether occurring before or after the expiration of such periods), there shall be included in the individual's gross income as compensation (and not as gain upon the sale or exchange of a capital asset) an amount determined in the following manner. If the option qualified under section 421(d)(1)(A)(i) (see paragraph (d)(2)(i)(a) of § 1.421–1), such amount shall be the amount, if any, by which the option price is exceeded by the lesser of the fair market value of the share at the time the option was granted or the fair market value of the share at the time of such disposition or death. However, if the option qualified under section 421(d)(1)(A)(ii) (see paragraph (d)(2)(i)(b) of § 1.421–1), such amount shall be whichever of the following amounts is lesser:

(a) The excess of the fair market value of the share at the time of such disposition or death over the price paid under the option, or

(b) The excess of the fair market value of the share at the time the option was granted over the option price, computed as if the option had been exercised at such time.

The amount of such compensation shall be included in the individual's gross income for the taxable year in which the disposition occurs or for the taxable year closing with his death, whichever event results in the application of section 421(b).

(ii) The application of the special rules provided in section 421(b) shall not affect the rules provided in section 421(a) with respect to the individual exercising the option, the employer corporation, or its parent or subsidiary corporation. Thus, notwithstanding the inclusion of an amount as compensation in the gross income of an individual, as provided in section 421(b), no income results to the individual at the time the stock is transferred to him, and no deduction under section 162 is allowable at any time to the employer corporation or its parent or subsidiary with respect to such amount.

(iii) If the individual exercises a restricted stock option during his lifetime and dies before the stock is transferred to him pursuant to his exercise of the option, the transfer of such stock to the individual's executor, administrator, heir, or legatee is deemed, for the purpose of section 421, to be a transfer of the stock to the individual exercising the option and a further transfer by reason of death from such individual to his executor, administrator, heir, or legatee.

(2) Basis. If the special rules provided in section 421(b) are applicable to the disposition of a share of stock by an individual, the basis of such share in the individual's hands at the time of such disposition, determined under section 1011, shall be increased by an amount equal to the amount includible as compensation in his gross income under section 421(b). However, in the case of a share of stock acquired by the exercise of a restricted stock option after the death of the employee to whom the option was granted, the basis of such share shall be determined in accordance with the rules of paragraph (d)(4) of this section. If the special rules provided in section 421(b) are applicable to a share of stock upon the death of an individual, the basis of such share in the hands of

the estate or the person receiving the stock by bequest or inheritance shall be determined under section 1014, and shall not be increased by reason of the inclusion upon the decedent's death of any amount in his gross income under section 421(b). See example (9) of this paragraph with respect to the determination of basis of the share in the hands of a surviving joint owner.

(3) **Examples.** The operation of section 421(b) may be illustrated by the following examples:

Example (1). On June 1, 1954, the X Corporation grants to E, an employee, a restricted stock option to purchase a share of X Corporation's stock for $85. The fair market value of the X Corporation stock on such date is $100 per share. On June 1, 1955, E exercises the restricted stock option and on that date the X Corporation transfers the share of stock to E. On January 1, 1957, E sells the share for $150, its fair market value on that date. E makes his income tax return on the basis of the calendar year. The income tax consequences to E and X Corporation are as follows: (i) Compensation in the amount of $15 is includible in E's gross income for 1957, the year of the disposition of the share. The $15 represents the difference between the option price ($85) and the fair market value of the share on the date the option was granted ($100), since such value is less than the fair market value of the share on the date of disposition ($150). For the purpose of computing E's gain or loss on the sale of the share, E's cost basis of $85 is increased by $15, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $100. Since the share was sold for $150, E realizes a gain of $50, which is treated as long-term capital gain; (ii) The X Corporation is entitled to no deduction under section 162 at any time with respect to the share transferred to E.

Example (2). Assume, in example (1), that E sells the share of X Corporation stock on January 1, 1958, for $75, its fair market value on that date. Since $75 is less than the option price ($85), no amount in respect of the sale is includible as compensation in E's gross income for 1958. E's basis for determining gain or loss on the sale is $85. Since E sold the share for $75, E realized a loss of $10 on the sale, which loss is treated as a long-term capital loss.

Example (3). Assume, in example (1), that the option provides that the option price shall be 90 percent of the fair market value of a share of the stock on the day the option is exercised. On June 1, 1955, when the option is exercised, the fair market value of the stock is $120 per share so that E pays $108 for the share of stock. Compensation in the amount of $10 is includible in E's gross income for 1957, the year of the disposition of the share. This is determined in the following manner. The excess of the fair market value of the stock at the time of the disposition ($150) over the price paid for the share ($108) is $42; and the excess of the fair market value of the stock at the time the option was granted ($100) over the option price, computed as if the option had been exercised at such time ($90), is $10. Accordingly, $10 the lesser, is includible in gross income. In this situation, E's cost basis of $108 is increased by $10, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $118. Since the share was sold for $150, E realizes a gain of $32, which is treated as long-term capital gain.

Example (4). Assume, in example (1), that instead of selling the share on January 1, 1957, E makes a gift of the share on that day. In such case, $15 is includible as compensation in E's gross income for 1957. E's cost basis of $85 is increased by $15, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $100, which becomes the donee's basis, as of the time of the gift, for determining gain or loss.

Example (5). Assume, in example (2), that instead of selling the share on January 1, 1958, E makes a gift of the share on that date. Since the fair market value of the share on that day ($75) is less than the option price ($85), no amount in respect of the disposition by way of gift is includible as compensation in E's gross income for 1958. E's basis for the share is $85, which becomes the donee's basis, as of the time of the gift, for the purpose of determining gain. The donee's basis for the purpose of determining loss, determined under section 1015(a), is $75 (fair market value of the share at the date of gift).

Example (6). Assume, in example (1), that after acquiring the share of stock on June 1, 1955, E dies on August 1, 1956, at which time the share has a fair market value of $150. Compensation in the amount of $15 is includible in E's gross income for the taxable year closing with his death, such $15 being the difference between the option price ($85) and the fair market value of the share when the option was granted ($100), since such value is less than the fair market value at date of death ($150). The basis of the share in the hands of E's estate is determined under section 1014 without regard to the $15 includible in the decedent's gross income.

Example (7). Assume, in example (6), that E dies on August 1, 1955, at which time the share has a fair market value of $150. Although E's death occurred within two years from the date of the granting of the option and within six months after the transfer of the share to him, the income tax consequences are the same as in example (6).

Example (8). Assume the same facts as in example (1), except that the share of stock was issued in the names of E and his wife jointly with right of survivorship, and except that E and his wife sold the share on June 15, 1956, for $150, its fair market value on that date. Compensation in the amount of $15 is includible in E's gross income for 1956, the year of the disposition of the share. The basis of the share in the hands of E and his wife for the purpose of determining gain or loss on the sale is $100, that is, the cost of $85 increased by the amount of $15 includible as compensation in E's gross income. The gain of $50 on the sale is treated as long-term capital gain, and is divided equally between E and his wife.

Example (9). Assume the same facts as in example (1), except that the share of stock was issued in the names of E and his wife jointly with right of survivorship, and except that E predeceased his wife on August 1, 1956, at which time the share had a fair market value of $150. Compensation in the amount of $15 is includible in E's gross income for the taxable year closing with his death. See example (6). The basis of the share in the hands of E's wife as survivor is determined under section 1014 without regard to the $15 includible in the decedent's gross income.

Example (10). Assume, in example (9), that E's wife predeceased him on July 1, 1956. Section 421(b) does not apply in respect of her death. Upon the subsequent death of E on August 1, 1956, the income tax consequences in respect of E's taxable year closing with the date of his death, and in respect of the basis of the share in the hands of his estate, are the same as in example (6). If E had sold the share on July 15, 1956 (after the death of his wife), for $150, its fair market value at that time, the income tax consequences would be the same as in example (1).

(c) Acquisition of other stock. (1) Section 421(c) provides that the special rules stated in section 421 (a) and (b), if applicable with respect

to stock transferred to an individual upon his exercise of an option, shall likewise be applicable with respect to stock acquired by a distribution or an exchange to which is applicable section 305, 354, 355, 356, or 1036 (or so much of section 1031 as relates to section 1036) or a corresponding provision of the Internal Revenue Code of 1939. Stock so acquired shall, for the purpose of section 421, be considered as having been transferred to the individual upon his exercise of the option. A similar rule shall be applied in the case of a series of such acquisitions. With respect to such acquisitions, section 421(c) does not make inapplicable any of the provisions of section 305, 354, 355, 356, or 1036 (or so much of section 1031 as relates to section 1036). Section 421(c) is applicable only with respect to such acquisitions which occur in any taxable year of the shareholder which begins after December 31, 1953, and ends after August 16, 1954. As to acquisitions occurring in earlier taxable years, see section 130A(c) of the Internal Revenue Code of 1939.

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following example:

Example. If, with respect to stock transferred pursuant to the timely exercise of a restricted stock option, there is a distribution of new stock to which section 305(a) is applicable, and if there is a disposition of such new stock within two years after the option was granted, such disposition makes section 421 inapplicable to the transfer of the original stock pursuant to the exercise of the option to the extent that the disposition effects a reduction of the individual's total interest in the old and new stock. However, if the new stock, as well as the old stock, is not disposed of within two years after the option was granted, nor within 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) after the transfer of the old stock pursuant to the exercise of the option, section 421 is applicable.

(d) Exercise after death. (1) If a restricted stock option is exercised by the estate of the individual to whom the option was granted, or by any person who acquired such option by bequest or inheritance or by reason of the death of such individual, and if such exercise occurs in a taxable year of the estate or of such person beginning after December 31, 1953, and ending after August 16, 1954, section 421 applies to such exercise in the same manner as if such option had been exercised by such deceased individual. Consequently, neither the estate nor such person is required to include any amount in gross income as a result of a transfer of stock pursuant to such exercise of the option. Nor does section 421 become inapplicable if such executor, administrator, or person disposes of the stock so acquired within two years after the granting of such option or within 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) after the transfer of the stock pursuant to the exercise of such option. This exception as to the applicability of section 421 does not affect the applicability of section 1222, relating to what constitutes a short-term and long-term capital gain or loss. The executor, administrator, or such person need not exercise the option within three months after the death of the individual to whom the option was granted for section 421 to be applicable. However, the exercise of the option must be pursuant to the terms of the option, and any change in the terms of the option is subject to the rules of § 1.421–4, relating to the modification, extension, or renewal of the option. Section 421 is applicable even though such executor, administrator, or person is not employed by the corporation granting the option, or a parent or subsidiary thereof, either when the option is exercised or at any time. However, section 421 is not applicable to an exercise of the option by the estate or by such person, unless the individual to whom the option was granted met the requirements of paragraph (b) of § 1.421–3, relating to the employment of such individual, either at the time of his death or within three months before such time. If the option is exercised by a person other than the executor or administrator, or other than a person who acquired the option by bequest or inheritance or by reason of the death of such deceased individual, section 421 is not applicable to the exercise. For example, if the option is sold by the estate, section 421 does not apply to an exercise of the option by such buyer; but if the option is distributed by the administrator to an heir as part of the estate, section 421 is applicable to an exercise of the option by such heir.

(2) Any transfer by the estate, whether a sale, a distribution of assets, or otherwise, of the stock acquired by its exercise of the option under this paragraph is a disposition of the stock. Therefore, if section 421(b) is applicable, the estate must include an amount as compensation in its gross income. Similarly, if section 421(b) is applicable in case of an exercise of the option under this paragraph by a person who acquired the option by bequest or inheritance or by reason of the death of the individual to whom the option was granted, there must be included in the gross income of such person an amount as compensation, either when such person disposes of the stock, or when he dies owning the stock.

(3)(i) If under section 421(b) an amount is required to be included in the gross income of the estate or of such person, the estate or such person

shall be allowed a deduction as a result of the inclusion of the value of the restricted stock option in the estate of the individual to whom the option was granted. Such deduction shall be computed under section 691(c) by treating the restricted stock option as an item of gross income in respect of a decedent under section 691 and by treating the amount required to be included in gross income under section 421(b) as an amount included in gross income under section 691 in respect of such item of gross income. No such deduction shall be allowable with respect to any amount other than an amount includible under section 421(b). For the rules relating to the computation of a deduction under section 691(c), see § 1.691(c)–1.

(ii) The application of subdivision (i) may be illustrated by the following example:

Example. On June 1, 1953, E was granted a restricted stock option to purchase for $85 one share of the stock of his employer. On such day, the fair market value of such stock was $100 a share. E died on February 1, 1954, without having exercised such option. The option was, however, exercisable by his estate, and for purposes of the estate tax was valued at $30. On March 1, 1955, the estate exercised the option, and on March 15, 1955, sold for $150 the share of stock so acquired. For its taxable year including March 15, 1955, the estate is required by section 421(b) to include in its gross income as compensation the amount of $15. During such taxable year, no amounts of income were properly paid, credited, or distributable to the beneficiaries of the estate. However, under section 421(d)(6)(B), the estate is entitled to a deduction determined in the following manner. E's estate includes no other items of income in respect of a decedent referred to in section 691(a), and no deductions referred to in section 691(b), so that the value for estate tax purposes of the restricted stock option, $30, is also the net value of all items of income in respect of the decedent. The estate tax attributable to the inclusion of the restricted stock option in the estate of E is $10. Since $15, the amount includible in gross income by reason of section 421(b), is less than the value for estate tax purposes of the option, only $^{15}/_{30}$ of the estate tax attributable to the inclusion of the option in the estate is deductible; that is, $^{15}/_{30}$ of $10, or $5. No deduction under section 421(d)(6)(B) is allowable with respect to any capital gain.

(4)(i) In the case of an employee dying before January 1, 1957, the basis of any share of stock acquired by the exercise of the option under this paragraph, determined under section 1011, shall be increased by an amount equal to the amount includible as compensation in his gross income under section 421(b). The basis of the share shall not be increased by reason of the inclusion of the value of the restricted stock option in the estate for estate tax purposes.

(ii)(a) In the case of an employee dying after December 31, 1956, the basis of any share of stock acquired by the exercise of the option under this paragraph, determined under section 1011, shall be increased by an amount equal to the portion of the basis of the option attributable to such share. For example, if a restricted stock option to acquire 10 shares of stock has a basis of $100, the basis of one share acquired by a partial exercise of the option, determined under section 1011, would be increased by $^{1}/_{10}$ of $100, or $10. The option acquires a basis, determined under section 1014(a), only if it is exercised in accordance with section 421. Therefore, to the extent the option is so exercised, in whole or in part, it will acquire a basis equal to its fair market value at the date of the employee's death or, if an election is made under section 2032, its value at its applicable valuation date. In certain cases, the basis of the share is subject to the adjustments provided by (b) and (c) of this subdivision, but such adjustments are only applicable in the case of an option which is subject to section 421(b).

(b) If the amount which would have been includible in gross income under section 421(b) had the employee exercised the option and held the share at the time of his death exceeds the amount which is includible in gross income under section 421(b), the basis of the share, determined under (a) of this subdivision, shall be reduced by such excess. For example, if $15 would have been includible in the gross income of the employee had he exercised the option and held such share at the time of his death, and only $10 is includible under section 421(b), the basis of the share, determined under (a) of this subdivision, would be reduced by $5. For purposes of determining the amount which would have been includible in gross income under section 421(b) if the employee had exercised the option and held such share at the time of his death, the amount which would have been paid for the share shall be computed as if the option had been exercised on the date the employee died.

(c) If the amount includible in gross income under section 421(b) exceeds the portion of the basis of the option attributable to the share, the basis of the share, determined under (a) of this subdivision, shall be increased by such excess. Thus, if $15 is includible in gross income under section 421(b), and the basis of the option with respect to the share is $10, the basis of the share, determined under (a) of this subdivision, will be increased by $5.

(iii) If a restricted stock option is not exercised by the estate of the individual to whom the option was granted, or by the person who acquired such option by bequest or inheritance or by reason of the death of such individual, the option shall be considered to be property which constitutes a right

to receive an item of income in respect of a decedent to which the rules of sections 691 and 1014(c) apply.

(iv) The application of this subparagraph may be illustrated by the following examples:

Example (1). On June 1, 1954, the X Corporation granted to E, an employee, a restricted stock option to purchase a share of X Corporation's stock for $85. The fair market value of the X Corporation stock on such date was $100 per share. On June 1, 1955, E died. The fair market value of X Corporation stock on such date exceeded $100 per share and the fair market value of the option on the applicable valuation date was $35. On August 1, 1956, the estate of E exercised the option and sold the share of X Corporation stock at a time when the fair market value of the share was $90. The estate is required by section 421(b) to include $5 in its gross income as compensation. Since E died before January 1, 1957, the basis of the share is $90 (the $85 paid for the stock plus the $5 includible in gross income as compensation), and the basis of the share is not increased by reason of the inclusion of the value of the option in the estate of E (see section 1014(d)). Thus, no gain or loss is realized on the disposition of the share since the basis of the share is equal to the sale price.

Example (2). On June 1, 1956, the X Corporation granted to E, an employee, a restricted stock option to purchase a share of X Corporation stock for $85. The fair market value of X Corporation stock on such date was $100 per share. On June 1, 1957, E died. The fair market value of X Corporation stock on such date exceeded $100 per share and the fair market value of the option on the applicable valuation date was $35. On August 1, 1958, the estate of E exercised the option and sold the share of X Corporation stock at a time when the fair market value of the share was $120. The basis of the share is $120 (the $85 paid for the stock plus the $35 basis of the option). When the share is sold for $120, the estate is required to include $15 in its gross income as compensation. Since $15 would have been includible in E's gross income if he had exercised the option and held such share at the time of his death, subdivision (ii)(b) of this subparagraph does not apply. Moreover, since the $15 includible in the gross income of the estate does not exceed the basis of the option ($35), subdivision (ii)(c) of this subparagraph does not apply. Since the basis of the stock and the sale price are the same, no gain or loss is realized by the estate on the disposition of the share.

Example (3). Assume the same facts as in example (2), except that the fair market value of the share of stock at the time if its sale was $90. The basis of the share, determined under subdivision (ii)(a) of this subparagraph, is $120 (the $85 paid for the stock plus the $35 basis of the option). When the share is sold for $90, the estate is required to include $5 in its gross income as compensation. If the employee had exercised the option and held the share at the time of this death, $15 would have been includible in gross income as compensation for the taxable year ending with his death. Since such amount exceeds by $10 the amount which the estate is required to include in its gross income, subdivision (ii)(b) of this subparagraph applies, and the basis of the share ($120), determined under subdivision (ii)(a) of this subparagraph is reduced by $10. Accordingly, the basis is $110, and a capital loss of $20 is realized on the disposition of the share.

Example (4). Assume the same facts as in example (2), except that the fair market value of the option on the applicable valuation date was $5, and that the fair market value of X Corporation stock on the date the employee died did not exceed $100. The basis of the share, determined under subdivision (ii)(a) of this subparagraph, is $90 (the $85 paid for the stock plus the $5 basis of the option). When the share is sold for $120, the estate is required to include $15 in its gross income as compensation. Since such amount exceeds by $10 the basis of the option, subdivision (ii)(c) of this subparagraph applies, and the basis of the share ($90), determined under subdivision (ii)(a) of this subparagraph, is increased by $10. Accordingly, the basis is $100 and a capital gain of $20 is realized on the disposition of the share.

Example (5). Assume the same facts as in example (2), except that on June 1, 1957, the date the employee died, the fair market value of X Corporation stock was $98, and that on June 1, 1958, the alternate valuation date, the fair market value of the stock had declined substantially, and the fair market value of the option was $5. On August 1, 1958, the estate of E exercised the option and sold the share when its fair market value was $92. The basis of the share, determined under subdivision (ii)(a) of this subparagraph, is $90 (the $85) paid for the stock plus the $5 basis of the option). When the share is sold for $92, the estate is required to include $7 in its gross income as compensation. Since $13 would have been includible in E's gross income if he had exercised the option and held such share at the time of his death, subdivision (ii)(b) of this subparagraph applies, and the basis of the share ($90), determined under subdivision (ii)(a) of this subparagraph, is reduced by $6 to $84. Furthermore, since the $7 that the estate is required to include in its gross income when the share is sold for $92 exceeds by $2 the basis of the option, subdivision (ii)(c) of this subparagraph applies, and the basis of the share ($84), determined under subdivision (ii)(a) and (ii)(b) of this subparagraph, is increased by $2. Accordingly, the basis is $86 and a capital gain of $6 is realized on the disposition of the share.

(e) **Disqualifying disposition.** The disposition of a share of stock, acquired by the exercise of a restricted stock option, within two years after the granting of the option or within 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) after the transfer of the share pursuant to such exercise makes section 421 inapplicable to such transfer of the share. If such disqualifying disposition occurs in a taxable year of the individual which begins after December 31, 1953, and ends after August 16, 1954, the income attributable to such transfer shall be treated by the individual as income received in the taxable year in which such disposition occurs. Similarly, if such disposition occurs in a taxable year of the employer which begins after December 31, 1953, and ends after August 16, 1954, the deduction attributable to the transfer of the share of stock pursuant to the exercise of the option shall be allowable for the taxable year in which such disposition occurs. In such cases, no amount shall be treated as income, and no amount shall be allowed as a deduction, for any taxable year other than the taxable year in which occurs the disposition. However, if the stock was transferred pursuant to the exercise of the option in a taxable year other than the taxable year of the disposition, the amount of the deduction shall be determined as if the employee had been paid com-

pensation at the time provided in paragraph (d) of § 1.421–6.

[T.D. 6500, 25 FR 11696, Nov. 26, 1960, as amended by T.D. 6527, 26 FR 411, Jan. 19, 1961; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.421–6 Options to which section 421 does not apply.

(a) Scope of section. (1) If an employer or other person grants to an employee or other person for any reason connected with the employment of such employee an option to purchase stock of the employer or other property, and if section 421 is not applicable, then this section shall apply. This section will apply, for example, when an option is not a qualified or restricted stock option at the time it is granted or an option granted under an employee stock purchase plan, or when an option is modified so that it no longer qualifies as such an option, or when there is a disqualifying disposition of stock acquired by the exercise of such an option so that section 421 does not apply. When an option is granted for any reason connected with the employment of an employee, this section applies, if section 421 does not apply, irrespective of whether the option is granted by the employer, by a parent or subsidiary of the employer, by a stockholder of any of such corporations, or by any other person, and irrespective of whether the option is granted to the employee, to a member of his family, or to any other person, and irrespective of whether the option is to purchase the stock of the employer, the stock of the parent or subsidiary of the employer, the stock of any other corporation, or to purchase any other property. In addition, § 1.61–15 makes the rules of this section applicable in determining the time when certain other options result in the realization of income and the amount of such income.

(2) This section is applicable to options granted on or after February 26, 1945, and before July 1, 1969 (and thereafter, to the extent that § 1.83–8(b) applies). For rules relating to options granted after June 30, 1969, see § 1.83–7. This section, however, is not applicable to—

(i) Property transferred pursuant to an option exercised before September 25, 1959, if the property is transferred subject to a restriction which has a significant effect on its value, or

(ii) Property transferred pursuant to an option granted before September 25, 1959, and exercised on or after such date, if, under the terms of the contract granting such option, the property to be transferred upon the exercise of the option is to be subject to a restriction which has a significant effect on its value and if such property is actually transferred subject to such restriction. However, if an option granted before September 25, 1959, and on or after February 26, 1945, is sold or otherwise disposed of before exercise, the provisions of this section shall be fully applicable to such disposition.

(3) If an option to which this section applies has a readily ascertainable fair market value when granted, no amount is includible in gross income under this section as compensation by reason of the transfer or exercise of such option, irrespective of whether such value was included in income for the taxable year in which the option was granted, and any deduction which is allowable as a result of the granting of such option is allowable only for the taxable year in which the option is granted. Thus, if an option having a readily ascertainable fair market value to which this section applies was granted in a taxable year for which an assessment of deficiency was barred at the time of the adoption of paragraph (c) of this section as a Treasury decision, no amount is includible in gross income under this section as compensation by reason of the transfer or exercise of such option. However, if there is a determination to which the rules of sections 1311–1314 apply, there may be an adjustment for the taxable year in which the option was granted.

(b) Meaning and use of certain terms. (1) For the purpose of this section, the term "option" includes the right or privilege of a person to purchase property from any person by virtue of an offer continuing for a stated period of time, whether or not irrevocable, to sell such property at a stated price, such person being under no obligation to purchase.

(2) As used in this section, the terms "employee", "employment", and "employer" have reference to the legal and bona fide relationship of employer and employee. For rules applicable to the determination whether the employer-employee relationship exists, see section 3401(c) and the regulations thereunder.

(3) For purposes of applying the rules of this section to the options which are made subject to such rules by § 1.61–15—

(i) The term "employee" includes the person who provided the consideration resulting in the grant of the option, the term "employer" includes the person to whom, or for whom, such consideration was provided, and the term "employment" includes the providing of such consideration;

(ii) Where a stock option is granted to an underwriter prior to a public offering and such grant is expressly or impliedly conditional upon the successful completion of the underwriting, the date on which the option shall be considered "granted" shall be the date of the successful completion of the underwriting.

(c) Options with a readily ascertainable fair market value. (1) If there is granted an option to which this section applies and which has a readily ascertainable fair market value (determined in accordance with subparagraphs (2) and (3) of this paragraph) at the time the option is granted, the employee in connection with whose employment such option is granted realizes compensation at such time in an amount equal to the excess, if any, of such fair market value over any amount paid for the option. If an option to which this section applies does not have a readily ascertainable fair market value at the time the option is granted, the time when the compensation is realized and the amount of such compensation shall be determined under paragraph (d) of this section.

(2) Although options may have a value at the time they are granted, that value is ordinarily not readily ascertainable unless the option is actively traded on an established market. If an option is actively traded on an established market, the fair market value of such option is readily ascertainable for purposes of this section by applying the rules of valuation set forth in § 20.2031–2 of this chapter (the Estate Tax Regulations).

(3)(i) When an option is not actively traded on an established market, the fair market value of the option is not readily ascertainable unless the fair market value of the option can be measured with reasonable accuracy. For purposes of this section, if an option is not actively traded on an established market, the option does not have a readily ascertainable fair market value when granted unless the taxpayer can show that all of the following conditions exist:

(a) The option is freely transferable by the optionee;

(b) The option is exercisable immediately in full by the optionee;

(c) The option or the property subject to the option is not subject to any restriction or condition (other than a lien or other condition to secure the payment of the purchase price) which has a significant effect upon the fair market value of the option or such property; and

(d) The fair market value of the option privilege is readily ascertainable in accordance with subdivision (ii) of this subparagraph.

(ii) The option privilege in the case of an option to buy is the opportunity to benefit during the option's exercise period from any increase in the value of property subject to the option during such period, without risking any capital. Similarly, the option privilege in the case of an option to sell is the opportunity to benefit during the exercise period from a decrease in the value of the property subject to the option, for example, if at some time during the exercise period of an option to buy, the fair market value of the property subject to the option is greater than the option's exercise price, a profit may be realized by exercising the option and immediately selling the property so acquired for its higher fair market value. Irrespective of whether any such gain may be realized immediately at the time an option is granted, the fair market value of an option includes the value of the right to benefit from any future increase in the value of the property subject to the option (relative to the option exercise period), without risking any capital. Therefore, the fair market value of an option is not merely the difference that may exist at a particular time between the option's exercise price and the value of the property subject to the option, but also includes the value of the option privilege for the remainder of the exercise period. Accordingly, for purposes of this section, in determining whether the fair market value of an option is readily ascertainable, it is necessary to consider whether the value of the entire option privilege can be measured with reasonable accuracy. In determining whether the value of the option privilege is readily ascertainable, and in determining the amount of such value when such value is readily ascertainable, it is necessary to consider—

(a) Whether the value of the property subject to the option can be ascertained; and

(b) The probability of any ascertainable value of such property increasing or decreasing; and (c) The length of the period during which the option can be exercised.

(d) Options without a readily ascertainable fair market value. If there is granted an option to which this section applies, and if the option does not have a readily ascertainable fair market value at the time it is granted, the employee in connection with whose employment the option is granted is considered to realize compensation includible in gross income under section 61 at the time and in

the amount determined in accordance with the following rules of this paragraph:

(1) Except as provided in subparagraph (2) of this paragraph, if the option is exercised by the person to whom it was granted, the employee realizes compensation at the time an unconditional right to receive the property subject to the option is acquired by such person, and the amount of such compensation is the difference between the amount payable for the property and the fair market value of the property at the time an unconditional right to receive the property is acquired. An individual has an unconditional right to receive the property subject to the option when his right to receive such property is not subject to any conditions, other than conditions that may be performed by him at any time. Thus, if an individual who has exercised an option has a right to make payment for the property at any time and to receive the property immediately after making such payment, such individual realizes compensation at the time he exercises the option. However, if an individual who has exercised an opinion is prevented by the terms of the option contract from making payment immediately of from receiving an immediate transfer of the property after making payment, such individual does not realize compensation at the time he exercises the option. Such individual will not realize compensation until he does acquire the right to make payment immediately and to receive an immediate transfer of the property. For purposes of this paragraph, an unconditional right to receive the property subject to the option shall not be considered to have been acquired before the date on which the option is exercised.

(2)(i) If the option is exercised by the person to whom it was granted but, at the time an unconditional right to receive the property subject to the option is acquired by such person, such property is subject to a restriction which has a significant effect on its value, the employee realizes compensation at the time such restriction lapses or at the time the property is sold or exchanged, in an arm's length transaction, whichever occurs earlier, and the amount of such compensation is the lesser of—

(a) The difference between the amount paid for the property and the fair market value of the property (determined without regard to the restriction) at the time of its acquisition, or

(b) The difference between the amount paid for the property and either its fair market value at the time the restriction lapses or the consideration received upon the sale or exchange, whichever is applicable.

If the property is sold or exchanged in a transaction which is not at arm's length before the time the employee realizes compensation in accordance with this subdivision, any amount of gain which the employee realizes as a result of such sale or exchange is includible in gross income at the time of such sale or exchange, but the amount includible in gross income under this subdivision at the time of the expiration of the restriction or the sale or exchange at arm's length shall be reduced by the amount of gain includible in gross income as a result of the sale or exchange not at arm's length.

(ii) The provisions of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example (1). On November 1, 1959, X Corporation grants to E, an employee, an option to purchase 100 shares of X Corporation stock at $10 per share. Under the terms of the option, E will be subject to a binding commitment to resell the stock to X Corporation at the price he paid for it in the event that his employment terminates within 2 years after he acquires the stock, for any reason except his death. Evidence of this commitment will be stamped on the face of E's stock certificate. E exercises the option and acquires the stock at a time when the stock, determined without regard to the restriction, has a fair market value of $18 per share. Two years after he acquires the stock, at which time the stock has a fair market value of $30 per share, E is still employed by X Corporation. E realizes compensation upon the expiration of the 2-year restriction and the amount of the compensation is $800. The $800 represents the difference between the amount paid for the stock ($1,000) and the fair market value of the stock (determined without regard to the restriction) at the time of its acquisition ($1,800), since such value is less than the fair market value of the stock at the time the restriction lapsed ($3,000).

Example (2). Assume, in example (1), that E dies one year after he acquires the stock, at which time the stock has a fair market value of $25 per share. Since the restriction lapses upon E's death, he realizes compensation of $800 ($1,800 less $1,000) and this amount is includible in E's gross income for the taxable year closing with his death.

Example (3). Assume that, pursuant to the exercise of an option not having a readily ascertainable fair market value to which this section applies, an employee acquires stock subject to the sole condition that, if he desires to dispose of such stock during the period of his employment, he is obligated to offer to sell the stock to his employer at its fair market value at the time of such sale. Since this condition is not a restriction which has a significant effect on value, the employee realizes compensation upon acquisition of the stock.

Example (4). Assume, in example (3), that the employee is obligated to offer to sell the stock to his employer at its book value rather than at its fair market value. Since this condition amounts to a restriction which has a significant effect on value, the employee does not realize compensation upon acquisition of the stock, but he does realize such compensation upon the lapse of the restriction, such as, for example, his death or the termination of his employment.

(3) If the option is not exercised by the person to whom it was granted, but is transferred in an arm's length transaction, the employee realizes compensation in the amount of the gain resulting from such transfer of the option, and such compensation is includible in his gross income in accordance with his method of accounting.

(4) If the option is not exercised by the person to whom it was granted, but is transferred in a transaction which is not at arm's length, the employee realizes compensation in the amount of the gain resulting from such transfer of the option, and such compensation is includible in his gross income in accordance with his method of accounting. Moreover, the employee realizes additional compensation at the time and in the amount determined under subparagraph (1), (2), or (3) of this paragraph, except that the amount of compensation determined under subparagraph (1), (2), or (3) of this paragraph shall be reduced by any amount previously includible in gross income as a result of such transfer of the option. For example, if in 1960 an employee is granted an option not having a readily ascertainable fair market value to buy a share of stock for $50 at a time when the stock has a fair market value of $100, and later in 1960 the employee transfers, in a transaction not at arm's length, the option to his wife for $10, the employee realizes compensation of $10 in 1960. If in 1961 the wife exercises the option at a time when the stock has a fair market value of $120, the employee realizes additional compensation in 1961 in the amount of $60 (the $70 bargain spread less the $10 taxed as compensation in 1960). For the purpose of this subparagraph if a person other than the employee dies holding an unexercised option at a time when the employee is still living, the transfer which results by reason of the death of such person is a transfer in a transaction which is not at arm's length.

(5) If there is granted an option to which this section applies, and the employee dies before realizing the compensation in accordance with the rules of this paragraph, income having the character of compensation is realized at the time and in the amount determined under this paragraph by the person who transfers or exercises the option, or the person who receives the property subject to a restriction which has a significant effect on its value. For example, this subparagraph is applicable:

(i) When an option not having a readily ascertainable fair market value is granted to an employee, and he dies before transferring or exercising the option,

(ii) When an option not having a readily ascertainable fair market value is granted to the employee, and he dies after the transfer of the option in a transaction which is not at arm's length, but before the option is exercised, or

(iii) When an option not having a readily ascertainable fair market value is granted to another person, and the employee dies before realizing all of the compensation which would result from any transfer or exercise of the option. If the option is one which was granted to the employee and he dies before transferring or exercising the option, the option shall be considered a right to receive income in respect of a decedent to which the rules of section 691 apply. In any such case, if the option is transferred, section 691 provides that the amount received for such transfer or the fair market value of the property transferred at the time of transfer, whichever is greater, is income realized at the time of such transfer. Moreover, if a transfer is subject to this rule, it will be treated as a transfer in an arm's length transaction for the purpose of this paragraph.

(6) If an option to which this section applies is exercised in part and transferred in part, the rules of this paragraph shall be applied as if there were two options—one exercised and one transferred.

(7) Notwithstanding the other provisions of this paragraph, if this section is applicable because of a disqualifying disposition of stock acquired by the exercise of a qualified or restricted stock option, or acquired by the exercise of an option granted under an employee stock purchase plan, the taxable year of the employee for which he is required to include in his gross income the compensation resulting from such option is determined under section 421(b) and paragraph (b) of § 1.421–8 (or, in the case of taxable years ending before January 1, 1964, under section 421(f) and paragraph (e) of § 1.421–5) and, in the case of a disqualifying disposition of a share of stock acquired by the exercise of a qualified stock option, the amount of such compensation shall be subject to the limitation provided by section 422(c)(4) and paragraph (b) of § 1.422–1.

(e) **Basis.** (1) If an option to which this section applies is exercised by the person to whom it was granted, such person's basis for the property so acquired shall be increased by any amount that is includible in the gross income of the employee under paragraph (d) of this section. If such person transfers such property to a person whose basis is the same as the transferor's basis, such

transferee's basis shall also reflect the adjustment made by this paragraph. However, if such property is transferred by either of such persons at death so that its basis is determined under section 1014, the basis so determined shall not be increased by reason of this paragraph.

(2) If an option to which this section applies is transferred in a transaction which is not at arm's length, the transferee who exercises the option shall increase his basis for the property so acquired by any amount that is includible in the gross income of the employee at the time such transferee acquires the property.

(3) If an option to which this section applies is transferred in a transaction which is at arm's length, the basis of the property acquired by an exercise of the option shall not be increased by reason of any amount that is includible in this gross income of the employee under this section.

(4) If an option to which this section applies has a readily ascertainable fair market value at the time it is granted, the basis of such option includes any amount includible in gross income of the employee under paragraph (c) of this section.

(f) Deductions. If the employer grants an option to which this section applies, the employer of the employee in connection with whose employment the option is granted is considered to have paid compensation to such employee at the same time and in the same amount as such employee is considered under paragraph (c) or (d) of this section to have realized compensation. The deductibility of the amount considered so paid is determined under section 162 or other provision of the Code which is applicable to such a payment. Whether such amount may be deducted in the taxable year considered so paid, or whether such amount is a capital expenditure which is not deductible or which may be amortized, depends upon the nature of the transaction involved and the facts and circumstances of each case. If this section is applicable because of a disqualifying disposition of stock acquired by the exercise of a qualified or restricted stock option, or acquired by the exercise of an option granted under an employee stock purchase plan, the employer's taxable year for which such compensation is deductible is determined under section 421(b) and paragraph (b) of § 1.421–8 (or, in the case of taxable years ending before January 1, 1964, under section 421(f) and paragraph (e) of § 1.421–5).

[T.D. 6540, 26 FR 512, Jan. 20, 1961, as amended by T.D. 6696, 28 FR 13451, Dec. 12, 1963; T.D. 6887, 31 FR 8787, June 24, 1966; T.D. 7554, 43 FR 31926, July 24, 1978]

§ 1.421–7 Meaning and use of certain terms.

(a) Option. (1) For purposes of sections 421 through 425, the term "option" includes the right or privilege of an individual to purchase stock from a corporation by virtue of an offer of the corporation continuing for a stated period of time, whether or not irrevocable, to sell such stock at a price determined under paragraph (e) of this section, such individual being under no obligation to purchase. Such right or privilege, when granted, must be evidenced in writing. The individual who has such right or privilege is referred to as the optionee and the corporation offering to sell stock under such an arrangement is referred to as the optionor. While no particular form of words is necessary, the written option should express, among other things, an offer to sell at the option price and the period of time during which the offer shall remain open.

(2) An option may be granted as part of or in conjunction with an employee stock purchase plan or subscription contract. See section 423.

(3) An arrangement between a corporation and an employee may involve more than one option. For example, if a corporation on June 1, 1964, grants to an employee the right to purchase 1,000 shares of its stock on or after June 1, 1965, another 1,000 shares on or after June 1, 1966, and a further 1,000 shares on or after June 1, 1967, all shares to be purchased before June 1, 1968, provided the employee at the time of exercise of any of the purchase rights is employed by the corporation, such an arrangement will be construed as the grant to the employee on June 1, 1964, of three options, each for the purchase of 1,000 shares. However, if a corporation grants to an employee on January 1, 1965, the right to purchase 1,000 shares of its stock at $65 per share during 1965, or at $75 per share during 1966, or at $85 per share during 1967, such an arrangement will be construed as the grant to the employee on January 1, 1965, of but one option for the purchase of 1,000 shares, which ceases to be outstanding when fully exercised at the price in effect at the time of exercise.

(b) Statutory options. (1) The term "statutory option", used for purposes of convenience hereinafter in this section and in §§ 1.421–8 through 1.425–1, means a qualified stock option, as defined by section 422(b) and § 1.422–2; an option granted under an employee stock purchase plan, as defined by section 423(b) and § 1.423–2; and a

restricted stock option, as defined in section 424(b) and § 1.424–2.

(2) An option may qualify as a statutory option only if the option is not transferable (other than by will or by the laws of descent and distribution) by the individual to whom it is granted, and is exercisable, during the lifetime of such individual, only by him. See sections 422(b)(6), 423(b)(9), and 424(b)(2). Accordingly, an option which is transferable by the individual to whom it is granted during his lifetime, or is exercisable during such individual's lifetime by another person, is not a statutory option. However, in case the option or the plan under which the option was granted contains a provision permitting the individual to whom the option was granted to designate the person who may exercise the option after his death, neither such provision, nor a designation pursuant to such provision, disqualifies the option as a statutory option.

(3)(i) The determination of whether an option is a statutory option is made as of the date such option is granted. An option which is a statutory option when granted does not lose its character as such an option by reason of subsequent events, and an option which is not a statutory option when granted does not become such an option by reason of subsequent events. See, however, paragraph (e) of § 1.425–1, relating to modification, extension, or renewal of an option. For rules concerning options that are not statutory options, see § 1.83–7.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example (1). S–1 Corporation is a subsidiary of S Corporation which, in turn, is a subsidiary of P Corporation. On June 1, 1964, P grants to an employee of P a statutory option to purchase a share of stock of S–1. On January 1, 1965, S sells a portion of the S–1 stock which it owns to an unrelated corporation and, as of that date, S–1 ceases to be a subsidiary of S. On May 1, 1965, while still employed by P, the employee exercises his option to purchase a share of S–1 stock. Section 421 applies to such exercise.

Example (2). Assume P grants an option to an employee under the same facts as in example (1) above, except that on June 1, 1964, S–1 is not a subsidiary of either S or P. Such option is not a statutory option on June 1, 1964. On January 1, 1965, S purchases from an unrelated corporation a sufficient number of shares of S–1 stock to make S–1, as of that date, a subsidiary of S. On May 1, 1965, while still employed by P, the employee exercises his option to purchase a share of S–1 stock. The employee has not exercised a statutory option.

(c) Time and date of granting option. (1) For purposes of sections 421 through 425, the words "the date of the granting of the option" and "the time such option is granted", and similar phrases refer to the date or time when the corporation completes the corporate action constituting an offer of stock for sale to an individual under the terms and conditions of a statutory option. Ordinarily, if the corporate action contemplates an immediate offer of stock for sale to an individual or to a class including such individual, or contemplates a particular date on which such offer is to be made, the time or date of the granting of the option is the time or date of such corporate action if the offer is to be made immediately, or the date contemplated as the date of the offer, as the case may be. However, an unreasonable delay in the giving of notice of such offer to the individual or to the class will be taken into account as indicating that the corporation contemplated that the offer was to be made at the subsequent date on which such notice is given.

(2) If the corporation imposes conditions on the granting of an option (as distinguished from conditions governing the exercise of the option), such conditions shall be given effect in accordance with the intent of the corporation. However, under section 425(i), if the grant of an option is subject to approval by stockholders, the date of grant of the option shall be determined as if the option had not been subject to such approval. A condition which does not require corporate action, such as the approval of, or registration with, some regulatory or governmental agency, for example, a stock exchange or the Securities and Exchange Commission, is ordinarily considered a condition upon the exercise of the option unless the corporate action clearly indicates that the option is not to be granted until such condition is satisfied. If an option is granted to an individual upon the condition that such individual will become an employee of the corporation granting the option or of a related corporation, such option is not granted prior to the date the individual becomes such an employee.

(3) In general, conditions imposed upon the exercise of an option will not operate to make ineffective the granting of the option. For example, on June 1, 1964, the A Corporation grants to X, an employee, an option to purchase 5,000 shares of the corporation's stock, exercisable by X on or after June 1, 1965, provided he is employed by the corporation on June 1, 1965, and provided that A's profits during the fiscal year preceding the year of exercise exceed $200,000. Such an option is granted to X on June 1, 1964, and will be treated as outstanding as of such date.

(d) Stock and voting stock. For purposes of sections 421 through 425, the term "stock" means capital stock of any class, including voting or nonvoting common or preferred stock. Except as

otherwise provided, the term includes both treasury stock and stock of original issue. Special classes of stock authorized to be issued to and held by employees are within the scope of the term "stock" as used in such sections, provided such stock otherwise possesses the rights and characteristics of capital stock. For purposes of determining what constitutes voting stock in ascertaining whether a plan has been approved by stockholders or whether the limitations pertaining to voting power contained in sections 422(b)(7), 423(b)(3) and 424(b)(3) and the regulations thereunder have been met, stock which does not have voting rights until the happening of an event, such as the default in the payment of dividends on preferred stock, is not voting stock until the happening of the specified event. Moreover, stock which does not possess a general voting power, and may vote only on particular questions, is not voting stock. However, if such stock is entitled to vote on whether a stock option plan is to be adopted, it is voting stock for the purpose of ascertaining whether the plan has been approved by the shareholders.

(e) **Option price.** (1) For purposes of sections 421 through 425, the term "option price" or "price paid under the option" means the consideration in money or other property which, pursuant to the terms of the option, is the price at which the stock subject to the option is purchased. The term "option price" does not include amounts paid as interest under a deferred payment arrangement or treated as unstated interest under section 483 and the regulations thereunder. Thus, for example, section 483 is applicable in determining whether the pricing requirements of section 422(b)(4), 423(b)(6), 424(b)(1), or 424(c) are met and is applicable in determining the basis of any stock acquired pursuant to the exercise of a statutory option. However, with respect to statutory options granted prior to January 1, 1965, the determination of whether the applicable pricing requirements are met shall be made without regard to section 483, but section 483 shall be taken into consideration in determining basis for purposes of determining gain or loss.

(2) In the case of a statutory option, any reasonable valuation method may be used for the purpose of determining whether at the time the option is granted the option price satisfies the pricing requirements of section 442(b)(4) (relating to qualified stock options), section 423(b)(6) (relating to employee stock purchase plans), or section 424(b)(1) (relating to restricted stock options), whichever is applicable, with respect to the stock subject to the option. Such methods include the valuation methods described in § 20.2031-2 of this chapter (Estate Tax Regulations).

(f) **Exercise.** For purposes of sections 421 through 425, the term "exercise", when used in reference to an option, means the act of acceptance by the optionee of the offer to sell contained in the option. In general, the time of exercise is the time when there is a sale or a contract to sell between the corporation and the individual. A promise to pay the option price does not constitute an exercise of the option unless the optionee is subject to personal liability on such promise. An agreement or undertaking by the employee to make payments under an employee stock purchase plan does not constitute the exercise of an option so long as the payments made remain subject to withdrawal by the employee.

(g) **Transfer.** For purposes of sections 421 through 425, the term "transfer", when used in reference to the transfer to an individual of a share of stock pursuant to his exercise of a statutory option, means the transfer of ownership of such share, or the transfer of substantially all the rights of ownership. Such transfer must, within a reasonable time, be evidenced on the books of the corporation.

(h) **Employment relationship.** (1) Section 421 is applicable to the exercise of a statutory option only if at the time the option is granted, the optionee is an employee of the corporation granting the option, or a related corporation of such corporation, unless the option has been assumed or a new option has been issued in its place under section 425(a). In case of such an assumption or issuance, the optionee must, at the time of such assumption or issuance, be an employee of the corporation so assuming or issuing the option, or a related corporation of such corporation. The determination of whether the optionee is an employee at the time the option is granted (or at the time of the assumption or issuance under section 425(a)) will be made in accordance with the rules contained in section 3401(c) and the regulations thereunder. As to the granting of an option conditioned upon employment, see paragraph (c)(2) of this section. A statutory option must be granted for a reason connected with the individual's employment by the corporation or by its related corporation.

(2) In order to qualify for the special tax treatment of section 421, in addition to meeting the requirements of subparagraph (1) of this paragraph, an individual exercising a qualified stock option or an option granted under an employee

stock purchase plan must, at all times during the period beginning with the date of the granting of such option and ending at the time of such exercise or on the day 3 months before the date of such exercise, be an employee of either the corporation granting such option, a related corporation of such corporation, or a corporation or a related corporation of such corporation issuing or assuming a stock option in a transaction to which section 425(a) applies. For this purpose, the employment relationship in respect of an option granted in accordance with the requirements of subparagraph (1) of this paragraph will be treated as continuing intact while the individual is on military, sick leave or other bona fide leave of absence (such as temporary employment by the Government) if the period of such leave does not exceed 90 days, or, if longer, so long as the individual's right to reemployment with the corporation granting the option (or a related corporation of such corporation, or a corporation, or a related corporation of such corporation issuing or assuming a stock option in a transaction to which section 425(a) applies) is guaranteed either by statute or by contract. Where the period of leave exceeds 90 days and where the individual's right to reemployment is not guaranteed either by statute or by contract, the employment relationship will be deemed to have terminated on the 91st day of such leave.

(3) For purposes of determining whether an individual meets the requirements of this paragraph, the term "employer corporation", as used in section 425 (e) and (f), shall be read as "grantor corporation" or "corporation issuing or assuming a stock option in a transaction to which section 425(a) is applicable", as the case may be. For purposes of the employment requirement, a corporation employing an optionee is considered a related corporation if it was a parent or subsidiary of the corporation granting or assuming the option during the entire portion of the requisite period of employment during which it was the employer of such optionee.

(4) The application of this paragraph may be illustrated by the following examples:

Example (1). On June 1, 1964, X Corporation granted a statutory option to A, an employee of X Corporation, to purchase a share of X stock. On February 1, 1965, X sold the plant where A was employed to M Corporation, an unrelated corporation, and A was employed by M. If A exercises his statutory option on June 1, 1965, section 421 is not applicable to such exercise, because on June 1, 1965, A is not employed by the corporation which granted the option or by a related corporation of such corporation, nor was he employed by any of such corporations within 3 months before June 1, 1965.

Example (2). Assume the facts to be the same as in example (1), except that when A was employed by M Corporation, the option to purchase X stock was terminated and was replaced by an option to buy M stock in such circumstances that M Corporation is treated as a corporation issuing an option under section 425(a). If A exercises the option to purchase the share of M stock on June 1, 1965, section 421 is applicable for A is then employed by a corporation which issued an option under section 425(a).

Example (3). E is an employee of P Corporation. On June 1, 1964, P grants E a statutory option to purchase a share of P stock. On June 1, 1965, P acquires 100 percent of the stock of S Corporation; on such date S becomes a subsidiary of P. On July 1, 1965, E ceases to be employed by P and becomes employed by S. On October 10, 1965, while still employed by S, E exercises his option to buy P stock. Since E was at all times during the requisite period of employment an employee of either P, the corporation granting the option, or S, a subsidiary of the grantor during the period in which such corporation was E's employer, section 421 is applicable to the exercise of the option.

Example (4). Assume the same facts as in example (3) except assume that at the time E became an employee of S Corporation, S assumed E's option to purchase P stock under section 425(a). Section 421 is applicable to E's exercise of his option to buy P stock.

Example (5). M Corporation grants a qualified stock option to E, an employee of such corporation. E is an officer in a reserve Air Force unit. E goes on military leave with his unit for 3 weeks. Regardless of whether E is an employee of M within the meaning of section 3401(c) and the regulations thereunder during such 3-week period, E's employment relationship with M is treated as uninterrupted during the period of E's military leave.

Example (6). Assume the same facts as in example (5) and assume further that E's active duty status is extended indefinitely, but that E has an employment contract with M which provides that upon the termination of any military duty E may be required to serve, E will be entitled to reemployment with M or a parent or subsidiary of M. E exercises his M option while on active military duty. Irrespective of whether E is an employee of M within the meaning of section 3401(c) and the regulations thereunder at the time of such exercise or within 3 months before such exercise, section 421 can apply to such exercise.

Example (7). X Corporation grants a qualified stock option to A, an employee of X Corporation, whose employment contract provides that in the event of illness, A's right to reemployment with X, or a parent or subsidiary of X, will continue for 1 year after the time A becomes unable to perform his duties for X. A falls ill for 90 days. For purposes of section 422(a)(2), A's employment relationship with X will be treated as uninterrupted during the 90-day period. If A's incapacity extends beyond 90 days, then, for purposes of section 422(a)(2), A's employment relationship with X will be treated as continuing uninterrupted until A's reemployment rights terminate. Under section 422(a)(2), A has 3 months in which to exercise his qualified stock option after his employment relationship with X (and its parent and subsidiary corporation) is terminated.

(i) **Related corporation.** The term "related corporation", used for purposes of convenience in this section and §§ 1.421–8 through 1.425–1, means a corporation which is a parent or subsidiary corpo-

ration (as defined by section 425(e) and (f) and the regulations thereunder).

[T.D. 6887, 31 FR 8787, June 24, 1966, as amended by T.D. 6975, 33 FR 14779, Oct. 3, 1968; T.D. 7554, 43 FR 31927, July 24, 1978]

§ 1.421–8 General rules.

(a) Effect of qualifying transfer. (1) If a share of stock is transferred to an individual pursuant to his exercise of a statutory option, and if the requirements of section 422(a) (relating to qualified stock options), section 423(a) (relating to employee stock purchase plans), or section 424(a) (relating to restricted stock option), whichever is applicable, are met, then—

(i) Except as provided in section 422(c)(1) (relating to exercise of option when price is less than value of stock), and paragraph (e)(2) of § 1.422–2, no income shall result at the time of the transfer of such share to the individual upon his exercise of the option with respect to such share;

(ii) No deduction under section 162 or the regulations thereunder (relating to trade or business expenses) shall be allowable at any time to the employer corporation, a related corporation of such corporation, or a corporation issuing or assuming a stock option in a transaction to which section 425(a) and paragraph (a) of § 1.425–1 (relating to corporate reorganizations, liquidations, etc.) applies, with respect to the share so transferred; and

(iii) No amount other than the price paid under the option shall be considered as received by any of such corporations for the share so transferred.

(2) For the purpose of this paragraph, each share of stock transferred pursuant to a statutory option is treated separately. For example, if an individual, while employed by a corporation granting him a statutory option, exercises the option with respect to part of the stock covered by the option, and if such individual exercises the balance of the option more than three months after leaving such employment, the application of section 421 to the stock obtained upon the earlier exercise of the option is not affected by the fact that the income taxes of the employer and the individual with respect to the stock obtained upon the later exercise of the option are not determined under section 421.

(b) Effect of disqualifying disposition. (1) The disposition of a share of stock, acquired by the exercise of a statutory option before the expiration of the applicable holding period as determined under section 422(a)(1), 423(a)(1), or 424(a)(1), makes section 421 inapplicable to the transfer of such share. The income attributable to such transfer shall be treated by the individual as income received in the taxable year in which such disposition occurs. Similarly, a deduction under section 162 attributable to the transfer of the share of stock pursuant to the exercise of the option shall be allowable for the taxable year in which such disposition occurs to the employer corporation, its parent or subsidiary corporation or a corporation issuing or assuming a stock option in a transaction to which section 425(a) applies. In such cases, no amount shall be treated as income, and no amount shall be allowed as a deduction, for any taxable year other than the taxable year in which the disposition occurs. If the stock was transferred pursuant to the exercise of the option in a taxable year other than the taxable year of the disposition, the amount of the deduction shall be determined as if the employee had been paid compensation at the time provided in paragraph (d) of § 1.421–6.

(2) Section 421 is not made inapplicable by a transfer before the expiration of the applicable holding period as determined under section 422(a)(1), 423(a)(1), or 424(a)(1), if such transfer is not a disposition of the stock as defined in section 425(c) and paragraph (c) of § 1.425–1, for example, a transfer from the decedent to his estate or a transfer by bequest or inheritance. Similarly, a disposition by the executor, administrator, heir, or legatee is not a disposition by the decedent. In case a statutory option is exercised by the estate of the individual to whom the option was granted, or by a person who acquired the option by bequest or inheritance or by reason of the death of such individual, see paragraph (c) of this section.

(3) For special rules relating to a disqualifying disposition of a share of stock acquired by the exercise of a qualified stock option, see paragraph (b) of § 1.422–1.

(c) Exercise by estate. (1) If a statutory option is exercised by the estate of the individual to whom the option was granted, or by any person who acquired such option by bequest or inheritance or by reason of the death of such individual, section 421(a) applies to such exercise in the same manner as if such option had been exercised by such deceased individual. Consequently, except as provided by section 422(c)(1) and paragraph (e)(2) of § 1.422–2, neither the estate nor such person is required to include any amount in gross income as a result of a transfer of stock pursuant to such exercise of the option. Nor does section 421(a)

become inapplicable if such executor, administrator, or person disposes of the stock so acquired before the expiration of the applicable holding period as determined under section 422(a)(1), 423(a)(1), or 424(a)(1). This special rule does not affect the applicability of section 1222, relating to what constitutes a short-term and long-term capital gain or loss. The executor, administrator, or such person need not exercise the option within three months after the death of the individual to whom the option was granted for section 421(a) to be applicable. However, the exercise of the option must be pursuant to the terms of the option, and any change in the terms of the option is subject to the rules of paragraph (e) of § 1.425–1, relating to the modification, extension, or renewal of the option. Section 421(a) is applicable even though such executor, administrator, or person is not employed by the corporation granting the option, or a related corporation, either when the option is exercised or at any time. However, section 421(a) is not applicable to an exercise of the option by the estate or by such person, unless the individual to whom the option was granted met the employment requirements of section 422(a)(2), 423(a)(2), or 424(a)(2), whichever is applicable, either at the time of his death or within three months before such time. If the option is exercised by a person other than the executor or administrator, or other than a person who acquired the option by bequest or inheritance or by reason of the death of such deceased individual, section 421(a) is not applicable to the exercise. For example, if the option is sold by the estate, section 421(a) does not apply to an exercise of the option by such buyer; but if the option is distributed by the administrator to an heir as part of the estate, section 421(a) is applicable to an exercise of the option by such heir.

(2) Any transfer by the estate, whether a sale, a distribution of assets, or otherwise, of the stock acquired by its exercise of the option under this paragraph is a disposition of the stock. Therefore, if section 423(c), or 424(c)(1) is applicable, the estate must include an amount as compensation in its gross income. Similarly, if section 423(c) or 424(c)(1) is applicable in case of an exercise of the option under this paragraph by a person who acquired the option by bequest or inheritance or by reason of the death of the individual to whom the option was granted, there must be included in the gross income of such person an amount as compensation, either when such person disposes of the stock, or when he dies owning the stock.

(3)(i) If, under section 422(c)(1), 423(c), or 424(c)(1), an amount is required to be included in the gross income of the estate or of such person, the estate or such person shall be allowed a deduction as a result of the inclusion of the value of the option in the estate of the individual to whom the option was granted. Such deduction shall be computed under section 691(c) by treating the option as an item of gross income in respect of a decedent under section 691 and by treating the amount required to be included in gross income under section 422(c)(1), 423(c), or 424(c)(1), as an amount included in gross income under section 691 in respect of such item of gross income. No such deduction shall be allowable with respect to any amount other than an amount includible under section 422(c)(1), 423(c), or 424(c)(1). For the rules relating to the computation of a deduction under section 691(c), see § 1.691(c)–1.

(ii) The application of subdivision (i) may be illustrated by the following example:

Example. On June 1, 1964, E was granted an option under an employee stock purchase plan to purchase for $85 one share of the stock of his employer. On such day, the fair market value of such stock was $100 per share. E died on February 1, 1966, without having exercised such option. The option was, however, exercisable by bis estate, and for purposes of the estate tax was valued at $30. On March 1, 1966, the estate exercised the option, and on March 15, 1966, sold for $150 the share of stock so acquired. For its taxable year including March 15, 1966, the estate is required by sections 421(c)(1)(B) and 423(c) to include in its gross income as compensation the amount of $15. During such taxable year, no amounts of income were properly paid, credited, or distributable to the beneficiaries of the estate. However, under section 421(c)(2), the estate is entitled to a deduction determined in the following manner. E's estate includes no other items of income in respect of a decedent referred to in section 691(a), and no deductions referred to in section 691(b), so that the value for estate tax purposes of the option, $30, is also the net value of all items of income in respect of the decedent. The estate tax attributable to the inclusion of the option in the estate of E is $10. Since $15, the amount includible in gross income by reason of sections 421(c)(1)(B) and 423(c), is less than the value for estate tax purposes of the option, only 15/30 of the estate tax attributable to the inclusion of the option in the estate is deductible; that is, 15/30 of $10, or $5. No deduction under section 421(c)(2) is allowable with respect to any capital gain.

(4)(i) In the case of an employee dying before January 1, 1957, the basis of any share of stock acquired by the exercise of a restricted stock option under this paragraph, determined under section 1011, shall be increased by an amount equal to the amount includible as compensation in his gross income under section 424(c)(1). The basis of the share shall not be increased by reason of the inclusion of the value of the restricted stock option in the estate for estate tax purposes.

(ii)(a) In the case of an employee dying after December 31, 1956, the basis of any share of stock acquired by the exercise of an option under this paragraph, determined under section 1011, shall be

increased by an amount equal to the portion of the basis of the option attributable to such share. For example, if a statutory option to acquire 10 shares of stock has a basis of $100, the basis of one share acquired by a partial exercise of the option, determined under section 1011, would be increased by 1/10th of $100, or $10. The option acquires a basis, determined under section 1014(a), only if the transfer of the share pursuant to the exercise of such option qualifies for the special tax treatment provided by section 421(a). To the extent the option is so exercised, in whole or in part, it will acquire a basis equal to its fair market value at the date of the employee's death or, if an election is made under section 2032, its value at its applicable valuation date. In certain cases, the basis of the share is subject to the adjustments provided by (b) and (c) of this subdivision, but such adjustments are only applicable in the case of an option which is subject to section 422(c)(1), 423(c), or 424(c)(1).

(b) If the amount which would have been includible in gross income under section 422(c)(1), 423(c), or 424(c)(1) had the employee exercised the option on the date of his death and held the share at the time of his death exceeds the amount which is includible in gross income under such section, the basis of the share, determined under (a) of this subdivision, shall be reduced by such excess. For example, if $15 would have been includible in the gross income of the employee had he exercised the option and held such share at the time of his death, and only $10 is includible under section 422(c)(1), 423(c), or 424(c)(1), the basis of the share, determined under (a) of this subdivision, would be reduced by $5. For purposes of determining the amount which would have been includible in gross income under section 422(c)(1), 423(c), or 424(c)(1), if the employee had exercised the option and held such share at the time of his death, the amount which would have been paid for the share shall be computed as if the option had been exercised on the date the employee died.

(c) If the amount includible in gross income under section 422(c)(1), 423(c), or 424(c)(1), exceeds the portion of the basis of the option attributable to the share, the basis of the share, determined under (a) of this subdivision, shall be increased by such excess. Thus, if $15 is includible in gross income under such section, and the basis of the option with respect to the share is $10, the basis of the share, determined under (a) of this subdivision, will be increased by $5.

(iii) If a statutory option is not exercised by the estate of the individual to whom the option was granted, or by the person who acquired such option by bequest or inheritance or by reason of the death of such individual, the option shall be considered to be property which constitutes a right to receive an item of income in respect of a decedent to which the rules of sections 691 and 1014(c) apply.

(iv) The application of this subparagraph may be illustrated by the following examples:

Example (1). On June 1, 1955, the X Corporation granted to E, an employee, a restricted stock option to purchase a share of X Corporation's stock for $85. The fair market value of the X Corporation stock on such date was $100 per share. On June 1, 1956, E died. The fair market value of the X Corporation stock on such date exceeded $100 per share and the fair market value of the option on the applicable valuation date was $35. On August 1, 1964, the estate of E exercised the option and sold the share of X Corporation stock at a time when the fair market value of the share was $90. The estate is required by section 424(c)(1) to include $5 in its gross income as compensation. Since E died before January 1, 1957, the basis of the share is $90 (the $85 paid for the stock plus the $5 includible in gross income as compensation), and the basis of the share is not increased by reason of the inclusion of the value of the option in the estate of E (see section 1014(d) (as in effect with respect to taxable years ending before January 1, 1957)). Thus, no gain or loss is realized on the disposition of the share since the basis of the share is equal to the sale price.

Example (2). On June 1, 1964, the X Corporation granted to E, an employee, an option under its employee stock purchase plan to purchase a share of X Corporation stock for $85. The fair market value of X Corporation stock on such date was $100 per share. On June 1, 1966, E died. The fair market value of X Corporation stock on such date exceeded $100 per share and the fair market value of the option on the applicable valuation date was $35. On August 1, 1966, the estate of E exercised the option and sold the share of X Corporation stock at a time when the fair market value of the share was $120. The basis of the share is $120 (the $85 paid for the stock plus the $35 basis of the option). When the share is sold for $120, the estate is required to include $15 in its gross income as compensation. Since $15 would have been includible in E's gross income if he had exercised the option and held such share at the time of his death, subdivision (ii)(b) of this subparagraph does not apply. Moreover, since the $15 includible in the gross income of the estate does not exceed the basis of the option ($35), subdivision (ii)(c) of this subparagraph does not apply. Since the basis of the stock and the sale price are the same, no gain or loss is realized by the estate on the disposition of the share.

Example (3). Assume the same facts as in example (2), except that the fair market value of the share of stock at the time of its sale was $90. The basis of the share, determined under subdivision (ii)(a) of this subparagraph, is $120 (the $85 paid for the stock plus the $35 basis of the option). When the share is sold for $90, the estate is required to include $5 in its gross income as compensation. If the employee had exercised the option and held the share at the time of his death, $15 would have been includible in gross income as compensation for the taxable year ending with his death. Since such amount exceeds by $10 the amount which the estate is required to include in its gross income, subdivision (ii)(b) of this subparagraph applies, and the basis of the share ($120), determined under subdivision (ii)(a) of this subparagraph is reduced by

$10. Accordingly, the basis is $110, and a capital loss of $20 is realized on the disposition of the share.

Example (4). Assume the same facts as in example (2), except that the fair market value of the option on the applicable valuation date was $5, and that the fair market value of X Corporation stock on the date the employee died did not exceed $100. The basis of the share, determined under subdivision (ii)(a) of this subparagraph, is $90 (the $85 paid for the stock plus the $5 basis of the option). When the share is sold for $120, the estate is required to include $15 in its gross income as compensation. Since such amount exceeds by $10 the basis of the option, subdivision (ii)(c) of this subparagraph applies, and the basis of the share ($90), determined under subdivision (ii)(a) of this subparagraph, is increased by $10. Accordingly, the basis is $100 and a capital gain of $20 is realized on the disposition of the share.

Example (5). Assume the same facts as in example (2), except that on June 1, 1966, the date the employee died, the fair market value of X Corporation stock was $98, and that on June 1, 1967, the alternate valuation date, the fair market value of the stock had declined substantially, and the fair market value of the option was $5. On August 1, 1967, the estate of E exercised the option and sold the share when its fair market value was $92. The basis of the share, determined under subdivision (ii)(a) of this subparagraph, is $90 (the $85 paid for the stock plus the $5 basis of the option). When the share is sold for $92, the estate is required to include $7 in its gross income as compensation. Since $13 would have been includible in E's gross income if he had exercised the option and held such share at the time of his death, subdivision (ii)(b) of this subparagraph applies, and the basis of the share ($90), determined under subdivision (ii)(a) of this subparagraph, is reduced by $6 to $84. Furthermore, since the $7 that the estate is required to include in its gross income when the share is sold for $92 exceeds by $2 the basis of the option, subdivision (ii)(c) of this subparagraph applies, and the basis of the share ($84), determined under subdivision (ii)(a) and (ii)(b) of this subparagraph, is increased by $2. Accordingly, the basis is $86 and a capital gain of $6 is realized on the disposition of the share.

(d) Exercise by deceased employee during lifetime. If a statutory option is exercised by an individual to whom the option was granted and the individual dies before the expiration of the applicable holding period as determined under section 422(a)(1), 423(a)(1), or 424(a)(1), section 421(a) does not become inapplicable if the executor or administrator of the estate of such individual, or any person who acquired such stock by bequest or inheritance or by reason of the death of such individual, disposes of such stock before the expiration of such applicable holding period. This rule does not affect the applicability of section 1222, relating to what constitutes a short-term and long-term capital gain or loss.

(e) Incorporation by reference. Any requirement that an option expressly contain or state a prescribed limitation or term will be considered met if such limitation or term is set forth in a statutory option plan and is incorporated by reference by the option. Thus, if a statutory option plan expressly provides that no option granted thereunder shall be exercisable after five years from the date of grant, and if an option granted thereunder expressly provides that the option is granted subject to the terms and limitations of such plan, the option will be regarded as being, by its terms, not exercisable after the expiration of 5 years from the date such option is granted.

[T.D. 6887, 31 FR 8789, June 24, 1966]

§ 1.422–1 Qualified stock options—general rules.

(a) Applicability of section 421(a). (1)(i) Subject to the provisions of section 422(c)(1), the special rules of income tax treatment provided in section 421(a) are applicable with respect to the transfer of a share of stock to an individual pursuant to his exercise of a qualified stock option provided that the following conditions are satisfied—

(a) The individual must make no disposition of such share before the expiration of the 3-year period beginning on the day after the day of the transfer of such share, and

(b) At all times during the period beginning with the date of the granting of the option and ending on the day 3 months before the date of such exercise, the individual was an employee of either the corporation granting the option, a related corporation of such corporation, or a corporation or a related corporation of such corporation issuing or assuming a stock option in a transaction to which section 425(a) applies.

(ii) For rules relating to the requisite employment relationship, see paragraph (h) of § 1.421–7.

(2)(i) An exception to the holding period requirement of section 422(a)(1) is provided with respect to certain transfers by insolvent individuals. If an insolvent individual holds a share of stock acquired pursuant to his exercise of a qualified stock option, and if such share is transferred to a trustee, receiver, or other similar fiduciary in any proceeding under the Bankruptcy Act or any other similar insolvency proceeding (such as an assignment for the benefit of creditors, a composition, etc.), neither such transfer, nor any other transfer of such share for the benefit of the insolvent individual's creditors in such proceeding shall constitute a disposition of such share for the purpose of section 422(a)(1). For the purpose of this subparagraph, an individual is an insolvent only if his liabilities exceed his assets, or if he is unable to satisfy his liabilities as they become due.

(ii) Notwithstanding that a transfer by the trustee or other fiduciary is not treated as a disposition

for the purpose of section 422(a)(1), such transfer may constitute a sale or exchange for purposes of recognizing capital gain or loss with respect to the share so transferred. For example, if the trustee transfers the share to a creditor in the insolvency proceeding in complete or partial satisfaction of such creditor's claim against the insolvent individual, capital gain or loss must be recognized by the insolvent individual to the extent of the difference between the fair market value of the share on the date of such transfer and the adjusted basis of such share. To the extent any transfer by the trustee or other fiduciary (other than a transfer back to the insolvent individual) is not for the exclusive benefit of the creditors in such insolvency proceeding, such transfer will be treated as a disposition for purposes of section 422(a)(1). Similarly, if the trustee or other fiduciary transfers the share back to the insolvent individual, any subsequent disposition of the share which is not made in respect of the insolvency proceeding and for the exclusive benefit of the creditors in such proceeding will be treated as a disposition for purposes of section 422(a)(1).

(b) **Failure to satisfy holding period.** (1) The special tax treatment of section 421(a) is not applicable with respect to the transfer of a share of stock pursuant to the exercise of a qualified stock option if the individual disposes of the share before the expiration of the 3-year period beginning on the day after the day of the transfer of such share to him. For general rules relating to the effect of such a disqualifying disposition, see section 421(b) and paragraph (b) of § 1.421–8. For definition of the term "disposition", see section 425(c) and paragraph (c) of § 1.425–1.

(2) If an individual who has acquired a share of stock by the exercise of a qualified stock option makes a disqualifying disposition of such share, and if such disposition is a sale or exchange with respect to which a loss (if sustained) would be recognized to the individual, then, under section 422(c)(4), the amount includible in the gross income of such individual, and deductible from the income of his employer corporation, its parent or subsidiary corporation or a corporation issuing on assuming an option in a transaction to which section 425(a) applies, as compensation attributable to the exercise of such option, shall not exceed the excess (if any) of the amount realized on such sale or exchange over the adjusted basis of such share. Thus, the limitation does not apply when the disqualifying disposition is a sale described in section 1091 (relating to loss from wash sales of stock or securities), a gift, or a sale described in section 267(a)(1) (relating to sales between related persons), since a loss sustained in any such transaction would not be recognized. Subject to the limitation provided by section 422(c)(4) and this subparagraph, the amount of compensation attributable to the exercise of the option is determined under § 1.421–6 and paragraph (b) of § 1.421–8.

(3) The application of this paragraph may be illustrated by the following examples:

Example (1). On June 1, 1964, X Corporation grants a qualified stock option to A, an employee of X Corporation, entitling A to purchase one share of X Corporation stock. On June 1, 1965, A exercises his option and the share of X Corporation stock is transferred to him on June 10, 1965. In order to meet the 3-year holding period requirement of section 422(a)(1), A must not dispose of the share acquired by exercise of his qualified stock option before June 11, 1968.

Example (2). Assume the same facts as in example (1) and assume further that the option price was $100, the fair market value of X Corporation stock on June 1, 1964, and that the fair market value of X Corporation stock was $200 on June 1, 1965, the date of exercise. A makes a disposition by selling his share on June 1, 1967, for $250. Under § 1.421–6 (relating to options to which sec. 421 does not apply) the amount of compensation attributable to A's exercise is $100 (the difference between the fair market value of the share at the date of exercise, $200, and the amount paid for the share, $100). Because the amount realized, $250, is greater than the value of the stock at exercise, section 422(c)(4) does not apply and thus does not affect the amount includible as compensation in A's gross income and deductible by X. A must include in his gross income for the taxable year in which the sale occurred $100 as compensation and $50 as capital gain ($250, the amount realized from the sale, less A's basis of $200, the $100 paid for the share plus the $100 increase in basis resulting from the inclusion of that amount in A's gross income as compensation attributable to the exercise of the option). For its taxable year in which the disqualifying disposition occurs, X Corporation is allowed a deduction of $100 for compensation attributable to A's exercise of the qualified stock option.

Example (3). Assume the same facts as in example (2), except that A sells the share for $150. Under section 422(c)(4), A must include only $50 (the excess of the amount realized on such sale, $150, over the adjusted basis of the share, $100) in his gross income as compensation attributable to the exercise of his qualified stock option instead of the $100 which otherwise would have been includible as compensation under § 1.421–6. A realizes no capital gain or loss as a result of the sale, since his basis for the share is $150 (the $100 which he paid for the share, plus the $50 increase in basis resulting from the inclusion of that amount in A's gross income as compensation attributable to the exercise of the option). For its taxable year in which the disqualifying disposition occurs, X Corporation is allowed a deduction of $50 for compensation attributable to A's exercise of the qualified stock option.

Example (4). Assume the same facts as in example (2), except that A sells the share for $50. The limitation of section 422(c)(4) applies and A is not required to include any amount in gross income as compensation attributable to the exercise of his qualified stock option. A is allowed a capital loss of $50 (the difference between the amount realized on the sale, $50, and the adjusted basis of the share, $100). X Corporation is not allowed any deduction for compensation attributable to A's exercise of the qualified stock option and disqualifying disposition.

Example (5). Assume the same facts as in example (3) except that A sells the share to his son for $150. Under section 267, a loss sustained in such a sale would not be recognized. Therefore, the limitation of section 422(c)(4) does not apply. Accordingly, under § 1.421–6, A must include $100 (the difference between the fair market value of the share at the date of exercise, $200, and the amount paid for the share, $100) in his gross income as compensation attributable to the exercise of his qualified stock option in the taxable year in which the disqualifying disposition occurred. A will recognize no capital gain or loss on the transaction. X Corporation will be allowed a $100 deduction for compensation paid to A in its taxable year in which the disqualifying disposition occurred.

Example (6). Assume the same facts as in example (3) except assume that, as a result of the failure of a good-faith attempt to set the option price at the fair market value of X Corporation stock on the date of grant, the option price was set at $90 instead of $100. Under section 422(c)(1), A includes $15 (the lesser of 150 percent of the difference between the option price, $90, and the fair market value of the share at grant, $100; or the difference between the option price, $90, and the fair market value of the share at exercise, $200) in his gross income as compensation in the year of exercise. Under section 421(a)(2), X Corporation is allowed no deduction at such time. Upon his sale of the share, A will include $45 (the excess of the amount realized on such sale, $150, over the adjusted basis of the share, $105 ($90, the option price, plus $15, the amount included in A's gross income as compensation at exercise)) in his gross income as compensation attributable to his exercise in the taxable year in which the disqualifying disposition occurs. A will have no capital gain or loss as a result of such sale. Under section 422(c)(4), X Corporation will be allowed a deduction of $45 as compensation attributable to A's exercise, in the taxable year of A's disqualifying disposition.

[T.D. 6887, 31 FR 8792, June 24, 1966]

§ 1.422–2 Qualified stock options defined.

(a) Qualified stock option defined. (1)(i) The term "qualified stock option" means an option that meets the requirements of section 422(b) and this section. Generally, section 422(b) requires a qualified stock option to be granted to an individual after December 31, 1963, and before May 21, 1976. However, a qualified stock option may be granted after May 20, 1976, if it meets the requirements of section 422(c)(7). See paragraph (i) of this section for rules relating to options granted after May 20, 1976. Section 422(b)(1) requires that a qualified stock option be granted pursuant to a plan which meets certain requirements. See paragraph (b) of this section. However, options granted after December 31, 1963, and before January 1, 1965, need not be granted under an option plan to be qualified stock options. See paragraph (b)(4) of this section. Section 422(b)(2) provides that in order for an option to be a qualified stock option it must be granted within 10 years of the adoption of the plan or the date of stockholder approval, whichever is earlier. In order to grant qualified stock options after the expiration of such 10-year period, a new plan must be adopted and approved. See paragraph (c) of this section. A new plan may retain all of the terms of the old plan or may include new terms. Paragraphs (3) through (6) of section 422(b) establish certain requirements which must be met by the terms of a qualified stock option. An option which, when granted, does not by its terms meet these requirements, cannot be a qualified stock option. See paragraphs (d) through (g) of this section. However, if the terms of an option granted after December 31, 1963, are amended before January 1, 1965, to permit the option to satisfy the requirements of section 422(b)(3), (4), or (5), such amendment will be given retroactive effect. See paragraphs (d)(2), (e)(3), and (f)(3)(ii) of this section. In addition, if the terms of an option are amended at any time to permit such option to meet the requirement of section 422(b)(6), such amendment will be given retroactive effect. See section 425(h)(3)(B) and paragraph (e)(5)(ii) of § 1.425–1. Section 422(b)(7) bars the grant of a qualified stock option to any employee whose stock ownership exceeds the limits provided by such section. To the extent the grant of an option entitles the employee to purchase stock in excess of such limitation, the option cannot be a qualified stock option. See paragraph (h) of this section.

(ii) The determination of whether a particular option is a qualified stock option is made at the time such option is granted. Accordingly, except as is otherwise specifically provided by sections 421 through 425 and the regulations thereunder, events subsequent to the grant of an option cannot affect the status of the option. For example, an option which is granted to an employee whose stock ownership exceeds the limitation provided by section 422(b)(7) is not a qualified stock option when granted and can never become a qualified stock option, irrespective of whether the individual's stock ownership is within such limitation at the time such option is exercised.

(2) Section 422 and this section do not apply to an option which is a restricted stock option.

(b) Option plan. (1) A qualified stock option granted after December 31, 1964, must be granted pursuant to a plan which is approved by the stockholders of the granting corporation within 12 months before or after the date the plan is adopted. The approval of the stockholders must comply with all applicable provisions of the corporate charter and bylaws, and the law of the State of incorporation and must represent the express consent of stockholders holding at least a majority of the voting stock of the corporation voting in

person or by proxy at a duly held stockholders' meeting. Thus, if neither the charter, bylaws or applicable State law prescribes the degree of stockholder approval required for the granting of qualified options, the approval of stockholders holding a majority of the voting stock of the corporation voting at a duly held meeting will suffice. However, if the applicable law requires that stockholders holding two-thirds of the voting stock must approve the granting of such options, such two-thirds requirement must be met.

(2) The plan required by section 422 must be approved within 12 months before or after the date the plan is adopted. Ordinarily, a plan is adopted when approved by the board of directors and the date of such board action will be the reference point for determining whether stockholder approval comes within the 12-month period. However, if the board's action is subject to a condition, such as shareholder approval, or the happening of a particular event, the plan is adopted on the date the condition is met or the event occurs, unless the board's resolution fixes the date of approval as the date of the board's action.

(3) The plan as adopted and approved must designate the aggregate number of shares which may be issued under the plan and the employees or class of employees eligible to receive options under the plan. A plan which merely provides that the number of shares which may be issued under options shall not exceed a stated percentage of the shares outstanding at the time of each offering or grant under the plan will not satisfy the requirement that the plan state the aggregate number of shares which may be issued under options. However, the maximum number of shares which may be issued under the plan may be stated in terms of a percentage of either the authorized, issued or outstanding shares at the date of the adoption of the plan. The requirement that the plan as adopted and approved must indicate the class of employees (or the employees) eligible to receive options will be considered satisfied by a general designation of the class of employees eligible to receive options under the plan. Thus, such designations as "key employees of the grantor corporation", "all salaried employees of the grantor corporation and its subsidiaries, including subsidiaries which become such after adoption of the plan" or "all employees of the corporation" will meet this requirement. Moreover, this requirement will be considered satisfied although the board of directors or another group is given authority to select the particular employees who are to receive options from a described class and to determine the number of shares to be optioned to each such employee. The provisions relating to the aggregate number of shares to be issued under the plan and the class of employees (or the employees) eligible to receive options under the plan, are the only provisions of a stock option plan which require stockholder approval for purposes of section 422(b)(1). Any increase in the aggregate number of shares which may be issued under the plan (other than an increase merely reflecting a change in capitalization such as a stock dividend or stock split-up), or change in the designation of the employees or class of employees eligible to receive options under the plan will be considered as the adoption of a new plan requiring stockholder approval within the prescribed 12-month period. Any other changes in the terms of a qualified stock option plan may be made without such changes being considered the adoption of a new plan. An option intended by the grantor corporation to be a qualified option will be treated as having been issued pursuant to a plan notwithstanding that the terms of the option conflict with certain terms of the plan unless such option is issued to an employee not eligible to receive options under the plan or options have been issued on stock in excess of the aggregate number of shares which may be issued under the plan. A stock option plan which otherwise meets the requirements of section 422(b)(1) and this paragraph may be availed of for the granting of qualified stock options although the adoption and approval of such plan occurred before January 1, 1964.

(4) In the case of an option granted after December 31, 1963, and before January 1, 1965, section 422(b)(1) and (2), and this paragraph do not apply. Thus, an option granted during the calendar year 1964, which meets the requirements of section 422(b)(3) through (7), will be a qualified stock option irrespective of whether such option is granted pursuant to a plan; or, if granted pursuant to a plan, irrespective of whether such option was granted within 10 years from the date such plan was adopted or approved by shareholders, and irrespective of whether such plan specifies the employees or class of employees to whom options may be granted or the number of shares which may be granted under options.

(c) **Duration of plan.** A qualified stock option must be granted within 10 years from the date the option plan (required by section 422(b)(1) and paragraph (b) of this section) is adopted, or the date such plan is approved by the stockholders, whichever is earlier. Thus, a plan for the granting of qualified stock options expires 10 years after the adoption or approval of such plan, whichever is

earlier. This is equally true whether the adoption or approval occurred before January 1, 1964 (as in the case of a restricted stock option plan which met the requirement of section 422(b)(1) when adopted and approved), or after such date. For example, a restricted stock option plan which was adopted June 1, 1956, and approved August 1, 1956, and which otherwise met the requirements of section 422(b)(1) and paragraph (b) of this section may be availed of for the granting of qualified stock options only through May 31, 1966, after which date the plan will expire for purposes of section 422(b)(1) and (2).

(d) Period for exercising options. (1) A qualified stock option by its terms must not be exercisable after the expiration of 5 years from the date the option is granted. Except as provided by subparagraph (2) of this paragraph, an option which does not contain such a provision when granted cannot be a qualified stock option.

(2) An exception to the requirement of section 422(b)(3) and this paragraph is provided in the case of options granted after December 31, 1963, and before January 1, 1965. If, at the time of grant, such an option did not contain the provision required by section 422(b)(3) and this paragraph, the option may be amended before January 1, 1965, to add such a provision and such amendment will not be treated as a modification under section 425(h)(1) or § 1.425–1. Furthermore, the amendment will be considered as retroactive to the date of grant of the option and will in no way affect such grant.

(e) Option price. (1) In general, the option price of a qualified stock option must not be less than the fair market value of the stock subject to the option at the time the option is granted. For general rules relating to the option price see paragraph (e) of § 1.421–7. For rules relating to the determination of when an option is granted, see paragraph (c) of § 1.421–7. The option price may be determined in any manner so long as the minimum price possible under the terms of the option cannot (except as provided by section 422(c)(1) and subparagraph (2) of this paragraph) be less than the fair market value of the stock at the date of grant.

(2)(i) Under section 422(c)(1), if a share of stock is transferred to an individual pursuant to his exercise of an option which fails to qualify as a qualified stock option because there was a failure of an attempt, made in good faith, to meet the requirements of section 422(b)(4) and subparagraph (1) of this paragraph, the requirements of such section and subparagraph shall be considered to have been met. However, in such a case there shall be included as compensation (and not as gain upon the sale or exchange of a capital asset) in the gross income of the individual for his taxable year in which such option is exercised, an amount equal to the lesser of—(a) 150 percent of the difference between the option price and the fair market value of the stock at the time the option was granted, or (b) the difference between the option price and the fair market value of the stock at the time of such exercise. The basis of the stock acquired shall be increased by an amount equal to the amount included in the gross income of the individual.

(ii) Whether there was a good-faith attempt to set the option price at not less than the fair market value of the stock subject to the option at the time the option was granted depends on the facts and circumstances surrounding the case. For example, in the case of a publicly held stock which was actively traded in an established market at the time the option was granted, determining the fair market value of such stock by any reasonable method using market quotations would establish that a good-faith attempt to meet the requirements of section 422(b)(4) and this paragraph was made. On the other hand, in the case of a stock which is not publicly traded, if it is shown, for example, that the fair market value of the stock at the date of grant was based upon an average of the fair market values as of such date set forth in the opinions of completely independent and well-qualified experts, such a showing will establish that there was a good-faith attempt to meet the requirements of section 422(b)(4) and this paragraph. However, amounts treated as unstated interest under section 483 and the regulations thereunder, if attributable to the exercise of options granted after December 31, 1964, and amounts paid as interest under a deferred payment arrangement are not includible as part of the "option price". See paragraph (e)(1) of § 1.421–7. In the case of an option granted after July 1, 1966, an attempt to set the option price at not less than fair market value will not be regarded as made in good faith where an adjustment of the option price to allow for the application of section 483 results in the option price being lower than the fair market value on which the option price was based.

(3) A further exception to the requirement of section 422(b)(4) and subparagraph (1) of this paragraph is provided in the case of options granted after December 31, 1963, and before January 1, 1965. An amendment to the terms of such an option made before January 1, 1965, to satisfy the requirements of section 422(b)(4) and subpara-

graph (1) of this paragraph will not be considered a modification for purposes of section 425(h) and § 1.425–1. Furthermore, the amendment will be considered as retroactive to the date of grant of the option, and will in no way affect such grant.

(f) Prior outstanding options. (1)(i) Section 422(b)(5) provides that a qualified stock option must, by its terms, not be exercisable while there is outstanding any qualified or restricted stock option which was granted, before the granting of the new qualified stock option, to the individual to purchase stock in his employer corporation, or in a corporation which, at the time of the granting of the new qualified stock option, is a parent or subsidiary corporation of the employer corporation, or a predecessor corporation of any of such corporations. Thus, in general, under section 422(b)(5), a qualified stock option must not be exercisable until all qualified and restricted stock options which were previously granted to the individual by the grantor corporation, or by related or predecessor corporations, have been exercised in full or have expired solely by reason of the lapse of time. The limitation of section 422(b)(5) applies irrespective of whether the transfer of stock pursuant to such prior outstanding restricted or qualified stock options can qualify for the special tax treatment of section 421. The exercisability of a qualified stock option is not affected by options which are not qualified or restricted stock options.

(ii) If the new qualified stock option being granted to the individual, and all the outstanding qualified and restricted stock options previously granted to the individual, are to purchase stock of the same class in the same corporation, section 422(c)(6) provides that the requirement of section 422(b)(5) will be considered to have been met if the new option by its term is not exercisable while there is outstanding (within the meaning of section 422(c)(2)) any such previously granted option with an option price (determined as of the date of grant of the new option) higher than the option price of the new option. Thus, a qualified stock option to which section 422(c)(6) applies may be exercisable without regard to a prior outstanding option to purchase stock of the same class in the same corporation, if the option price payable under such prior outstanding option is not greater than the price of the new option.

(iii) The restriction imposed by section 422(b)(5) (or sec. 422(c)(6)(B)) must be set forth in the terms of the option unless the individual in fact has no prior outstanding qualified or restricted stock options (or restricted stock options previously granted which will become outstanding at a future time) to purchase stock of the grantor corporation, a related corporation, or a predecessor corporation of any of such corporations, at the time the new qualified stock option is granted. An option which incorporates by reference the provision of a plan containing the restrictions required by section 422(b)(5) (or 422(c)(6)(B)) will be treated as an option which by its terms sets forth such restrictions. Except as provided by this subdivision, if an option is granted which does not contain the restriction imposed by section 422(b)(5), either expressly or by incorporation by reference, such option cannot be a qualified stock option, irrespective of whether such restriction is in fact complied with at the time the option is exercised, and irrespective of whether the plan under which the option is granted contains the restriction required by section 422(b)(5). If the terms of an option granted after December 31, 1963, and before January 1, 1965, are amended before January 1, 1965, to satisfy the requirements of this subdivision, the amendment will not be considered a modification for purposes of section 425(h) and § 1.425–1, the amendment will be considered as retroactive to the date of grant of the option, and the amended option will be treated as an outstanding qualified stock option as of the date of the original grant.

(2) For purposes of section 422(b)(5) and this paragraph, the term "predecessor corporation" means a corporation which was a party to a transaction described in section 425(a) (irrespective of whether a substitution or assumption under such section was in fact effected) with the grantor corporation, or a corporation which, at the time the new qualified stock option is granted, is a related corporation of the grantor corporation, or a predecessor corporation of any of such corporations.

(3)(i) Except as is otherwise provided by this subparagraph, for purposes of section 422(b)(5), a qualified or restricted stock option is treated as outstanding according to its original terms until such option is exercised in full or expires by reason of the lapse of time. Thus, for example, if an option outstanding according to its terms for 5 years is revised to shorten to 1 year the period during which it may be exercised, such option is treated as outstanding for 5 years from the original date of grant for purposes of section 422(b)(5), notwithstanding the revision. If any portion of such an option is not exercised, such portion will be treated as outstanding until the expiration of the maximum period for which such portion, according to the terms of the option when granted,

could have been exercised under any circumstances. A qualified or restricted stock option previously held by an individual and replaced in a transaction to which section 425(a) applies will not thereafter be treated as outstanding. However, if a qualified or restricted stock option is modified and under section 425(h) such modification is considered as the granting of a new option (even though for other purposes only one option is regarded as being in existence), the original qualified or restricted stock option continues for the purposes of section 422(b)(5) to be outstanding, and may prevent an exercise of the new qualified or restricted stock option until the original option has, by its original terms, expired.

(ii) A restricted stock option granted before January 1, 1964, will not be treated as outstanding for any period before the first day on which (under the terms of such option) it may be exercised. If such an option is exercisable in installments, each installment will be treated as a separate option for purposes of this rule, with each installment becoming outstanding as of the first day it becomes exercisable under the terms of the option. However, this special rule does not affect the date on which the option is treated as granted. Thus, such a restricted stock option affects the exercise of a qualified stock option granted subsequent to the grant of such a restricted stock option to the extent the qualified stock option is not exercised before the restricted stock option becomes outstanding. See example (7) under subparagraph (4) of this paragraph.

(iii) A restricted stock option terminated before January 1, 1965, will not be treated as outstanding irrespective of the reason for which such option was terminated. If, under this subdivision, the number of shares subject to a restricted stock option is reduced, such option will be treated as outstanding for purposes of section 422(b)(5) only with respect to such reduced number of shares.

(4) The application of this paragraph may be illustrated by the following examples:

Example (1). S Corporation is a subsidiary of P Corporation. In 1963 E was an employee of S Corporation and was granted a restricted stock option by S to buy S stock. In June of 1964 E left S and became an employee of X Corporation, where he was granted a qualified stock option to purchase X stock. X Corporation is neither a related nor predecessor corporation of P or S. On June 1, 1965, E leaves X to become an employee of P Corporation, and on such date E is granted a qualified stock option by P to purchase P stock. E's restricted stock option to buy S stock was not cancelled during 1964, and both his restricted stock option on S stock and his qualified stock option on X stock are outstanding on June 1, 1965, when E is granted a qualified stock option to purchase P stock. In order to meet the requirement of section 422(b)(5), E's qualified stock option on P stock must, by its terms, not be exercisable until E's restricted stock option on S stock is exercised in full or expires solely by reason of the lapse of time.

Example (2). E is an employee of P Corporation. E holds a restricted stock option granted June 1, 1963, and a qualified stock option granted June 1, 1965. Both options were granted to him by P to purchase P stock. E has been granted no other qualified or restricted stock options by P, a related corporation, or a predecessor corporation of any of such corporations. The price payable under E's restricted stock option as of June 1, 1965, is $100; the option price of E's qualified stock option is $90. On June 1, 1966, P grants another qualified stock option to E to purchase P stock at $95. Under section 422(b)(5) and (c)(6), neither of E's qualified stock options may be exercisable until E's restricted stock option is exercised in full or expires solely by reason of the lapse of time. Assuming the restricted stock option is fully exercised on June 1, 1967, E will be free to exercise either his 1965 or 1966 qualified stock option.

Example (3). Assume the same facts as in example (2). On November 30, 1964, P cancels E's restricted stock option and in exchange therefor issues a qualified stock option to E in place of the cancelled restricted stock option. For purposes of section 422(b)(5), E's restricted stock option is treated as terminated and no longer outstanding as of such date, and will not affect the exercise of E's 1964, 1965, or 1966 qualified stock options. The qualified stock option issued in place of E's restricted stock option will be treated as outstanding for purposes of section 422(b)(5) as of November 30, 1964.

Example (4). Assume the same facts as in example (3) except assume that the cancellation of the restricted stock option takes place on November 30, 1965, and that the new option is a qualified stock option as of such date. Assume further that the option prices are as follows:

Restricted stock option	$100
Qualified stock option (granted June 1, 1965)	90
Qualified stock option (granted November 30, 1965, upon cancellation of restricted stock option)	85
Qualified stock option (granted June 1, 1966)	95

and that each qualified stock option runs 5 years from grant, and that the restricted stock option, according to its terms when granted, would have expired solely by reason of the lapse of time at the close of business on May 31, 1969. Under section 422(b)(5), and (c)(2) and (6), E's restricted stock option is treated as outstanding according to its original terms when granted, and E cannot exercise any of his qualified stock options until June 1, 1969 (the first day after the expiration of the original period for which E's restricted stock option was granted). On June 1, 1969, E's June 1, 1965, qualified stock option will be fully exercisable. E's November 30, 1965, qualified stock option will not be exercisable until after the full exercise or expiration of E's June 1, 1965, qualified stock option. The exercise of E's June 1, 1966, qualified stock option is barred only by E's restricted stock option. Thus, upon the expiration of E's restricted stock option, E is free to exercise either his June 1965 qualified stock option, or his June 1966 qualified stock option, while the exercise of his November 1965 qualified stock option must await the full exercise or expiration of his June 1965 qualified stock option.

Example (5). Assume the same facts as in example (4). On June 1, 1968, P Corporation sells all of its assets to M Corporation, and on such date E becomes an employee of M Corporation. Assume further that M Corporation substitutes new options to purchase M stock for the P options held by E, in a transaction to which section 425(a) applies. For purposes of section 422(b)(5), each M Corporation option received by E

in substitution of a P Corporation option will be treated as outstanding to the same extent and in the same manner as the P option which it replaces. Thus, none of the M options received by E in substitution for his qualified stock options of P stock may be exercisable before June 1, 1969, and the M option issued in substitution for E's November 1965, qualified stock option may be exercisable only after the full exercise or expiration of the M option issued in substitution for E's June 1, 1965, option on P stock. If, in 1969, E is granted another qualified stock option by M Corporation, such qualified stock option will be subject to the qualified stock options granted by M to E in 1968 in substitution for E's qualified stock options to purchase P stock. The qualified stock options to purchase P stock which were replaced by M in the transaction to which section 425(a) applied will not be treated as outstanding for any purpose under section 422(b)(5).

Example (6). Assume the same facts as in example (5) except assume that M does not effect a substitution or assumption of E's P Corporation qualified stock options under section 425(a). Although P is neither a parent nor subsidiary of M, for purposes of section 422(b)(5), P is a predecessor corporation of M Corporation. Accordingly, any qualified stock options granted to E by M (or its parent or subsidiary corporations, or a predecessor corporation of any of such corporations) must, by their terms, not be exercisable until the expiration of the option periods for all of E's qualified and restricted stock options granted to E by P Corporation. Section 422(c)(6) cannot apply to permit E to exercise his M options before the expiration of the option periods of his P options because not all of E's qualified and restricted stock options which are outstanding (within the meaning of section 422(c)(2)) are to purchase stock of the same class in the same corporation.

Example (7). F is an employee of N Corporation. Prior to January 1, 1964, N granted a restricted stock option to F to purchase 100 shares of N Corporation stock at a price of $100 per share. The option is exercisable in installments as follows: 20 shares on or after June 1, 1965; another 40 shares on or after June 1, 1967; and the last 40 shares on or after June 1, 1969. Under section 422(c)(2), each installment of F's restricted stock option will be treated as becoming outstanding as of the first day on which such installment may be exercised. Thus, under the facts given, any qualified stock options granted to F by N Corporation to purchase N stock at less than $100 per share will be affected by F's restricted stock option as follows: Before June 1, 1965, F may exercise such qualified stock options without regard to his restricted stock option; between May 31, 1965, and June 1, 1967, F may exercise such qualified stock options only after the full exercise of the first installment of his restricted stock option; between May 31, 1967, and June 1, 1969, F may exercise such qualified stock options only after the full exercise of the first and second installments of his restricted stock option; after May 31, 1969, F may exercise such qualified stock options only after the full exercise or expiration of all installments of his restricted stock option.

Example (8). F is an employee of N Corporation. On January 1, 1966, N grants F a qualified option to purchase 100 shares of N Corporation stock at a price of $100 a share at any time prior to January 1, 1971. The stock is then selling at $100 a share. On January 1, 1967, when the stock was selling at $95 a share, N modified the option to permit F to exercise the option at any time prior to January 1, 1972. Under section 425(h) N's modification is treated as the granting of a new option to F. Although for other purposes F, after the modification, has one option to purchase 100 shares of N Corporation stock at a price of $100 a share at any time prior to January 1, 1972, for purposes of section 422(b)(5), F is regarded as having two options, an "original" option to purchase 100 shares at $100 a share prior to January 1, 1971, and a modified option to purchase 100 shares at $100 a share prior to January 1, 1972. If the terms of the modified option include the language of section 422(c)(6)(B), so that section 422(b)(5) does not apply, the modified option will be exercisable immediately as there is no prior outstanding option to purchase stock at a higher price.

Example (9). F is an employee of N Corporation. On January 1, 1966, N grants F a qualified option to purchase 100 shares of N Corporation stock at a price of $100 a share at any time prior to January 1, 1971. The stock is then selling at $100 a share. On January 1, 1967, when the stock was selling at $95 a share, N modified the option to permit F to purchase 100 shares of N Corporation stock at a price of $95 a share and to exercise the option at any time prior to January 1, 1972. Under section 425(h) N's modification is treated as the granting of a new option to F. Although for other purposes F, after the modification, has one option to purchase 100 shares of N Corporation at a price of $95 a share at any time prior to January 1, 1972, for purposes of section 422(b)(5), F is regarded as having two options. Thus, F may not exercise the modified option until January 1, 1971, as until that date, the original option is regarded as outstanding. If the option period had not been extended, F would never have been able to exercise the modified option because of the limitation of section 422(b)(5) and the existence, for the purposes of that section, of a prior outstanding option having the same expiration date as the new option.

(g) Restriction on transferability. A qualified stock option must, by its terms, not be transferable by the individual to whom it is granted otherwise than by will or the laws of descent and distribution, and must be exercisable, during the lifetime of such individual, only by him. For general rules relating to the restriction on transferability required by section 422(b)(6), see paragraph (b)(2) of § 1.421–7. For a limited exception to the requirement of section 422(b)(6), see section 425(h)(3).

(h) Options granted to certain shareholders. (1)(i) In general, an option is not a qualified stock option to the extent that, immediately after such option is granted, the optionee owns stock possessing more than 5 percent of the total combined voting power or value of all classes of stock of the employer corporation, or a related corporation of such corporation. Selection 422(c)(3) provides that, in applying the limitation of section 422(b)(7), the rules of section 425(d) (relating to attribution of stock ownership) shall apply in determining the stock ownership of the individual, and stock which the individual may purchase under outstanding options (whether or not such options qualify for the special tax treatment afforded by section 421(a)) shall be treated as stock owned by the individual. An option is outstanding for purposes of sections 422(b)(7) and 422(c)(3) although under its terms it may be exercised only in installments or after the expiration of a fixed period of time. The rules of section 422(c)(2) which are applied in determining whether an option is outstanding for purposes of section

422(b)(5) do not apply with respect to section 422(b)(7) and paragraph (c)(3).

(ii) The determination of the percentage of the total combined voting power or value of all classes of stock of his employer corporation (or a related corporation of such corporation) that is owned by the individual is made by comparing the voting power or value of the shares owned (or treated as owned) by the individual to the aggregate voting power or value of all shares actually issued and outstanding immediately after the grant of the option to such individual. The aggregate voting power or value of all shares actually issued and outstanding immediately after the grant of the option does not include the voting power or value of treasury shares or shares authorized for issue under outstanding options held by the individual or any other person.

(2) If an individual is granted an option which permits him to purchase stock in excess of the limitation of section 422(b)(7) (determined by applying the rules of section 422(c)(3) and this paragraph), such option shall be treated as meeting the requirement of section 422(b)(7) to the extent that such individual could, if the option were exercised in full at the time of grant, purchase stock under such option without exceeding such limitation. If shares in excess of the number allowable under section 422(b)(7) are transferred to the individual under an option, such shares will not be treated as transferred pursuant to the exercise of a qualified stock option, irrespective of whether the stock ownership of the individual at the time of such transfer exceeds the limitation of section 422(b)(7). The shares purchased under an option described in this subparagraph which will be treated as shares transferred pursuant to the exercise of a qualified stock option will be the first shares acquired under the option. If more shares are acquired in any one exercise of the option than can qualify as being transferred pursuant to the exercise of a qualified stock option under the rules of section 422(b)(7) and this paragraph, the individual must designate which shares are to be treated as having been transferred pursuant to the exercise of a qualified stock option.

(3)(i) If at the time the option is granted the combined equity capital of the employer corporation and its related corporations does not exceed $2,000,000, the 5-percent limitation of section 422(b)(7) is increased by adding to such 5 percent the percentage (not higher than 5 percent) which bears the same ratio to 5 percent as the difference between such combined equity capital and $2,000,000 bears to $1,000,000. Thus, if the employer corporation and its related corporations have combined equity capital of $1,000,000 or less, an employee may be granted a qualified stock option so long as the value of voting power of the stock owned (or treated as owned) by such employee does not exceed 10 percent of the total combined voting power or value of all classes of stock of any of such corporations.

(ii)(a) Section 422(c)(3) provides that the term "equity capital" means, in the case of one corporation, the sum of its money and other property (in an amount equal to the adjusted basis of such property for determining gain), less the amount of its indebtedness (other than indebtedness to shareholders). In the case of a group of corporations consisting of a parent and its subsidiary corporations, the term "equity capital" means the sum of the equity capital of each of such corporations adjusted in the manner provided by (b) of this subdivision.

(b) In determining the equity capital of a corporation which is a member of a group of corporations consisting of a parent and its subsidiary corporations, the following adjustments shall be made:

(i) The sum of the money and other property (in an amount equal to the adjusted basis of such property for determining gain) of such corporation shall be reduced by the amount included in the equity capital of such corporation in respect of: stock owned by such corporation in any other corporation in the group; cash, property, or services due such corporation by any other corporation in the group; inventory owned by such corporation, to the extent the adjusted basis (for determining gain) of such inventory includes profits realized by any other corporation in the group; and fixed assets owned by such corporation, to the extent the adjusted basis (for determining gain) of such fixed assets includes profits realized by any other corporation in the group; and

(ii) The total indebtedness of such corporation which is taken into account in determining its equity capital shall be reduced by the amount of such indebtedness which is owed to any other corporation in the group.

In making the reductions required by this subdivision, no adjustments shall be made to reflect any minority interest in intercompany profits, indebtedness, or stock ownership; and no reduction is required to be made in respect of amounts representing profits in the inventory or fixed assets of a corporation arising from intercompany transac-

tions which occurred before such corporation became a member of the group.

(4) The application of this paragraph may be illustrated by the following examples:

Example (1). E, an employee of M Corporation, owns 6,000 shares of the common stock of M Corporation, the only class of M stock outstanding. M has 100,000 shares of its common stock outstanding. M's equity capital (as defined by section 422(c)(3) and this paragraph) exceeds $2,000,000. Since E owns 6 percent of the combined voting power or value of all classes of M Corporation stock, M cannot grant a qualified stock option to E. Any option granted to E which purports to be a qualified stock option will be treated as a compensatory option, and as such, subject to the rules of § 1.421–6 of the regulations. If E's father and brother each owned 3,000 shares of M stock, and E owned no M stock in his own name, the result in this case would be the same, since under section 425(d) a person is treated as owning stock held by his father and his brother. Similarly, the result would be the same if, instead of actually owning 6,000 shares, E merely held an option on 6,000 shares of M stock, irrespective of whether the transfer of stock under such option could qualify for the special tax treatment of section 421, since section 422(c)(3)(C) provides that stock which the individual may purchase under outstanding options shall be treated as stock owned by such individual.

Example (2). Assume the same facts as in example (1) and assume further that M is a subsidiary corporation of P Corporation. Irrespective of whether E owns any P stock, and irrespective of the amount of P's equity capital or number of P shares outstanding, E cannot receive a qualified stock option from P. This results from E's ownership of more than 5 percent of the total combined voting power of all classes of stock of a subsidiary of P Corporation, *i.e.*, M Corporation. Thus, an individual who owns (or is treated as owning) stock in excess of the limitation of section 422(b)(7), in any corporation in a group of corporations, consisting of a parent and its subsidiary corporations, cannot receive a qualified stock option from any corporation in the group.

Example (3). F is an employee of R Corporation. R's equity capital is in excess of $2,000,000. R has only one class of stock, of which 100,000 shares are issued and outstanding. Assuming F owns no stock in R or in any parent or subsidiary of R for purposes of section 422(b)(7), R can grant a qualified stock option to F for 5,000 shares, since immediately after the grant of the option F will be treated as owning 5,000 shares of a total of 100,000 shares actually issued and outstanding at such time. The 5,000 shares which F will be treated as owning by reason of section 422(c)(3)(C) will not be added to the 100,000 shares actually issued and outstanding immediately after the grant for purposes of determining whether F's stock ownership exceeds the limitation of section 422(b)(7).

Example (4). Assume the same facts as in example (3) and assume further that on June 1, 1965, R grants F an option, purporting to be a qualified stock option, for 5,200 shares at an option price of $100 per share, the fair market value of R stock on such date. This option will only be a qualified stock option to the extent of 5,000 shares. Assume R transfers 5,000 shares to F pursuant to F's partial exercise of the option. Such transfer can qualify for the special tax treatment of section 421. However, no further transfer of shares pursuant to an exercise of this option can qualify for the special tax treatment of section 421, since the option was not a qualified stock option when granted to the extent it covered more than 5,000 shares. This is true although F's stock ownership immediately after the transfer of the 5,000 shares to him does not exceed the 5-percent limitation of section 422(b)(7), since F owns only 5,200 shares (5,000 shares outright, plus 200 shares by reason of section 422(c)(3)(C)) of a total 105,000 shares actually issued and outstanding (the 100,000 shares issued and outstanding when the option was granted to F, plus an additional 5,000 shares issued and outstanding as a result of F's exercise).

Example (5). E is an employee of P Corporation. P owns 60 percent in value of the stock of S Corporation, and P and S have combined equity capital (as defined by section 422(c)(3)(A)(ii) and subparagraph (3) of this paragraph) of $1,600,000. Since the combined equity capital of P and S is less than $2,000,000, there may be added to the 5-percent limitation of section 422(b)(7) the additional percentage which bears the same proportion to 5 percent as the difference between the combined equity capital of P and S and $2,000,000 ($2,000,000 minus $1,600,000, or $400,000) bears to $1,000,000. Accordingly, there may be added to the 5-percent limitation of section 422(b)(7) an additional 2 percent ($400,000 is to $1,000,000, as 2 percent is to 5 percent), resulting in a limitation of 7 percent (5 percent plus 2 percent) for purposes of section 422(b)(7). Thus, an option which otherwise meets the requirements of section 422(b) and which is granted to E by P or S to purchase the stock of either of such corporations will meet the requirement of section 422(b)(7) to the extent that, immediately after such option is granted. E will not own (or be treated as owning) stock in either P or S possessing more than 7 percent of the total combined voting power or value of all classes of the stock of either of such corporations which is actually issued and outstanding at such time. If, at the time the option is granted, E owns stock possessing more than 7 percent of the total combined voting power or value of the stock of either P or S, the option could not qualify as a qualified stock option, irrespective of which corporation's stock was the subject of the option.

(i) Certain options granted after May 20, 1976—(1) In general. An option granted to an individual after May 20, 1976 is not a qualified stock option unless the option meets the requirements of section 422(c)(7) and this paragraph. Generally, an option meets the requirements of section 422(c)(7) if it either is granted under a written plan adopted before May 21, 1976, or is substituted for a qualified stock option described in paragraph (i)(3) of this section. An option meeting the requirements of section 422(c)(7) and this paragraph that is exercised after May 20, 1981, will be treated under § 1.83–7(a) as if it were a nonqualified stock option without a readily ascertainable fair market value at the time of its grant.

(2) Options granted under a written plan adopted before May 21, 1976. (i) An option granted after May 20, 1976, is a qualified stock option if it otherwise meets the requirements of section 422(b) and this section and if the option is granted under a written plan that was adopted before May 21, 1976. A plan will be treated as having been adopted as of the date all actions needed for adoption have been completed. Ordinarily, a plan is adopted when approved by the board of directors of the granting corporation. However, if the board's action is subject to a condition or the happening of a particular event,

the plan is adopted on the date the condition is met or the event occurs unless the board's resolution fixes the date of approval as the date of the board's action. For purposes of determining the date of the adoption of a plan, the date of the approval of the plan by the shareholders of the granting corporation is disregarded. Thus, it is immaterial whether the shareholders approved the plan before, on, or after May 21, 1976, although the plan must satisfy the requirements of paragraph (b) of this section, which requires that the shareholders approve the plan within 12 months before or after its adoption by the board. The authorization of specific grants of options to specific individuals under the plan is not required in order for options granted under the plan to be qualified stock options.

(ii) A corporation that merely changes its identity or place of incorporation may continue to grant qualified stock options under a written plan adopted before May 21, 1976, to the extent permissible had the change not occurred. In all other reorganizations a written option plan will be treated as being adopted after May 20, 1976, unless the corporation that adopted the plan before May 21, 1976, survives the reorganization. Of course, the surviving corporation may continue to grant options under the plan only to the extent it would have been able to do so had the reorganization not occurred.

(3) Substituted stock options. An option granted after May 20, 1976, is a qualified stock option if the option is an option that has been substituted, in a transaction to which section 425(a) applies (relating to certain corporate reorganizations, liquidations, etc.), for a qualified stock option granted before May 21, 1976 (or any option that is a qualified stock option under the requirements section 422(c)(7)(A) or (B) and paragraph (i)(2) or (3) of this section).

(4) Modifications to option plans. An option plan adopted before May 21, 1976, may be modified after May 20, 1976, and options granted under such a plan, as modified, will be considered options granted under a plan adopted before May 21, 1976, unless the modification is considered the adoption of a new plan. See paragraph (b) of this section for rules relating to modifications that will be considered the adoption of a new plan. If a plan is modified after May 20, 1976, such that the modification is considered under paragraph (b) of this section to be the adoption of a new plan any option granted as a result of such modification will not be a qualified stock option. An option will be considered to have been granted as a result of such modification if it could not have been granted but for such modification of the plan. For example, if the modification changes the terms of the options to be granted in such a way that the modification is considered the adoption of a new plan, then no option granted with such terms is a qualified stock option since it could not have been granted but for the modification. If a plan is modified to increase the number of shares that can be transferred upon exercise of the options granted under the plan, any option granted after the modification will be a qualified stock option only if the option could have been granted without the modification to the plan. For example, if the number of shares authorized under a plan is increased from 4,000 shares to 10,000 shares at a time when options have already been granted under the plan to purchase 3,000 of the previously authorized shares, an option granted after the modification will be a qualified stock option if it is not an option to purchase any of the additional 6,000 shares authorized by the modification. In determining for this purpose which shares are subject to a particular option, the first option granted after the modification will be considered an option to buy originally authorized shares to the extent there are any such shares not subject to a previously granted option. If options to buy originally authorized shares and options to buy additional shares are granted, the granting corporation may designate which options are options to buy originally authorized shares to the extent there are originally authorized shares not subject to a previously granted option. In the previous example, absent such a designation, if ten options were granted on different days after the plan modification, each option for the purchase of 700 shares, the first option would be a qualified stock option since 1,000 originally authorized shares are not subject to any previously granted option. The second option would not be a qualified stock option because it includes an option to buy 400 shares that were not originally authorized and therefore could not have been granted without the modification. If the order in which the ten options were granted could not be determined and no such designation were made under this paragraph, none of the options would be a qualified stock option. If the modification enlarges the class of employees eligible to receive options, any option granted to a newly eligible employee would not be a qualified stock option.

(5) Exercise of certain options after May 20, 1981. If a qualified stock option granted after May 20, 1976, is exercised after May 20, 1981, the option will be treated as if it were a nonqualified stock option that did not have a readily ascertain-

able fair market value at the time it was granted. Thus, if such a qualified stock option is exercised after May 20, 1981, section 421(a) will not apply to the transfer of stock pursuant to the exercise of the option, and such transfer will be taxed under section 83. See § 1.83–7(a) for rules relating to the treatment of nonqualified stock options under section 83.

[T.D. 6887, 31 FR 8793, June 24, 1966, as amended by T.D. 7680, 45 FR 13453, Feb. 29, 1980]

§ 1.423–1 Applicability of section 421(a).

(a) General rule. Subject to the provisions of section 423(c) and paragraph (k) of this section, the special rules of income tax treatment provided in section 421(a) apply with respect to the transfer of a share of stock to an individual pursuant to his exercise of an option granted after December 31, 1963, under an employee stock purchase plan provided that the following conditions are satisfied—

(1) The individual must make no disposition of such share within 2 years from the date of the granting of the option, nor within 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) after the transfer of such share to him; and

(2) At all times during the period beginning with the date of the granting of the option and ending on the day three months before the date of such exercise, the individual must be an employee of either the corporation granting the option, a related corporation of such corporation, or a corporation or a related corporation of such corporation issuing or assuming a stock option in a transaction to which section 425(a) applies.

(b) Cross-references. For rules relating to the employment relationship, see paragraph (h) of § 1.421–7. For rules relating to the effect of a disqualifying disposition, see section 421(b) and paragraph (b) of § 1.421–8. For definition of the term "disposition", see section 425(c) and paragraph (c) of § 1.425–1.

[T.D. 6887, 31 FR 8798, June 24, 1966, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.423–2 Employee stock purchase plan defined.

(a) In general. (1) The term "employee stock purchase plan" means a plan which meets the requirements of paragraphs (1) through (9) of section 423(b). If the terms of the plan do not satisfy the requirements of paragraphs (3) through (9) of section 423(b), such requirements may be satisfied by the terms of an offering made under such plan. However, in such a case, such requirements will be treated as satisfied only with respect to options exercised under such offering.

(2) The determination of whether a particular option is an option granted under an employee stock purchase plan is made at the time such option is granted. If the terms of an option are inconsistent with the terms of the employee stock purchase plan or an offering under such a plan, the option will not be treated as granted under an employee stock purchase plan. If such an option is granted to an employee who is entitled to the grant of an option under the terms of the plan or offering, and such employee is not granted an option under such offering which qualifies as an option granted under an employee stock purchase plan, such offering will not meet the requirements of section 423(b)(4). Accordingly, none of the options granted under such offering will be eligible for the special tax treatment of section 423(b)(4). If such an option is granted to an individual who is not entitled to the grant of an option under the terms of the plan or offering, such option will not be treated as an option granted under an employee stock purchase plan, and the grant of the option will not disqualify the plan or the options granted under such plan or offering. For example, an option granted to an individual who is ineligible to receive an option under an employee stock purchase plan by reason of his ownership of 5 percent or more of the voting power or value of the stock of the grantor corporation (or a related corporation of such corporation), will not be treated as an option granted under an employee stock purchase plan, and the grant of such an option will not disqualify options granted under such plan from the special tax treatment of section 421. If all the options granted under an offering do not give the respective optionees the same rights and privileges, none of the options granted under such offering will be treated as having been granted under an employee stock purchase plan. If, at the time an option is granted, it qualifies as an option granted under an employee stock purchase plan, but the terms of the option are not in fact met, the option will not qualify for the special tax treatment of section 421. However, the failure of such an option to qualify for the special tax treatment of section 421, will not disqualify other options granted under the plan.

(b) Options restricted to employees. An employee stock purchase plan must provide that options are to be granted only to employees of the employer corporation or of its related corporations

to purchase stock in any such corporation. If such a provision is not included in the terms of the plan, the plan will not be an employee stock purchase plan and options granted under such plan will not qualify for the special tax treatment of section 421. For rules relating to the employment requirement, see paragraph (h) of § 1.421–7.

(c) Stockholder approval. (1) An employee stock purchase plan must be approved by the stockholders of the granting corporation within 12 months before or after the date such plan is adopted. The approval of the stockholders must comply with all applicable provisions of the corporate charter and bylaws, and the law of the State of incorporation and must represent the express consent of stockholders holding at least a majority of the voting stock of the corporation voting in person or by proxy at a duly held stockholders' meeting. Thus, if neither the charter, bylaws or applicable State law prescribes the degree of stockholder approval required for the granting of qualified options, the approval of stockholders holding a majority of the voting stock of the corporation voting at a duly held meeting will suffice. However, if the applicable State law requires that stockholders holding two-thirds of the voting stock must approve the granting of such options, such two-thirds requirement must be met.

(2) The plan required by section 423 must be approved within 12 months before or after the date the plan is adopted. Ordinarily, a plan is adopted when approved by the board of directors and the date of such board action will be the reference point for determining whether stockholder approval comes within the 12-month period.

(3) The plan as adopted and approved must designate the aggregate number of shares which may be issued under the plan, and the corporations or class of corporations whose employees will be offered options under such plan. A plan which merely provides that the number of shares which may be issued under options shall not exceed a stated percentage of the shares outstanding at the time of each offering or grant under the plan will not satisfy the requirement that the plan state the aggregate number of shares which may be issued under options. However, the maximum number of shares which may be issued under the plan may be stated in terms of a percentage of either the authorized, issued or outstanding shares at the date of the adoption of the plan. The provisions relating to the aggregate number of shares to be issued under the plan and the employees (or class of employees) eligible to receive options under the plan, are the only provisions of a stock option plan which require stockholder approval for purposes of section 423(b)(1).

(4) Any increase in the aggregate number of shares which may be issued under the plan (other than an increase merely reflecting a change in capitalization such as a stock dividend or stock split-up) will be treated as the adoption of a new plan requiring approval of the stockholders within 12 months of such adoption. Similarly, a change in the designation of corporations whose employees may be offered options under the plan will be treated as the adoption of a new plan requiring stockholder approval unless the plan provides that designations of participating corporations may be made from time to time from among a group consisting of the grantor corporation and its parent or subsidiary corporations. The group from among which such changes and designations are permitted without additional stockholder approval may include corporations having become parents or subsidiaries of the grantor after the adoption and approval of the plan. Any other changes in the terms of an employee stock purchase plan may be made without such changes being considered the adoption of a new plan.

(5) A plan which otherwise meets the requirements of section 423(b) and this section may be used as an employee stock purchase plan although the adoption and approval of such plan occurred before January 1, 1964.

(d) Options granted to certain shareholders. (1) An employee stock purchase plan must by its terms provide that no employee can be granted an option if such employee, immediately after the option is granted, owns stock possessing 5 percent or more of the total combined voting power or value of all classes of stock of the employer corporation or its parent or subsidiary corporation. In determining whether the stock ownership of an employee equals or exceeds this 5 percent limit, the rules of section 425(d) (relating to attribution of stock ownership) shall apply, and stock which the employee may purchase under outstanding options (whether or not such options qualify for the special tax treatment afforded by section 421(a)) shall be treated as stock owned by the employee. An option is outstanding for purposes of section 423(b)(3) although under its terms it may be exercised only in installments or after the expiration of a fixed period of time. If an option is granted to an individual whose stock ownership (as determined under this paragraph for purposes of section 423(b)(3)) exceeds the limitation of section 423(b)(3), no portion of such option will be

treated as having been granted under an employee stock purchase plan.

(2) The determination of the percentage of the total combined voting power or value of all classes of stock of his employer corporation (or a related corporation of such corporation) that is owned by the individual is made by comparing the voting power or value of the shares owned (or treated as owned) by the individual to the aggregate voting power or value of all shares actually issued and outstanding immediately after the grant of the option to such individual. The aggregate voting power or value of all shares actually issued and outstanding immediately after the grant of the option does not include the voting power or value of treasury shares or shares authorized for issue under outstanding options held by the individual or any other person.

(3) The application of this paragraph may be illustrated by the following examples:

Example (1). E, an employee of M Corporation, owns 6,000 shares of the common stock of M Corporation, the only class of M stock outstanding. M has 100,000 shares of its common stock outstanding. Since E owns 6 percent of the combined voting power or value of all classes of M Corporation stock, M cannot grant an option to E under M's employee stock purchase plan. If E's father and brother each owned 3,000 shares of M stock and E owned no M stock in his own name, the result in this case would be the same, since under section 425(d) a person is treated as owning stock held by his father and his brother. Similarly, the result would be the same if, instead of actually owning 6,000 shares, E merely held an option on 6,000 shares of M stock, irrespective of whether the transfer of stock under such option could qualify for the special tax treatment of section 421, since section 423(b)(3) provides that stock which the employee may purchase under outstanding options shall be treated as stock owned by such employee.

Example (2). Assume the same facts as in example (1) and assume further that M is a subsidiary corporation of P Corporation. Irrespective of whether E owns any P stock, E cannot receive an option from P under P's employee stock purchase plan since he owns 5 percent of the total combined voting power of all classes of stock of a subsidiary of P Corporation, *i.e.*, M Corporation. Thus, an individual who owns (or is treated as owning) stock in excess of the limitation of section 423(b)(3), in any corporation in a group of corporations, consisting of a parent and its subsidiary corporations, cannot receive an option under an employee stock purchase plan from any corporation in the group.

Example (3). F is an employee of R Corporation. R has only one class of stock, of which 100,000 shares are issued and outstanding. Assuming F owns no stock in R or in any parent or subsidiary of R for purposes of section 423(b)(3), R can grant an option to F under its employee stock purchase plan for 4,999 shares, since immediately after the grant of the option, F would not own 5 percent or more of the combined voting power or value of all classes of R stock actually issued and outstanding at such time. The 4,999 shares which F would be treated as owning under section 423(b)(3) would not be added to the 100,000 shares actually issued and outstanding immediately after the grant for purposes of determining whether F's stock ownership exceeds the limitation of section 423(b)(3).

Example (4). Assume the same facts as in example (3) and assume further that on June 1, 1965, R grants F an option, purportedly under its employee stock purchase plan, for 5,000 shares. No portion of this option will be treated as granted under an employee stock purchase plan.

(e) **Employees covered by plan.** (1) Subject to the limitations of section 423(b)(3), (5) and (8), an employee stock purchase plan must, by its terms, provide that options are to be granted to all employees of any corporation which grants options to any of its employees by reason of their employment by such corporation except that one or more of the following categories of employees may be excluded from the coverage of the plan:

(i) Employees who have been employed less than 2 years;

(ii) Employees whose customary employment is 20 hours or less per week;

(iii) Employees whose customary employment is for not more than 5 months in any calendar year;

(iv) Officers;

(v) Persons whose principal duties consist of supervising the work of other employees; and

(vi) Highly compensated employees.

No option granted under a plan or offering which excludes from participation any employees, other than those who may be excluded under section 423(b)(4) and this paragraph, and those barred from participation by reason of section 423(b)(3), (5), and (8) and paragraphs (d), (f) and (i) of this section, can be regarded as having been granted under an employee stock purchase plan. If an option is not granted to any employee who is entitled to the grant of an option under the terms of the plan or offering, none of the options granted under such offering will be treated as having been granted under an employee stock purchase plan. Furthermore, no option will be considered as having been granted under an employee stock purchase plan if the option was granted in connection with an offering made after September 28, 1979 with respect to which employees, otherwise eligible, are denied participation to any extent because of their continuing participation or eligibility for participation in a prior plan or offering (including a prior plan or offering of a related corporation). However, a plan which, by its terms, permits all eligible employees to elect to participate in an offering will not violate the requirements of this paragraph solely because eligible employees who elect not to participate in the offering are not granted options pursuant to such offering.

(2) For purposes of section 423(b)(3) the existence of the employment relationship between an individual and the corporation participating under the plan will be determined under paragraph (h) of § 1.421–7 (relating to employment relationship).

(3) The application of this paragraph may be illustrated by the following examples:

Example (1). M Corporation has a stock purchase plan which meets all the requirements of section 423(b) except that by its terms, options are not required to be granted to employees whose weekly rate of pay is less than $100. As a matter of corporate practice, M grants options under its plan to all employees, irrespective of their weekly rate of pay. M's plan is not an employee stock purchase plan.

Example (2). Assume the same facts as in example (1) and assume further that the first offering under M's plan provides by its terms that options will be granted to all employees of M Corporation. With respect to options exercised under such offering the terms of such offering will be treated as part of the terms of M's plan. Accordingly, stock transferred pursuant to options exercised under such offering will be treated as stock transferred pursuant to the exercise of options granted under an employee stock purchase plan for purposes of section 421.

(f) **Equal rights and privileges.** (1) An employee stock purchase plan must, by its terms, provide that all employees granted options under such plan shall have the same rights and privileges; however, a plan will not fail to satisfy this requirement merely because the amount of stock which may be purchased by any employee under such plan is determined on the basis of a uniform relationship to the total compensation, or the basic or regular rate of compensation of employees, or because the plan provides that no employee may purchase more than a maximum amount of stock fixed under the plan. Thus, the provisions applying to one option under an offering (such as the provisions relating to the method of payment for the stock and the determination of the purchase price per share) must apply to all other options under such offering in the same manner. If all the options granted under a plan or offering do not, by their terms, give the respective optionees the same rights and privileges, none of such options shall be treated as having been granted under an employee stock purchase plan for purposes of section 421.

(2) The requirements of section 423(b)(5) and this paragraph do not prevent the maximum amount of stock which an employee may purchase from being determined on the basis of a uniform relationship to the total compensation, or the basic or regular rate of compensation, of all employees. For example, if an employee stock purchase plan provides that the maximum amount of stock which each employee may purchase under the offering is one share for each $100 of annual gross pay, options granted under such offering will be treated as meeting the requirement of section 423(b)(5). However, such a provision must not exclude employees from participation under the plan or offering. For example, a plan which provides for the grant of options based on one share for each $100 of annual gross pay in excess of $10,000 will not meet the requirements of section 423(b)(5).

(3)(i) Except as provided in paragraph (f)(3)(ii) of this section, a plan permitting one or more employees to apply sums which were withheld under an earlier plan or offering towards the purchase of additional stock under the current plan or offering will be a violation of equal rights and privileges unless all employees in the current plan or offering are permitted to make payments in an amount not less than that which any employee is allowed to carry over, to be applied to the purchase of shares under the current plan or offering.

(ii) A plan will not fail to satisfy the requirements of this section merely because one or more employees are permitted to apply sums, in an amount representing a fractional share, which were withheld under an earlier plan or offering toward the purchase of additional stock under the current plan or offering.

(4)(i) Section 423(b)(5) does not prohibit the delaying of the grant of an option to any employee who is barred from being granted an option solely by reason of such employee's failing to meet a minimum service requirement until such employee meets such requirement.

(ii) The provision of this paragraph (4) may be illustrated by the following example:

Example. N Corporation has an employee stock purchase plan which provides that options to purchase stock in an amount equal to ten percent of an employee's annual salary at a price equal to 85 percent of the fair market value at the time the option is granted will be granted to all employees other than those who have been employed less than 18 months. In addition, the plan provides that employees who have not yet met the minimum service requirements on the date the options are initially granted will be granted similar options on the date such employment has been attained. Such plan meets the requirements of section 423(b)(5).

(g) **Option price.** (1) An employee stock purchase plan must, by its terms, provide that the option price will not be less than the lesser of—

(i) An amount equal to 85 percent of the fair market value of the stock at the time such option is granted, or

(ii) An amount which under the terms of the option may not be less than 85 percent of the fair

market value of the stock at the time such option is exercised.

For definition of the term "option price", and general rules relating to such term, see paragraph (e) of § 1.421–7. For rules relating to the determination of when an option is granted, see paragraph (c) of § 1.421–7. Any option which does not meet the minimum pricing requirements of section 423(b)(6) and this paragraph will not be treated as granted under an employee stock purchase plan irrespective of whether the plan itself or the offering satisfies such requirements. If such an option is granted to an employee who is entitled to the grant of an option under the terms of the plan or offering, and such employee is not granted an option under such offering which qualifies as an option granted under an employee stock purchase plan, such offering will not meet the requirements of section 423(b)(4). Accordingly, none of the options granted under such offering will be eligible for the special tax treatment of section 423(b)(4).

(2) The option price may be stated either as a percentage or as a dollar amount. If the option price is stated as a dollar amount, the requirement of section 423(b)(6) and this paragraph can only be met by a plan or offering in which the price is fixed at not less than 85 percent of the fair market value of the stock at the time the option is granted. If the fixed price is less than 85 percent of the fair market value of the stock at grant, the option cannot meet the requirement of section 423(b)(6) even if a decline in the fair market value of the stock results in such fixed price being not less than 85 percent of the fair market value of the stock at the time the option is exercised, since such a result was not certain to occur under the terms of the option.

(3) The application of this paragraph may be illustrated by the following examples:

Example (1). M Corporation has an employee stock purchase plan which provides that the option price will be 85 percent of the fair market value of the stock at grant, or 85 percent of the stock at exercise, whichever amount is the lesser. Upon the exercise of an option issued under M's plan, M agrees to accept an amount which is less than the minimum amount allowable under the terms of such plan. Notwithstanding that the option was issued under an employee stock purchase plan, the transfer of stock pursuant to the exercise of such option does not satisfy the requirement of section 423(b)(6) and cannot qualify for the special tax treatment of section 421.

Example (2). Assume the same facts as in example (1) and assume further that at the time of grant, the fair market value of M Corporation stock is $100 per share and that the option price is set at 85 percent of the fair market value of M stock at exercise, but not less than $80 per share. The option satisfies the requirement of section 422(b)(6), and can qualify for the special tax treatment of section 421.

Example (3). Assume the same facts as in example (2), except assume that the option price is set at 85 percent of the fair market value of M stock at exercise, but not more than $80 per share. This option cannot satisfy the requirement of section 423(b)(6) irrespective of whether, at the time the option is exercised, 85 percent of the fair market value of M stock is $80 or less.

(h) **Option period.** An employee stock purchase plan must, by its terms, provide that options granted under such plan cannot be exercised after the expiration of 27 months from the date of grant unless, under the terms of such plan, the option price is to be not less than 85 percent of the fair market value of the stock at the time of the exercise of the option. If the option price is to be not less than 85 percent of the fair market value of the stock at the time the option is exercised, then the option period provided under the plan must not exceed 5 years from the date of grant. If the requirement of section 423(b)(7) is not met by the terms of the plan or offering, options issued under such plan or offering will not be treated as options granted under an employee stock purchase plan irrespective of whether such options, by their terms, are exercisable beyond the period allowable under section 423(b)(7) and this paragraph. An option which provides that the option price is to be not less than 85 percent of the fair market value of the stock at exercise may have an option period of 5 years irrespective of whether the fair market value of the stock at exercise is more or less than the fair market value of such stock at grant. However, if the option provides that the option price is to be 85 percent of the fair market value of the stock at exercise, but not more than some other fixed amount, then irrespective of the price paid on exercise, the option period must not be more than 27 months.

(i) **Restriction on amount of optioned stock.** (1) Under section 423(b)(8), an employee stock purchase plan must, by its terms, provide that no employee may be permitted to purchase stock under all the employee stock purchase plans of his employer corporation and its related corporations at a rate which exceeds $25,000 in fair market value of such stock (determined at the time the option is granted) for each calendar year in which any such option granted to such individual is outstanding at any time. In applying the limitation of section 423(b)(8)—

(i) The right to purchase stock under an option is deemed to accrue when the option (or any portion thereof) first becomes exercisable during the calendar year;

(ii) The right to purchase stock under an option accrues at the rate provided in the option, but in

no case may such rate exceed $25,000 of fair market value of such stock (determined at the time such option is granted) for any one calendar year; and

(iii) A right to purchase stock which has accrued under one option granted pursuant to the plan may not be carried over to any other option.

If an option is granted under an employee stock purchase plan which satisfies the requirement of section 423(b)(8), but such option gives the optionee the right to buy stock in excess of the maximum rate allowable under such section and this paragraph, no portion of such option will be treated as having been granted under an employee stock purchase plan. Furthermore, if the option was granted to an employee entitled to the grant of an option under the terms of the plan or offering, and such employee is not granted an option under such offering which qualifies as an option granted under an employee stock purchase plan, such offering will not meet the requirements of section 423(b)(4). Accordingly, none of the options granted under such offering will be eligible for the special tax treatment of section 421.

(2) The limitation of section 423(b)(8) and this paragraph applies only to options granted under employee stock purchase plans and does not limit the amount of stock which an employee may purchase under qualified stock options (as defined in section 422(b)), restricted stock options (as defined in section 424(b)), or any other stock options (except those to which section 423 applies). Stock purchased under options to which section 423 does not apply will not limit the amount which an employee may purchase under an employee stock purchase plan, except for purposes of the 5-percent stock ownership provision of section 423(b)(3).

(3) Under the limitation of section 423(b)(8), an individual may purchase up to $25,000 of stock (based on the fair market value of such stock at the time the option was granted) in each calendar year during which an option granted to such individual under an employee stock purchase plan is outstanding. Alternatively, an individual may purchase more than $25,000 of stock (based on the fair market value of such stock at the time the option was granted) in a calendar year, so long as the total amount of stock which he purchases does not exceed $25,000 in fair market value of such stock (determined at the time the option was granted) for each calendar year in which the option was outstanding. If in any calendar year the individual holds two or more outstanding options granted under employee stock purchase plans of his employer corporation, or a related corporation of such corporation, his purchases of stock attributable to such year under all such options must not exceed $25,000 in fair market value of such stock (determined at the time such options were granted). Under an employee stock purchase plan, an individual may not purchase stock in anticipation that the option will be outstanding for some future year. Thus, the individual may purchase only the amount of stock which does not exceed the limitation of section 423(b)(8) for the year of the purchase and for preceding years during which the option was outstanding. Thus, the amount of stock which may be purchased under an option depends on the number of years in which the option is actually outstanding. The amount of stock which may be purchased under an employee stock purchase plan may not be increased by reason of the failure to grant an option in an earlier year under such plan, or by reason of the failure to exercise an earlier option. For example, if an option is granted to an individual and expires without having been exercised at all, the failure to exercise the option does not increase the amount of stock which such individual may be permitted to purchase under an option granted in a year following the year of such expiration. If an option granted under an employee stock purchase plan is outstanding in more than one calendar year, stock purchased pursuant to the exercise of such an option will be applied first, to the extent allowable under section 423(b)(8) and this paragraph, against the $25,000 limitation for the earliest year in which such option was outstanding, then, against the $25,000 limitation for each succeeding year, in order. For example, if an individual purchases $60,000 in fair market value of stock (determined at the time the option was granted) by the exercise of an option granted under an employee stock purchase plan of his employer corporation, and if such option was outstanding in 3 calendar years, then $25,000 in fair market value of such stock (determined at the time the option was granted) will be attributed to the first calendar year in which such option was outstanding, another $25,000 in fair market value of such stock will be attributed to the second calendar year in which such option was outstanding, and the remaining $10,000 in fair market value of such stock will be attributed to the last calendar year in which such option was outstanding. Thus, the individual may receive a right under another option granted under such employee stock purchase plan (or under an employee stock purchase plan of a parent or subsidiary corporation of his employer corporation) entitling him to purchase

another $15,000 in fair market value of such stock (determined as of the date such option is granted) for such last calendar year.

(4) The application of section 423(b)(8) and this paragraph may be illustrated by the following examples:

Example (1). Assume that P Corporation maintains an employee stock purchase plan and that E is employed by P. On June 1, 1964, P grants E an option under the plan to purchase a total of 750 shares of P stock at $85 per share. On such date, the fair market value of P stock is $100 per share. The option provides that it cannot be exercised after May 31, 1966. Under section 423(b)(8), the option must not permit E to purchase more than 250 shares of P stock during the calendar year 1964, since 250 shares are equal to $25,000 in fair market value of P stock determined at the time of grant. During the calendar year 1965, E may purchase under such option an amount of P stock equal to the difference between $50,000 in fair market value of P stock (determined at the time the option was granted) and the fair market value of P stock (determined at the time of grant of the option) purchased during 1964. During the calendar year 1966, E may purchase an amount of P stock equal to the difference between $75,000 in fair market value of such stock (determined at the time of grant of the option) and the total amount of the fair market value of such stock (determined at the time of grant of the option) purchased under such option during the calendar years 1964 and 1965. E may purchase $25,000 of stock for the year 1964 and $25,000 of stock for the year 1966, although the option was outstanding for only a part of each of such years. However, E may not be granted another option under an employee stock purchase plan of P or a related corporation to purchase stock of any of such corporations during the calendar years 1964, 1965, and 1966, so long as the option granted June 1, 1964, is outstanding. If this option permitted E to purchase only $15,000 of P's stock for each year it is outstanding, then E could be granted another option by P, or by a related corporation, in 1964, permitting him to purchase an additional $10,000 of stock for each year it is outstanding.

Example (2). Assume the same facts as in example (1), and assume further that the option granted to E in 1964 is terminated in 1965 without any part of such option having been exercised, and that subsequent to such termination and during 1965, E is granted another option under P's employee stock purchase plan. Under such option, E may be permitted to purchase $25,000 of stock for 1965. On the other hand, if, in 1966, E exercised the option granted to him in 1964 and purchased 600 shares of P stock, 500 shares, the maximum amount of stock which could have been purchased in 1965 under the option, is treated as having been purchased for the years 1964 and 1965. Thus, only 100 shares of the stock are treated as having been purchased for 1966, and E may be permitted under the new option to purchase for 1966 stock having a fair market value of $15,000 at the time the new option is granted.

(j) Restriction on transferability. An employee stock purchase plan must, by its terms, provide that options granted under such plan are not transferable by the optionee otherwise than by will or the laws of descent and distribution, and must be exercisable, during his lifetime, only by him. For general rules relating to the restriction on transferability required by section 423(b)(9), see paragraph (b)(2) of § 1.421–7. For a limited exception to the requirement of section 423(b)(9), see section 425(h)(3).

(k) Special rule where option price is between 85 percent and 100 percent of value of stock. (1)(i) If all the conditions necessary for the application of section 421(a) exist, section 423(c) provides additional rules which are applicable in cases where, at the time the option is granted, the option price per share is less than 100 percent (but not less than 85 percent) of the fair market value of such share. In such case, upon the disposition of such share by the individual after the expiration of the 2-year and the 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) holding periods, or upon his death while owning such share (whether occurring before or after the expiration of such periods), there shall be included in the individual's gross income as compensation (and not as gain upon the sale or exchange of a capital asset) the lesser of—

(a) The amount, if any, by which the price paid under the option was exceeded by the fair market value of the share at the time the option was granted, or

(b) The amount, if any, by which the price paid under the option was exceeded by the fair market value of the share at the time of such disposition or death.

For purposes of applying the rules of section 423(c) and this paragraph, if the option price is not fixed or determinable at the time the option is granted, the option price will be computed as if the option had been exercised at such time. The amount of compensation resulting from the application of section 423(c) and this paragraph shall be included in the individual's gross income for the taxable year in which the disposition occurs, or for the taxable year closing with his death, whichever event results in the application of section 423(c).

(ii) The application of the special rules provided in section 423(c) shall not affect the rules provided in section 421(a) with respect to the individual exercising the option, the employer corporation, or its parent or subsidiary corporation. Thus, notwithstanding the inclusion of an amount as compensation in the gross income of an individual, as provided in section 423(c), no income results to the individual at the time the stock is transferred to him, and no deduction under section 162 is allowable at any time to the employer corporation or its parent or subsidiary with respect to such amount.

(iii) If, during his lifetime, the individual exercises an option granted under an employee stock purchase plan, but such individual dies before the stock is transferred to him pursuant to his exercise of the option, the transfer of such stock to the individual's executor, administrator, heir, or legatee is deemed, for the purpose of sections 421 and 423, to be a transfer of the stock to the individual exercising the option and a further transfer by reason of death from such individual to his executor, administrator, heir, or legatee.

(2) If the special rules provided in section 423(c) are applicable to the disposition of a share of stock by an individual, the basis of such share in the individual's hands at the time of such disposition, determined under section 1011, shall be increased by an amount equal to the amount includible as compensation in his gross income under section 423(c). However, the basis of a share of stock acquired after the death of an employee by the exercise of an option granted to such employee under an employee stock purchase plan shall be determined in accordance with the rules of section 421(c) and paragraph (c) of § 1.421–8. If the special rules provided in section 423(c) are applicable to a share of stock upon the death of an individual, the basis of such share in the hands of the estate or the person receiving the stock by bequest or inheritance shall be determined under section 1014, and shall not be increased by reason of the inclusion upon the decedent's death of any amount in his gross income under section 423(c). See example (9) of this paragraph with respect to the determination of basis of the share in the hands of a surviving joint owner.

(3) The application of this paragraph may be illustrated by the following examples:

Example (1). On June 1, 1964, the X Corporation grants to E, an employee, an option under X's employee stock purchase plan to purchase a share of X Corporation's stock for $85. The fair market value of the X Corporation stock on such date is $100 per share. On June 1, 1965, E exercises the option and on that date the X Corporation transfers the share of stock to E. On January 1, 1967, E sells the share for $150, its fair market value on that date. E makes his income tax return on the basis of the calendar year. The income tax consequences to E and X Corporations are as follows: (i) compensation in the amount of $15 is includible in E's gross income for 1967, the year of the disposition of the share. The $15 represents the difference between the option price ($85) and the fair market value of the share on the date the option was granted ($100), since such value is less than the fair market value of the share on the date of disposition ($150). For the purpose of computing E's gain or loss on the sale of the share, E's cost basis of $85 is increased by $15, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $100. Since the share was sold for $150, E realizes a gain of $50, which is treated as long-term capital gain; (ii) the X Corporation is entitled to no deduction under section 162 at any time with respect to the share transferred to E.

Example (2). Assume the same facts as in example (1), except assume that E sells the share of X Corporation stock on January 1, 1968, for $75, its fair market value on that date. Since $75 is less than the option price ($85), no amount in respect of the sale is includable as compensation in E's gross income for 1968. E's basis for determining gain or loss on the sale is $85. Since E sold the share for $75, E realized a loss of $10 on the sale, which loss is treated as a long-term capital loss.

Example (3). Assume the same facts as in example (1), except assume that the option provides that the option price shall be 90 percent of the fair market value of the stock on the day the option is exercised. On June 1, 1965, when the option is exercised, the fair market value of the stock is $120 per share so that E pays $108 for the share of the stock. Compensation in the amount of $10 is includible in E's gross income for 1967, the year of the disposition of the share. This is determined in the following manner: The excess of the fair market value of the stock at the time of the disposition ($150) over the price paid for the share ($108) is $42; and the excess of the fair market value of the stock at the time the option was granted ($100) over the option price, computed as if the option had been exercised at such time ($90), is $10. Accordingly, $10, the lesser, is includible in gross income. In this situation, E's cost basis of $108 is increased by $10, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $118. Since the share was sold for $150, E realizes a gain of $32, which is treated as long-term capital gain.

Example (4). Assume the same facts as in example (1), except assume that instead of selling the share on January 1, 1967, E makes a gift of the share on that day. In such case $15 is includible as compensation in E's gross income for 1967. E's cost basis of $85 is increased by $15, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $100, which becomes the donee's basis, as of the time of the gift, for determining gain or loss.

Example (5). Assume the same facts as in example (2) except assume that instead of selling the share on January 1, 1968, E makes a gift of the share on that date. Since the fair market value of the share on that day ($75) is less than the option price ($85), no amount in respect of the disposition by way of gift is includible as compensation in E's gross income for 1968. E's basis for the share is $85, which becomes the donee's basis, as of the time of the gift, for the purpose of determining gain. The donee's basis for the purpose of determining loss, determined under section 1015(a), is $75 (fair market value of the share at the date of gift).

Example (6). Assume the same facts as in example (1), except assume that after acquiring the share of stock on June 1, 1965, E dies on August 1, 1966, at which time the share has a fair market value of $150. Compensation in the amount of $15 is includible in E's gross income for the taxable year closing with his death, such $15 being the difference between the option price ($85) and the fair market value of the share when the option was granted ($100), since such value is less than the fair market value at date of death ($150). The basis of the share in the hands of E's estate is determined under section 1014 without regard to the $15 includible in the decedent's gross income.

Example (7). Assume the same facts as in example (6), except assume that E dies on August 1, 1965, at which time the share has a fair market value of $150. Although E's death occurred within six months after the transfer of the share to him, the income tax consequences are the same as in example (6).

Example (8). Assume the same facts as in example (1), except assume that the share of stock was issued in the names of E and his wife jointly with right of survivorship, and that E and his wife sold the share on June 15, 1966, for $150, its fair market value on that date. Compensation in the amount of $15 is includible in E's gross income for 1966, the year of the disposition of the share. The basis of the share in the hands of E and his wife for the purpose of determining gain or loss on the sale is $100, that is, the cost of $85 increased by the amount of $15 includible as compensation in E's gross income. The gain of $50 on the sale is treated as long-term capital gain, and is divided equally between E and his wife.

Example (9). Assume the same facts as in example (1), except assume that the share of stock was issued in the names of E and his wife jointly with right of survivorship, and that E predeceased his wife on August 1, 1966, at which time the share had a fair market value of $150. Compensation in the amount of $15 is includible in E's gross income for the taxable year closing with his death. See example (6). The basis of the share in the hands of E's wife as survivor is determined under section 1014 without regard to the $15 includible in the decedent's gross income.

Example (10). Assume the same facts as in example (9), except assume that E's wife predeceased him on July 1, 1966. Section 423(c) does not apply in respect of her death. Upon the subsequent death of E on August 1, 1966, the income tax consequences in respect of E's taxable year closing with the date of his death, and in respect of the basis of the share in the hands of his estate, are the same as in example (6). If E had sold the share on July 15, 1966 (after the death of his wife), for $150, its fair market value at that time, the income tax consequences would be the same as in example (1).

[T.D. 6887, 31 FR 8799, June 24, 1966, as amended by T.D. 7645, 44 FR 55836, Sept. 28, 1979; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.424–1 Applicability of section 421(a).

(a) In general. (1) Subject to the provisions of section 424(c), the special rules of income tax treatment provided in section 421(a) apply with respect to the transfer of a share of stock to an individual pursuant to his exercise after 1949 of a restricted stock option provided that—

(i) The individual makes no disposition of such share within 2 years from the date of the granting of the option, nor within 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) after the transfer of such share to him; and

(ii) At the time he exercised such option—

(a) The individual is an employee of either the corporation granting the option, a related corporation of such corporation, or a corporation or a related corporation of such corporation issuing or assuming a stock option in a transaction to which section 425(a) applies, or

(b) The individual ceased to be an employee of such corporations within the 3-month period preceding the time of such exercise.

(2) For general rules relating to the employment relationship, see paragraph (h) of § 1.421–7. For rules relating to the employment relationship when there has been a transaction described in section 425(a) (relating to corporate reorganizations, liquidations, etc.) see § 1.425–1. For rules relating to the effect of a disqualifying disposition, see section 421(b) and paragraph (b) of § 1.421–8. For definition of the term "disposition", see section 425(c) and paragraph (c) of § 1.425–1.

(b) Examples. The application of this section may be illustrated by the following examples:

Example (1). On June 1, 1958, X Corporation grants a restricted stock option to A, an employee of X Corporation, to purchase a share of X stock. A continues to be employed by X Corporation until February 1, 1964, when X sells the plant where A is employed to M Corporation, an unrelated corporation. On such date, A becomes employed by M. A continues to be employed by M Corporation until June 1, 1964, when A exercises his option on X Corporation. Section 421 is not applicable to this exercise, because on June 1, 1964, A was not employed by the corporation which granted the option or by a related corporation of such corporation, nor was he employed by any of such corporations within three months before June 1, 1964.

Example (2). Assume the facts to be the same as in example (1), except that when A was employed by M Corporation, the option to purchase X stock was terminated, and was replaced by an option to buy M stock in such circumstances that M Corporation is treated as a corporation issuing an option under section 425(a). If A exercises the option to purchase the share of M stock on June 1, 1964, section 421 is applicable, for A is then employed by a corporation which issued an option under section 425(a).

Example (3). Assume that P Corporation owns all of the stock of S Corporation and grants a restricted stock option to E, an employee of S Corporation. If E exercises the option, section 421 is applicable since E is employed by a corporation which is a subsidiary of the corporation which granted the restricted stock option.

[T.D. 6887, 31 FR 8803, June 24, 1966, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.424–2 Restricted stock option.

(a) Restricted stock option defined. (1) A "restricted stock option" is an option granted after February 26, 1945, and before January 1, 1964 (or, if it meets the requirements of section 424(c)(3), an option granted after December 31, 1963), to an individual, for any reason connected with his employment by a corporation, if granted by the employer corporation or a related corporation, to purchase stock of any such corporations, but, except in the case of options described in subparagraph (2) of this paragraph, only if—

(i) At the time such option is granted the option price is at least 85 percent of the fair market value at such time of the stock subject to the option;

(ii) Such option by its terms is not transferable by such individual otherwise than by will or by the laws of descent and distribution, and is exercisable, during his lifetime, only by him;

(iii) Such individual, at the time the option is granted, does not own stock possessing more than 10 percent of the total combined voting power of all classes of stock either of the employer corporation or of its parent or subsidiary corporation; and

(iv) In the case of options granted after June 21, 1954, such option by its terms is not exercisable after the expiration of ten years from the date on which such option was granted.

For purposes of applying the rule of subdivision (i) of this subparagraph to a variable price option (as defined by section 424(c)(2) and paragraph (c) of this section) under which the option price is determined by a formula described in paragraph (c) of this section, the option price shall, notwithstanding any provision of the option, be computed as if such option is exercised on the day when it is granted. For example, if on June 15, 1959, an option is granted providing that the option price shall be $10 under the average fair market value of the stock during the month in which the option is exercised or the average fair market value of the stock during the preceding month, whichever is lower, and if on June 15, 1959, the value of the stock subject to the option is $100 a share, to determine if the option meets the requirement of subdivision (i) of this subparagraph, it is necessary to determine the average fair market value of the stock during the months of May and June 1959. If such lower average fair market value is $95 or more, the option meets the requirement of subdivision (i) of this subparagraph.

(2) Regardless of the extent to which the individual to whom the option is granted owns stock of either the employer corporation, or of a related corporation, an option is a restricted stock option if—

(i) Such option is granted after February 26, 1945, to such individual, for any reason connected with his employment by a corporation, if granted by the employer corporation or a related corporation, to purchase stock of any of such corporations;

(ii) At the time such option is granted the option price is at least 110 percent of the fair market value at such time of the stock subject to the option;

(iii) Such option by its terms is not transferable by such individual otherwise than by will or by the laws of descent and distribution, and is exercisable, during his lifetime, only by him; and

(iv) Such option by its terms is not exercisable after the expiration of 5 years from the date on which such option was granted or is exercised within 1 year after August 16, 1954.

(3) In determining the amount of stock owned by an individual for the purpose of applying the 10 percent test of section 424(b)(3), the rules of section 425(d) (relating to attribution of stock ownership) shall apply. See § 1.425–1.

(4) For general rules relating to the employment relationship, see paragraph (h) of § 1.421–7. For general rules relating to the restriction on transferability required by section 424(b)(2) and this paragraph, see paragraph (b)(2) of § 1.421–7. For modification of certain options so as to conform to the requirement of section 424(b)(2), see section 425(h)(3).

(b) Special rule where option price is between 85 percent and 95 percent of value of stock. (1)(i) If all the conditions necessary for the application of section 421(a) exist, section 424(c)(1) provides additional rules which are applicable in cases where, at the time the restricted stock option is granted, the option price per share is less than 95 percent (but not less than 85 percent) of the fair market value of such share. In such case, upon the disposition of such share by the individual after the expiration of the 2-year and the 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) holding periods, or upon his death while owning such share (whether occurring before or after the expiration of such periods), there shall be included in the individual's gross income as compensation (and not as gain upon the sale or exchange of a capital asset) an amount determined in the following manner. If, at the time the option was granted, the option price was fixed or determinable, and was at least 85 percent of the fair market value of the stock subject to such option, such amount shall be the amount, if any, by which the option price is exceeded by the lesser of the fair market value of the share at the time the option was granted or the fair market value of the share at the time of such disposition or death. However, in the case of a variable price option (as defined by section 424(c)(2) and paragraph (c) of this section) under which the option price (computed as if the option had been exercised when granted) at the time the option was granted was at least 85 percent of the fair market value of the stock subject to

such option, such amount shall be whichever of the following amounts is the lesser:

(a) The excess of the fair market value of the share at the time of such disposition or death over the price paid under the option, or

(b) The excess of the fair market value of the share at the time the option was granted over the option price, computed as if the option had been exercised at such time.

The amount of such compensation shall be included in the individual's gross income for the taxable year in which the disposition occurs or for the taxable year closing with his death, whichever event results in the application of section 424(c)(1) and this paragraph.

(ii) The application of the special rules provided in section 424(c) shall not affect the rules provided in section 421(a) with respect to the individual exercising the option, the employer corporation, or a related corporation. Thus, notwithstanding the inclusion of an amount as compensation in the gross income of an individual, as provided in section 424(c)(1), no income results to the individual at the time the stock is transferred to him, and no deduction under section 162 is allowable at any time to the employer corporation or a related corporation with respect to such amount.

(iii) If the individual exercises a restricted stock option during his lifetime and dies before the stock is transferred to him pursuant to his exercise of the option, the transfer of such stock to the individual's executor, administrator, heir, or legatee is deemed, for the purpose of section 421, to be a transfer of the stock to the individual exercising the option and a further transfer by reason of death from such individual to his executor, administrator, heir, or legatee.

(2) If the special rules provided in section 424(c) are applicable to the disposition of a share of stock by an individual, the basis of such share in the individual's hands at the time of such disposition, determined under section 1011, shall be increased by an amount equal to the amount includible as compensation in his gross income under section 424(c)(1). However, in the case of a share of stock acquired by the exercise of a restricted stock option after the death of the employee to whom the option was granted, the basis of such share shall be determined in accordance with the rules of section 421(c) and paragraph (c) of § 1.421–8. If the special rules provided in section 424(c)(1) are applicable to a share of stock upon the death of an individual, the basis of such share in the hands of the estate or the person receiving the stock by bequest or inheritance shall be determined under section 1014, and shall not be increased by reason of the inclusion upon the decedent's death of any amount in his gross income under section 424(c)(1). See example (9) of this paragraph with respect to the determination of basis of the share in the hands of a surviving joint owner.

(3) The application of this paragraph may be illustrated by the following examples:

Example (1). On June 1, 1959, the X Corporation grants to E, an employee, a restricted stock option to purchase a share of X Corporation's stock for $85. The fair market value of the X Corporation stock on such date is $100 per share. On June 1, 1965, E exercises the option and on that date the X Corporation transfers the share of stock to E. On January 1, 1967, E sells the share for $150, its fair market value on that date. E makes his income tax return on the basis of the calendar year. The income tax consequences to E and X Corporation are as follows: (i) Compensation in the amount of $15 is includible in E's gross income for 1967, the year of the disposition of the share. The $15 represents the difference between the option price ($85) and the fair market value of the share on the date the option was granted ($100), since such value is less than the fair market value of the share on the date of disposition ($150). For the purpose of computing E's gain or loss on the sale of the share, E's cost basis of $85 is increased by $15, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $100. Since the share was sold for $150, E realizes a gain of $50, which is treated as long-term capital gain; (ii) the X Corporation is entitled to no deduction under section 162 at any time with respect to the share transferred to E.

Example (2). Assume the same facts as in example (1), except assume that E sells the share of X Corporation stock on January 1, 1968, for $75, its fair market value on that date. Since $75 is less than the option price ($85), no amount in respect of the sale is includible as compensation in E's gross income for 1968. E's basis for determining gain or loss on the sale is $85. Since E sold the share for $75, E realized a loss of $10 on the sale, which loss is treated as a long-term capital loss.

Example (3). Assume the same facts as in example (1), except assume that the option provides that the option price shall be 90 percent of the fair market value of the stock on the day the option is exercised. On June 1, 1965, when the option is exercised, the fair market value of the stock is $120 per share so that E pays $108 for the share of stock. Compensation in the amount of $10 is includible in E's gross income for 1967, the year of the disposition of the share. This is determined in the following manner. The excess of the fair market value of the stock at the time of the disposition ($150) over the price paid for the share ($108) is $42; and the excess of the fair market value of the stock at the time the option was granted ($100) over the option price, computed as if the option had been exercised at such time ($90), is $10. Accordingly, $10, the lesser, is includible in gross income. In this situation, E's cost basis of $108 is increased by $10, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $118. Since the share was sold for $150, E realizes a gain of $32, which is treated as long-term capital gain.

Example (4). Assume the same facts as in example (1), except assume that instead of selling the share on January 1, 1967, E makes a gift of the share on that day. In such case, $15 is includible as compensation in E's gross income for 1967.

E's cost basis of $85 is increased by $15, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $100, which becomes the donee's basis, as of the time of the gift, for determining gain or loss.

Example (5). Assume the same facts as in example (2) except assume that instead of selling the share on January 1, 1968, E makes a gift of the share on that date. Since the fair market value of the share on that day ($75) is less than the option price ($85), no amount in respect of the disposition by way of gift is includible as compensation in E's gross income for 1968. E's basis for the share is $85, which becomes the donee's basis, as of the time of the gift, for the purpose of determining gain. The donee's basis for the purpose of determining loss, determined under section 1015(a), is $75 (fair market value of the share at the date of gift).

Example (6). Assume the same facts as in example (1), except assume that after acquiring the share of stock on June 1, 1965, E dies on August 1, 1966, at which time the share has a fair market value of $150. Compensation in the amount of $15 is includible in E's gross income for the taxable year closing with his death, such $15 being the difference between the option price ($85) and the fair market value of the share when the option was granted ($100), since such value is less than the fair market value at date of death ($150). The basis of the share in the hands of E's estate is determined under section 1014 without regard to the $15 includible in the decedent's gross income.

Example (7). Assume the same facts as in example (6), except assume that E dies on August 1, 1965, at which time the share has a fair market value of $150. Although E's death occurred within six months after the transfer of the share to him, the income tax consequences are the same as in example (6).

Example (8). Assume the same facts as in example (1), except assume that the share of stock was issued in the names of E and his wife jointly with right of survivorship, and that E and his wife sold the share on June 15, 1966, for $150, its fair market value on that date. Compensation in the amount of $15 is includible in E's gross income for 1966, the year of the disposition of the share. The basis of the share in the hands of E and his wife for the purpose of determining gain or loss on the sale is $100, that is, the cost of $85 increased by the amount of $15 includible as compensation in E's gross income. The gain of $50 on the sale is treated as long-term capital gain, and is divided equally between E and his wife.

Example (9). Assume the same facts as in example (1), except assume that the share of stock was issued in the names of E and his wife jointly with right of survivorship, and that E predeceased his wife on August 1, 1966, at which time the share had a fair market value of $150. Compensation in the amount of $15 is includible in E's gross income for the taxable year closing with his death. See example (6). The basis of the share in the hands of E's wife as survivor is determined under section 1014 without regard to the $15 includible in the decedent's gross income.

Example (10). Assume the same facts as in example (9), except assume that E's wife predeceased him on July 1, 1966. Section 424(c) does not apply in respect of her death. Upon the subsequent death of E on August 1, 1966, the income tax consequences in respect of E's taxable year closing with the date of his death, and in respect of the basis of the share in the hands of his estate, are the same as in example (6). If E had sold the share on July 15, 1966 (after the death of his wife), for $150, its fair market value at that time, the income tax consequences would be the same as in example (1).

(c) Variable price option defined. (1) For purposes of section 424 and this section, the term "variable price option" means an option under which the option price is determined by a formula in which the only variable is the fair market value of the stock at any time during a period of six consecutive months which includes the day on which such option is exercised. Except as provided in subparagraph (2) of this paragraph, such formula may provide for determining such price by reference to such value on any particular day in such 6-month period, or by reference to an average value of the stock over either the whole of such 6-month period or over any shorter period included in such 6-month period. Such 6-month period may begin with, end with, or in any other manner span the day on which such option is exercised. Such formula may also depend upon factors other than such value of the stock, but such other factors must not be variable and must be fixed in the option when granted. For example, such formula may provide that the option price shall be 85 percent of the value of the stock on the day the option is exercised, but such price shall not be less than $85, nor more than $110. Another example of a formula which meets the requirements of this paragraph is a provision that the option price shall be 95 percent of the fair market value of the stock on the day the option is exercised but not more than $95. However, the requirements of this paragraph are not met by a formula which provides that if the profits of the employer for the year do not exceed $100,000, the option price shall be $15 under the fair market value of the stock the option is exercised, but if such profits exceed $100,000, the option price shall be $20 under such value of the stock. For an example of how to determine whether an option which contains a formula meeting the requirements of this paragraph also meets the requirement that the option price must be at least 85 percent of the fair market value of the stock at the time the option is granted, see paragraph (a)(1) of § 1.424–2.

(2) In the case of an option granted after September 30, 1958, the term "variable price option" does not include any option in which the formula provides for determining the option price by reference to the fair market value of the stock at any time before the option is exercised if such value may be greater than the average fair market value of the stock during the calendar month in which the option is exercised. Whether an option meets the requirement of this paragraph shall be determined solely by reference to the terms of the option, and the circumstances existing at the time the option is granted or exercised are immaterial.

Thus, an option, granted after September 30, 1958, and containing a pricing formula which takes into consideration the value of the stock at any time before the option is exercised, is subject to the new limitation and does not meet the requirement of this paragraph, even though the option price is not actually based upon such prior fair market value either at the time the option is exercised or at the time the option price is computed as if it were exercised for the purpose of applying the 85 percent test of section 424(b)(1). For example, a formula which provides that the option price is to be 45 percent of the fair market value of the stock 30 days before the date on which the option is exercised, but not more than $85, will not qualify under this paragraph since under this formula the price may be determinable by reference to a higher prior value. On the other hand, a formula which provides that the option price is to be 90 percent of the average value of the stock during the month the option is exercised or the average value of the stock during the preceding month, whichever is lower, will qualify. In the case of an option granted after September 30, 1958, the only way that a formula which provides for determining the option price by reference to the fair market value of the stock at a time before the option is exercised can come within the requirement of this paragraph is to provide that the option price is to be determined by reference to such fair market value only if such fair market value is not greater than the average fair market value of the stock during the month in which the option is exercised. If under the terms of an option the price is to be determined by reference to the fair market value of the stock at a time before the option is exercised, whether such value is higher or lower than the average fair market value of the stock during the month the option is exercised, such option will not be considered a restricted stock option since the option price may be based upon the prior value of the stock when such value exceeds the average fair market value of the stock during the month the option is exercised. However, if an option provides for determining the option price by reference to a prior fair market value of the stock only when such value is lower than such average value of the stock, such option can qualify as a restricted stock option. The average fair market value of the stock during the month in which the option is exercised means such value during the calendar month the option is exercised and not merely during a 30- or 31-day period including the time the option is exercised. To compute the average fair market value of the stock for the month, it will be necessary to ascertain the fair market value of the stock for each day during the month, including those days which are not business days. In ascertaining the fair market value of the stock for each day, the generally accepted principles for ascertaining such value will be applied.

(d) Certain options granted after December 31, 1963. (1) In general, the term "restricted stock option" means only a stock option which is granted after February 26, 1945, and before January 1, 1964, and which meets the requirements of section 424(b) and paragraph (a) of this section. However, section 424(c)(3) provides that if an option is granted after December 31, 1963, and such option meets the requirements of section 424(b) and this section, the option will be treated as a restricted stock option, provided such option is granted pursuant to—

(i) A binding written contract entered into before January 1, 1964, or

(ii) A written plan adopted and approved before January 1, 1964, which (as of January 1, 1964, and as of the date of the granting of the option)—

(a) Met the requirements of section 423(b)(4) and (5) and paragraphs (e) and (f) of § 1.423–2 (relating to employees covered by the plan, and equal rights and privileges, respectively), or

(b) Was being administered in a way which did not discriminate in favor of officers, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees. In determining whether an option is granted pursuant to a plan described in subdivision (ii) of this subparagraph, the terms of any written offering that was made on or before January 1, 1964, will be treated as a part of the terms of the plan.

(2) For purposes of section 424(c)(3)(A) and this paragraph, a binding written contract means only a written contract under which the employee has an enforceable right to compel the grant or modification (as defined by section 425(h) and paragraph (e) of § 1.425–1) of a restricted stock option, or to obtain damages upon the breach of such contract. A contract which provides that the individual's right to a restricted stock option is contingent upon the happening of an event (including the passage of time) may satisfy the requirements of section 424(c)(3)(A). However, if the event itself, or the determination of whether the event has occurred, rests with the board of directors or any other individual or group (other than an arbitrator), the contract will not be treated as giving the employee an enforceable right for purposes of section 424(c)(3)(A) or this paragraph.

(3)(i) For purposes of applying section 424(c)(3)(B) with respect to options granted after December 31, 1963, and before October 1, 1967, the adoption and approval of a plan required by such section and this paragraph will be deemed to have occurred if the plan was adopted and approved on or before December 31, 1963, in the manner required by the applicable law of the State of incorporation. Thus, an option granted within such period pursuant to a restricted stock option plan which was not approved by the stockholders of the grantor corporation, but which was adopted by an authorized executive committee and approved by the board of directors of the grantor corporation before January 1, 1964, will meet the requirements of section 424(c)(3)(B) relating to adoption and approval, provided that the granting of options pursuant to such a plan is not contrary to the applicable State law. However, with respect to options granted on or after October 1, 1967, the approval required by section 424(c)(3)(B) must comply with all applicable provisions of the corporate charter and bylaws and the law of the State of incorporation and must represent the express consent of stockholders holding at least a majority of the voting stock of the corporation voting in person or by proxy at a duly held stockholders' meeting. The plan as adopted and approved must designate the aggregate number of shares which may be issued under the plan, and the corporations or class of corporations whose employees may be offered options under such plan. A plan which merely provides that the number of shares which may be issued under options shall not exceed a stated percentage of the shares outstanding at the time of each offering or grant under the plan will not satisfy the requirement that the plan state the aggregate number of shares which may be issued under options. However, the maximum number of shares which may be issued under the plan may be stated in terms of a percentage of either the authorized, issued or outstanding shares at the date of the adoption of the plan. Any increase in the aggregate number of shares which may be issued under the plan (other than an increase merely reflecting a change in capitalization such as a stock dividend or stock split-up) will be treated as the adoption of a new plan requiring stockholder approval. Similarly, a change in the designation of corporations whose employees may be offered options under the plan will be treated as the adoption of a new plan requiring stockholder approval unless the plan provides that designations of participating corporations may be made from time to time from among a group consisting of the grantor corporation and its parent or subsidiary corporations. The group from among which such changes and designations are permitted without additional stockholder approval may include corporations having become parents or subsidiaries of the grantor after the adoption and approval of the plan. Any other changes in the terms of a restricted stock option plan may be made without such changes being considered the adoption of a new plan.

(ii) A plan may qualify under section 424(c)(3)(B)(ii) and paragraph (1)(ii)(b) of this paragraph even though coverage thereunder is limited to employees who have either reached a designated age or have been employed for a designated number of years, or who are employed in certain designated departments or are in other classifications, provided that the effect of coverage of such employees does not discriminate in favor of officers, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees. Furthermore, a plan (which is not otherwise discriminatory) will not be considered discriminatory merely because options are granted only to fulltime employees (rather than employees working 20 hours per week or more), or because employees with less than 6 months employment per taxable year are omitted (rather than employees whose annual employment is for not more than 5 months per taxable year).

(4) An option issued or assumed in a transaction to which section 425(a) applies is treated as a continuation of the option previously held by such individual. Accordingly, if the option previously held by the individual was a restricted stock option (whether or not such restricted stock option was granted before, on, or after December 31, 1963), the option received in the transaction to which section 425(a) applies will be treated as a restricted stock option irrespective of whether such option meets the requirements of section 424(c)(3).

(5) An option granted after December 31, 1963, that is treated as a restricted stock option under section 424(c)(3) and this paragraph must be exercised before May 21, 1981, in order for section 421(a) to apply to the transfer of stock pursuant to such exercise. If such an option is exercised after May 20, 1981, section 421(a) will not apply to the transfer of stock pursuant to such exercise, and section 83 will apply to such transfer as if the option were a nonqualified stock option without a readily ascertainable fair market value at the time of its grant. See § 1.83–7(a) for rules relating to the treatment of nonqualified stock options under section 83.

[T.D. 6887, 31 FR 8804, June 24, 1966, as amended by T.D. 7680, 45 FR 13454, Feb. 29, 1980; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.425–1 Definitions and special rules applicable to statutory options.

(a) *Corporate reorganizations, liquidations, etc.* (1)(i) The term "issuing or assuming a stock option in a transaction to which section 425(a) applies" means, for purposes of sections 421 through 425, a substitution of a new option for an old option, or an assumption of such old option, by an employer corporation, or a related corporation of such corporation, by reason of a corporate transaction (as defined by subdivision (ii) of this subparagraph), if—

(*a*) The excess of the aggregate fair market value of the shares subject to the option immediately after the substitution or assumption over the aggregate option price of such shares is not more than the excess of the aggregate fair market value of all shares subject to the option immediately before such substitution or assumption over the aggregate option price of such shares, and

(*b*) The new option or the assumption of the old option does not give the employee additional benefits which he did not have under the old option.

(ii) For purposes of this section, the term "corporate transaction" means any merger of a corporation into another corporation, any consolidation of two or more corporations into another corporation, any purchase or acquisition of property or stock by any corporation, any separation of a corporation (including a spin-off or other distribution of stock or property by a corporation), any reorganization of a corporation (whether or not such reorganization comes within the definition of such term in section 368), or any partial or complete liquidation by a corporation, if such action by such corporation results in a significant number of employees being transferred to a new employer or discharged, or in the creation or severance of a parent-subsidiary relationship.

(2)(i) A change in the terms of an option attributable to the issuance or assumption of an option by reason of a corporate transaction (as defined under section 425(a) and subparagraph (1)(ii) of this paragraph) is not a modification of such option. See section 425(h)(3) and paragraph (e) of this section. Thus, section 425(a), in effect, provides rules under which a new employer, or a parent or subsidiary of a new employer, may by reason of a corporate transaction assume a statutory option granted by the former employer or parent or subsidiary thereof, or issue a new statutory option in place of the option granted by the former employer or parent or subsidiary thereof, without having such assumption or substitution being considered as a modification of the option. For example, section 425(a) may apply where there is a merger of X Corporation into Y Corporation and Y Corporation wishes to employ the employees of X Corporation and to assume statutory options which had been granted to them by their former employer, X Corporation. Another example is where X Corporation forms a new subsidiary, Y Corporation, and transfers to it certain assets and employees, and where Y Corporation wishes to grant to such employees a statutory option to purchase its stock in place of the statutory option which they had to purchase stock of X Corporation.

(ii) Section 425(a) also provides rules under which a new parent or subsidiary corporation of the employer corporation may by reason of a corporate transaction assume a statutory option granted by the employer or parent or subsidiary thereof, or issue a new statutory option in place of the option granted by the employer or parent or subsidiary thereof, without having such assumption or substitution considered a modification of the option. Section 425(a) may apply, for example, where X Corporation acquires a new subsidiary, Y Corporation, by purchase of stock and desires to grant to the employees of Y Corporation a statutory option to buy stock of X Corporation in place of a statutory option which they have to purchase the stock of Y Corporation.

(iii) Section 425(a) applies only when the assumption or substitution occurs by reason of a corporate transaction as defined in this paragraph. Thus, section 425(a) may apply where as a result of a corporate transaction a statutory option can no longer be exercised, or if exercised, section 421 would not apply (see the first example in subdivision (i) of this subparagraph). Moreover, section 425(a) may apply in any case where the reason for the assumption or substitution grows out of a corporate transaction even though there could have been a valid exercise under section 421 of the original option (see the second example in subdivision (i) of this subparagraph and the example in subdivision (ii) of this subparagraph). However, a corporation which has issued an option may not substitute a new option for such option under section 425(a). See, however, paragraph (e) of this section.

(3) For section 425(a) to apply, it is not necessary to show that the corporation assuming or substituting the option is under any obligation to do so. In fact, section 425(a) may apply where the option which is being assumed or replaced

expressly provides that it will terminate upon the occurrence of certain corporate transactions. However, section 425(a) cannot be applied to revive a statutory option which, for reasons not related to the corporate transaction, expires before it can properly be assumed or replaced under section 425(a). For section 425(a) to apply, the assumed or substituted option must qualify as a statutory option.

(4)(i) Section 425(a) does not apply if the terms of the assumed or substituted option confer on the employee more favorable benefits than he had under the old option. Section 425(a) can apply to a corporate transaction only if, on a share by share comparison, the ratio of the option price to the fair market value of the stock subject to the option immediately after the substitution or assumption is no more favorable to the optionee than the ratio of the option price to the fair market value of the stock subject to the old option immediately before such substitution or assumption. The number of shares subject to an option issued or assumed may be adjusted to compensate for any change in the aggregate spread between the aggregate option price and the aggregate fair market value of the stock subject to the option immediately after the substitution or assumption as compared to the aggregate spread between the option price and the aggregate fair market value of the stock subject to the option immediately before such substitution or assumption. Such an adjustment will not prevent section 425(a) from applying to such substitution or assumption.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example (1). On June 1, 1965, P Corporation acquires 100 percent of the stock of S Corporation and on such date S becomes a subsidiary of P Corporation. Also on such date, P Corporation substitutes a qualified stock option to purchase P stock for a qualified stock option to purchase S stock held by E, an employee of S. Assume that E's S option had 3 years to run on the date of the substitution. If the P option granted to E in substitution for his S option runs for more than 3 years from the date of the substitution, section 425(a) cannot apply, since the effect of such an option would be to give E an additional benefit which he did not enjoy under his S option.

Example (2). E is an employee of S Corporation. E holds a qualified stock option which was granted to him by S to purchase 60 shares of S stock at $12 per share. On June 1, 1967, S Corporation is merged into P Corporation, and on such date P substitutes a qualified stock option to purchase P stock for E's qualified stock option to purchase S stock. Immediately before the substitution, the fair market value of S stock was $32 per share; immediately after the substitution, the fair market value of P stock is $24 per share. The new option entitles E to buy P stock at $9 per share. Since on a share by share comparison the ratio of the new option price ($9 per share) to the fair market value of P stock immediately after the substitution ($24 per share) is not more favorable to E than the ratio of the old option price ($12 per share) to the fair market value of S stock immediately before the substitution ($32 per share) ($9/24=12/32$) the requirement of subparagraph (4)(i) of this paragraph is met. The number of shares subject to E's option to purchase P stock is set at 80. Since the excess of the aggregate fair market value over the aggregate option price of the stock subject to E's new option to purchase P stock, $1,200 (80×$24 minus 80×$9), is not greater than the excess of the aggregate fair market value over the aggregate option price of the stock subject to E's old option to purchase S stock, $1,200 (60×$32 minus 60×$12), the requirement of subparagraph (1)(i)(a) of this paragraph is met. Thus, section 425(a) may apply to the substitution.

Example (3). Assume the same facts as in example (2), except assume that the fair market value of S stock immediately before the substitution was $8 per share and that the option price was $10 per share, and that the fair market value of P stock immediately after the substitution is $12 per share. P sets the new option price at $15 per share. Since on a share by share comparison the ratio of the new option price ($15 per share) to the fair market value of P stock immediately after the substitution ($12 per share) is not more favorable to E than the ratio of the old option price ($10 per share) to the fair market value of S stock immediately before the substitution ($8 per share) (15/12=10/8), the requirement of subparagraph (4)(i) of this paragraph is met. Assume further that the number of shares subject to E's P option is set at 20 as compared to 60 shares under E's old option to buy S stock. Immediately after the substitution, 2 shares of P stock are worth $24, which is what 3 shares of S stock were worth immediately before the substitution (2×$12=3×$8). Thus, to completely replace E's S option, E should have received an option to purchase 40 shares of P stock, *i.e.*, 2 shares of P for each 3 shares of S which E could have purchased under his old option (2/3=40/60). Since E's new option covers 20 shares of P stock, it is clear that P has replaced only ½ of E's stock option. The portion of E's stock option which was not replaced by P is an outstanding stock option to purchase stock of a predecessor corporation of P Corporation for purposes of section 422(b)(5) and (c)(2).

(5) For the purpose of applying section 425(a), the assumption or substitution shall be considered to occur at the time that the optionee would, except for section 425(a), be considered to have been granted the option which the employer corporation, or parent or subsidiary thereof, is issuing or assuming. An assumption or substitution which occurs by reason of a corporate transaction may occur before or after the corporate transaction.

(6) In order to have a substitution of an option under section 425(a) the optionee must, in connection with the corporate transaction, lose his rights under the old option. There cannot be a substitution of a new option for an old option within the meaning of section 425(a) if it is contemplated that the optionee may exercise both the old option and the new option. It is not necessary, however, to have a complete substitution of a new option for the old option. However, if the old option was a qualified or restricted stock option, any portion of such option which is not substituted or assumed in a transaction to which section 425(a) applies will

be treated as an outstanding option to purchase stock of a predecessor corporation of the new employer or grantor corporation. See section 422(b)(5) and (c)(2) and paragraph (f) of § 1.422–2. For example, assume that X Corporation forms a new corporation, Y Corporation, by a transfer of certain assets and distributes the stock of Y Corporation to the shareholders of X Corporation. Assume further that E, an employee of X Corporation, is thereafter an employee of both X Corporation and Y Corporation. Y Corporation wishes to substitute an option to purchase some of its stock for the statutory option which E has, entitling him to purchase 100 shares of the stock of X Corporation. The option to purchase the stock of X Corporation, at $50 a share, was granted when the stock had a fair market value of $50 a share, and the stock was worth $100 a share just before the distribution of the new corporation's stock to the shareholders of X Corporation. The stock of X Corporation and of Y Corporation is worth $50 a share just after such distribution, which also is the time of the substitution. On these facts an option to purchase 200 shares of stock of Y Corporation at $25 a share could be given to the employee in complete substitution for the old option. It would also be permissible to give the employee an option to purchase 100 shares of stock of Y Corporation at $25 a share in substitution for his right to purchase 50 of the shares covered by the old option. However, if the option to purchase X stock was a qualified or restricted stock option, then to the extent the old option is not assumed or a new option issued in substitution therefor in a transaction to which section 425(a) applies, such old option will be treated as an outstanding option under section 422(c)(2) for purposes of section 422(b)(5). See paragraph (f) of § 1.422–2.

(7) Any reasonable methods may be used to determine the fair market value of the stock subject to the option immediately before the assumption or substitution and the fair market value of the stock subject to the option immediately after the assumption or substitution. Such methods include the valuation methods described in § 20.2031–2 of this chapter (the Estate Tax Regulations). In the case of stock listed on a stock exchange, the fair market value may be based on the last sale before and the first sale after the assumption or substitution if such sales clearly reflect the fair market value of the stock, or may be based upon an average selling price during a longer period, such as the day or week before, and the day or week after, the assumption or substitution. If the stocks are not listed, or if they are newly issued, it will be reasonable to base the determination on experience over even longer periods. In the case of a merger, consolidation, or other reorganization which is arrived at by arm's-length negotiations, the fair market value of the stocks subject to the option before and after the assumption or substitution may be based upon the values assigned to the stock for purposes of the reorganization. For example, if in the case of a merger the parties treat each share of the merged company as being equal in value to a share of the surviving company, it will be reasonable to assume that the stocks are of equal value so that the substituted option may permit the employee to purchase at the same price one share of the surviving company for each share he could have purchased of the merged company.

(8) For the purpose of applying section 425(a) and this paragraph, the determination of whether the parent-subsidiary relationship exists shall be based upon circumstances existing immediately after the corporate transaction.

(b) Acquisition of new stock. (1) Section 425(b) provides that the rules provided by sections 421 through 425 which are applicable with respect to stock transferred to an individual upon his exercise of an option, shall likewise be applicable with respect to stock acquired by a distribution or an exchange to which section 305, 354, 355, 356, or 1036 (or so much of section 1031 as relates to section 1036) applies. Stock so acquired shall, for purposes of sections 421 through 425, be considered as having been transferred to the individual upon his exercise of the option. A similar rule shall be applied in the case of a series of such acquisitions. With respect to such acquisitions, section 425(b) does not make inapplicable any of the provisions of section 305, 354, 355, 356, or 1036 (or so much of section 1031 as relates to section 1036).

(2) The application of this paragraph may be illustrated by the following example:

Example. If, with respect to stock transferred pursuant to the timely exercise of a statutory option, there is a distribution of new stock to which section 305(a) is applicable, and if there is a disposition of such new stock before the expiration of the applicable holding period required with respect to the stock originally acquired pursuant to the exercise of such option, such disposition makes section 421 inapplicable to the transfer of the original stock pursuant to the exercise of the option to the extent that the disposition effects a reduction of the individual's total interest in the old and new stock. However, if the new stock, as well as the old stock, is not disposed of before the expiration of the holding period required with respect to the original stock acquired pursuant to the exercise of the option, the special tax treatment provided by section 421 is applicable

to both the original shares and the shares acquired by virtue of the distribution to which section 305(a) applies.

(c) Disposition of stock. (1) For purposes of sections 421 through 425, the term "disposition" includes a sale, exchange, gift, or any transfer of legal title, but does not include—

(i) A transfer from a decedent to his estate or a transfer by bequest or inheritance; or

(ii) An exchange to which is applicable section 354, 355, 356, or 1036 (or so much of section 1031 as relates to section 1036); or

(iii) A mere pledge or hypothecation. However, a disposition of the stock pursuant to a pledge or hypothecation is a disposition by the individual, even though the making of the pledge or hypothecation is not such a disposition.

(2) A share of stock acquired by an individual pursuant to the exercise of a statutory option is not considered disposed of by the individual if such share is taken in the name of the individual and another person jointly with right of survivorship, or is subsequently transferred into such joint ownership, or is retransferred from such joint ownership to the sole ownership of the individual. However, any termination of such joint ownership (other than a termination effected by the death of a joint owner) is a disposition of such share, except to the extent the individual reacquires ownership of the share. For example, if such individual and his joint owner transfer such share to another person, the individual has made a disposition of such share. Likewise, if a share of stock held in the joint names of such individual and another person is transferred to the name of such other person, there is a disposition of such share by the individual. If an individual exercises a statutory option and a share of stock is transferred to another or is transferred to such individual in his name as trustee for another, the individual has made a disposition of such share. However, a termination of joint ownership resulting from the death of one of the owners is not a disposition of such share. For determination of basis in the hands of the survivor where joint ownership is terminated by the death of one of the owners, see section 1014.

(3) The application of this paragraph may be illustrated by the following examples:

Example (1). On June 1, 1964, the X Corporation grants to E, an employee, a qualified stock option to purchase 100 shares of X Corporation stock at $100 per share, the fair market value of X Corporation stock on that date. On June 1, 1965, while employed by X Corporation, E exercises the option in full and pays X Corporation $10,000, and on that day X Corporation transfers to E 100 shares of its stock having a fair market value of $12,000. Before June 1, 1968, E makes no disposition of the 100 shares so purchased. E realizes no income on June 1, 1965, with respect to the transfer to him of the 100 shares of X Corporation stock. X Corporation is not entitled to any deduction at any time with respect to its transfer to E of the stock. E's basis for such 100 shares is $10,000.

Example (2). Assume the same facts as in example (1), except assume that on August 1, 1968, three years and two months after the transfer of the shares to him, E sells the 100 shares of X Corporation stock for $13,000 which is the fair market value of the stock on that date. For the taxable year in which the sale occurs, E realizes a gain of $3,000 ($13,000 minus E's basis of $10,000), which is treated as long-term capital gain.

Example (3). Assume the same facts as in example (2), except assume that on August 1, 1968, E makes a gift of the 100 shares of Y Corporation stock to his son. Such disposition results in no realization of gain to E either for the taxable year in which the option is exercised or the taxable year in which the gift is made. E's basis of $10,000 becomes the donee's basis for determining gain or loss.

Example (4). Assume the same facts as in example (1), except assume that on May 1, 1968, two years and 11 months after the transfer of the shares to him, E sells the 100 shares of X Corporation stock for $13,000. The special rules of section 421(a) are not applicable to the transfer of the stock by X Corporation to E, because disposition of the stock was made by E within three years from the date the shares were transferred to him.

Example (5). Assume the same facts as in example (1), except assume that E dies on September 1, 1965, owning the 100 shares of X Corporation stock acquired by him pursuant to his exercise on June 1, 1965, of the qualified stock option. On the date of death, the fair market value of the stock is $12,500. No income is realized by E by reason of the transfer of the 100 shares to his estate. If the stock is valued as of the date of E's death for estate tax purposes, the basis of the 100 shares in the hands of the executor is $12,500.

Example (6). Assume the same facts as in example (1), except assume that on June 1, 1965, when the option is exercised by E the 100 shares are transferred by X to E and his wife W, as joint owners with right of survivorship, and that E dies on July 1, 1965. Neither the transfer into joint ownership nor the termination of such joint ownership by E's death is a disposition. Because E has made no disqualifying disposition of the shares, section 421(a) is applicable and E realizes no income at death with respect to the shares even though he held the stock less than 3 years after the transfer of the shares to him pursuant to his exercise of a qualified stock option. See paragraph (b)(2) of § 1.421–8.

(d) Attribution of stock ownership. Section 425(d) provides that in determining the amount of stock owned by an individual for purposes of applying the percentage limitations of section 422(b)(7), 423(b)(3), and 424(b)(3), stock of the employer corporation or of a related corporation which is owned (directly or indirectly) by or for such individual's brothers and sisters (whether by the whole or half blood), spouse, ancestors, and lineal descendants, shall be considered as owned by such individual. Also, for such purpose, if a domestic or foreign corporation, partnership, estate, or trust owns (directly or indirectly) stock of

the employer corporation or of its parent or subsidiary, such stock shall be considered as being owned proportionately by or for the shareholders, partners, or beneficiaries of the corporation, partnership, estate, or trust.

(e) **Modification, extension, or renewal of option.** (1) Section 425(h) provides the rules for determining whether a share of stock transferred to an individual upon his exercise of an option, after the terms thereof have been modified, extended, or renewed, is transferred pursuant to the exercise of a statutory option. Such rules and the rules of this section are applicable to modifications, extensions, or renewals (or to changes which are not treated as modifications) of an option in any taxable year of the optionee which begins after December 31, 1963, except that section 425(h)(1) and this paragraph shall not apply to any change made before January 1, 1965, in the terms of an option granted after December 31, 1963, to permit such option to meet the requirements of section 422(b)(3), (4), or (5), and the regulations thereunder. See paragraphs (d), (e), and (f), of § 1.422–2, relating to period for exercising options, option price, and prior outstanding options, respectively, in the case of qualified stock options.

(2) Any modification, extension, or renewal of the terms of an option to purchase stock shall be considered as the granting of a new option.

(3) Except as otherwise provided in subparagraph (4) of this paragraph, in case of a modification, extension, or renewal of an option, the highest of the following values shall be considered to be the fair market value of the stock at the time of the granting of such option for purposes of applying the rules of sections 423(b)(6), and 424(b)(1)—

(i) The fair market value on the date of the original granting of the option,

(ii) The fair market value on the date of the making of such modification, extension, or renewal, or

(iii) The fair market value at the time of the making of any intervening modification, extension, or renewal.

(4)(i) In the case of a modification, extension, or renewal of a restricted stock option before January 1, 1964 (or after December 31, 1963, if made pursuant to a binding written contract entered into before January 1, 1964), the rules of subparagraph (3) of this paragraph do not apply if the aggregate of the monthly average fair market values of the stock subject to the option for the 12 consecutive calendar months preceding the month in which the modification, extension, or renewal occurs, divided by 12, is an amount less than 80 percent of the fair market value of such stock on the date of the original granting of the option or the date of the making of any intervening modification, extension, or renewal, whichever is the highest. In such case, any modification, extension, or renewal of the option is treated as the granting of a new option but only the fair market value of the stock subject to the option at the time of the modification, extension, or renewal is considered in determining whether the option is a restricted stock option. In the case of stocks listed on a stock exchange, the average fair market value of the stock for any month may be determined by adding the highest and lowest quoted selling prices during such month and dividing the sum by two. The method used for determining the average fair market value of the stock for any month must be used for all twelve months, except where it is shown that such method cannot be used for any month or does not clearly reflect the average fair market value of the stock for any such month.

(ii) The application of subdivision (i) of this subparagraph may be illustrated by the following example:

Example. On June 1, 1962, a restricted stock option was granted to purchase before July 1, 1965, a share of stock for $85. The fair market value of such stock on June 1, 1962, was $100. On June 15, 1963, when the fair market value of the stock is $60, such option is extended so that it is exercisable at any time before July 1, 1966, at $55 a share. The average fair market value of the stock subject to the option for each of the 12 calendar months preceding June 1963, is as follows:

1962	
June	$100
July	90
August	80
September	70
October	80
November	80
December	90
1963	
January	90
February	80
March	70
April	60
May	60

The aggregate of such values is $950. When this sum is divided by 12, the result is $79.17, which is an amount less than 80 percent of the fair market value of the stock ($100) when the option was granted. Accordingly, when the option is extended on June 15, 1963, the option price could have been reduced as low as $51 (85 percent of the fair market value of the stock on such day) without disqualifying the option as a restricted stock option. If the aggregate fair market values of the stock so ascertained had amounted to $960 or more, the rules of subparagraph (3) of this paragraph would have been

applicable with the result that any reduction in the option price would have disqualified the option as a restricted stock option.

(5)(i) The time or date when an option is modified, extended, or renewed shall be determined, insofar as applicable, in accordance with the rules governing determination of the time or date of granting an option provided in paragraph (c) of § 1.421–7. For purposes of sections 421 through 425, the term "modification" means any change in the terms of the option which gives the optionee additional benefits under the option. For example, a change in the terms of the option, which shortens the period during which the option is exercisable, is not a modification. However, a change which provides more favorable terms for the payment for the stock purchased under the option, is a modification. Where an option is amended solely to increase the number of shares subject to the option, such increase shall not be considered as a modification of the option, but shall be treated as the grant of a new option for the additional shares.

(ii)(a) A change in the number or price of the shares of stock subject to an option merely to reflect a stock dividend, or stock split-up, is not a modification of the option.

(b) A change in the number or price of the shares of stock subject to an option to reflect a corporate transaction (as defined by paragraph (a)(1)(ii) of this section) is not a modification of the option provided that the excess of the aggregate fair market value (determined immediately after such corporate transaction) of the shares subject to the option immediately after such change over the aggregate new option price of such shares is not more than the excess of the aggregate fair market value of the shares subject to the option immediately before the transaction over the aggregate former option price of such shares, and provided that the option after such change does not give the employee additional benefits which he did not have before such change. The ratio of the option price immediately after the change to the fair market value of the stock subject to the option immediately after the corporate transaction must not be more favorable to the optionee on a share by share comparison than the ratio of the old option price to the fair market value of the stock subject to the option immediately before such a transaction. A reduction in the option price of an option, other than as specifically provided for in this section, is a modification of such option.

(c) The application of (b) of this subdivision may be illustrated by the following example:

Example. E, an employee of P Corporation, holds a qualified stock option granted to him by P to buy 90 shares of P stock at $36 per share. P Corporation is a party to a corporate transaction (as defined by paragraph (a)(1)(ii) of this section) which results in a decline in the fair market value of P stock. Immediately before such transaction the fair market value of P stock was $64 per share. Immediately after such transaction, the fair market value of P stock is $48 per share. Two weeks after such transaction, P proposes to amend E's option in order to reflect the decline in the fair market value of P stock attributable to the transaction. At such time, the fair market value of P stock is $50 per share. However, since the change was not made at the time of the transaction, the fair market value of P stock at the time of the change is irrelevant for purposes of determining whether the change comes under the rule of (b) of this subdivision. P changes the terms of E's option to lower the option price to $27 per share and to increase the number of shares subject to the option to 120. No other terms of the option are changed. The aggregate fair market value (determined immediately after the corporate transaction) of the shares subject to the option immediately after the change is $5,760 ($48 × 120). The aggregate option price of the shares subject to the option immediately after the change is $3,240 ($27 × 120). Thus, the excess of such fair market value over such option price is $2,520 ($5,760-$3,240). The aggregate fair market value of the stock subject to the option immediately before the corporate transaction is $5,760 ($64 × 90). The aggregate option price for the stock subject to the option immediately before the change is $3,240 ($36 × 90). Thus, the excess of such fair market value over such option price is $2,520 ($5,760-$3,240). Accordingly, the excess after the change does not exceed the excess before the corporate transaction. Moreover, the ratio of the option price immediately after the change ($27 per share) to the fair market value of P stock immediately after the transaction ($48 per share) is not more favorable to E on a share by share comparison than the ratio of the old option price ($36 per share) to the fair market value of P stock immediately before the transaction ($64) ($\frac{27}{48} = \frac{36}{64}$). For purposes of section 425(h), the changes made do not confer additional benefits on E which he did not have before the change. Accordingly, the changes do not constitute a modification of E's option.

(iii) Any change in the terms of an option for the purpose of qualifying the option as a statutory option grants additional benefits and, therefore, is a modification. However, if the terms of an option are changed to provide that the optionee cannot transfer the option except by will or by the laws of descent and distribution in order to meet the requirements of section 422(b)(6), 423(b)(9), or 424(b)(2), such change is not a modification, provided that in any case where the purpose of the change is to meet the requirements of section 424(b)(2) the option is at the same time changed so that it is not exercisable after the expiration of ten years from the date the option was granted. Where an option is not immediately exercisable in full, a change in the terms of such option to accelerate the time at which the option (or any portion thereof) may be exercised is not a modification for purposes of section 425(h) and this section. A modification results where an option is

revised to insert the language required by section 422(c)(6)(B).

(iv) An extension of an option refers to the granting by the corporation to the optionee of an additional period of time within which to exercise the option beyond the time originally prescribed. A renewal of an option is the granting by the corporation of the same rights or privileges contained in the original option on the same terms and conditions. The rules of this paragraph apply as well to successive modifications, extensions, and renewals.

(6) A statutory option may, as a result of a modification, extension, or renewal, thereafter cease to be a statutory option, or any option may, by modification, extension, or renewal, thereafter become a statutory option. Moreover, a qualified option after a modification may not be exercisable in accordance with its terms because of the requirements of section 422(b)(5) and section 422(c)(6). See paragraph (f)(3)(i) of § 1.422–2 and examples (8) and (9) of paragraph (f)(4) of § 1.422–2.

(7) The application of this paragraph may be illustrated by the following examples:

Example (1). On June 1, 1964, the X Corporation grants to an employee an option under X's employee stock purchase plan to purchase 100 shares of the stock of X Corporation at $90 per share, such option to be exercised on or before June 1, 1966. At the time the option is granted, the fair market value of the X Corporation stock is $100 per share. On February 1, 1965, before the employee exercises the option, X Corporation modifies the option to provide that the price at which the employee may purchase the stock shall be $80 per share. On February 1, 1965, the fair market value of the X Corporation stock is $90 per share. Under section 425(h), the X Corporation is deemed to have granted an option to the employee on February 1, 1965. Such option shall be treated as an option to purchase at $80 per share 100 shares of stock having a fair market value of $100 per share, that is, the higher of the fair market value of the stock on June 1, 1964, or on February 1, 1965. The exercise of such option by the employee after February 1, 1965, is not the exercise of a statutory option.

Example (2). On June 1, 1964, the X Corporation grants to an employee an option under X's employee stock purchase plan to purchase 100 shares of X Corporation stock at $90 per share, exercisable after December 31, 1965, and on or before June 1, 1966. On June 1, 1964, the fair market value of X Corporation's stock is $100 per share. On February 1, 1965, X Corporation modifies the option to provide that the option shall be exercisable on or before September 1, 1966. On February 1, 1965, the fair market value of X Corporation stock is $110 per share. Under section 425(h), X Corporation is deemed to have granted an option to the employee on February 1, 1965, to purchase at $90 per share 100 shares of stock having a fair market value of $110 per share, that is, the higher of the fair market value of the stock on June 1, 1964, or on February 1, 1965. The exercise of such option by the employee is not the exercise of a statutory option.

Example (3). The facts are the same as in example (1), except that the employee exercised the option to the extent of 50 shares on January 15, 1965, before the date of the modification of the option. Any exercise of the option after February 1, 1965, the date of the modification, is not the exercise of a statutory option. See example (1) in this subparagraph. The exercise of the option on January 15, 1965, pursuant to which 50 shares were acquired, is the exercise of a statutory option.

Example (4). On June 1, 1964, the X Corporation grants to an employee an option to purchase 100 shares of the stock of X Corporation at $80 per share, such option to be exercised on or before June 1, 1966. At the time the option is granted, the fair market value of the X Corporation stock is $100 per share. On February 1, 1965, before the employee exercises the option, the X Corporation modifies the option to provide that the number of shares of stock which the employee may purchase at $80 per share will be 250. On February 1, 1965, the fair market value of X Corporation stock is $80 per share. Under these facts, the X Corporation has granted two options, one option (not a statutory option) with respect to 100 shares having been granted on June 1, 1964, and the other option (a qualified stock option) with respect to the additional 150 shares having been granted on February 1, 1965. In the absence of facts identifying which option is exercised first, the employee will be deemed to have exercised the options in the order in which they were granted.

[T.D. 6887, 31 FR 8808, June 24, 1966]

Accounting Periods And Methods Of Accounting

Accounting Periods

§ 1.441–1T Period for computation of taxable income (temporary).

(a) Computation of taxable income. Taxable income shall be computed and a return shall be made for a period known as the "taxable year." For rules relating to methods of accounting, the taxable year for which items of gross income are included and deductions are taken, inventories, and adjustments, see parts II and III (section 446 and following), subchapter E, chapter 1 of the Code, and the regulations thereunder.

(b) Taxable year—(1) Definition of taxable year—(i) In general. Except as otherwise provided in this paragraph (b)(1), the term "taxable year" means—

(A) The taxpayer's annual accounting period if it is a calendar year or a fiscal year; or

(B) The calendar year if section 441(g) (relating to taxpayers who keep no books or have no accounting period) applies. Except as provided in administrative provisions of the Internal Revenue

laws, a taxable year may not cover a period of more than 12 calendar months. If a return is made under section 443 for a period of less than 12 months (a "short period"), the taxable year is the short period for which the return is made.

(ii) Special rules for certain entities. The general rule provided in paragraph (b)(1)(i) of this section may be modified by the Internal Revenue laws or regulations. For example, special rules are provided for the following taxpayers—

(A) In the case of personal service corporations, the applicable rules are contained in § 1.441–4T.

(B) In the case of partnerships, the applicable rules are contained in § 1.706–1T.

(C) In the case of S corporations, the applicable rules are contained in section 1378.

(D) In the case of members of an affiliated group which makes a consolidated return, the applicable rules are contained in § 1.1502–76 and paragraph (d) of § 1.442–1.

(E) In the case of trusts, the applicable rules are contained in section 645.

(F) In the case of real estate investment trusts, the applicable rules are contained in section 859.

(G) In the case of real estate mortgage investment conduits, the applicable rules are contained in section 860D(a)(5).

(H) In the case of FSCs or DISCs, the applicable rules are contained in section 441(h).

(2) Adoption of taxable year. A new taxpayer adopts a taxable year on or before the time prescribed by law (not including extensions) for the filing of the taxpayer's first return and may adopt, without prior approval, any taxable year that satisfies the requirements of section 441 and this section.

(3) Change in taxable year—(i) General rule. After a taxpayer has adopted a taxable year, such year must be used in computing taxable income and making returns for all subsequent years unless prior approval is obtained from the Commissioner to make a change or unless a change is otherwise permitted or required under the Internal Revenue laws or regulations. See section 442 and § 1.442–1. Also see paragraph (b)(4) of this section.

(ii) Change in taxable year required by the Tax Reform Act of 1986. Procedures for entities (certain personal service corporations, partnerships and S corporations) required to change their taxable year under section 806 of the Tax Reform Act of 1986, Pub. L. 99–514, 100 Stat. 2362, are provided in Rev. Proc. 87–32, 1987–28 I.R.B. 14, or successor revenue procedures.

(4) Retention of taxable year—(i) In general. In certain cases, taxpayers will be required under the Internal Revenue laws or regulations to change their taxable year unless they establish a business purpose for retaining their current taxable year. For example, corporations electing to be S corporations, corporations that are personal service corporations for the first time, and certain partnerships with new partners may be required to change their taxable year unless they establish a business purpose for retaining their current taxable year.

(ii) Section 806 of the Tax Reform Act of 1986. Rev.Proc. 87–32 provides (and any successor revenue procedure would provide) procedures for certain entities (i.e., personal service corporations, partnerships and S corporations) requesting the Commissioner's approval to retain a fiscal year when such entity would otherwise be required to change its taxable year under section 806 of the Tax Reform Act of 1986. In addition, personal service corporations should see Announcement 87–82, 1987–37 I.R.B. 30, for modifications to Rev.Proc. 87–32 extending the due date for personal service corporations requesting the Commissioner's approval to establish a business purpose.

(c) Annual accounting period. The term "annual accounting period" means the annual period (calendar year or fiscal year) on the basis of which the taxpayer regularly computes his income in keeping his books.

(d) Calendar year. The term "calendar year" means a period of 12 months ending on December 31. A taxpayer who has not established a fiscal year must make his return on the basis of a calendar year.

(e) Fiscal year. (1) The term "fiscal year" means—

(i) A period of 12 months ending on the last day of any month other than December, or

(ii) The 52–53-week annual accounting period, if such period has been elected by the taxpayer.

(2) A fiscal year will be recognized only if it is established as the annual accounting period of the taxpayer and only if the books of the taxpayer are kept in accordance with such fiscal year.

(f) Election of year consisting of 52–53 weeks. For rules relating to the 52–53-week taxable year, see §§ 1.441–2T, 1.441–3T, and 1.441–4T.

(g) No books kept; no accounting period. Except as otherwise provided in the Internal Revenue laws or regulations, the taxpayer's taxable year shall be the calendar year if—

(1) The taxpayer keeps no books;

(2) The taxpayer does not have an annual accounting period (as defined in section 441(c) and paragraph (c) of this section); or

(3) The taxpayer has an annual accounting period, but such period does not qualify as a fiscal year (as defined in section 441(e) and paragraph (e) of this section).

For the purposes of paragraph (g)(1) of this section, the keeping of books does not require that records be bound. Records which are sufficient to reflect income adequately and clearly on the basis of an annual accounting period will be regarded as the keeping of books. A taxpayer whose taxable year is required to be a calendar year under section 441(g) and this paragraph (g) may not adopt a fiscal year without obtaining prior approval from the Commissioner. See section 442 and § 1.442–1T(a)(2).

(h) Effective date. This section is effective for taxable years beginning after December 31, 1986. See 26 CFR 1.441–1 (revised as of April 1, 1987) for rules applicable to taxable years beginning before January 1, 1987.

[T.D. 6500, 25 FR 11701, Nov. 26, 1960, as amended by T.D. 7244, 37 FR 28897, Dec. 30, 1972; T.D. 7767, 46 FR 11264, Feb. 6, 1981; T.D. 7936, 49 FR 2104, Jan. 18, 1984; T.D. 8167, 52 FR 48526, Dec. 23, 1987]

§ 1.441–2T Election of year consisting of 52–53 weeks (temporary).

(a) General rule. Section 441(f) provides, in general, that a taxpayer may elect to compute his taxable income on the basis of a fiscal year which—

(1) Varies from 52 to 53 weeks,

(2) Ends always on the same day of the week, and

(3) Ends always on—

(i) Whatever date this same day of the week last occurs in a calendar month, or

(ii) Whatever date this same day of the week falls which is nearest to the last day of the calendar month.

For example, if the taxpayer elects a taxable year ending always on the last Saturday in November, then for the year 1956, the taxable year would end on November 24, 1956. On the other hand, if the taxpayer had elected a taxable year ending always on the Saturday nearest to the end of November, then for the year 1956, the taxable year would end on December 1, 1956. Thus, in the case of a taxable year described in subparagraph (3)(i) of this paragraph, the year will always end within the month and may end on the last day of the month, or as many as six days before the end of the month. In the case of a taxable year described in subparagraph (3)(ii) of this paragraph, the year may end on the last day of the month, or as many as three days before or three days after the last day of the month.

(b) Application of effective dates. (1) For purposes of determining the effective date or the applicability of any provision of this title which is expressed in terms of taxable years beginning, including, or ending with reference to the first or last day of a specified calendar month, a 52–53-week taxable year is deemed to begin on the first day of the calendar month beginning nearest to the first day of the 52–53-week taxable year, and is deemed to end or close on the last day of the calendar month ending nearest to the last day of the 52–53-week taxable year, as the case may be. Examples of provisions of this title the applicability of which is expressed in terms referred to in the preceding sentence include the provisions relating to the time for filing returns and other documents, paying tax, or performing other acts, and the provisions of part II (section 1561 and following), subchapter B, chapter 6, relating to surtax exemptions of certain controlled corporations. The provisions of this subparagraph do not apply to the computation of the tax if subparagraph (2) of this paragraph, relating to the computation under section 21 of the effect of changes in rates of tax during a taxable year, applies. The provisions of this subparagraph may be illustrated by the following examples:

Example (1). Assume that an income tax provision is applicable to taxable years beginning on or after January 1, 1957. For that purpose, a 52–53–week taxable year beginning on any day within the period December 26, 1956, to January 4, 1957, inclusive, shall be treated as beginning on January 1, 1957.

Example (2). Assume that an income tax provision requires that a return must be filed on or before the 15th day of the third month following the close of the taxable year. For that purpose, a 52–53–week taxable year ending on any day during the period May 25 to June 3, inclusive, shall be treated as ending on May 31, the last day of the month ending nearest to

the last day of the taxable year, and the return, therefore, must be made on or before August 15.

Example (3). X, a corporation created on January 1, 1966, elects a 52–53–week taxable year ending on the Friday nearest the end of December. Thus, X's first taxable year begins on Saturday, January 1, 1966, and ends on Friday, December 30, 1966; its next taxable year begins on Saturday, December 31, 1966, and ends on Friday, December 29, 1967; and its next taxable year begins on Saturday, December 30, 1967, and ends on Friday, January 3, 1969. For purposes of applying the provisions of Part II, subchapter B, chapter 6 of the Code, X's first taxable year is deemed to begin on January 1, 1966, and end on December 31, 1966; its next taxable year is deemed to begin on January 1, 1967, and end on December 31, 1967; and its next taxable year is deemed to begin on January 1, 1968, and end on December 31, 1968. Accordingly, each such taxable year is treated as including one and only one December 31st.

(2) If a change in the rate of tax is effective during a 52–53-week taxable year (other than on the first day of such year as determined under subparagraph (1) of this paragraph), the tax for the 52–53-week taxable year shall be computed in accordance with section 21, regulating to effect of changes, and the regulations thereunder. For the purpose of the computation under section 21, the determination of the number of days in the period before the change, and in the period on and after the change, is to be made without regard to the provisions of subparagraph (1) of this paragraph. The provisions of this subparagraph may be illustrated by the following examples:

Example (1). Assume a change in the rate of tax is effective for taxable years beginning after June 30, 1956. For a 52–53–week taxable year beginning on Wednesday, November 2, 1955, the tax must be computed on the basis of the old rates for the actual number of days, from November 2, 1955, to June 30, 1956, inclusive, and on the basis of the new rates for the actual number of days from July 1, 1956, to Tuesday, October 30, 1956, inclusive.

Example (2). Assume a change in the rate of tax for taxable years beginning after June 30. For this purpose, a 52–53–week taxable year beginning on any of the days from June 25 to July 4, inclusive, is treated as beginning on July 1. Therefore, no computation under section 21 will be required for such year because of the change in rate.

(c) Adoption of or change to or from 52–53-week taxable year. (1) A new taxpayer may adopt the 52–53-week taxable year for his first taxable year if he keeps his books and computes his income on that basis, or if he conforms his books accordingly in closing them. The taxpayer must thereafter keep his books and report his income on the basis of the 52–53-week taxable year so adopted unless prior approval for a change is obtained from the Commissioner. See subparagraph (4) of this paragraph. The taxpayer shall file with his return for his first taxable year a statement containing the information required in subparagraph (3) of this paragraph. A newly-formed partnership may adopt a 52–53–week taxable year without the permission of the Commissioner only if such a year ends either with reference to the same month in which the taxable years of all its principal partners end or with reference to the month of December. See paragraph (b)(1) of § 1.706–1.

(2) A taxpayer, including a partnership, may change to a 52–53-week taxable year without the permission of the Commissioner if the 52–53-week taxable year ends with reference to the end of the same calendar month as that in which the former taxable year ended, and if the taxpayer keeps his books and computes his income for the year of change on the basis of such 52–53-week taxable year, or if he conforms his books accordingly in closing them. The taxpayer must continue to keep his books and compute his income on the basis of such 52–53-week taxable year unless prior approval for a change is obtained. See subparagraph (4) of this paragraph. The taxpayer shall indicate his election to change to such 52–53-week taxable year by a statement filed with his return for the first taxable year for which the election is made. This statement shall contain the information required in subparagraph (3) of this paragraph.

(3) The statement referred to in subparagraphs (1) and (2) of this paragraph shall contain the following information:

(i) The calendar month with reference to which the new 52–53-week taxable year ends;

(ii) The day of the week on which the 52–53-week taxable year always will end; and

(iii) Whether the 52–53-week taxable year will always end on (a) the date on which such day of the week falls in the calendar month, or (b) on the date on which such day of the week last occurs which is nearest to the last day of such calendar month.

(4) Where a taxpayer wishes to change to a 52–53-week taxable year and, in addition, wishes to change the month with reference to which the taxable year ends, or where a taxpayer wishes to change from a 52–53-week taxable year, he must obtain prior approval from the Commissioner, as provided in section 442 and § 1.442–1.

(5) If a change from or to a 52–53-week taxable year results in a short period (within the meaning of section 443) of 359 days or more, or six days or less, the tax computation under section 443(b) shall not apply. If the short period is 359 days or more, it shall be treated as a full taxable year. If

the short period is six days or less, such short period is not a separate taxable year but shall be added to and deemed a part of the following taxable year. (In the case of a change from or to a 52–53-week taxable year not involving a change of the month with reference to which the taxable year ends, the tax computation under section 443(b) does not apply since the short period will always be 359 days or more, or six days or less.) In the case of a short period which is more than six days, but less than 359 days, taxable income for the short period shall be placed on an annual basis for the purpose of section 443(b) by multiplying such income by 365 and dividing the result by the number of days in the short period. In such case, the tax for the short period shall be the same part of the tax computed on such income placed on an annual basis as the number of days in the short period is of 365 days (unless section 443(b)(2) and paragraph (b)(2) of § 1.443–1, relating to the alternative tax computation, apply). For adjustment in deduction for personal exemption, see section 443(c) and paragraph (b)(1)(v) of § 1.443–1.

(6) The provisions of subparagraph (5) of this paragraph are illustrated by the following examples:

Example (1). A taxpayer having a fiscal year ending April 30 elects for years beginning after April 30, 1955, a 52–53–week taxable year ending on the last Saturday in April. This election involves a short period of 364 days, from May 1, 1955, to April 28, 1956, inclusive. Since this short period is 359 days or more, it is not placed on an annual basis and is treated as a full taxable year.

Example (2). Assume the same conditions as in example (1), except that the taxpayer elects for years beginning after April 30, 1955, a taxable year ending on the Tuesday nearest to April 30. This election involves a short period of three days, from May 1 to May 3, 1955. Since this short period is less than seven days, tax is not separately computed for it. This short period is added to and deemed part of the following 52–week taxable year which would otherwise begin on May 4, 1955, and end on May 1, 1956. Thus, that taxable year is deemed to begin on May 1, 1955, and end on May 1, 1956.

(d) **Computation of taxable income.** The principles of section 451, relating to the taxable year for inclusion of items of gross income, and section 461, relating to the taxable year for taking deductions, are generally applicable to 52–53-week taxable years. Thus, items of income and deductions are determined on the basis of a 52–53-week taxable year, except that such items may be determined as though the 52–53-week taxable year were a taxable year consisting of 12 calendar months if such practice is consistently followed by the taxpayer and if income is clearly reflected thereby. In the case of depreciation, unless some other practice is consistently followed, the allowance shall be determined as though the 52–53-week year were a taxable year consisting of 12 calendar months. Amortization deductions for the taxable year shall be determined as though the 52–53-week year were a taxable year consisting of 12 calendar months.

(e) **Partnerships, S corporations, and personal service corporations—(1) In general.** Paragraph (e) of this section applies if a partnership, partner, S corporation, S corporation shareholder, personal service corporation (within the meaning of § 1.441–4T(d)), or employee-owner (within the meaning of § 1.441–4T(h)) uses a 52–53-week taxable year.

(2) **Treatment of taxable years ending with reference to the same calendar month—(i) Timing of partners taking into account partnership items.** If the taxable year of a partnership and a partner end with reference to the same calendar month, then for purposes of determining the taxable year in which a partner takes into account—

(A) Items described in section 702, and

(B) Items that are deductible by the partnership (including items described in section 707(c)) and includible in the income of the partner, the partner's taxable year will be deemed to end on the last day of the partnership's taxable year.

(ii) **Timing of S shareholders taking into account S corporation items.** If the taxable year of an S corporation and a shareholder end with reference to the same calendar month, then for purposes of determining the taxable year in which a shareholder takes into account—

(A) Items described in section 1366(a), and

(B) Items that are deductible by the S corporation and includible in the income of the shareholder, the shareholder's taxable year will be deemed to end on the last day of the S corporation's taxable year.

(iii) **Personal service corporations and employee-owners.** If the taxable year of a personal service corporation and an employee-owner end with reference to the same calendar month, then for purposes of determining the taxable year in which an employee-owner takes into account items that are deductible by the personal service corporation and includible in the income of the employee-owner, the employee-owner's taxable year will be deemed to end on the last day of the personal service corporation's taxable year.

(3) **Automatic approval for partnerships and S corporations.** If a partnership or S corporation is

required to use a taxable year ending with respect to the last day of a particular month and the partnership or S corporation desires to use a 52–53-week taxable year with reference to such month, the partnership or S corporation is granted automatic approval to use such 52–53-week taxable year. See § 1.441–4T(b)(2)(ii) for a similar rule for personal service corporations.

(4) Examples. The provisions of paragraph (e)(2) of this section may be illustrated by the following examples.

Example (1). ABC Partnership uses a 52–53–week taxable year that ends on the Sunday nearest to December 31, and its partners, A, B, and C, are individual calendar year taxpayers. Assume that, for ABC's taxable year ending January 3, 1988, each partner's distributive share of ABC's taxable income is $10,000. Under section 706(a) and paragraph (e)(2)(i) of this section, for the taxable year ending December 31, 1987, A, B, and C each must include $10,000 in income with respect to the ABC year ending January 3, 1988. Similarly, if ABC makes a guaranteed payment to A on January 2, 1988, A must include the payment in income for his or her taxable year ending December 31, 1987.

Example (2). X, a personal service corporation, uses a 52–53–week taxable year that ends on the Sunday nearest to December 31, and all of the employee-owners of X are individual calendar year taxpayers. Assume that, for its taxable year ending January 3, 1988, X pays a bonus of $10,000 to each employee-owner. Under paragraph (e)(2)(iii) of this section, each employee-owner must include the bonus in income for the taxable year ending December 31, 1987.

(5) Effective date. Paragraph (e) of this section applies to taxable years beginning after December 31, 1986.

(f) Special rules for 1986 and subsequent years. For special rules relating to certain adoptions of, or changes to or from, a 52–53–week taxable year ending in 1986 or 1987, see § 1.441–3T. For special rules relating to a 52–53–week taxable year beginning after December 31, 1986, see § 1.441–2T(e).

[T.D. 6500, 25 FR 11702, Nov. 26, 1960, as amended by T.D. 6845, 30 FR 9739, Aug. 5, 1965; T.D. 8123, 52 FR 3617, Feb. 5, 1987; T.D. 8167, 52 FR 48527, Dec. 23, 1987]

§ 1.441–3T Special rules for certain adoptions of, retentions of, or changes to or from a 52-53-week taxable year (temporary).

(a) Applicability. This section applies to any partnership, partner, S corporation, S corporation shareholder, personal service corporation, or employee-owner that wishes to adopt or change to or from a 52-53-week taxable year. This section also applies to a corporation seeking S status that wishes to adopt, retain, or change to or from a 52-53-week taxable year. This section applies in the case of a change to or from a 52-53-week taxable year whether or not the taxpayer also wishes to change the month with reference to which its taxable year ends. Paragraph (c) (2) of this section applies to any taxpayer (including, for example, a corporation that is not seeking S status) that wishes to adopt or change to or from a 52-53-week taxable year.

(b) Definitions—(1) Personal service corporation. For purposes of this section only, the term "personal service corporation" means any corporation (other than an S corporation) if—

(i) The principal activity of that corporation is the performance of personal services, and

(ii) Such services are substantially performed by employee-owners.

A corporation shall not be treated as a personal service corporation, however, unless more than 10 percent of the fair market value of the outstanding stock of the corporation is held by employee-owners.

(2) Employee-owner. For purposes of this section, the term "employee-owner" means an employee who owns, on any day of the corporation's taxable year, any outstanding stock of the personal service corporation. Section 318 will apply to determine stock ownership for purposes of this paragraph (b), except that "any" is to be substituted for "50 percent or more in value" in section 318(a)(2)(C).

(3) Performance of a substantial portion of services. For purposes of paragraph (b)(1) of this section, personal services are substantially performed by employee-owners if the total time spent by employee-owners in performing those services is 10 percent or more of the total time spent by all employees (including employee-owners) in performing those services. In determining time spent in performing personal services of a corporation, time spent on matters that do not relate directly and intrinsically to the performance of services for or on behalf of clients or customers of the corporation shall not be taken into account. Thus, for example, in the case of a corporation performing accounting services, time spent in performing secretarial services, managerial work of a purely administrative nature, or janitorial services shall not be taken into account in determining either the time spent by employee-owners in performing accounting services or the total time spent by all employees in performing accounting services. Managerial time shall be taken into account, however, to the extent that it consists of the supervi-

sion of accounting services performed by employees for or on behalf of clients or customers of the corporation.

(c) **General rule—(1) Satisfaction of applicable conditions.** A taxpayer to which this section applies may not adopt, retain, or change to or from a 52-53-week taxable year under § 1.441-2(c) (1) or (2), § 1.442-1, or 26 CFR 18.1378-1 unless each of the applicable conditions set forth in paragraph (d) of this section is satisfied with respect to the taxpayer seeking the adoption, retention, or change. For additional requirements applicable to certain taxpayers that wish to adopt, retain, or change to or from a 52-53-week taxable year, see §§ 1.442-2T and 1.442-3T.

(2) **Evasion or avoidance of tax—(i) General rule.** A taxpayer may not adopt or change to or from a 52-53-week taxable year if the principal purpose for such action is the evasion or avoidance of Federal income tax.

(ii) **Example.** The provisions of this paragraph (c)(2) may be illustrated by the following example.

Example. Assume that X, a calendar year corporation, wishes to elect, for taxable years beginning after December 31, 1985, a 52-53-week taxable year that ends on the Tuesday nearest to December 31. Assume that such election allows the corporation to sell a substantial portion of its assets on Wednesday, December 31, 1986, and to report the income from such sale in the taxable year beginning on December 31, 1986, and ending on December 29, 1987. By electing the 52-53-week taxable year, the corporation obtains the advantages of the lower Federal income tax rates applicable for the period beginning December 31, 1986. Moreover, the sale of the assets on December 31 allows the buyer of the assets, a calendar year taxpayer, to obtain certain Federal income tax advantages that are not available with respect to purchases of assets in 1987 and later years. Given the above facts, it is presumed that the principal purpose for such action is the evasion or avoidance of Federal income tax. Thus, X may not adopt a 52-53-week taxable year.

(d) **Conditions applicable to certain taxpayers—(1) Conditions.** (i) If the taxpayer seeking the adoption or change is a partnership, all of the partners (determined at the close of the first taxable year of the partnership for which the election to use the 52-53-week taxable year is made or, if applicable, the short period involved in the change) must agree to treat the current and all subsequent 52-53-week years of the partnership (and of any partner) as ending on the last day of the calendar month that ends nearest to the last day of the 52-53-week year for purposes of determining the taxable year in which the inclusions required by sections 702 and 707(c) are taken into account.

(ii) If the taxpayer seeking the adoption or change is a partner, the partner must agree to treat the current and all subsequent 52-53-week years of the partner (and the 52-53-week years of any partnership in which such taxpayer is a partner) as ending on the last day of the calendar month that ends nearest to the last day of the 52-53-week year for purposes of determining the taxable year in which the inclusions required by sections 702 and 707(c) are taken into account.

(iii) If the taxpayer seeking the adoption, retention, or change is an S corporation or a corporation seeking S status, all of the shareholders (determined at the close of the first taxable year of the S corporation for which the election to use or retain the 52-53-week year is made or, if applicable, the short period involved in the change) must agree to treat the current and all subsequent 52-53-week taxable years of the corporation (and of any shareholder) as ending on the last day of the calendar month that ends nearest to the last day of the 52-53-week year for purposes of determining the taxable year in which the inclusions required by section 1366 are taken into account.

(iv) If the taxpayer seeking the adoption or change is an S corporation shareholder, the shareholder must agree to treat the current and all subsequent 52-53-week taxable years of the shareholder (and the 52-53-week years of any S corporation in which such taxpayer is a shareholder) as ending on the last day of the calendar month that ends nearest to the last day of the 52-53-week year for purposes of determining the taxable year in which the inclusions required by section 1366 are taken into account.

(v) If the taxpayer seeking the adoption or change is a personal service corporation, all of the employee-owners (determined at the close of the first taxable year of the corporation for which the election to use the 52-53-week taxable year is made or, if applicable, the short period involved in the change) must agree to treat the current and all subsequent taxable years of an employee-owner and the corporation that end with or with reference to the same calendar month as if both such taxable years ended on the last day of the taxable year of the corporation for purposes of determining the taxable year in which payments (whether or not in cash) that are deductible by the corporation are taken into account by the employee-owner.

(vi) If the taxpayer seeking the adoption or change is an employee-owner of a personal service corporation, the employee-owner must agree to treat the current and all subsequent taxable years of the employee-owner and the corporation that

end with or with reference to the same calendar month as if both such taxable years ended on the last day of the taxable year of the corporation for purposes of determining the taxable year in which payments (whether or not in cash) that are deductible by the corporation are taken into account by the employee-owner.

(2) **Examples.** The provisions of paragraph (d)(1) of this section may be illustrated by the following examples.

Example (1). Assume that ABC, a calendar year partnership, wishes to elect, for taxable years beginning after December 31, 1985, a 52-53-week taxable year that ends on the Friday nearest to December 31. Assume that A, B, and C, who are individual calendar year taxpayers, are equal partners in ABC. Assume also that A, B, and C agree to treat each of the 52-53-week taxable years of ABC as ending on December 31 for purposes of determining the taxable year in which guaranteed payments and their distributive shares of income, gains, losses, deductions, and credits are taken into account. Assume that, for its taxable year ending January 2, 1987, ABC has net income of $30,000, and that ABC has no other items of income, gain, loss, deduction, or credit for that taxable year. Under paragraph (d)(1)(i) of this section, A, B, and C each must include $10,000 in income for their taxable years ending on December 31, 1986. Similarly, if ABC makes a guaranteed payment to A on January 2, 1987, A must include the payment in income for the taxable year ending December 31, 1986.

Example (2). Assume that X, a calendar year personal service corporation, wishes to elect, for taxable years beginning after December 31, 1985, a 52-53-week taxable year that ends on the Friday nearest to December 31. Assume that all of the employer-owners of X are individual calendar year taxpayers. Assume further that all of the employee-owners agree to treat their taxable year as ending on the last day of X's taxable year for purposes of determining the year in which payments by X are taken into income. Assume that on January 2, 1987, X makes a payment of bonuses of $10,000 to each employee-owner. Under paragraph (d)(1)(v) of this section, each employee-owner must include $10,000 in income for the taxable year ending December 31, 1986.

(e) **Procedural requirements.** In the case of an adoption of or change to a 52-53-week taxable year under § 1.441-2(c) (1) or (2), a taxpayer to which any condition in paragraph (d) of this section applies must indicate on the statement required under § 1.441-2(c) (1) or (2), or on a separate statement that is attached to the income tax return for the year of adoption or change, that all of the applicable conditions are satisfied. If the due date for that return is before March 9, 1987, the statement required under § 1.441-2(c) (1) or (2) (or an amended statement) indicating that the applicable conditions are satisfied must be filed by the later of March 9, 1987 or the due date for the return (determined with regard to extensions). If § 1.442-2T or § 1.442-3T applies to an adoption of, retention of, or change to or from a 52-53-week taxable year, the procedures set forth in § 1.442-2T or § 1.442-3T (whichever is applicable) must be followed and the rules set forth in § 1.442-2T(f)(3) or § 1.442-3T(d) shall apply.

(f) **Effective date—(1) In general.** This section shall apply to adoptions of, retentions of, or changes to or from a 52-53-week taxable year if—

(i) The income tax return for the first taxable year for which the election to use or retain the 52-53-week year is made (or, if applicable, the income tax return for the short period involved in the change) is filed after September 29, 1986, and

(ii) The first taxable year for which the election to use or retain the 52-53-week year is made (or the short period involved in the change) ends before January 5, 1987.

(2) **Exceptions.** This section shall not apply if the application required to effect or request the adoption, retention, or change was timely filed before September 30, 1986. In the case of an adoption or change that is effected by filing an income tax return for the first taxable year for which the election is made, this section shall not apply if an application for extension of time for filing that return was filed before September 30, 1986, the application clearly stated the taxpayer's intention to adopt or change to a 52-53-week taxable year, and the income tax return for that taxable year is timely filed (determined with regard to extensions).

[T.D. 8123, 52 FR 3617, Feb. 5, 1987]

§ 1.441–4T Taxable year of a personal service corporation (temporary).

(a) **Taxable year.** The taxable year of a personal service corporation (as defined in paragraph (d) of this section) is—

(1) The calendar year, or a "short period" (as provided in § 1.441–1T(b)(1)(i)) ending December 31; or

(2) A fiscal year, or a short period (other than a short period provided in paragraph (a)(1) of this section), if the corporation obtains the approval of the Commissioner (in accordance with paragraph (c) of this section) for using such fiscal year.

(b) **Change in taxable year required—(1) In general.** For any taxable year beginning after December 31, 1986, a taxpayer that is a personal service corporation for such taxable year must—

(i) Use a taxable year described in paragraph (a) of this section; or

(ii) Change to such a taxable year by using a short taxable year that ends on the last day of a

taxable year described in paragraph (a) of this section.

(2) **Approval not required for change to a calendar year**—(i) **In general.** A personal service corporation may change its taxable year to the calendar year without the approval of the Commissioner. In such cases, however, the taxpayer should notify the Internal Revenue Service of the change in accordance with the provisions of the applicable revenue procedure. See, for example, section 5.02(1) of Rev.Proc. 87–32, 1987–28 I.R.B. 14.

(ii) **Special rule for 52–53–week taxable year ending with reference to the month of December.** For purposes of this section, a 52–53–week taxable year of a personal service corporation ending with reference to the month of December shall be treated as the calendar year. In order to assist in the processing of the retention or change in taxable year, taxpayers should refer to this special rule by either typing or legibly printing the following statement at the top of page 1 of the income tax return: "FILED UNDER § 1.441–4T(b)(2)(ii)." See § 1.441–2T(e) for special rules regarding 52–53–week taxable years for personal service corporations.

(3) **Examples.** The provisions of paragraph (b) of this section may be illustrated by the following examples.

Example (1). X corporation's last taxable year beginning before January 1, 1987, ends on January 31, 1987. In addition, X is a personal service corporation for its taxable year beginning February 1, 1987, and does not obtain the approval of the Commissioner for using a fiscal year. Thus, under paragraph (b)(1) of this section, X is required to change its taxable year to the calendar year by using a short taxable year that begins on February 1, 1987, and ends on December 31, 1987. Under paragraph (b)(2)(i) of this section, X may change its taxable year without the consent of the Commissioner, but should notify the Internal Revenue Service of the change in accordance with section 5.02(1) of Rev.Proc. 87–32.

Example (2). Assume the same facts as in example (1), except that for its taxable year beginning February 1, 1987, X obtains the approval of the Commissioner to change its annual accounting period to a fiscal year ending September 30. Under paragraph (b)(1) of this section, X must file a tax return for the short period from February 1, 1987, through September 30, 1987.

Example (3). Assume the same facts as in example (1), except that the first taxable year for which X is a personal service corporation is the taxable year that begins on February 1, 1990. Thus, for taxable years ending before that date, this section does not apply with respect to X. For its taxable year beginning on February 1, 1990, however, X will be required to comply with paragraph (b) of this section. If X does not obtain the approval of the Commissioner to use a fiscal year, X will be required to change its taxable year to the calendar year by using a short taxable year that ends on December 31, 1990.

Example (4). Assume the same facts as in example (1), except that X desires to change to a 52–53–week taxable year ending with reference to the month of December. Pursuant to paragraphs (b)(2)(i) and (b)(2)(ii) of this section, X may change its taxable year to a 52–53–week taxable year ending with reference to the month of December without the consent of the Commissioner, but should notify the Internal Revenue Service of the change in accordance with paragraph (b)(2)(ii) of this section.

(c) **Approval of a fiscal year.** A personal service corporation must establish to the satisfaction of the Commissioner a business purpose for using a fiscal year under paragraph (a)(2) of this section. Business purpose is established to the satisfaction of the Commissioner in the case of a personal service corporation that—

(1) Requests to use, or is using, a fiscal year that coincides with its natural business year, as defined in section 4.01(1) of Rev.Proc. 87–32, or successor revenue procedures, or

(2) Receives permission from the Commissioner to use the fiscal year by establishing a business purpose for the fiscal year under section 6.01 of Rev.Proc. 87–32, or successor revenue procedures. See also Rev.Rul. 87–57, 1987–28 I.R.B. 7. See Announcement 87–82 for modifications to Rev. Proc. 87–32 regarding due dates for personal service corporations filing applications and income tax returns for certain short taxable years beginning after December 31, 1986.

(d) **Personal service corporation for a taxable year**—(1) **In general.** For purposes of this section, a taxpayer is a personal service corporation for a taxable year only if—

(i) The taxpayer is a C corporation (as defined in section 1361(a)(2)) for the taxable year;

(ii) The principal activity of the taxpayer during the testing period for the taxable year is the performance of personal services;

(iii) During the testing period for the taxable year, such services are substantially performed by employee-owners; and

(iv) Employee-owners, as defined in paragraph (h) of this section, own (as determined under the attribution rules of section 318, except that "any" shall be substituted for "50 percent" in section 318(a)(2)(C)) more than 10 percent of the fair market value of the outstanding stock in the taxpayer on the last day of the testing period for the taxable year.

(2) **Testing period**—(i) **In general.** Except as otherwise provided in paragraph (d)(2)(ii) of this section, the testing period for a taxable year is the taxable year preceding such taxable year.

(ii) New corporations. The testing period for a taxpayer's first taxable year is the period beginning on the first day of such taxable year and ending on the earlier of—

(A) The last day of such taxable year; or

(B) The last day of the calendar year in which such taxable year begins.

(3) Examples. The provisions of paragraph (d)(2) of this section may be illustrated by the following examples.

Example (1). Corporation A has been in existence since 1980 and has used a January 31 taxable year for all taxable years beginning before 1987. For purposes of determining whether A is a personal service corporation for the taxable year beginning February 1, 1987, A's testing period under paragraph (d)(2)(i) of this section is the taxable year ending January 31, 1987.

Example (2). B corporation's first taxable year begins on June 1, 1987, and B desires to use a September 30 taxable year. However, if B is a personal service corporation, it must obtain the Commissioner's approval to use a September 30 taxable year. Pursuant to paragraph (d)(2)(ii) of this section, B's testing period for its first taxable year beginning June 1, 1987, is the period June 1, 1987 through September 30, 1987. Thus, if, based upon such testing period, B is a personal service corporation, B must obtain the Commissioner's permission to use a September 30 taxable year.

Example (3). The facts are the same as in Example (2), except that B desires to use a March 31 taxable year. Pursuant to paragraph (d)(2)(ii) of this section, B's testing period for its first taxable year beginning June 1, 1987, is the period June 1, 1987, through December 31, 1987. Thus, if, based upon such testing period, B is a personal service corporation, B must obtain the Commissioner's permission to use a March 31 fiscal year.

(e) Determination of whether an activity during the testing period is treated as the performance of personal services—(1) Activities described in section 448(d)(2)(A). For purposes of this section, any activity of the taxpayer described in section 448(d)(2)(A) or the regulations thereunder will be treated as the performance of personal services. Therefore, any activity of the taxpayer that involves the performance of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting (as such fields are defined in the regulations interpreting section 448) will be treated as the performance of personal services for purposes of this section.

(2) Activities not described in section 448(d)(2)(A). For purposes of this section, any activity of the taxpayer not described in section 448(d)(2)(A) or the regulations thereunder will not be treated as the performance of personal services.

(f) Principal activity—(1) General rule. For purposes of this section, the principal activity of a corporation for any testing period will be considered to be the performance of personal services if the cost of the corporation's compensation (the "compensation cost") for such testing period that is attributable to its activities that are treated as the performance of personal services under paragraph (e) of this section exceeds 50 percent of the corporation's total compensation cost for such testing period.

(2) Compensation cost. For purposes of this section, the compensation cost of a corporation for a taxable year is equal to the sum of the following amounts allowable as a deduction, allocated to a long-term contract, or otherwise chargeable to a capital account by the corporation during such taxable year—

(i) Wages and salaries, and

(ii) Any other amounts attributable to services performed for or on behalf of the corporation by a person who is an employee of the corporation (including an owner of the corporation who is treated as an employee under paragraph (h)(2) of this section) during the testing period. Such amounts include, but are not limited to, amounts attributable to deferred compensation, commissions, bonuses, compensation includible in income under section 83, compensation for services based on a percentage of profits, and the cost of providing fringe benefits that are includible in income.

However, for purposes of this section, compensation cost does not include amounts attributable to a plan qualified under section 401(a) or 403(a), or to a simplified employee pension plan defined in section 408(k).

(3) Attribution of compensation cost to personal service activity—(i) Employees involved only in the performance of personal services. The compensation cost for employees involved only in the performance of activities that are treated as personal services under paragraph (e) of this section, or employees involved only in supporting the work of such employees, shall be considered to be attributable to the corporation's personal service activity.

(ii) Employees involved only in activities that are not treated as the performance of personal services. The compensation cost for employees involved only in the performance of activities that are not treated as personal services under paragraph (e) of this section, or for employees involved only in supporting the work of such employees, shall not be considered to be attributable to the corporation's personal service activity.

(iii) **Other employees.** The compensation cost for any employee who is not described in either paragraph (f)(3)(i) or paragraph (f)(3)(ii) of this section ("a mixed activity employee") shall be allocated as follows—

(A) Compensation cost attributable to personal service activity. That portion of the compensation cost for a mixed activity employee that is attributable to the corporation's personal service activity equals the compensation cost for such employee multiplied by the percentage of the total time worked for the corporation by such employee during the year that is attributable to activities of the corporation that are treated as the performance of personal services under paragraph (e) of this section. Such percentage shall be determined by the taxpayer in any reasonable and consistent manner. Time logs are not required unless maintained for other purposes;

(B) Compensation cost not attributable to personal service activity. That portion of the compensation cost for a mixed activity employee that shall not be considered to be attributable to the corporation's personal service activity is the compensation cost for such employee less the amount determined in paragraph (f)(3)(iii)(A) of this section.

(g) **Services substantially performed by employee-owners—(1) General rule.** Personal services are substantially performed during the testing period by employee-owners of the corporation if more than 20 percent of the corporation's compensation cost for such period attributable to its activities that are treated as the performance of personal services (within the meaning of paragraph (e) of this section), is attributable to personal services performed by employee-owners.

(2) **Compensation cost attributable to personal services.** For purposes of paragraph (g)(1) of this section—

(i) The corporation's compensation cost attributable to its activities that are treated as the performance of personal services shall be determined under paragraph (f)(3) of this section; and

(ii) The portion of the amount determined under paragraph (g)(2)(i) of this section that is attributable to personal services performed by employee-owners shall be determined by the taxpayer in any reasonable and consistent manner.

(3) **Examples.** The provisions of paragraph (g) of this section may be illustrated by the following examples.

Example (1). For its taxable year beginning February 1, 1987, Corporation A's testing period is the taxable year ending January 31, 1987. During such testing period, A's only activity was the performance of personal services. The total compensation cost of A (including compensation cost attributable to employee-owners) for the testing period was $1,000,000. The total compensation cost attributable to employee-owners of A for the testing period was $210,000. Pursuant to paragraph (g)(1) of this section, the employee-owners of A substantially performed the personal services of A during the testing period because the compensation cost of A's employee-owners was more than 20 percent of the total compensation cost for all of A's employees (including employee-owners).

Example (2). Corporation B has the same facts as corporation A in example (1), except that during the taxable year ending January 31, 1987, B also participated in an activity that would not be characterized as the performance of personal services under this section. The total compensation cost of B (including compensation cost attributable to employee-owners) for the testing period was $1,500,000 ($1,000,000 attributable to B's personal service activity and $500,000 attributable to B's other activity). The total compensation cost attributable to employee-owners of B for the testing period was $250,000 ($210,000 attributable to B's personal service activity and $40,000 attributable to B's other activity). Pursuant to paragraph (g)(1) of this section, the employee-owners of B substantially performed the personal services of B during the testing period because more than 20 percent of B's compensation cost during the testing period attributable to its personal service activities was attributable to personal services performed by employee-owners ($210,000).

(h) **Employee-owner defined—(1) General rule.** For purposes of this section, a person is an employee-owner of a corporation for a testing period if—

(i) The person is an employee of the corporation on any day of the testing period, and

(ii) The person owns any outstanding stock of the corporation on any day of the testing period.

(2) **Special rule for independent contractors who are owners.** Any person who is an owner of the corporation within the meaning of paragraph (h)(1)(ii) of this section and who performs personal services for or on behalf of the corporation shall be treated as an employee for purposes of this section, even if the legal form of that person's relationship to the corporation is such that he or she would be considered an independent contractor for other purposes.

(i) **Special rules for affiliated group filing consolidated return—(1) In general.** For purposes of applying this section to the members of an affiliated group of corporations filing a consolidated return for the taxable year—

(i) The members of the affiliated group shall be treated as a single corporation;

(ii) The employees of the members of the affiliated group shall be treated as employees of such single corporation; and

(iii) All of the stock, of the members of the affiliated group, that is not owned by any other member of the affiliated group shall be treated as the outstanding stock of such corporation.

(2) Examples. The provisions of this paragraph (i) may be illustrated by the following examples.

Example (1). The affiliated group AB, consisting of corporation A and its wholly owned subsidiary B, filed a consolidated Federal income tax return for the taxable year ending January 31, 1987, and AB is attempting to determine whether it is affected by this section for its taxable year beginning February 1, 1987. During the testing period (i.e., the taxable year ending January 31, 1987), A did not perform personal services while B's only activity was the performance of personal services. On the last day of the testing period, employees of A did not own any stock in A while some of B's employees own stock in A. In the aggregate, B's employees own 9 percent of A's stock on the last day of the testing period. Pursuant to paragraph (i)(1) of this section, this section is effectively applied on a consolidated basis to members of an affiliated group filing a consolidated Federal income tax return. Since the only employee-owners of AB are the employees of B and since B's employees do not own more than 10 percent of AB on the last day of the testing period, AB is not subject to the provisions of this section. Thus, AB is not required to determine on a consolidated basis whether, during the testing period, (a) its principal activity is the providing of personal services, or (b) the personal services are substantially performed by employee-owners.

Example (2). The facts are the same as in example (1), except that on the last day of the testing period A owns only 80 percent of B. The remaining 20 percent of B is owned by employees of B. The fair market value of A, including its 80 percent interest in B, as of the last day of the testing period, is $1,000,000. In addition, the fair market value of the 20 percent interest in B owned by B's employees is $5,000 as of the last day of the testing period. Pursuant to paragraph (d)(1)(iv) and paragraph (i)(1) of this section, AB must determine whether the employee-owners of A and B (*i.e.,* B's employees) own more than 10 percent of the fair market value of A and B as of the last day of the testing period. Since the $14,000 [($100,000.09) + $5,000] fair market value of the stock held by B's employees is greater than 10 percent of the $105,000 ($100,000 + $5,000) aggregate fair market value of A and B as of the last day of the testing period, AB may be subject to this section if, on a consolidated basis during the testing period, (a) the principal activity of AB is the performance of personal services and (b) the personal services are substantially performed by employee-owners.

(j) Effective date. This section applies to taxable years beginning after December 31, 1986.
[T.D. 8167, 52 FR 48528, Dec. 23, 1987]

§ 1.442–1 Change of annual accounting period.

(a) Manner of effecting such change—(1) In general. If a taxpayer wishes to change his annual accounting period (as defined in section 441(c)) and adopt a new taxable year (as defined in section 441(b)), he must obtain prior approval from the Commissioner by application, as provided in paragraph (b) of this section, or the change must be authorized under the Income Tax Regulations. A new taxpayer who adopts an annual accounting period as provided in section 441 and §§ 1.441–1 or 1.441–2 need not secure the permission of the Commissioner under section 442 and this section. However, see subparagraph (2) of this paragraph. For adoption of and changes to or from a 52–53-week taxable year, see section 441(f) and § 1.441–2; for adoption of and changes in the taxable years of partners and partnerships, see paragraph (b)(2) of this section, section 706(b) and paragraph (b) of § 1.706–1; for special rules relating to certain corporations, subsidiary corporations, and newly married couples, see paragraphs (c), (d), and (e), respectively, of this section. For special rules relating to real estate investment trusts, see section 859.

(2) Taxpayers to whom section 441(g) applies. Section 441(g) provides that if a taxpayer keeps no books, does not have an annual accounting period, or has an accounting period which does not meet the requirements for a fiscal year, his taxable year shall be the calendar year. If section 441(g) applies to a taxpayer, the adoption of a fiscal year will be treated as a change in his annual accounting period under section 442. Therefore, such fiscal year can become the taxpayer's taxable year only with the approval of the Commissioner. Approval of any such change will be denied unless the taxpayer agrees in his application to establish and maintain accurate records of his taxable income for the short period involved in the change and for the fiscal year proposed. The keeping of records which adequately and clearly reflect income for the taxable year constitutes the keeping of books within the meaning of section 441(g) and paragraph (g) of § 1.441–1.

(b) Prior approval of the Commissioner—(1) In general. In order to secure prior approval of a change of a taxpayer's annual accounting period, the taxpayer must file an application on Form 1128 with the Commissioner of Internal Revenue, Washington, D. C. 20224, to effect the change of accounting period. If the short period involved in the change ends after December 31, 1973, such form shall be filed on or before the 15th day of the second calendar month following the close of such short period; if such short period ends before January 1, 1974, such form shall be filed on or before the last day of the first calendar month following the close of such short period. Approval will not be granted unless the taxpayer and the

Commissioner agree to the terms, conditions, and adjustments under which the change will be effected. In general, a change of annual accounting period will be approved where the taxpayer established a substantial business purpose for making the change. In determining whether a taxpayer has established a substantial business purpose for making the change, consideration will be given to all the facts and circumstances relating to the change, including the tax consequences resulting therefrom. Among the nontax factors that will be considered in determining whether a substantial business purpose has been established is the effect of the change on the taxpayer's annual cycle of business activity. The agreement between the taxpayer and the Commissioner under which the change will be effected shall, in appropriate cases, provide terms, conditions, and adjustments necessary to prevent a substantial distortion of income which otherwise would result from the change. The following are examples of effects of the change which would substantially distort income: (i) Deferral of a substantial portion of the taxpayer's income, or shifting of a substantial portion of deductions, from one year to another so as to reduce substantially the taxpayer's tax liability; (ii) causing a similar deferral or shifting in the case of any other person, such as a partner, a beneficiary, or a shareholder in an electing small business corporation as defined in section 1371(b); or (iii) creating a short period in which there is either (a) a substantial net operating loss, or (b) in the case of an electing small business corporation, a substantial portion of amounts treated as long-term capital gain. Even though a substantial business purpose is not established, the Commissioner in appropriate cases may permit a husband or wife to change his or her taxable year in order to secure the benefits of section 1(a) (relating to tax in case of a joint return). See paragraph (e) of this section for special rule for newly married couples.

(2) Partnerships and partners. (i) A newly-formed partnership may adopt a taxable year which is the same as the taxable year of all its principal partners (or is the same taxable year to which its principal partners who do not have such taxable year concurrently change) without securing prior approval from the Commissioner. If all its principal partners are not on the same taxable year, a newly-formed partnership may adopt a calendar year without securing prior approval from the Commissioner. If a newly-formed partnership wishes to adopt a taxable year that does not qualify under the preceding two sentences, the adoption of such year requires the prior approval of the Commissioner in accordance with section 706(b)(1) and paragraph (b) of § 1.706–1. An existing partnership may change its taxable year without securing prior approval from the Commissioner if all its principal partners have the same taxable year to which the partnership changes, or if all its principal partners who do not have such a taxable year concurrently change to such taxable year. In any other case, an existing partnership may not change its taxable year unless it secures the prior approval of the Commissioner in accordance with paragraph (b)(1) of this section and section 706(b)(1) and paragraph (b) of § 1.706–1.

(ii) A partner may change his taxable year only if he secures the prior approval of the Commissioner in accordance with paragraph (b)(1) of this section.

(3) Certain foreign corporations. Application for approval to change such taxable year of either a controlled foreign corporation (as defined in section 957 or a foreign corporation that meets the stock ownership requirements of a foreign personal holding company (as defined in section 552) shall be made by filing an application in accordance with paragraph (b)(1) of this section. The application shall be made by one or more of such controlled foreign corporation's United States shareholders (as defined in section 951(b)), by one or more individuals who comprise a foreign corporation's "United States group" (as defined in section 552(a)(2)), or by the respective corporations. In general, a change of such a taxable year will be approved if the annual accounting period of such controlled foreign corporation or foreign corporation meeting the stock ownership requirements of a foreign personal holding company is changed to conform to the requirements of foreign law or because bona fide foreign business reasons make such a change necessary or desirable and the other applicable provisions of paragraph (b)(1) of this section are satisfied.

(c) Special rule for certain corporations. **(1)** Except as otherwise provided in paragraph (c)(4) and (5) of this section and under section 859, a corporation may change its annual accounting period without the prior approval of the Commissioner if all the conditions in subparagraph (2) of this paragraph are met, and if the corporation files a statement with the district director with whom the returns of the corporation are filed at or before the time (including extension) for filing the return for the short period required by such change. This statement shall indicate that the corporation is changing its annual accounting period under paragraph (c) of this section and shall contain

information indicating that all of the conditions in subparagraph (2) of this paragraph have been met.

(2) The provisions of this paragraph do not apply unless all of the following conditions are met:

(i) The corporation has not changed its annual accounting period at any time within the ten calendar years ending with the calendar year which includes the beginning of the short period required to effect the change of annual accounting period;

(ii) The short period required to effect the change of annual accounting period is not a taxable year in which the corporation has a net operating loss as defined in section 172;

(iii) The taxable income of the corporation for the short period required to effect the change of annual accounting period is, if placed on an annual basis (see paragraph (b)(1)(i) and (ii) of § 1.443–1), 80 percent or more of the taxable income of the corporation for the taxable year immediately preceding such short period;

(iv) If a corporation had a special status either for the short period or for the taxable year immediately preceding such short period, it must have the same special status for both the short period and such taxable year (for the purpose of this subdivision, special status includes only: a personal holding company, a corporation that is an exempt organization, a foreign corporation not engaged in a trade or business within the United States, a Western Hemisphere trade corporation, and a China Trade Act corporation); and

(v) The corporation does not attempt to make an election under section 1372(a) that purports to initially become effective with respect to a taxable year which (a) would immediately follow the short period required to effect the change of annual accounting period, and (b) would begin after August 23, 1972.

(3) If the Commissioner finds upon examination of the returns that the corporation, because of subsequent adjustments in establishing tax liability, did not in fact meet all the conditions in subparagraph (2) of this paragraph, the statement filed under subparagraph (1) of this paragraph shall be considered as a timely application for permission to change the corporation's annual accounting period to the taxable year indicated in the statement.

(4) A corporation which is an electing small business corporation (as defined in section 1371(b)) or a DISC (as defined in section 992(a)(1)) during the short period required to effect the change of annual accounting period may change its taxable year only if it secures the prior approval of the Commissioner in accordance with paragraph (b)(1) of this section. This subparagraph shall apply only if such short period ends after February 28, 1959. See subparagraphs (3)(ii) and (4) of § 1.991–1(b) for special rules relating to the change of a DISC's annual accounting period during 1972.

(5) A controlled foreign corporation (as defined in section 957) or a foreign corporation that meets the stock ownership requirements of a foreign personal holding company (as defined in section 552) may change its taxable year only if it secures the prior approval of the Commissioner in accordance with paragraph (b)(1) and (3) of this section. A controlled foreign corporation or a foreign corporation that meets the stock ownership requirements of a foreign personal holding company that is not subject to United States income tax shall be treated for the purposes of this section as a taxpayer within the meaning of section 7701(a)(14).

(d) **Special rule for change of annual accounting period by subsidiary corporation.** A subsidiary corporation which is required to change its annual accounting period under § 1.1502–76, relating to the taxable year of members of an affiliated group which file a consolidated return, need not file an application on Form 1128 with respect to such change.

(e) **Special rule for newly married couples.** (1) A newly married husband or wife may change his or her annual accounting period in order to adopt the annual accounting period of the other spouse so that a joint return may be filed for the first or second taxable year of such spouse ending after the date of marriage, provided that the newly married husband or wife adopting the annual accounting period of the other spouse files a return for the short period required by such change on or before the 15th day of the 4th month following the close of such short period. See section 443 and the regulations thereunder. (If the due date for any such short-period return occurs before the date of marriage, the first taxable year of the other spouse ending after the date of marriage cannot be adopted under this paragraph.) The short-period return shall contain a statement that it is filed under authority of this paragraph. For a change of annual accounting period by a husband or wife which does not qualify under this subparagraph, see paragraph (b) of this section.

(2) The provisions of this paragraph may be illustrated by the following example:

Example. H & W marry on September 25, 1956. H is on a fiscal year ending June 30, and W is on a calendar year. H wishes to change to a calendar year in order to file joint returns with W. W's first taxable year after marriage ends on December 31, 1956. H may not change to a calendar year for 1956 since, under paragraph (e) of § 1.442–1, he would have had to file a return for the short period from July 1 to December 31, 1955, by April 15, 1956. Since the date of marriage occurred subsequent to this due date, the return could not be filed under paragraph (e) of § 1.442–1. Therefore, H cannot change to a calendar year for 1956. However, H may change to a calendar year for 1957 by filing a return under paragraph (e) of § 1.442–1 by April 15, 1957, for the short period from July 1 to December 31, 1956. If H files such a return, H and W may file a joint return for calendar year 1957 (which is W's second taxable year ending after the date of marriage).

(f) **Effective date.** The provisions of this section (other than paragraphs (c)(4) and (e) thereof) are effective for any change of annual accounting period where the last day of the short period required to effect the change ends on or after March 1, 1957. For special rules applicable to certain changes of annual accounting period that result in a short period ending in 1986 or 1987, see § 1.442–2T. For special rules applicable to certain adoptions and retentions of a taxable year ending in 1986 or 1987, see § 1.442–3T.

[T.D. 6500, 25 FR 11703, Nov. 26, 1960, as amended by T.D. 6614, 27 FR 10098, Oct. 13, 1962; T.D. 7235, 37 FR 28624, Dec. 28, 1972; T.D. 7244, 37 FR 28897, Dec. 30, 1972; T.D. 7286, 38 FR 26911, Sept. 27, 1973; T.D. 7323, 39 FR 34409, Sept. 25, 1974; T.D. 7470, 42 FR 12178, March 3, 1977; T.D. 7767, 45 FR 11265, Feb. 6, 1981; T.D. 7936, 49 FR 2106, Jan. 18, 1984; T.D. 8123, 52 FR 3619, Feb. 5, 1987]

§ 1.442–2T Special limitations on certain changes of annual accounting period (temporary).

(a) **Applicability.** This section applies to any taxpayer that wishes to change its annual accounting period, or that wishes to adopt an annual accounting period described in paragraph (h) of this section. This section shall not apply, however, to:

(1) Any taxpayer to which the provisions of § 1.1502–76 apply (other than a taxpayer to which the provisions of paragraph (h) of this section apply);

(2) Any taxpayer to which the provisions of § 1.442–1(e) apply;

(3) Any taxpayer that wishes to change its annual accounting period to a calendar year (including a change under 26 CFR 18.1378–1(b)) or to a 52-53-week taxable year that ends with reference to the month of December (see, however, § 1.441-3T);

(4) Any partnership that wishes to change its annual accounting period under § 1.706-1(b)(1) to the same taxable year as that of all of its principal partners or to which all of its principal partners are concurrently changing;

(5) Any corporation seeking S status that wishes to change its annual accounting period under section 4.02 of Rev. Proc. 83-25, 1983-1 C.B. 689, to the same taxable year as that of shareholders holding more than 50 percent of the shares of stock of the corporation or to which such shareholders are concurrently changing;

(6) Any corporation seeking S status that wishes to change its annual accounting period under section 4.04 of Rev. Proc. 83-25, 1983-1 C.B. 689;

(7) Any taxpayer that wishes to change to a 52-53-week taxable year that ends with reference to the same calendar month as that in which the former taxable year ended (see, however, § 1.441–3T); or

(8) Any organization exempt under section 501(a), and any plan meeting the requirements for qualification under section 401(a) and which is exempt under section 501 (a), except those organizations and plans required to file a Form 990-T for the short period involved in the change of annual accounting period.

(b) **General rule.** A taxpayer to which this section applies may not change its annual accounting period under the provisions of—

(1) Paragraph (c) of § 1.442-1,

(2) Paragraph (b) of § 1.706-1,

(3) 26 CFR 18.1378-1(b),

(4) Rev. Proc. 72-51, 1972-2 C.B. 832, or

(5) Any revenue procedure issued before September 18, 1986, that, without regard to this section, would permit a taxpayer to change its taxable year either under a procedure that does not require the prior approval of the Commissioner or under expedited procedures for obtaining that approval.

Examples of procedures suspended by paragraph (b)(5) of this section include Rev. Proc. 84-34, 1984-1 C.B. 508, and those portions of Rev. Proc. 83-25, 1983-1 C.B. 689, that apply to changes of annual accounting period. In addition, the Commission will not consider a request by a taxpayer to which this section applies for approval of a

change of annual accounting period under § 1.442-1(b)(1) unless the requirements of paragraph (e) of this section are satisfied. A taxpayer to which this section applies may, however, change its annual accounting period without securing the prior approval of the Commissioner if the taxpayer can establish a substantial business purpose for the change under paragraph (c) of this section and agrees to all of the applicable conditions set forth in paragraph (d) of this section.

(c) Substantial business purpose—(1) General rule. Except as provided in paragraph (c)(4) of this section, a taxpayer generally can establish a substantial business purpose under this paragraph (c) for a change of annual accounting period to any taxable year that meets the requirements of paragraph (c)(2) of this section. If more than one taxable year meets the requirements of paragraph (c)(2), however, a taxpayer can establish a substantial business purpose under this paragraph (c) only for a change to the year that yields the highest percentage when the percentages (rounded to the nearest 1/100 of a percent) obtained under paragraph (c)(2) of this section are averaged.

(2) Mechanical test. A taxable year meets the requirements of this paragraph (c)(2) only if, for the most recent 12-month period (determined at the time the statement or application required to effect or request the change is filed) ending with the last month of the requested taxable year and for each of the two preceding 12-month periods ending with the corresponding month—

(i) The gross receipts from sales or services for the last two months of such 12-month period equal or exceed 25 percent of—

(ii) The gross receipts from sales or services for such 12-month period.

(3) Special rules—(i) Gross receipts. For purposes of this section, gross receipts from sales or services shall be determined using the taxpayer's method of accounting.

(ii) 52-53-week taxable year. If the requested year is a 52-53-week taxable year, the calendar month ending nearest to the last day of the 52-53-week taxable year shall be treated for purposes of paragraph (c)(2) of this section as the last month of the requested year.

(iii) Taxpayers not in existence for three 12-month periods. If a taxpayer has not been in existence for the three 12-month periods described in paragraph (c)(2) of this section, the requirements of paragraph (c)(2) of this section may be satisfied by taking into account the gross receipts from sales and services of a predecessor organization (within the meaning of section 4.04 of Rev. Proc. 83-25) that was actively engaged in a trade or business at all times during the portion of the three applicable 12-month periods prior to the inception of the taxpayer. Thus, a taxpayer in existence for only the most recent applicable 12-month period may use the gross receipts of a predecessor organization for the two preceding 12-month periods.

(4) Exceptions. The following taxpayers cannot establish a substantial business purpose for a change of annual accounting period under this section solely by satisfying the requirements of this paragraph (c), and, thus, must secure the prior approval of the Commissioner to the change:

(i) A partner of a partnership;

(ii) A partnership in which any partner is a partnership or S corporation;

(iii) A beneficiary of a trust or estate;

(iv) A United States shareholder of a controlled foreign corporation; and

(v) A shareholder of a DISC or former DISC.

(5) Examples. The provisions of this paragraph (c) may be illustrated by the following examples.

Example (1). Assume that X, a calendar year corporation that is not described in paragraph (c)(4) of this section, wishes to change its annual accounting period to a fiscal year that ends on November 30. If the change is permitted under this section, the short period involved in the change would end on November 30, 1986. Under paragraph (f) of this section, X must attach a statement to its income tax return for the short period ending November 30, 1986, in order to effect the change. For purposes of paragraph (c)(2) of this section, the most recent 12-month period ending with the last month of the requested taxable year (November), determined as of the time the statement required to effect the change is filed, is the period that begins on December 1, 1985, and ends on November 30, 1986. The two preceding 12-month periods ending with the corresponding month are the periods from December 1, 1984, through November 30, 1985, and from December 1, 1983, through November 30, 1984.

Example (2). Assume that X, a calendar year corporation that is not described in paragraph (c)(4) of this section, wishes to change its annual accounting period to a fiscal year that ends on September 30. Assume that the most recent 12-month period determined under paragraph (c)(2) of this section is the period from October 1, 1985, through September 30, 1986, and that the two preceding 12-month periods are the periods from October 1, 1984, through September 30, 1985, and from October 1, 1983, through September 30, 1984.

Assume that the gross receipts from sales or services for the last two months of the 12-month periods ending on September 30, 1986, September 30, 1985, and September 30, 1984, are $3,500, $3,125, and $2,500, respectively. Assume further that the total gross receipts for the 12-month periods ending on September 30, 1986, September 30, 1985, and September 30,

1984, are $12,500, $12,000, and $10,000, respectively. The following percentages are obtained for the 12-month periods ending on September 30, 1986, September 30, 1985, and September 30, 1984, when the gross receipts for the last two months of each period are divided by the total gross receipts for that 12-month period: 28.00% ($3,500/$12,500), 26.04% ($3,125/$12,000), and 25.00% ($2,500/$10,000). Thus, the requirements of paragraph (c)(2) of this section are satisfied since each of those percentages equals or exceeds 25%.

Example (3). Assume the same facts as in example (2) except that X wishes to change its annual accounting period to a fiscal year that ends on July 31. In addition, assume that the percentages obtained for purposes of paragraph (c)(2) of this section with respect to a fiscal year that ends on July 31 are 26.00%, 25.00%, and 25.00%. Under paragraph (c)(1) of this section, X can establish a substantial business purpose only for a fiscal year that ends on September 30 since the average of the percentages obtained under paragraph (c)(2) of this section with respect to that year (26.35%) exceeds the average of the percentages obtained with respect to a fiscal year that ends on July 31 (25.33%).

(d) **Conditions.** The requirements of this section are in addition to any applicable conditions under sections 441, 442, 443, 706, and 1378. Thus, for example, a taxpayer must annualize income for the short period involved in a change of annual accounting period to which this section applies if required to do so under section 443(b). The following additional conditions apply under this section to any change of annual accounting period made by a corporation (other than an S corporation) without the prior approval of the Commissioner:

(1) If the taxpayer has a net operating loss as defined in section 172 for the short period involved in the change, that net operating loss must be deducted ratably over a six-year period beginning with the first taxable year after the short period unless—

(i) The net operating loss resulting from the short period is $10,000 or less, or

(ii) The net operating loss results from a short period of nine months or longer and is less than the net operating loss for a full 12-month period beginning with the first day of the short period.

(2) If the taxpayer has an unused credit for the short period, the taxpayer must carry the unused credit forward. Unused credits from the short period may not be carried back.

(3) The taxpayer may not make an election to be treated as an S corporation that would be effective for the taxable year immediately following the short period.

(e) **Prior approval of the Commissioner—(1) In general.** The Commissioner will not consider a request for approval to a change of annual accounting period under this section unless—

(i) The taxpayer is described in paragraph (c)(4) of this section and the taxable year to which the taxpayer wishes to change meets the requirements of paragraph (c)(1) of this section, or

(ii) The taxpayer has experienced a substantial acquisition or divestiture, as defined in paragraph (e)(2) of this section.

(2) **Substantial acquisition or divestiture—(i) In general.** For purposes of this paragraph (e), a taxpayer has not experienced a substantial acquisition or divestiture unless—

(A) The taxpayer has acquired or disposed of a block of assets on or after the first day of the taxable year immediately proceeding the short period involved in the change of annual accounting period,

(B) At all times during the applicable 12-month periods (as defined in paragraph (e)(2)(iii) of this section), including any period during which the assets were not held by the taxpayer, the assets were segregated, whether in a separate branch or division or otherwise, so that the gross receipts attributable to those assets can be identified, and

(C) The requirements of paragraph (e)(2)(ii) of this section are satisfied.

If a taxpayer has experienced a substantial acquisition or divestiture it is anticipated that the Commissioner will usually approve a change of annual accounting period to a taxable year that would meet the requirements of paragraph (c)(1) of this section if pro-forma gross receipts (i.e., gross receipts that would have resulted if the acquisition or divestiture had taken place at the beginning of the earliest applicable 12-month period) were substituted for the gross receipts described in paragraph (c)(2) of this section. The failure of a requested taxable year to meet the requirements of paragraph (c)(1) when pro-forma gross receipts are used, however, will not prevent the Commissioner from approving the change.

(ii) **Mechanical test.** A taxpayer has experienced a substantial acquisition or divestiture for purposes of this paragraph (e) only if—

(A) The aggregate of the gross receipts from sales and services (within the meaning of paragraph (c)(3)(i) of this section) for the applicable 12-month periods attributable to the acquired or divested assets (including receipts for any period during which the assets were not held by the taxpayer), exceeds 80 percent of—

(B) The aggregate of the gross receipts from sales and services (within the meaning of paragraph (c)(3)(i) of this section) of the taxpayer for the applicable 12-month periods, determined without taking into account the gross receipts from sales and services attributable to the acquired or divested assets.

(iii) Applicable 12-month periods. For purposes of this paragraph (e)(2), the term "applicable 12-month periods" means—

(A) In the case of an acquisition, the 12-month period described in paragraph (c)(2) of the section; and

(B) In the case of divestiture, the 12-month periods described in paragraph (c)(2) of this section that end before the date of the divestiture.

(iv) Example. The provisions of this paragraph (e) may be illustrated by the following example.

Example. Assume that X, a calendar year corporation, wishes to change its annual accounting period to a fiscal year ending October 31, 1986. Assume that on January 1, 1986, X acquired from corporation Y a block of assets that Y held in a separate division and that X also holds in a separate division. Assume that the most recent 12-month period described in paragraph (c)(2) of this section is the period that begins on November 1, 1985, and ends on October 31, 1986, and that the two preceding 12-month periods are the periods from November 1, 1984 through October 31, 1985, and from November 1, 1983, through October 31, 1984. Assume that the gross receipts attributable to the assets acquired from Y for the 12-month period ending October 31, 1986 (including the receipts attributable to the period from November 1, 1985, through December 31, 1985, when the assets were held by Y, and the receipts attributable to the period from January 1, 1986, through October 31, 1986, when the assets were held by X), are $8,000. In addition, assume that the gross receipts attributable to the assets acquired from Y for the 12-month periods ending October 31, 1985, and October 31, 1984, when the assets were held by Y, are $7,500, and $7,000, respectively. Assume further that X's gross receipts from sales and services for the 12-month period ending October 31, 1986, October 31, 1985, and October 31, 1984, without taking into account gross receipts attributable to the assets acquired from Y, are $10,000, $9,000, and $8,000, respectively. The requirements of paragraph (e)(2)(ii) of this section are satisfied since $22,500 ($8,000 + $7,500 + $7,000) exceeds 80 percent of $27,000 ($10,00 + $9,000 + $8,000). Thus, the Commissioner will consider X's request to change its taxable year to a fiscal year ending October 31, 1986.

(f) Procedures—(1) Changes not requiring the prior approval of the Commissioner. In order to effect a change that does not require the prior approval of the Commissioner under this section, a taxpayer must indicate that the requirements of this section are satisfied in a statement setting forth the computations required to establish a substantial business purpose under paragraph (c) of this section. The statement also must indicate that the taxpayer has agreed to all of the applicable conditions to the change, including any applicable conditions contained in § 1.441-3T. A taxpayer (other than an corporations seeking S status) must attach the statement to the income tax return for the short period involved in the change and, in addition, must type or legibly print the following caption at the top of page 1 of the return; "FILED UNDER § 1.442-2T (f)(1)." In the case of a corporation seeking S status, the statement must be attached to Form 2553 and the caption "FILED UNDER § 1.442-2T (f) (1)" must be typed or printed legibly at the top of page 1 of Form 2553.

(2) Changes requiring the prior approval of the Commissioner. In the case of a change of annual accounting period that requires the prior approval of the Commissioner under this section, a taxpayer must file Form 1128 or Form 2553, whichever is applicable. (See paragraph (e)(1) of this section for situations in which a request for approval will be considered.) The taxpayer must indicate that the application is filed under this paragraph (f)(2) by typing or printing legibly the following caption at the top of page 1 of the Form 1128 or Form 2553: "FILED UNDER § 1.442-2T (f)(2)." The taxpayer also must attach a statement to the applicable form setting forth the computations described in paragraph (c) of this section. In addition, a taxpayer described in paragraph (e)(1) (ii) of this section must attach a statement setting forth the computations described in paragraph (e) (2) of this section.

(3) Time for filing. (i) Except as otherwise provided in paragraph (f)(3) (ii) of this section, a taxpayer cannot change its annual accounting period under this section unless the return or form required to effect or request the change is filed by its due date (with extensions if the change is effected by filing an income tax return for the short period involved in the change).

(ii) A taxpayer may change its annual accounting period under this section if the due date (without regard to extensions) for the return or form required to effect or request the change is on or after September 30, 1986, and before March 9, 1987 and the return or form is filed before March 9, 1987 (or, in the case of a change effected by filing an income tax return for the short period involved in the change, if an application for extension is filed before March 9, 1987. This paragraph only extends the time for changing an annual accounting period and does not extend the time for making a S election. An S election that is timely filed before March 9, 1987, however, will not be denied or rendered ineffective solely by

reason of the need for the taxpayer to submit the information required by paragraph (f)(1) or (f)(2) of this section.

(iii) In the case of a change of annual accounting period under this section that is effected by filing an income tax return for the short period involved in the change, any failure to file a return or to pay tax on or before the due date for the return or the date prescribed for payment will be treated as due to reasonable cause and will not give rise to any addition to tax under section 6651 if—

(A) The due date for the return (without regard to extensions) or the date prescribed for payment is on or after September 30, 1986, and before March 9, 1987, and

(B) The return (or application for extension) is filed and the tax is paid before March 9, 1987.

(g) Effective date—(1) In general. This section shall apply to a change of annual accounting period (other than a change described in paragraph (g)(2) of this section) if—

(i) The income tax return for the short period involved in the change is filed after September 29, 1986, and

(ii) The short period involved in the change ends before January 5, 1987.

(2) Exceptions. This section shall not apply to a change of annual accounting period if the application required to effect or request the change was timely filed before September 30, 1986. In the case of a change that is effected by filing an income tax return for the short period involved in the change, this section shall not apply if an application for extension to file that return was filed before September 30, 1986, the application clearly stated the year to which the taxpayer intended to change, and the income tax return for the short period is timely filed (determined with regard to extensions).

(3) Hardship rule. A taxpayer can request a waiver from the provisions of this section if the taxpayer can demonstrate, to the satisfaction of the Commissioner, that the taxpayer would sustain a substantial hardship from the application of this section, and if the short period involved in the change ends on or before October 5, 1986. A waiver ordinarily will not be granted unless the taxpayer can show that, by October 5, 1986, the taxpayer had closed its books in a manner that indicates that the period in question was intended to be the end of the short period, taken a physical inventory (if applicable), and incurred substantial costs in modifying its accounting systems (including,) for example, costs of reprogramming applicable computer systems) in order to change its year. A request for a waiver under this paragraph (g)(3) must be filed with the Commissioner of Internal Revenue, 1111 Constitution Avenue, NW, Room 5040, Washington, DC 20224 by March 9, 1987. Any information submitted with the request for waiver shall be submitted under penalties of perjury.

(h) Anti-abuse rule—(1) In general. A taxpayer may not adopt any taxable year that has the effect of circumventing the provisions of this section. The provisions of this section are deemed to be circumvented if, for example, a taxpayer that is unable to change its taxable year under this section transfers a substantial portion of its net assets to a related person and the related person purportedly adopts the desired taxable year. In that case, purported adoption of the desired taxable year will not be given effect and the related person must adopt the same taxable year as that of the taxpayer that is unable to change its taxable year under this section. For this purpose, the term "related person" has the same meaning as in section 168(e)(4)(D) (as in effect prior to the enactment of the Tax Reform Act of 1986), except that the second sentence thereof (relating to the substitution of 10 percent for 50 percent in applying sections 267(b) and 707(b)(1)) shall be disregarded.

(2) Example. The provisions of paragraph (h)(1) of this section may be illustrated with the following example.

Example. Assume that X, a calendar year corporation, is subject to the restrictions on changes in annual accounting period under this section. Assume that X wishes to change its taxable year to a fiscal year ending November 30, 1986, but cannot do so because it does not meet the requirements of this section. Assume further that X creates corporation Y, a wholly-owned subsidiary of X, which purportedly adopts a taxable year ending November 30, 1986. In addition, assume that X transfers a substantial portion of its net assets to Y before November 30, 1986, in a transaction described in section 351 or 368. Under these facts, Y may not adopt a November 30 taxable year and instead must adopt a taxable year that ends on December 31, which is the taxable year of X.

[T.D. 8123, 52 FR 3619, Feb. 5, 1987]

§ 1.442–3T Special limitations on certain adoptions and retentions of a taxable year (temporary).

(a) Applicability. This section generally applies to—

(1) Any partnership that wishes to adopt a taxable year other than the calendar year, the

taxable year of its principal partners, or the taxable year to which all of its principal partners are concurrently changing, and

(2) Any corporation seeking S status that wishes to adopt or retain a taxable year other than the calendar year or a taxable year that meets the requirements of § 4.02 or 4.04 of Rev. Proc. 83-25, 1983-1 C.B. 689.

(b) General rule. A taxpayer to which this section applies may not adopt or retain a taxable year that results in any deferral of income to its partners or shareholders unless the taxpayer—

(1) Secures the prior approval of the Commissioner by establishing a substantial business purpose under paragraph (c)(2) of this section for the adoption or retention, or

(2) Is permitted to adopt or retain the taxable year without securing the prior approval of the Commissioner under paragraph (c)(1) of this section.

Thus, a taxpayer to which this section applies may not adopt or retain a taxable year that results in a deferral of income to its partners or shareholders under Rev. Proc. 72-51, 1972-2 C.B. 832, or § 4.03 of Rev. Proc. 83-25, 1983-1 C.B. 689.

(c) Substantial business purpose—(1) Prior approval of the Commissioner not needed. Notwithstanding § 1.706-1(b), § 1.442-1(b)(2), and 26 CFR 18.1378-1(a), a taxpayer to which this section applies may adopt or retain a taxable year that results in a deferral of income to its partners or shareholders without the prior approval of the Commissioner if the taxpayer can establish a substantial business purpose under § 1.442-2T(c). Thus, a taxpayer described in § 1.442-2T(c)(4) must secure the prior approval of the Commissioner to the adoption or retention even if the requirements of § 1.442-2T(c)(1) are satisfied. A taxpayer shall effect an adoption or retention permitted under this paragraph (c)(1) in the manner prescribed by § 1.442-2T(f)(1), except that the taxpayer's first income tax return shall be treated as the return for the short period involved in a change of annual accounting period.

(2) Prior approval of the Commissioner. In any case where the taxpayer was in existence for the three 12-month periods described in § 1.442-2T(c)(2), or where a predecessor organization (within the meaning of § 4.04 of Rev. Proc. 83-25) was actively engaged in a trade or business at all times during the portion of those three 12-month periods prior to the inception of the taxpayer, the Commissioner will consider a request for prior approval of an adoption or retention of a taxable year that results in a deferral of income to its partners or shareholders only if the taxpayer is described in § 1.442-2T(e). In such a case, the application for approval shall be filed in the manner prescribed by § 1.442-2T(f)(2). In any other case, the taxpayer must establish a substantial business purpose in order to obtain the prior approval of the Commissioner, and must file an application for approval in accordance with § 1.706-1(b) or 26 CFR 18.1378-1(a) (whichever is applicable) and § 1.442-1T(b)(1). For this purpose, the following factors generally will not be sufficient to establish a substantial business purpose:

(i) The use of a particular year for regulatory or financial accounting purposes;

(ii) The hiring patterns of a particular business (e.g., the fact that a firm typically hires staff during certain times of the year);

(iii) The use of a particular year for administrative purposes, such as for the admission or retirement of partners or shareholders, promotion of staff, and compensation or retirement arrangements with staff, partners, or shareholders; and

(iv) The fact that a particular business involves the use of price lists, model year, or other items that change on an annual basis.

(d) Time for filing. (1) Except as otherwise provided in paragraph (d)(2) of this section, a taxpayer cannot adopt or retain a taxable year under this section unless the return or form required to effect or request the adoption or retention is filed by its due date (with extensions if the adoption is effected by filing an income tax return for the taxpayer's first taxable year).

(2) A taxpayer may adopt or retain a taxable year under this section if the due date (without regard to extensions) for the return or form required to effect or request the adoption or retention is on or after November 6, 1986, and before March 9, 1987, and the return or form is filed before March 9, 1987 (or, in the case of an adoption effected by filing an income tax return for the taxpayer's first taxable year, if an application for extension is filed before March 9, 1987). This paragraph (d)(2) only extends the time for adopting or retaining a taxable year and does not extend the time for making an S election. An S election that is timely filed before March 9, 1987, however, will not be denied or rendered ineffective solely by reason of the need for the taxpayer to

submit the information required by paragraph (c) of this section.

(3) In the case of an adoption or retention of a taxable year under this section that is effected by filing an income tax return for the taxpayer's first taxable year, any failure to file a return or to pay tax on or before the due date for the return or the date prescribed for payment will be treated as due to reasonable cause and will not give rise to any addition to tax under section 6651 if—

(i) The due date for the return (without regard to extensions) or the date prescribed for payment is on or after November 6, 1986, and before March 9, 1987, and

(ii) The return (or application for extension) is filed and the tax is paid before March 9, 1987.

(e) **Effective date.** This section generally applies if the first taxable year of the partnership or the first taxable year for which the election to be an S corporation is effective begins before January 1, 1987, unless the application necessary to effect or request the adoption or retention was timely filed before November 6, 1986. This section shall not apply, however, to an adoption by a partnership of a taxable year that begins before January 1, 1986.

[T.D. 8123, 52 FR 3622, Feb. 5, 1987]

§ 1.443–1 Returns for periods of less than 12 months.

(a) **Returns for short period.** A return for a short period, that is, for a taxable year consisting of a period of less than 12 months, shall be made under any of the following circumstances:

(1) **Change of annual accounting period.** In the case of a change in the annual accounting period of a taxpayer, a separate return must be filed for the short period of less than 12 months beginning with the day following the close of the old taxable year and ending with the day preceding the first day of the new taxable year. However, such a return is not required for a short period of six days or less, or 359 days or more, resulting from a change from or to a 52–53-week taxable year. See section 441(f) and § 1.441–2. The computation of the tax for a short period required to effect a change of annual accounting period is described in paragraph (b) of this section. In general, a return for a short period resulting from a change of annual accounting period shall be filed and the tax paid within the time prescribed for filing a return for a tax day of the short period. For rules applicable to a subsidiary corporation which becomes a member of an affiliated group which files a consolidated return, see § 1.1502–76.

(2) **Taxpayer not in existence for entire taxable year.** If a taxpayer is not in existence for the entire taxable year, a return is required for the short period during which the taxpayer was in existence. For example, a corporation organized on August 1 and adopting the calendar year as its annual accounting period is required to file a return for the short period from August 1 to December 31, and returns for each calendar year thereafter. Similarly, a dissolving corporation which files its returns for the calendar year is required to file a return for the short period from January 1 to the date it goes out of existence. Income for the short period is not required to be annualized if the taxpayer is not in existence for the entire taxable year, and, in the case of a taxpayer other than a corporation, the deduction under section 151 for personal exemptions (or deductions in lieu thereof) need not be reduced under section 443(c). In general, the requirements with respect to the filing of returns and the payment of tax for a short period where the taxpayer has not been in existence for the entire taxable year are the same as for the filing of a return and the payment of tax for a taxable year of 12 months ending on the last day of the short period. Although the return of a decedent is a return for the short period beginning with the first day of his last taxable year and ending with the date of his death, the filing of a return and the payment of tax for a decedent may be made as though the decedent had lived throughout his last taxable year.

(b) **Computation of tax for short period on change of annual accounting period—(1) General rule.** (i) If a return is made for a short period resulting from a change of annual accounting period, the taxable income for the short period shall be placed on an annual basis by multiplying such income by 12 and dividing the result by the number of months in the short period. Unless section 443(b)(2) and subparagraph (2) of this paragraph apply, the tax for the short period shall be the same part of the tax computed on the annual basis as the number of months in the short period is of 12 months.

(ii) If a return is made for a short period of more than 6 days, but less than 359 days, resulting from a change from or to a 52–53-week taxable year, the taxable income for the short period shall be annualized and the tax computed on a daily basis, as provided in section 441(f)(2)(B)(iii) and paragraph (c)(5) of § 1.441–2.

(iii) For method of computation of income for a short period in the case of a subsidiary corporation required to change its annual accounting period to conform to that of its parent, see § 1.1502–76(b).

(iv) An individual taxpayer making a return for a short period resulting from a change of annual accounting period is not allowed to take the standard deduction provided in section 141 in computing his taxable income for the short period. See section 142(b)(3).

(v) In computing the taxable income of a taxpayer other than a corporation for a short period (which income is to be annualized in order to determine the tax under section 443(b)(1)) the personal exemptions allowed individuals under section 151 (and any deductions allowed other taxpayers in lieu thereof, such as the deduction under section 642(b)) shall be reduced to an amount which bears the same ratio to the full amount of the exemptions as the number of months in the short period bears to 12. In the case of the taxable income for a short period resulting from a change from or to a 52–53-week taxable year to which section 441(f)(2)(B)(iii) applies, the computation required by the preceding sentence shall be made on a daily basis, that is, the deduction for personal exemptions (or any deduction in lieu thereof) shall be reduced to an amount which bears the same ratio to the full deduction as the number of days in the short period bears to 365.

(vi) If the amount of a credit against the tax (for example, the credits allowable under section 34 (for dividends received on or before December 31, 1964), and 35 (for partially tax-exempt interest)) is dependent upon the amount of any item of income or deduction, such credit shall be computed upon the amount of the item annualized separately in accordance with the foregoing rules. The credit so computed shall be treated as a credit against the tax computed on the basis of the annualized taxable income. In any case in which a limitation on the amount of a credit is based upon taxable income, taxable income shall mean the taxable income computed on the annualized basis.

(vii) The provisions of this subparagraph may be illustrated by the following examples:

Example (1). A taxpayer with one dependent who has been granted permission under section 442 to change his annual accounting period files a return for the short period of 10 months ending October 31, 1956. He has income and deductions as follows:

Income			
Interest income			$10,000.00
Partially tax-exempt interest with respect to which a credit is allowable under section 35			500.00
Dividends to which sections 34 and 116 are applicable			750.00
			11,250.00
Deductions			
Real estate taxes			200.00
2 personal exemptions at $600 on an annual basis			1,200.00
The tax for the 10-month period is computed as follows:			
Total income as above			11,250.00
Less:			
Exclusion for dividends received		$50.00	
2 personal exemptions ($1,200 × 10/12)		1,000.00	
Real estate taxes		200.00	
			1,250.00
Taxable income for 10-month period before annualizing			10,000.00
Taxable income annualized (10,000 × 12/10)			12,000.00
Tax on $12,000 before credits			3,400.00
Deduct credits:			
Dividends received for 10-month period	$750.00		
Less: Excluded portion	50.00		
Included in gross income	700.00		
Dividend income annualized ($700 × 12/10)	840.00		
Credit (4 percent of $840)		33.60	
Partially tax-exempt interest included in gross income for 10-month period	500.00		
Partially tax-exempt interest (annualized) ($500 × 12/10)	600.00		
Credit (3 percent of $600)		18.00	
			51.60
Tax on $12,000 (after credits)			3,348.40
Tax for 10-month period ($3,348.40 × 10/12)			2,790.33

Example (2). The X Corporation makes a return for the one-month period ending September 30, 1956, because of a change in annual accounting period permitted under section 442. Income and expenses for the short period are as follows:

Gross operating income	$126,000
Business expenses	130,000
Net loss from operations	(4,000)
Dividends received from taxable domestic corporations	30,000
Gross income for short period before annualizing	26,000
Dividends received deduction (85 percent of $30,000, but not in excess of 85 percent of $26,000)	22,100
Taxable income for short period before annualizing	3,900
Taxable income annualized ($3,900 × 12)	46,800

Tax on annual basis:

$46,800 at 52 percent	$24,336	
Less surtax exemption	5,500	
		$18,836
Tax for 1-month period ($18,836 × 1/12)		1,570

Example (3). The Y Corporation makes a return for the six-month period ending June 30, 1957, because of a change in annual accounting period permitted under section 442. Income for the short period is as follows:

Taxable income exclusive of net long-term capital gain		$40,000
Net long-term capital gain		10,000
Taxable income for short period before annualizing		50,000
Taxable income annualized ($50,000 × 12/6)		100,000
Regular tax computation		
Taxable income annualized		100,000
Tax on annual basis:		
$100,000 at 52 percent	$52,000	
Less surtax exemption	5,500	
		46,500
Tax for 6-month period ($46,500 × 6/12)		23,250
Alternative tax computation		
Taxable income annualized		100,000
Less annualized capital gain ($10,000 × 12/6)		20,000
Annualized taxable income subject to partial tax		80,000
Partial tax on annual basis		
$60,000 at 52 percent	$41,600	
Less surtax exemption	5,500	
		36,100
25 percent of annualized capital gain ($20,000)		5,000
Alternative tax on annual basis		41,100
Alternative tax for 6-month period ($41,100 × 6/12)		20,550

Since the alternative tax of $20,550 is less than the tax computed in the regular manner ($23,250), the corporation's tax for the 6-month short period is $20,550.

(2) Exception: computation based on 12-month period. (i) A taxpayer whose tax would otherwise be computed under section 443(b)(1) (or section 441(f)(2)(B)(iii) in the case of certain changes from or to a 52–53-week taxable year) for the short period resulting from a change of annual accounting period may apply to the district director to have his tax computed under the provisions of section 443(b)(2) and this subparagraph. If such application is made, as provided in subdivision (v) of this subparagraph, and if the taxpayer establishes the amount of his taxable income for the 12-month period described in subdivision (ii) of this subparagraph, then the tax for the short period shall be the greater of the following—

(a) An amount which bears the same ratio to the tax computed on the taxable income which the taxpayer has established for the 12-month period as the taxable income computed on the basis of the short period bears to the taxable income for such 12-month period; or

(b) The tax computed on the taxable income for the short period without placing the taxable income on an annual basis.

However, if the tax computed under section 443(b)(2) and this subparagraph is not less than the tax for the short period computed under section 443(b)(1) (or section 441(f)(2)(B)(iii) in the case of certain changes from or to a 52–53-week taxable year), then section 443(b)(2) and this subparagraph do not apply.

(ii) The term "12-month period" referred to in subdivision (i) of this subparagraph means the 12-month period beginning on the first day of the short period. However, if the taxpayer is not in existence at the end of such 12-month period, or if the taxpayer is a corporation which has disposed of substantially all of its assets before the end of such 12-month period, the term "12-month period" means the 12-month period ending at the close of the last day of the short period. For the purposes of the preceding sentence, a corporation which has ceased business and distributed so much of the assets used in its business that it cannot resume its customary operations with the remaining assets, will be considered to have disposed of substantially all of its assets. In the case of a change from a 52–53-week taxable year, the term "12-month period" means the period of 52 or 53 weeks (depending on the taxpayer's 52–53-week taxable year) beginning on the first day of the short period.

(iii)(a) The taxable income for the 12-month period is computed under the same provisions of law as are applicable to the short period and is computed as if the 12-month period were an actual annual accounting period of the taxpayer. All items which fall in such 12-month period must be included even if they are extraordinary in amount or of an unusual nature. If the taxpayer is a member of a partnership, his taxable income for the 12-month period shall include his distributive share of partnership income for any taxable year of the partnership ending within or with such 12-month period, but no amount shall be included with respect to a taxable year of the partnership ending before or after such 12-month period. If any other item partially applicable to such 12-month period can be determined only at the end of a taxable year which includes only part of the 12-month period, the taxpayer, subject to review by the Commissioner, shall apportion such item to the 12-month period in such manner as will most clearly reflect income for the 12-month period.

(b) In the case of a taxpayer permitted or required to use inventories, the cost of goods sold during a part of the 12-month period included in a taxable year shall be considered, unless a more exact determination is available, as such part of the cost of goods sold during the entire taxable year as the gross receipts from sales for such part of the 12-month period is of the gross receipts from sales for the entire taxable year. For example, the 12-month period of a corporation engaged in the sale of merchandise, which has a short period from January 1, 1956, to September 30, 1956, is the calendar year 1956. The three-month period, October 1, 1956, to December 31, 1956, is part of the taxpayer's taxable year ending September 30, 1957. The cost of goods sold during the three-month period, October 1, 1956, to December 31, 1956, is such part of the cost of goods sold during the entire fiscal year ending September 30, 1957, as the gross receipts from sales for such three-month period are of the gross receipts from sales for the entire fiscal year.

(c) The Commissioner may, in granting permission to a taxpayer to change his annual accounting period, require, as a condition to permitting the change, that the taxpayer must take a closing inventory upon the last day of the 12-month period if he wishes to obtain the benefits of section 443(b)(2). Such closing inventory will be used only for the purposes of section 443(b)(2), and the taxpayer will not be required to use such inventory in computing the taxable income for the taxable year in which such inventory is taken.

(iv) The provisions of this subparagraph may be illustrated by the following examples:

Example (1). The taxpayer in example (1) under paragraph (b)(1)(vii) of this section establishes his taxable income for the 12-month period from January 1, 1956, to December 31, 1956. The taxpayer has a short period of 10 months, from January 1, 1956, to October 31, 1956. The taxpayer files an application in accordance with subdivision (v) of this subparagraph to compute his tax under section 443(b)(2). The taxpayer's income and deductions for the 12-month period, as so established, follow:

Income

Interest income	$11,000
Partially tax-exempt interest with respect to which a credit is allowable under section 35	600
Dividends to which sections 34 and 116 are applicable	850
	12,450

Deductions

Real estate taxes	200
2 personal exemptions at $600	1,200

Tax computation for short period under section 443(b)(2)(A)(i)

Total income as above		$12,450
Less:		
Deductions		
Exclusion for dividends received	$50	
Personal exemptions	1,200	
Deduction for taxes	200	
		1,450
Taxable income for 12-month period		11,000
Tax before credits		3,020
Credit for partially tax-exempt interest (3 percent of $600)	18	
Credit for dividends received (4 percent of ($850–50))	32	
		50
Tax under section 443(b)(2)(A)(i) for 12-month period		2,970
Taxable income for 10-month short period from example (1) of paragraph (b)(1)(vii) of this section before annualizing		10,000
Tax for short period under section 443(b)(2)(A)(i) ($2,970 × $10,000 (taxable income for short period)/$11,000 (taxable income for 12-month period))		2,700

Tax computation for short period under section 443(b)(2)(A)(ii)

Total income for 10-month short period		$11,250
Less:		
Exclusion for dividends received	50	
2 personal exemptions	1,200	
Real estate taxes	200	
		1,450
Taxable income for short period without annualizing and without proration of personal exemptions		9,800
Tax before credits		2,572
Less credits:		
Partially tax-exempt interest (3 percent of $500)	15	
Dividends received (4 percent of ($750 – 50))	28	
		43
Tax for short period under section 443(b)(2)(A)(ii)		2,529

The tax of $2,700 computed under section 443(b)(2)(A)(i) is greater than the tax of $2,529, computed under section 443(b)(2)(A)(ii), and is, therefore, the tax under section 443(b)(2). Since the tax of $2,700 (computed under section 443(b)(2)) is less than the tax of $2,790.33 (computed under section 443(b)(1)) on the annualized income of the short period (see example (1) of paragraph (b)(1)(vii) of this section), the taxpayer's tax for the 10-month short period is $2,700.

Example (2). Assume the same facts as in example (1) of this subdivision, except that, during the month of November 1956, the taxpayer suffered a casualty loss of $5,000. The tax computation for the short period under section 443(b)(2) would be as follows:

Tax computation for short period under section 443(b)(2)(A)(i)

Taxable income for 12-month period from example (1)		$11,000
Less: Casualty loss		5,000
Taxable income for 12-month period		6,000
Tax before credits	$1,360	
Credits from example (1)	50	

Tax under section 443(b)(2)(A)(i) for 12-month period	1,310	
Tax for short period ($1,310 × $10,000/$6,000) under section 443(b)(2)(A)(i)	2,183	

Tax computotion for short period under section 443(b)(2)(A)(ii)

Total income for the short period	11,250	
Less:		
Exclusion for dividends received	50	
2 personal exemptions	1,200	
Real estate taxes	200	
		1,450
Taxable income for short period without annualizing and without proration of personal exemptions		$9,800
Tax before credits		2,572
Less credits:		
Partially tax-exempt interest (3 percent of $500)	15	
Dividends received (4 percent of ($750 − 50))	28	
		43
Tax for short period under section 443(b)(2)(A)(ii)		2,529

The tax of $2,529, computed under section 443(b)(2)(A)(ii) is greater than the tax of $2,183 computed under section 443(b)(2)(A)(i) and is, therefore, the tax under section 443(b)(2). Since this tax is less than the tax of $2,790.33, computed under section 443(b)(1) (see example (1) of paragraph (b)(1)(vii) of this section), the taxpayer's tax for the 10-month short period is $2,529.

(v)(a) A taxpayer who wishes to compute his tax for a short period resulting from a change of annual accounting period under section 443(b)(2) must make an application therefor. Except as provided in (b) of this subdivision, the taxpayer shall first file his return for the short period and compute his tax under section 443(b)(1). The application for the benefits of section 443(b)(2) shall subsequently be made in the form of a claim for credit or refund. The claim shall set forth the computation of the taxable income and the tax thereon for the 12-month period and must be filed not later than the time (including extensions) prescribed for filing the return for the taxpayer's first taxable year which ends on or after the day which is 12 months after the beginning of the short period. For example, assume that a taxpayer changes his annual accounting period from the calendar year to a fiscal year ending September 30, and files a return for the short period from January 1, 1956, to September 30, 1956. His application for the benefits of section 443(b)(2) must be filed not later than the time prescribed for filing his return for his first taxable year which ends on or after the last day of December 1956, the twelfth month after the beginning of the short period. Thus, the taxpayer must file his application not later than the time prescribed for filing the return for his fiscal year ending September 30, 1957. If he obtains an extension of time for filing the return for such fiscal year, he may file his application during the period of such extension. If the district director determines that the taxpayer has established the amount of his taxable income for the 12-month period, any excess of the tax paid for the short period over the tax computed under section 443(b)(2) will be credited or refunded to the taxpayer in the same manner as in the case of an overpayment.

(b) If at the time the return for the short period is filed, the taxpayer is able to determine that the 12-month period ending with the close of the short period (see section 443(b)(2)(B)(ii) and subparagraph (2)(ii) of this paragraph) will be used in the computations under section 443(b)(2), then the tax on the return for the short period may be determined under the provisions of section 443(b)(2). In such case, a return covering the 12-month period shall be attached to the return for the short period as a part thereof, and the return and attachment will then be considered as an application for the benefits of section 443(b)(2).

(c) Adjustment in deduction for personal exemption. For adjustment in the deduction for personal exemptions in computing the tax for a short period resulting from a change of annual accounting period under section 443(b)(1) (or under section 441(f)(2)(B)(iii) in the case of certain changes from or to a 52–53-week taxable year), see paragraph (b)(1)(v) of this section.

(d) Adjustments in exclusion of computing minimum tax for tax preferences. (1) If a return is made for a short period on account of any of the reasons specified in subsection (a) of section 443, the $30,000 amount specified in section 56 (relating to minimum tax for tax preferences), modified as provided by section 58 and the regulations thereunder, shall be reduced to the amount which bears the same ratio to such specified amount as the number of days in the short period bears to 365.

(2) **Example.** The provisions of this paragraph may be illustrated by the following example:

Example. A taxpayer who is an unmarried individual has been granted permission under section 442 to change his annual accounting period files a return for the short period of 4 months ending April 30, 1970. The $30,000 amount specified in section 56 is reduced as follows:

$$(^{120}/_{365}) \times \$30{,}000 = \$9{,}835.89.$$

(e) Cross references. For inapplicability of section 443(b) and paragraph (b) of this section in computing—

(1) Accumulated earnings tax, see section 536 and the regulations thereunder;

(2) Personal holding company tax, see section 546 and the regulations thereunder;

(3) Undistributed foreign personal holding company income, see section 557 and the regulations thereunder;

(4) The taxable income of a regulated investment company, see section 852(b)(2)(E) and the regulations thereunder; and

(5) The taxable income of a real estate investment trust, see section 857(b)(2)(C) and the regulations thereunder.

[T.D. 8208, 53 FR 19693, May 27, 1988]

§ 1.444–1T Election to use a taxable year other than the required taxable year (temporary).

(a) General rules—(1) Year other than required year. Except as otherwise provided in this section and § 1.444-2T, a partnership, S corporation, or personal service corporation (as defined in § 1.441-4T(d)) may make or continue an election (a "section 444 election") to have a taxable year other than its required taxable year. See paragraph (b) of this section for limitations on the taxable year that may be elected. See § 1.444-2T for rules that generally prohibit a partnership, S corporation, or personal service corporation that is a member of a tiered structure from making or continuing a section 444 election. See § 1.444-3T for rules explaining how and when to make a section 444 election.

(2) Effect of section 444 election—(i) In general. A partnership or S corporation that makes or continues a section 444 election shall file returns and make payments as required by §§ 1.7519-1T and 1.7519-2T. A personal service corporation that makes or continues a section 444 election is subject to the deduction limitation of § 1.280H-1T.

(ii) Duration of section 444 election. A section 444 election shall remain in effect until the election is terminated pursuant to paragraph (a)(5) of this section.

(3) Section 444 election not required for certain years. A partnership, S corporation, or personal service corporation is not required to make a section 444 election to use—

(i) A taxable year for which such entity establishes a business purpose to the satisfaction of the Commissioner (i.e., approved under section 4 or 6 of Rev. Proc. 87-32, 1987-28 I.R.B. 14, or any successor revenue ruling or revenue procedure), or

(ii) A taxable year that is a "grandfathered fiscal year," within the meaning of section 5.01(2) of Rev. Proc. 87-32 or any successor revenue ruling or revenue procedure.

Although a partnership, S corporation or personal service corporation qualifies to use a taxable year described in paragraph (a)(3) (i) or (ii) of this section, such entity may, if otherwise qualified, make a section 444 election to use a different taxable year. Thus, for example, assume that a personal service corporation that historically used a January 31 taxable year established to the satisfaction of the Commissioner, under section 6 of Rev. Proc. 87-32, a business purpose to use a September 30 taxable year for its taxable year beginning February 1, 1987. Pursuant to this paragraph (a)(3), such personal service corporation may use a September 30 taxable year without making a section 444 election. However, the corporation may, if otherwise qualified, make a section 444 election to use a year ending other than September 30 for its taxable year beginning February 1, 1987.

(4) Required taxable year. For purposes of this section, the term "required taxable year" means the taxable year determined under section 706(b), 1378, or 441(i) without taking into account any taxable year which is allowable either—

(i) By reason of business purpose (i.e., approved under section 4 or 6 of Rev. Proc. 87-32 or any successor revenue ruling or procedure), or

(ii) As a "grandfathered fiscal year" within the meaning of section 5.01(2) of Rev. Proc. 87-32, or any successor revenue ruling or procedure.

(5) Termination of section 444 election—(i) In general. A section 444 election is terminated when—

(A) A partnership, S corporation, or personal service corporation changes to its required taxable year; or

(B) A partnership, S corporation, or personal service corporation liquidates (including a deemed liquidation of a partnership under § 1.708-1 (b)(1)(iv)); or

(C) A partnership, S corporation, or personal service corporation willfully fails to comply with the requirements of section 7519 or 280H, whichever is applicable; or

(D) A partnership, S corporation, or personal service corporation becomes a member of a tiered structure (within the meaning of § 1.444-2T), unless it is a partnership or S corporation that meets the same taxable year exception under § 1.444-2T (e); or

(E) An S corporation's S election is terminated; or

(F) A personal service corporation ceases to be a personal service corporation.

However, if a personal service corporation, that has a section 444 election in effect, elects to be an S corporation, the S corporation may continue the section 444 election of the personal service corporation. Similarly, if an S corporation that has a section 444 election in effect terminates its S election and immediately becomes a personal service corporation, the personal service corporation may continue the section 444 election of the S corporation. If a section 444 election is terminated under this paragraph (a)(5), the partnership, S corporation, or personal service corporation may not make another section 444 election for any taxable year.

(ii) Effective date of termination. A termination of a section 444 election shall be effective—

(A) In the case of a change to the required year, on the first day of the short year caused by the change;

(B) In the case of a liquidating entity, on the date the liquidation is completed for tax purposes;

(C) In the case of willful failure to comply, on the first day of the taxable year (determined as if a

section 444 election had never been made) determined in the discretion of the District Director;

(D) In the case of membership in a tiered structure, on the first day of the taxable year in which the entity is considered to be a member of a tiered structure, or such other taxable year determined in the discretion of the District Director;

(E) In the case of termination of S status, on the first day of the taxable year for which S status no longer exists;

(F) In the case of a personal service corporation that changes status, on the first day of the taxable year, for which the entity is no longer a personal service corporation.

In the case of a termination under this paragraph (a)(5) that results in a short taxable year, an income tax return is required for the short period. In order to allow the Service to process the affected income tax return in an efficient manner, a partnership, S corporation, or personal service corporation that files such a short period return should type or legibly print at the top of the first page of the income tax return for the short taxable year—"SECTION 444 ELECTION TERMINATED." In addition, a personal service corporation that changes its taxable year to the required taxable year is required to annualize its income for the short period.

(iii) Example. The provisions of paragraph (a)(5)(ii) of this section may be illustrated by the following example.

Example. Assume a partnership that is 100 percent owned, at all times, by calendar year individuals has historically used a June 30 taxable year. Also assume the partnership makes a valid section 444 election to retain a year ending June 30 for its taxable year beginning July 1, 1987. However, for its taxable year beginning July 1, 1988, the partnership changes to a calendar year, its required year. Based on these facts, the partnership's section 444 election is terminated on July 1, 1988, and the partnership must file a short period return for the period July 1, 1988-December 31, 1988. Furthermore, pursuant to § 1.702-3T(a)(1), the partners in such partnership are not entitled to a 4-year spread with respect to partnership items of income and expense for the taxable year beginning July 1, 1988 and ending December 31, 1988.

(iv) Special rule for entity that liquidates or is sold prior to making a section 444 election, required return, or required payment. A partnership, S corporation, or personal service corporation that is liquidated or sold for tax purposes before a section 444 election, required return, or required payment is made for a particular year may, nevertheless, make or continue a section 444 election, if otherwise qualified. (See §§ 1.7519-2T (a)(2) and 1.7519-1T (a)(3), respectively, for a description of the required return and a definition of the term "required payment.") However, the partnership, S corporation, or personal service corporation (or a trustee or agent thereof) must comply with the requirements for making or continuing a section 444 election. Thus, if applicable, required payments must be made and a subsequent claim for refund must be made in accordance with § 1.7519-2T(a)(6). The following examples illustrate the application of this paragraph (a)(5)(iv).

Example (1). Assume an existing S corporation historically used a June 30 taxable year and desires to make a section 444 election for its taxable year beginning July 1, 1987. Assume further that the S corporation is liquidated for tax purposes on February 15, 1988. If otherwise qualified, the S corporation (or a trustee or agent thereof) may make a section 444 election to have a taxable year beginning July 1, 1987, and ending February 15, 1988. However, if the S corporation makes a section 444 election, it must comply with the requirements for making a section 444 election, including making required payments.

Example (2). The facts are the same as in example (1), except that instead of liquidating on February 15, 1988, the shareholders of the S corporation sell their stock to a corporation on February 15, 1988. Thus, the corporation's S election is terminated on February 15, 1988. If otherwise qualified, the corporation may make a section 444 election to have a taxable year beginning July 1, 1987, and ending February 14, 1988.

Example (3). The facts are the same as in example (2), except that the new shareholders are individuals. Furthermore, the corporation's S election is not terminated. Based on these facts, the S corporation, if otherwise qualified, may make a section 444 election to retain a year ending June 30 for its taxable year beginning July 1, 1987. Furthermore, the S corporation may, if otherwise qualified, continue its section 444 election for subsequent taxable years.

(6) Re-activating certain S elections—(i) Certain corporations electing S status that did not make a back-up calendar year request. If a corporation that timely filed Form 2553, Election by a Small Business Corporation, effective for its first taxable year beginning in 1987—

(A) Requested a fiscal year based on business purpose,

(B) Did not agree to use a calendar year in the event its business purpose request was denied, and

(C) Such business purpose request is denied or withdrawn,

such corporation may retroactively re-activate its S election by making a valid section 444 election for its first taxable year beginning in 1987 and complying with the procedures in paragraph (a)(6)(iii) of this section.

(ii) Certain corporations that revoked their S status. If a corporation that used a fiscal year revoked its S election (pursuant to section 1362(d)(1)) for its first taxable year beginning in 1987, such corporation may retroactively re-activate its S election (i.e. rescind its revocation) by

making a valid section 444 election for its first taxable year beginning in 1987 and complying with the procedures in paragraph (a)(6)(iii) of this section.

(iii) Procedures for re-activating an S election. A corporation re-activating its S election pursuant to paragraph (a)(6) (i) or (ii) of this section must—

(A) Obtain the consents of all shareholders who have owned stock in the corporation since the first day of the first taxable year of the corporation beginning after December 31, 1986,

(B) Include the following statement at the top of the first page of the corporation's Form 1120S for its first taxable year beginning in 1987—"SECTION 444 ELECTION—RE-ACTIVATES S STATUS," and

(C) Include the following statement with Form 1120S—RE-ACTIVATION CONSENTED TO BY ALL SHAREHOLDERS WHO HAVE OWNED STOCK AT ANY TIME SINCE THE FIRST DAY OF THE FIRST TAXABLE YEAR OF THIS CORPORATION BEGINNING AFTER DECEMBER 31, 1986."

(iv) Examples. The provisions of this paragraph (a)(6) may be illustrated by the following examples.

Example (1). Assume a corporation historically used a June 30 taxable year and such corporation timely filed Form 2553, Election by a Small Business Corporation, to be effective for its taxable year beginning July 1, 1987. On its Form 2553, the corporation requested permission to retain its June 30 taxable year based on business purpose. However, the corporation did not agree to use a calendar year in the event its business purpose request was denied. On April 1, 1988, the Internal Revenue Service notified the corporation that its business purpose request was denied and therefore the corporation's S election was not effective. Pursuant to paragraph (a)(6)(i) of this section, the corporation may re-activate its S election by making a valid section 444 election and complying with the procedures in paragraph (a)(6)(iii) of this section.

Example (2). The facts are the same as in example (1), except that as of July 26, 1988, the Internal Revenue Service has not yet determined whether the corporation has a valid business purpose to retain a June 30 taxable year. Based on these facts, the corporation may, if otherwise qualified, make a back-up section 444 election as provided in § 1.444-3T(b)(4). If the corporation's business purpose request is subsequently denied, the corporation should follow the procedures in §1.444-3T(b)(4)(iii) for activating a back-up section 444 election rather than the procedures provided in this paragraph (a)(6 for re-activating an S election.

Example (3). Assume a corporation has historically been an S corporation with a March 31 taxable year. However, for its taxable year beginning April 1, 1987, the corporation revoked its S election pursuant to section 1362 (d)(1). Pursuant to paragraph (a)(6)(ii) of this section, such corporation may retroactively rescind its S election revocation by making a valid section 444 election for its taxable year beginning April 1, 1987, and complying with the procedures provided in paragraph (a)(6)(iii) of this section. If the corporation retroactively rescinds its S revocation, the corporation shall file a Form 1120S for its taxable year beginning April 1, 1987.

(b) Limitation on taxable years that may be elected—(1) General rule. Except as provided in paragraphs (b)(2) and (3) of this section, a section 444 election may be made only if the deferral period (as defined in paragraph (b)(4) of this section) of the taxable year to be elected is not longer than three months.

(2) Changes in taxable year—(i) In general. In the case of a partnership, S corporation, or personal service corporation changing its taxable year, such entity may make a section 444 election only if the deferral period of the taxable year to be elected is not longer than the shorter of—

(A) Three months, or

(B) The deferral period of the taxable year that is being changed, as defined in paragraph (b)(2)(iii) of this section.

(ii) Special rule for certain existing corporations electing S status. If a corporation with a taxable year other than the calendar year—

(A) Elected after September 18, 1986, and before January 1, 1988, under section 1362 of the Code to be an S corporation, and

(B) Elected to have the calendar year as the taxable year of the S corporation,

then, for taxable years beginning before 1989, paragraph (b)(2)(i) of this section shall be applied by taking into account the deferral period of the last taxable year of the corporation prior to electing to be an S corporation, rather than the deferral period of the taxable year that is being changed. Thus, the provisions of the preceding sentence do not apply to a corporation that elected to be an S corporation for its first taxable year.

(iii) Deferral period of the taxable year that is being changed. For purposes of paragraph (b)(2)(i)(B) of this section, the phrase "deferral period of the taxable year that is being changed" means the deferral period of the taxable year immediately preceding the taxable year for which the taxpayer desires to make a section 444 election. Furthermore, the deferral period of such year will be determined by using the required taxable year of the taxable year for which the taxpayer desires to make a section 444 election. For example, assume P, a partnership that has historically used a March 31 taxable year, desires to change to a September 30 taxable year by making a section 444 election for its taxable year

beginning April 1, 1987. Furthermore, assume that pursuant to paragraph (a)(4) of this section, P's required taxable year for the taxable year beginning April 1, 1987 is a year ending December 31. Based on these facts the deferral period of the taxable year being changed is nine months (the period from March 31 to December 31).

(iv) Examples. See paragraph (d)(1) of this section for examples that illustrate the provisions of this paragraph (b)(2).

(3) Special rule for entities retaining 1986 taxable year. Notwithstanding paragraph (b)(2) of this section, a partnership, S corporation, or personal service corporation may, for its first taxable year beginning after December 31, 1986, if otherwise qualified, make a section 444 election to have a taxable year that is the same as the entity's last taxable year beginning in 1986. See paragraph (d)(2) of this section for examples that illustrate the provisions of this paragraph (b)(3).

(4) Deferral period—(i) Retentions of taxable year. For a partnership, S corporation, or personal service corporation that desires to retain its taxable year by making a section 444 election, the term "deferral period" means the months between the beginning of such year and the close of the first required taxable year (as defined in paragraph (a)(4) of this section). The following example illustrates the application of this paragraph (b)(4)(i).

Example. AB partnership has historically used a taxable year ending July 31. AB desires to retain its July 31 taxable year by making a section 444 election for its taxable year beginning August 1, 1987. Calendar year individuals, A and B, each own 50 percent of the profits and capital of AB; thus, under paragraph (a)(4) of this section AB's required taxable year is the year ending December 31. Pursuant to this paragraph (b)(4)(i), if AB desires to retain its year ending July 31, the deferral period is five months (the months between July 31 and December 31).

(ii) Adoptions of and changes in taxable year—(A) In general. For a partnership, S corporation, or personal service corporation that desires to adopt or change its taxable year by making a section 444 election, the term "deferral period" means the months that occur after the end of the taxable year desired under section 444 and before the close of the required taxable year.

(B) Special rule. If a partnership, S corporation or personal service corporation is using the required taxable year as its taxable year, the deferral period is deemed to be zero.

(C) Examples. The provisions of this paragraph (b)(4)(ii) may be illustrated by the following examples.

Example (1). Assume that CD partnership has historically used the calendar year and that CD's required taxable year is the calendar year. Under the special rule provided in paragraph (b)(4)(ii)(B) of this section, CD's deferral period is zero. See paragraph (b)(2)(i) of this section for rules that preclude CD from making a section 444 election to change its taxable year.

Example (2). E, a newly formed partnership, began operations on December 1, 1987, and is owned by calendar year individuals. E desires to make a section 444 election to adopt a September 30 taxable year. E's required taxable year is December 31. Pursuant to paragraph (b)(4)(ii)(A) of this section E's deferral period for the taxable year beginning December 1, 1987, is three months (the number of months between September 30 and December 31).

Example (3). Assume that F, a personal service corporation, has historically used a June 30 taxable year. F desires to make a section 444 election to change to an August 31 taxable year, effective for its taxable year beginning July 1, 1987. For purposes of determining the availability of a section 444 election for changing to the taxable year ending August 31, the deferral period of an August 31 taxable year is four months (the number of months between August 31 and December 31). The deferral period for F's existing June 30 taxable year is six months (the number of months between June 30 and December 31). Pursuant to § 1.444-1T(b)(2)(i), F may not make a section 444 election to change to an August 31 taxable year.

(5) Miscellaneous rules—(i) Special rule for determining the taxable year of a corporation electing S status. For purposes of this section, and only for purposes of this section, a corporation that elected to be an S corporation for a taxable year beginning in 1987 or 1988 and which elected to be an S corporation prior to September 26, 1988, will not be considered to have adopted or changed its taxable year by virtue of information included on Form 2553, Election by a Small Business Corporation. See example (8) in paragraph (d) of this section.

(ii) Special procedure for cases where an income tax return is superseded—(A) In general. In the case of a partnership, S corporation, or personal service corporation that filed an income tax return for its first taxable year beginning after December 31, 1986, but subsequently makes a section 444 election that would result in a different year end for such taxable year, the income tax return filed pursuant to the section 444 election will supersede the original return. However, any payments of income tax made with respect to such superseded return will be credited to the taxpayer's superseding return and the taxpayer may file a claim for refund for such payments. See examples (5) and (7) in paragraph (d)(2) of this section.

(B) Procedure for superseding return. In order to allow the Service to process the affected income tax returns in an efficient manner, a partnership, S corporation, or personal service corporation that desires to supersede an income tax return in ac-

cordance with paragraph (b)(5)(ii)(A) of this section, should type or legibly print at the top of the first page of the income tax return for the taxable year elected—"SECTION 444 ELECTION—SUPERSEDES PRIOR RETURN."

(iii) Anti-abuse rule—If an existing partnership, S corporation or personal service corporation ("predecessor entities"), or the owners thereof, transfer assets to a related party and the principal purpose of such transfer is to—

(A) Create a deferral period greater than the deferral period of the predecessor entity's taxable year, or

(B) Make a section 444 election following the termination of the predecessor entity's section 444 election, then such transfer will be disregarded for purposes of section 444 and this section, even if the deferral created by such change is effectively eliminated by a required payment (within the meaning of section 7519) or deferral of a deduction (to a personal service corporation under section 280H). The following example illustrates the application of this paragraph (b)(5)(iii).

Example. Assume that P1 is a partnership that historically used the calendar year and is owned by calendar year partners. Assume that P1 desires to make a section 444 election to change to a September year for the taxable year beginning January 1, 1988. P1 may not make a section 444 election to change taxable years under section 444(b)(2) because its current deferral period is zero. Assume further that P1 transfers a substantial portion of its assets to a newly-formed partnership (P2), which is owned by the partners of P1. Absent paragraph (b)(5)(iii) of this section, P2 could, if otherwise qualified, make a section 444 election under paragraph (b)(1) of this section to use a taxable year with a three month or less deferral period (i.e., a September 30, October 31, or November 30 taxable year). However, if the principal purpose of the asset transfer was to create a one-, two-, or three-month deferral period by P2 making a section 444 election, the section 444 election shall not be given effect, even if the deferral would be effectively eliminated by P2 making a required payment under section 7519.

(iv) Special rules for partial months and 52-53-week taxable years. Except as otherwise provided in § 1.280H-1T(c)(2)(i)(A), for purposes of this section and §§ 1.7519-1T, 1.7519-2T and 1.280H-1T—

(A) A month of less than 16 days is disregarded, and a month of more than 15 days is treated as a full month; and

(B) A 52-53-week taxable year with reference to the end of a particular month will be considered to be the same as a taxable year ending with reference to the last day of such month.

(c) Effective date. This section is effective for taxable years beginning after December 31, 1986.

(d) Examples—(1) Changes in taxable year. The following examples illustrate the provisions of paragraph (b)(2) of this section.

Example (1). A is a personal service corporation that historically used a June 30 taxable year. A desires to make a section 444 election to change to an August 31 taxable year, effective with its taxable year beginning July 1, 1987. Under paragraph (b)(4)(ii) of this section, the deferred period of the taxable year to be elected is four months (the number of months between August 31 and December 31). Furthermore, the deferral period of the taxable year that is being changed is six months (the number of months between June 30 and December 31). Pursuant to paragraph (b)(2)(i) of this section, a taxpayer may, if otherwise qualified, make a section 444 election to change to a taxable year only if the deferral period of the taxable year to be elected is not longer than the shorter of three months or the deferred period of the taxable year being changed. Since the deferral period of the taxable year to be elected (August 31) is greater than three months, A may not make a section 444 election to change to the taxable year ending August 31, However, since the deferral period of the taxable year that is being changed is three months or more, A may, if otherwise qualified, make a section 444 election to change to a year ending September 30, 1987 (three-month deferral period), a year ending October 31, 1987 (two-month deferral period), or a year ending November 30, 1987 (one-month deferral period). In addition, instead of making a section 444 election to change its taxable year, A could, if otherwise qualified, make a section 444 election to retain its June end, pursuant to paragraph (b)(3) of this section.

Example (2). B, a corporation that historically used an August 31 taxable year, elected on November 1, 1986 to be an S corporation for its taxable year beginning September 1, 1986. As a condition to having the S election accepted, B agreed on Form 2553 to use calendar year. Pursuant to the general effective date provided in paragraph (c) of this section, B may not make a section 444 election for its taxable year beginning in 1986. Thus, B must file a short period income tax return for the period September 1 to December 31, 1986.

Example (3). The facts are the same as in example (2), except that B desires to make a section 444 election for its taxable year beginning January 1, 1987. Absent paragraph (b)(2)(ii) of this section, B would not be allowed to change its taxable year because the deferral period of the taxable year being changed (i.e., the calendar year) is zero. However, pursuant to the special rule provided in paragraph (b)(2)(ii) of this section, B shall apply paragraph (b)(2)(i) of this section by taking into account the deferral period of the last taxable year of B prior to B's election to be an S corporation (four months), rather than the deferral period of B's taxable year that is being changed (zero months). Thus, if otherwise qualified, B may make a section 444 election to change to a taxable year ending September 30, October 31, or November 30, for its taxable year beginning January 1, 1987.

Example (4). The facts are the same as in example (3), except that B files a calendar year income tax return for 1987 rather than making a section 444 election. However, for its taxable year beginning January 1, 1988, B desires to change its taxable year by making a section 444 election. Given that the special rule provided in paragraph (b)(2)(ii) of this section applies to section 444 elections made in taxable years beginning before 1989, B may, if otherwise qualified, make a section 444 election to change to a taxable year ending September 30, October 31, or November 30 for its taxable year beginning January 1, 1988.

Example (5). C, a corporation that historically used a June 30 taxable year, elected on December 15, 1986 to be an S corporation for its taxable year beginning July 1, 1987. As a condition to having the S election accepted, C agreed on Form 2553 to use a calendar year. Although pursuant to paragraph (b)(3) of this section, C would, if otherwise qualified, be allowed to retain its June 30 taxable year, C desires to change to a September 30 taxable year by making a section 444 election. Pursuant to paragraph (b)(2) of this section, a taxpayer may, if otherwise qualified, make a section 444 election to change to a taxable year only if the deferral period of the taxable year to be elected is not longer than the shorter of three months or the deferral period of the taxable year being changed. Given these facts, the deferral period of the taxable year to be elected is 3 months (September 30 to December 31) while the deferral period of the taxable year being changed is 6 months (June 30 to December 31). Thus, C may, if otherwise qualified, change to a September 30 taxable year for its taxable year beginning July 1, 1987, by making a section 444 election. The fact that C agreed on Form 2553 to use a calendar year is not relevant.

Example (6). D, a corporation that historically used a March 31 taxable year, elects on June 1, 1988 to be an S corporation for its taxable year beginning April 1, 1988. D desires to change to a June 30 taxable year by making a section 444 election for its taxable year beginning April 1, 1988. Pursuant to paragraph (b)(2)(i) of this section, D may not change to a June 30 taxable year because such year would have a deferral period greater than 3 months. However, if otherwise qualified, D may make a section 444 election to change to a taxable year ending September 30, October 31, or November 30 for its taxable year beginning April 1, 1988.

Example (7). E, a corporation that began operations on November 1, 1986, elected to be an S corporation on December 15, 1986, for its taxable year beginning November 1, 1986. E filed a short period income tax return for the period November 1 to December 31, 1986. E desires to change to a September 30 taxable year by making a section 444 election for its taxable year beginning January 1, 1987. Although E elected to be an S corporation after September 18, 1986, and before January 1, 1988, paragraph (b)(2)(ii) of this section does not apply to E since E was not a C corporation prior to electing S status. Thus, E may not change its taxable year for the taxable year beginning January 1, 1987, by making a section 444 election.

Example (8). The facts are the same as in example (7), except that E began operations on April 15, 1987, and elected to be an S corporation on June 1, 1987, for its taxable year beginning April 15, 1987. As a condition to being an S corporation, E agreed on Form 2553 to use a calendar year. E desires to make a section 444 election to use a year ending September 30 for its taxable year beginning April 15, 1987. Pursuant to paragraph (b)(5)(i) of this section, E's agreement to use a calendar year on Form 2553 does not mean that E has adopted a calendar year. Thus, E's desire to make a section 444 election to use a September 30 taxable year will not be considered a change in taxable year and thus paragraph (b)(2) of this section will not apply. Instead, E will be subject to paragraph (b)(1) of this section. Since a September 30 taxable year would result in only a three-month deferral period (September 30 to December 31), E may, if otherwise qualified, make a section 444 election to use a year ending September 30 for its taxable year beginning April 15, 1987.

(2) Special rule for entities retaining their 1986 taxable year. The following examples illustrate the provisions of paragraph (b)(3) of this section.

Example (1). F, an S corporation that elected to be an S corporation several years ago, has historically used a June 30 taxable year. F desires to retain its June 30 taxable year by making a section 444 election for its taxable year beginning July 1, 1987. Pursuant to paragraph (b)(4)(i) of this section, the deferral period of the taxable year being retained is 6 months (June 30 to December 31, F's required taxable year). Absent the special rule provided in paragraph (b)(3) of this section, F would be subject to the general rule provided in paragraph (b)(1) of this section which limits the deferral period of the taxable year elected to three months or less. However, pursuant to paragraph (b)(3) of this section, F may, if otherwise qualified, make a section 444 election to retain its year ending June 30 for its taxable year beginning July 1, 1987.

Example (2). The facts are the same as in example (1), except that F received permission from the Commissioner to change its taxable year to the calendar year, and filed a short period income tax return for the period July 1 to December 31, 1986. F desires to make a section 444 election to use a year ending June 30 for its taxable year beginning January 1, 1987. Given that F had a December 31 taxable year for its last taxable year beginning in 1986, the special rule provided in paragraph (b)(3) of this section does not allow F to use a June 30 taxable year for its taxable year beginning January 1, 1987. Furthermore, pursuant to paragraph (b)(2)(i) of this section, F is not allowed to change its taxable year from December 31 to June 30 because the deferral period of the taxable year being changed is zero months.

Example (3). G, a corporation that historically used an August 31 taxable year, elected be an S corporation on November 15, 1986, for its taxable year beginning September 1, 1986. As a condition to obtaining S status, G agreed to use a calendar year. Thus, G filed its first S corporation return for the period September 1 to December 31, 1986. G desires to make a section 444 election to use a year ending August 31 for its taxable year beginning January 1, 1987. Since G's last taxable year beginning in 1986 was a calendar year, G cannot use paragraph (b)(3) of this section, relating to retentions of taxable years, to elect an August 31 taxable year. Thus, G is subject to paragraph (b)(2)(i) of this section, relating to changes in taxable year. Although G, if otherwise qualified, may use the special rule provided in paragraph (b)(2)(ii) of this section, G may only change from its current taxable year (i.e., the calendar year) to a taxable year that has no more than a three-month deferral period (i.e., September 30, October 31, or November 30).

Example (4). The facts are the same as in example (3), except that G elected to be an S corporation for its taxable year beginning September 1, 1987, rather than its taxable year beginning September 1, 1986. As a condition to making its S election, G agreed, on Form 2553, to use the calendar year. However, G has not yet filed a short period income tax return for the period September 1 to December 31, 1987. Given these facts, paragraph (b)(3) of this section would allow G, if otherwise qualified, to make a section 444 election to retain an August 31 taxable year for its taxable year beginning September 1, 1987.

Example (5). The facts are the same as in example (4), except that G has already filed a short period income tax return for the period September 1 to December 31, 1987. Pursuant to paragraph (b)(5)(ii)(A) of this section, G may supersede the return it filed for the period September 1 to December 31, 1987. Thus, pursuant to paragraph (b)(3) of this section, G may, if otherwise qualified, make a section 444 election to retain an August 31 taxable year for the taxable year beginning September 1, 1987. In addition, G should follow the special procedures set forth in paragraph (b)(5)(ii)(B) of this section.

Example (6). H, a corporation that historically used a May 31 taxable year, elects to be an S corporation on June 15, 1988

for its taxable year beginning June 1, 1988. H desires to make a section 444 election to use a taxable year other than the calendar year. Since the taxable year in issue is not H's first taxable year beginning after December 31, 1986, H may not use the special rule provided in paragraph (b)(3)(i) and thus may not retain its May 31 year. However, H may, if otherwise qualified, make a section 444 election under paragraph (b)(2)(i) of this section, to change to a taxable year that has no more than a three-month deferral period (i.e., September 30, October 31, or November 30) for its taxable year beginning June 1, 1988.

Example (7). I is a partnership that has historically used a calendar year. Sixty percent of the profits and capital of I are owned by Q, a corporation (that is neither an S corporation nor a personal service corporation) that has a June 30 taxable year, and 40 percent of the profits and capital are owned by R, a calendar year individual. Since the partner that has more than a fifty percent interest in I has a June 30 taxable year, I's required taxable year is June 30. Accordingly, I filed an income tax return for the period January 1 to June 30, 1987. Based on these facts, I may, pursuant to paragraph (b)(5)(ii)(A) of this section, disregard the income tax return filed for the period January 1 to June 30, 1987. Thus, if otherwise qualified, I may make a section 444 election under paragraph (b)(2)(i) of this section to use a calendar year for its taxable year beginning January 1, 1987. If I makes such a section 444 election, I should follow the special procedures set forth in paragraph (b)(5)(ii)(B) of this section.

[T.D. 8205, 53 FR 19694, May 27, 1988]

§ 1.444–2T Tiered structure (temporary).

(a) General rule. Except as provided in paragraph (e) of this section, no section 444 election shall be made or continued with respect to a partnership, S corporation, or personal service corporation that is a member of a tiered structure on the date specified in paragraph (d) of this section. For purposes of this section, the term "personal service corporation" means a personal service corporation as defined in § 1.441-4T (d).

(b) Definition of a member of a tiered structure— (1) In general. A partnership, S corporation, or personal service corporation is considered a member of a tiered structure if—

(i) The partnership, S corporation, or personal service corporation directly owns any portion of a deferral entity, or

(ii) A deferral entity directly owns any portion of the partnership, S corporation, or personal service corporation.

However, see paragraph (c) of this section for certain de minimis rules, and see paragraph (b)(3) of this section for an anti-abuse rule. In addition, for purposes of this section, a beneficiary of a trust shall be considered to own an interest in the trust.

(2) Deferral entity—(i) In general. For purposes of this section, the term "deferral entity" means an entity that is a partnership, S corporation, personal service corporation, or trust. In the case of an affiliated group of corporations filing a consolidated income tax return that is treated as a personal service corporation pursuant to § 1.441-4T (i), such affiliated group is considered to be a single deferral entity.

(ii) Grantor trusts. The term "deferral entity" does not include a trust (or a portion of a trust) which is treated as owned by the grantor or beneficiary under Subpart E, part I, subchapter J, chapter 1, of the Code (relating to grantor trusts), including a trust that is treated as a grantor trust pursuant to section 1361(d)(1)(A) of the Code (relating to qualified subchapter S trusts). Thus, any taxpayer treated under subpart E as owning a portion of a trust shall be treated as owning the assets of the trust attributable to that ownership. The following examples illustrate the provisions of this paragraph (b)(2)(ii).

Example (1). A, an individual, is the sole beneficiary of T. T is a trust that owns 50 percent of the profits and capital of X, a partnership that desires to make a section 444 election. Furthermore, pursuant to Subpart E, Part I, subchapter J, chapter 1 of the Code, A is treated as an owner of X. Based upon these facts, T is not a deferral entity and 50 percent of X is considered to be directly owned by A.

Example (2). The facts are the same as in example (1), except that A is a personal service corporation rather than an individual. Given these facts, 50 percent of X is considered to be directly owned by A, a deferral entity. Thus, X is considered to be a member of a tiered structure.

(3) Anti-abuse rule. Notwithstanding paragraph (b)(1) of this section, a partnership, S corporation, or personal service corporation is considered a member of a tiered structure if the partnership, S corporation, personal service corporation, or related taxpayers have organized or reorganized their ownership structure or operations for the principal purpose of obtaining a significant unintended tax benefit from making or continuing a section 444 election. For purposes of the preceding sentence, a significant unintended tax benefit results when a partnership, S corporation, or personal service corporation makes a section 444 election and, as a result, a taxpayer (not limited to the entity making the election) obtains a significant deferral of income substantially all of which is not eliminated by a required payment under section 7519. See examples (15) through (19) in paragraph (f) of this section.

(c) De minimis rules—(1) In general. For rules relating to a de minimis exception to paragraph (b)(1)(i) of this section (the "downstream de minimis rule"), see paragraph (c)(2) of this section. For rules relating to a de minimis exception to paragraph (b)(1)(ii) of this section (the "upstream de minimis rule"), see paragraph (c)(3) of this

section. For rules relating to the interaction of the de minimis rules provided in this paragraph (c) and the "same taxable year exception" provided in paragraph (e) of this section, see paragraph (e)(5) of this section.

(2) Downstream de minimis rule—(i) General rule. If a partnership, S corporation, or personal service corporation directly owns any portion of one or more deferral entities as of the date specified in paragraph (d) of this section, such ownership is disregarded for purposes of paragraph (b)(1)(i) of this section if, in the aggregate, all such deferral entities accounted for—

(A) Not more than 5 percent of the partnership's, S corporation's, or personal service corporation's adjusted taxable income for the testing period ("5 percent adjusted taxable income test"), or

(B) Not more than 2 percent of the partnership's, S corporation's, or personal service corporation's gross income for the testing period ("2 percent gross income test"). See section 702 (c) for rules relating to the determination of gross income of a partner in a partnership.

See examples (3) through (5) in paragraph (f) of this section.

(ii) Definition of testing period. For purposes of this paragraph (c)(2), the term "testing period" means the taxable year that ends immediately prior to the taxable year for which the partnership, S corporation, or personal service corporation desires to make or continue a section 444 election. However, see the special rules provided in paragraph (c)(2)(iv) of this section for certain special cases (e.g., the partnership, S corporation, personal service corporation or deferral entity was not in existence during the entire testing period). The following example illustrates the application of this paragraph (c)(2)(ii).

Example. A partnership desires to make a section 444 election for its taxable year beginning November 1, 1987. The testing period for purposes of determining whether deferral entities owned by such partnership are de minimis under paragraph (c)(2) of this section is the taxable year ending October 31, 1987. If either the partnership or the deferral entities were not in existence for the entire taxable year ending October 1, 1987, see the special rules provided in paragraph (c)(2)(iv) of this section.

(iii) Definition of adjusted taxable income—(A) Partnership. In the case of a partnership, adjusted taxable income for purposes of paragraph (c)(2) of this section is an amount equal to the sum of the—

(1) Aggregate amount of the partnership items described in section 702(a) (other than credits and tax-exempt income),

(2) Applicable payments defined in section 7519(d)(3) that are deducted in determining the amount described in paragraph (c)(2)(iii)(A)(1) of this section, and

(3) Guaranteed payments defined in section 707(c) that are deducted in determining the amount described in paragraph (c)(2)(iii)(A)(1) of this section and are not otherwise included in paragraph (c)(2)(iii)(A)(2) of this section. For purposes of determining the aggregate amount of partnership items under paragraph (c)(2)(iii)(A)(1) of this section, deductions and losses are treated as negative income. Thus, for example, if under section 702(a) a partnership has $1,000 of ordinary taxable income, $500 of specially allocated deductions, and $300 of capital loss, the partnership's aggregate amount of partnership items under paragraph (c)(2)(iii)(A)(1) of this section is $200 ($1,000-$500-$300).

(B) S corporation. In the case of an S corporation, adjusted taxable income for purposes of paragraph (c)(2) of this section is an amount equal to the sum of the—

(1) Aggregate amount of the S corporation items described in section 1366(a) (other than credits and tax-exempt income), and

(2) Applicable payments defined in section 7519(d)(3) that are deducted in determining the amount described in paragraph (c)(2)(iii)(B)(1) of this section.

For purposes of determining the aggregate amount of S corporation items under paragraph (c)(2)(iii)(B)(1) of this section, deductions and losses are treated as negative income. Thus, for example, if under section 1366(a) an S corporation has $2,000 of ordinary taxable income, $1,000 of deductions described in section 1366(a)(1)(A) of the Code, and $500 of capital loss, the S corporation's aggregate amount of S corporation items under paragraph (c)(2)(iii)(B)(1) of this section is $500 ($2,000-$1,000-$500).

(C) Personal service corporation. In the case of a personal service corporation, adjusted taxable income for purposes of paragraph (c)(2) of this section is an amount equal to the sum of the—

(1) Taxable income of the personal service corporation, and

(2) Applicable amounts defined in section 280H(f)(1) that are deducted in determining the amount described in paragraph (c)(2)(iii)(C)(1) of this section.

(iv) Special rules—(A) Pro-forma rule. Except as provided in paragraph (c)(iv)(C)(2) of this section, if a partnership, S corporation, or personal service corporation directly owns any interest in a deferral entity as of the date specified in paragraph (d) of this section and such ownership interest is different in amount from the partnership's, S corporation's, or personal service corporation's interest on any day during the testing period, the 5 percent adjusted taxable income test and the 2 percent gross income test must be applied on a pro-forma basis (i.e., adjusted taxable income and gross income must be calculated for the testing period assuming that the partnership, S corporation, or personal service corporation owned the same interest in the deferral entity that it owned as of the date specified in paragraph (d) of this section). The following example illustrates the application of this paragraph (c)(2)(iv)(A).

Example. A personal service corporation desiring to make a section 444 election for its taxable year beginning October 1, 1987, acquires a 25 percent ownership interest in a partnership on or after October 1, 1987. Furthermore, the partnership has been in existence for several years. The personal service corporation must modify its calculations of the 5 percent adjusted taxable income test and the 2 percent gross income test for the testing period ended September 30, 1987, by assuming that the personal service corporation owned 25 percent of the partnership during such testing period and the personal service corporation's adjusted taxable income and gross income were correspondingly adjusted.

(B) Reasonable estimates allowed. If the information necessary to complete the pro-forma calculation described in paragraph (c)(2)(iv)(A) of this section is not readily available, the partnership, S corporation, or personal service corporation may make a reasonable estimate of such information.

(C) Newly formed entities—(1) Newly formed deferral entities. If a partnership, S corporation, or personal service corporation owns any portion of a deferral entity on the date specified in paragraph (d) of this section and such deferral entity was not in existence during the entire testing period (hereinafter referred to as a "newly formed deferral entity"), both the 5 percent adjusted taxable income test and the 2 percent gross income test are modified as follows. First, the partnership, S corporation, or personal service corporation shall calculate the percentage of its adjusted taxable income or gross income that is attributable to deferral entities, excluding newly formed deferral entities. Second, the partnership, S corporation, or personal service corporation shall calculate (on the date specified in paragraph (d) of this section) the percentage of the tax basis of its assets that are attributable to its tax basis with respect to its ownership interests in all newly formed deferral entities. If the sum of the two percentages is 5 percent or less, the deferral entities are considered de minimis and are disregarded for purposes of paragraph (b)(1)(i) of this section. If the sum of the two percentages is greater than 5 percent, the deferral entities do not qualify for the de minimis rule provided in paragraph (c)(2) of this section and thus the partnership, S corporation, or personal service corporation is considered to be a member of a tiered structure for purposes of this section.

(2) Newly formed partnership, S corporation, or personal service corporation desiring to make a section 444 election. If a partnership, S corporation, or personal service corporation desires to make a section 444 election for the first taxable year of its existence, the 5 percent adjusted taxable income test and the 2 percent gross income test are replaced by a 5 percent of assets test. Thus, if on the date specified in paragraph (d) of this section, 5 percent or less of the assets (measured by reference to the tax basis of the assets) of the newly formed partnership, S corporation, or personal service corporation are attributable to the tax basis with respect to its ownership interests in the deferral entities, the deferral entities will be considered de minimis and will be disregarded for purposes of paragraph (b)(1)(i) of this section.

(3) Upstream de minimis rule. If a partnership, S corporation, or personal service corporation is directly owned by one or more deferral entities as of the date specified in paragraph (d) of this section, such ownership is disregarded for purposes of paragraph (b)(1)(ii) of this section if on the date specified in paragraph (d) of this section the deferral entities directly own, in the aggregate, 5 percent or less of—

(i) An interest in the current profits of the partnership, or

(ii) The stock (measured by value) of the S corporation or personal service corporation.

See examples (6) and (7) in paragraph (f) of this section.

(d) Date for determining the existence of a tiered structure—(1) General rule. For purposes of paragraph (a) of this section, a partnership, S corporation, or personal service corporation will be considered a member of a tiered structure for a particular taxable year if the partnership, S corporation, or personal service corporation is a member of a tiered structure on the last day of the required taxable year (as defined in section 444 (e) of the Code) ending within such year. If a particular taxable year does not include the last day of the

required taxable year for such year, the partnership, S corporation, or personal service corporation will not be considered a member of a tiered structure for such year. The following examples illustrate the application of this paragraph (d)(1).

Example (1). Assume that a newly formed partnership whose first taxable year begins November 1, 1988, desires to adopt a September 30 taxable year by making a section 444 election. Furthermore, assume that for its taxable year beginning November 1, 1988, the partnership's required taxable year is December 31. If the partnership is a member of a tiered structure on December 31, 1988, it will not be eligible to make a section 444 election for a taxable year beginning November 1, 1988, and ending September 30, 1989.

Example (2). Assume an S corporation that historically used a June 30 taxable year desires to make a section 444 election to change to a year ending September 30 for its taxable year beginning July 1, 1987. If the S corporation can make the section 444 election, it will have a short taxable year beginning July 1, 1987, and ending September 30, 1987. Given these facts, the short taxable year beginning July 1, 1987, does not include the last day of the S corporation's required taxable year for such year (i.e., December 31, 1987). Thus, pursuant to paragraph (d)(1) of this section, the S corporation will not be considered a member of a tiered structure for its taxable year beginning July 1, 1987, and ending September 30, 1987.

(2) Special rule for taxable years beginning in 1987. For purposes of paragraph (a) of this section, a partnership, S corporation, or personal service corporation will not be considered a member of a tiered structure for a taxable year beginning in 1987 if the partnership, S corporation, or personal service corporation is not a member of a tiered structure on the day the partnership, S corporation, or personal service corporation timely files its section 444 election for such year. The following examples illustrate the application of this paragraph (d)(2).

Example (1). Assume that a partnership desires to retain a June 30 taxable year by making a section 444 election for its taxable year beginning July 1, 1987. Furthermore, assume that the partnership's required taxable year for such year is December 31 and that the partnership was a member of a tiered structure on such date. Also assume that the partnership was not a member of a tiered structure as of the date it timely filed its section 444 election for its taxable year beginning July 1, 1987. Based upon the special rule provided in this paragraph (d)(2), the partnership will not be considered a member of a tiered structure for its taxable year beginning July 1, 1987.

Example (2). Assume the same facts as in example (1), except that the partnership was a member of a tiered structure on the date it filed its section 444 election for its taxable year beginning July 1, 1987, but was not a member of a tiered structure on December 31, 1987. Paragraph (d)(1) of this section would still apply and thus the partnership would not be considered part of a tiered structure for its taxable year beginning July 1, 1987. However, the partnership would be considered a member of a tiered structure for its taxable year beginning July 1, 1988, if the partnership was a member of a tiered structure on December 31, 1988.

(e) Same taxable year exception—(1) In general. Although a partnership or S corporation is a member of a tiered structure as of the date specified in paragraph (d) of this section, the partnership, S corporation may make or continue a section 444 election if the tiered structure (as defined in paragraph (e)(2) of this section) consists entirely of partnerships or S corporations (or both), all of which have the same taxable year as determined under paragraph (e)(3) of this section. However, see paragraph (e)(5) of this section for the interaction of the de minimis rules provided in paragraph (c) of this section with the same taxable year exception. For purposes of this paragraph (e), two or more entities are considered to have the same taxable year if their taxable years end on the same day, even though they begin on different days. See examples (8) through (14) in paragraph (f) of this section.

(2) Definition of tiered structure—(i) General rule. For purposes of the same taxable year exception, the members of a tiered structure are defined to include the following entities—

(A) The partnership or S corporation that desires to qualify for the same taxable year exception,

(B) A deferral entity (or entities) directly owned (in whole or in part) by the partnership or S corporation that desires to qualify for the same taxable year exception,

(C) A deferral entity (or entities) directly owning any portion of the partnership or S corporation that desires to qualify for the same taxable year exception, and

(D) A deferral entity (or entities) directly owned (in whole or in part) by a "downstream controlled partnership," as defined in paragraph (e)(2)(ii) of this section.

(ii) Special flow-through rule for downstream controlled partnerships. If more than 50 percent of a partnership's profits and capital are owned by a partnership or S corporation that desires to qualify for the same taxable year exception, such owned partnership is considered a downstream controlled partnership for purposes of paragraph (e)(2)(i) of this section. Furthermore, if more than 50 percent of a partnership's profits and capital are owned by a downstream controlled partnership, such owned partnership is considered a downstream controlled partnership for purposes of paragraph (e)(2)(i) of this section.

(3) Determining the taxable year of a partnership or S corporation. The taxable year of a partnership or S corporation to be taken into account for purposes of paragraph (e)(1) of this

section is the taxable year ending with or prior to the date specified in paragraph (d) of this section. Furthermore, the determination of such taxable year will take into consideration any section 444 elections made by the partnership or S corporation. See examples (10) and (11) in paragraph (f) of this section.

(4) Special rule for 52-53-week taxable years. For purposes of this paragraph (e), a 52-53-week taxable year with reference to the end of a particular month will be considered to be the same as a taxable year ending with reference to the last day of such month.

(5) Interaction with de minimis rules—(i) Downstream de minimis rule—(A) In general. If a partnership or S corporation that desires to make or continue a section 444 election is a member of a tiered structure (as defined in paragraph (e)(2) of this section) and directly owns any member (or members) of the tiered structure with a taxable year different from the taxable year of the partnership or S corporation, such ownership is disregarded for purposes of the same taxable year exception of paragraph (e)(1) of this section provided that, in the aggregate, the de minimis rule of paragraph (c)(2) of this section is satisfied with respect to such owned member (or members). The following example illustrates the application of this paragraph (e)(5)(i)(A).

Example. P, a partnership with a June 30 taxable year, owns 60 percent of P1, another partnership with a June 30 taxable year. P also owns 1 percent of P2 and P3, calendar year partnerships. If, in the aggregate, P's ownership interests in P2 and P3 are considered de minimis under paragraph (c)(2) of this section, P meets the same taxable year exception and may make a section 444 election to retain its June 30 taxable year.

(B) Special rule for members of a tiered structure directly owned by a downstream controlled partnership. For purposes of paragraph (e)(5)(i)(A) of this section, a partnership or S corporation desiring to make or continue a section 444 election is considered to directly own any member of the tiered structure (as defined in paragraph (e)(2) of this section) directly owned by a downstream controlled partnership (as defined in paragraph (e)(2)(ii) of this section). The adjusted taxable income or gross income of the partnership or S corporation that is attributable to a member of a tiered structure directly owned by a downstream controlled partnership equals the adjusted taxable income or gross income of such member multiplied by the partnership's or S corporation's indirect ownership percentage of such member. The following example illustrates the application of this paragraph (e)(5)(i)(B).

Example. P, a partnership, desires to retain its June 30 taxable year by making a section 444 election. However, as of the date specified in paragraph (d) of this section, P owns 75 percent of P1, a June 30 partnership, and P1 owns 40 percent of P2, a calendar year partnership. P also owns 25 percent of P3, a calendar year partnership. Pursuant to paragraphs (e)(5)(i) (A) and (B) of this section, P may only qualify to use the same taxable year exception if, in the aggregate, P2 and P3 are de minimis with respect to P. Pursuant to paragraph (e)(5)(i)(B) of this section, P's adjusted taxable income or gross income attributable to P2 equals 30 percent (75 percent times 40 percent) of P2's adjusted taxable income or gross income.

(ii) Upstream de minimis rule. If a partnership or S corporation that desires to make or continue a section 444 election is a member of a tiered structure (as defined in paragraph (e)(2) of this section) and is owned directly by a member (or members) of the tiered structure with taxable years different from the taxable year of the partnership or S corporation, such ownership is disregarded for purposes of the same taxable year exception of paragraph (e)(1) of this section provided that, in the aggregate, the de minimis rule of paragraph (c)(3) of this section is satisfied with respect to such owning member (or members). See example (12) of paragraph (f) of this section.

(f) Examples. The provisions of this section may be illustrated by the following examples.

Example (1). A, a partnership, desires to make or continue a section 444 election. However, on the date specified in paragraph (d) of this section, A is owned by a combination of individuals and S corporations. The S corporations are deferral entities, as defined in paragraph (b)(2) of this section. Thus, pursuant to paragraph (b)(1)(ii) of this section, A will be a member of a tiered structure unless under paragraph (c)(3) of this section, the S corporations, in the aggregate, own a de minimis portion of A. If the S corporations' ownership in A is not considered de minimis under paragraph (c)(3) of this section, A is a member of a tiered structure and will be allowed to make or continue a section 444 election only if it meets the same taxable year exception provided in paragraph (e) of this section.

Example (2). B, a partnership, desires to make or continue a section 444 election. However, on the date specified in paragraph (d) of this section, B is a partner in two partnerships, B1 and B2. B1 and B2 are deferral entities, as defined in paragraph (b)(2) of this section. Thus, under paragraph (b)(1)(i) of this section, B will be a member of a tiered structure unless B's aggregate ownership interests in B1 and B2 are considered de minimis under paragraph (c)(2) of this section. If B is a member of a tiered structure on the date specified in paragraph (d) of this section, B will be allowed to make or continue a section 444 election only if it meets the same taxable year exception provided in paragraph (e) of this section.

Example (3). C, a partnership with a September 30 taxable year, is 100 percent owned by calendar year individuals. C desires to make a section 444 election for its taxable year beginning October 1, 1987. However, on the date specified in paragraph (d) of this section, C owns a 1 percent interest in C1, a partnership. C does not own any other interest in a deferral entity. For the taxable year ended September 30, 1987, 10 percent of C's adjusted taxable income (as defined in paragraph (c)(2)(iii) of this section) was attributable to C's partnership

interest in C1. Furthermore, 4 percent of C's gross income for the taxable year ended September 30, 1987, was attributable to C's partnership interest in C1. Under paragraph (c)(2) of this section, C's partnership interest in C1 is not de minimis because during the testing period more than 5 percent of C's adjusted taxable income is attributable to C1 and more than 2 percent of C's gross income is attributable to C1. Thus, C is a member of a tiered structure for its taxable year beginning October 1, 1987.

Example (4). The facts are the same as example (3), except that for the taxable year ended September 30, 1987, only 2 percent of C's adjusted taxable income was attributable to C1. Under paragraph (c)(2) of this section, C's partnership interest in C1 is considered de minimis for purposes of determining whether C is a member of a tiered structure because not more than 5 percent of C's adjusted taxable income during the testing period is attributable to C1. Thus, C is not a member of a tiered structure for its taxable year beginning October 1, 1987.

Example (5). The facts are the same as example (4), except that in addition to owning C1, C also owns 15 percent of C2, another partnership. For the taxable year ended September 30, 1987, 2 percent of C's adjusted taxable income is attributable to C1 and an additional 4 percent is attributable to C2. Furthermore, for the taxable year ended September 30, 1987, 4 percent of C's gross income is attributable to C1 while 3 percent is attributable to C2. Under paragraph (c)(2) of this section, C1 and C2 must be aggregated for purposes of determining whether C meets either the 5 percent adjusted taxable income test or the 2 percent gross income test. Since C's adjusted taxable income attributable to C1 and C2 is 6 percent (2 percent + 4 percent) and C's gross income attributable to C1 and C2 is 7 percent (4 percent + 3 percent), C does not meet the downstream de minimis rule provided in paragraph (c)(2) of this section. Thus, C is a member of a tiered structure for its taxable year beginning October 1, 1987.

Example (6). The facts are the same as example (3), except that instead of determining whether C is part of a tiered structure, the issue is whether C1 is part of a tiered structure. In addition, assume that on the date specified in paragraph (d) of this section, the remaining 99 percent of C1 is owned by calendar year individuals and C1 does not own an interest in any deferral entity. Although C in Example (3) was considered to be a part of a tiered structure by virtue of its ownership interest in C1, C1 must be tested separately to determine whether it is part of a tiered structure. Since C's interest in C1 is 5 percent or less, C's interest in C1 is de minimis with respect to C1. See paragraph (c)(3) of this section. Thus, based upon these facts, C1 is not part of a tiered structure.

Example (7). The facts are the same as example (6), except that the remaining 99 percent of C1 is owned 94 percent by calendar year individuals and 5 percent by C3, another partnership. Thus, deferral entities own 6 percent of C1 (1 percent owned by C and 5 percent owned by C3). Under paragraph (c)(3) of this section, deferral entities own more than a de minimis interest (i.e., 5 percent) of C1, and thus C1 is part of a tiered structure.

Example (8). D, a partnership with a September 30 taxable year, desires to make a section 444 election for its taxable year beginning October 1, 1987. On December 31, 1987, and the date D plans to file its section 444 election, D is 10 percent owned by D1, a personal service corporation with a September 30 taxable year, and 90 percent owned by calendar year individuals. Furthermore, D1 will retain its September 30 taxable year because it previously established a business purpose for such year. Since D is owned in part by D1, a personal service corporation, and the ownership interest is not de minimis under paragraph (c)(3) of this section, D is considered a member of a tiered structure for its taxable year beginning October 1, 1987. Furthermore, although D and D1 have the same taxable year, D does not qualify for the same taxable year exception provided in paragraph (e) of this section because D1 is a personal service corporation rather than a partnership or S corporation. Thus, pursuant to paragraph (a) of this section, D may not make a section 444 election for its taxable year beginning October 1, 1987.

Example (9). The facts are the same as example (8), except that D1 is a partnership rather than a personal service corporation. Based upon these facts, D qualifies for the same taxable year exception provided in paragraph (e) of this section. Thus, D may make a section 444 election for its taxable year beginning October 1, 1987.

Example (10). The facts are the same as example (9), except that D1 has not established a business purpose for a September 30 taxable year. In addition, D1 does not desire to make a section 444 election and, under section 706(b), D1 will be required to change to a calendar year for its taxable year beginning October 1, 1987. Pursuant to paragraph (e)(3) of this section, D and D1 do not have the same taxable year for purposes of the same taxable year exception provided in paragraph (e) of this section. Thus, D may not make a section 444 election for its taxable year beginning October 1, 1987.

Example (11). The facts are the same as example (8), except that D1 is a partnership with a March 31 taxable year. Furthermore, for its taxable year beginning April 1, 1987, D1 will change to a September 30 taxable year by making a section 444 election. Pursuant to paragraph (e)(3) of this section, D1 is considered to have a September 30 taxable year for purposes of determining whether D qualifies for the same taxable year exception provided in paragraph (e) of this section. Since both D and D1 will have the same taxable year as of the date specified in paragraph (d) of this section, D may make a section 444 election for its taxable year beginning October 1, 1987.

Example (12). The facts are the same as example (11), except that instead of the remaining 90 percent of D being owned by calendar year individuals, it is owned 86 percent by individuals and 4 percent by D2, a calendar year partnership. Thus, D, a September 30 partnership, is 10 percent owned by D1, a September 30 partnership, 86 percent owned by calendar year individuals, and 4 percent owned by D2, a calendar year partnership. Under paragraph (e)(5)(ii) of this section, D2's ownership interest in D is considered de minimis for purposes of the same taxable year exception. Since D2's ownership interest in D is considered de minimis, it is disregarded for purposes of determining whether D qualifies for the same taxable year exception provided in paragraph (e) of this section. Thus, since both D and D1 will have the same taxable year as of the date specified in paragraph (d) of this section, D may make a section 444 election for its taxable year beginning October 1, 1987.

Example (13). E, a partnership with a June 30 taxable year, desires to make a section 444 election for its taxable year beginning July 1, 1987. On the date specified in paragraph (d) of this section, E is 100 percent owned by calendar year individuals; E owns 99 percent of the profits and capital of E1, a partnership with a June 30 taxable year; and E1 owns 30 percent of the profits and capital of E2, a partnership with a September 30 taxable year. E owns no other deferral entities. Pursuant to paragraph (b)(1)(i) of this section, E is considered to be a member of a tiered structure. Furthermore, pursuant to paragraph (e) of this section, E does not qualify for the same taxable year exception because E2 does not have the same taxable year as E and E1.

Example (14). The facts are the same as example (13), except that E owns only 49 percent (rather than 99 percent) of the profits and capital of E1. Pursuant to paragraph (e) of this section, E qualifies for the same taxable year exception because E and E1 have the same taxable year. Pursuant to paragraph (e) of this section, E1's ownership interest in E2 is disregarded since E does not own more than 50 percent of E1's profits and capital.

Example (15). Prior to consideration of the anti-abuse rule provided in paragraph (b)(3) of this section, H, a partnership that commenced operations on October 1, 1987, is eligible to make a section 444 election for its taxable year beginning October 1, 1987. Although H may obtain a significant deferral of income substantially all of which is not eliminated by a required payment under section 7519 (since there will be no required payment for H's first taxable year), the anti-abuse rule of paragraph (b)(3) will not apply unless the principal purpose of organizing H was the attainment of a significant deferral of income that would result from making a section 444 election.

Example (16). F, a partnership with a January 31 taxable year, desires to make a section 444 election to retain its January 31 taxable year for the taxable year beginning February 1, 1987. F is 100 percent owned by calendar year individuals. Prior to the date specified in paragraph (d) of this section, F contributes substantially all of its assets to F1, a partnership, in exchange for a 51 percent interest in F1. The remaining 49 percent of F1 is owned by the calendar year individuals owning 100 percent of F. If F is allowed to make a section 444 election to retain its January 31 taxable year, F1's required taxable year will be January 31 since a majority of F1's partners use a January 31 taxable year (see § 1.706-3T). F's principal purpose for creating F1 and contributing its assets to F1 is to obtain an 11-month deferral on 49 percent of the income previously earned by F and now earned by F1. Pursuant to paragraph (b)(3) of this section, F is not allowed to make a section 444 election for its taxable year beginning February 1, 1987.

Example (17). The facts are the same as in example (16), except that F does not create F1 and contribute its assets to F1 until immediately after F makes its section 444 election for the taxable year beginning February 1, 1987. Thus, F is allowed to make a section 444 election for its taxable year beginning February 1, 1987. However, pursuant to paragraph (b)(3) of this section, F will have its section 444 election terminated for subsequent years unless the tax deferral inherent in the structure is eliminated (e.g., F1 is liquidated or the individual owners of F contribute their interests in F1 to F) prior to the date specified in paragraph (d) of this section for subsequent taxable years beginning on or after February 1, 1988.

Example (18). The facts are the same as in example (16), except that F1 is 99 percent owned by F and none of the individual owners of F own any portion of F1. Furthermore, F obtained no tax benefit from creating and contributing assets to F1. Given these facts paragraph (b)(3) of this section does not apply and thus, F may make a section 444 election for its taxable year beginning February 1, 1987.

Example (19). G, a partnership with an October 31 taxable year, desires to retain its October 31 taxable year for its taxable year beginning November 1, 1987. However, as of December 31, 1987, G owns a 30 percent interest in G1, a calendar year partnership. G owns no other deferral entity, and G is 100 percent owned by calendar year individuals. Furthermore, G's interest in G1 does not meet the de minimis rule provided in paragraph (c)(3) of this section. Thus, in order to avoid being a tiered structure, G sells its interest in G1 to an unrelated third party prior to the date G timely makes it section 444 election for its taxable year beginning November 1, 1987. Although the sale of G1 allows G to qualify to make a section 444 election, and therefore to obtain a significant tax benefit, such benefit is not unintended. Thus, paragraph (b)(3) of this section does not apply, and G may make a section 444 election for its taxable year beginning November 1, 1987.

(g) Effective date. This section is effective for taxable years beginning after December 31, 1986.
[T.D. 8205, 53 FR 19698, May 27, 1988]

§ 1.444–3T Manner and time of making section 444 election (temporary).

(a) In general. A section 444 election shall be made in the manner and at the time provided in this section.

(b) Manner and time of making election—(1) General rule. A section 444 election shall be made by filing a properly prepared Form 8716, "Election to Have a Tax Year Other Than a Required Tax Year," with the Service Center indicated by the instructions to Form 8716. Except as provided in paragraphs (b) (2) and (4) of this section, Form 8716 must be filed by the earlier of—

(i) The 15th day of the fifth month following the month that includes the first day of the taxable year for which the election will first be effective, or

(ii) The due date (without regard to extensions) of the income tax return resulting from the section 444 election.

In addition, a copy of Form 8716 must be attached to Form 1065 or Form 1120 series form, whichever is applicable, for the first taxable year for which the section 444 election is made. Form 8716 shall be signed by any person who is authorized to sign Form 1065 or Form 1120 series form, whichever is applicable. (See sections 6062 and 6063, relating to the signing of returns.) The provisions of this paragraph (b)(1) may be illustrated by the following examples.

Example (1). A, a partnership that began operations on September 10, 1988, is qualified to make a section 444 election to use a September 30 taxable year for its taxable year beginning September 10, 1988. Pursuant to paragraph (b)(1) of this section, A must file Form 8716 by the earlier of the 15th day of the fifth month following the month that includes the first day of the taxable year for which the election will first be effective (i.e., February 15, 1989) or the due date (without regard to extensions) of the partnership's tax return for the period September 10, 1988 to September 30, 1988 (i.e., January 15, 1989). Thus, A must file Form 8716 by January 15, 1989.

Example (2). The facts are the same as in example (1), except that A began operations on October 20, 1988. Based upon these facts, A must file Form 8716 by March 15, 1989, the 15th day of the fifth month following the month that

includes the first day of the taxable year for which the election will first be effective.

Example (3). B is a corporation that first becomes a personal service corporation for its taxable year beginning September 1, 1988. B qualifies to make a section 444 election to use a September 30 taxable year for its taxable year beginning September 1, 1988. Pursuant to this paragraph (b)(1), B must file Form 8716 by December 15, 1988, the due date of the income tax return for the short period September 1 to September 30, 1988.

(2) **Special extension of time for making an election.** If, pursuant to paragraph (b)(1) of this section, the due date for filing Form 8716 is prior to July 26, 1988, such date is extended to July 26, 1988. The provisions of this paragraph (b)(2) may be illustrated by the following examples.

Example (1). B, a partnership that historically used a June 30 taxable year, is qualified to make a section 444 election to retain a June 30 taxable year for its taxable year beginning July 1, 1987. Absent paragraph (b)(2) of this section, B would be required to file Form 8716 by December 15, 1987. However, pursuant to paragraph (b)(2) of this section, B's due date for filing Form 8716 is extended to July 26, 1988.

Example (2). C, a partnership that began operations on January 20, 1988, is qualified to make a section 444 election to use a year ending September 30 for its taxable year beginning January 20, 1988. Absent paragraph (b)(2) of this section, C is required to file Form 8716 by June 15, 1988 (the 15th day of the fifth month following the month that includes the first day of the taxable year for which the election will first be effective). However, pursuant to paragraph (b)(2) of this section, the due date for filing Form 8716 is July 26, 1988.

(3) **Corporation electing to be an S corporation—(i) In general.** A corporation electing to be an S corporation is subject to the same time and manner rules for filing Form 8716 as any other taxpayer making a section 444 election. Thus, a corporation electing to be an S corporation that desires to make a section 444 election is not required to file Form 8716 with its Form 2553, "Election by a Small Business Corporation." However, a corporation electing to be an S corporation after September 26, 1988, is required to state on Form 2553 its intention to—

(A) Make a section 444 election, if qualified, or

(B) Make a "back-up section 444 election" as described in paragraph (b)(4) of this section.

If a corporation electing to be an S corporation fails to state either of the above intentions, the District Director may, at his discretion, disregard any section 444 election for such taxpayer.

(ii) **Examples.** The provisions of this paragraph (b)(3) may be illustrated by the following examples.

Example (1). D is a corporation that commences operations on October 1, 1988, and elects to be an S corporation for its taxable year beginning October 1, 1988. All of D's shareholders use the calendar year as their taxable year. D desires to adopt a September 30 taxable year. D does not believe it has a business purpose for a September 30 taxable year and thus it must make a section 444 election to use such year. Based on these facts, D must, pursuant to the instructions to Form 2553, state on Form 2553 that, if qualified, it will make a section 444 election to adopt a year ending September 30 for its taxable year beginning October 1, 1988. If D is qualified (i.e., D is not a member of a tiered structure on December 31, 1988) to make a section 444 election for its taxable year beginning October 1, 1988, D must file Form 8716 by March 15, 1989. If D ultimately is not qualified to make a section 444 election for its taxable year beginning October 1, 1988, D's election to be an S corporation will not be effective unless, pursuant to the instructions to Form 2553, D made a back-up calendar year election (i.e., an election to adopt the calendar year in the event D ultimately is not qualified to make a section 444 election for such year).

Example (2). The facts are the same as in example (1), except that D believes it can establish, to the satisfaction of the Commissioner, a business purpose for adopting a September 30 taxable year. However, D desires to make a "back-up section 444 election" (see paragraph (b)(4) of this section) in the event that the Commissioner does not grant permission to adopt a September 30 taxable year based upon business purpose. Based on these facts, D must, pursuant to the instructions to Form 2553, state on Form 2553 its intention, if qualified, to make a back-up section 444 election to adopt a September 30 taxable year. If, by March 15, 1989, D has not received permission to adopt a September 30 taxable year and D is qualified to make a section 444 election, D must make a back-up election in accordance with paragraph (b)(4) of this section.

(4) **Back-up section 444 election—(i) General rule.** A taxpayer that has requested (or is planning to request) permission to use a particular taxable year based upon business purpose, may, if otherwise qualified, file a section 444 election (referred to as a "back-up section 444 election"). If the Commissioner subsequently denies the business purpose request, the taxpayer will, if otherwise qualified, be required to activate the back-up section 444 election. See examples (1) and (2) in paragraph (b)(4)(iv) of this section.

(ii) **Procedures for making a back-up section 444 election.** In addition to following the general rules provided in this section, a taxpayer making a back-up section 444 election should, in order to allow the Service to process the affected returns in an efficient manner, type or legibly print the words "BACK-UP ELECTION" at the top of Form 8716, "Election to Have a Tax Year Other Than a Required Tax Year." However, if such Form 8716 is filed on or after the date a Form 1128, Application for Change in Accounting Period, is filed with respect to a period that begins on the same date, the words "FORM 1128 BACK-UP ELECTION"

should be typed or legibly printed at the top of Form 8716.

(iii) Procedures for activating a back-up section 444 election—(A) Partnerships and S corporations—(1) In general. A back-up section 444 election made by a partnership or S corporation is activated by filing the return required in § 1.7519-2T (a)(2)(i) and making the payment required in § 1.7519-1T. The due date for filing such return and payment will be the later of—

(i) The due dates provided in § 1.7519-2T, or

(ii) 60 days from the date the Commissioner denies the business purpose request.

However, interest will be assessed (at the rate provided in section 6621 (a)(2)) on any required payment made after the due date (without regard to any extension for a back-up election) provided in § 1.7519-2T (a)(4)(i) or (a)(4)(ii), whichever is applicable, for such payment. Interest will be calculated from such due date to the date such amount is actually paid. Interest assessed under this paragraph will be separate from any required payments. Thus, interest will not be subject to refund under § 1.7519-2T.

(2) Special rule if Form 720 used to satisfy return requirement. If, pursuant to § 1.7519-2T (a)(3), a partnership or S corporation must use Form 720, "Quarterly Federal Excise Tax Return," to satisfy the return requirement of § 1.7519-2T (a)(2), then in addition to following the general rules provided in § 1.7519-2T, the partnership or S corporation must type or legibly print the words "ACTIVATING BACK-UP ELECTION" on the top of Form 720. A partnership or S corporation that would otherwise file a Form 720 on or before the date specified in paragraph (b)(4)(iii)(A)(1) of this section may satisfy the return requirement by including the necessary information on such Form 720. Alternatively, such partnership or S corporation may file an additional Form 720 (i.e., a Form 720 separate from the Form 720 it would otherwise file). Thus, for example, if the due date for activating an S corporation's back-up election is November 15, 1988, and the S corporation must file a Form 720 by October 31, 1988, to report manufacturers excise tax for the third quarter of 1988, the S corporation may use that Form 720 to activate its back-up election. Alternatively, the S corporation may file its regular Form 720 that is due October 31, 1988, and file an additional Form 720 by November 15, 1988, activating its back-up election.

(B) Personal service corporations. A back-up section 444 election made by a personal service corporation is activated by filing Form 8716 with the personal service corporation's original or amended income tax return for the taxable year in which the election is first effective, and typing or legibly printing the words—"ACTIVATING BACK-UP ELECTION" on the top of such income tax return.

(iv) Examples. The provisions of this paragraph (b)(4) may be illustrated by the following examples. Also see example (2) in paragraph (b)(3) of this section.

Example (1). E, a partnership that historically used a June 30 taxable year, requested (pursuant to section 6 of Rev. Proc. 87-32, 1987-28 I.R.B. 14) permission from the Commissioner to retain a June 30 taxable year for its taxable year beginning July 1, 1987. Furthermore, E is qualified to make a section 444 election to retain a June 30 taxable year for its taxable year beginning July 1, 1987. However, as of the date specified in paragraph (b)(2) of this section, the Commissioner has not determined whether E has a valid business purpose for retaining its June 30 taxable year. Based on these facts, E may, by the date specified in paragraph (b)(2) of this section, make a back-up section 444 election to retain its June 30 taxable year.

Example (2). The facts are the same as in example (1). In addition, on August 12, 1988, the Internal Revenue Service notifies E that its business purpose request is denied. E asks for reconsideration of the Service's decision, and the Service sustains the original denial on September 30, 1988. Based on these facts, E must activate its back-up section 444 election within 60 days after September 30, 1988.

Example (3). The facts are the same as in example (1), except that E desires to make a section 444 election to use a year ending September 30 for its taxable year beginning July 1, 1987. Although E qualifies to make a section 444 election to retain its June 30 taxable year, E may make a back-up section 444 election for a September 30 taxable year.

(c) Administrative relief—(1) Extension of time to file income tax returns—(i) Automatic extension. If a partnership, S corporation, or personal service corporation makes a section 444 election (or does not make a section 444 election, either because it is ineligible or because it decides not to make the election, and therefore changes to its required taxable year) for its first taxable year beginning after December 31, 1986, the due date for filing its income tax return for such year shall be the later of—

(A) The due date established under—

(1) Section 6072, in the case of Form 1065,

(2) § 1.6037-1 (b), in the case of Form 1120S,

(3) Section 6072 (b), in the case of other Form 1120 series form; or

(B) August 15, 1988.

The words "SECTION 444 RETURN" should, in order to allow the Service to process the affected returns in an efficient manner, be typed or legibly printed at the top of the Form 1065 or Form 1120 series form, whichever is applicable, filed under this paragraph (c)(1)(i).

(ii) **Additional extensions.** If the due date of the income tax return for the first taxable year beginning after December 31, 1986, extended as provided in paragraph (c)(1)(i)(B) of this section, occurs before the date that is 6 months after the date specified in paragraph (c)(1)(i)(A) of this section, the partnership, S corporation, or personal service corporation may request an additional extension or extensions of time (up to 6 months after the date specified in paragraph (c)(1)(i)(A) of this section) to file its income tax return for such first taxable year. The request must be made by the later of the date specified in paragraph (c)(1)(i)(A) or (c)(1)(i)(B) of this section and must be made on Form 7004, "Application for Automatic Extension of Time To File Corporation Income Tax Return", or Form 2758, "Application for Extension of Time to File U.S. Partnership, Fiduciary, and Certain Other Returns," whichever is applicable, in accordance with the form and its instructions. In addition, the following words should be typed or legibly printed at the top of the form—"SECTION 444 REQUEST FOR ADDITIONAL EXTENSION."

(iii) **Examples.** The provisions of paragraph (c)(1) of this section may be illustrated by the following examples.

Example (1). G, a partnership that historically used a January 31 taxable year, makes a section 444 election to retain such year for its taxable year beginning February 1, 1987. Absent paragraph (c)(1)(i) of this section, G's Form 1065 for the taxable year ending January 31, 1988, is due on or before May 15, 1988. However, if G types or legibly prints "SECTION 444 RETURN" at the top of Form 1065 for such year, paragraph (c)(1)(i) of this section automatically extends the due date of such return to August 15, 1988.

Example (2). The facts are the same as in example (1), except that G desires to extend the due date of its income tax return for the year ending January 31, 1988, to a date beyond August 15, 1988. Pursuant to paragraph (c)(1)(ii) of this section, G may extend such return to November 15, 1988 (i.e., the date that is up to 6 months after May 15, 1988, the normal due date of the return). However, in order to obtain this additional extension, G must file Form 2758 pursuant to paragraph (c)(1)(i) of this section on or before August 15, 1988.

Example (3). H, a partnership that historically used a May 31 taxable year, makes a section 444 election to use a year ending September 30 for its taxable year beginning on June 1, 1987. Absent paragraph (c)(1)(i) of this section, H's Form 1065 for the taxable year beginning June 1, 1987, and ending September 30, 1987, is due on or before January 15, 1988. However, if H types or legibly prints "SECTION 444 RETURN" at the top of Form 1065 for such year, paragraph (c)(1)(i) of this section automatically extends to due date of such return to August 15, 1988.

Example (4). The facts are the same as in example (3), except H desires to further extend (i.e., extend beyond August 15, 1988) the due date of its income tax return for its taxable year beginning June 1, 1987, and ending September 30, 1987. Since August 15, 1988, is 6 months or more after the due date (without extensions) of such return, paragraph (c)(1)(ii) of this section prevents H from further extending the time for filing such return.

Example (5). I, a partnership that historically used a June 30 taxable year, considered making a section 44 election to retain such taxable year, but eventually decided to change to a December 31, taxable year (I's required taxable year). Absent paragraph (c)(1)(i) of this section, I's Form 1065 for the taxable year beginning July 1, 1987, and ending December 31, 1987, is due on or before April 15, 1988. Pursuant to paragraph (c)(1)(i) of this section, if I types or legibly prints "SECTION 444 RETURN" at the top of Form 1065 for such year, paragraph (c)(1)(i) of this section automatically extends the due date of such return to August 15, 1988. In addition, I may further extend such return pursuant to paragraph (c)(1)(ii) of this section.

(2) **No penalty for certain late payments—(i) In general.** In the case of a personal service corporation or S corporation described in paragraph (c)(1)(i) of this section, no penalty under section 6651 (a)(2) will be imposed for failure to pay income tax (if any) for the first taxable year beginning after December 31, 1986, but only for the period beginning with the last date for payment and ending with the later of the date specified in paragraph (c)(1)(i) or paragraph (c)(1)(ii) of this section.

(ii) **Example.** The provisions of paragraph (c)(2)(i) of this section may be illustrated by the following example.

Example. J, a personal service corporation that historically used a January 31 taxable year, makes a section 444 election to retain such year for its taxable year beginning February 1, 1987. The last date (without extension) for payment of J's income tax (if any) for its taxable year beginning February 1, 1987, is April 15, 1988. However, under paragraph (c)(2)(i) of this section, no penalty under section 6651(a)(2) will be imposed on any underpayment of income tax for the period beginning April 15, 1988 and ending August 15, 1988.

(d) **Effective date.** This section is effective for taxable years beginning after December 31, 1986.

[T.D. 8205, 53 FR 19703, May 27, 1988]

Methods Of Accounting

Methods of Accounting in General

§ 1.446–1 General rule for methods of accounting.

(a) General rule. (1) Section 446(a) provides that taxable income shall be computed under the method of accounting on the basis of which a taxpayer regularly computes his income in keeping his books. The term "method of accounting" includes not only the overall method of accounting of the taxpayer but also the accounting treatment of any item. Examples of such over all methods are the cash receipts and disbursements method, an accrual method, combinations of such methods, and combinations of the foregoing with various methods provided for the accounting treatment of special items. These methods of accounting for special items include the accounting treatment prescribed for research and experimental expenditures, soil and water conservation expenditures, depreciation, net operating losses, etc. Except for deviations permitted or required by such special accounting treatment, taxable income shall be computed under the method of accounting on the basis of which the taxpayer regularly computes his income in keeping his books. For requirement respecting the adoption or change of accounting method, see section 446(e) and paragraph (e) of this section.

(2) It is recognized that no uniform method of accounting can be prescribed for all taxpayers. Each taxpayer shall adopt such forms and systems as are, in his judgment, best suited to his needs. However, no method of accounting is acceptable unless, in the opinion of the Commissioner, it clearly reflects income. A method of accounting which reflects the consistent application of generally accepted accounting principles in a particular trade or business in accordance with accepted conditions or practices in that trade or business will ordinarily be regarded as clearly reflecting income, provided all items of gross income and expense are treated consistently from year to year.

(3) Items of gross income and expenditures which are elements in the computation of taxable income need not be in the form of cash. It is sufficient that such items can be valued in terms of money. For general rules relating to the taxable year for inclusion of income and for taking deductions, see sections 451 and 461, and the regulations thereunder.

(4) Each taxpayer is required to make a return of his taxable income for each taxable year and must maintain such accounting records as will enable him to file a correct return. See section 6001 and the regulations thereunder. Accounting records include the taxpayer's regular books of account and such other records and data as may be necessary to support the entries on his books of account and on his return, as for example, a reconciliation of any differences between such books and his return. The following are among the essential features that must be considered in maintaining such records:

(i) In all cases in which the production, purchase, or sale of merchandise of any kind is an income-producing factor, merchandise on hand (including finished goods, work in process, raw materials, and supplies) at the beginning and end of the year shall be taken into account in computing the taxable income of the year. (For rules relating to computation of inventories, see sections 263A, 471, and 472, and the regulations thereunder.)

(ii) Expenditures made during the year shall be properly classified as between capital and expense. For example, expenditures for such items as plant and equipment, which have a useful life extending substantially beyond the taxable year, shall be charged to a capital account and not to an expense account.

(iii) In any case in which there is allowable with respect to an asset a deduction for depreciation, amortization, or depletion, any expenditures (other than ordinary repairs) made to restore the asset or prolong its useful life shall be added to the asset account or charged against the appropriate reserve.

(b) Exceptions. (1) If the taxpayer does not regularly employ a method of accounting which clearly reflects his income, the computation of taxable income shall be made in a manner which, in the opinion of the Commissioner, does clearly reflect income.

(2) A taxpayer whose sole source of income is wages need not keep formal books in order to have an accounting method. Tax returns, copies thereof, or other records may be sufficient to establish

the use of the method of accounting used in the preparation of the taxpayer's income tax returns.

(c) **Permissible methods—(1) In general.** Subject to the provisions of paragraphs (a) and (b) of this section, a taxpayer may compute his taxable income under any of the following methods of accounting:

(i) **Cash receipts and disbursements method.** Generally, under the cash receipts and disbursements method in the computation of taxable income, all items which constitute gross income (whether in the form of cash, property, or services) are to be included for the taxable year in which actually or constructively received. Expenditures are to be deducted for the taxable year in which actually made. For rules relating to constructive receipt, see § 1.451–2. For treatment of an expenditure attributable to more than one taxable year, see section 461(a) and paragraph (a)(1) of § 1.461–1.

(ii) **Accrual method.** Generally, under an accrual method, income is to be included for the taxable year when all the events have occurred which fix the right to receive such income and the amount thereof can be determined with reasonable accuracy. Under such a method, deductions are allowable for the taxable year in which all the events have occurred which establish the fact of the liability giving rise to such deduction and the amount thereof can be determined with reasonable accuracy. The method used by the taxpayer in determining when income is to be accounted for will be acceptable if it accords with generally accepted accounting principles, is consistently used by the taxpayer from year to year, and is consistent with the Income Tax Regulations. For example, under an accrual method, a taxpayer engaged in manufacturing may account for the sale of an item when the item is shipped, when the item is delivered, when the item is accepted, or when title to the item passes to the purchaser, whether or not billed, depending upon the method regularly employed in keeping the taxpayer's books; however, see § 1.451–5 relating to advance payments. The determination of when an item is shipped, delivered or accepted, or when title passes, does not depend upon when any other item in the contract is shipped, delivered or accepted, or when title passes.

(iii) **Other permissible methods.** Special methods of accounting are described elsewhere in chapter 1 of the Code and the regulations thereunder. For example, see the following sections and the regulations thereunder: Sections 61 and 162, relating to the crop method of accounting; section 453, relating to the installment method; section 451, relating to the long-term contract methods. In addition, special methods of accounting for particular items of income and expense are provided under other sections of chapter 1. For example, see section 174, relating to research and experimental expenditures, and section 175, relating to soil and water conservation expenditures.

(iv) **Combinations of the foregoing methods.** (a) In accordance with the following rules, any combination of the foregoing methods of accounting will be permitted in connection with a trade or business if such combination clearly reflects income and is consistently used. Where a combination of methods of accounting includes any special methods, such as those referred to in subdivision (iii) of this subparagraph, the taxpayer must comply with the requirements relating to such special methods. A taxpayer using an accrual method of accounting with respect to purchases and sales may use the cash method in computing all other items of income and expense. However, a taxpayer who uses the cash method of accounting in computing gross income from his trade or business shall use the cash method in computing expenses of such trade or business. Similarly, a taxpayer who uses an accrual method of accounting in computing business expenses shall use an accrual method in computing items affecting gross income from his trade or business.

(b) A taxpayer using one method of accounting in computing items of income and deductions of his trade or business may compute other items of income and deductions not connected with his trade or business under a different method of accounting.

(2) **Special rules.** (i) In any case in which it is necessary to use an inventory the accrual method of accounting must be used with regard to purchases and sales unless otherwise authorized under subdivision (ii) of this subparagraph.

(ii) No method of accounting will be regarded as clearly reflecting income unless all items of gross profit and deductions are treated with consistency from year to year. The Commissioner may authorize a taxpayer to adopt or change to a method of accounting permitted by this chapter although the method is not specifically described in the regulations in this part if, in the opinion of the Commissioner, income is clearly reflected by the use of such method. Further, the Commissioner may authorize a taxpayer to continue the use of a method of accounting consistently used by

the taxpayer, even though not specifically authorized by the regulations in this part, if, in the opinion of the Commissioner, income is clearly reflected by the use of such method. See section 446(a) and paragraph (a) of this section, which require that taxable income shall be computed under the method of accounting on the basis of which the taxpayer regularly computes his income in keeping his books, and section 446(e) and paragraph (e) of this section, which require the prior approval of the Commissioner in the case of changes in accounting method.

(d) Taxpayer engaged in more than one business. (1) Where a taxpayer has two or more separate and distinct trades or businesses, a different method of accounting may be used for each trade or business, provided the method used for each trade or business clearly reflects the income of that particular trade or business. For example, a taxpayer may account for the operations of a personal service business on the cash receipts and disbursements method and of a manufacturing business on an accrual method, provided such businesses are separate and distinct and the methods used for each clearly reflect income. The method first used in accounting for business income and deductions in connection with each trade or business, as evidenced in the taxpayer's income tax return in which such income or deductions are first reported, must be consistently followed thereafter.

(2) No trade or business will be considered separate and distinct for purposes of this paragraph unless a complete and separable set of books and records is kept for such trade or business.

(3) If, by reason of maintaining different methods of accounting, there is a creation or shifting of profits or losses between the trades or businesses of the taxpayer (for example, through inventory adjustments, sales, purchases, or expenses) so that income of the taxpayer is not clearly reflected, the trades or businesses of the taxpayer will not be considered to be separate and distinct.

(e) Requirement respecting the adoption or change of accounting method. (1) A taxpayer filing his first return may adopt any permissible method of accounting in computing taxable income for the taxable year covered by such return. See section 446(c) and paragraph (c) of this section for permissible methods. Moreover, a taxpayer may adopt any permissible method of accounting in connection with each separate and distinct trade or business, the income from which is reported for the first time. See section 446(d) and paragraph (d) of this section. See also section 446(a) and paragraph (a) of this section.

(2)(i) Except as otherwise expressly provided in chapter 1 of the Code and the regulations thereunder, a taxpayer who changes the method of accounting employed in keeping his books shall, before computing his income upon such new method for purposes of taxation, secure the consent of the Commissioner. Consent must be secured whether or not such method is proper or is permitted under the Internal Revenue Code or the regulations thereunder.

(ii)(*a*) A change in the method of accounting includes a change in the overall plan of accounting for gross income or deductions or a change in the treatment of any material item used in such overall plan. Although a method of accounting may exist under this definition without the necessity of a pattern of consistent treatment of an item, in most instances a method of accounting is not established for an item without such consistent treatment. A material item is any item which involves the proper time for the inclusion of the item in income or the taking of a deduction. Changes in method of accounting include a change from the cash receipts and disbursement method to an accrual method, or vice versa, a change involving the method or basis used in the valuation of inventories (see sections 471 and 472 and the regulations thereunder), a change from the cash or accrual method to a long-term contract method, or vice versa (see § 1.451–3), a change involving the adoption, use or discontinuance of any other specialized method of computing taxable income, such as the crop method, and a change where the Internal Revenue Code and regulations thereunder specifically require that the consent of the Commissioner must be obtained before adopting such a change.

(*b*) A change in method of accounting does not include correction of mathematical or posting errors, or errors in the computation of tax liability (such as errors in computation of the foreign tax credit, net operating loss, percentage depletion or investment credit). Also, a change in method of accounting does not include adjustment of any item of income or deduction which does not involve the proper time for the inclusion of the item of income or the taking of a deduction. For example, corrections of items that are deducted as interest or salary, but which are in fact payments of dividends, and of items that are deducted as business expenses, but which are in fact personal expenses, are not changes in method of accounting. In addition, a change in the method of accounting does not include an adjustment with

respect to the addition to a reserve for bad debts or an adjustment in the useful life of a depreciable asset. Although such adjustments may involve the question of the proper time for the taking of a deduction, such items are traditionally corrected by adjustments in the current and future years. For the treatment of the adjustment of the addition to a bad debt reserve, see the regulations under section 166 of the Code; for the treatment of a change in the useful life of a depreciable asset, see the regulations under section 167(b) of the Code. A change in the method of accounting also does not include a change in treatment resulting from a change in underlying facts. On the other hand, for example, a correction to require depreciation in lieu of a deduction for the cost of a class of depreciable assets which has been consistently treated as an expense in the year of purchase involves the question of the proper timing of an item, and is to be treated as a change in method of accounting.

(c) A change in an overall plan or system of identifying or valuing items in inventory is a change in method of accounting. Also a change in the treatment of any material item used in the overall plan for identifying or valuing items in inventory is a change in method of accounting.

(iii) A change in the method of accounting may be illustrated by the following examples:

Example (1). Although the sale of merchandise is an income producing factor, and therefore inventories are required, a taxpayer in the retail jewelry business reports his income on the cash receipts and disbursements method of accounting. A change from the cash receipts and disbursements method of accounting to the accrual method of accounting is a change in the overall plan of accounting and thus is a change in method of accounting.

Example (2). A taxpayer in the wholesale dry goods business computes its income and expenses on the accrual method of accounting and files its Federal income tax returns on such basis except for real estate taxes which have been reported on the cash receipts and disbursements method of accounting. A change in the treatment of real estate taxes from the cash receipts and disbursements method to the accrual method is a change in method of accounting because such change is a change in the treatment of a material item within his overall accounting practice.

Example (3). A taxpayer in the wholesale dry goods business computes its income and expenses on the accrual method of accounting and files its Federal income tax returns on such basis. Vacation pay has been deducted in the year in which paid because the taxpayer did not have a completely vested vacation pay plan, and, therefore, the liability for payment did not accrue until that year. Subsequently, the taxpayer adopts a completely vested vacation pay plan that changes its year for accruing the deduction from the year in which payment is made to the year in which the liability to make the payment now arises. The change for the year of deduction of the vacation pay plan is not a change in method of accounting but results, instead, because the underlying facts (that is, the type of vacation pay plan) have changed.

Example (4). From 1968 through 1970, a taxpayer has fairly allocated indirect overhead costs to the value of inventories on a fixed percentage of direct costs. If the ratio of indirect overhead costs to direct costs increases in 1971, a change in the underlying facts has occurred. Accordingly, an increase in the percentage in 1971 to fairly reflect the increase in the relative level of indirect overhead costs is not a change in method of accounting but is a change in treatment resulting from a change in the underlying facts.

Example (5). A taxpayer values inventories at cost. A change in the basis for valuation of inventories from cost to the lower of cost or market is a change in an overall practice of valuing items in inventory. The change, therefore, is a change of method of accounting for inventories.

Example (6). A taxpayer in the manufacturing business has for many taxable years valued its inventories at cost. However, cost has been improperly computed since no overhead costs have been included in valuing the inventories at cost. The failure to allocate an appropriate portion of overhead to the value of inventories is contrary to the requirement of the Internal Revenue Code and the regulations thereunder. A change requiring appropriate allocation of overhead is a change in method of accounting because it involves a change in the treatment of a material item used in the overall practice of identifying or valuing items in inventory.

Example (7). A taxpayer has for many taxable years valued certain inventories by a method which provides for deducting 20 percent of the cost of the inventory items in determining the final inventory valuation. The 20 percent adjustment is taken as a "reserve for price changes." Although this method is not a proper method of valuing inventories under the Internal Revenue Code or the regulations thereunder, it involves the treatment of a material item used in the overall practice of valuing inventory. A change in such practice or procedure is a change of method of accounting for inventories.

Example (8). A taxpayer has always used a base stock system of accounting for inventories. Under this system a constant price is applied to an assumed constant normal quantity of goods in stock. The base stock system is an overall plan of accounting for inventories which is not recognized as a proper method of accounting for inventories under the regulations. A change in this practice is, nevertheless, a change of method of accounting for inventories.

(3)(i) Except as otherwise provided under the authority of subdivision (ii) of this subparagraph, in order to secure the Commissioner's consent to a change of a taxpayer's method of accounting, the taxpayer must file an application on Form 3115 with the Commissioner of Internal Revenue, Washington, D.C. 20224, within 180 days after the beginning of the taxable year in which it is desired to make the change. The taxpayer shall, to the extent applicable, furnish (a) all information requested on such form, disclosing in detail all classes of items which would be treated differently under the new method of accounting and showing all amounts which would be duplicated or omitted as a result of the proposed change and (b) the taxpayer's computation of the adjustments to take into account such duplications or omissions. The Commissioner may require such other information

as may be necessary in order to determine whether the proposed change will be permitted. Permission to change a taxpayer's method of accounting will not be granted unless the taxpayer and the Commissioner agree to the terms, conditions, and adjustments under which the change will be effected. See section 481 and the regulations thereunder, relating to certain adjustments required by such changes, section 472 and the regulations thereunder, relating to changes to and from the last-in, first-out method of inventorying goods, and section 453 and the regulations thereunder, relating to certain adjustments required by a change from an accrual method to the installment method.

(ii) Notwithstanding the provisions of subdivision (i) of this subparagraph, the Commissioner may prescribe administrative procedures, subject to such limitations, terms, and conditions as he deems necessary to obtain his consent, to permit taxpayers to change their accounting practices or methods to an acceptable treatment consistent with applicable regulations. Limitations, terms, and conditions, as may be prescribed in such administrative procedures by the Commissioner, shall include those necessary to prevent the omission or duplication of items includible in gross income or deductions.

[T.D. 6500, 25 FR 11708, Nov. 26, 1960, as amended by T.D. 7073, 35 FR 17710, Nov. 18, 1970; T.D. 7285, 38 FR 26184, Sept. 19, 1973; T.D. 8067, 51 FR 378, Jan. 6, 1986; T.D. 8131, 52 FR 10084, March 30, 1987]

§ 1.448–1T Limitation on the use of the cash receipts and disbursements method of accounting (temporary).

(a) Limitation on accounting method—(1) In general. This section prescribes regulations under section 448 relating to the limitation on the use of the cash receipts and disbursements method of accounting (the cash method) by certain taxpayers.

(2) Limitation rule. Except as otherwise provided in this section, the computation of taxable income using the cash method is prohibited in the case of a—

(i) C corporation,

(ii) Partnership with a C corporation as a partner, or

(iii) Tax shelter.

A partnership is described in paragraph (a)(2)(ii) of this section, if the partnership has a C corporation as a partner at any time during the partnership's taxable year beginning after December 31, 1986.

(3) **Meaning of C corporation.** For purposes of this section, the term "C corporation" includes any corporation that is not an S corporation. For example, a regulated investment company (as defined in section 851) or a real estate investment trust (as defined in section 856) is a C corporation for purposes of this section. In addition, a trust subject to tax under section 511 (b) shall be treated, for purposes of this section, as a C corporation, but only with respect to the portion of its activities that constitute an unrelated trade or business. Similarly, for purposes of this section, a corporation that is exempt from federal income taxes under section 501 (a) shall be treated as a C corporation only with respect to the portion of its activities that constitute an unrelated trade or business. Moreover, for purposes of determining whether a partnership has a C corporation as a partner, any partnership described in paragraph (a)(2)(ii) of this section is treated as a C corporation. Thus, if partnership ABC has a partner that is a partnership with a C corporation, then, for purposes of this section, partnership ABC is treated as a partnership with a C corporation partner.

(4) **Treatment of a combination of methods.** For purposes of this section, the use of a method of accounting that records some, but not all, items on the cash method shall be considered the use of the cash method. Thus, a C corporation that uses a combination of accounting methods including the use of the cash method is subject to this section.

(b) Tax shelter defined—(1) In general. For purposes of this section, the term "tax shelter" means any—

(i) Enterprise (other than a C corporation) if at any time (including taxable years beginning before January 1, 1987) interests in such enterprise have been offered for sale in any offering required to be registered with any federal or state agency having the authority to regulate the offering of securities for sale,

(ii) Syndicate (within the meaning of paragraph (b)(3) of this section), or

(iii) Tax shelter within the meaning of section 6661 (b)(2)(C)(ii) (relating to (A) a partnership or other entity, (B) any investment plan or arrangement, or (C) any other plan or arrangement, whose principal purpose is the avoidance or evasion of Federal income tax).

(2) **Requirement of registration.** For purposes of paragraph (b)(1)(i) of this section, an offering is required to be registered with a federal or state agency if, under the applicable federal or state law, failure to register the offering would result in a violation of the applicable federal or state law (regardless of whether the offering is in fact registered). In addition, an offering is required to be registered with a federal or state agency if, under the applicable federal or state law, failure to file a notice of exemption from registration would result in a violation of the applicable federal or state law (regardless of whether the notice is in fact filed).

(3) **Meaning of syndicate.** For purposes of paragraph (b)(1)(ii) of this section, the term "syndicate" means a partnership or other entity (other than a C corporation) if more than 35 percent of the losses of such entity during the taxable year (for taxable years beginning after December 31, 1986) are allocated to limited partners or limited entrepreneurs. For purposes of this paragraph (b)(3), the term "limited entrepreneur" has the same meaning given such term in section 464 (e)(2). In addition, in determining whether an interest in a partnership is held by a limited partner, or an interest in an entity or enterprise is held by a limited entrepreneur, section 464 (c)(2) shall apply in the case of the trade or business of farming (as defined in paragraph (d)(2) of this section), and section 1256 (e)(3)(C) shall apply in any other case. Moreover, for purposes of this paragraph (b) (3), the losses of a partnership, entity, or enterprise (the enterprise) means the excess of the deductions allowable to the enterprise over the amount of income recognized by such enterprise under the enterprise's method of accounting used for federal income tax purposes (determined without regard to this section). For this purpose, gains or losses from the sale of capital assets or section 1221 (2) assets are not taken into account.

(4) **Presumed tax avoidance.** For purposes of paragraph (b)(1)(iii) of this section, marketed arrangements in which persons carrying on farming activities using the services of a common managerial or administrative service will be presumed to have the principal purpose of tax avoidance if such persons use borrowed funds to prepay a substantial portion of their farming expenses (e.g., payment for farm supplies that will not be used or consumed until a taxable year subsequent to the taxable year of payment).

(5) **Taxable year tax shelter must change accounting method.** A partnership, entity, or enterprise that is a tax shelter must change from the cash method for the later of (i) the first taxable year beginning after December 31, 1986, or (ii) the taxable year that such partnership, entity, or enterprise becomes a tax shelter.

(c) **Effect of section 448 on other provisions.** Nothing in section 448 shall have any effect on the application of any other provision of law that would otherwise limit the use of the cash method, and no inference shall be drawn from section 448 with respect to the application of any such provision. For example, nothing in section 448 affects the requirement of section 447 that certain corporations must use an accrual method of accounting in computing taxable income from farming, or the requirement of § 1.446-1(c)(2) that an accrual method be used with regard to purchases and sales of inventory. Similarly, nothing in section 448 affects the authority of the Commissioner under section 446(b) to require the use of an accounting method that clearly reflects income, or the requirement under section 446(e) that a taxpayer secure the consent of the Commissioner before changing its method of accounting. For example, a taxpayer using the cash method may be required to change to an accrual method of accounting under section 446(b) because such method clearly reflects that taxpayer's income, even though the taxpayer is not prohibited by section 448 from using the cash method. Similarly, a taxpayer using an accrual method of accounting that is not prohibited by section 448 from using the cash method may not change to the cash method unless the taxpayer secures the consent of the Commissioner under section 446(e), and, in the opinion of the Commissioner, the use of the cash method clearly reflects that taxpayer's income under section 446(b).

(d) **Exception for farming business—(1) In general.** Except in the case of a tax shelter, this section shall not apply to any farming business. A taxpayer engaged in a farming business and a separate nonfarming business is not prohibited by this section from using the cash method with respect to the farming business, even though the taxpayer may be prohibited by this section from using the cash method with respect to the nonfarming business.

(2) **Meaning of farming business.** For purposes of paragraph (d) of this section, the term "farming business" means—

(i) The trade or business of farming as defined in section 263A(e)(4) (including the operation of a nursery or sod farm, or the raising or harvesting of trees bearing fruit, nuts, or other crops, or ornamental trees), or

(ii) The raising, harvesting, or growing of trees described in section 263A(c)(5) (relating to trees raised, harvested, or grown by the taxpayer other than trees described in paragraph (d)(2)(i) of this section).

Thus, for purposes of this section, the term "farming business" includes the raising of timber. For purposes of this section, the term "farming business" does not include the processing of commodities or products beyond those activities normally incident to the growing, raising or harvesting of such products. For example, assume that a C corporation taxpayer is in the business of growing and harvesting wheat and other grains. The taxpayer processes the harvested grains to produce breads, cereals, and similar food products which it sells to customers in the course of its business. Although the taxpayer is in the farming business with respect to the growing and harvesting of grain, the taxpayer is not in the farming business with respect to the processing of such grains to produce food products which the taxpayer sells to customers. Similarly, assume that a taxpayer is in the business of raising poultry or other livestock. The taxpayer uses the livestock in a meat processing operation in which the livestock are slaughtered, processed, and packaged or canned for sale to customers. Although the taxpayer is in the farming business with respect to the raising of livestock, the taxpayer is not in the farming business with respect to the meat processing operation. However, under this section the term "farming business" does include processing activities which are normally incident to the growing, raising or harvesting of agricultural products. For example, assume a taxpayer is in the business of growing fruits and vegetables. When the fruits and vegetables are ready to be harvested, the taxpayer picks, washes, inspects, and packages the fruits and vegetables for sale. Such activities are normally incident to the raising of these crops by farmers. The taxpayer will be considered to be in the business of farming with respect to the growing of fruits and vegetables, and the processing activities incident to the harvest.

(e) Exception for qualified personal service corporation—(1) In general. Except in the case of a tax shelter, this section does not apply to a qualified personal service corporation.

(2) Certain treatment for qualified personal service corporation. For purposes of paragraph (a)(2)(ii) of this section (relating to whether a partnership has a C corporation as a partner), a qualified personal service corporation shall be treated as an individual.

(3) Meaning of qualified personal service corporation. For purposes of this section, the term "qualified personal service corporation" means any corporation that meets—

(i) The function test paragraph (e)(4) of this section, and

(ii) The ownership test of paragraph (e)(5) of this section.

(4) Function test—(i) In general. A corporation meets the function test if substantially all the corporation's activities for a taxable year involve the performance of services in one or more of the following fields—

(A) Health,

(B) Law,

(C) Engineering (including surveying and mapping),

(D) Architecture,

(E) Accounting,

(F) Actuarial science,

(G) Performing arts, or

(H) Consulting.

Substantially all of the activities of a corporation are involved in the performance of services in any field described in the preceding sentence (a qualifying field), only if 95 percent or more of the time spent by employees of the corporation, serving in their capacity as such, is devoted to the performance of services in a qualifying field. For purposes of determining whether this 95 percent test is satisfied, the performance of any activity incident to the actual performance of services in a qualifying field is considered the performance of services in that field. Activities incident to the performance of services in a qualifying field include the supervision of employees engaged in directly providing services to clients, and the performance of administrative and support services incident to such activities.

(ii) Meaning of services performed in the field of health. For purposes of paragraph (e)(4)(i)(A) of this section, the performance of services in the field of health means the provision of medical services by physicians, nurses, dentists, and other similar healthcare professionals. The performance of services in the field of health does not include the provision of services not directly related to a medical field, even though the services may purportedly relate to the health of the service recipi-

ent. For example, the performance of services in the field of health does not include the operation of health clubs or health spas that provide physical exercise or conditioning to their customers.

(iii) **Meaning of services performed in the field of performing arts.** For purposes of paragraph (e)(4)(i)(G) of this section, the performance of services in the field of the performing arts means the provision of services by actors, actresses, singers, musicians, entertainers, and similar artists in their capacity as such. The performance of services in the field of the performing arts does not include the provision of services by persons who themselves are not performing artists (e.g., persons who may manage or promote such artists, and other persons in a trade or business that relates to the performing arts). Similarly, the performance of services in the field of the performing arts does not include the provision of services by persons who broadcast or otherwise disseminate the performances of such artists to members of the public (e.g., employees of a radio station that broadcasts the performances of musicians and singers). Finally, the performance of services in the field of the performing arts does not include the provision of services by athletes.

(iv) **Meaning of services performed in the field of consulting**—(A) In general. For purposes of paragraph (e)(4)(i)(H) of this section, the performance of services in the field of consulting means the provision of advice and counsel. The performance of services in the field of consulting does not include the performance of services other than advice and counsel, such as sales or brokerage services, or economically similar services. For purposes of the preceding sentence, the determination of whether a person's services are sales or brokerage services, or economically similar services, shall be based on all the facts and circumstances of that person's business. Such facts and circumstances include, for example, the manner in which the taxpayer is compensated for the services provided (e.g., whether the compensation for the services is contingent upon the consummation of the transaction that the services were intended to effect).

(B) Examples. The following examples illustrate the provisions of paragraph (e)(4)(iv)(A) of this section. The examples do not address all types of services that may or may not qualify as consulting. The determination of whether activities not specifically addressed in the examples qualify as consulting shall be made by comparing the service activities in question to the types of service activities discussed in the examples. With respect to a corporation which performs services which qualify as consulting under this section, and other services which do not qualify as consulting, see paragraph (e)(4)(i) of this section which requires that substantially all of the corporation's activities involve the performance of services in a qualifying field.

Example (1). A taxpayer is in the business of providing economic analyses and forecasts of business prospects for its clients. Based on these analyses and forecasts, the taxpayer advises its clients on their business activities. For example, the taxpayer may analyze the economic conditions and outlook for a particular industry which a client is considering entering. The taxpayer will then make recommendations and advise the client on the prospects of entering the industry, as well as on other matters regarding the client's activities in such industry. The taxpayer provides similar services to other clients, involving, for example, economic analyses and evaluations of business prospects in different areas of the United States or in other countries, or economic analyses of overall economic trends and the provision of advice based on these analyses and evaluations. The taxpayer is considered to be engaged in the performance of services in the field of consulting.

Example (2). A taxpayer is in the business of providing services that consist of determining a client's electronic data processing needs. The taxpayer will study and examine the client's business, focusing on the types of data and information relevant to the client and the needs of the client's employees for access to this information. The taxpayer will then make recommendations regarding the design and implementation of data processing systems intended to meet the needs of the client. The taxpayer does not, however, provide the client with additional computer programming services distinct from the recommendations made by the taxpayer with respect to the design and implementation of the client's data processing systems. The taxpayer is considered to be engaged in the performance of services in the field of consulting.

Example (3). A taxpayer is in the business of providing services that consist of determining a client's management and business structure needs. The taxpayer will study the client's organization, including, for example, the departments assigned to perform specific functions, lines of authority in the managerial hierarchy, personnel hiring, job responsibility, and personnel evaluations and compensation. Based on the study, the taxpayer will then advise the client on changes in the client's management and business structure, including, for example, the restructuring of the client's departmental systems or its lines of managerial authority. The taxpayer is considered to be engaged in the performance of services in the field of consulting.

Example (4). A taxpayer is in the business of providing financial planning services. The taxpayer will study a particular client's financial situation, including, for example, the client's present income, savings and investments, and anticipated future economic and financial needs. Based on this study, the taxpayer will then assist the client in making decisions and plans regarding the client's financial activities. Such financial planning includes the design of a personal budget to assist the client in monitoring the client's financial situation, the adoption of investment strategies tailored to the client's needs, and other similar services. The taxpayer is considered to be engaged in the performance of services in the field of consulting.

Example (5). A taxpayer is in the business of executing transactions for customers involving various types of securities or commodities generally traded through organized exchanges or other similar networks. The taxpayer provides its clients

with economic analyses and forecasts of conditions in various industries and businesses. Based on these analyses, the taxpayer makes recommendations regarding transactions in securities and commodities. Clients place orders with the taxpayer to trade securities or commodities based on the taxpayer's recommendations. The taxpayer's compensation for its services is typically based on the trade orders. The taxpayer is not considered to be engaged in the performance of services in the field of consulting. The taxpayer is engaged in brokerage services. Relevant to this determination is the fact that the compensation of the taxpayer for its services is contingent upon the consummation of the transaction the services were intended to effect (i.e., the execution of trade orders for its clients).

Example (6). A taxpayer is in the business of studying a client's needs regarding its data processing facilities and making recommendations to the client regarding the design and implementation of data processing systems. The client will then order computers and other data processing equipment through the taxpayer based on the taxpayer's recommendations. The taxpayer's compensation for its services is typically based on the equipment orders made by the clients. The taxpayer is not considered to be engaged in the performance of services in the field of consulting. The taxpayer is engaged in the performance of sales services. Relevant to this determination is the fact that the compensation of the taxpayer for its services is contingent upon the consummation of the transaction the services were intended to effect (i.e., the execution of equipment orders for its clients).

Example (7). A taxpayer is in the business of assisting businesses in meeting their personnel requirements by referring job applicants to employers with hiring needs in a particular area. The taxpayer may be informed by potential employers of their need for job applicants, or, alternatively, the taxpayer may become aware of the client's personnel requirements after the taxpayer studies and examines the client's management and business structure. The taxpayer's compensation for its services is typically based on the job applicants, referred by the taxpayer to the clients, who accept employment positions with the clients. The taxpayer is not considered to be engaged in the performance of services in the field of consulting. The taxpayer is involved in the performance of services economically similar to brokerage services. Relevant to this determination is the fact that the compensation of the taxpayer for its services is contingent upon the consummation of the transaction the services were intended to effect (i.e., the hiring of a job applicant by the client).

Example (8). The facts are the same as in example (7), except that the taxpayer's clients are individuals who use the services of the taxpayer to obtain employment positions. The taxpayer is typically compensated by its clients who obtain employment as a result of the taxpayer's services. For the reasons set forth in example (7), the taxpayer is not considered to be engaged in the performance of services in the field of consulting.

Example (9). A taxpayer is in the business of assisting clients in placing advertisements for their goods and services. The taxpayer analyzes the conditions and trends in the client's particular industry, and then makes recommendations to the client regarding the types of advertisements which should be placed by the client and the various types of advertising media (e.g., radio, television, magazines, etc.) which should be used by the client. The client will then purchase, through the taxpayer, advertisements in various media based on the taxpayer's recommendations. The taxpayer's compensation for its services is typically based on the particular orders for advertisements which the client makes. The taxpayer is not considered to be engaged in the performance of services in the field of consulting. The taxpayer is engaged in the performance of services economically similar to brokerage services. Relevant to this determination is the fact that the compensation of the taxpayer for its services is contingent upon the consummation of the transaction the services were intended to effect (i.e., the placing of advertisements by clients).

Example (10). A taxpayer is in the business of selling insurance (including life and casualty insurance), annuities, and other similar insurance products to various individual and business clients. The taxpayer will study the particular client's financial situation, including, for example, the client's present income, savings and investments, business and personal insurance risks, and anticipated future economic and financial needs. Based on this study, the taxpayer will then make recommendations to the client regarding the desirability of various insurance products. The client will then purchase these various insurance products through the taxpayer. The taxpayer's compensation for its services is typically based on the purchases made by the clients. The taxpayer is not considered to be engaged in the performance of services in the field of consulting. The taxpayer is engaged in the performance of brokerage or sales services. Relevant to this determination is the fact that the compensation of the taxpayer for its services is contingent upon the consummation of the transaction the services were intended to effect (i.e., the purchase of insurance products by its clients).

(5) Ownership test—(i) In general. A corporation meets the ownership test, if at all times during the taxable year, substantially all the corporation's stock, by value, is held, directly or indirectly, by—

(A) Employees performing services for such corporation in connection with activities involving a field referred to in paragraph (e)(4) of this section,

(B) Retired employees who had performed such services for such corporation,

(C) The estate of any individual described in paragraph (e)(5)(i) (A) or (B) of this section, or

(D) Any other person who acquired such stock by reason of the death of an individual described in paragraph (e)(5)(i) (A) or (B) of this section, but only for the 2-year period beginning on the date of the death of such individual.

For purposes of this paragraph (e)(5) of this section, the term "substantially all" means an amount equal to or greater than 95 percent.

(ii) Definition of employee. For purposes of the ownership test of this paragraph (e)(5) of this section, a person shall not be considered an employee of a corporation unless the services performed by that person for such corporation, based on the facts and circumstances, are more than de minimis. In addition, a person who is an employee of a corporation shall not be treated as an employee of another corporation merely by reason of the employer corporation and the other corporation being members of the same affiliated group or otherwise related.

(iii) Attribution rules. For purposes of this paragraph (e)(5) of this section, a corporation's stock is considered held indirectly by a person if, and to the extent, such person owns a proportionate interest in a partnership, S corporation, or qualified personal service corporation that owns such stock. No other arrangement or type of ownership shall constitute indirect ownership of a corporation's stock for purposes of this paragraph (e)(5) of this section. Moreover, stock of a corporation held by a trust is considered held by a person if, and to the extent, such person is treated under subpart E, part I, subchapter J, chapter 1 of the Code as the owner of the portion of the trust that consists of such stock.

(iv) Disregard of community property laws. For purposes of this paragraph (e) (5) of this section, community property laws shall be disregarded. Thus, in determining the stock ownership of a corporation, stock owned by a spouse solely by reason of community property laws shall be treated as owned by the other spouse.

(v) Treatment of certain stock plans. For purposes of this paragraph (e)(5) of this section, stock held by a plan described in section 401 (a) that is exempt from tax under section 501 (a) shall be treated as held by an employee described in paragraph (e)(5)(i)(A) of this section.

(vi) Special election for certain affiliated groups. For purposes of determining whether the stock ownership test of this paragraph (e)(5) of this section has been met, at the election of the common parent of an affiliated group (within the meaning of section 1504 (a)), all members of such group shall be treated as one taxpayer if substantially all (within the meaning of paragraph (e)(4)(i) of this section) the activities of all such members (in the aggregate) are in the same field described in paragraph (e)(4)(i)(A)-(H) of this section. For rules relating to the making of the election, see 26 CFR 5h.5 (temporary regulations relating to elections under the Tax Reform Act of 1986).

(vii) Examples. The following examples illustrate the provisions of paragraph (e) of this section:

Example (1). (i) X, a Corporation, is engaged in the business of providing accounting services to its clients. These services consist of the preparation of audit and financial statements and the preparation of tax returns. For purposes of section 448, such services consist of the performance of services in the field of accounting. In addition, for purposes of section 448, the supervision of employees directly preparing the statements and returns, and the performance of all administrative and support services incident to such activities (including secretarial, janitorial, purchasing, personnel, security, and payroll services) are the performance of services in the field of accounting.

(ii) In addition, X owns and leases a portion of an office building. For purposes of this section, the following types of activities undertaken by the employees of X shall be considered as the performance of services in a field other than the field of accounting: (A) services directly relating to the leasing activities, e.g., time spent in leasing and maintaining the leased portion of the building; (B) supervision of employees engaged in directly providing services in the leasing activity; and (C) all administrative and support services incurred incident to services described in (A) and (B). The leasing activities of X are considered the performance of services in a field other than the field of accounting, regardless of whether such leasing activities constitute a trade or business under the Code. If the employees of X spend 95% or more of their time in the performance of services in the field of accounting, X satisfies the function test of paragraph (e)(4) of this section.

Example (2). Assume that Y, a C corporation, meets the function test of paragraph (e)(4) of this section. Assume further that all the employees of Y are performing services for Y in a qualifying field as defined in paragraph (e)(4) of this section. P, a partnership, owns 40%, by value, of the stock of Y. The remaining 60% of the stock of Y is owned directly by employees of Y. Employees of Y have an aggregate interest of 90% in the capital and profits of P. This, 96% of the stock of Y is held directly, or indirectly, by employees of Y performing services in a qualifying field. Accordingly, Y meets the ownership test of paragraph (e)(5) of this section and is a qualified personal service corporation.

Example (3). The facts are the same as in example (2), except that 40% of the stock of Y is owned by Z, a C corporation. The remaining 60% of the stock is owned directly by the employees of Y. Employees of Y own 90% of the stock, by value, of Z. Assume that Z independently qualifies as a personal service corporation. The result is the same as in example (2), i.e., 96% of the stock of Y is held, directly or indirectly, by employees of Y performing services in a qualifying field. Thus, Y is a qualified personal service corporation.

Example (4). The facts are the same as in example (3), except that Z does not independently qualify as a personal service corporation. Because Z is not a qualified personal service corporation, the Y stock owned by Z is not treated as being held indirectly by the Z shareholders. Consequently, only 60% of the stock of Y is held, directly or indirectly, by employees of Y. Thus, Y does not meet the ownership test of paragraph (e)(5) of this section, and is not a qualified personal service corporation.

Example (5). Assume that W, a C corporation, meets the function test of paragraph (e)(4) of this section. In addition, assume that all the employees of W are performing services for W in a qualifying field. Nominal legal title to 100% of the stock of W is held by employees of W. However, due solely to the operation of community property laws, 20% of the stock of W is held by spouses of such employees who themselves are not employees of W. In determining the ownership of the stock, community property laws are disregarded. Thus, Y meets the ownership test of paragraph (e)(5) of this section, and is a qualified personal service corporation.

Example (6). Assume that 90% of the stock of T, a C corporation, is directly owned by the employees of T. Spouses of T's employees directly own 5% of the stock of T. The spouses are not employees of T, and their ownership does not occur solely by operation of community property laws. In addition, 5% of the stock of T is held by trusts (other than a trust described in section 401(a) that is exempt from tax under section 501(a)), the sole beneficiaries of which are employees of

T. The employees are not treated as owners of the trusts under subpart E, part I, subchapter J, chapter 1 of the Code. Since a person is not treated as owning the stock of a corporation owned by that person's spouse, or by any portion of a trust that is not treated as owned by such person under subpart E, only 90% of the stock of T is treated as held, directly or indirectly, by employees of T. Thus, T does not meet the ownership test of paragraph (e)(5) of this section, and is not a qualified personal service corporation.

Example (7). Assume that Y, a C corporation, directly owns all the stock of three subsidiaries, F, G, and H. Y is a common parent of an affiliated group within the meaning of section 1504(a) consisting of Y, F, G, and H. Y is not engaged in the performance of services in a qualifying field. Instead, Y is a holding company whose activities consist of its ownership and investment in its operating subsidiaries. Substantially all the activities of F involve the performance of services in the field of engineering. In addition, a majority of (but not substantially all) the activities of G involve the performance of services in the field of engineering; the remainder of G's services involve the performance of services in a nonqualifying field. Moreover, a majority of (but not substantially all) the activities of H involve the performance of services in the field of engineering; the remainder of H's activities involve the performance of services in the field of architecture. Nevertheless, substantially all the activities of the group consisting of Y, F, G, and H, in the aggregate, involve the performance of services in the field of engineering. Accordingly, Y elects under paragraph (e)(5)(vi) of this section to be treated as one taxpayer for determining the ownership test of paragraph (e)(5) of this section. Assume that substantially all the stock of Y (by value) is held by employees of F, G, or H who perform services in connection with a qualifying field (engineering or architecture). Thus, for purposes of determining whether any member corporation is a qualified personal service corporation, the ownership test of paragraph (e)(5) of this section has been satisfied. Since F and H satisfy the function test of paragraph (e)(4) of this section, F and H are qualified personal service corporations. However, since Y and G each fail the function test of paragraph (e)(4) of this section, neither corporation is a qualified personal service corporation.

Example (8). The facts are the same as in example (7), except that less than substantially all the activities of the group consisting of Y, F, G, and H, in the aggregate, are performed in the field of engineering. Substantially all the activities of the group consisting of Y, F, G, and H, are, in the aggregate, performed in two fields, the fields of engineering and architecture. Y may not elect to have the affiliated group treated as one taxpayer for purposes of determining whether group members meet the ownership test of paragraph (e)(5) of this section. The election is available only if substantially all the activities of the group, in the aggregate, involve the performance of services in only one qualifying field. Moreover, none of the group members are qualified personal service corporations. Y fails the function test of paragraph (e)(4) of this section because less than substantially all the activities of Y are performed in a qualifying field. In addition, F, G, and H fail the ownership test of paragraph (e)(5) of this section because substantially all their stock is owned by Y and not by their employees. The owners of Y are not deemed to indirectly own the stock owned by Y because Y is not a qualified personal service corporation.

Example (9). (i) The facts are the same as in example (8), except Y itself satisfies the function tests of paragraph (e)(4) of this section because substantially all the activities of Y involve the performance of services in the field of engineering. In addition, assume that all employees of Y are involved in the performance of services in the field of engineering, and that all such employees own 100% of Y's stock. Moreover, assume that one-third of all the employees of Y are separately employed by F. Similarly, another one-third of the employees of Y are separately employed by G and H, respectively. None of the employees of Y are employed by more than one of Y's subsidiaries. Also, no other persons except the employees of Y are employed by any of the subsidiaries.

(ii) Y is a personal service corporation under section 448 because Y satisfies both the function and the ownership test of paragraphs (e) (4) and (5) of this section. As in example (8), Y is unable to make the election to have the affiliated group treated as one taxpayer for purposes of determining whether group members meet the ownership test of paragraph (e)(5) of this section because less than substantially all the activities, in the aggregate, of the group members are performed in one of the qualifying fields. However, because Y is a personal service corporation, the stock owned by Y is treated as indirectly owned, proportionately, by the owners of Y. Thus, the employees of F are collectively treated as owning one-third of the stock of F, G, and H. The employees of G and H are similarly treated as owning one-third of each subsidiary's stock.

(iii) F, G, and H each fail the ownership test of paragraph (e)(5) of this section because less than substantially all of each corporation's stock is owned by the employees of the respective corporation. Only one-third of each corporation's stock is owned by employees of that corporation. Thus, F, G, and H are not qualified personal service corporations.

Example (10). (i) Assume that Y, a C corporation, directly owns all the stock of three subsidiaries, F, G, and Z. Y is a common parent of an affiliated group within the meaning of section 1504(a) consisting of Y, F, and G. Z is a foreign corporation and is excluded from the affiliated group under section 1504. Assume that Y is a holding company whose activities consist of its ownership and investment in its operating subsidiaries. Substantially all the activities of F, G, and Z involve the performance of services in the field of engineering. Assume that employees of Z own one-third of the stock of Y and that none of these employees are also employees of Y, F, or G. In addition, assume that Y elects to be treated as one taxpayer for determining whether group members meet the ownership tests of paragraph (e)(5) of this section. Thus, Y, F, and G are treated as one taxpayer for purposes of the ownership test.

(ii) None of the members of the group are qualified personal service corporations. Y, F, and G fail the ownership test of paragraph (e)(5) of this section because less than substantially all the stock of Y is owned by employees of either Y, F, or G. Moreover, Z fails the ownership test of paragraph (e)(5) of this section because substantially all its stock is owned by Y and not by its employees.

(6) Application of function and ownership tests. A corporation that fails the function test of paragraph (e)(4) of this section for any taxable year, or that fails the ownership test of paragraph (e)(5) of this section at any time during any taxable year, shall change from the cash method effective for the year in which the corporation fails to meet the function test or the ownership test. For example, if a personal service corporation fails the function test for taxable year 1987, such corporation must change from the cash method effective for taxable year 1987. A corporation that fails the function or ownership test for a taxable year shall not be treated as a qualified personal service corporation for any part of that taxable year.

(f) Exception for entities with gross receipts of not more than $5 million—(1) In general. Except in the case of a tax shelter, this section shall not apply to any C corporation or partnership with a C corporation as a partner for any taxable year if, for all prior taxable years beginning after December 31, 1985, such corporation or partnership (or any predecessor thereof) meets the $5,000,000 gross receipts test of paragraph (f)(2) of this section.

(2) The $5,000,000 gross receipts test—(i) In general. A corporation meets the $5,000,000 gross receipts test of this paragraph (f)(2) for any prior taxable year if the average annual gross receipts of such corporation for the 3 taxable years (or, if shorter, the taxable years during which such corporation was in existence) ending with such prior taxable year does not exceed $5,000,000. In the case of a C corporation exempt from federal income taxes under section 501(a), or a trust subject to tax under section 511(b) that is treated as a C corporation under paragraph (a)(3) of this section, only gross receipts from the activities of such corporation or trust that constitute unrelated trades or businesses are taken into account in determining whether the $5,000,000 gross receipts test is satisfied. A partnership with a C corporation as a partner meets the $5,000,000 gross receipts test of this paragraph (f)(2) for any prior taxable year if the average annual gross receipts of such partnership for the 3 taxable years (or, if shorter, the taxable years during which such partnership was in existence) ending with such prior year does not exceed $5,000,000. The gross receipts of the corporate partner are not taken into account in determining whether the partnership meets the $5,000,000 gross receipts test.

(ii) Aggregation of gross receipts. For purposes of determining whether the $5,000,000 gross receipts test has been satisfied, all persons treated as a single employer under section 52 (a) or (b), or section 414 (m) or (*o*) (or who would be treated as a single employer under such sections if they had employees) shall be treated as one person. Gross receipts attributable to transactions between persons who are treated as a common employer under this paragraph shall not be taken into account in determining whether the $5,000,000 gross receipts test is satisfied.

(iii) Treatment of short taxable year. In the case of any taxable year of less than 12 months (a short taxable year), the gross receipts shall be annualized by (A) multiplying the gross receipts for the short period by 12 and (B) dividing the result by the number of months in the short period.

(iv) Determination of gross receipts—(A) In general. The term "gross receipts" means gross receipts of the taxable year in which such receipts are properly recognized under the taxpayer's accounting method used in that taxable year (determined without regard to this section) for federal income tax purposes. For this purpose, gross receipts include total sales (net of returns and allowances) and all amounts received for services. In addition, gross receipts include any income from investments, and from incidental or outside sources. For example, gross receipts include interest (including original issue discount and tax-exempt interest within the meaning of section 103), dividends, rents, royalties, and annuities, regardless of whether such amounts are derived in the ordinary course of the taxpayer's trade or business. Gross receipts are not reduced by cost of goods sold or by the cost of property sold if such property is described in section 1221 (1), (3), (4) or (5). With respect to sales of capital assets as defined in section 1221, or sales of property described in 1221 (2) (relating to property used in a trade or business), gross receipts shall be reduced by the taxpayer's adjusted basis in such property. Gross receipts do not include the repayment of a loan or similar instrument (e.g., a repayment of the principal amount of a loan held by a commercial lender). Finally, gross receipts do not include amounts received by the taxpayer with respect to sales tax or other similar state and local taxes if, under the applicable state or local law, the tax is legally imposed on the purchaser of the good or service, and the taxpayer merely collects and remits the tax to the taxing authority. If, in contrast, the tax is imposed on the taxpayer under the applicable law, then gross receipts shall include the amounts received that are allocable to the payment of such tax.

(3) Examples. The following examples illustrate the provisions of paragraph (f) of this section:

Example (1). X, a calendar year C corporation, was formed on January 1, 1986. Assume that in 1986 X has gross receipts of $15 million. For taxable year 1987, this section applies to X because in 1986, the period during which X was in existence, X has average annual gross receipts of more than $5 million.

Example (2). Y, a calendar year C corporation that is not a qualified personal service corporation, has gross receipts of $10 million, $9 million, and $4 million for taxable years 1984, 1985, and 1986, respectively. In taxable year 1986, X has average annual gross receipts for the 3-taxable-year period ending with 1986 of $7.67 million ($10 million + 9 million + 4 million '3). Thus, for taxable year 1987, this section applies and Y must change from the cash method for such year.

Example (3). Z, a C corporation which is not a qualified personal service corporation, has a 5% partnership interest in ZAB partnership, a calendar year cash method taxpayer. All other partners of ZAB partnership are individuals. Z corporation has average annual gross receipts of $100,000 for the 3-taxable-year period ending with 1986 (i.e., 1984, 1985 and 1986). The ZAB partnership has average annual gross receipts of $6 million for the same 3-taxable-year period. Since ZAB fails to meet the $5,000,000 gross receipts test for 1986, this section applies to ZAB for its taxable year beginning January 1, 1987. Accordingly, ZAB must change from the cash method for its 1987 taxable year. The gross receipts of Z corporation are not relevant in determining whether ZAB is subject to this section.

Example (4). The facts are the same as in example (3), except that during the 1987 taxable year of ZAB, the Z corporation transfers its partnership interest in ZAB to an individual. Under paragraph (a)(1) of this section, ZAB is treated as a partnership with a C corporation as a partner. Thus, this section requires ZAB to change from the cash method effective for its taxable year 1987. If ZAB later desires to change its method of accounting to the cash method for its taxable year beginning January 1, 1988 (or later), ZAB must comply with all requirements of law, including sections 446(b), 446(e), and 481, to effect the change.

Example (5). X, a C corporation that is not a qualified personal service corporation, was formed on January 1, 1986, in a transaction described in section 351. In the transaction, A, an individual, contributed all of the assets and liabilities of B, a trade or business, to X, in return for the receipt of all the outstanding stock of X. Assume that in 1986 X has gross receipts of $4 million. In 1984 and 1985, the gross receipts of B, the trade or business, were $10 million and $7 million respectively. The gross receipts test is applied for the period during which X and its predecessor trade or business were in existence. X has average annual gross receipts for the 3-taxable-year period ending with 1986 of $7 million ($10 million + $7 million + $4 million'3). Thus, for taxable year 1987, this section applies and X must change from the cash method for such year.

(g) Treatment of accounting method change and timing rules for section 481(a) adjustment—(1) Treatment of change in accounting method. In the case of any taxpayer required by this section to change its method of accounting for any taxable year, such change shall be treated as initiated by the taxpayer and made with the consent of the Commissioner. Thus, the adjustments required under section 481(a) with respect to the change in method of accounting of such a taxpayer shall not be reduced to amounts attributable to taxable years preceding the Internal Revenue Code of 1954. See paragraph (h) of this section for rules to effect the change in accounting method.

(2) Timing rules for section 481(a) adjustment—(i) In general. Except as otherwise provided in paragraph (g)(2)(ii) and (g)(3) of this section, a taxpayer required by this section to change from the cash method shall take the section 481(a) adjustment into account ratably (beginning with the year of change) over a shorter of—

(A) The number of taxable years the taxpayer uses the cash method, or

(B) 4 taxable years.

(ii) Hospital timing rules—(A) In general. In the case of a hospital required by this section to change from the cash method, the section 481(a) adjustment shall be taken into account ratably (beginning with the year of change) over 10 years.

(B) Definition of hospital. For purposes of paragraph (g) of this section, a hospital is an institution—

(1) Accredited by the Joint Commission of Accreditation of Hospitals (the JCAH) (or accredited or approved by a program of the qualified governmental unit in which such institution is located if the Secretary of Health and Human Services has found that the accreditation or comparable approval standards of such qualified governmental unit are essentially equivalent to those of the JCAH);

(2) Used primarily to provide, by or under the supervision of physicians, to inpatients diagnostic services and therapeutic services for medical diagnosis, treatment, and care of injured, disabled, or sick persons;

(3) Requiring every patient to be under the care and supervision of a physician; and

(4) Providing 24-hour nursing services rendered or supervised by a registered professional nurse and having a licensed practical nurse or registered nurse on duty at all times.

For purposes of this section, an entity need not be owned by or on behalf of a governmental unit or by a section 501(c)(3) organization, or operated by a section 501(c)(3) organization, in order to be considered a hospital. In addition, for purposes of this section, a hospital does not include a rest or nursing home, continuing care facility, daycare center, medical school facility, research laboratory, or ambulatory care facility.

(C) Dual function facilities. With respect to any taxpayer whose operations consist both of a hospital, and other facilities not qualifying as a hospital, the portion of the adjustment required by section 481(a) that is attributable to the hospital shall be taken into account in accordance with the rules of paragraph (g)(2) of this section relating to hospitals. The portion of the adjustment required by section 481(a) that is not attributable to the hospital shall be taken into account in accordance with the rules of paragraph (g)(2) of this section not relating to hospitals.

(3) Special timing rules for section 481(a) adjustment—(i) One-third rule. If, during the period the section 481(a) adjustment is to be taken into account, the balance of the taxpayer's accounts receivable as of the last day of each of two consecutive taxable years is less than 66⅔ percent of the taxpayer's accounts receivable balance at the beginning of the first year of the section 481(a) adjustment, the balance of the section 481(a) adjustment (relating to accounts receivable) not previously taken into account shall be included in income in the second taxable year. This paragraph (g)(3)(i) shall not apply to any hospital (within the meaning of paragraph (g)(3)(ii) of this section).

(ii) Cooperatives. Notwithstanding paragraph (g)(2)(i) of this section, if a taxpayer is a cooperative within the meaning of section 1381(a), the entire section 481(a) adjustment may, at the taxpayer's option, be taken into account in the year of change.

(iii) Cessation of trade or business. If a taxpayer ceases to engage in the trade or business to which the section 481(a) adjustment relates prior to the expiration of the adjustment period described in paragraph (g)(2) (i) or (ii) of this section, the taxpayer must take into account, in the year of such cessation, the balance of the adjustment not previously taken into account in computing taxable income. If the taxpayer is acquired in a transaction to which section 381 applies, and the acquiring corporation continues to engage in the trade or business to which the section 481(a) adjustment relates, the acquiring taxpayer shall continue to take into account the section 481(a) adjustment as if it were the distributor or transferor taxpayer.

(4) Additional rules relating to section 481(a) adjustment. In addition to the rules set forth in paragraph (g) (2) and (3) of this section, the following rules shall apply in taking the section 481(a) adjustment into account—

(i) Any net operating loss and tax credit carryforwards will be allowed to offset any positive section 481(a) adjustment,

(ii) Any net operating loss arising in the year of change or in any subsequent year that is attributable to a negative section 481(a) adjustment may be carried back to earlier taxable years in accordance with section 172, and

(iii) For purposes of determining estimated income tax payments under sections 6654 and 6655, the section 481(a) adjustment will be recognized in taxable income ratably throughout a taxable year.

(5) Outstanding section 481(a) adjustment from previous change in method of accounting. If a taxpayer changed its method of accounting to the cash method for a taxable year prior to the year the taxpayer was required by this section to change from the cash method (the section 488 year), any section 481(a) adjustment from such prior change in method of accounting that is outstanding as of the section 488 year shall be taken into account in accordance with the provisions of this paragraph (g)(5). A taxpayer shall account for any remaining portion of the prior section 481(a) adjustment outstanding as of the section 488 year by continuing to take such remaining portion into account under the provisions and conditions of the prior change in method of accounting, or, at the taxpayer's option, combining or netting the remaining portion of the prior section 481(a) adjustment with the section 481(a) adjustment required under this section, and taking into account under the provisions of this section the resulting net amount of the adjustment. Any taxpayer choosing to combine or net the section 481(a) adjustments as described in the preceding sentence shall indicate such choice on the Form 3115 required to be filed by such taxpayer under the provisions of paragraph (h) of this section.

(6) Examples. The following examples illustrate the provisions of paragraph (g) of this section.

Example (1). Y is required by this section to change from the cash method of accounting for its taxable year beginning January 1, 1987. Y changes to an overall accrual method. The adjustment required by section 481(a) to effect the change is $10,000. Y has been using the cash method for the 10-year period preceding the year of change. Y is required by paragraph (g)(2)(i) of this section to include the section 481(a) adjustment in taxable income ratably over four consecutive taxable years, beginning with 1987, i.e., $2,500 of the section 481(a) adjustment should be included in income for each of the four years.

Example (2). The facts are the same as in example (1), except that Y is required to change from the cash method and changes to an overall accrual method of accounting for its taxable year beginning January 1, 1989. The result is the same as in example (1), except that the four-year period for ratably taking the section 481(a) adjustment into account begins with the 1989 taxable year.

Example (3). Assume that X is required by this section to change from the cash method and that it changes to an overall accrual method for its taxable year beginning January 1, 1987. The adjustment required by section 481 (a) to effect the change is $10,000. X was formed on January 1, 1986, and began business operations during that year. Since X only used the cash method for one year, X is required by paragraph (g)(2)(i) of this section to include all ($10,000) of the section 481(a) adjustment in taxable income for the 1987 taxable year.

Example (4). The facts are the same as in example (1). In addition, Y previously changed from an accrual method of

accounting to the cash method for its taxable year beginning January 1, 1983. As a result of that prior change, Y was required to take into account a $5,000 negative section 481(a) adjustment ratably over a ten-year period, beginning with the 1983 taxable year.

As of the beginning of the 1987 taxable year $3,000 of that adjustment had not been taken into account. Y may continue to take the remaining negative $3,000 section 481(a) adjustment into account ratably over the remaining adjustment period for the prior change in method of accounting (i.e., six remaining years). Alternatively, Y may combine or net the negative $3,000 adjustment with the positive $10,000 section 481(a) adjustment required by this section, and include the resulting $7,000 amount in taxable income ratably over four consecutive taxable years, beginning with 1987. Y is not allowed to take the entire unamortized amount of the prior section 481(a) adjustment into account for its 1987 taxable year.

(h) Procedures for change in method of accounting—(1) Applicability. Paragraph (h) of this section applies to taxpayers who change from the cash method as required by this section. Paragraph (h) of this section does not apply to a change in accounting method required by any Code section (or regulations thereunder) other than this section.

(2) Automatic rule for changes to an overall accrual method. Taxpayers to whom paragraph (h) of this section applies who desire to change to an overall accrual method must make that change under the provisions of this paragraph (h)(2). The consent of the Commissioner to the change in method of accounting is granted to taxpayers who change to an overall accrual method under this paragraph (h)(2). A taxpayer changing to an accrual method under this paragraph (h)(2) shall complete and file a current Form 3115. The Form 3115 shall be filed no later than the due date (including extension) of the taxpayer's federal income tax return for the year of change and shall be attached to that return. In addition, the taxpayer must set forth on a statement accompanying the Form 3115 the period over which the section 481(a) adjustment will be taken into account and the basis for such conclusion. Moreover, the taxpayer shall type or legibly print the following statement at the top of page 1 on Form 3115: "Automatic Change to Accrual Method—Section 448."

(3) Changes to a method other than overall accrual method—(i) In general. Taxpayers to whom paragraph (h) of this section applies who desire to change to a special method of accounting must make that change under the provisions of this paragraph (h)(3). Such taxpayers include taxpayers who change to an accrual method of accounting and a special method of accounting such as a long-term contract method. Taxpayers who change their accounting method under this paragraph (h)(3) shall submit an application for change in accounting method under the applicable administrative procedures in effect at the time of change, including the applicable procedures regarding the time and place of filing the application for change in method. Moreover, taxpayers who change their accounting method under this paragraph (h)(3) shall type or legibly print the following statement on the top of page 1 of Form 3115: "Change to a Special Method of Accounting-Section 448." The filing of a Form 3115 by any taxpayer requesting a change of method of accounting under this paragraph (h)(3) for its taxable year beginning in 1987 shall not be considered late if such form is filed with the appropriate office of the Internal Revenue Service on or before the later of (A) the date that is the 180th day of the taxable year of change; or (B) September 14, 1987. If the Commissioner approves the taxpayer's application for change in method of accounting, then the timing of the adjustment required under section 481(a), if applicable, shall be determined under the provisions of paragraph (g)(2) of this section. If the Commissioner denies the taxpayer's application for change in accounting method, or the taxpayer's application is untimely, the taxpayer must change to an overall accrual method of accounting under the provisions of paragraph (h)(1) of this section for the taxable year of the taxpayer's request to change from the cash method.

(ii) Extension of filing deadline. Notwithstanding paragraph (h)(3)(i) of this section, if the events or circumstances which under section 448 disqualify a taxpayer from using the cash method occur after the time prescribed under applicable procedures for filing the Form 3115, the filing of such form shall not be considered late if such form is filed on or before 30 days after the close of the taxable year.

(i) Effective date—(1) In general. Except as provided in paragraph (i)(2) of this section, this section applies to any taxable year beginning after December 31, 1986.

(2) Election out of section 448—(i) In general. A taxpayer may elect not to have this section apply to any (A) transaction with a related party (within the meaning of section 267(b) of the Internal Revenue Code of 1954, as in effect on October 21, 1986), (B) loan, or (C) lease, if such transaction, loan, or lease was entered into on or before September 25, 1985. Any such election described in the preceding sentence may be made separately with respect to each transaction, loan, or lease. For rules relating to the making of such election,

see 26 CFR 5h.5 (temporary regulations relating to elections under the Tax Reform Act of 1986). Notwithstanding the provisions of this paragraph (i)(2), the gross receipts attributable to a transaction, loan, or lease described in this paragraph (i)(2) shall be taken into account for purposes of the $5,000,000 gross receipts test described in paragraph (f) of this section.

(ii) Special rules for loans. If the taxpayer makes an election under paragraph (i)(2)(i) of this section with respect to a loan entered into on or before September 25, 1985, the election shall apply only with respect to amounts that are attributable to the loan balance outstanding on September 25, 1985. The election shall not apply to any amounts advanced or lent after September 25, 1985, regardless of whether the loan agreement was entered into on or before such date. Moreover, any payments made on outstanding loan balances after September 25, 1985, shall be deemed to first extinguish loan balances outstanding on September 25, 1985, regardless of any contrary treatment of such loan payments by the borrower and lender.

[T.D. 8143, 52 FR 22766, June 16, 1987]

§ 1.448–2T Nonaccrual of certain amounts by service providers (temporary).

(a) In general. Except as otherwise provided, this section applies to any person using an accrual method of accounting with respect to amounts to be received from the performance of services by such person. This section applies to such persons regardless of whether such persons changed their method of accounting from the cash method under section 448. For example, this section applies to a taxpayer who used an overall accrual method of accounting in taxable years prior to 1987.

(b) Nonaccrual-experience method; treatment as method of accounting. Any person to whom this section applies is not required to accrue any portion of amounts to be received from the performance of services which, on the basis of experience, will not be collected. This nonaccrual of amounts to be received for the performance of services shall be treated as a method of accounting under the Code (the nonaccrual-experience method).

(c) Method not available if interest charged on amounts due—(1) In general. The nonaccrual-experience method of accounting may not be used with respect to amounts due for which interest is required to be paid, or for which there is any penalty for failure to timely pay any amounts due. For this purpose, interest or penalties for late payment will be deemed to be charged by a taxpayer if such treatment is in accordance with the economic substance of a transaction, regardless of the characterization of the transaction by the parties, or the treatment of the transaction under state or local law. However, the offering of a discount for early payment of an amount due will not be regarded as the charging of interest or penalties for late payment under this section, if (i) the full amount due is otherwise accrued as gross income by the taxpayer at the time the services are provided, and (ii) the discount for early payment is treated as an adjustment to gross income in the year of payment, if payment is received within the time required for allowance of such discount.

(2) Example. The provisions of this paragraph (c) may be illustrated by the following example:

Example. X uses an accrual method of accounting for amounts to be received from the provision of services. For such amounts, X has two billing methods. Under one method, for amounts that are more than 90 days past due, X charges interest at a market rate until such amounts (together with interest) are paid. Under the other billing method, X charges no interest for amounts past due. X cannot use the nonaccrual-experience method of accounting with respect to any of the amounts billed under the method that charges interest on amounts that are more than 90 days past due. X may, however, use the nonaccrual-experience method with respect to the amounts billed under the method that does not charge interest for amounts past due.

(d) Method not available for certain receivables. The nonaccrual-experience method of accounting may be used only with respect to amounts earned by the taxpayer and otherwise recognized in income (an account receivable) through the performance of services by such taxpayer. For example, the nonaccrual-experience method may not be used with respect to amounts owed to the taxpayer by reason of the taxpayer's activities with respect to (1) lending money; (2) selling goods; or (3) acquiring receivables or other rights to receive payment from other persons (including persons related to the taxpayer) regardless of whether those other persons earned such amounts through the provision of services.

(e) Use of experience to estimate uncollectible amounts—(1) In general. In determining the portion of any amount due which, on the basis of experience, will not be collected, the formula prescribed by paragraph (e)(2) of this section shall be used by the taxpayer with respect to each separate trade or business of the taxpayer. No other method or formula may be used by a taxpayer in determining the uncollectible amounts under this section.

(2) Six-year moving average—(i) General rule. For any taxable year the uncollectible amount of a receivable is the amount of that receivable which bears the same ratio to the account receivable outstanding at the close of the taxable year as (A) the total bad debts (with respect to accounts receivable) sustained throughout the period consisting of the taxable year and the five preceding taxable years (or, with the approval of the Commissioner, a shorter period), adjusted for recoveries of bad debts during such period, bears to (B) the sum of the accounts receivable earned throughout the entire six (or fewer) taxable year period (i.e., the total amount of sales resulting in accounts receivable) throughout the period. Accounts receivable described in paragraphs (c) and (d) of this section are not taken into account in computing the ratio.

(ii) Period of less than six years. A period shorter than six years generally will be appropriate only if there is a change in the type of a substantial portion of the outstanding accounts receivable such that the risk of loss is substantially increased. A decline in the general economic conditions in the area, which substantially increases the risk of loss, is a relevant factor in determining whether a shorter period is appropriate. However, approval to use a shorter period will not be granted unless the taxpayer supplies specific evidence that the loans outstanding at the close of the taxable years for the shorter period requested are not comparable in nature and risk to loans outstanding at the close of the six taxable years. A substantial increase in a taxpayer's bad debt experience, is not, by itself, sufficient to justify the use of a shorter period. If approval is granted to use a shorter period, the experience for the excluded taxable years shall not be used for any subsequent year. A request for approval to exclude the experience of a prior taxable year shall be made in accordance with the applicable procedures for requesting a letter ruling and shall include a statement of the reasons such experience should be excluded. A request will not be considered unless it is sent to the Commissioner at least 30 days before the close of the first taxable year for which such approval is requested.

(iii) Special rule for new taxpayers. In the case of any current taxable year which is preceded by less than 5 taxable years, paragraph (e)(2)(i) of this section shall be applied by using the experience of the current year and the actual number of preceding taxable years. However, for this purpose, experience from preceding taxable years of a predecessor trade or business may be used in applying paragraph (e)(2)(i) of this section.

(3) Mechanics of nonaccrual-experience method. The nonaccrual-experience method shall be applied with respect to each account receivable of the taxpayer which is eligible for such method. With respect to a particular account receivable, the taxpayer will determine, in the manner prescribed in paragraph (e) of this section, the amount of such account receivable that is not expected to be collected. Such determination shall be made only once with respect to each account receivable, regardless of the term of such receivable. The estimated uncollectible amount shall not be recognized as gross income. Thus, the amount recognized as gross income shall be the amount that would otherwise be recognized as gross income with respect to the account receivable, less the amount which is not expected to be collected. Upon the collection of the account receivable, additional gross income shall be recognized with respect to the collection of any amount not initially expected to be collected. Similarly, no bad debt deduction under section 166 for a wholly or partially worthless account receivable shall be allowed for any amount not previously taken into income under the nonaccrual-experience method.

(4) Examples. The following examples illustrate the provisions of paragraph (e) of this section:

Example (1). X is a calendar year service provider that uses an accrual method of accounting with respect to the amounts (accounts receivable) to be received from the provision of services. X does not require the payment of interest or penalties with respect to past due accounts receivable. Assume that under this section, X adopts for taxable year 1987 the nonaccrual-experience method of accounting with respect to its accounts receivable. Further, assume that X's total accounts receivable and bad debt experience for the current and five preceding taxable years is as follows:

Years	Total accounts receivable	Bad debts adjusted for recoveries
1982	$ 30,000	$ 5,700
1983	40,000	7,200
1984	50,000	11,000
1985	60,000	10,200
1986	70,000	14,000
1987	80,000	16,800
	330,000	64,900

Thus, the ratio of the bad debts (adjusted for recoveries) for the current and five preceding taxable years to the total accounts receivable over the same period is 19.67% ($64,900/$330,000). Assume that $49,300 of the total $80,000 of accounts receivable earned throughout the taxable year 1987 are outstanding as of the close of such year. Assume further that the $49,300 of the accounts receivable outstanding as of the close of the tax year 1987 consist of 10 separate accounts receivable. The uncollectible amount of each receivable is

19.67%. The amount of these accounts receivable and the uncollectible amount of each is as follows:

	Accounts receivable	Applicable ratio	Uncollectible amount
1.	$ 5,200	.1967	$1,022.84
2.	7,300	.1967	1,435.91
3.	3,200	.1967	629.44
4.	4,300	.1967	845.81
5.	1,700	.1967	334.39
6.	4,000	.1967	786.80
7.	6,300	.1967	1,239.21
8.	8,000	.1967	1,573.60
9.	3,200	.1967	629.44
10.	6,100	.1967	1,199.87
		49,300	9,697.31

For taxable year 1987, X will not accrue as income $9,697.31 of its accounts receivable of $49,300 outstanding as of the close of the year.

Example (2). The facts are the same as in example (1). In 1988 the entire amount of account receivable number 8 becomes wholly worthless. Since in 1987 X did not accrue as income under the nonaccrual-experience method $1,573.60 of that account receivable, no deduction under section 166 is allowable with respect to that amount of the account receivable; a deduction of $6,426.40 under section 166 is allowable for 1988.

Example (3). The facts are the same as in example (1). In 1988 X collects, in full, account receivable number 5. Accordingly, in 1988 X must recognize additional gross income of $334.39, the amount of the account receivable that was initially considered uncollectible.

(5) **Special rule for estimated tax.** For purposes of section 6654 or 6655 only (relating to the addition to tax for underpayment of estimated tax), a taxpayer's income does not include eligible income attributable to the period before May 16, 1988. A taxpayer's eligible income is the excess (if any) of—

(i) Income (including the amount of any adjustment required under section 481(a)) computed with a bad debt experience ratio using accounts receivable earned throughout the period ending at the close of the six-year period (or other shorter period) described in paragraph (e)(2)(i) of this section, over

(ii) Income (including the amount of any adjustment required under section 481(a)) computed with a bad debt experience ratio using the year-end balances of accounts receivable over such six-year (or other shorter) period.

(f) [Reserved].

(g) Coordination of change in accounting method with section 481—(1) Taxpayers required to change their method of accounting under section 448. The provisions of this paragraph (g)(1) apply to taxpayers who under § 1.448-1T(h) change from the cash method as required by section 448 and who also change under paragraph (h) of this section to a method of accounting that includes the nonaccrual-experience method. With respect to such taxpayers, the section 481(a) adjustment resulting from the change in method of accounting to the nonaccrual-experience method shall be combined or netted with the section 481(a) adjustment applicable to the change in method of accounting required under section 448. The resulting amount shall then be taken into account in accordance with the provisions of § 1.448-1T(g) applicable to the change in method of accounting required by section 448.

(2) Taxpayers not required to change their method of accounting under section 448. The provisions of this paragraph (g)(2) apply to taxpayers who are not required by section 448 to change their method of accounting (e.g., taxpayers who were using an accrual method of accounting for taxable years preceding 1987) and who change to the nonaccrual-experience method under paragraph (h)(3) of this section. With respect to such taxpayers, the section 481(a) adjustment resulting from the change in method of accounting to the nonaccrual-experience method shall be taken into account ratably over four taxable years. The provisions of this paragraph (g)(2) shall apply to any taxpayer regardless of whether such taxpayer was required to change its method of accounting for bad debts under section 805 of the Tax Reform Act of 1986.

(h) Changes in method of accounting to nonaccrual-experience method—(1) Automatic changes to overall accrual method. The provisions of this paragraph (h)(1) apply to taxpayers who change from the cash method as required by section 448, and change to an overall accrual method of accounting under the automatic change provisions of § 1.448-1T(h)(2). Taxpayers to whom this paragraph (h)(1) applies may automatically change their method of accounting to the nonaccrual-experience method under this paragraph (h)(1), if they otherwise qualify under this section for the use of such method. Taxpayers changing to the nonaccrual-experience method under this paragraph (h)(1) shall comply with the provisions of § 1.448-1T(h)(2). Moreover, such taxpayers shall type or legibly print the following statement at the top of page 1 of Form 3115: "Automatic Change to Nonaccrual-Experience Method—Section 448." The consent of the Commissioner to the change in method of accounting is granted to taxpayers changing to the nonaccrual-experience method under this paragraph (h)(1).

(2) Changes to a method other than overall accrual method. The provisions of this paragraph (h)(2) apply to taxpayers who change from the cash method as required by section 448 and who also change to a permissible special method of accounting under § 1.448-1T(h)(3). Taxpayers to whom this paragraph (h)(2) applies may change their method of accounting to the nonaccrual-experience method under this paragraph (h)(2). Taxpayers changing to the nonaccrual-experience method under this paragraph (h)(2) shall comply with the provisions of § 1.448-1T(h)(3). Moreover, such taxpayers shall type or legibly print the following statement on the top of page 1 of Form 3115: "Change to Nonaccrual-Experience Method and Special Method of Accounting-Section 448." The consent of the Commissioner to the change in method of accounting is granted to taxpayers changing to the nonaccrual-experience method under this paragraph (h)(2).

(3) Taxpayers not required to change their method of accounting under section 448. The provisions of this paragraph (h)(3) apply to taxpayers who are not required by section 448 to change their method of accounting for the taxable year in which such taxpayers desire to adopt the nonaccrual-experience method (e.g., taxpayers who were using an accrual method of accounting for taxable years preceding 1987). Such taxpayers may automatically change their method of accounting to the nonaccrual-experience method under the provisions of this paragraph (h)(3), for their taxable year beginning in 1987, if they otherwise qualify under the provisions of this section for the use of such method. Taxpayers changing to the nonaccrual-experience method for their taxable year beginning in 1987 shall complete and file a current Form 3115. The Form 3115 shall be filed no later than the due date (including extension) of the taxpayer's federal income tax return for the year of change and shall be attached to that return. Moreover, the taxpayer shall type or legibly print the following statement at the top of page 1 of Form 3115: "Automatic Change to Nonaccrual-Experience Method—Taxpayer not Required to Change Method of Accounting Under Section 448." The consent of the Commissioner to the change in method of accounting is granted to taxpayers changing to the nonaccrual-experience method for their taxable year beginning in 1987 under this paragraph (h)(3). With respect to taxpayers described in this paragraph (h)(3) who desire to change to the nonaccrual-experience method for a taxable year beginning after December 31, 1987, such taxpayers shall submit an application for change in accounting method under the administrative procedures applicable to taxpayers at the time of change, including the applicable procedures regarding the time and place of filing the application for change in method. Taxpayers described in the preceding sentence include taxpayers who were required to change their method of accounting under section 448 for an earlier taxable year, but who did not change to the nonaccrual-experience method at that time.

(i) Effective date. This section applies to any taxable year beginning after December 31, 1986.

[T.D. 8143, 52 FR 22774, June 16, 1987; T.D. 8194, 53 FR 12513, April 15, 1988]

Taxable Year For Which Items Of Gross Income Included

§ 1.451–1 General rule for taxable year of inclusion.

(a) General rule. Gains, profits, and income are to be included in gross income for the taxable year in which they are actually or constructively received by the taxpayer unless includible for a different year in accordance with the taxpayer's method of accounting. Under an accrual method of accounting, income is includible in gross income when all the events have occurred which fix the right to receive such income and the amount thereof can be determined with reasonable accuracy. Therefore, under such a method of accounting if, in the case of compensation for services, no determination can be made as to the right to such compensation or the amount thereof until the services are completed, the amount of compensation is ordinarily income for the taxable year in which the determination can be made. Under the cash receipts and disbursements method of accounting, such an amount is includible in gross income when actually or constructively received. Where an amount of income is properly accrued on the basis of a reasonable estimate and the exact amount is subsequently determined, the difference, if any, shall be taken into account for the taxable year in which such determination is made. To the extent that income is attributable to the recovery of bad debts for accounts charged off in prior years, it is includible in the year of recovery in accordance with the taxpayer's method of accounting, regardless of the date when the amounts were charged off. For treatment of bad debts and bad debt recoveries, see sections 166 and 111 and the

regulations thereunder. For rules relating to the treatment of amounts received in crop shares, see section 61 and the regulations thereunder. For the year in which a partner must include his distributive share of partnership income, see section 706(a) and paragraph (a) of § 1.706–1. If a taxpayer ascertains that an item should have been included in gross income in a prior taxable year, he should, if within the period of limitation, file an amended return and pay any additional tax due. Similarly, if a taxpayer ascertains that an item was improperly included in gross income in a prior taxable year, he should, if within the period of limitation, file claim for credit or refund of any overpayment of tax arising therefrom.

(b) Special rule in case of death. (1) A taxpayer's taxable year ends on the date of his death. See section 443(a)(2) and paragraph (a)(2) of § 1.443–1. In computing taxable income for such year, there shall be included only amounts properly includible under the method of accounting used by the taxpayer. However, if the taxpayer used an accrual method of accounting, amounts accrued only by reason of his death shall not be included in computing taxable income for such year. If the taxpayer uses no regular accounting method, only amounts actually or constructively received during such year shall be included. (For rules relating to the inclusion of partnership income in the return of a decedent partner, see subchapter K, chapter 1 of the Code, and the regulations thereunder.)

(2) If the decedent owned an installment obligation the income from which was taxable to him under section 453, no income is required to be reported in the return of the decedent by reason of the transmission at death of such obligation. See section 453(d)(3). For the treatment of installment obligations acquired by the decedent's estate or by any person by bequest, devise, or inheritance from the decedent, see section 691(a)(4) and the regulations thereunder.

(c) Special rule for employee tips. Tips reported by an employee to his employer in a written statement furnished to the employer pursuant to section 6053(a) shall be included in gross income of the employee for the taxable year in which the written statement is furnished the employer. For provisions relating to the reporting of tips by an employee to his employer, see section 6053 and § 31.6053–1 of this chapter (Employment Tax Regulations).

(d) Special rule for ratable inclusion of original issue discount. For ratable inclusion of original issue discount in respect of certain corporate obligations issued after May 27, 1969, see section 1232(a)(3).

(e) Special rule for inclusion of qualified tax refund effected by allocation. For rules relating to the inclusion in income of an amount paid by a taxpayer in respect of his liability for a qualified State individual income tax and allocated or reallocated in such a manner as to apply it toward the taxpayer's liability for the Federal income tax, see paragraph (f)(1) of § 301.6361–1 of this chapter (Regulations on Procedure and Administration).

[T.D. 6500, 25 FR 11709, Nov. 26, 1960, as amended by T.D. 7001, 34 FR 997, Jan. 23, 1969; T.D. 7154, 36 FR 24996, Dec. 28, 1971; T.D. 7577, 43 FR 59357, Dec. 20, 1978]

§ 1.451–2 Constructive receipt of income.

(a) General rule. Income although not actually reduced to a taxpayer's possession is constructively received by him in the taxable year during which it is credited to his account, set apart for him, or otherwise made available so that he may draw upon it at any time, or so that he could have drawn upon it during the taxable year if notice of intention to withdraw had been given. However, income is not constructively received if the taxpayer's control of its receipt is subject to substantial limitations or restrictions. Thus, if a corporation credits its employees with bonus stock, but the stock is not available to such employees until some future date, the mere crediting on the books of the corporation does not constitute receipt. In the case of interest, dividends, or other earnings (whether or not credited) payable in respect of any deposit or account in a bank, building and loan association, savings and loan association, or similar institution, the following are not substantial limitations or restrictions on the taxpayer's control over the receipt of such earnings:

(1) A requirement that the deposit or account, and the earnings thereon, must be withdrawn in multiples of even amounts;

(2) The fact that the taxpayer would, by withdrawing the earnings during the taxable year, receive earnings that are not substantially less in comparison with the earnings for the corresponding period to which the taxpayer would be entitled had he left the account on deposit until a later date (for example, if an amount equal to three months' interest must be forfeited upon withdrawal or redemption before maturity of a one year or less certificate of deposit, time deposit, bonus plan, or other deposit arrangement then the earnings payable on premature withdrawal or redemption

would be substantially less when compared with the earnings available at maturity);

(3) A requirement that the earnings may be withdrawn only upon a withdrawal of all or part of the deposit or account. However, the mere fact that such institutions may pay earnings on withdrawals, total or partial, made during the last three business days of any calendar month ending a regular quarterly or semiannual earnings period at the applicable rate calculated to the end of such calendar month shall not constitute constructive receipt of income by any depositor or account holder in any such institution who has not made a withdrawal during such period;

(4) A requirement that a notice of intention to withdraw must be given in advance of the withdrawal. In any case when the rate of earnings payable in respect of such a deposit or account depends on the amount of notice of intention to withdraw that is given, earnings at the maximum rate are constructively received during the taxable year regardless of how long the deposit or account was held during the year or whether, in fact, any notice of intention to withdraw is given during the year. However, if in the taxable year of withdrawal the depositor or account holder receives a lower rate of earnings because he failed to give the required notice of intention to withdraw, he shall be allowed an ordinary loss in such taxable year in an amount equal to the difference between the amount of earnings previously included in gross income and the amount of earnings actually received. See section 165 and the regulations thereunder.

(b) Examples of constructive receipt. Amounts payable with respect to interest coupons which have matured and are payable but which have not been cashed are constructively received in the taxable year during which the coupons mature, unless it can be shown that there are no funds available for payment of the interest during such year. Dividends on corporate stock are constructively received when unqualifiedly made subject to the demand of the shareholder. However, if a dividend is declared payable on December 31 and the corporation followed its usual practice of paying the dividends by checks mailed so that the shareholders would not receive them until January of the following year, such dividends are not considered to have been constructively received in December. Generally, the amount of dividends or interest credited on savings bank deposits or to shareholders of organizations such as building and loan associations or cooperative banks is income to the depositors or shareholders for the taxable year when credited. However, if any portion of such dividends or interest is not subject to withdrawal at the time credited, such portion is not constructively received and does not constitute income to the depositor or shareholder until the taxable year in which the portion first may be withdrawn. Accordingly, if, under a bonus or forfeiture plan, a portion of the dividends or interest is accumulated and may not be withdrawn until the maturity of the plan, the crediting of such portion to the account of the shareholder or depositor does not constitute constructive receipt. In this case, such credited portion is income to the depositor or shareholder in the year in which the plan matures. However, in the case of certain deposits made after December 31, 1970, in banks, domestic building and loan associations, and similar financial institutions, the ratable inclusion rules of section 1232(a)(3) apply. See § 1.1232-3A. Accrued interest on unwithdrawn insurance policy dividends is gross income to the taxpayer for the first taxable year during which such interest may be withdrawn by him.

[T.D. 6500, 25 FR 11709, Nov. 26, 1960, as amended by T.D. 6723, 29 FR 5342, April 21, 1964; T.D. 7154, 36 FR 24997, Dec. 28, 1971; T.D. 7663, 44 FR 76782, Dec. 28, 1979]

§ 1.451–3 Long-term contracts.

(a) Introduction and Effective date—(1) In general. Income from a long-term contract (as defined in paragraph (b)(1) of this section) may be included in gross income in accordance with one of the two long-term contract methods, namely, the percentage of completion method (as described in paragraph (c) of this section) or the completed contract method (as described in paragraph (d) of this section), or any other method. Whichever method is chosen must, in the opinion of the Commissioner, clearly reflect income. See § 1.446-1(a)(2) and (c). In addition, it must be applied consistently to all long-term contracts within the same trade or business except that a taxpayer who has long-term contracts of substantial duration and long-term contracts of less than substantial duration in the same trade or business may report the income from all the contracts of substantial duration on the same long-term contract method and report the income from the contracts of less than substantial duration pursuant to another proper method of accounting. For example, if a manufacturer of heavy machinery has special-order contracts of a type that generally take 15 months to complete and also has contracts of a type that generally take 3 months to complete, the manufacturer may use a long-term contract

method for the 15-month contracts and a proper inventory method pursuant to section 471 and the regulations thereunder for the 3-month contracts. Similarly, if a construction contractor has construction contracts of a type that generally take 15 calendar months to complete and other construction contracts that take only 5 months to complete but that are long-term contracts because they are not completed in the taxable years in which they are entered into (pursuant to paragraph (b)(1)(i) of this section), such contractor may either use a long-term contract method for all the contracts of both types or use a long-term contract method for the 15-month contracts and another proper method of accounting for the 5-month contracts. If a taxpayer distinguishes between contracts of substantial duration and other long-term contracts of less than substantial duration, he must adhere to a consistently applied standard for determining substantial duration.

(2) **Reporting requirement.** When a taxpayer reports income under the percentage of completion method or the completed contract method, a statement to that effect shall be attached to his income tax return.

(3) **Allocation among activities required.** The percentage of completion method and the completed contract method apply only to the accounting for income and expenses attributable to long-term contracts. The term "expenses attributable to long term contracts" means all direct labor costs and direct material costs (within the meaning of paragraph (d)(5)(i) or (6)(i) of this section), and all indirect costs except those described in paragraph (d)(5)(iii) or, in the case of extended period long-term contracts, paragraph (d)(6)(iii). Other income and expense items, such as investment income, expenses not attributable to such contracts, and costs incurred with respect to any guarantee, warranty, maintenance, or other service agreement relating to the subject matter of such contracts, shall be accounted for under a proper method of accounting. See section 446(c) and § 1.446-1(c).

(4) **Severing and aggregating contracts.** In the case of income attributable to a long-term contract, whether or not a long-term contract method is used, for the purpose of clearly reflecting income it may be necessary in some instances for the Commissioner either to treat one agreement as several contracts or to treat several agreements as one contract. The rules of paragraph (e)(1) of this section shall apply to determine whether an agreement should be so severed or several agreements so aggregated.

(5) **Certain taxpayers not using a long-term contract method.** In the case of a taxpayer using a method of accounting that uses inventories (other than a long-term contract method) for any extended period long-term contract entered into after December 31, 1982, see paragraphs (d)(6)(v) and (g) of this section.

(6) **Use of inventory methods in connection with the long-term contract method.** Effective for taxable years beginning after December 31, 1982, the taxpayer may use an inventory method to determine the costs attributable to a long-term contract accounted for under a long-term contract method only in accordance with paragraph (d)(8) of this section.

(7) **Effective date.** Except as otherwise provided, this section is effective for taxable years ending after December 31, 1982. For taxable years ending before January 1, 1983, see CFR § 1.451-3, revised as of 4/1/85.

(b) **Definitions, and special rules relating to certain contracts—(1) Long-term contract—(i) In general.** Except as provided in paragraph (b)(1)(ii) of this section, the term "long-term contract" means a building, installation, construction or manufacturing contract which is not completed within the taxable year in which it is entered into.

(ii) **Manufacturing contracts.** Notwithstanding paragraph (b)(1)(i) of this section, a manufacturing contract is a "long-term contract" only if such contract involves the manufacture of (A) unique items of a type which is not normally carried in the finished goods inventory of the taxpayer, or (B) items which normally require more than 12 calendar months to complete (regardless of the duration of the actual contract). Thus, for example, a contract to manufacture a unit of industrial machinery specifically designed for the needs of a customer and not normally carried in the taxpayer's inventory or a contract to manufacture machinery which will require more than 12 calendar months to complete are long term contracts[.] However, a contract to manufacture 15,000 folding chairs which take 3 days each to manufacture is not a long-term contract even though it takes more than 12 calendar months to manufacture all 15,000 chairs and the contract is not completed within the taxable year it is entered into.

(2) **Completion—(i) Final completion and acceptance—** (A) General rule. Except as otherwise provided in this paragraph (b)(2), and in paragraph (d) (2), (3), and (4) of this section (relating to disputes), a long-term contract shall not be considered "completed" until final completion and

acceptance have occurred. Nevertheless, a taxpayer may not delay the completion of a contract for the principal purpose of deferring Federal income tax.

(B) Completion determined on basis of all facts and circumstances. Final completion and acceptance of a contract for Federal income tax purposes is determined from an analysis of all the relevant facts and circumstances, including the manner in which the parties to the contract deal with each other and with the subject matter of the contract, the physical condition and state of readiness of the subject matter of the contract, and the nature of any work or costs remaining to be performed or incurred on the contract. In considering the manner in which the parties deal with the subject matter of the contract, any use of the primary subject matter of the contract by the purchaser (except for testing purposes that produce no gross revenue, cost savings, or other substantial benefits for the purchaser) will be considered.

(C) Examples. The principles of paragraph (b)(2)(i) of this section are illustrated by the following examples:

Example (1). In 1982, A, a calendar year contractor, contracts with B to construct a building. The initial completion date specified in the contract is October 1984. In November 1984, the building is completed in every respect necessary for the use for which the building is intended. Later in November 1984, B occupies the building and notifies A that certain minor deficiencies should be corrected. A agrees to correct the deficiencies. Under these circumstances, the contract is considered completed for Federal income tax purposes in A's taxable year ending December 31, 1984, without regard to when A corrects the deficiencies. The contract is considered completed because the parties have dealt with each other and with the subject matter of the contract in a manner that indicates that final completion and acceptance have occurred.

Example (2). Assume the same facts as in example 1, except that there are no deficiencies in the building that require correction or repair. In addition, assume that the contract between A and B provides that none of the retainage under the contract may be released to A until A obtains an architect's certificate that the building has been completed according to the specifications of the contract. A obtains this certificate in February, 1985. Under these circumstances, the contract is considered completed for Federal income tax purposes in A's taxable year ending December 31, 1984, without regard to when A obtains the required architect's certificate, and without regard to when the retainage is released to A, because the parties have dealt with each other and with the subject matter of the contract in a manner that indicates that final completion and acceptance have occurred.

Example (3). In 1982, X, a calendar year taxpayer who manufactures industrial machinery, contracts with F to build and install one large item of industrial machinery to be delivered in August 1983 and to be installed and tested by X in F's factory. The contract provides that the machinery will be accepted by F when the tests performed by X demonstrate that the machinery will perform within certain environmental standards required by a government agency, regardless of whether an operating permit has been obtained. Because of technical problems the machinery is not ready for delivery until December 1983. F accepts delivery of the machinery in December 1983 subject to installation and testing to determine if the assembled machinery meets the environmental standards. The machinery is installed and tested during December 1983 through February 1984, and F accepts the machinery in February 1984. An operating permit required to operate the machinery under the environmental standards is issued by the governmental agency in February, 1985. Under these circumstances final completion and acceptance of the machinery for Federal income tax purposes occurs in February, 1984.

Example (4). In 1983, D, a calendar year taxpayer, contracts with E to construct a shopping center and related parking areas. The shopping center is completed in October 1985. In December 1985, the shopping center and three-fourths of the parking area are opened to the general public. At that time, the entire parking area of the shopping center has been graded and three-fourths has been paved, but the final asphalt coating has not been laid due to general weather conditions. Under these circumstances, the contract to construct the shopping center and parking area is considered completed for Federal income tax purposes in December 1985, because the shopping center and a major portion of the parking area were ready to be used and were used at that time.

(ii) Contracts with more than one subject matter—(A) General rule. In the case of a long-term contract (which, after the application of the rules provided in paragraph (e) of this section, is treated as a single long-term contract for Federal income tax purposes) for one or more units (such as an aircraft or an item of industrial machinery) that represent the primary subject matter of the contract, and for other items (such as training manuals, or spare or replacement parts or components) that do not represent the primary subject matter of the contract, "final completion and acceptance" shall be determined without regard to the contractor's obligation to supply the other items that do not represent the primary subject matter of the contract. If at the end of the taxable year in which the long-term contract is completed there remain any other items that do not represent the primary subject matter of the contract and that have not been finally completed and accepted then the costs that have been incurred prior to the end of such year and that are properly allocable to such other items (determined pursuant to paragraph (d) (5) or (6) (as the case may be) of this section), and a portion of the gross contract price (if any) reasonably allocable to such other items shall be separated from the long-term contract, and such costs and such portion of the gross contract price shall be accounted for under a proper method of accounting. Such proper method of accounting includes a long-term contract method only if a separate contract for such other items would be a long-term contract (as defined in paragraph (b)(1) of this section).

(B) Example. The principles of paragraph (b)(2)(ii)(A) of this section may be illustrated by the following example:

Example. In 1982, X contracts with the Y Government to manufacture five aircraft and to manufacture 12 spare and replacement parts for the five aircraft and for certain other aircraft supplied to Y under prior contracts. Assume that under all the facts and circumstances it is determined that the portion of the contract relating to the 12 spare and replacement parts does not have to be severed from the portion of the contract relating to the five aircraft. Assume also that under all the facts and circumstances it is determined that the five aircraft represent the primary subject matter of the contract, and that the spare and replacement parts do not represent the primary subject matter of the contract. In 1984, X tenders the five aircraft and seven of the spare and replacement parts to Y. Y accepts the aircraft and the parts subject to X's delivery of the balance of the spare and replacement parts. For Federal income tax purposes the contract is deemed to have been completed in 1984. Accordingly, X must include in gross income in 1984 the entire contract price, less the portion of the gross contract price reasonably allocable (if any) to the parts not delivered in 1984. X must deduct from gross income in 1984 the entire costs properly allocable to the contract, less the entire costs incurred that are properly allocable to the parts not delivered in 1984. X will account for the income and costs allocable to the parts not delivered in 1984 under a proper method of accounting.

(iii) Contingent compensation. In the case of a long-term contract, "final completion and acceptance" shall be determined without regard to any term of the contract providing for additional compensation contingent upon the continued successful performance of the subject matter of the contract after the subject matter of the contract has been accepted by the purchaser (such as an incentive fee payable if a satellite remains in operation after it is placed in orbit). Such contingent compensation shall be included in gross income in the appropriate taxable year determined under the taxpayer's method of accounting other than a long-term contract method.

(iv) Certain supervision of installation. In the case of a long-term contract, "final completion and acceptance" shall be determined without regard to any obligation on the part of the contractor to assist or to supervise installation or assembly of the subject matter of the contract where such installation or assembly is to be performed by the purchaser and, under applicable contract law, the subject matter of the contract may be accepted by the purchaser prior to such installation or assembly. If the preceding sentence applies to a contract, "final completion and acceptance" shall be determined without regard to such obligation[.] In addition, the entire gross contract price less the portion of the gross contract price (if any) reasonably allocable to such obligation, shall be included in gross income in the taxable year in which the contract is completed[.] Further, all costs properly allocable to the contract and which have been incurred prior to the end of the taxable year in which such contract is completed shall be deducted in such year[.] Finally, all other costs properly allocable to such contract and the portion of the gross contract price reasonably allocable to the obligation to assist or to supervise installation shall be accounted for under a proper method of accounting other than a long-term contract method.

(v) Subcontractors. In the case of a subcontractor who completes work on a long-term contract prior to the completion of the entire contract, "final completion and acceptance" of the contract with respect to such subcontractor shall be deemed to have occurred when the subcontractor's work has been completed and has been accepted by the party with whom the subcontractor has contracted.

(vi) Disputes. Completion of a long-term contract is determined without regard to whether a dispute exists at the time the taxpayer tenders the subject matter of the contract to the party with whom the taxpayer has contracted. See paragraphs (d)(2), (3) and (4) of this section.

(3) Extended period long-term contract—(i) General Rule. This paragraph (b)(3) does not apply to contracts accounted for under the percentage of completion method. Except as provided in paragraph (b)(3)(ii) of this section, the term "extended period long-term contract" means any long-term contract that the taxpayer estimates (at the time such contract is entered into) will not be completed (as defined in paragraph (b)(2) of this section) within the 2-year period beginning on the first date (hereinafter, "the contract commencement date") that the taxpayer incurs any costs (other than costs such as bidding expenses, or expenses incurred in connection with negotiating the contract) allocable to such contract (under the cost allocation rules of paragraph (d)(6) of this section). The preceding sentence shall be applied without regard to when costs allocable to a contract are recorded under the cost accounting procedures used by the taxpayer. In general, the contract commencement date will be the first date that any of the following activities occur; the taxpayer incurs design or engineering costs allocable to the contract other than design or engineering costs incurred solely for purposes of bidding for the contract; materials or equipment are shipped to the jobsite; or workers whose labor cost is treated as direct labor are sent to the jobsite. If the first date when any costs allocable to a contract are incurred is not determinable, the contract commencement date of a contract shall be

the date such contract is entered into, unless the taxpayer establishes to the satisfaction of the district director that another date is a more appropriate contract commencement date. The contract commencement date shall not be earlier than the date the contract is entered into, unless the taxpayer delayed entering into the contract for a principal purpose of avoiding the rules of this section.

(ii) Certain construction contracts. The term "extended period long-term contract" does not include any construction contract entered into by a taxpayer—

(A) Who estimates (at the time such contract is entered into) that such contract will be completed within the 3-year period beginning on the contract commencement date of such contract, or

(B) Whose average annual gross receipts (determined under paragraph (b)(3)(iii) of this section) over the 3 taxable years preceding the taxable year the contract is entered into (or, if less, the number of preceding taxable years the taxpayer has been in existence) do not exceed $25 million.

For purposes of this paragraph (b)(3)(ii), the term "construction contract" means any contract for the building, construction, or erection of, or the installation of any integral component to, improvements to real property. For purposes of the preceding sentence, construction includes reconstruction and rehabilitation. An improvement to real property includes buildings or other structures intended to be permanently affixed to real property, roadways, dams, or bridges, but does not include such items as vessels or offshore drilling platforms. An integral component to an improvement to real property includes property not produced at the site of the real property but intended to be permanently affixed to an improvement to real property, for example, elevators and central heating and cooling systems. In the case of a contract that provides for the manufacture and the installation of an integral component to an improvement to real property (such as the pollution control equipment for a power plant), only the part of the overall gross contract price and the costs properly allocable to the work of installing the finished component is a construction contract. For example, in the case of a contract both to manufacture and to install an elevator in an office building, only the portion of the gross contract price and only the costs properly allocable to installing the elevator is a construction contract. However, in determining whether the installation portion of a contract is expected to be completed within three years, the time expected to complete both the manufacture and the installation of the contract subject matter must be taken into account. Similarly, in determining whether the manufacturing portion of a contract is expected to be completed within two years, the time expected to complete both the manufacture and the installation of the contract subject matter must be taken into account. Alternatively, the taxpayer may consistently account for the manufacturing portion and the installation portion of all such agreements as separate contracts if there is an appropriate allocation of the gross contract price between the manufacturing portion and the installation portion of the agreement. The preceding sentence applies without regard to paragraph (e)(1) of this section.

(iii) Determination of gross receipts—(A) Aggregation and attribution of gross receipts. The following rules shall apply in determining the gross receipts of the taxpayer for purposes of paragraph (b)(3)(ii)(B) of this section, that is, for determining if the average annual gross receipts of the taxpayer over the 3 taxable years preceding the taxable year in which a construction contract is entered into (or, if less, the number of preceding taxable years the taxpayer has been in existence) exceed $25 million. Under paragraph (b)(3)(iii)(B) of this section, the average annual gross receipts of all trades or businesses (regardless of the nature of such trades or businesses) under common control with the taxpayer who enters into the construction contract are combined. Under paragraph (b)(3)(iii)(C), a portion of the average annual gross receipts from building, installation or construction contracts (hereinafter "construction gross receipts") of trades or businesses not under common control with the taxpayer who enters into the contract, but which are related to the taxpayer through a chain of attribution (using indirect and constructive ownership), are attributed to the taxpayer who enters into the contract. Except as provided in paragraph (b)(3)(iii)(C)(4)(i), the rules of paragraph (b)(3)(iii)(B) and (C) are both applied. For purposes of paragraph (b)(3) of this section, "gross receipts" include the gross receipts realized from the active conduct of any trade or business, (e.g.,—sales revenue), and shall be the gross receipts of the taxable year in which such receipts are recognized properly under the tax accounting method of the taxpayer. For this purpose "gross receipts" shall not include amounts that, under Federal income tax law, are interest, dividends, rents, royalties, annuities or the amount realized from the sale or exchange of property used in the trade or business or held for the production of income. Gross receipts of a contract includes the gross contract price (whether the

contract is a general contract or a subcontract, and whether or not the contract is a long-term contract). If the taxpayer enters into a contract which provides that any direct materials (as described in paragraph (d)(5)(i) of this section) will be supplied by the party for whom the contract is being performed (and thus the cost of which is not represented in the gross contract price), gross receipts do not include the cost of such direct materials unless the contractual arrangement was entered into for a principal purpose of reducing the contractor's gross receipts.

(B) Aggregation of all gross receipts of trades or businesses under common control. If, at any time during the calendar year in which the taxpayer enters into a construction contract, such taxpayer and any other trades or businesses (whether or not incorporated) are under common control, then the average annual gross receipts of each such trade or business (for the 3 taxable years of such trade or business preceding the taxable year of such trade or business in which the construction contract is entered into or, if less, the number of preceding taxable years such trade or business has been in existence) shall be combined with the average annual gross receipts of the taxpayer for taxpayer's 3 taxable years preceding the taxable year of the taxpayer in which the construction contract is entered into (or, if less, the number of preceding taxable years the taxpayer has been in existence). Gross receipts attributable to transactions between trades or businesses under common control shall be eliminated. For purposes of paragraph (b)(3) of this section, the term "trades or businesses under common control" means any group of trades or businesses that is either—

(1) A "parent-subsidiary group under common control" as defined in § 1.52-1(c),

(2) A "brother-sister group under common control" as defined in § 1.52-1(d), or

(3) A "combined group under common control" as defined in § 1.52-1(e).

(C) Attribution of construction gross receipts to or from individuals, proprietorships, corporations, partnerships, trusts and estates not under common control—(1) Attribution of construction gross receipts to the contractor from persons owning an interest in the contractor. For purposes of paragraph (b)(3) of this section, if a 5 percent or greater interest in the person who enters into a construction contract (hereinafter, "the contractor") is owned (at any time during the calendar year in which the construction contract is entered into), directly, or indirectly through the application of this paragraph (b)(3)(iii)(C), by or for any person, the average annual gross receipts of the contractor for the contractor's 3 taxable years preceding the taxable year of the contractor in which the contract was entered into (or, if less, the number of preceding taxable years the contractor has been in existence) shall include the average annual construction gross receipts of such person (for the 3 taxable years of such person preceding the taxable year of such person in which the contract was entered into or, if less, the number of preceding taxable years in which such person has been in existence) in proportion to the interest of such person in the contractor. If an interest is not owned for the entire calendar year, or if an interest varies during the calendar year, the amount of such interest for such year shall be the weighted average based on the number of days each interest is owned during such calendar year.

(2) Attribution of construction gross receipts to the contractor from persons in which the contractor owns an interest. For purposes of paragraph (b)(3) of this section, if (at any time during the calendar year in which the contractor enters into a construction contract) a 5 percent or greater interest in any person is owned, directly, or indirectly through the application of this paragraph (b)(3)(iii)(C), by or for the contractor, the average annual gross receipts of the contractor for the contractor's 3 taxable years preceding the taxable year of the contractor in which the contract was entered into (or, if less, the number of preceding taxable years the taxpayer has been in existence) shall include the average annual construction gross receipts of such person (for the 3 taxable years of such person preceding the taxable year of such person in which the contract was entered into or, if less, the number of preceding taxable years such person has been in existence) in proportion to the interest of the contractor in such person. If an interest is not owned for the entire calendar year, or if an interest varies during the calendar year, the amount of such interest for such year shall be the weighted average based on the number of days each interest is owned during such calendar year.

(3) Rules for determining ownership—(i) In general. In determining the ownership of an interest in any person for purposes of paragraph (b)(3)(iii)(C) of this section, the indirect and constructive ownership rules of this paragraph (b)(3)(iii)(C)(3) shall apply, subject to the operating rules contained in paragraph (b)(3)(iii)(C)(4). For purposes of paragraph (b)(3)(iii)(C), an "interest" means: in the case of a corporation, stock; in the case of a trust or estate, an actuarial interest;

in the case of a partnership, an interest in capital or profits; and in the case of a sole proprietorship, the proprietorship.

(ii) Members of a family. An individual shall be considered as owning any interest in any person owned, directly or indirectly, by or for—

(A) Such individual's spouse (other than a spouse who is legally separated from the individual under a decree of divorce or separate maintenance, whether final or interlocutory), and

(B) Such individual's children, grandchildren, parents and grandparents. A legally adopted child of an individual shall be treated as the child of such individual.

(iii) Attribution from partnerships, estates, trusts and corporations. (A) From Partnerships. An interest in any person owned, directly or indirectly, by or for a partnership shall be considered as owned by any partner having a 5 percent or greater interest in either the profits or capital of the partnership, in proportion to such partner's interest in profits or capital, whichever is greater.

(B) From estate and trusts. An interest in any person (hereinafter an "organization interest") owned, directly or indirectly, by or for an estate or trust shall be considered as owned by any beneficiary of such estate or trust who has an actuarial interest of 5 percent or greater in such organization interest, to the extent of such actuarial interest, as determined under § 11.414(c)-4(b)(3).

An interest in any person owned, directly or indirectly, by or for any portion of a trust of which a person is considered the owner under subpart E of part I of subchapter J (relating to grantors and others treated as substantial owners) shall be considered as owned by such person.

(C) From corporations. An interest in any person owned, directly or indirectly, by or for a corporation shall be considered as owned by any shareholder who owns (directly, and indirectly through the application of paragraph (b)(3)(iii)(C) of this section) 5 percent or more in value of such corporation's stock, in proportion to the value of the stock owned by such shareholder to the total value of all the outstanding stock in such corporation.

(iv) Attribution to partnerships, estates, trusts and corporations—(A) To partnerships. An interest in any person owned, directly or indirectly, by or for a partner having a 5 percent or greater interest in partnership profits or capital shall be considered as owned by the partnership in proportion to the partner's interest in profits or capital, whichever is greater.

(B) To estates and trusts. An interest in any person owned, directly or indirectly, by or for a beneficiary having an actuarial interest of 5 percent or greater in the value of property of an estate or trust shall be considered as owned by such estate or trust in proportion to the beneficiary's actuarial interest in the assets of the estate or trust. For purposes of this paragraph (b)(3)(iii)(C)(3)(iv-)(B) the actuarial interest of a beneficiary shall be determined under the maximum exercise of discretion by the executor or trustee in favor of such beneficiary.

An interest in any person owned, directly or indirectly, by or for a person who is considered the owner of any portion of a trust under subpart E of part I of subchapter J (relating to grantors and others treated as substantial owners) shall be considered as owned by such trust.

(C) To corporations. An interest in any person owned, directly or indirectly, by or for a shareholder who owns (directly and indirectly through the application of paragraph (b)(3)(iii)(C) of this section) 5 percent or more in value of the stock in a corporation shall be considered as owned by such corporation in proportion to the value of the stock owned by such shareholder to the total value of all the outstanding stock in such corporation.

(v) Options. If a person has an option to acquire any outstanding interest in any organization, such interest shall be considered as owned by such person. An option to acquire an option, and each one of a series of such options, shall be considered as an option to acquire such an interest.

(4) Operating rules—(i) Common control. Paragraph (b)(3)(iii)(C) of this section shall not apply between two persons both of whom, under paragraph (b)(3)(iii)(B), are members of the group of trades or businesses under common control that includes the contractor. However, in applying paragraph (b)(3)(iii)(C) between two persons where one or both of such persons are not members of the group of trades or businesses under common control that includes the contractor, paragraph (b)(3)(iii)(C) shall be applied without regard to paragraph (b)(3)(iii)(B).

(ii) Reattribution. Except as provided in paragraph (b)(3)(iii)(C)(4)(iii) (relating to no double family attribution) or (iv) (relating to no reattribution to certain co-owners), in applying paragraphs (b)(3)(iii)(C)(3)(ii), (iii), (iv), or (v), an interest constructively owned by a person shall, in applying paragraphs (b)(3)(iii)(C)(3), (ii), (iii), (iv) or

(v), be considered as actually owned by such person, and such interest may be reattributed to another person.

(iii) No double family attribution. An interest constructively owned by an individual by reason of paragraph (b)(3)(iii)(C)(3)(ii) shall not be considered as owned by such individual for purposes of again applying such paragraph to make another the constructive owner of such interest.

(iv) No reattribution to certain co-owners. An interest constructively owned by a person by reason of paragraph (b)(3)(iii)(C)(3)(iv) shall not be considered as owned by such person for purposes of applying paragraph (b)(3)(iii)(C)(3)(iii) in order to make another person the constructive owner of such interest.

(v) Option rule in lieu of family rule. If an interest may be considered as owned by an individual under paragraphs (b)(3)(iii)(C)(3) (ii) or (v), it shall be considered as owned by such individual under paragraph (b)(3)(iii)(C)(3)(v).

(vi) Limitation. In applying paragraph (b)(3)(iii)(C)(3) to determine the ownership of an interest by any person for any one purpose—

(A) A corporation shall not be considered to own its own stock by reason of paragraph (b)(3)(iii)(C)(3)(iv)(C), and

(B) If an interest owned by any person may be included in the computation more than one time, such interest shall be included only once, in the manner that will impute to the person concerned the largest total interest.

(D) Short taxable years. For any taxpayer required to determine its average annual gross receipts over the three taxable year period of such person preceding the taxable year in which a construction contract is entered into, if such period includes a taxable year of less than 12 full months, the taxpayer shall place the gross receipts of such taxable year on an annual basis by dividing the gross receipts of such taxable year by the number of full calendar months in such taxable year and multiplying the result by 12.

(iv) Classification of contracts—(A) Initial classification by taxpayer. The taxpayer shall determine whether a contract is an extended period long-term contract at the time such contract is entered into. In estimating the time required to perform any contract, the taxpayer shall anticipate and provide a reasonable allowance for delay, rework, change orders, technology or design problems, and other problems. If the taxpayer determines that a contract is an extended period long-term contract, the cost allocation rules of paragraph (d)(6) of this section shall apply, and such contract shall be treated as an extended period long-term contract even if such contract is actually completed within the 2-year period (3 years in the case of certain construction contracts) beginning on the contract commencement date of such contract. Except as provided in paragraph (b)(3)(iv)(B) of this section, a long-term contract that is not completed within the 2-year period (3 years in the case of certain construction contracts) beginning on the actual contract commencement date of such contract and which the taxpayer did not classify and account for as an extended period long-term contract will not be required to be reclassified (for any taxable year) and accounted for as an extended period long-term contract if, at the time the contract was entered into, the taxpayer reasonably could have expected the contract to be completed within that time. The taxpayer shall maintain contemporaneous written records setting forth the basis for classifying each contract, and such records shall be in sufficient detail to enable the district director readily to determine whether the taxpayer's estimate of the time required to complete a contract was made on a reasonable basis. A contract term specifying an expected completion or delivery date may be considered evidence that the parties expected completion or delivery to occur on or about the date specified, especially if there are actual bona fide penalties for not meeting the specified date. The taxpayer's estimate will not be considered unreasonable if a contract was not completed within the expected time primarily because of unforeseeable factors not within the control of the taxpayer. For purposes of the preceding sentence, "unforeseeable factors" are abnormal factors, such as prolonged third-party litigation, abnormal weather (considering the season and the jobsite), prolonged strikes, and prolonged delays in securing required permits or licenses, that could not reasonably be anticipated considering the nature of the contract and prior experience.

(B) Exception for unreasonable classification, amended returns. If under all the facts and circumstances it is determined that a contract which the taxpayer did not classify and account for as an extended period long-term contract reasonably should have been so classified and accounted for, the taxpayer shall reclassify and account for such contract as an extended period long-term contract for the current taxable year and all subsequent taxable years. In addition, the taxpayer should file an amended return for each prior taxable year

(assuming that the period for assessment has not run for such year) in which costs were incurred with respect to such contract, and such amended returns should reflect an allocation to the contract of costs incurred in such prior years using the cost allocation rules provided in paragraph (d)(6) of this section. If a contract is not an extended period long-term contract by reason of the $25 million gross receipts test of paragraph (b)(3)(ii)(B) of this section, such contract shall not be reclassified regardless of the taxpayer's gross receipts for any subsequent year and regardless of the time required to complete such contract.

(v) Special rule for contract commencement date in case of components or subassemblies produced by the taxpayer. If the cost of components or subassemblies produced by the taxpayer represents a significant amount of the total costs allocable to a contract, the contract commencement date of such contract shall be the first date the taxpayer incurs any costs allocable either to (1) such type or category of components or subassemblies, or (2) any other subject matter of the contract. The contract commencement date shall not be earlier than the date the contract is entered into, unless the taxpayer delayed entering into the contract for a principal purpose of avoiding the rules for this section. For example, assume an airplane manufacturer who also manufactures a type of engine that represents a significant amount of the total costs of the airplanes produced enters into one or more contracts to manufacture airplanes containing such type of engine. For purposes of determining the contract commencement date with respect to each contract, the first date the manufacturer incurs any cost allocable to any of the engines is the first date that the taxpayer incurs any cost allocable to such type of engine, even if the manufacturer has not yet produced enough engines to satisfy all contracts.

See § 1.451-3(d)(6)(iv) for the cost allocation rules required in the case of certain components or subassemblies.

(c) Percentage of completion method. **(1)** Under the percentage of completion method, the portion of the gross contract price which corresponds to the percentage of the entire contract which has been completed during the taxable year must be included in gross income for such taxable year.

(2) The determination of the percentage of completion of a contract generally may be made on either of the following methods:

(i) By comparing, as of the end of the taxable year, the costs incurred with respect to the contract with the estimated total contract costs, or

(ii) By comparing, as of the end of the taxable year, the work performed on the contract with the estimated total work to be performed.

In determining the percentage of completion pursuant to subdivision (i) of this subparagraph with respect to a long-term contract, a taxpayer may use any method of cost comparisons (such as comparisons of total direct and indirect costs incurred to date to estimated total direct and indirect costs, of total direct costs incurred to date to estimated total direct costs, or of direct labor costs incurred to date to estimated total direct labor costs) so long as such method is used consistently with respect to such contract and such method clearly reflects income. In determining the percentage of completion pursuant to subdivision (ii) of this subparagraph, the criteria used to compare the work performed on a contract as of the end of the taxable year with the estimated total work to be performed must clearly reflect the earning of income with respect to the contract. Thus, for example, in the case of a roadbuilder, a standard of completion based solely upon miles of roadway completed in a case where the terrain is substantially different with respect to roadway completed during one taxable year as compared with roadway completed during another taxable year may not clearly reflect the earning of income with respect to the contract. If the method described in subdivision (i) of this subparagraph is used and the taxpayer revises the estimated total costs as of the end of a taxable year, certificates of architects or engineers or other appropriate documentation showing the basis for such revision must be available at the principal place of business of the taxpayer for inspection in connection with an examination of the income tax return. If the method described in subdivision (ii) of this subparagraph is used, certificates of architects or engineers or other appropriate documentation showing the percentage of completion of each contract during the taxable year must be available at the principal place of business of the taxpayer for inspection in connection with an examination of the income tax return.

(3) Under the percentage of completion method, all costs incurred during the taxable year with respect to a long-term contract (account being taken of the material and supplies on hand at the beginning and the end of the taxable year for use in the contract) must be deducted. "Costs incurred during the taxable year with respect to a

long-term contract" do not include costs incurred with respect to any guarantee, warranty, maintenance, or other service agreement relating to the subject matter of the long-term contract. See paragraph (a)(3) of this section.

(d) Completed contract method—(1) In general. Except as otherwise provided in paragraphs (d)(2), (3) or (4) (relating to disputes) of this section, under the completed contract method, gross income derived from long-term contracts must be reported by including the gross contract price of each contract in gross income for the taxable year in which such contract is completed (as defined in paragraph (b)(2) of this section). All costs properly allocable to a long-term contract (determined pursuant to paragraph (d)(5) or (6) of this section) must be deducted from gross income for the taxable year in which the contract is completed. In addition, account must be taken of any material and supplies charged to the contract but remaining on hand at the time of completion.

(2) Contracts with disputes from buyer claims. (i) This subparagraph applies in any case where, on or after a taxpayer tenders the subject matter of a long-term contract to the party with whom he is contracting, there exists an amount reasonably in dispute because such party wishes to have the original contract price reduced or to have additional work performed on the contract. Any item of income or deduction with respect to an amount reasonably in dispute shall be taken into account in the taxable year in which such dispute is resolved. In addition, any item of income or deduction which is properly allocable to such contract and which is not included in or deducted from gross income in a prior taxable year pursuant to subdivisions (ii), (iii), (iv), or (v) of this subparagraph and which is not taken into account under the preceding sentence shall be included in or deducted from gross income in the taxable year in which the final dispute is resolved.

(ii) If the amount reasonably in dispute affects so much of the contract price that it is not possible to determine whether a profit (an excess of the gross contract price over the costs properly allocable to such contract) or loss (an excess of the costs properly allocable to the long-term contract over the gross contract price) will ultimately be realized on such contract, then no item of income or deduction which is properly allocable to such contract shall be included in or deducted from gross income in the taxable year in which such contract is completed (without regard to such dispute).

(iii) In all other cases, the entire amount of the gross contract price reduced (but not below zero) by an amount equal to the amount reasonably in dispute shall be included in gross income in the taxable year in which such contract is completed (without regard to the dispute).

(iv) If the taxpayer is assured of a profit on such contract regardless of the outcome of the dispute, then all costs which are properly allocable to such contract and which have been incurred prior to the end of the taxable year in which such contract is completed (without regard to the dispute) shall be deducted in such year.

(v) If the taxpayer is assured of a loss on such contract regardless of the outcome of the dispute, then there shall be deducted in the taxable year in which such contract is completed (without regard to the dispute) the total amount of costs properly allocable to such contract which are incurred prior to the end of such year reduced by the amount by which the gross contract price was reduced pursuant to subdivision (iii) of this subparagraph. All other costs which are properly allocable to such contract shall be deducted in the taxable year in which incurred.

(vi) For purposes of this paragraph, where there is additional work to be performed with respect to a contract in dispute, the term "taxable year in which the dispute is resolved" means the taxable year in which such work is completed rather than the taxable year in which the outcome of the dispute is determined by agreement, decision, or otherwise.

(vii) The application of this subparagraph may be illustrated by the following examples:

Example (1). X, a calendar year taxpayer utilizing the completed contract method of accounting, constructs a building for Y pursuant to a long-term contract. According to the terms of the contract, the gross contract price is $2,000,000. X finishes construction of the building in 1972 at a cost of $1,900,000. Y examines the building and is dissatisfied with the construction. He demands either alterations or a reduction in the gross contract. The amount reasonably in dispute is $500,000. This dispute affects so much of the contract price that X is unable to determine whether a profit or a loss will ultimately be realized on such contract. Accordingly, pursuant to this subparagraph, X does not include any portion of the gross contract price in gross income and does not deduct any costs which are properly allocable to the contract until the taxable year in which the dispute is resolved.

Example (2). A, a calendar year taxpayer utilizing the completed contract method of accounting, constructs a bridge for B pursuant to a long-term contract. The terms of the contract provide for a $10,000,000 gross contract price. A finishes construction of the bridge in 1972 at a cost of $9,500,000. When B examines the bridge, he insists that either certain girders be repainted or that the contract price be reduced. The amount reasonably in dispute is $100,000. Since under the

terms of the contract, A would be assured of a profit of at least $400,000 ($10,000,000–[$9,500,000 + $100,000]) even if the dispute were resolved unfavorable to A, $9,900,000 ($10,000,000–$100,000 in dispute) of the gross contract price must be included in A's gross income in 1972 and $9,500,000 of costs must be deducted from A's gross income in 1972 pursuant to this subparagraph. In 1973 A and B resolve the dispute, A repaints certain girders at a cost to A of $60,000, and A and B agree that the contract price is not to be reduced. In 1973 A must include $100,000 ($10,000,000–$9,000,000) in gross income and must deduct $60,000 from gross income.

Example (3). M, a calendar year taxpayer utilizing the completed contract method of accounting, constructs a plant for N pursuant to a long-term contract. Under the terms of the contract M is entitled to receive $1,000,000 upon completion of the plant. M finishes construction of the plant in 1973 at a cost of $1,200,000. N examines the plant and determines that an elevator operates unsatisfactorily and insists that M either replace the elevator or that the contract price be reduced. The amount reasonably in dispute is $100,000. Under the terms of the contract M would be assured of a loss of at least $200,000 ($1,200,000–$1,000,000) even if the dispute were resolved in favor of M. Pursuant to this subparagraph M must include $900,000 ($1,000,000–$100,000) in gross income for 1973 and must deduct $1,100,000 ($1,200,000–$100,000) from gross income in 1973. In 1974 the dispute is resolved, and M replaces certain components of the elevator at a cost of $50,000. M must include $100,000 ($1,000,000–$900,000) in gross income for 1974, and must deduct $150,000 ($100,000 of previously undeducted costs plus $50,000 of additional costs) from gross income in 1974.

Example (4). Assume the same facts as in Example (3) except that N is insisting that the contract price be reduced because an elevator has insufficient capacity and that in 1974 the dispute is resolved by a reduction in the gross contract price of $40,000 (from $1,000,000 to $960,000). By the end of 1973, M is assured of a loss of at least $200,000 ($1,200,000–$1,000,000) under the terms of the contract even if the dispute were resolved in favor of M. Pursuant to this subparagraph, M must include in gross income for 1973 $900,000 ($1,000,000–$100,000) and must deduct from gross income in such year $1,100,000 ($1,200,000–$100,000). In 1974, when the dispute is resolved, M must include $60,000 ($960,000–$900,000) in gross income and must deduct $100,000 ($1,200,000–$1,100,000) from gross income.

Example (5). Assume the same facts as in Example (3) except that N is also insisting that the contract price be reduced by an additional amount because an underground storage facility has insufficient capacity. M determines that the total amount reasonably in dispute is $160,000, $100,000 attributable to the elevator plus $60,000 attributable to the underground storage facility. Under the terms of the contract, M would be assured of a loss of at least $200,000 ($1,200,000–$1,000,000) even if both disputes were resolved in favor of M. Pursuant to this subparagraph, M must include $840,000 ($1,000,000–$160,000) in gross income for 1973 and must deduct $1,040,000 ($1,200,000–$160,000) from gross income in 1973. In 1974 the dispute relating to the elevator is resolved, and M replaces certain components of the elevator at a cost of $50,000. M must include $100,000 (the amount of the gross contract price not included in gross income in 1973 by reason of the elevator dispute) in gross income for 1974 and must deduct $150,000 ($100,000 of previously undeducted costs plus $50,000 of additional costs) from gross income in 1974. In 1975, the dispute relating to the underground storage facility is resolved by a reduction in the gross contract price of $20,000 (from $1,000,000 to $980,000). In 1975 M must include $40,000 ($60,000–$20,000) in gross income and must deduct $60,000 (his previously undeducted costs) from gross income.

(3) Contracts with disputes from taxpayer claims. (i) This subparagraph applies in any case where, on or after a taxpayer tenders the subject matter of a long-term contract to the party with whom he is contracting, a dispute exists because the taxpayer is requesting that the amount to be paid to him under such contract be increased.

(ii) Except as provided in subparagraph (2) of this paragraph, in all cases described in subdivision (i) of this subparagraph, the entire amount of the gross contract price shall be included in gross income in the taxable year the contract is completed (without regard to the dispute), and all costs which are properly allocable to such contract and which have been incurred prior to the end of the taxable year in which such contract is completed (without regard to the dispute) shall be deducted in such year.

(iii) Any item of income which is properly allocable to such contract and which is not included in gross income in a prior taxable year pursuant to subdivision (ii) of this subparagraph shall be included in gross income in the taxable year in which any such dispute (or part thereof) is resolved. Any item of deduction which is properly allocable to such contract and which is incurred in a taxable year subsequent to the year such contract is completed (without regard to the dispute) shall be deducted from gross income in the taxable year in which such item of deduction is incurred.

(iv) For purposes of this paragraph, the term "gross contract price" means the original stated price of the contract with any modifications to which the parties have agreed as of the end of the taxable year. Thus, for example, such term includes any amount which the taxpayer is claiming by virtue of changes in the specifications of the contract which the other parties to the contract have agreed is proper, but it does not include any amount which the contractor is claiming which is disputed by the other parties to the contract. However, no amount is excluded from the term, "gross contract price" solely because a party refuses to pay such amount when due. Thus, for example, if the parties to a contract agree that the gross contract price is $100,000, but a party refuses to pay $60,000 of such amount when due, such refusal does not prevent the gross contract price from being $100,000.

(v) The application of this subparagraph may be illustrated by the following examples:

Example (1). S, a calendar year taxpayer utilizing the completed contract method of accounting, constructs a building for T pursuant to a long-term contract. Under the terms of the contract, S is entitled to receive $100,000 upon completion of the building. S finishes construction of the building in 1974 at a cost of $105,000. T examines the building in 1974 and agrees that it meets his specifications; however, as of the end of 1974, S and T are unable to agree as to the merits of S's claim for an additional $10,000 for certain items which S alleges are changes in contract specifications and T alleges are within the scope of the contract's original specifications. Under these circumstances, S must include in income in 1974 the gross contract price of $100,000 and must deduct from gross income in such year the $105,000 of costs. In 1975 the dispute is resolved by a payment to S of $2,000 with respect to his claim. S must include this $2,000 in gross income in 1975.

Example (2). Assume the same facts as in Example (1) except that S's claim for an additional $10,000 relates to two items which S alleges are changes in contract specifications, namely $7,000 for changes in the heating system and $3,000 for changes in the electrical system. In 1975 the dispute with respect to the electrical system is resolved by a payment to S of $750, and in 1976 the dispute with respect to the heating system is resolved by a payment to S of $1,250 and by S's performance of additional work at a cost of $250. S must include the $750 in gross income for 1975 and the $1,250 in gross income for 1976, and S must deduct the $250 from gross income in 1976.

(4) **Contracts with disputes from both buyer and taxpayer claims.** (i) This subparagraph applies in any case where, on or after a taxpayer tenders the subject matter of a long-term contract, a dispute exists involving both claims by the taxpayer for an increase in the contract price and claims by the other party to the contract either for a reduction in the contract price or for the performance of additional work under the contract. In any case described in the preceding sentence, principles similar to the principles of subparagraphs (2) and (3) of this paragraph shall be applied.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example (1). W, a calendar year taxpayer utilizing the completed contract method of accounting, constructs a factory for Z pursuant to a long-term contract. Under the terms of the contract, Z agrees to pay W a total of $100,000 for construction of the factory. W finishes construction of the factory in December 1974 at a cost of $110,000. When Z examines the factory in December 1974, Z is dissatisfied with the location and workmanship of certain heating ducts. As of the end of 1974, W contends that the heating ducts as constructed are in accordance with contract specifications. The amount reasonably in dispute with respect to the heating ducts is $6,000. As of this time, W is claiming $14,000 in addition to the original contract price for certain changes in contract specifications which W alleges have increased his costs. Z denies that such changes have increased W's costs. In 1975 the disputes between W and Z are resolved by performance of additional work by W at a cost of $1,000 and by an agreement that the contract price would be revised downward to $96,000. Under these circumstances, W must include in his gross income for 1974, $94,000 (the gross contract price less the amount reasonably in dispute because of Z's claim, or $100,000–$6,000). In 1974, W must also deduct $104,000 (his costs incurred of $110,000 less $6,000, an amount equal to the amount in dispute). In 1975, W must include in gross income an additional $2,000 ($96,000–$94,000) and must deduct $7,000 (the $1,000 of costs W incurs in such year plus the $6,000 of previously undeducted costs).

Example (2). R, a calendar year taxpayer utilizing the completed contract method of accounting, agrees to construct an office building for X for a total contract price of $10,000,000. R begins construction in 1973 and tenders the building to X in November 1975. As of November 1975, R has incurred $15,000,000 of costs which are allocable to the contract. When X examines the building, X is dissatisfied with certain aspects of the construction and demands that a substantial amount of additional work be done. The amount reasonably in dispute with respect to X's demand is $4,000,000. R is claiming an additional $2,000,000 for certain changes in contract specifications which have allegedly increased his costs. As of the end of 1975, neither dispute has been resolved. In 1976, the dispute relating to X's claim is resolved by R's performance of additional work at a cost of $3,500,000 and X's agreement to pay R an additional $400,000. In 1977, the dispute relating to R's claim is resolved by X's agreement to increase the contract price by $1,800,000. Under these circumstances R must include in his gross income for 1975 $6,000,000 ($10,000,000–$4,000,000) and must deduct from gross income $11,000,000 ($15,000,000–$4,000,000). In 1976, when the dispute relating to X's claim is resolved, R must include in gross income $4,400,000 (the $4,000,000 of the gross contract price which was excluded from gross income in 1975 by reason of X's claim plus the $400,000 by which the contract price was increased) and must deduct $7,500,000 (the previously undeducted costs of $4,000,000 plus the costs of the work performed to resolve the dispute of $3,500,000). In 1977, when the dispute relating to R's claim is resolved, R must include in gross income the $1,800,000 by which the contract price was increased in settlement of R's claim.

(5) **General rule for allocation of costs to long-term contracts.** The following rules shall apply in determining what costs are properly allocable to a long-term contract (other than an extended period long-term contract to which the rules of paragraph (d)(6) of this section apply) in the case of a taxpayer using the completed contract method of accounting for tax purposes:

(i) **Direct costs.** Direct material costs and direct labor costs must be treated as costs properly allocable to a long-term contract. "Direct material costs" include the costs of those materials which become an integral part of the subject matter of the long-term contract and those materials which are consumed in the ordinary course of building, constructing, installing, or manufacturing the subject matter of a long-term contract. See § 1.471-3(b) for the elements of direct material costs. "Direct labor costs" include the cost of labor which can be identified or associated with a particular long-term contract. The elements of direct labor costs include such items as basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983), shift differential, payroll taxes and payments to a sup-

plemental unemployment benefit plan paid or incurred on behalf of employees engaged in direct labor.

(ii) Indirect costs allocated to long-term contracts. The term "indirect costs" includes all costs (other than direct material costs and direct labor costs) which are incident to and necessary for the performance of particular long-term contracts. Indirect costs which must be allocated to long-term contracts include:

(A) Repair expenses of equipment or facilities used in the performance of particular long-term contracts,

(B) Maintenance of equipment or facilities used in the performance of particular long-term contracts,

(C) Utilities, such as heat, light, and power, relating to equipment or facilities used in the performance of particular long-term contracts,

(D) Rent of equipment or facilities used in the performance of particular long-term contracts,

(E) Indirect labor and contract supervisory wages, including basic compensation, overtime pay, vacation and holiday pay, sick leave pay, (other than payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983), shift differential payroll taxes and contributions to a supplemental unemployment benefit plan incurred in the performance of particular long-term contracts,

(F) Indirect materials and supplies used in the performance of particular long-term contracts,

(G) Tools and equipment not capitalized used in the performance of particular long-term contracts,

(H) Costs of quality control and inspection incurred in the performance of particular long-term contracts,

(I) Taxes otherwise allowable as a deduction under section 164 (other than State and local, and foreign income taxes) to the extent such taxes are attributable to labor, materials, supplies, equipment or facilities used in the performance of particular long-term contracts,

(J) Depreciation, amortization and cost recovery allowances reported for the taxable year for financial purposes on equipment and facilities used in the performance of particular long-term contracts (but not in excess of the depreciation, amortization or cost recovery allowance allowable for the taxable year under Chapter I of the Code with respect to any item of equipment or facility),

(K) Cost depletion incurred in the performance of particular long-term contracts,

(L) Administrative costs incurred in the performance of particular long-term contracts (but not including any costs of selling or any return on capital),

(M) Compensation paid to officers attributable to services performed on particular long-term contracts (other than incidental or occasional services), and

(N) Cost of insurance incurred in the performance of particular long-term contracts, such as insurance on machinery and equipment used in the construction of the subject matter of a long-term contract.

(iii) Costs not allocated to long-term contracts. Costs which are not required to be included in costs attributable to a long-term contract include:

(A) Marketing and selling expenses, including bidding expenses,

(B) Advertising expenses,

(C) Other distribution expenses,

(D) Interest,

(E) General and administrative expenses attributable to the performance of services which benefit the long-term contractor's activities as a whole (such as payroll expenses, legal and accounting expenses, etc.),

(F) Research and experimental expenses (described in section 174 and the regulations thereunder),

(G) Losses under section 165 and the regulations thereunder,

(H) Percentage of depletion in excess of cost depletion,

(I) Depreciation, amortization and cost recovery allowances on equipment and facilities that have been placed in service but are temporarily idle (for this purpose, an asset is not considered to be temporarily idle on non-working days, and an asset used in construction is considered to be idle when it is not enroute to or not located at a job-site), and depreciation, amortization and cost recovery allowances under Chapter I of the Code in excess of depreciation, amortization and cost recovery allowances reported by the taxpayer in the taxpayer's financial reports,

(J) Income taxes attributable to income received from long-term contracts,

(K) Contributions paid to or under a stock bonus, pension, profit-sharing or annuity plan or other plan deferring the receipt of compensation whether or not the plan qualifies under section 401(a), and other employee benefit expenses paid or accrued on behalf of labor, to the extent such contributions or expenses are otherwise allowable as deductions under chapter 1 of the Code. "Other employee benefit expenses" include (but are not limited to): worker's compensation; amounts deductible or for whose payment reduction in earnings and profits is allowed under section 404A and the regulations thereunder; payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983; amounts includible in the gross income of employees under a method or arrangement of employer contributions or compensation which has the effect of a stock bonus, pension, profit-sharing, or annuity plan, or other plan deferring the receipt of compensation or providing deferred benefits; premiums on life and health insurance; and miscellaneous benefits provided for employees such as safety, medical treatment, recreational and eating facilities, membership dues, etc.,

(L) Cost attributable to strikes, rework labor, scrap and spoilage, and

(M) Compensation paid to officers attributable to the performance of services which benefit the long-term contractor's activities as a whole.

(6) **Allocation of costs to extended period long-term contracts.** Except as provided in paragraph (g) of this section, this paragraph (d)(6) applies to taxable years beginning after December 31, 1982. The following rules shall apply in determining what costs are properly allocable to an extended period long-term contract (as defined in paragraph (b)(3) of this section) in the case of a taxpayer using the completed contract method of accounting for long-term contracts for tax purposes. These rules may also apply to certain extended period long-term contracts accounted for under a method of accounting that uses inventories (other than a long-term contract method). See paragraph (d)(6)(v) of this section.

(i) **Direct costs.** Direct material costs and direct labor costs must be treated as costs properly allocable to an extended period long-term contract. "Direct material costs" include the costs of those materials which become an integral part of the subject matter of the extended period long-term contract and those materials which are consumed in the ordinary course of building, constructing, installing or manufacturing the subject matter of an extended period long-term contract. See § 1.471-3(b) for the elements of direct material costs. "Direct labor costs" include the cost of labor which can be identified or associated with a particular extended period long-term contract. The elements of direct labor costs include such items as basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983), shift differential, payroll taxes and payments to a supplemental unemployment benefit plan paid or incurred on behalf of employees engaged in direct labor.

(ii) **Indirect costs allocated to extended period long-term contracts.** The term "indirect costs" include all costs other than direct material costs and direct labor costs. In determining what indirect costs are properly allocable to an extended period long-term contract, all such costs that directly benefit the performance of extended period long-term contracts, or are incurred by reason of the performance of extended period long-term contracts must be allocated to extended period long-term contracts unless otherwise provided in paragraph (d)(6)(iii) of this section. Certain types of costs may directly benefit, or be incurred by reason of the performance of extended period long-term contracts of the taxpayer even though the same type of costs also benefits other activities of the taxpayer. Accordingly, such costs require a reasonable allocation between the portion of such costs that are attributable to extended period long-term contracts and the portion attributable to the other activities of the taxpayer. Indirect costs that must be allocated to extended period long-term contracts include:

(A) Repair expenses of equipment or facilities used in the performance of particular extended period long-term contracts,

(B) Maintenance of equipment or facilities used in the performance of particular extended period long-term contracts,

(C) Utilities, such as heat, light, and power, relating to equipment or facilities used in the performance of particular extended period long-term contracts,

(D) Rent of equipment or facilities used in the performance of particular extended period long-term contracts,

(E) Indirect labor and contract supervisory wages, including basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983), shift differential, payroll taxes and contributions to a supplemental unemployment benefit plan incurred in the performance of particular extended period long-term contracts,

(F) Indirect materials and supplies used in the performance of particular extended period long-term contracts,

(G) Tools and equipment not capitalized used in the performance of particular extended period long-term contracts,

(H) Costs of quality control and inspection incurred in the performance of particular extended period long-term contracts,

(I) Taxes otherwise allowable as a deduction under section 164 (other than State and local[,] and foreign income taxes) to the extent such taxes are attributable to labor, materials, supplies, equipment or facilities used in the performance of particular extended period long-term contracts,

(J) Depreciation, amortization and cost recovery allowances on equipment and facilities (to the extent allowable as deductions under Chapter I of the Code) used in the performance of particular extended period long-term contracts,

(K) Depletion (whether or not in excess of cost) incurred in the performance of particular extended period long-term contracts,

(L) Administrative costs (whether or not performed on a job-site) directly attributable to the performance of particular extended period long-term contracts (but not including any cost of selling, or any return on capital),

(M) Direct and indirect costs incurred by any administrative, service, or support function or department to the extent such costs are allocable to particular extended period long-term contracts pursuant to paragraph (d)(9) of this section,

(N) Compensation paid to officers attributable to services performed on particular extended period long-term contracts (but not including any cost of selling),

(O) Costs of insurance incurred in the performance of particular extended period long-term contracts, such as insurance on machinery and equipment used in the construction of the subject matter of an extended period long-term contract,

(P) Contributions paid to or under a stock bonus, pension, profit-sharing or annuity plan or other plan deferring the receipt of compensation whether or not the plan qualifies under section 401(a) (except for amounts described in paragraph (d)(6)(iii)(I) of this section), and other employees benefit expenses paid or accrued on behalf of labor, to the extent such contributions or expenses are otherwise allowable as deductions under chapter 1 of the Code. "Other employee benefit expenses" include (but are not limited to): worker's compensation; amounts deductible or for whose payment reduction in earnings of profits is allowed under section 404A and the regulations thereunder; payments pursuant to a wage contribution plan under section 105(d) as it existed prior to its repeal in 1983; amounts includible in the gross income of employees under a method or arrangement of employer contributions or compensation which has the effect of a stock bonus, pension, profit-sharing, or annuity plan, or other plan deferring the receipt of compensation or providing deferred benefits; premiums on life and health insurance; and miscellaneous benefits provided for employees such as safety, medical treatment, recreational and eating facilities, membership dues, etc.,

(Q) Research and experimental expenses (described in section 174 and the regulations thereunder) directly attributable to particular extended period long-term contracts in existence at the time such expenses are incurred, or incurred under an agreement to perform research or experimentation,

(R) Rework labor, scrap and spoilage to the extent incurred in the performance of particular extended period long-term contracts, and

(S) Bidding expenses incurred in the solicitation of particular extended period long-term contracts ultimately awarded to the taxpayer. For purposes of this section, the term "bidding expenses" does not include any research and experimental expenses described in section 174 and the regulations thereunder. The taxpayer shall defer all bidding expenses paid or incurred in the solicitation of a particular extended period long-term contract until the contract is awarded. If the contract is awarded to the taxpayer, the bidding costs become part of the indirect costs assigned to the contract. If the contract is not awarded to the taxpayer, bidding costs become deductible in the taxable year the contract is awarded, or the taxable year the taxpayer is notified in writing that no contract will be awarded and that the contract (or similar or related contract) will not be re-bid, or in the taxable year that the taxpayer abandons its bid or

proposal, whichever occurs first. Abandoning a bid does not include modifying, supplementing, or changing the original bid or proposal. If the taxpayer is awarded only part of the bid (for example, the taxpayer submitted one bid to build each of two different types of bridges and the taxpayer was awarded a contract to build only one of the two bridges), the taxpayer shall deduct the portion of the bidding expenses related to the portion of the bid not awarded to the taxpayer; in the case of a bid or proposal for a multi-unit contract, however, all the bidding expenses shall be allocated to a contract awarded to the taxpayer to produce any or such units (for example, where the taxpayer submitted one bid to produce three similar turbines and the taxpayer was awarded a contract to produce only two of the three turbines).

(iii) Costs not allocated to extended period long-term contracts. Costs which are not required to be included in costs attributable to an extended period long-term contract include:

(A) Marketing, selling and advertising expenses,

(B) Bidding expenses incurred in the solicitation of contracts not awarded to the taxpayer (see paragraph (d)(6)(ii)(S) of this section),

(C) Interest,

(D) General and administrative expenses (but not including any cost described in paragraph (d)(6)(ii)(L) or (M) of this section) and compensation paid to officers attributable to the performance of services that do not directly benefit or are not incurred by reason of any extended period long-term contracts,

(E) Research and experimental expenses (described in section 174 and the regulations thereunder) neither directly attributable to particular extended period long-term contracts in existence at the time such expenses are incurred nor incurred under any agreement to perform research or experimentation,

(F) Losses under section 165 and the regulations thereunder,

(G) Depreciation, amortization and cost recovery allowances on equipment and facilities that have been placed in service but are temporarily idle (for this purpose, an asset is not considered to be temporarily idle on non-working days, and an asset used in construction is considered to be idle when it is not en route to or not located at a job-site),

(H) Income taxes attributable to income received from extended period long-term contracts,

(I) Contributions paid to or under a pension or annuity plan allowable as a deduction under section 404 (and section 404A if applicable) to the extent such contributions represent past service costs, and

(J) Costs attributable to strikes.

(iv) Special rule for component parts or subassemblies produced by the taxpayer. In the case of any type of component or subassembly produced by the taxpayer, the taxpayer shall use the cost allocation rules prescribed in paragraph (d)(6) and (8) of this section to determine the unit cost of the components or subassemblies that reasonably can be expected to be incorporated into the subject matter of extended period long-term contracts of the taxpayer. The taxpayer may use other proper cost allocation rules (see § 1.471-11) to determine the unit cost of the components or subassemblies other than those described in the preceding sentence. For each taxable year, the taxpayer's estimate of the number of components or subassemblies that can be expected to be incorporated into the subject matter of extended period long-term contracts shall be considered reasonable if the estimate is based upon facts known at the beginning of the taxable year.

(v) Taxpayers not using a long-term contract method. Taxpayers who use a method of accounting that uses inventories (other than a long-term contract method) must use the cost allocation rules provided in paragraph (d)(6) of this section (rather than the cost allocation rules provided in § 1.471-11) for any extended period long-term contract unless the taxpayer reasonably expects that

(A) 40% of the gross income from such contract will be recognized no later than the taxable year after the taxable year in which the contract is entered into;

(B) 70% of the gross income from such contract will be recognized no later than the second taxable year after the taxable year in which the contract is entered into; and

(C) 100% of the gross income from such contract will be recognized no later than the third taxable year after the taxable year in which the contract is entered into.

In determining whether the taxpayer meets the "reasonably expected" test of this paragraph

(d)(6)(v), rules consistent with the rules of paragraph (b)(3)(iv) of this section will apply.

(7) Guarantees, warranties, maintenance costs, etc. "Costs which are properly allocable to a long-term contract" do not include costs incurred with respect to any guarantee, warranty, maintenance, or other service agreement relating to the subject matter of the long-term contract. See paragraph (a)(3) of this section.

(8) Separate accounts; annual cost allocation; use of inventory methods in connection with the completed contract method—(i) General rule. This paragraph (d)(8) is effective for taxable years beginning after December 31, 1982. For taxable years beginning before January 1, 1983, see 26 CFR 1.451-3(d)(6) (revised as of April 1, 1985). The taxpayer shall maintain separate accounts for each long-term contract, and both the direct costs (as described in paragraph (d)(5)(i) or (d)(6)(i) of this section) and the indirect costs (as described in paragraph (d)(5)(ii) or (d)(6)(ii) of this section) incurred during the taxable year attributable to long-term contracts shall be allocated to particular long-term contracts for the taxable year such costs are incurred. Any change in the taxpayer's method of accounting for costs attributable to long-term contracts required by this paragraph (d)(8) is a change in method of accounting to which section 446(e) and the regulations and procedures thereunder apply.

(ii) Direct labor. Direct labor costs incurred during the taxable year shall be allocated to particular long-term contracts using a specific identification (or "tracing") method. However, if direct labor costs attributable to more than one long-term contract are intermingled so that it is impractical to specifically identify (or "trace") such costs to a particular long-term contract, such costs shall be allocated to particular long-term contracts using any reasonable method, provided that the method employed reasonably allocates direct labor costs among long-term contracts completed during the taxable year and long-term contracts that have not been completed as of the end of the taxable year. For the purpose of allocating elements of direct labor cost other than basic compensation to particular long-term contracts, all such cost elements may be grouped together and then allocated to particular long-term contracts in proportion to the charge for basic compensation.

(iii) Direct materials—(A) General rule. The cost of direct materials that are dedicated to a long-term contract in a taxable year shall be allocated to that long-term contract for that year. The cost that is allocated to the particular contract for the year of dedication shall be determined using the taxpayer's method of accounting for inventories (e.g., specific identification, FIFO, LIFO, etc.) of the material whose cost is being allocated. The costing rule in the preceding sentence applies both when materials are purchased specifically for a contract and when materials previously held by the taxpayer are dedicated to the contract. Examples of dedication of materials to a long-term contract include the following: (1) Delivery of materials to a job site (if only one contract is being performed at that site); (2) association of materials with a specific contract (for example, by purchase order, entry on books and records, shipping instructions, etc.); and, if not previously assigned, the physical incorporation of the material into the subject matter of the contract or the consumption of the material in the production of the subject matter of the contract.

(B) Alternative rule for taxable years beginning after December 31, 1982 and before January 1, 1986. For taxable years beginning after December 31, 1982, and before January 1, 1986, taxpayers may, in lieu of applying the general rule of paragraph (d)(8)(iii)(A) of this section, allocate direct costs incurred during the taxable year to particular long-term contracts using the specific identification (or "tracing") method, and if direct costs attributable to more than one long-term contract are intermingled so that such costs cannot be identified (or "traced") specifically to a particular long-term contract, such costs shall be allocated to particular long-term contracts using any reasonable method, provided that the method employed reasonably allocates direct costs among long-term contracts completed during the taxable year and long-term contracts that have not been completed as of the end of the taxable year. However, taxpayers utilizing the rule of this paragraph (d)(8)(iii)(B) may not use any LIFO or lower of cost or market method of identifying or allocating direct costs to any long-term contract.

(iv) Indirect costs. The indirect costs-required to be allocated to a long-term contract under paragraph (d)(5)(ii) or (d)(6)(ii) of this section shall be allocated to particular contracts for the year such costs are incurred using either—

(A) A specific identification (or "tracing") method, or

(B) A method using burden rates, such as ratios based on direct costs, hours, or other items, or similar formulas, so long as the method employed for such allocation reasonably allocates indirect costs among long-term contracts completed during

the taxable year and long-term contracts that have not been completed as of the end of the taxable year. Indirect costs may ordinarily be allocated to long-term contracts on the basis of direct labor and material costs, direct labor hours, or any other basis which results in a reasonable allocation of such indirect costs.

(9) Allocation of administrative, service, or support costs to extended period long-term contracts—(i) Introduction. (A) If a function or department of the taxpayer incurs costs that directly benefit or are incurred by reason of the extended period long-term contract activities of the taxpayer, the costs of such function or department are allocable to such extended period long-term contracts. See paragraph (d)(6)(ii)(M) of this section. However, if a function or department incurs costs that do not directly benefit and are not incurred by reason of the taxpayer's extended period long-term contracts, but rather, for example, benefit only the overall management or policy guidance functions of the taxpayer, the costs incurred by such function or department are not allocable to any extended period long-term contract. In some cases, the costs incurred by a function or department may directly benefit or be incurred by reason of the taxpayer's extended period long-term contract activities as well as the taxpayer's overall management or policy guidance function. In such cases, the taxpayer shall reasonably allocate the costs of such function or department between the taxpayer's extended period long-term contract activities and the taxpayer's overall management or policy guidance functions. Paragraph (d)(9) of this section provides guidance in making these allocations.

(B) If the methods of allocation used by the taxpayer, or the taxpayer's selection of specific types of costs to be allocated differs from the allocation methods or the specific types of costs to be allocated described in this paragraph (d)(9), the taxpayer's allocation methods and selection of specific types of costs to be allocated shall generally not be changed if, with respect to the taxpayer's extended period long-term contracts taken as a whole—

(1) The total amount of costs incurred during the taxable year of a type described in this paragraph (d)(9) that the taxpayer allocated to such contracts does not differ significantly from the total amount of costs that would be allocated to such contracts under this paragraph (d)(9); and

(2) The taxpayer's selection of cost allocation methods and specific types of costs to be allocated are applied consistently and do not result in any disproportionate allocation of costs to contracts expected to be completed in the near future.

(ii) General rule. The total amount of administrative, service, or support costs that directly benefit or are incurred by reason of only a particular extended period long-term contract shall be directly assigned to such contract. The direct and indirect cost (hereinafter "service costs") of administrative, service or support functions or departments (hereinafter "service departments") that directly benefit or are incurred by reason of more than one activity shall be allocated to particular extended period long-term contracts on the basis of a factor or relationship that reasonably relates the incurring of the service cost to the benefits received by the extended period long-term contract. In general, the direct costs of a service department include costs that can be identified specifically with the services provided by the department, and the indirect costs of a service department include costs not identified specifically with the services provided by the function or department, but incurred by reason of the direct costs of the function or department. Such direct and indirect costs include, but are not limited to, compensation (including compensation described in paragraph (d)(6)(ii)(E) and (P) of this section) of employees directly engaged in performing the services provided by the department, travel, materials and supplies consumed by the department, supervisory and clerical compensation, occupancy costs (rents or an allocable share of depreciation and property taxes), depreciation or rent of office machines, utilities, telephone, and other department overhead. The types of activities that are administrative, service or support functions or departments are not predetermined, but depend upon the facts and circumstances of each contractor's activities and business organization. In a decentralized business organization, all costs incurred at higher levels, for example, at a parent corporation or organization, or at the headquarters of a subsidiary corporation or division, are not necessarily general and administrative expenses (as described in paragraph (d)(5)(iii)(D) of this section) with respect to an extended period long-term contract.

(iii) Rules for allocation of service costs. The taxpayer shall allocate the total direct and indirect costs of a service department to extended period long-term contracts by applying consistently any reasonable method of cost allocation authorized by cost accounting principles. Reasonable methods include:

(A) The direct reallocation method, whereby the total costs (direct and indirect) of all service de-

partments are allocated only to production departments, and then from the production departments to particular extended period long-term contracts and to other production activities that are not extended period long-term contracts. The service costs allocable to such other production activities shall be accounted for under a proper method of accounting. This direct reallocation method ignores benefits provided by one service department for other service departments, and also excludes such other service departments from the base used to make the allocation;

(B) The step-allocation method, whereby a sequence of allocations is made beginning with the allocation to other service departments and to production departments of the total costs (direct and indirect) of the service department that provides benefits to the greatest number of other service departments, and ending with the allocation of the total costs (including the costs allocated to it from the other service departments) of the service department that provides benefits to the least number of other service departments. Under this allocation method, the cost of service departments allocated properly to functions or departments that are not service departments or production departments (for example, payroll costs allocated to a financial planning function or department) are not reallocated to any other service department or production department. The taxpayer shall then allocate the costs of the production departments (including the reallocated service department costs) to extended period long-term contracts and to other production activities that are not extended period long-term contracts. The service costs allocable to such other production activities shall be accounted for under a proper method of accounting, or

(C) Other methods of cost allocation authorized by cost accounting principles. However, a reasonable method does not include allocating service department costs to other service departments without taking such allocation into account in allocating the costs of such other service departments.

(iv) Relationship of service costs to benefits received. Factors or relationships that relate the incurring of service costs to the benefits received by an extended period long-term contract include measures based upon the total output of the service department (for example, the approximate number of service hours or the approximate number or the dollar volume of transactions provided to an extended period long-term contract as a fraction of the total number of service hours or the total number or the total dollar volume of transactions provided by the department), or measures based upon the relative size of the extended period long-term contract to the size of the taxpayer's other production activities (for example, the number of direct labor employees or direct labor hours or direct labor costs (as described in paragraph (d)(6)(i) of this section) incurred on an extended period long-term contract as a fraction of the total number of direct labor employees, direct labor hours, or direct labor costs incurred by the taxpayer in all production activities). In general, allocation methods prescribed in regulations of the Cost Accounting Standards Board, 4 CFR Chapter III, Subchapter G, as well as other allocation methods consistent with the principles or paragraph (d)(g) of this section are acceptable allocation methods, provided that the taxpayer applies such methods consistently.

(v) Additional requirements.

(A) If, pursuant to section 482 and the regulations thereunder, the district director makes an allocation of income or deductions between members of a group of controlled entities to reflect the performance of services or the provision of equipment or facilities at other than an arm's length charge, any taxpayer that has extended period long-term contracts and is affected by such allocation is required to take such allocation into account in making the taxpayer's allocation to extended period long-term contracts of the cost of administrative, service or support functions or departments.

(B) If the taxpayer establishes to the satisfaction of the district director that all of a particular type of administrative, service or support function is performed only at the jobsite (that is, at the offices of a production plant or at a construction site), then all the direct and indirect costs of such function incurred at the jobsite shall be directly allocated to each particular extended period long-term contract and any other activities performed at that jobsite, and no further allocation of that type of cost shall be required.

(C) For each taxable year that the taxpayer allocates costs service to an extended period long-term contract, the taxpayer shall maintain the records used to make such allocation so that the allocations may be readily examined and verified by the district director. The taxpayer shall also maintain records describing the types of costs that the taxpayer has deducted currently under paragraph (d)(6)(iii)(D) (general and administrative expenses), so that the amount, nature and allocation

of such costs may be verified readily by the district director. A change in the method or base used in allocating such service costs (such as changing from an allocation base using direct labor cost to a base using direct labor hours), or a change in the taxpayer's determination of what functions or departments of the taxpayer are required or not required to be allocated to extended period long-term contracts is a change in method of accounting to which section 446(e) and the regulations and procedures thereunder apply. See § 1.446–1(e).

(vi) Illustration of types of activities with respect to which costs ordinarily are required to be allocated. Costs incurred by the following types of functions or departments ordinarily are required to be allocated to extended period long-term contracts:

(A) The administration and coordination of manufacturing or construction projects (wherever performed in the business organization of the taxpayer);

(B) Personnel operations, including the cost of recruiting, hiring, relocating, assigning, and maintaining personnel records of employees whose labor cost is allocable to extended period long-term contracts;

(C) Purchasing operations, including purchasing materials and equipment, scheduling and coordinating delivery and return of materials and equipment to or from factories or jobsites, and expediting and follow-up;

(D) Materials handling and warehousing operations;

(E) Accounting and data services operations related to contract activities, including cost accounting, accounts payable, disbursements, billing, accounts receivable and payroll;

(F) Data processing;

(G) Security services; and

(H) Legal departments that provide legal services to contracts.

(vii) Illustration of types of activities with respect to which costs ordinarily are not required to be allocated. Costs incurred by the following types of functions or departments ordinarily are not required to be allocated to extended period long-term contracts:

(A) Functions or departments responsible for overall management of the taxpayer, or for setting overall policy for all of the taxpayer's activities or trades or businesses (such as, the board of directors (including their immediate staff), and the chief executive, financial, accounting and legal officers (including their immediate staffs) of the taxpayer, provided that no substantial part of the costs of such departments or functions directly benefit extended period long-term contracts);

(B) General business planning;

(C) Financial accounting (including the accounting services required to prepare consolidated reports, but not including any accounting for particular contracts);

(D) General financial planning (including general budgeting) and financial management (including bank relations and cash management);

(E) General economic analysis and forecasting;

(F) Internal audit;

(G) Shareholder, public and industrial relations;

(H) Tax department; and

(I) Other departments or functions that are not responsible for day-to-day operations but are instead responsible for setting policy and establishing procedures to be used by all of the taxpayer's activities or trades or businesses.

(viii) Policy and overall management services. Examples of such functions or departments that are responsible for setting policy and establishing procedures applicable to all of the taxpayer's activities or trades or businesses (see paragraph (d)(9)(vii)(I) of this section) are:

(A) Purchasing policy (such as maintaining lists of approved suppliers, developing purchasing manuals and policy directives of general application, developing general quality standards for purchased materials and components, general auditing and review of purchasing activities to assure compliance with the taxpayer's purchasing policy and compliance with government purchasing requirements, and management of small business participation),

(B) Personnel policy (such as establishing and managing personnel policy in general, developing general wage, salary and benefit policies, developing employee training programs unrelated to particular contracts, negotiations with labor unions and relations with retired workers),

(C) Quality control policy,

(D) Safety engineering policy,

(E) Insurance or risk management policy (but not including bid or performance bonds or insurance related to particular contracts), and

(F) Environmental management policy. However, the cost of establishing any system or procedure that will only benefit a particular extended period long-term contract shall be directly allocated to such contract.

(ix) Costs not described. The costs of any administrative, service or support function or department of the taxpayer not described in paragraph (d)(9)(iv) or (vii) of this section are required to be allocated to extended period long-term contracts to the extent that the nature of the benefits provided by such function or department is more like the type of benefits described in paragraph (d)(9)(vi) than the type of benefits described in paragraph (d)(9)(vii).

(x) Illustrations of the allocations required by this paragraph (d)(9). The following illustrate the types of considerations that are to be taken into account in making the allocations required by paragraph (d)(9) of this section. The taxpayer need not use the same method to allocate a particular type of administrative, service or support cost as the method described in these illustrations provided that the method used by the taxpayer is reasonable. See paragraph (d)(9)(iii) of this section. The allocation methods illustrated may be used to allocate other types of service costs not illustrated.

(A) Security services. The cost of security or protection services benefits all areas covered by the service and should be allocated to each physical area that receives the service in proportion either to the size of the physical area, number of employees in the area, or in proportion to the relative fair market value of assets located in the area, or in any other reasonable basis applied consistently. That part of the total cost allocable to a factory or jobsite where the only work being performed is an extended period long-term contract shall be directly allocated to that contract. The treatment of the cost of security services allocable to other service departments depends upon the method of allocation adopted by the taxpayer under paragraph (d)(9)(iii) of this section.

(B) Legal services. The cost of a legal department includes rent (or an allocation of building depreciation and occupancy costs), travel, office machines, supplies, telephone, library, and other overhead and the compensation of the attorneys and other employees assigned to the department. For this purpose compensation includes compensation described in paragraphs (d)(6)(ii)(E) and (P) of this section. These costs only benefit activities of the taxpayer requiring legal services. These costs are generally allocable directly to an extended period long-term contract on the basis of the approximate number of hours of legal services (including research) performed in connection with the contract, including bidding, negotiating, drafting, or reviewing the contract (including subcontracts and supply contracts), obtaining necessary licenses and permits, and in resolving contract disputes, termination claims or disputes arising from the performance of the contract. Different hourly rates may be appropriate for different services. In determining the number of hours allocable to any contract, approximations are appropriate, detailed time records need not be kept, and insubstantial amounts of services provided to a contract by senior legal staff as administrators or as reviewers may be ignored. The taxpayer shall also allocate directly to a contract the cost of any outside legal services provided to the contract. Instead of an allocation based upon total hours of legal services provided to an activity, the taxpayer may choose to allocate the costs of a legal department to an extended period long-term contract and to other production activities on the basis of total direct costs (as described in paragraph (d)(6)(i) of this section) incurred on an extended period long-term contract as a fraction of the total direct costs incurred on all production activities. Legal costs may also be allocable to long-term contracts of the taxpayer that are not extended period long-term contracts under paragraph (d)(5)(ii) of this section. Legal activities relating to general corporate functions, financing, securities law compliance, antitrust law compliance, tax compliance, industrial relations, compliance with laws and regulations not related to particular contracts, after the fact review of contracts to insure compliance with company policies, patents and licensing unrelated to particular contracts, and similar general legal functions are not required to be allocated to long-term contracts.

(C) Centralized payroll department. The cost of a payroll department includes rent (or an allocation of building depreciation and occupancy costs), office machines, supplies, telephones and other overhead and compensation of employees assigned to the department. The department cost may also include the cost of data processing and file maintenance, or these costs may be incurred by a separate data processing or records department and allocated to the payroll department. Payroll service costs benefit any production department or other service department incurring labor costs.

The cost of a payroll department is generally allocated on the basis of the gross amount of payroll processed.

(D) Centralized data processing. The cost of a data processing department includes rent or depreciation of data processing machines, supplies, rent (or an allocation of building depreciation and occupancy costs), power, telephone and other overhead, and the compensation of employees assigned to the department. These costs benefit all production departments and all other service departments that require data processing services. Data processing costs are generally allocated based upon the number of data processing hours supplied. Other reasonable bases, such as an allocation based upon total direct costs, may also be used. The costs of data processing systems developed for particular long-term contract shall be directly allocated to such contract.

(E) Engineering and design services. The cost of an engineering or design department includes rent (or an allocation of building depreciation and occupancy costs), travel, office machines, supplies, telephones, library, and other overhead, and compensation of employees assigned to the department. Unless the engineering and design services are properly accounted for separately, the cost of engineering or design service departments generally is directly allocable to a long-term contract (whether or not the contract is an extended period long-term contract) on the basis of the approximate number of hours of work performed on the contract as a fraction of the total hours of engineering or design work performed for all activities. Different services may be allocated at different hourly rates. Engineering and design services may also be treated as direct costs of the contract, provided that the taxpayer also treats all engineering and design overhead as a direct or indirect cost of the contract.

(F) Safety engineering. The cost of a safety engineering department includes the compensation paid to employees assigned to the department, rent (or an allocation of building depreciation and occupancy costs), travel, office machines, supplies, telephones, library, and other overhead. These costs benefit all the production activities of the taxpayer and should be allocated to an extended period long-term contract on the basis of the approximate number of safety inspections made on the contract as a fraction of total inspections, or on the basis of the number of employees assigned to the contract as a fraction of total production employees or on the basis of total labor hours worked on the contract as a fraction of total production hours, whichever is most reasonable. The cost of a safety engineering department responsible only for setting safety policy and establishing safety procedures to be used in all of the taxpayer's production activities or trades or businesses is not required to be allocated to extended period long-term contracts and other production activities. However, in determining the total costs of a safety engineering department to be allocated, costs attributable to providing a safety program only for a particular long-term contract shall be directly assigned to the contract.

(e) Severing and aggregating contracts—(1) In general. (i) (A) For the purpose of clearly reflecting income (e.g., to prevent the unreasonable deferral of recognition of income or the premature recognition of loss), it may be necessary in some instances for the Commissioner either to treat one agreement as several contracts or to treat several agreements as one contract.

(B) However, in the case of long-term contracts since the factors described in this paragraph are different from the factors for determining whether certain elements of an agreement are eligible for long-term contract treatment, the factors described in this paragraph do not apply in determining which elements of an agreement that are ineligible for long-term contract treatment must be separated from those elements that are eligible for long-term contract treatment.

(C) In general only the Commissioner (and not the taxpayer) may take action under this paragraph. Thus, for example, if the taxpayer enters into one agreement, the taxpayer may not treat that agreement as several contracts for purposes of this section unless and until that agreement is changed into several agreements. See examples 3 and 5 for instances when one agreement is changed into several agreements.

(ii) Whether an agreement should be so severed or several agreements so aggregated will depend on all the facts and circumstances. Such facts and circumstances may include whether there is separate delivery or separate acceptance of units representing a portion of the subject matter of the contract, whether such units are independently priced, whether there is no business purpose for one agreement rather than several agreements or several agreements rather than one agreement, and such other factors as customary commercial practice, the dealings between parties to the contract, the nature of the subject matter of the contract, the total number of units to be constructed, manufactured, or installed under the contract, and the

contemplated time between the completion of each unit.

(iii) Generally, one agreement will not be treated as several contracts unless such agreement contemplates separate delivery or separate acceptance of portions of the subject matter of the contract. However, separate delivery or separate acceptance of portions of the subject matter of a contract does not necessarily require severing of an agreement (see example (4) of paragraph (e)(2) of this section).

(iv) One agreement may be severed, or several agreements may be aggregated, based upon the pricing formula of such agreements. For example, in the case of a multi-unit agreement for several similar items, if the price to be paid for similar units is determined under different terms or formulas (for example, if some units are priced under a cost-plus incentive fee arrangement, and later units are to be priced under a fixed-price arrangement), then the difference in the pricing terms or formulas may indicate that the agreement should be treated as several contracts.

(v) An agreement generally will be treated as several contracts where there is no business purpose for entering into one agreement rather than several agreements.

A factor which may evidence that no such business purpose exists is that the agreement covers two or more subject matters, none of which readily can be determined to be the primary subject matter of the contract (within the meaning of paragraph (b)(2)(ii) of this section); such factor must be considered along with other factors indicating the presence or absence of business purpose.

(vi) Several agreements generally will not be aggregated unless there is no business purpose for entering into several agreements rather than one agreement.

(vii) An example of a factor which is evidence that two agreements entered into between the same parties should be aggregated is that (without regard to the order in which the agreements were entered into or performed, and without regard to whether one of the agreements could actually be performed without the prior or contemporaneous performance of the other agreement) a reasonable business-person would not have entered into one of the agreements for the terms agreed upon but for entering into the other agreement in such other agreement for the terms agreed upon (or for more favorable terms). See example (2) of paragraph (e)(2) of this section. An example of a factor which is not evidence that two agreements entered into between the same parties should be aggregated is that one of the agreements would not have been entered into containing the terms agreed upon but for the expectation that the parties would enter into the other agreement.

(viii) If the number of items to be supplied is increased (as by the exercise of an option or the issuance of a "change order"), the supplying of such additional items generally results in the agreement being changed into several agreements. See paragraph § 1.451-3(e)(1)(i).

(ix) See paragraph (b)(2)(ii) of this section for special rules relating to the time for completion of certain contracts having more than one subject matter.

(2) **Examples.** The application of paragraph (e) of this section may be illustrated by the following examples.

Example (1). X, a calendar year taxpayer engaged in the construction business and using a long-term contract method, enters into one agreement in 1972 with A, a real estate developer, to build three houses of different designs in three different suburbs of a large city. The houses are to be completed, accepted, and put into service in 1973, 1974, and 1975, respectively. The portion of the total contract price attributable to each house can reasonably be determined. In these circumstances it may be necessary for the Commissioner to sever and treat the agreement as separate contracts to build each house for purposes of applying X's long-term contract method.

Example (2). Y, a calendar year shipbuilder using a long-term contract method, enters into two agreements at about the same time during 1982 with M. These agreements are the product of a single negotiation. Under each agreement the taxpayer is to construct for M a submarine of the same class. Although the specifications for each submarine are similar, it is anticipated that, since the taxpayer has never constructed this class of submarine before, the costs incurred in constructing the first submarine (to be delivered in 1983) will be substantially greater than the costs incurred in constructing the second submarine (to be delivered in 1984.) If the agreements are treated as separate contracts, it is estimated that the first contract could result in little or no gain, while the second contract would result in substantial profits. A reasonable business person would not have entered into the agreement to construct the first submarine for the price specified without entering into the agreement to construct the second submarine. In these circumstances, it may be necessary for the Commissioner to aggregate the two agreements for purposes of applying Y's long-term contract method.

Example (3). Assume the same facts as in example (2) with the addition of the following facts: In 1983, M issues a "change order" providing for a third submarine of the same class to be constructed by Y and delivered to M in 1985. The portion of the total contract price attributable to the "change order" providing for the third submarine can reasonably be determined. A reasonable business person would have entered into the agreements to construct the first two submarines for the price specified without regard to whether M would issue the "change order" for the third submarine. In these circumstances the "change order" providing for the third submarine

must be treated as a separate contract for purposes of applying Y's long-term contract method.

Example (4). Z, a calendar year taxpayer engaged in the construction business and using a long-term contract method, enters into an agreement in 1983 to build a ten story office building for the Y Bank. In 1984, the structure is completed and the first three floors of the building are completed and accepted, and Y occupies these floors and uses them for the conduct of its banking business. Construction, however, continues on the remaining seven floors, which are completed and accepted in 1985. In these circumstances, it is clear that even though separate acceptance of portions of the subject matter of the agreement has occurred, the subject matter of the agreement was essentially a single unit, namely a building, and that there was a business purpose for entering into one contract rather than several contracts. Consequently, the agreement ordinarily will not be severed into separate contracts for purposes of applying Z's long-term contract method.

Example (5). The facts are the same as in example (4), except that due to a change in business conditions, Y will not require (either for its own use or for rental) the remaining seven floors for at least two years and, pursuant to a separate agreement entered into in 1984 between the parties, substantially all work on completing the remaining seven floors is stopped. In these circumstances, due to the change in business conditions and the actions of the parties, the original agreement (as modified by the second agreement) is changed into two agreements, each of which is treated as a separate contract for purposes of this section, one contract (entered into in 1983) for the construction of a ten story building with the first three floors completed for occupancy, and a separate contract (or contracts) to finish work on the remaining seven floors on an "as requested" basis.

Example (6). T, a calendar year taxpayer engaged in the business of manufacturing aircraft and related equipment, enters into an agreement in 1982 with the B government to manufacture 10 military aircraft for delivery in 1984. It is anticipated at the time the agreement is entered into that B may enter into an agreement with T for the production and sale of as many as 300 of these aircraft over the next 20 years. In negotiating the price for the agreement, B and T take into account the expected total cost of manufacturing the 10 aircraft, the risks and the opportunities associated with the agreement and all other factors that the parties consider relevant, in such a manner that T would have entered into the agreement with the terms agreed upon whether or not T would actually enter into one or more additional production agreements. However, it is unlikely that T would have entered into the agreements but for the expectation that T and B would enter into additional production agreements. In 1984, the 10 aircraft are completed by T and accepted by B. In 1984, T also enters into an agreement with B to manufacture 20 aircraft of the same type for delivery in 1986. In negotiating the price for these 20 aircraft, B and T take into account the fact that the expected unit costs for this production of 20 will be different than the unit costs of the 10 aircraft completed in 1984, but also that the expected unit costs of this production of 20 will be substantially higher than the costs of future production. Because the price awarded for each of the two agreements takes into account the expected total costs and the risks expected for each agreement standing alone, the terms agreed upon for any one of the agreements are independent of the terms agreed upon for the other agreements. Under the facts of this example, the two agreements may not be aggregated into one contract for purposes of applying T's long-term contract method.

Example (7). R, a calendar year taxpayer engaged in the manufacture of industrial machinery, enters into one agreement in 1982 with Z to manufacture five specialized machines and to manufacture spare and replacement parts for the machines. The machines are to be delivered in 1982 and 1983, and the spare and replacement parts are to be delivered in 1983 through 1985. The portion of the total contract price attributable to the five machines and to the spare and replacement parts reasonably can be determined. The portion of the total contract price reasonably attributable to the spare and replacement parts is more than an insignificant amount of the total contract price. Assume that, under all the facts and circumstance, it is determined that the portion of the agreement attributable to the five machines need not be severed as between the machines. In these circumstances, because the agreement contemplates separate delivery of the machines and the parts, because more than an insignificant amount of the total contract price is allocable to the spare and replacement parts, and because spare or replacement parts are items different than an entire machine, it may be necessary for the Commissioner to sever the agreement, treating the agreement to manufacture the five machines as a separate contract and the agreement to manufacture the spare and replacement parts as another separate contract (or as several separate contracts depending on the facts and circumstances) for purposes of applying R's long-term contract method.

(3) Cross reference. See § 1.6001-1 (a) regarding the duty of taxpayers to keep such records as are sufficient to establish the amount of gross income, deductions, etc.

(f) Changing to or from a long-term method of accounting. A taxpayer may change to or from the percentage of completion method or the completed contract method only with the consent of the Commissioner. See section 446(e) and § 1.446–1(e).

(g) Effective date and transition to 1983 cost allocation rules; special rules—(1) In general. In the case of a taxpayer using the completed contract method or a method of accounting that uses inventories (other than a long-term contract method), the cost allocation rules prescribed in paragraph (d)(6) of this section (hereinafter "the 1983 cost allocation method") shall apply (with the phase-in described in paragraph (g)(2) of this section) to costs incurred by the taxpayer in taxable years beginning after December 31, 1982, but only with respect to extended period long-term contracts (as defined in paragraph (b)(3) of this section) entered into after December 31, 1982. No costs incurred with respect to any contract entered into before January 1, 1983 are required to be accounted for under the 1983 cost allocation method. Such costs shall be accounted for under the cost allocation method prescribed in paragraph (d)(5) of this section. Because the transition to the 1983 cost allocation method is to be applied on a "cut-off" basis, sections 446(e) and 481 do not apply to the transition to the 1983 cost allocation method.

(2) Phase-in. For costs required to be allocated to an extended period long-term contract under the 1983 cost allocation method that are not required to be allocated to the contract under the cost allocation method prescribed in paragraph (d)(5) of this section (or in paragraph (c) of § 1.471-11 in the case of a taxpayer accounting for extended period long-term contracts under a method of accounting that uses inventories (other than a long-term contract method)), in lieu of allocating the full amount of such costs to the extended period long-term contract, the taxpayer shall allocate to the contract only the applicable percentage of such costs incurred in taxable years beginning after December 31, 1982 and before January 1, 1986, with respect to extending period long-term contracts entered into after December 31, 1982. The applicable percentage shall be determined as follows:

For taxable years beginning in calendar year—	The applicable percentage is—
1983	33⅓
1984	66⅔
1985 or thereafter	100

In the case of a taxpayer whose taxable year does not begin on January 1, costs incurred with respect to extended period long-term contracts entered into after December 31, 1982, shall be accounted for under the cost allocation method prescribed in paragraph (d)(5) of this section (or paragraph (c) of § 1.471-11 in the case of a taxpayer using an inventory method) in the case of costs incurred in taxable years beginning before January 1, 1983, and under the 1983 cost allocation method (with the application of paragraph (g) of this section) in the case of taxable years beginning after December 31, 1982.

(3) Special rule for completion of certain contracts in taxable years ending before January 1, 1983. Any contract that would (but for this paragraph (g)(3)) be considered to be completed in a taxable year ending before January 1, 1983, solely by reason of the application of paragraphs (b)(2)(i)(B), (ii), (iii), or (iv) of this section, shall be considered to be completed on the first day of the taxpayer's first taxable year ending after December 31, 1982. The application of this paragraph (g)(3) shall not be considered to be a change in method of accounting to which section 481 applies.

(4) Special rule for severing and aggregating certain contracts in taxable years ending before January 1, 1983. Any contract of a taxpayer that would (but for this paragraph (g)(4)) be considered completed in a taxable year ending before January 1, 1983—

(i) Solely by reason of the application of those provisions of paragraph (e)(1) of this section expressly made applicable to taxable years ending after December 31, 1982 (hereinafter, the "severing/aggregating modifications") or,

(ii) Solely by reason of the application of both the severing/aggregating modifications and the application of paragraphs (b)(2)(i)(B), (ii), (iii) or (iv) of this section (hereinafter, the "completion modifications"), shall be treated as having been completed on the first day after December 31, 1982, on which any contract that was severed from such contract (by reason of the severing/aggregating modifications) is completed (determined with application of the completion modifications). The application of this paragraph (g)(4) shall not be considered to be a change in method of accounting to which section 481 applies.

(5) Special rule for estimated tax payments. For purposes of the addition to the tax for underpayment of estimated tax under section 6654 (relating to individuals) and section 6655 (relating to corporations), the gross income realized in the taxpayer's first taxable year ending after December 31, 1982, attributable to long-term contracts deemed to be completed in such taxable years solely by the application of paragraphs (b)(2)(i)(B), (ii), (iii), or (iv), (g)(3) or (g)(4) of this section or those portions of paragraph (e)(1) of this section made applicable to taxable years ending after December 31, 1982, shall be considered to be taxable income for such taxable year, but only with respect to installments of estimated tax required to be paid on or after April 13, 1983.

(6) Taxpayer changing from a method more inclusive of indirect costs. Except as provided in paragraphs (g)(1) and (2) of this section, if a taxpayer wishes to change to a method of accounting for indirect costs prescribed under this section (or under § 1.471-11(c) in the case of a taxpayer using an inventory method of accounting for long-term contracts) from a method of accounting for indirect costs that is more inclusive of indirect costs, the taxpayer must secure the consent of the Commissioner prior to making the change in accordance with the regulations and procedures established under section 446(e).

[T.D. 6500, 25 FR 11710, Nov. 26, 1960, as amended by T.D. 7397, 41 FR 2637, Jan. 19, 1976; T.D. 8067, 51 FR 378, Jan. 6, 1986; 51 FR 6520, Feb. 25, 1986; 51 FR 6914, Feb. 27, 1986; T.D. 8067, 51 FR 16021, April 30, 1986]

§ 1.451–4 Accounting for redemption of trading stamps and coupons.

(a) In general—(1) Subtraction from receipts. If an accrual method taxpayer issues trading stamps or premium coupons with sales, or an accrual method taxpayer is engaged in the business of selling trading stamps or premium coupons, and such stamps or coupons are redeemable by such taxpayer in merchandise, cash, or other property, the taxpayer should, in computing the income from such sales, subtract from gross receipts with respect to sales of such stamps or coupons (or from gross receipts with respect to sales with which trading stamps or coupons are issued) an amount equal to—

(i) The cost to the taxpayer of merchandise, cash, and other property used for redemptions in the taxable year,

(ii) Plus the net addition to the provision for future redemptions during the taxable year (or less the net subtraction from the provision for future redemptions during the taxable year).

(2) Trading stamp companies. For purposes of this section, a taxpayer will be considered as being in the business of selling trading stamps or premium coupons if—

(i) The trading stamps or premium coupons sold by him are issued by purchasers to promote the sale of their merchandise or services,

(ii) The principal activity of the trade or business is the sale of such stamps or coupons,

(iii) Such stamps or coupons are redeemable by the taxpayer for a period of at least 1 year from the date of sale, and

(iv) Based on his overall experience, it is estimated that not more than two-thirds of the stamps or coupons sold which it is estimated, pursuant to paragraph (c) of this section, will be ultimately redeemed, will be redeemed within 6 months of the date of sale.

(b) Computation of the net addition to or subtraction from the provision for future redemptions—(1) Determination of the provision for future redemptions. (i) The provision for future redemptions as of the end of a taxable year is computed by multiplying "estimated future redemptions" (as defined in subdivision (ii) of this subparagraph) by the estimated average cost of redeeming each trading stamp or coupon (computed in accordance with subdivision (iii) of this subparagraph).

(ii) For purposes of this section, the term "estimated future redemptions" as of the end of a taxable year means the number of trading stamps or coupons outstanding as of the end of such year that it is reasonably estimated will ultimately be presented for redemption. Such estimate shall be determined in accordance with the rules contained in paragraph (c) of this section.

(iii) For purposes of this section, the estimated average cost of redeeming each trading stamp or coupon shall be computed by including only the costs to the taxpayer of acquiring the merchandise, cash, or other property needed to redeem such stamps or coupons. The term "the costs to the taxpayer of acquiring the merchandise, cash, or other property needed to redeem such stamps or coupons" includes only the price charged by the seller (less trade or other discounts, except strictly cash discounts approximating a fair interest rate, which may be deducted or not at the option of the taxpayer provided a consistent course is followed) plus transportation or other necessary charges in acquiring possession of the goods. Items such as the costs of advertising, catalogs, operating redemption centers, transporting merchandise or other property from a central warehouse to a branch warehouse (or from a warehouse to a redemption center), and storing the merchandise or other property used to redeem stamps or coupons should not be included in costs of redeeming stamps or premium coupons, but rather should be accounted for in accordance with the provisions of sections 162 and 263.

(2) Changes in provision for future redemptions. For purposes of this section, a "net addition to" or "net subtraction from" the provision for future redemptions for a taxable year is computed as follows:

(i) Carry over the provision for future redemptions (if any) as of the end of the preceding taxable year,

(ii) Compute the provision for future redemptions as of the end of the taxable year in accordance with subparagraph (1) of this paragraph, and

(iii) If the amount referred to in subdivision (ii) of this subparagraph exceeds the amount referred to in subdivision (i) of this subparagraph, such excess is the net addition to the provision for future redemptions for the taxable year. On the other hand, if the amount referred to in such subdivision (i) exceeds the amount referred to in such subdivision (ii), such excess is the net subtraction from the provision for future redemptions for the taxable year.

(3) Example. The provisions of this paragraph and paragraph (a)(1) of this section may be illustrated by the following example:

Example. (a) X Company, a calendar year accrual method taxpayer, is engaged in the business of selling trading stamps to merchants. In 1971, its first year of operation, X sells 10 million stamps at $5 per 1,000; it redeems 3 million stamps for merchandise and cash of an average value of $3 per 1,000 stamps. At the end of 1971 it is estimated (pursuant to paragraph (c) of this section) that a total of 9 million stamps of the 10 million stamps issued in 1971 will eventually be presented for redemption. At this time it is estimated that the average cost of redeeming stamps (as described in subparagraph (1)(iii) of this paragraph) would continue to be $3 per 1,000 stamps. Under these circumstances, X computes its gross income from sales of trading stamps as follows:

Gross receipts from sales (10 million stamps at $5 per 1,000)		$50,000
Less:		
Cost of actual redemptions (3 million stamps at $3 per 1,000)	$9,000	
Provision for future redemptions on December 31, 1971 (9 million stamps–3 million stamps × $3 per 1,000)	18,000	
		27,000
1971 gross income from sales of stamps		23,000

(b) In 1972, X also sells 10 million stamps at $5 per 1,000 stamps. During 1972 X redeems 7 million stamps at an average cost of $3.01 per 1,000 stamps. At the end of 1972 it is determined that the estimated future redemptions (within the meaning of subparagraph (1)(ii) of this paragraph) is 8 million. It is further determined that the estimated average cost of redeeming stamps would continue to be $3.01 per 1,000 stamps. X thus computes its gross income from sales of trading stamps for 1972 as follows:

Gross receipts from sales (10 million stamps at $5 per 1,000)		$50,000
Less:		
Cost of actual redemptions (7 million stamps at $3.01 per 1,000)	$21,070	
Plus:		
Provision for future redemptions on Dec. 31, 1972 (8 million stamps at $3.01 per 1,000)	24,080	
Minus provision for future redemptions on Dec. 31, 1971	18,000	
Addition to provision for future redemptions	6,080	
Total cost of redemptions		27,150
1972 Gross income from sales of stamps		22,850

(c) Estimated future redemptions—(1) In general. A taxpayer may use any method of determining the estimated future redemptions as of the end of a year so long as—

(i) Such method results in a reasonably accurate estimate of the stamps or coupons outstanding at the end of such year that will ultimately be presented for redemption,

(ii) Such method is used consistently, and

(iii) Such taxpayer complies with the requirements of this paragraph and paragraphs (d) and (e) of this section.

(2) Utilization of prior redemption experience. Normally, the estimated future redemptions of a taxpayer shall be determined on the basis of such taxpayer's prior redemption experience. However, if the taxpayer does not have sufficient redemption experience to make a reasonable determination of his "estimated future redemptions," or if because of a change in his mode of operation or other relevant factors the determination cannot reasonably be made completely on the basis of the taxpayer's own experience, the experiences of similarly situated taxpayers may be used to establish an experience factor.

(3) One method of determining estimated future redemptions. One permissible method of determining the estimated future redemptions as of the end of the current taxable year is as follows:

(i) Estimate for each preceding taxable year and the current taxable year the number of trading stamps or coupons issued for each such year which will ultimately be presented for redemption.

(ii) Determine the sum of the estimates under subdivision (i) of this subparagraph for each taxable year prior to and including the current taxable year.

(iii) The difference between the sum determined under subdivision (ii) of this subparagraph and the total number of trading stamps or coupons which have already been presented for redemption is the estimated future redemptions as of the end of the current taxable year.

(4) Determination of an "estimated redemption percentage." For purposes of applying subparagraph (3)(i) of this paragraph, one permissible method of estimating the number of trading stamps or coupons issued for a taxable year that will ultimately be presented for redemption is to multiply such number of stamps issued for such year by an "estimated redemption percentage." For purposes of this section the term "estimated redemption percentage" for a taxable year means a fraction, the numerator of which is the number of trading stamps or coupons issued during a taxable year that it is reasonably estimated will ultimately be redeemed, and the denominator of which is the number of trading stamps or coupons issued during such year. Consequently, the product of such percentage and the number of stamps issued for

such year equals the number of trading stamps or coupons issued for such year that it is estimated will ultimately be redeemed.

(5) Five-year rule. (i) One permissible method of determining the "estimated redemption percentage" for a taxable year is to—

(a) Determine the percentage which the total number of stamps or coupons redeemed in the taxable year and the 4 preceding taxable years is of the total number of stamps or coupons issued or sold in such 5 years; and

(b) Multiply such percentage by an appropriate growth factor as determined pursuant to guidelines published by the Commissioner.

(ii) If a taxpayer uses the method described in subdivision (i) of this subparagraph for a taxable year, it will normally be presumed that such taxpayer's "estimated redemption percentage" is reasonably accurate.

(6) Other methods of determining estimated future redemptions. (i) If a taxpayer uses a method of determining his "estimated future redemptions" (other than a method which applies the 5-year rule as described in subparagraph (5)(i) of this paragraph) such as a probability sampling technique, the appropriateness of the method (including the appropriateness of the sampling technique, if any) and the accuracy and reliability of the results obtained must, if requested, be demonstrated to the satisfaction of the district director.

(ii) No inference shall be drawn from subdivision (i) of this subparagraph that the use of any method to which such subdivision applies is less acceptable than the method described in subparagraph (5)(i) of this paragraph. Therefore, certain probability sampling techniques used in determining estimated future redemptions may result in reasonably accurate and reliable estimates. Such a sampling technique will be considered appropriate if the sample is—

(a) Taken in accordance with sound statistical sampling principles,

(b) In accordance with such principles, sufficiently broad to produce a reasonably accurate result, and

(c) Taken with sufficient frequency as to produce a reasonably accurate result.

In addition, if the sampling technique is appropriate, the results obtained therefrom in determining estimated future redemptions will be considered accurate and reliable if the evaluation of such results is consistent with sound statistical principles. Ordinarily, samplings and recomputations of the estimated future redemptions will be required annually. However, the facts and circumstances in a particular case may justify such a recomputation being taken less frequently than annually. In addition, the Commissioner may prescribe procedures indicating that samples made to update the results of a sample of stamps redeemed in a prior year need not be the same size as the sample of such prior year.

(d) Consistency with financial reporting—(1) Estimated future redemptions. For taxable years beginning after August 22, 1972, the estimated future redemptions must be no greater than the estimate that the taxpayer uses for purposes of all reports (including consolidated financial statements) to shareholders, partners, beneficiaries, other proprietors, and for credit purposes.

(2) Average cost of redeeming stamps. For taxable years beginning after August 22, 1972, the estimated average cost of redeeming each stamp or coupon must be no greater than the average cost of redeeming each stamp or coupon (computed in accordance with paragraph (b)(1)(iii) of this section) that the taxpayer uses for purposes of all reports (including consolidated financial statements) to shareholders, partners, beneficiaries, other proprietors, and for credit purposes.

(e) Information to be furnished with return—(1) In general. For taxable years beginning after August 22, 1972, a taxpayer described in paragraph (a) of this section who uses a method of determining the "estimated future redemptions" other than that described in paragraph (c)(5)(i) of this section shall file a statement with his return showing such information as is necessary to establish the correctness of the amount subtracted from gross receipts in the taxable year.

(2) Taxpayers using the 5-year rule. If a taxpayer uses the method of determining estimated future redemptions described in paragraph (c)(5)(i) of this section, he shall file a statement with his return showing, with respect to the taxable year and the 4 preceding taxable years—

(i) The total number of stamps or coupons issued or sold during each year, and

(ii) The total number of stamps or coupons redeemed in each such year.

(3) Trading stamp companies. In addition to the information required by subparagraph (1) or (2) of this paragraph, a taxpayer engaged in the trade or business of selling trading stamps or

premium coupons shall include with the statement described in subparagraph (1) or (2) of this paragraph such information as may be necessary to satisfy the requirements of paragraph (a)(2)(iv) of this section.

[T.D. 6500, 25 FR 11710, Nov. 26, 1960, as amended by T.D. 7201, 37 FR 16911, Aug. 23, 1972, 37 FR 18617, Sept. 14, 1972]

§ 1.451–5 Advance payments for goods and long-term contracts.

(a) Advance payment defined. (1) For purposes of this section, the term "advance payment" means any amount which is received in a taxable year by a taxpayer using an accrual method of accounting for purchases and sales or a long-term contract method of accounting (described in § 1.451–3), pursuant to, and to be applied against, an agreement:

(i) For the sale or other disposition in a future taxable year of goods held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business, or

(ii) For the building, installing, constructing or manufacturing by the taxpayer of items where the agreement is not completed within such taxable year.

(2) For purposes of subparagraph (1) of this paragraph:

(i) The term "agreement" includes (a) a gift certificate that can be redeemed for goods, and (b) an agreement which obligates a taxpayer to perform activities described in subparagraph (1)(i) or (ii) of this paragraph and which also contains an obligation to perform services that are to be performed as an integral part of such activities; and

(ii) Amounts due and payable are considered "received".

(3) If a taxpayer (described in subparagraph (1) of this paragraph) receives an amount pursuant to, and to be applied against, an agreement that not only obligates the taxpayer to perform the activities described in subparagraph (1)(i) and (ii) of this paragraph, but also obligates the taxpayer to perform services that are not to be performed as an integral part of such activities, such amount will be treated as an "advance payment" (as defined in subparagraph (1) of this paragraph) only to the extent such amount is properly allocable to the obligation to perform the activities described in subparagraph (1)(i) and (ii) of this paragraph. The portion of the amount not so allocable will not be considered an "advance payment" to which this section applies. If, however, the amount not so allocable is less than 5 percent of the total contract price, such amount will be treated as so allocable except that such treatment cannot result in delaying the time at which the taxpayer would otherwise accrue the amounts attributable to the activities described in subparagraph (1)(i) and (ii) of this paragraph.

(b) Taxable year of inclusion—(1) In general. Advance payments must be included in income either—

(i) In the taxable year of receipt; or

(ii) Except as provided in paragraph (c) of this section.

(a) In the taxable year in which properly accruable under the taxpayer's method of accounting for tax purposes if such method results in including advance payments in gross receipts no later than the time such advance payments are included in gross receipts for purposes of all of his reports (including consolidated financial statements) to shareholders, partners, beneficiaries, other proprietors, and for credit purposes, or

(b) If the taxpayer's method of accounting for purposes of such reports results in advance payments (or any portion of such payments) being included in gross receipts earlier than for tax purposes, in the taxable year in which includible in gross receipts pursuant to his method of accounting for purposes of such reports.

(2) Examples. This paragraph may be illustrated by the following examples:

Example (1). S, a retailer who uses for tax purposes and for purposes of the reports referred to in subparagraph (1)(ii)(a) of this paragraph, an accrual method of accounting under which it accounts for its sales of goods when the goods are shipped, receives advance payments for such goods. Such advance payments must be included in gross receipts for tax purposes either in the taxable year the payments are received or in the taxable year such goods are shipped (except as provided in paragraph (c) of this section).

Example (2). T, a manufacturer of household furniture, is a calendar year taxpayer who uses an accrual method of accounting pursuant to which income is accrued when furniture is shipped for purposes of its financial reports (referred to in subparagraph (1)(ii)(a) of this paragraph) and an accrual method of accounting pursuant to which the income is accrued when furniture is delivered and accepted for tax purposes. See § 1.446-1(c)(1)(ii). In 1974, T receives an advance payment of $8,000 from X with respect to an order of furniture to be manufactured for X for a total price of $20,000. The furniture is shipped to X in December 1974, but it is not delivered to and accepted by X until January 1975. As a result of this contract, T must include the entire advance payment in its gross income for tax purposes in 1974 pursuant to subparagraph (1)(ii)(b) of this paragraph. T must include the remaining $12,000 of the

gross contract price in its gross income in 1975 for tax purposes.

(3) **Long-term contracts.** In the case of a taxpayer accounting for advance payments for tax purposes pursuant to a long-term contract method of accounting under § 1.451-3, or of a taxpayer accounting for advance payments with respect to a long-term contract pursuant to an accrual method of accounting referred to in the succeeding sentence, advance payments shall be included in income in the taxable year in which properly included in gross receipts pursuant to such method of accounting (without regard to the financial reporting requirement contained in subparagraph (1)(ii) (a) or (b) of this paragraph). An accrual method of accounting to which the preceding sentence applies shall consist of any method of accounting under which the income is accrued when, and costs are accumulated until, the subject matter of the contract (or, if the subject matter of the contract consists of more than one item, an item) is shipped, delivered, or accepted.

(4) **Installment method.** The financial reporting requirement of subparagraph (1)(ii) (a) or (b) of this paragraph shall not be construed to prevent the use of the installment method under section 453. See § 1.446-1(c)(1)(ii).

(c) **Exception for inventoriable goods.** (1)(i) If a taxpayer receives an advance payment in a taxable year with respect to an agreement for the sale of goods properly includible in his inventory, or with respect to an agreement (such as a gift certificate) which can be satisfied with goods or a type of goods that cannot be identified in such taxable year, and on the last day of such taxable year the taxpayer—

(a) Is accounting for advance payments pursuant to a method described in paragraph (b)(1)(ii) of this section for tax purposes,

(b) Has received "substantial advance payments" (as defined in subparagraph (3) of this paragraph) with respect to such agreement, and

(c) Has on hand (or available to him in such year through his normal source of supply) goods of substantially similar kind and in sufficient quantity to satisfy the agreement in such year,

then all advance payments received with respect to such agreement by the last day of the second taxable year following the year in which such substantial advance payments are received, and not previously included in income in accordance with the taxpayer's accrual method of accounting, must be included in income in such second taxable year.

(ii) If advance payments are required to be included in income in a taxable year solely by reason of subdivision (i) of this subparagraph, the taxpayer must take into account in such taxable year the costs and expenditures included in inventory at the end of such year with respect to such goods (or substantially similar goods) on hand or, if no such goods are on hand by the last day of such second taxable year, the estimated cost of goods necessary to satisfy the agreement.

(iii) Subdivision (ii) of this subparagraph does not apply if the goods or type of goods with respect to which the advance payment is received are not identifiable in the year the advance payments are required to be included in income by reason of subdivision (i) of this subparagraph (for example, where an amount is received for a gift certificate).

(2) If subparagraph (1)(i) of this paragraph is applicable to advance payments received with respect to an agreement, any advance payments received with respect to such agreement subsequent to such second taxable year must be included in gross income in the taxable year of receipt. To the extent estimated costs of goods are taken into account in a taxable year pursuant to subparagraph (1)(ii) of this paragraph, such costs may not again be taken into account in another year. In addition, any variances between the costs or estimated costs taken into account pursuant to subparagraph (1)(ii) of this paragraph and the costs actually incurred in fulfilling the taxpayer's obligations under the agreement must be taken into account as an adjustment to the cost of goods sold in the year the taxpayer completes his obligations under such agreement.

(3) For purposes of subparagraph (1) of this paragraph, a taxpayer will be considered to have received "substantial advance payments" with respect to an agreement by the last day of a taxable year if the advance payments received with respect to such agreement during such taxable year plus the advance payments received prior to such taxable year pursuant to such agreement, equal or exceed the total costs and expenditures reasonably estimated as includible in inventory with respect to such agreement. Advance payments received in a taxable year with respect to an agreement (such as a gift certificate) under which the goods or type of goods to be sold are not identifiable in such year shall be treated as "substantial advance payments" when received.

(4) The application of this paragraph is illustrated by the following example:

Example. In 1971, X, a calendar year accrual method taxpayer, enters into a contract for the sale of goods (properly includible in X's inventory) with a total contract price of $100. X estimates that his total inventoriable costs and expenditures for the goods will be $50. X receives the following advance payments with respect to the contract:

1971	$35
1972	20
1973	15
1974	10
1975	10
1976	10

The goods are delivered pursuant to the customer's request in 1977. X's closing inventory for 1972 of the type of goods involved in the contract is sufficient to satisfy the contract. Since advance payments received by the end of 1972 exceed the inventoriable costs X estimates that he will incur, such payments constitute "substantial advance payments". Accordingly, all payments received by the end of 1974, the end of the second taxable year following the taxable year during which "substantial advance payments" are received, are includible in gross income for 1974. Therefore, for taxable year 1974 X must include $80 in his gross income. X must include in his cost of goods sold for 1974 the cost of such goods (or similar goods) on hand or, if no such goods are on hand, the estimated inventoriable costs necessary to satisfy the contract. Since no further deferral is allowable for such contract, X must include in his gross income for the remaining years of the contract, the advance payment received each year. Any variance between estimated costs and the costs actually incurred in fulfilling the contract is to be taken into account in 1977, when the goods are delivered. See paragraph (c)(2) of this section.

(d) Information schedule. If a taxpayer accounts for advance payments pursuant to paragraph (b)(1)(ii) of this section, he must attach to his income tax return for each taxable year to which such provision applies an annual information schedule reflecting the total amount of advance payments received in the taxable year, the total amount of advance payments received in prior taxable years which has not been included in gross income before the current taxable year, and the total amount of such payments received in prior taxable years which has been included in gross income for the current taxable year.

(e) Adoption of method. (1) For taxable years ending on or after December 31, 1969, and before January 1, 1971, a taxpayer (even if he has already filed an income tax return for a taxable year ending within such period) may secure the consent of the Commissioner to change his method of accounting for such year to a method prescribed in paragraph (b)(1)(ii) of this section in the manner prescribed in section 446 and the regulations thereunder, if an application to secure such consent is filed on Form 3115 within 180 days after March 23, 1971.

(2) A taxpayer who is already reporting his income in accordance with a method prescribed in paragraph (b)(1)(ii)(a) of this section need not secure the consent of the Commissioner to continue to utilize this method. However, such a taxpayer, for all taxable years ending after March 23, 1971, must comply with the requirements of paragraphs (b)(1)(ii)(a) (including the financial reporting requirement) and (d) (relating to an annual information schedule) of this section.

(f) Cessation of taxpayer's liability. If a taxpayer has adopted a method prescribed in paragraph (b)(1)(ii) of this section, and if in a taxable year the taxpayer dies, ceases to exist in a transaction other than one to which section 381(a) applies, or his liability under the agreement otherwise ends, then so much of the advance payment as was not includible in his gross income in preceding taxable years shall be included in his gross income for such taxable year.

(g) Special rule for certain transactions concerning natural resources. A transaction which is treated as creating a mortgage loan pursuant to section 636 and the regulations thereunder rather than as a sale shall not be considered a "sale or other disposition" within the meaning of paragraph (a)(1) of this section. Consequently, any payment received pursuant to such a transaction, which payment would otherwise qualify as an "advance payment", will not be treated as an "advance payment" for purposes of this section.

[T.D. 7103, 36 FR 5495, 5977, Mar. 24, 1971, as amended by T.D. 7397, 41 FR 2641, Jan. 19, 1976; T.D. 8067, 51 FR 393, Jan. 6, 1986]

§ 1.451–6 Election to include crop insurance proceeds in gross income in the taxable year following the taxable year of destruction or damage.

(a) In general. (1) For taxable years ending after December 30, 1969, a taxpayer reporting gross income on the cash receipts and disbursements method of accounting may elect to include insurance proceeds received as a result of the destruction of, or damage to, crops in gross income for the taxable year following the taxable year of such destruction or damage, if the taxpayer establishes that, under his normal business practice, the income from such crops would have been included in gross income for any taxable year following the taxable year of such destruction or damage. However, if the taxpayer receives such insurance proceeds in the taxable year following the taxable year of such destruction or damage, then he shall include such proceeds in gross income for the taxable year of receipt without having to make an election under section 451(d) and

this section. For the purposes of this section, payments received under the Agricultural Act of 1949 as amended, as the result of (i) destruction or damage to crops caused by drought, flood, or any other natural disaster, or (ii) the inability to plant crops because of such a natural disaster, shall be treated as insurance proceeds received as a result of destruction or damage to crops. The preceding sentence shall apply to payments which are received by the taxpayer after December 31, 1973.

(2) In the case of a taxpayer who receives insurance proceeds as a result of the destruction of, or damage to, two or more specific crops, if such proceeds may, under section 451(d) and this section, be included in gross income for the taxable year following the taxable year of such destruction or damage, and if such taxpayer makes an election under section 451(d) and this section with respect to any portion of such proceeds, then such election will be deemed to cover all of such proceeds which are attributable to crops representing a single trade or business under section 446(d). A separate election must be made with respect to insurance proceeds attributable to each crop which represents a separate trade or business under section 446(d).

(b)(1) **Time and manner of making election.** The election to include in gross income insurance proceeds received as a result of destruction of, or damage to, the taxpayer's crops in the taxable year following the taxable year of such destruction or damage shall be made by means of a statement attached to the taxpayer's return (or an amended return) for the taxable year of destruction or damage. The statement shall include the name and address of the taxpayer (or his duly authorized representative), and shall set forth the following information:

(i) A declaration that the taxpayer is making an election under section 451(d) and this section;

(ii) Identification of the specific crop or crops destroyed or damaged;

(iii) A declaration that under the taxpayer's normal business practice the income derived from the crops which were destroyed or damaged would have been included in this gross income for a taxable year following the taxable year of such destruction or damage;

(iv) The cause of destruction or damage of crops and the date or dates on which such destruction or damage occurred;

(v) The total amount of payments received from insurance carriers, itemized with respect to each specific crop and with respect to the date each payment was received;

(vi) The name(s) of the insurance carrier or carriers from whom payments were received.

(2) **Scope of election.** Once made, an election under section 451(d) is binding for the taxable year for which made unless the district director consents to a revocation of such election. Requests for consent to revoke an election under section 451(d) shall be made by means of a letter to the district director for the district in which the taxpayer is required to file his return, setting forth the taxpayer's name, address, and identification number, the year for which it is desired to revoke the election, and the reasons therefor.

[T.D. 7097, 36 FR 5215, March 18, 1971, as amended by T.D. 7526, 42 FR 64624, Dec. 27, 1977]

§ 1.451–7 Election relating to livestock sold on account of drought.

(a) **In general.** Section 451(e) provides that for taxable years beginning after December 31, 1975, a taxpayer whose principal trade or business is farming (within the meaning of § 6420(c)(3)) and who reports taxable income on the cash receipts and disbursements method of accounting may elect to defer for one year a certain portion of income. The income which may be deferred is the amount of gain realized during the taxable year from the sale or exchange of that number of livestock sold or exchanged solely on account of a drought which caused an area to be designated as eligible for assistance by the Federal Government (regardless of whether the designation is made by the President or by an agency or department of the Federal Government). That number is equal to the excess of the number of livestock sold or exchanged over the number which would have been sold or exchanged had the taxpayer followed its usual business practices in the absence of such drought. For example, if in the past it has been a taxpayer's practice to sell or exchange annually 400 head of beef cattle but due to qualifying drought conditions 550 head were sold in a given taxable year, only income from the sale of 150 head may qualify for deferral under this section. The election is not available with respect to livestock described in section 1231(b)(3) (relating to cattle, horses (and other livestock) held by the taxpayer for 24 months (12 months) and used for draft, breeding, dairy, or sporting purposes).

(b) **Usual business.** The determination of the number of animals which a taxpayer would have sold if it had followed its usual business practice in

the absence of drought will be made in light of all facts and circumstances. In the case of taxpayers who have not established a usual business practice, reliance will be placed upon the usual business practice of similarly situated taxpayers in the same general region as the taxpayer.

(c) Special rules—(1) Connection with drought area. To qualify under section 451(e) and this section, the livestock need not be raised, and the sale or exchange need not take place, in a drought area. However, the sale or exchange of the livestock must occur solely on account of drought conditions, the existence of which affected the water, grazing, or other requirements of the livestock so as to necessitate their sale or exchange.

(2) Sale prior to designation of area as eligible for Federal assistance. The provisions of this section will apply regardless of whether all or a portion of the excess number of animals were sold or exchanged before an area becomes eligible for Federal assistance, so long as the drought which caused such dispositions also caused the area to be designated as eligible for Federal assistance.

(d) Classifications of livestock with respect to which the election may be made. The election to have the provisions of section 451(e) apply must be made separately for each broad generic classification of animals (e.g., hogs, sheep, cattle) for which the taxpayer wishes the provisions to apply. Separate elections shall not be made solely by reason of the animals' age, sex, or breed.

(e) Computation—(1) Determination of amount deferred. The amount of income which may be deferred for a classification of livestock pursuant to this section shall be determined in the following manner. The total amount of income realized from the sale or exchange of all livestock in the classification during the taxable year shall be divided by the total number of all such livestock sold. The resulting quotient shall then be multiplied by the excess number of such livestock sold on account of drought.

(2) Example. The provisions of this paragraph may be illustrated by the following example:

Example. A, a calendar year taxpayer, normally sells 100 head of beef cattle a year. As the result of drought conditions existing during 1976, A sells 135 head during that year. A realizes $35,100 of income from the sale of the 135 head. On August 9, 1976, as a result of the drought, the affected area was declared a disaster area thereby eligible for Federal assistance. The amount of income which A may defer until 1977, presuming the other provisions of this section are met, is determined as follows:

$35,100 (total income from sales of beef cattle)/135 (total number of beef cattle sold)×35 (excess number of beef cattle sold, i.e., 135–100)=$9,100 (amount which A may defer until 1977)

(f) Successive elections. If a taxpayer makes an election under section 451(e) for successive years, the amount deferred from one year to the next year shall not be deemed to have been received from the sale or exchange of livestock during the later year. In addition, in determining the taxpayer's normal business practice for the later year, earlier years for which an election under section 451(e) was made shall not be considered.

(g) Time and manner of making election. The election provided for in this section must be made by the later of (1) the due date for filing the income tax return (determined with regard to any extensions of time granted the taxpayer for filing such return) for the taxable year in which the early sale of livestock occurs, or (2) (the 90th day after the date these regulations are published as a Treasury decision in the FEDERAL REGISTER). The election must be made separately for each taxable year to which it is to apply. It must be made by attaching a statement to the return or an amended return for such taxable year. The statement shall include the name and address of the taxpayer and shall set forth the following information for each classification of livestock for which the election is made:

(1) A declaration that the taxpayer is making an election under section 451(e);

(2) Evidence of the existence of the drought conditions which forced the early sale or exchange of the livestock and the date, if known, on which an area was designated as eligible for assistance by the Federal Government as a result of the drought conditions.

(3) A statement explaining the relationship of the drought area to the taxpayer's early sale or exchange of the livestock;

(4) The total number of animals sold in each of the three preceding years;

(5) The number of animals which would have been sold in the taxable year had the taxpayer followed its normal business practice in the absence of drought;

(6) The total number of animals sold, and the number sold on account of drought, during the taxable year; and

(7) A computation, pursuant to paragraph (e) of this section, of the amount of income to be deferred for each such classification.

(h) **Revocation of election.** Once an election under this section is made for a taxable year, it may be revoked only with the approval of the Commissioner.

(i) **Cross reference.** For provisions relating to the involuntary conversion of livestock sold on account of drought see section 1033(e) and the regulations thereunder.

[T.D. 7526, 42 FR 64624, Dec. 27, 1977]

§ 1.453–1 Installment method of reporting income.

(a) **In general.** (1) Section 453 permits dealers in personal property, that is, persons who regularly sell or otherwise dispose of personal property on the installment plan, to elect to return the income from the sale or other disposition thereof on the installment method. To the extent provided in paragraph (d) of § 1.453–2, sales under a revolving credit type plan will be treated as sales on the installment plan and the income from the sales so treated may be returned on the installment method. A dealer who makes sales of personal property under both a revolving credit plan and a traditional installment plan may elect to report only sales under the traditional installment plan on the installment method; or he may elect to report only sales under the revolving credit plan on the installment method; or he may elect to report both sales under the revolving credit plan and the traditional installment plan on the installment method. A traditional installment plan usually has the following characteristics:

(i) The execution of a separate installment contract for each sale of personal property, and

(ii) The retention by the dealer of some type of security interest in such property.

(2) The installment method may also be applied with certain limitations (see paragraph (c) of this section) to the sale or other disposition of real property and the casual sale or other casual disposition of certain personal property.

(b) **Income to be reported.** (1) Persons permitted to use the installment method of accounting prescribed in section 453 may return as income from installment sales in any taxable year that proportion of the installment payments actually received in that year which the gross profit realized or to be realized when the property is paid for bears to the total contract price. In the case of dealers in personal property, for this purpose, gross profit means sales less cost of goods sold. See § 1.453–2 for rules applicable to the computation of income of dealers in personal property reporting on the installment method. In the case of sales of real estate and casual sales of personal property, gross profit means the selling price less the adjusted basis as defined in section 1011 and the regulations thereunder. Gross profit, in the case of a sale of real estate by a person other than a dealer and a casual sale of personal property, is reduced by commissions and other selling expenses for purposes of determining the proportion of installment payments returnable as income. For rules applicable in determining "selling price" and the use of certain other terms, see also paragraph (c) of § 1.453–4.

(2) For purposes of section 453, any total unstated interest (as defined in section 483(b)) under a contract for the sale or exchange of property, payments on account of which are subject to the application of section 483, shall not be included as a part of the selling price or the total contract price. For rules relating to payments received prior to January 1, 1964, see paragraph (a)(2) of § 1.483–2.

(3) For purposes of section 453, any amount of original issue discount in respect of certain corporate obligations issued after May 27, 1969, as computed pursuant to paragraph (b)(2)(iii) of § 1.1232–3 (relating to obligations issued in exchange for property) shall not be included as part of the selling price or the total contract price.

(c) **Limitations on the use of the installment method.** (1) Income from the sale or other disposition of real property or from casual sales or other casual dispositions of personal property may be reported on the installment method for taxable years beginning after December 31, 1953, only if, in the taxable year of the sale or other disposition, (i) there are no payments or (ii) the payments (exclusive of evidences of indebtedness of the purchaser) do not exceed 30 percent of the selling price.

(2) The income from a casual sale or other casual disposition of personal property may be reported on the installment method only if (i) the property is not of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year, and (ii) its sale price exceeds $1,000.

(3) See § 1.453–3 for the treatment of purchaser evidences of indebtedness that are payable on demand or readily tradable.

(4) Income shall be computed and reported separately for each casual sale or other casual disposi-

tion of personal property as installment payments are received in the year of sale and subsequent years.

(d) Treatment of gain or loss on default by the purchaser of personal property sold on the installment plan. If for any reason the purchaser defaults in any of his installment payments, and the vendor (whether he is a dealer in personal property or a person who has made a casual sale or other casual disposition of personalty), returning income on the installment method, repossesses the property sold, whether title thereto had been retained by the vendor or transferred to the purchaser, gain or loss for the year in which the repossession occurs is to be computed upon any installment obligations of the purchaser which are satisfied or discharged upon the repossession or are applied by the vendor to the purchase or bid price of the property. Such gain or loss is to be measured by the difference between the fair market value at the date of repossession of the property repossessed and the basis in the hands of the vendor of the obligations of the purchaser which are so satisfied, discharged, or applied, with proper adjustment for any other amounts realized or costs incurred in connection with the repossession. (See also § 1.453–6.) The basis in the hands of the vendor of the obligations of the purchaser satisfied, discharged, or applied upon the repossession of the property shall be the excess of the face value of such obligations over an amount equal to the income which would be returnable were the obligations paid in full. For definition of the basis of an installment obligation, see section 453(d)(2) and paragraph (b)(2) of § 1.453–9. No deduction for a bad debt shall in any case be taken on account of any portion of the obligations of the purchaser which are treated by the vendor as not having been satisfied, discharged, or applied upon the repossession unless it is clearly shown that after the property was repossessed the purchaser remained liable for such portion; and in no event shall the amount of the deduction exceed the basis in the hands of the vendor of the portion of the obligations with respect to which the purchaser remained liable after the repossession. (See also section 166 and the regulations thereunder.) If the property repossessed is bid in by the vendor at a lawful public auction or judicial sale, the fair market value of the property shall be presumed to be the purchase or bid price thereof in the absence of clear and convincing proof to the contrary. The fair market value of the property repossessed shall be reflected in the appropriate permanent records of the vendor at the time of such repossession.

(e) **Other accounting methods.** If the vendor chooses as a matter of consistent practice to return the income from installment sales on an accrual method or on the cash receipts and disbursements method, such a course is permissible.

(f) **Records.** In adopting the installment method of accounting the seller must maintain such records as are necessary to clearly reflect income in accordance with this section, section 446 and § 1.446–1.

[T.D. 6500, 25 FR 11714, Nov. 26, 1960, as amended by T.D. 6682, 28 FR 11173, Oct. 18, 1963; T.D. 6873, 31 FR 941, Jan. 25, 1966; T.D. 7154, 36 FR 24997, Dec. 28, 1971; T.D. 7197, 37 FR 13531, July 11, 1972]

§ 1.453–2 Special rules applicable to dealers in personal property.

(a) **In general.** A person who regularly sells personal property on the installment plan may adopt (but is not required to do so) one of the following four ways of protecting his interest in case of default by the purchaser:

(1) By an agreement that title is to remain in the vendor until the purchaser has completely performed his part of the transaction;

(2) By a form of contract in which title is conveyed to the purchaser immediately, but subject to a lien for the unpaid portion of the selling price;

(3) By a present transfer of title to the purchaser, who at the same time executes a reconveyance in the form of a chattel mortgage to the vendor; or

(4) By conveyance to a trustee pending performance of the contract and subject to its provisions.

(b) **Definition of sale on the installment plan.** The term "sale on the installment plan" means—

(1) A sale of personal property by the taxpayer under any plan for the sale or other disposition of personal property, which plan, by its terms and conditions, contemplates that each sale under the plan will be paid for in two or more payments, or

(2) A sale of personal property by the taxpayer under any plan for the sale or other disposition of personal property—

(i) Which plan, by its terms and conditions, contemplates that such sale will be paid for in two or more payments, and

(ii) Which sale is in fact paid for in two or more payments.

Normally, a sale under a traditional installment plan (as described in paragraph (a)(1) of § 1.453–1), meets the requirements of subparagraph (1) of this paragraph. See paragraph (d) of this section for the application of the requirements of subparagraph (2) of this paragraph to sales under revolving credit plans.

(c) Installment income of dealers in personal property—(1) In general. The income from sales on the installment plan of a dealer, that is, a person regularly engaged in the sale of personal property on the installment plan, may be ascertained by treating as income that proportion of the total payments received in the taxable year from sales on the installment plan (such payments being allocated to the year against the sales of which they apply) which the gross profit realized or to be realized on the total sales on the installment plan made during each year bears to the total contract price of all such sales made during that respective year. However, if the dealer demonstrates to the satisfaction of the district director that income from sales on the installment plan is clearly reflected, the income from such sales may be ascertained by treating as income that proportion of the total payments received in the taxable year from sales on the installment plan (such payments being allocated to the year against the sales of which they apply) which either (i) the gross profit realized or to be realized on the total credit sales made during each year bears to the total contract price of all credit sales during that respective year, or (ii) the gross profit realized or to be realized on all sales made during each year bears to the total contract price of all sales made during that respective year. See, however, paragraph (d)(6)(vi) of this section for rules permitting, under certain circumstances, all sales under a revolving credit plan to be considered as having been made in the taxable year. A dealer who desires to compute income by the installment method shall maintain accounting records in such a manner as to enable an accurate computation to be made by such method in accordance with the provisions of this section, section 446, and § 1.446–1.

(2) Gross profit and total contract price. For purposes of subparagraph (1) of this paragraph, in computing the gross profit realized or to be realized on the total sales on the installment plan, there shall be included in the total selling price and, thus, in the total contract price of all such sales,

(i) The amount of carrying charges or interest which is determined at the time of each sale and is added to the established cash selling price of such property and is treated as part of the selling price for customer billing purposes, and

(ii) In the case of sales made in taxable years beginning on or after January 1, 1960, the amount of carrying charges or interest determined with respect to such sales which are added contemporaneously with the sale on the books of account of the seller but are treated as periodic service charges for customer billing purposes.

Any change in the amount of the carrying charges or interest in a year subsequent to the sale will not affect the computation of the gross profit for the year of sale but will be taken into account at the time the carrying charges or interest are adjusted. However, this subparagraph does not apply to sales of personal property under a revolving credit plan described in paragraph (d)(1) of this section, nor to sales described in section 453(b)(1) and paragraph (c) of § 1.453–1. The application of this subparagraph to carrying charges or interest described in subdivision (ii) of this subparagraph may be illustrated by the following example:

Example. X Corporation makes sales on the traditional installment plan. The customer's order specifies that the total price consists of a cash price plus a "time price differential" of 1½ percent per month on the outstanding balance in his account and he is billed in this manner. On its books and for purposes of reporting to stockholders, X Corporation consistently makes the following entries each month when it records its sales. A debit entry is made to accounts receivable (for the total price) and balancing credit entries are made to sales (for the established selling price) and to a reserve account for collection expense (for the amount of the time price differential). In computing the gross profit realized or to be realized on the total sales on the installment plan, the total selling price and, thus, the total contract price for purposes of this paragraph would, with respect to sales made in taxable years beginning on or after January 1, 1960, include the time price differential.

(3) Carrying charges not included in total contract price. In the case of sales by dealers in personal property made during taxable years beginning after December 31, 1963, the income from which is returned on the installment method, if the carrying charges or interest with respect to such sales is not included in the total contract price, payments received with respect to such sales shall be treated as applying first against such carrying charges or interest. For application of this rule to revolving credit sales, see paragraph (d)(6)(v) of this section.

(d) Revolving credit plans. (1) To the extent provided in this paragraph, sales under a revolving credit plan will be treated as sales on the installment plan. The term "revolving credit plan" includes cycle budget accounts, flexible budget accounts, continuous budget accounts, and other

similar plans or arrangements for the sale of personal property under which the customer agrees to pay each billing-month (as defined in subparagraph (6)(iii) of this paragraph) a part of the outstanding balance of his account. Sales under a revolving credit plan do not constitute sales on the installment plan merely by reason of the fact that the total debt at the end of a billing-month is paid in installments. The terms and conditions of a revolving credit plan do not contemplate that each sale under the plan will be paid for in two or more payments and thus do not meet the requirements of paragraph (b)(1) of this section. In addition, since under a revolving credit plan payments are not generally applied to liquidate any particular sale, and since the terms and conditions of such plan contemplate that account balances may be paid in full or in installments, it is generally impossible to determine that a particular sale under a revolving credit plan is to be or is in fact paid for in installments so as to meet the requirements of paragraph (b)(2) of this section. However, subparagraphs (2) and (3) of this paragraph provide rules under which a certain percentage of charges under a revolving credit plan will be treated as sales on the installment plan. For purposes of arriving at this percentage, these rules, in general, treat as sales on the installment plan those sales under a revolving credit plan (1) which are of the type which the terms and conditions of the plan contemplate will be paid for in two or more installments and (2) which are charged to accounts on which subsequent payments indicate that such sales are being paid for in two or more installments.

(2)(i) The percentage of charges under a revolving credit plan which will be treated as sales on the installment plan shall be computed by making an actual segregation of charges in a probability sample of the revolving credit accounts and by applying the rules contained in subparagraph (3) of this paragraph to determine what percentage of charges in the sample is to be treated as sales on the installment plan. (See subparagraph (5) of this paragraph for rules to be used if some of the sales under a revolving credit plan are nonpersonal property sales (as defined in subparagraph (6)(iv) of this paragraph).) Such segregation shall be made of charges which make up the balances in the sample accounts as of the end of each customer's last billing-month ending within the taxable year. (See subparagraph (6)(v) of this paragraph for rules to be used in determining which charges make up the balance of an account.) However, in making such segregation, any account to which a sale is charged during the taxable year on which no payment is credited after the billing-month within which the sale is made (hereinafter called the "billing-month of sale") and on or before the end of the first billing-month ending in the taxpayer's next taxable year shall be disregarded and not taken into account in the determination of what percentage of charges in the sample is to be treated as sales on the installment plan. In order to obtain a probability sample, the accounts shall be selected in accordance with generally accepted probability sampling techniques. The appropriateness of the sampling technique and the accuracy and reliability of the results obtained must, if requested, be demonstrated to the satisfaction of the district director. If the district director is not satisfied that the taxpayer's sample is appropriate or that the results obtained are accurate and reliable, the taxpayer shall recompute his sample percentage or make appropriate adjustments to his original computations in a manner satisfactory to the district director. The taxpayer shall maintain records in sufficient detail to show the method of computing and applying the sample.

(ii) For taxable years ending before January 31, 1964, a taxpayer who has reported for income tax purposes all or a portion of sales under a revolving credit plan as sales on the installment method may apply the percentage obtained for the first taxable year ending on or after such date in determining the percentage of charges under a revolving credit plan for such prior taxable year (or years) which will be treated as sales on the installment plan. However, in computing the percentage to be applied in determining the percentage of charges under a revolving credit plan which will be treated as sales on the installment plan for such prior taxable year (or years), the rule stated in paragraph (c)(3) of this section shall not apply. See subparagraph (6)(v) of this paragraph for rules relating to the application of payments to finance charges for such prior taxable years.

(3) For the purpose of determining the percentage described in subparagraph (2) of this paragraph, a charge under a revolving credit plan will be treated as a sale on the installment plan only if such charge is a sale (as defined in subparagraph (6)(i) of this paragraph) and meets the requirements contained in subdivisions (i) and (ii) of this subparagraph.

(i) The sale must be of the type which the terms and conditions of the plan contemplate will be paid for in two or more installments. If the aggregate of sales charged during a billing-month to an account under a revolving credit plan exceeds the required monthly payment, then all sales

during such billing-month shall be considered to be of the type which the terms and conditions of such plan contemplate will be paid for in two or more installments. The required monthly payment shall be the amount of the payment which the terms and conditions of the revolving credit contract require the customer to make with respect to a billing-month. If the amount of such payment is not fixed at the date the contract is entered into, but is dependent upon the balance of the account, then such amount shall be the amount that the customer is required to pay (but not including any past-due payments) as shown on the statement either (a) for the last billing-month ending within the taxpayer's taxable year or (b) for the billing-month of sale, whichever method the taxpayer adopts for all his accounts. A taxpayer shall not change such method of determining the required monthly payment based upon the balance of the account without obtaining the consent of the district director. In any case where the required monthly payment is not set in accordance with a consistent method used during the entire taxable year, the district director may determine the required monthly payment in accordance with the method used during the major portion of such taxable year if he determines that the use of such method is necessary in order to reflect properly the income from sales under a revolving credit plan. The requirements stated in this subdivision may be illustrated by the following examples:

Example (1). Under the terms of a revolving credit plan the required monthly payment to be made by customer A is $20. During the billing-month ending in December, sales aggregating $80 are charged to customer A's account, and during the next billing-month, ending in January, sales aggregating $19.95 and finance charges of $.60 are charged to A's account. Since the aggregate of sales charged to customer A's account during the billing-month ending in December ($80) exceeds the required monthly payment ($20), the terms and conditions of the plan contemplate that the sales charged during such billing-month are of the type which will be paid for in two or more installments. Since the aggregate of sales charged to customer A's account during the billing-month ending in January ($19.95) does not exceed the required monthly payment, the sales making up the aggregate of sales in such billing-month are not of the type which the terms and conditions of the plan contemplate will be paid for in two or more installments.

Example (2). The terms of a revolving credit plan require a payment of 20 percent of the balance of the customer's account as of the end of the billing-month for which the statement is rendered. A customer makes purchases aggregating $25 in his next to the last billing-month ending within the taxpayer's taxable year, and the balance at the end of that month is $150. At the end of the customer's last billing-month ending within the taxpayer's taxable year, the balance of the account has decreased to $110. If the taxpayer determines the required monthly payment by reference to the payment required on the statement for the last billing-month ending within the taxable year and applies such method consistently to all accounts, then the sales making up the $25 aggregate of sales are of the type which the terms and conditions of the plan contemplate will be paid for in two or more installments. Although such aggregate was less than the $30 payment (20%×$150) required on the statement rendered for the billing-month of sale, it was more than the $22 (20%×$110) that the customer was required to pay on the statement rendered for his last billing-month ending within the taxable year, and thus meets the requirements of this subdivision. If, however, the taxpayer determines the required monthly payment by reference to the payment required on the statement for the billing-month of sale, then the sales making up the aggregate of sales during such billing-month do not meet the requirements of this subdivision because such aggregate was less than the $30 payment required on the statement rendered for such month.

(ii) The sale must be charged to an account on which the first payment after the billing-month of sale indicates that the sale is being paid in installments. The first payment after the billing-month of sale indicates that the sale is being paid in installments if, and only if, such payment is an amount which is less than the balance of the account as of the close of the billing-month of sale. For purposes of this subdivision, such balance shall be reduced by any return or allowance credited to the account after the close of the billing-month of sale and before the close of the billing-month within which the first payment after the billing-month of sale is credited to the account, unless the taxpayer demonstrates that the return or allowance was attributable to a charge made in a month subsequent to the billing-month of sale. The requirements stated in this subdivision may be illustrated by the following examples, in which it is assumed that the taxpayer's annual accounting period ends on January 31.

Example (1). Customer A's revolving credit account shows the following sales and payments:

Month ending	Aggregate sales in month	Payments	Balance
December 20	$150	0	$150
January 20	75	$30	195
February 20	0	195	0

All sales made in the billing-month ending December 20 meet the requirements of this subdivision because the first payment on the account after such billing-month ($30) was less than the balance of the account as of the close of such billing-month ($150); and none of the sales made in the billing-month ending January 20 meets the requirements of this subdivision because the balance of the account as of the end of such billing-month was liquidated in one payment. By application of the rules of subparagraph (6)(v) of this paragraph, the balance in the account as of the last billing-month ending in the taxable year ($195) consists of $120 of the $150 of sales made in the billing-month ending December 20 and all of the $75 of sales made in the billing-month ending January 20. Therefore, $120 of the account balance meets the requirements of this subdivision and $75 does not.

Example (2). Customer B's revolving credit account shows the following sales and payments:

Month ending	Aggregate sales in month	Payments	Balance
December 20	$50	0	$50
January 20	100	0	150
February 20	0	$50	100

None of the sales made in the billing-month ending December 20 meets the requirements of this subdivision because the first payment credited to the account after such billing-month ($50) is not less than the balance of the account as of the close of such month ($50). All of the sales made in the billing-month ending January 20 meet the requirements of this subdivision because the first payment after such billing-month ($50) is less than the balance of the account as of the close of such month ($150).

Example (3). Customer C's revolving credit account shows the following purchases and credits:

Month ending	Item	Charges	Credits	Balance
Jan. 20	Coat	$55		
	Dress	40		
	Shirt	5		
				$100
Feb. 20	Return			
	Payments			$5
	....		95	0

None of the sales made in the billing-month ending December 20 meets the requirements of this subdivision because the first payment credited to the account after such billing-month ($95) was equal to the balance of the account as of the end of such billing-month, $95. For this purpose, the balance of $100 is reduced by the $5 return which was credited to the account after the close of the billing-month of sale and before the close of the billing-month within which the first payment after the billing-month of sale is credited.

(4) The provisions of subparagraphs (2) and (3) of this paragraph may be illustrated by the following examples in which it is assumed that the taxpayer is a dealer in personal property whose annual accounting period ends on January 31.

Example (1). Customer A's revolving credit ledger account shows the following:

Month ending	Aggregate sales in month [1]	Returns and allowances	Payments	Finance charges	Balance
Jan. 20	$15.00	0	0	0	$15.00
Feb. 20	0	0	0	$0.15	15.15

[1] Including sales of personal property and nonpersonal property sales.

For purposes of the segregation provided for in subparagraph (2)(1) of this paragraph, customer A's account will be disregarded and not taken into account in the determination of what percentage of charges in the sample is to be treated as sales on the installment plan because no payment was credited to that account after the billing-month of sale and on or before February 20.

Example (2). This example is applicable with respect to sales made during taxable years beginning before January 1, 1964. Under the terms of the taxpayer's revolving credit plan, payments are required in accordance with the following schedule:

Unpaid balance	*Required monthly payment*
0–$99.99	$20
$100–$199.99	40
$200–$299.99	60

Customer B's revolving credit ledger account for the period beginning on September 21, 1963, and ending February 20, 1964, shows the following:

Month ending—	Aggregate sales in month [1]	Returns and allowances	Payments	Finance charges	Balance
Oct. 20	$55.00	0	0	0	$55.00
Nov. 20	45.00	0	$20.00	$0.35	80.35
Dec. 20	20.00	0	20.00	.60	80.95
Jan. 20	26.00	$5.00	20.00	.61	82.56
Feb. 20	0	10.00	72.56	0	0

[1] Including sales of personal property and nonpersonal property sales.

The three $20 payments and the $5 return or allowance made in the billing-months ending in the taxable year are applied, under the rules in subparagraph (6)(v), to liquidate the earliest outstanding charges, first to the $55 aggregate of sales in the billing-month ending October 20 and next to $10 of the aggregate of sales made in the billing-month ending November 20. Thus, the balance of the account as of the close of the billing-month ending January 20, $82.56, is made up as follows:

Remainder of sales in billing-month ending Nov. 20 ($45 – $10)	$35.00
Finance charge for billing-month ending Nov. 20	.35
Sales for billing-month ending Dec. 20	20.00
Finance charge for billing-month ending Dec. 20	0.60
Sales for billing-month ending Jan. 20	26.00
Finance charge for billing-month ending Jan. 20	.61
Total	82.56

The sales of $35 remaining from the aggregate of sales for the billing-month ending November 20 meet the requirements of subparagraph (3)(i) of this paragraph because the aggregate of sales charged during such billing-month ($45) exceeds the required monthly payment ($20), and such sales meet the requirements of subparagraph (3)(ii) of this paragraph because the first payment after the billing-month of sale ($20) is an amount less than the balance of the account as of the close of such month ($80.35). Therefore, $35 of sales will be treated as sales on the installment plan. The $20 aggregate of sales charged during the billing-month ending December 20 does not

meet the requirements of subparagraph (3)(1) of this paragraph because it is in an amount which does not exceed the required monthly payment ($20). (The finance charge of $0.60 added in the billing-month does not enter into the determination of the aggregate of sales for the month because the term "sales" (as defined in subparagraph (6)(i) of this paragraph) does not include finance charges). The $26 aggregate of sales for the billing-month ending January 20 does not meet the requirements of subparagraph (3)(ii) of this paragraph because the first payment after such billing-month ($72.56) was equal to the balance of the account as of the close of such billing-month ($72.56). For this purpose, the balance of $82.56 is reduced by the $10 return or allowance which was credited after the billing-month of sale and before February 20. Thus, of the $82.56 balance of B's account as of the close of the last billing-month ending within corporation X's taxable year, $35 will be treated as sales on the installment plan for purposes of determining the percentage provided for in subparagraph (2) of this paragraph.

Example (3). This example is applicable with respect to sales made during taxable years beginning after December 31, 1963. Assume the facts in example (2), except that Customer B's revolving credit ledger account is for the period beginning on September 21, 1964 and ending February 20, 1965. Since payments received are first used to liquidate any outstanding finance charges under the rule in subparagraph (6)(v), the $20 payment in December liquidated the $0.35 finance charge accrued at the end of the November billing-month and the $20 payment in January liquidated the $0.60 finance charge accrued at the end of the December billing-month. The balance of the three $20 payments ($59.05) and the $5 return or allowance are applied (under the rules in subparagraph (6)(v)) to liquidate the earliest outstanding sales, first to the $55 aggregate of sales in the billing-month ending October 20 and next to $9.05 of the aggregate of sales made in the billing-month ending November 20. Thus, the balance of the account as of the close of the billing-month ending January 20, $82.56, is made up as follows:

Remainder of sales in billing-month ending Nov. 20 ($45 – $9.05)	$35.95
Sales for billing-month ending Dec. 20	20.00
Sales for billing-month ending Jan. 20	26.00
Finance charge for billing-month ending Jan. 20	.61
Total	82.56

The sales of $35.95 remaining from the aggregate of sales for the billing-month ending November 20 meet the requirements of subparagraph (3)(i) of this paragraph because the aggregate of sales charged during such billing-month ($45) exceeds the required monthly payment ($20), and such sales meet the requirements of subparagraph (3)(ii) of this paragraph because the first payment after the billing-month of sale ($20) is an amount less than the balance of the account as of the close of such month ($80.35). Therefore, $35.95 of sales will be treated as sales on the installment plan. The $20 aggregate of sales charged during the billing-month ending December 20 does not meet the requirements of subparagraph (3)(i) of this paragraph because it is in an amount which does not exceed the required monthly payment ($20). The $26 aggregate of sales for the billing-month ending January 20 does not meet the requirements of subparagraph (3)(ii) of this paragraph because the first payment after such billing-month ($72.56) was equal to the balance of the account as of the close of such billing-month ($72.56). For this purpose, the balance of $82.56 is reduced by the $10 return or allowance which was credited after the billing-month of sale and before February 20. Thus, of the $82.56 balance of B's account as of the close of the last billing-month ending within corporation X's taxable year $35.95 will be treated as sales on the installment plan for purposes of determining the percentage provided for in subparagraph (2) of this paragraph.

(5) Sales under a revolving credit plan which are nonpersonal property sales (as defined in subparagraph (6)(iv) of this paragraph) do not constitute sales on the installment plan. Therefore, the charges under a revolving credit plan must be reduced by the nonpersonal property sales, if any, under such plan, before application of the sample percentage as provided for in subparagraph (2)(i) of this paragraph. The taxpayer may treat as the nonpersonal property sales under the plan for the taxable year an amount which bears the same ratio to the total sales under the revolving credit plan made in the taxable year as the total nonpersonal property sales made in such year bears to the total sales made in such year.

(6) For purposes of this paragraph—

(i) The term "sales" includes sales of services, such as a charge for watch repair, as well as sales of property, but does not include finance or service charges.

(ii) The term "charges" includes sales of services and property as well as finance or service charges.

(iii) A billing-month is that period of time for which a periodic statement of charges and credits is rendered to a customer.

(iv) The term "nonpersonal property sales" means all sales which are not sales of personal property made by the taxpayer. Thus, sales of a department leased by the taxpayer to another are nonpersonal property sales. Likewise, charges for services rendered by the taxpayer are nonpersonal property sales unless such services are incidental to and rendered contemporaneously with the sale of personal property, in which case such charges shall be considered as constituting part of the selling price of such property.

(v) Except as otherwise provided in this subdivision, each payment received from a customer under a revolving credit plan before the close of the last billing-month ending in the taxable year shall be applied to liquidate the earliest outstanding charges under such plan, notwithstanding any rule of law or contract provision to the contrary. For purposes of determining which charges remain in the balance of an account at the end of the last billing-month ending in the taxable year, the taxpayer may apply returns and allowances which are credited before the close of the last billing-month ending in the taxable year either (a) to liquidate or reduce the charge for the specific item so returned

or for which an allowance is permitted, or (b) to liquidate or reduce the earliest outstanding charges. The method so selected for applying returns and allowances shall be followed on a consistent basis from year to year unless the district director consents to a change. Additionally, finance or service charges which are computed on the basis of the balance of the account at the end of the previous billing-month (usually reduced by payments during the current billing-month) are accrued at the end of the current billing-month and are therefore considered, for purposes of determining the earliest outstanding charges, as charged to the account after any sales made during the current billing-month. However, for purposes of determining which charges remain in the balance of an account at the end of the last billing-month ending in a taxable year which began after December 31, 1963, payments received during such year shall be applied first against any finance or service charges which were outstanding at the time such payment was received. The preceding sentence shall not apply with respect to a computation made for purposes of applying the rule described in subparagraph (2)(ii) of this paragraph.

(vi) The taxpayer shall allocate those sales under a revolving credit plan which are treated as sales on the installment plan to the proper year of sale in order to apply the appropriate gross profit percentage as provided for in paragraph (c) of this section. This allocation shall be made on the basis of the percentages of charges treated as sales on the installment plan which are attributable to each taxable year as determined in the sample of accounts described in subparagraph (2) of this paragraph. However, if the taxpayer demonstrates to the satisfaction of the district director that income from sales on the installment plan is clearly reflected, all sales may be considered as being made in the taxable year for purposes of applying the gross profit percentage.

(7) The provisions of this paragraph may be illustrated by the following example:

Example. Corporation X is a dealer in personal property and has elected to report on the installment method those sales under its revolving credit plan which may be treated as sales on the installment plan. Corporation X's taxable year ends on January 31, and the total balance of all its revolving credit accounts as of January 31, 1964, is $2,000,000. The total sales made in the taxable year are $10,000,000 of which $500,000 are nonpersonal property sales. The gross profit percentage realized or to be realized on all sales made in the taxable year is 40 percent. The amount of the gross profit contained in the year-end balance of $2,000,000 which may be deferred to succeeding years is computed as follows:

(i) In order to reduce the charges appearing in the year-end balance of revolving credit accounts receivable by the nonpersonal property sales contained therein, corporation X determines the amount of such nonpersonal property sales under the method permitted in subparagraph (5) of this paragraph. Corporation X first determines the ratio which total nonpersonal property sales made during the year ($500,000) bears to total sales made during the year ($10,000,000), and then applies the percentage (5 percent) thus obtained to the year-end balance of revolving credit accounts receivable ($2,000,000). The nonpersonal property sales thus determined ($100,000) is subtracted from such year-end balance to obtain the charges under the revolving credit plan appearing in the year-end balance ($1,900,000) to which the sample percentage is to be applied.

(ii) In accordance with generally accepted sampling techniques, the taxpayer selects a probability sample of all revolving credit accounts having balances for billing-months ending in January 1964. The technique employed results in a random selection of accounts with total balances of $100,000.

(iii) Analysis of these sample accounts discloses that of the $100,000 of balances, $10,000 of balances are in accounts on which no payment was credited after a billing-month of sale and on or before the end of the first billing-month ending in the taxable year beginning February 1, 1964. These balances are, therefore, disregarded and not taken into account in the determination of what percentage of sales in the sample is to be treated as sales on the installment plan. Of the remaining $90,000 of balances, the taxpayer determines, by analyzing the ledger cards in the sample, that $63,000 of balances are composed of sales which meet the requirements of subparagraph (3)(i) and (ii) of this paragraph and are thus treated as sales on the installment plan. The remaining $27,000 of balances either did not meet the requirements of subparagraph (3)(i) or (ii) of this paragraph or were not sales (as defined in subparagraph (6)(i) of this paragraph). The percentage of charges in the sample treated as sales on the installment plan is, therefore, 70 percent ($63,000÷$90,000).

(iv) The charges in the year-end balance which are to be treated as sales on the installment plan, $1,330,000, are computed by multiplying the charges determined in subdivision (i) of this subparagraph ($1,900,000) by the percentage obtained in subdivision (iii) of this subparagraph (70 percent).

(v) The deferred gross profit attributable to sales under the revolving credit plan for the taxable year, $532,000, is determined by multiplying the amount determined in subdivision (iv) of this subparagraph, $1,330,000, by the gross profit percentage, 40 percent. (Corporation X will be able to demonstrate to the satisfaction of the district director that (a) since the gross profit percentage for all sales does not vary materially from the gross profit percentage for all sales made under the revolving credit plan, (b) since only an insubstantial amount of sales included in year-end account balances was made prior to the taxable year, and (c) since the prior year's gross profit percentage does not vary materially from the gross profit percentage for the taxable year, income from sales on the installment plan will be clearly reflected by applying the current year's gross profit percentage for all sales under the revolving credit plan treated as sales on the installment plan.)

(e) Treatment of payments on sales made in years prior to change to installment method. No payments received in the taxable year shall be excluded in computing the amount of income to be returned on the ground that they were received on a sale the total profit from which was returned as income during a taxable year or years prior to the change by the taxpayer to the installment method of returning income. In this regard see section

453(c) and § 1.453–7 for the method of determining the sales on which the payments shall not be excluded and the computation of the adjustments for amounts previously included in income in the case of a change from the accrual method to the installment method. Deductible items are not to be allocated to the years in which the profits from the sales of a particular year are to be returned as income, but must be deducted for the taxable year in which the items are "paid or incurred" or "paid or accrued." See section 461 and the regulations thereunder, and section 7701(a)(25).

[T.D. 6500, 25 FR 11714, Nov. 26, 1960, as amended by T.D. 6682, 28 FR 11173, Oct. 18, 1963; T.D. 6804, 30 FR 2841, March 5, 1965]

§ 1.453–3 Purchaser evidences of indebtedness payable on demand or readily tradable.

(a) In general. A bond or other evidence of indebtedness (hereinafter in this section referred to as an obligation) issued by any person and payable on demand shall not be treated as an evidence of indebtedness of the purchaser in applying section 453(b) to a sale or other disposition of real property or to a casual sale or other casual disposition of personal property. In addition, an obligation issued by a corporation or a government or political subdivision thereof—

(1) With interest coupons attached (whether or not the obligation is readily tradable in an established securities market),

(2) In registered form (other than an obligation issued in registered form which the taxpayer establishes will not be readily tradable in an established securities market), or

(3) In any other form designed to render such obligation readily tradable in an established securities market shall not be treated as an evidence of indebtedness of the purchaser in applying section 453(b) to a sale or other disposition of real property or to a casual sale or other casual disposition of personal property. For purposes of this section, an obligation is to be considered in registered form if it is registered as to principal, interest, or both and if its transfer must be effected by the surrender of the old instrument and either the reissuance by the corporation of the old instrument to the new holder or the issuance by the corporation of a new instrument to the new holder.

(b) Treatment as payment. If under section 453(b)(3) an obligation is not treated as an evidence of indebtedness of the purchaser, then—

(1) For purposes of determining whether the payments received in the taxable year of the sale or disposition exceed 30 percent of the selling price, and

(2) For purposes of returning income on the installment method during the taxable year of the sale or disposition or in a subsequent taxable year,

the receipt by the seller of such obligation shall be treated as a payment. The rules stated in this paragraph may be illustrated by the following examples:

Example (1). On July 1, 1970, A, an individual on the cash method of accounting reporting on a calendar year basis, transferred all of his stock in corporation X (traded on an established securities market and having a fair market value of $1 million) to corporation Y in exchange for 250 of corporation Y's registered bonds (which are traded in an over-the-counter bond market) each with a principal amount and fair market value of $1,000 (with interest payable at the rate of 8 percent per year), and Y's unsecured promissory note, with a principal amount of $750,000. At the time of such exchange A's basis in the corporation X stock is $900,000. The promissory note is payable at the rate of $75,000 annually, due on July 1, of each year following 1970, until the principal balance is paid. The note provides for the payment of interest at the rate of 10 percent per year also payable on July 1 of each year. Under the rule stated in subparagraph (1) of this paragraph, the 250 registered bonds of corporation Y are treated as a payment for purposes of the 30 percent test described in section 453(b)(2)(A)(ii). The payment on account of the bonds equals 25 percent of the selling price determined as follows:

$250,000 payment (i.e., 250 of corporation Y's registered bonds each with a principal amount and fair market value of $1,000)./$1 million selling price (i.e., $250,000 of corporation Y's registered bonds plus promissory note of $750,000).=25 percent.

Since the payments received in the taxable year of the sale do not exceed 30 percent of the selling price and the sales price exceeds $1,000, A may report the income received on the sale of his corporation X stock on the installment method. A elects to report the income on the installment method. The gross profit to be realized when the corporation X stock is fully paid for is 10 percent of the total contract price, computed as follows: $100,000 gross profit (i.e., $1 million contract price less $900,000 basis in corporation X stock) over $1 million contract price. However, since subparagraph (2) of this paragraph also treats the 250 corporation Y registered bonds as a payment for purposes of reporting income, A must include $25,000 (i.e., 10 percent times $250,000) in his gross income for calendar year 1970, the taxable year of sale.

Example (2). Assume the same facts as in example (1). Assume further that on July 1, 1971, corporation Y makes its first installment payment to A under the terms of the unsecured promissory note with 75 more of its $1,000 registered bonds. A must include $7,500 (i.e., 10 percent gross profit percentage times $75,000) in his gross income for calendar year 1971. In addition, A includes the interest payment made by corporation Y on July 1, in his gross income for 1971.

(c) Payable on demand. Under section 453(b)(3), an obligation shall be treated as payable on demand only if the obligation is treated as payable on demand under applicable state or local law.

(d) Designed to be readily tradable in an established securities market—(1) In general. Obligations issued by a corporation or government or political subdivision thereof will be deemed to be in a form designed to render such obligations readily tradable in an established securities market if—

(i) Steps necessary to create a market for them are taken at the time of issuance (or later, if taken pursuant to an expressed or implied agreement or understanding which existed at the time of issuance),

(ii) If they are treated as readily tradable in an established securities market under subparagraph (2) of this paragraph, or

(iii) If they are convertible obligations to which paragraph (e) of this section applies.

(2) Readily tradable in an established securities market. An obligation will be treated as readily tradable in an established securities market if—

(i) The obligation is part of an issue or series of issues which are readily tradable in an established securities market, or

(ii) The corporation issuing the obligation has other obligations of a comparable character which are described in subdivision (i) of this subparagraph.

For purposes of subdivision (ii) of this subparagraph, the determination as to whether there exist obligations of a comparable character depends upon the particular facts and circumstances. Factors to be considered in making such determination include, but are not limited to, substantial similarity with respect to the presence and nature of security for the obligation, the number of obligations issued (or to be issued), the number of holders of such obligation, the principal amount of the obligation, and other relevant factors.

(3) Readily tradable. For purposes of subparagraph (2)(i) of this paragraph, an obligation shall be treated as readily tradable if it is regularly quoted by brokers or dealers making a market in such obligation or is part of an issue a portion of which is in fact traded in an established securities market.

(4) Established securities market. For purposes of this paragraph, the term established securities market includes (i) a national securities exchange which is registered under section 6 of the Securities and Exchange Act of 1934 (15 U.S.C. 78f), (ii) an exchange which is exempted from registration under section 5 of the Securities Exchange Act of 1935 (15 U.S.C. 78e) because of its limited volume of transactions, and (iii) any over-the-counter market. For purposes of this subparagraph, an over-the-counter market is reflected by the existence of an interdealer quotation system. An interdealer quotation system is any system of general circulation to brokers and dealers which regularly disseminates quotations of obligations by identified brokers or dealers, other than a quotation sheet prepared and distributed by a broker or dealer in the regular course of his business and containing only quotations of such broker or dealer.

(5) Examples. The rules stated in this paragraph may be illustrated by the following examples:

Example (1). On June 1, 1971, 25 individuals owning equal interests in a tract of land with a fair market value of $1 million sell the land to corporation Y. The $1 million sales price is represented by 25 bonds issued by corporation Y each having a face value of $40,000. The bonds are not in registered form and do not have interest coupons attached, and, in addition, are payable in 120 equal installments each due on the first business day of each month. In addition, the bonds are negotiable and may be assigned by the holder to any other person. However, the bonds are not quoted by any brokers or dealers who deal in corporate bonds, and, furthermore, there are no comparable obligations of corporation Y (determined with reference to the characteristics set forth in subparagraph (2) of this paragraph) which are so quoted. Therefore, the bonds are not treated as readily tradable in an established securities market. In addition, under the particular facts and circumstances stated, the bonds will not be considered to be in a form designed to render them readily tradable in an established securities market. Since the bonds are not in registered form, do not have coupons attached, are not in a form designed to render them readily tradable in an established securities market, the receipt of such bonds by the holder is not treated as a payment for purposes of section 453(b), notwithstanding that they are freely assignable.

Example (2). On April 1, 1972, corporation M purchases in a casual sale of personal property a fleet of trucks from corporation N in exchange for corporation M's negotiable notes, not in registered form and without coupons attached. The corporation M notes are comparable to earlier notes issued by corporation M, which notes are quoted in the Eastern Bond section of the National daily quotation sheet, which is an interdealer quotation system. Both issues of notes are unsecured, held by more than 100 holders, have a maturity date of more than 5 years, and were issued for a comparable principal amount. On the basis of these similar characteristics it appears that the latest notes will also be readily tradable. Since an interdealer system reflects an over-the-counter market, the earlier notes are treated as readily tradable in an established securities market. Since the later notes are obligations comparable to the earlier ones, which are treated as readily tradable in an established securities market, the later notes are also treated as readily tradable in an established securities market (whether or not such notes are actually traded).

(e) Special rule for convertible securities—(1) General rule. For purposes of paragraph (d)(1) of this section, if an obligation contains a right whereby the holder of such obligation may convert

it directly or indirectly into another obligation which would be treated as a payment under paragraph (b) of this section or may convert it directly or indirectly into stock which would be treated as readily tradable or designed to be readily tradable in an established securities market under paragraph (d) of this section, the convertible obligation shall be considered to be in a form designed to render such obligation readily tradable in an established securities market unless such obligation is convertible only at a substantial discount. In determining whether the stock or obligation, into which an obligation is convertible, is readily tradable or designed to be readily tradable in an established securities market, the rules stated in paragraph (d) of this section shall apply, and for purposes of such paragraph (d) if such obligation is convertible into stock then the term "stock" shall be substituted for the term "obligation" wherever it appears in such paragraph (d).

(2) **Substantial discount rule.** Whether an obligation is convertible at a substantial discount depends upon the particular facts and circumstances. A substantial discount shall be considered to exist if at the time the convertible obligation is issued, the fair market value of the stock or obligation into which the obligation is convertible is less than 80 percent of the fair market value of the obligation (determined by taking into account all relevant factors, including proper discount to reflect the fact that the convertible obligation is not readily tradable in an established securities market and any additional consideration required to be paid by the taxpayer). Also, if a privilege to convert an obligation into stock or an obligation which is readily tradable in an established securities market may not be exercised within a period of 1 year from the date the obligation is issued, a substantial discount shall be considered to exist.

(f) **Effective date.** The provisions of this section shall apply to sales or other dispositions occurring after May 27, 1969, which are not made pursuant to a binding written contract entered into on or before such date. No inference shall be drawn from this section as to any question of law concerning the application of section 453 to sales or other dispositions occurring on or before May 27, 1969.

[T.D. 6500, 25 FR 11715, Nov. 26, 1960, as amended by T.D. 7197, 37 FR 13532, July 11, 1972]

§ 1.453–4 Sale of real property involving deferred periodic payments.

(a) **In general.** Sales of real property involving deferred payments include (1) agreements of purchase and sale which contemplate that a conveyance is not to be made at the outset, but only after all or a substantial portion of the selling price has been paid, and (2) sales in which there is an immediate transfer of title, the vendor being protected by a mortgage or other lien as to deferred payments.

(b) **Classes of sales.** Such sales, under either paragraph (a)(1) or (2) of this section, fall into two classes when considered with respect to the terms of sale, as follows:

(1) Sales of real property which may be accounted for on the installment method, that is, sales of real property in which (i) there are no payments during the taxable year of the sale or (ii) the payments in such taxable year (exclusive of evidences of indebtedness of the purchaser) do not exceed 30 percent of the selling price, or

(2) Deferred-payment sales of real property in which the payments received in cash or property other than evidences of indebtedness of the purchaser during the taxable year in which the sale is made exceed 30 percent of the selling price.

(c) **Determination of "selling price".** In the sale of mortgaged property the amount of the mortgage, whether the property is merely taken subject to the mortgage or whether the mortgage is assumed by the purchaser, shall, for the purpose of determining whether a sale is on the installment plan, be included as a part of the "selling price"; and for the purpose of determining the payments and the total contract price as those terms are used in section 453, and §§ 1.453–1 through 1.453–7, the amount of such mortgage shall be included only to the extent that it exceeds the basis of the property. The term "payments" does not include amounts received by the vendor in the year of sale from the disposition to a third person of notes given by the vendee as part of the purchase price which are due and payable in subsequent years. Commissions and other selling expenses paid or incurred by the vendor shall not reduce the amount of the payments, the total contract price, or the selling price.

[T.D. 6500, 25 FR 11715, Nov. 26, 1960]

§ 1.453–5 Sale of real property treated on installment method.

(a) **In general.** In any transaction described in paragraph (b)(1) of § 1.453–4, that is, sales of real property in which there are no payments during the year of sale or the payments in that year do not exceed 30 percent of the selling price, the

vendor may return as income from each such transaction in any taxable year that proportion of the installment payments actually received in that year which the gross profit (as described in paragraph (b) of § 1.453–1) realized or to be realized when the property is paid for bears to the total contract price. In any case, the sale of each lot or parcel of a subdivided tract must be treated as a separate transaction and gain or loss computed accordingly. (See paragraph (a) of § 1.61–6.)

(b) Defaults and repossessions—(1) Effective date. This paragraph shall apply only with respect to taxable years beginning before September 3, 1964, in respect of which an election has not been properly made to have the provisions of section 1038 apply. For rules applicable to taxable years beginning after September 2, 1964, and for taxable years beginning after December 31, 1957, to which such an election applies, see section 1038, and §§ 1.1038–1 through 1.1038–3.

(2) Gain or loss on reacquisition of property. If the purchaser of real property on the installment plan defaults in any of his payments, and the vendor returning income on the installment method reacquires the property sold, whether title thereto had been retained by the vendor or transferred to the purchaser, gain or loss for the year in which the reacquisition occurs is to be computed upon any installment obligations of the purchaser which are satisfied or discharged upon the reacquisition or are applied by the vendor to the purchase or bid price of the property. Such gain or loss is to be measured by the difference between the fair market value at the date of reacquisition of the property reacquired (including the fair market value of any fixed improvements placed on the property by the purchaser) and the basis in the hands of the vendor of the obligations of the purchaser which are so satisfied, discharged, or applied, with proper adjustment for any other amounts realized or costs incurred in connection with the reacquisition.

(3) Fair market value of reacquired property. If the property reacquired is bid in by the vendor at a foreclosure sale, the fair market value of the property shall be presumed to be the purchase or bid price thereof in the absence of clear and convincing proof to the contrary.

(4) Basis of obligations. The basis in the hands of the vendor of the obligations of the purchaser satisfied, discharged, or applied upon the reacquisition of the property will be the excess of the face value of such obligations over an amount equal to the income which would be returnable were the obligations paid in full. For definition of the basis of an installment obligation, see section 453(d)(2) and paragraph (b)(2) of § 1.453–9.

(5) Bad debt deduction. No deduction for a bad debt shall in any case be taken on account of any portion of the obligations of the purchaser which are treated by the vendor as not having been satisfied, discharged, or applied upon the reacquisition of the property, unless it is clearly shown that after the property was reacquired the purchaser remained liable for such portion; and in no event shall the amount of the deduction exceed the basis in the hands of the vendor of the portion of the obligations with respect to which the purchaser remained liable after the reacquisition. See section 166 and the regulations thereunder.

(6) Basis of reacquired property. If the property reacquired is subsequently sold, the basis for determining gain or loss is the fair market value of the property at the date of reacquisition, including the fair market value of any fixed improvements placed on the property by the purchaser.

[T.D. 6500, 25 FR 11716, Nov. 26, 1960, as amended by T.D. 6916, 32 FR 5923, April 13, 1967]

§ 1.453–6 Deferred payment sale of real property not on installment method.

(a) Value of obligations. (1) In transactions included in paragraph (b)(2) of § 1.453–4, that is, sales of real property involving deferred payments in which the payments received during the year of sale exceed 30 percent of the selling price, the obligations of the purchaser received by the vendor are to be considered as an amount realized to the extent of their fair market value in ascertaining the profit or loss from the transaction. Such obligations, however, are not considered in determining whether the payments during the year of sale exceed 30 percent of the selling price.

(2) If the obligations received by the vendor have no fair market value, the payments in cash or other property having a fair market value shall be applied against and reduce the basis of the property sold and, if in excess of such basis, shall be taxable to the extent of the excess. Gain or loss is realized when the obligations are disposed of or satisfied, the amount thereof being the difference between the reduced basis as provided in the preceding sentence and the amount realized therefor. Only in rare and extraordinary cases does property have no fair market value.

(b) Repossession of property where title is retained by vendor—(1) Gain or loss on repossession. If the vendor in sales referred to in para-

graph (a) of this section has retained title to the property and the purchaser defaults in any of his payments, and the vendor repossesses the property, the difference between—

(i) The entire amount of the payments actually received on the contract and retained by the vendor plus the fair market value at the time of repossession of fixed improvements placed on the property by the purchaser, and

(ii) The sum of the profits previously returned as income in connection therewith and an amount representing what would have been a proper adjustment for exhaustion, wear and tear, obsolescence, amortization, and depletion of the property during the period the property was in the hands of the purchaser had the sale not been made, will constitute gain or loss, as the case may be, to the vendor for the year in which the property is repossessed.

(2) Basis of repossessed property. The basis of the property described in subparagraph (1) of this paragraph in the hands of the vendor will be the original basis at the time of the sale plus the fair market value at the time of repossession of fixed improvements placed on the property by the purchaser, except that, with respect to repossessions occurring after September 18, 1958, the basis of the property shall be reduced by what would have been a proper adjustment for exhaustion, wear and tear, obsolescence, amortization, and depletion of the property during the period the property was in the hands of the purchaser if the sale had not been made.

(c) Reacquisition of property where title is transferred to purchaser—(1) Gain or loss on reacquisition. If the vendor in sales described in paragraph (a) of this section has previously transferred title to the purchaser, and the purchaser defaults in any of his payments, and the vendor accepts a voluntary reconveyance of the property, in partial or full satisfaction of the unpaid portion of the purchase price, the receipt of the property so reacquired, to the extent of its fair market value at that time, including the fair market value of fixed improvements placed on the property by the purchaser, shall be considered as the receipt of payment on the obligations satisfied. If the fair market value of the property is greater than the basis of the obligations of the purchaser so satisfied (generally, such basis being the fair market value of such obligations previously recognized in computing income), the excess constitutes ordinary income. If the value of such property is less than the basis of such obligations, the difference may be deducted as a bad debt if uncollectible, except that, if the obligations satisfied are securities (as defined in section 165(g)(2)(C)), any gain or loss resulting from the transaction is a capital gain or loss subject to the provisions of sections 1201 through 1241.

(2) Basis of reacquired property. If the reacquired property described in subparagraph (1) of this paragraph is subsequently sold, the basis for determining gain or loss is the fair market value of the property at the date of reacquisition, including the fair market value of the fixed improvements placed on the property by the purchaser. See section 166 and the regulations thereunder with respect to property reacquired by the vendor in a foreclosure proceeding.

(d) Effective date. Paragraphs (b) and (c) of this section shall apply only with respect to taxable years beginning before September 3, 1964, in respect of which an election has not been properly made to have the provisions of section 1038 apply. For rules applicable to taxable years beginning after September 2, 1964, and for taxable years beginning after December 31, 1957, to which such an election applies, see section 1038, and §§ 1.1038–1 through 1.1038–3.

[T.D. 6500, 25 FR 11716, Nov. 26, 1960, as amended by T.D. 6916, 32 FR 5923, April 13, 1967]

§ 1.453–7 Change from accrual to installment method by dealers.

(a) In general. A taxpayer who is a dealer in personal property and who is entitled to the benefits of section 453(a) may elect to report his taxable income on the installment method of accounting without securing consent of the Commissioner. In the event a dealer elects to change from the accrual method of accounting to the installment method for either sales under a revolving credit plan or sales on the traditional installment plan, or both types of sales (see paragraph (a)(1) of § 1.453–1), any installment payments actually received in the year of change or in subsequent taxable years on account of sales (or other dispositions of property) of a type or types for which the installment method is elected and which were made in any taxable year before the year of change shall not be excluded from taxable income. For the purpose of determining which payments on account of sales made under a revolving credit type plan shall not be excluded, the dealer shall make a determination of charges under a revolving credit plan made in any taxable year before the year of the change which under the provisions of paragraph (d) of § 1.453–2 are treated as sales on

the installment plan. However, for this purpose, in lieu of the percentage determined under paragraph (d)(2) of § 1.453–2 for any such year, the percentage so determined for the year of change may be used. Profits attributable to sales on the installment plan, even though included in taxable income in their entirety in a year of sale before the year in which the change to the installment method is made, are also includible in taxable income as payments are received in the year of change and in subsequent taxable years. But the tax imposed for the year of change or any subsequent taxable years (such years being referred to as "adjustment years") beginning after December 31, 1953, shall be reduced by an adjustment proportionate to the tax attributable to the gross profit which is, by reason of the change to the installment method, included in gross income a second time, determined by the method of computation described in section 453(c) and paragraph (b) of this section.

(b) Adjustment to tax. (1) The adjustment to tax under section 453(c)(2) is determined as follows:

(i) Determine separately the portion of the tax for each taxable year before the year of change which is attributable to the gross profit from installment sales which was included in gross income in that year and which is also includible in gross income for any adjustment year;

(ii) Determine separately the portion of the tax for each adjustment year which is attributable to the gross profit described in subdivision (i) of this subparagraph;

(iii) Select for each adjustment year the lesser of the amounts determined under subdivisions (i) and (ii) of this subparagraph;

(iv) The tax imposed in any adjustment year shall be reduced by the amount as determined in subdivision (iii) of this subparagraph or the sum of all such amounts if more than one prior taxable year is involved;

(v) The portion of the tax for any taxable year attributable to the gross profit described in subdivision (i) of this subparagraph shall be that proportion of the tax determined for such year without regard to the adjustments under this paragraph, which the gross profit included in gross income in the prior year and includible in gross income for the adjustment year bears to the gross income of that year.

(2) The tax determined in any of the steps provided in subparagraph (1) of this paragraph shall be the tax imposed by chapter 1, subtitle A of the Internal Revenue Code of 1954 other than the tax imposed by section 56 (relating to the minimum tax for tax preferences); or chapter 1, not including subchapter D, relating to excess profits, nor subchapter E, relating to tax on self-employment income, of the Internal Revenue Code of 1939.

(3) The computation of the adjustment provided in section 453(c)(2) may be illustrated by the following example, the principles of which are equally applicable to sales under a revolving credit plan which are reported on the installment method:

ADJUSTMENTS IN TAX ON CHANGE TO INSTALLMENT METHOD

	Taxable years (prior to change)		Adjustment years (after change)	
	Year 1	Year 2	Year 3	Year 4
Gross profit from installment sales (receivable in periodic payments over 5 years)	$100,000	....	$20,000([1])	$12,000([4])
		$50,000	10,000([2])	8,000([5])
			80,000([3])	40,000([6])
				90,000([7])
Other income	80,000	200,000	90,000	90,000
Gross income	180,000	250,000	200,000	240,000
Deductions	60,000	50,000	50,000	60,000
Taxable income	120,000	200,000	150,000	180,000
Tax rate assumed (percentage of tax, other than tax imposed by sec. 56)	30	50	40	40
Tax would be	$36,000	$100,000	$60,000	$72,000

	Lesser tax portions

COMPUTATION OF ADJUSTMENT IN YEAR 3

Year 1 Items

In year 3 (portion of tax)	20,000/200,000 × 60,000 = $6,000	
In year 1 (portion of tax)	20,000/180,000 × 36,000 = $4,000	$4,000

Year 2 Items

In year 3 (portion of tax)	10,000/200,000 × 60,000 = $3,000	3,000
In year 2 (portion of tax)	10,000/250,000 × 100,000 = $4,000	
Adjustment to tax of year 3		7,000

COMPUTATION OF ADJUSTMENT IN YEAR 4

Year 1 Items

In year 4 (portion of tax)	12,000/240,000 × 72,000 = $3,600	
In year 1 (portion of tax)	12,000/180,000 × 36,000 = $2,400	$2,400

Year 2 Items

In year 4 (portion of tax)	8,000/240,000 × 72,000 = $2,400	2,400
In year 2 (portion of tax)	8,000/250,000 × 100,000 = $3,200	
Adjustment to tax of year 4		4,800

[1] From year 1 sales.
[2] From year 2 sales.
[3] From year 3 sales.
[4] From year 1 sales.
[5] From year 2 sales.
[6] From year 3 sales.
[7] From year 4 sales.

(c) Special rules for partnerships. In the case of a change from an accrual method of accounting to the installment method of accounting by a partnership which is a dealer in personal property, payments attributable to installment sales under such accrual method shall be included in the gross income of the partnership in their entirety as payments are received in the year of change and in subsequent taxable years, even though included in gross income of the partnership for a year before the year in which the change to the installment method is made. Each partner's distributive share of the profits attributable to installment sales included in partnership taxable income for the year of sale and for each "adjustment year" shall be taken into account separately in accordance with section 702(a)(8) and paragraph (a)(8) of § 1.702–1. The income tax of each partner for adjustment years shall be computed with the adjustment provided by section 453(c)(2) for amounts previously taxed. However, it is not necessary for a partner to have been a member of the partnership for the year of sale and each subsequent taxable year, including adjustment years, in order to apply the adjustment to tax provided by section 453(c)(2).

[T.D. 6500, 25 FR 11716, Nov. 26, 1960, as amended by T.D. 6682, 28 FR 11176, Oct. 18, 1963; T.D. 7575, 43 FR 40494, Sept. 12, 1978]

§ 1.453–8 Requirements for adoption of or change to installment method.

(a) Dealers in personal property—(1) Time for election. An election to adopt or change to the installment method for a type or types of sales must be made on an income tax return for the taxable year of the election, filed on or before the time specified (including extensions thereof) for filing such return. For a taxable year ending before October 31, 1963, the reporting of sales under a revolving credit plan on the installment method on a return for such year constitutes an election to report that type of sale on the installment method, even though no specification was made of the type or types of sales for which the election was made.

(2) Adoption of installment method. A taxpayer who adopts the installment method for the first taxable year in which he makes sales on the installment plan of any kind must indicate in his income tax return for that taxable year that the installment method of accounting is being adopted and specify the type or types of sales included within such election. If a taxpayer in the year of the initial election made only one type of sale on the installment plan, but during a subsequent taxable year makes another type of sale on the installment plan and adopts the installment method for such other type of sale, he must indicate in his income tax return for such subsequent year that he is electing to adopt the installment method of accounting for that type of sale.

(3) Change to installment method. A taxpayer who changes to the installment method for a particular type or types of sales on the installment plan in accordance with § 1.453–7 must, for each type of sale on the installment plan for which the installment method is to be used, attach a separate statement to his income tax return for the taxable year with respect to which such change is made. Each statement must show—

(i) The method of accounting used in computing taxable income before the change;

(ii) The type of sale on the installment plan for which the installment is being elected;

(iii) The span of taxable years over which it will be necessary to compute adjustments; and

(iv) A schedule similar to the schedule shown in the example in paragraph (b)(3) of § 1.453–7, showing the computation of the required adjustments under section 453(c)(2).

Similar statements must be attached to and filed with income tax returns for subsequent taxable years in which adjustments are required because of the inclusion of installment payments in gross income a second time.

(b) Sales of real property and casual sales of personal property. (1) A taxpayer who sells or otherwise disposes of real property, or who makes a casual sale or other casual disposition of personal property, and who elects to report the income therefrom on the installment method must set forth in his income tax return (or in a statement attached thereto) for the year of the sale or other disposition the computation of the gross profit on the sale or other disposition under the installment method. In any taxable year in which the taxpayer receives payments attributable to such sale or other disposition, he must also show in his income tax return the computation of the amount of income which is being reported in that year on such sale or other disposition.

(2) The information required by subparagraph (1) of this paragraph must be submitted for each separate sale or other disposition but, in the case of multiple sales or other dispositions, separate computations may be shown in a single statement.

(c) Installment method and other accounting methods. Notwithstanding the fact that, in general, a dealer in personal property may change to the installment method of accounting without permission, a dealer may not change from the installment method of accounting for sales on the installment plan to an accrual method of accounting or to any other method of accounting without the permission of the Commissioner, except as provided in paragraph (d) of this section.

(d) Revocation of election to report income on the installment basis—(1) In general. Under section 453(c)(4) taxpayers who are dealers in personal property and who have elected installment basis income reporting subject to the provisions of section 453(c)(1) (relating to change from accrual to installment basis) may revoke their previously made election.

(2) Years to which applicable. Under this paragraph a taxpayer may revoke an election to report income on the installment basis for any year of change (the first year for which income was computed using the installment basis) ending on or after December 30, 1969, and for any year of change which ended before such date if the 3-year statutory period under section 6501 (relating to limitation on assessment or collection), including

extensions, for such years has not expired on December 30, 1969.

(3) **Time and manner of revoking election.** The revocation by a taxpayer may be made by filing an amended return on an appropriate form or forms, such as Form 1040X for an individual taxpayer, for the year of change (the first year for which income was computed using the installment basis) and for each subsequent year for which a return was filed using the installment basis. The taxpayer should indicate on such amended returns that he is revoking an election to report income on the installment basis. Such revocation must be made within 3 years from the last date prescribed for the filing of the return for the year of change including any extension of time granted the taxpayer. In reporting income on the amended returns described in this paragraph, the taxpayer shall use the accrual method of accounting.

(4) **Period for assessment of deficiency and for refund or credit.** (i) The statutory period for the assessment of any deficiency for any taxable year ending before the filing of a notice of revocation under this paragraph, which is attributable to the revocation of the election to use the installment basis, shall not expire before the expiration of 2 years from the date of the filing of such notice, and such deficiency may be assessed before the expiration of such 2-year period notwithstanding the provisions of any law or rule of law which would otherwise prevent such assessment.

(ii) If refund or credit of any overpayment, resulting from a revocation of an election to use the installment basis, for any taxable year ending before the date of the filing of the notice of revocation is prevented on the date of such filing, or within 1 year from such date, by the operation of any law or rule of law (other than section 7121 (relating to closing agreements) or section 7122 (relating to compromises)), refund or credit of such overpayment may nevertheless be made or allowed if a claim for such credit or refund is filed within 1 year from the date the notice of revocation is filed. No interest shall be allowed on the refund or credit of such overpayment for any period prior to the date of the filing of the notice of revocation.

(5) **Elections after revocation.** If a taxpayer, pursuant to the provisions of section 453(c)(4) and this paragraph, revokes an election to report income on the installment basis, a subsequent election to report income on the installment basis under section 453(c)(1) may not be made, except with the consent of the Commissioner, with respect to any taxable year beginning before the fifth taxable year following the year of change with respect to which the revocation was made. A taxpayer who wishes to make a subsequent election to report income under section 453(a) with respect to any taxable year before the fifth taxable year following the year of change for the revoked election must file an application to do so on Form 3115 with the Commissioner of Internal Revenue, Washington, D.C. 20224.

[T.D. 6500, 25 FR 11717, Nov. 26, 1960, as amended by T.D. 6682, 28 FR 11176, Oct. 18, 1963; T.D. 7104, 36 FR 5603, March 25, 1971]

§ 1.453–9 Gain or loss on disposition of installment obligations.

(a) **In general.** Subject to the exceptions contained in section 453(d)(4) and paragraph (c) of this section, the entire amount of gain or loss resulting from any disposition or satisfaction of installment obligations, computed in accordance with section 453(d), is recognized in the taxable year of such disposition or satisfaction and shall be considered as resulting from the sale or exchange of the property in respect of which the installment obligation was received by the taxpayer.

(b) **Computation of gain or loss.** (1) The amount of gain or loss resulting under paragraph (a) of this section is the difference between the basis of the obligation and (i) the amount realized, in the case of satisfaction at other than face value or in the case of a sale or exchange, or (ii) the fair market value of the obligation at the time of disposition, if such disposition is other than by sale or exchange.

(2) The basis of an installment obligation shall be the excess of the face value of the obligation over an amount equal to the income which would be returnable were the obligation satisfied in full.

(3) The application of subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

Example (1). In 1960 the M Corporation sold a piece of unimproved real estate to B for $20,000. The company acquired the property in 1948 at a cost of $10,000. During 1960 the company received $5,000 cash and vendee's notes for the remainder of the selling price, or $15,000, payable in subsequent years. In 1962, before the vendee made any further payments, the company sold the notes for $13,000 in cash. The corporation makes its returns on the calendar year basis. The income to be reported for 1962 is $5,500, computed as follows:

Proceeds of sale of notes		$13,000
Selling price of property	$20,000	
Cost of property	10,000	

Total profit	10,000	
Total contract price	20,000	
Percent of profit, or proportion of each payment returnable as income, $10,000 divided by $20,000, 50 percent.		
Face value of notes	15,000	
Amount of income returnable were the notes satisfied in full, 50 percent of $15,000	7,500	
Basis of obligation—excess of face value of notes over amount of income returnable were the notes satisfied in full	7,500	
Taxable income to be reported for 1962		5,500

Example (2). Suppose in example (1) the M Corporation, instead of selling the notes, distributed them in 1962 to its shareholders as a dividend, and at the time of such distribution, the fair market value of the notes was $14,000. The income to be reported for 1962 is $6,500, computed as follows:

Fair market value of notes	$14,000
Basis of obligation—excess of face value of notes over amount of income returnable were the notes satisfied in full (computed as in example (1))	7,500
Taxable income to be reported for 1962	6,500

(c) **Disposition from which no gain or loss is recognized.** (1)(i) Under section 453(d)(4)(A), no gain or loss shall be recognized to a distributing corporation with respect to the distribution made after November 13, 1966, of installment obligations if (a) the distribution is made pursuant to a plan for the complete liquidation of a subsidiary under section 332, and (b) the basis of such obligations in the hands of the distributee is determined under section 334(b)(1).

(ii) Under section 453(d)(4)(B), no gain or loss shall be recognized to a distributing corporation with respect to the distribution of installment obligations if the distribution is made, pursuant to a plan for the complete liquidation of a corporation which meets the requirements of section 337, under conditions whereby no gain or loss would have been recognized to the corporation had such installment obligations been sold or exchanged on the day of the distribution. The preceding sentence shall not apply to the extent that under section 453(d)(1) gain to the distributing corporation would be considered as gain to which section 341(f)(2), 617(d)(1), 1245(a)(1), 1250(a)(1), 1251(c)(1), or 1252(a)(1) applies, computed under the principles of the regulations under such provisions. See paragraph (d) of § 1.1245-6, paragraph (c)(6) of § 1.1250-1, paragraph (e)(6) of § 1.1251-1, and paragraph (d)(3) of § 1.1252-1.

(2) Where the Code provides for exceptions to the recognition of gain or loss in the case of certain dispositions, no gain or loss shall result under section 453(d) in the case of a disposition of an installment obligation. Such exceptions include: Certain transfers to corporations under sections 351 and 361; contributions of property to a partnership by a partner under section 721; and distributions by a partnership to a partner under section 731 (except as provided by section 736 and section 751).

(3) Any amount received by a person in payment or settlement of an installment obligation acquired in a transaction described in subparagraphs (1) or (2) of this paragraph (other than an amount received by a stockholder with respect to an installment obligation distributed to him pursuant to section 337) shall be considered to have the character it would have had in the hands of the person from whom such installment obligation was acquired.

(d) **Carryover of installment method.** For the treatment of income derived from installment obligations received in transactions to which section 381(a) is applicable, see section 381(c)(8) and the regulations thereunder.

(e) **Installment obligations transmitted at death.** Where installment obligations are transmitted at death, see section 691(a)(4) and the regulations thereunder for the treatment of amounts considered income in respect of a decedent.

(f) **Losses.** See subchapter P (section 1201 and following), chapter 1 of the Code, as to the limitation on capital losses sustained by corporations and the limitation as to both capital gains and capital losses of individuals.

(g) **Disposition of installment obligations to life insurance companies.** (1) Notwithstanding the provisions of section 453(d)(4) and paragraph (c) of this section or any provision of subtitle A relating to the nonrecognition of gain, the entire amount of any gain realized on the disposition of an installment obligation by any person, other than a life insurance company (as defined in section 801(a) and paragraph (b) of § 1.801-3), to a life insurance company or to a partnership of which a life insurance company is a partner shall be recognized and treated in accordance with section 453(d)(1) and paragraphs (a) and (b) of this section. If a corporation which is a life insurance company for the taxable year was a corporation which was not a life insurance company for the preceding taxable year, such corporation shall be treated, for purposes of section 453(d)(1) and this paragraph, as having transferred to a life insurance

company, on the last day of the preceding taxable year, all installment obligations which it held on such last day. The gain, if any, realized by reason of the installment obligations being so transferred shall be recognized and treated in accordance with section 453(d)(1) and paragraphs (a) and (b) of this section. Similarly, a partnership of which a life insurance company becomes a partner shall be treated, for purposes of section 453(d)(1) and this paragraph, as having transferred to a life insurance company, on the last day of the preceding taxable year of such partnership, all installment obligations which it holds at the time such life insurance company becomes a partner. The gain, if any, realized by reason of the installment obligations being so transferred shall be recognized and treated in accordance with section 453(d)(1) and paragraphs (a) and (b) of this section.

(2) The provisions of section 453(d)(5) and subparagraph (1) of this paragraph shall not apply to losses sustained in connection with the disposition of installment obligations to a life insurance company.

(3) For the effective date of the provisions of section 453(d)(5) and this paragraph, see paragraph (f) of § 1.453-10.

(4) Application of the provisions of this paragraph may be illustrated by the following examples:

Example (1). A, an individual, in a transaction to which section 351 applies, transfers in 1961 certain assets, including installment obligations, to a new corporation, X, which qualifies as a life insurance company (as defined in section 801(a)) for the year 1961. A makes his return on the calendar year basis. Section 453(d)(5) provides that the nonrecognition provisions of section 351 will not apply to the installment obligations transferred by A to X Corporation. Therefore, the entire amount of any gain realized by A on the transfer of the installment obligations shall be recognized in 1961, with the amount of any such gain computed in accordance with the provisions of section 453(d)(1) and paragraph (b) of this section.

Example (2). The M Corporation did not qualify as a life insurance company (as defined in section 801(a)) for the taxable year 1958. On December 31, 1958, it held $60,000 of installment obligations. The M Corporation qualified as a life insurance company for the taxable year 1959. Accordingly, the M Corporation is treated as having transferred to a life insurance company, on December 31, 1958, the $60,000 of installment obligations it held on such date. The gain, if any, realized by M by reason of such installment obligations being so transferred shall be recognized in the taxable year 1958, with the amount of any such gain computed in accordance with the provisions of section 453(d)(1) and paragraph (b) of this section.

Example (3). During its taxable year 1958, none of the partners of the N partnership qualified as a life insurance company (as defined in section 801(a)). The N partnership held $30,000 of installment obligations on December 31, 1958. On July 30, 1959, the O Corporation, a life insurance company (as defined in section 801(a)), became a partner in the partnership. The N partnership held $50,000 of installment obligations on July 30, 1959. Pursuant to section 453(d)(5), the N partnership is treated as having transferred to a life insurance company, on December 31, 1958, the $50,000 of installment obligations it held on July 30, 1959. The gain, if any, realized by the N partnership by reason of such installment obligations being so transferred shall be recognized in the taxable year 1958, with the amount of any such gain computed in accordance with the provisions of section 453(d)(1) and paragraph (b) of this section.

Example (4). In 1960, the P Corporation, in a reorganization qualifying under section 368(a), transferred certain assets (including installment obligations) to the R Corporation, a life insurance company as defined in section 801(a). P realized a loss upon the transfer of the installment obligations, which was not recognized under section 361. Pursuant to subparagraph (2) of paragraph (c) of this section, no loss with respect to the transfer of these obligations will be recognized to P under section 453(d)(1).

[T.D. 6500, 25 FR 11718, Nov. 26, 1960, as amended by T.D. 6590, 27 FR 1319, Feb. 13, 1962; T.D. 6832, 30 FR 8574, July 7, 1965; T.D. 7084, 36 FR 267, Jan. 8, 1971; T.D. 7418, 41 FR 18812, May 7, 1976]

§ 1.453-10 Effective date.

(a) Except as provided in this section, the provisions of section 453 and §§ 1.453-1 through 1.453-9 shall apply to taxable years beginning after December 31, 1953, and ending after August 16, 1954.

(b) The provisions of paragraphs (a)(2) and (3), (b), and (c) of § 1.453-8 shall apply to taxable years ending after December 17, 1958.

(c) Under the provisions of sections 453(b) and 7851(a)(1)(C), section 453(b)(1) and the regulations with respect thereto shall also apply—

(1) To a sale or other disposition during a taxable year beginning before January 1, 1954, only if the income was returnable (by reason of section 44(b) of the Internal Revenue Code of 1939) on the basis and in the manner prescribed in section 44(a) of such code.

(2) To a sale or other disposition during a taxable year beginning after December 31, 1953, and ending before August 17, 1954, though such taxable year is subject to the provisions of the Internal Revenue Code of 1939.

(d) Under the provisions of sections 453(c)(1)(B) and 7851(a)(1)(C) section 453(c) and the regulations with respect thereto shall also apply to taxable years beginning after December 31, 1953, and ending before August 17, 1954, though such taxable years are subject to the provisions of the Internal Revenue Code of 1939.

(e) The provisions of paragraph (b)(3) of § 1.453–6 shall apply to repossessions occurring after December 18, 1958.

(f) The provisions of section 453(d)(5) and paragraph (g) of § 1.453–9 shall apply to taxable years ending after December 31, 1957, but only as to transfers or other dispositions of installment obligations occurring after such date.

[T.D. 6500, 25 FR 11718, Nov. 26, 1960, as amended by T.D. 6590, 27 FR 1320, Feb. 13, 1962; T.D. 6682, 28 FR 11177, Oct. 18, 1963]

[T.D. 8224, 53 FR 34719, Sept. 8, 1988]

§ 1.453C–1T Overview of limitation on installment method of reporting (temporary).

Section 453C limits the use of the installment method under sections 453 and 453A (as in effect prior to their amendment by section 10202 of the Revenue Act of 1987) with respect to a taxpayer's applicable installment obligations. Under section 453C, a taxpayer with applicable installment obligations must compute the amount of the taxpayer's applicable installment indebtedness and then allocate on a pro rata basis such indebtedness to each applicable installment obligation arising in the taxable year and outstanding as of the close of the taxable year. The allocated amount is deemed to be a payment made on that obligation and is accounted for under the ordinary rules applicable to the installment method. Thus, the taxpayer must apply the gross profit ratio applicable to the installment sale to determine gain and recovery of basis with respect to the deemed payment.

[T.D. 8224, 53 FR 34720, Sept. 8, 1988]

§ 1.453C–2T Applicable installment obligations (temporary).

(a) Definitions—(1) In general. The term "applicable installment obligation" (AIO) means any obligation that arises from the disposition under the installment method—

(i) After February 28, 1986 and before January 1, 1988, of—

(A) Personal property by a person who regularly sells or otherwise disposes of personal property of the same type on the installment plan, or

(B) Real property held by the taxpayer for sale to customers in the ordinary course of business, and

(ii) After August 16, 1986, in taxable years beginning before January 1, 1988, of—

(A) Real property used in the taxpayer's trade or business if the sales price of such property exceeds $150,000, or

(B) Real property held for the production of rental income if the sales price of such property exceeds $150,000.

For purposes of paragraph (a)(1)(ii) of this section, in determining whether the sales price exceeds $150,000, all sales or exchanges that are part of the same transaction are treated as one sale or exchange. See section 1274A(d). For rules relating to the determination of whether property is

held for the production of rental income, see § 1.453C-7T.

(2) Obligations must be held by certain persons. The term "AIO" includes any obligation described in paragraph (a)(1) of this section only if such obligation is held by—

(i) The taxpayer that disposed of the property for which the obligation was received,

(ii) Any person that is a member of the same affiliated group (within the meaning of section 1504(a), but without regard to section 1504(b)) as the taxpayer that disposed of the property for which the obligation was received, or

(iii) Any person whose basis in such obligation is determined (in whole or in part) by reference to another person's basis in such obligation. But only if that obligation was an AIO when held by such other person.

(3) Special rule for related party transactions. The term "AIO" includes any installment obligation arising from the disposition of property if—

(i) The taxpayer received such property from a related person, and

(ii) An AIO would have arisen from an installment sale of such property by such related person.

For purposes of this paragraph (a)(3), a person is related to the taxpayer if such person has a relationship to the taxpayer as specified in section 267(b) or 707(b), substituting 10 percent for 50 percent each place it appears.

(4) Exceptions. The term "AIO" does not include any obligation arising from any disposition of—

(i) Personal use property,

(ii) Property used or produced by the taxpayer in the trade or business of farming,

(iii) Personal property under a revolving credit plan, or

(iv) Personal property if such obligation meets the requirements of section 811(c)(2) of the Tax Reform Act of 1986.

For rules relating to the determination of whether property is personal use property, or property used or produced by a taxpayer in the trade or business of farming, see § 1.453C-7T.

(b) Look-through of disposition of interest in an entity—(1) In general. Except as provided in this paragraph (b), an obligation arising from an installment disposition of stock, a partnership interest, or a similar interest in any entity shall, for purposes of paragraph (a) of this section, be treated as arising from the disposition of such interest and not from a disposition of the underlying assets.

(2) Rule in case of tax avoidance. An obligation arising from an installment disposition of stock, a partnership interest, or a similar interest in any entity shall be deemed an AIO if, based on all the facts and circumstances, a principal purpose for disposing of the interest in the entity (rather than disposing of the entity's assets) was the avoidance of the application of section 453C and the regulations thereunder.

(c) Certain AIOs treated as one. For purposes of paragraph (a)(*l*) of this section, a dealer in personal property that, under section 453A (as in effect prior to its amendment by section 10202 of the Revenue Act of 1987), returns its income from AIOs under the installment method (without regard to section 453C) on an aggregate basis, may treat the obligations from which income is returned on such basis as one obligation. For purposes of the preceding sentence, income is returned on an aggregate basis if, with respect to all or part of its sales, a taxpayer computes a single gross profit ratio, and reports income and recovery of basis from such sales on the aggregate amount of payments received from such sales.

[T.D. 8224, 53 FR 34720, Sept. 8, 1988]

§ 1.453C–3T Allocable installment indebtedness (temporary).

(a) Definition—(1) In general. The term "allocable installment indebtedness" (AII), for any taxable year, means the excess of—

(i) The installment percentage of the taxpayer's average quarterly indebtedness for such taxable year, over

(ii) The aggregate amount treated as AII with respect to AIOs that are outstanding as of the close of the taxable year, but that arose in a prior taxable year.

(2) Installment percentage. For purposes of paragraph (a)(1) of this section, the term "installment percentage" means the percentage (not in excess of 100 percent) determined by dividing—

(i) The outstanding face amount of all AIOs of the taxpayer outstanding as of the close of the taxable year, by

(ii) The sum of—

(A) The aggregate adjusted basis of all assets other than installment obligations (including AIOs) held as of the close of the taxable year, and

(B) The outstanding face amount of installment obligations (including AIOs) outstanding as of such time.

(3) Outstanding face amount. The outstanding face amount of an obligation is the total of all remaining payments due under the obligation excluding interest (stated or unstated) or original issue discount. The outstanding face amount includes the fair market value of any contingent payment. Payments deemed received under § 1.453C-5T (a) or (d) do not affect the outstanding face amount of an obligation. However, payments deemed received under § 1.453C-5T(e) reduce the outstanding face amount of an obligation.

(b) Reduction of AII for receipt of tax paid amounts. For purposes of applying paragraph (a)(1)(ii) of this section, for any taxable year (and any subsequent taxable year) in which an actual payment is treated as a tax paid amount under § 1.453C-5T(b), the AII with respect to AIOs that are outstanding as of the close of the taxable year of actual payment, but that arose in a preceding taxable year shall be reduced (but not below zero) by the amount of such payment which pursuant to § 1.453C-5T(b) is not taken into account for purposes of sections 453 and 453A (as in effect prior to their amendment by section 10202 of the Revenue Act of 1987).

(c) Additional rules for computing AII—(1) Computing average quarterly indebtedness. For purposes of paragraph (a)(1)(i) of this section, the average quarterly indebtedness of a taxpayer is determined by adding the taxpayer's outstanding indebtedness (as defined in § 1.453C-4T) at the end of each 3-month period ending with or within the taxable year, and dividing the result by the number of 3-month periods ending with or within the taxable year. These 3-month periods are determined by reference to the 3-month period that ends on the last day of the taxable year. If such reference period does not end on the last day of a calendar month, it is deemed to end on the last day of such month, but only for the purpose of determining on what date such period begins and the immediately preceding 3-month period ends. Any remaining period of less than three months is treated as a 3-month period. Thus, for example, a taxable year beginning January 1, and ending on July 15 consists of the following three 3-month periods: May 1-July 15, February 1-April 30, and January 1-January 31. A taxable year consisting of less than 3 months is treated as one 3-month period ending on the last day of the taxable year.

(2) Annual indebtedness used for casual sales. In applying paragraph (a)(1)(i) of this section—

(i) If a taxpayer has no AIOs of the type described in paragraph (a)(1)(i) of § 1.453C-2T outstanding at any time during the taxable year, such taxpayer must substitute the taxpayer's outstanding indebtedness (as defined in § 1.453C-4T) as of the close of the taxable year for the taxpayer's average quarterly indebtedness.

(ii) If a taxpayer has AIOs of the type described in paragraph (a)(1)(i) of § 1.453C-2T outstanding during the taxable year, but no such obligations outstanding as of the close of the taxable year, such taxpayer may substitute the taxpayer's indebtedness as of the close of the taxable year for the taxpayer's average quarterly indebtedness.

(3) Rule in case of tax avoidance. For purposes of calculating average quarterly indebtedness under paragraph (c)(1) of this section or annual indebtedness under paragraph (c)(2) of this section, repayment of amounts with a principal purpose of avoiding or reducing the determination of such indebtedness shall be ignored. For example, decreases in indebtedness occurring toward the close of a 3-month period (or year, if applicable) that have the effect of reducing AII will be examined closely.

(4) Determination of adjusted bases of assets. For purposes of paragraph (a)(2) of this section, in determining the aggregate adjusted bases of assets (other than installment obligations) held as of the close of the taxable year, a taxpayer may elect to use the deduction for depreciation which is used in computing earnings and profits under section 312(k) (without regard to whether the taxpayer is required to compute earnings and profits). For rules relating to this election, see 26 CFR 5h.5 (temporary regulations relating to elections under the Tax Reform Act of 1986).

(5) Personal use property. For purposes of paragraph (a) of this section, personal use property and installment obligations arising from the sale of such property shall not be taken into account in determining the aggregate adjusted bases of assets and the aggregate face amount of installment obligations. For special rules relating to the determination of whether property is personal use property, see § 1.453C-7T.

(d) Examples. The provisions of this section may be illustrated by the following examples:

Example (1). (i) A is a dealer in personal property and reports income on a fiscal year basis. For taxable year one, A receives one AIO. As of the close of taxable year one, the outstanding face amount of the one AIO is $384,000. The AIO calls for monthly payments of $4,000 for an eight-year period beginning in taxable year two. The AIO provides for adequate stated interest under sections 483 and 1274.

(ii) The adjusted bases of assets (other than installment obligations) held by A as of the close of taxable year one is $235,000. A has no installment obligations other than the AIO. A's average quarterly indebtedness is $280,000.

(iii) A's installment percentage is .62036, determined as follows:

$$\frac{\$384{,}000}{\$235{,}000 + \$384{,}000} = .62036$$

Thus, for taxable year one A's AII is $173,701 (.62036×$280,000).

Example (2). (i) The facts are the same as in example (1). In taxable year two, A receives the 12 monthly payments due on the AIO arising in taxable year one for a total of $48,000. Thus, as of the close of taxable year two the outstanding face amount of the obligation arising in taxable year one is $336,000. In taxable year two, A receives an additional AIO with a face amount of $324,000. The AIO calls for monthly payments of $3,000 for a nine-year period beginning in taxable year three. The AIO provides for adequate stated interest under sections 483 and 1274. The adjusted bases of assets (other than installment obligations) held by A as of the close of taxable year two is $316,000. A's average quarterly indebtedness is $307,000 for taxable year two.

(ii) The actual payments of $48,000 that A received on the AIO arising in taxable year one do not exceed the $173,701 of AII previously allocated to the AIO. Thus, under § 1.453C-5T(b) such actual payments are not taken into account for purposes of sections 453 and 453A (as in effect prior to their amendment by the 1987 Act).

(iii) As of the close of taxable year two, the outstanding face amount of all AIOs outstanding as of such time (i.e., both the taxable year one and two obligations) is $660,000. A's installment percentage for taxable year two is .67623, determined as follows:

$$\frac{\$660{,}000}{\$316{,}000 + \$660{,}000} = .67623$$

A's AII for taxable year two is $81,902, determined as follows:

(.67623×307,000)-(173,701-48,000)=$81,902 (First, A must multiply its installment percentage (.67623) by its average quarterly indebtedness ($307,000). From this result, A must subtract the AII with respect to the AIO arising in taxable year one but still outstanding as of the close of taxable year two ($173,701). However, the AII attributable to the year one AIO must, under paragraph (b) of this section, first be reduced by the actual payments of $48,000 received on the taxable year one obligation not taken into account under § 1.453C-5T(b) for purposes of pre-1987 Act sections 453 and 453A).

[T.D. 8224, 53 FR 34720, Sept. 8, 1988]

§ 1.453C–4T Indebtedness (temporary).

(a) **Definition.** For purposes of section 453C and the regulations thereunder, the term "indebtedness" includes only amounts treated as liabilities for federal income tax purposes as of the date such amounts are so treated under the taxpayer's method of accounting. The determination of whether an amount is indebtedness for purposes of this paragraph (a) is made without regard to whether the amount is recourse or nonrecourse and without regard to whether the amount is secured or unsecured (except as provided in paragraph (b)(3) of this section). Thus, the term "indebtedness" includes but is not limited to—

(1) Loans, promissory notes, mortgages, bonds, debt instruments and other obligations issued for cash or property;

(2) Liabilities of an accrual basis taxpayer with respect to which the "all events test" has been met and "economic performance" has occurred within the meaning of section 461(h). Examples of such liabilities include compensation, product liability, interest, utilities, accounts payable, taxes (other than federal income taxes), etc.;

(3) Retainers, deposits and other prepayments received by the taxpayer for goods or services unless such amounts have been included in taxable income;

(4) Reserves with respect to which a federal income tax deduction is allowable (e.g., insurance company reserves and reserves for bad debts to the extent allowed under the Internal Revenue Code); and

(5) Customer deposits of a financial institution.

(b) **Certain amounts not treated as indebtedness**—

(1) **In general.** For purposes of section 453C and the regulations thereunder, the term "indebtedness" does not include amounts, such as certain reserves and contingent liabilities, not yet treated as liabilities for federal income tax purposes (including liabilities with respect to which the "all events test" has not been met and "economic performance" has not occurred within the meaning of section 461(h)). Thus, for example, the term "indebtedness" does not include—

(i) Federal income tax liability (including current federal income tax expense and deferred federal income tax expense); and

(ii) Wrapped indebtedness (as defined in § 15a.453-1(b)(3)(ii)) if such indebtedness is treated in accordance with the provisions of § 15a.453-1(b)(3)(ii).

(2) **Related party debts.** See § 1.453C-6T(e) for circumstances in which indebtedness between two

or more persons treated as one taxpayer is not taken into account for purposes of section 453C and the regulations thereunder.

(3) **Certain secured indebtedness.** For purposes of section 453C and the regulations thereunder, the term "indebtedness" does not include indebtedness—

(i) Secured by personal use property (within the meaning of § 1.453C-7T(a)); or

(ii) Secured by an obligation described in paragraph (a)(1)(ii) of § 1.453C-2T, but only if such obligation is pledged as security for the indebtedness after December 17, 1987.

[T.D. 8224, 53 FR 34721, Sept. 8, 1988]

§ 1.453C–5T Mechanics of limitation on installment method (temporary).

(a) **AII deemed to be payment on AIOs.** For purposes of sections 453 and 453A (as in effect prior to their amendment by section 10202 of the Revenue Act of 1987), the AII of a taxpayer for a taxable year is allocated to AIOs that arise in such taxable year, and that are outstanding as of the close of such taxable year. A taxpayer must allocate to each such AIO an amount of AII that bears the same ratio to total AII as the remaining contract price (see paragraph (c) of this section) of the AIO bears to the aggregate remaining contract price of all such AIOs. Subject to the limitation described in paragraph (c) of this section, the AII allocated to an AIO is deemed a payment received on the AIO immediately before the close of the taxable year.

(b) **Treatment of subsequent actual payment.** If any amount of AII (including excess AII as defined in paragraph (d) of this section) is deemed to be a payment on an AIO, a subsequent actual payment received on that AIO shall be treated as a tax paid amount and shall not be taken into account for purposes of sections 453 and 453A (as in effect prior to their amendment by section 10202 of the Revenue Act of 1987) to the extent of the amount of AII (and excess AII) deemed to be a payment on the AIO.

(c) **Remaining contract price limitation on paragraph (a) of this section.** Notwithstanding paragraph (a) of this section, the amount of AII deemed to be a payment on an AIO for any taxable year shall not exceed the remaining contract price with respect to the AIO. For purposes of this section, the remaining contract price with respect to an AIO means the excess (if any) of—

(1) The total contract price of the disposition from which the AIO arose, over

(2) The deemed and actual payments (other than payments treated as tax paid amounts under paragraph (b) of this section) received on the AIO.

(d) **Excess AII.** If, for any taxable year, the AII for the taxable year exceeds the amount to be allocated under paragraphs (a) and (c) of this section to AIOs arising in and outstanding as of the close of the taxable year, the excess AII shall, under the rules of this section, be allocated to outstanding AIOs that arose in the first immediately preceding taxable year, etc.

(e) **Deemed payments under section 453A(d).** Section 453A(d) (as added to the Code by section 10202(c) of the Revenue Act of 1987) provides that the proceeds of indebtedness secured by the pledge (after December 17, 1987) of an obligation described in § 1.453C-2T(a)(1)(ii) are treated as a payment received on such an obligation. Such proceeds are also treated as a deemed payment for purposes of section 453C and the regulations thereunder. Thus, deemed payments under section 453A(d) reduce the remaining contract price (see paragraph (c) of this section) of a pledged AIO. In addition, such deemed payments reduce the outstanding face amount (see § 1.453C-3T(a)(3)) of a pledged obligation.

(f) **Examples.** The provisions of this section may be further illustrated by the following examples:

Example (1). Assume taxpayer A has five AIOs arising in the taxable year. The total remaining contract price of the obligations as of the close of the taxable year is $2,100,000. The remaining contract price of each obligation as of such time is $420,000, $380,000, $440,000, $400,000 and $460,000, respectively. The ratio of the remaining contract price of each obligation to the sum of the remaining contract prices of all obligations is as follows:

Remaining contract price of each AIO	Sum of remaining contract prices of all AIOs	Ratio of each AIO to all AIOs
1. $420,000	$2,100,000	.20000
2. $380,000	2,100,000	.18095
3. $440,000	2,100,000	.20952
4. $400,000	2,100,000	.19048
5. $460,000	2,100,000	.21905

Assume that A has $460,000 of AII. Under the method of allocation described in paragraph (a) of this section, the amount of such AII allocated to, and deemed to be a payment on, each obligation is as follows:

Ratio of each AIO to all AIOs	AII	Deemed payment
1. .20000	$460,000	$ 92,000
2. .18095	460,000	83,237
3. .20952	460,000	96,379
4. .19048	460,000	87,621

Ratio of each AIO to all AIOs	AII	Deemed payment
5. .21905	460,000	100,763

Example (2). (i) In taxable year one, taxpayer B has two AIOs that arose during the taxable year. These AIOs have remaining contract prices as of the close of the taxable year of $25,000 (obligation one) and $16,000 (obligation two). In addition, in that year, B has AII of $3,820. Under the method of allocation described in paragraph (a) of this section, $2,329 (($25,000/$41,000)×$3,820) is allocated to obligation one, and $1,491 (($16,000/$41,000)×$3,820) is allocated to obligation two. The allocated amounts are deemed to be payments received on such obligations. Each deemed payment is accounted for under the general rules of the installment method. Thus, the gross profit ratio applicable to the sales must be applied to the deemed payments to determine the amount of gain reportable under the installment method, and the amount of basis recovery.

(ii) During the second taxable year, B did not receive any additional AIOs. However, in that year, B received a $5,000 payment on obligation one and a $1,000 payment on obligation two. These actual payments are treated as the receipt of tax paid amounts not taken into account for purposes of sections 453 and 453A to the extent of the amounts of AII deemed in year one to be a payment on the obligations. Since $2,329 was deemed to be a payment in year one on obligation one, only the remaining amount of the actual payment on obligation one, $2,671, is subject to the general rules of installment method reporting. The entire $1,000 payment on obligation two is treated as the receipt of tax paid amounts ($1,491 was deemed to be a payment in year one on obligation two). Thus, under paragraph (a) of this section, the remaining contract price of obligation one is $20,000 ($25,000-$2,329-$2,671), and the remaining contract price of obligation two is $14,509 ($16,000-$1,491).

(iii) For the second taxable year, B has AII of $4,081. Since no AIOs arose in the second taxable year, the entire amount of the AII is excess AII, and must be allocated to the AIOs that arose in the immediately preceding taxable year and are outstanding as of the close of the current taxable year. Under the method of allocation described in paragraph (a) of this section, $2,365 (($20,000/$34,509)×$4,081) of the excess AII is allocated to obligation one, and $1,716 (($14,509/$34,509)×$4,081) is allocated to obligation two. These amounts are deemed to be payments received on the obligations in the second taxable year.

Example (3). In taxable year one, taxpayer C receives two AIOs with remaining contract prices at the close of the year of $10,000 (obligation one) and $12,000 (obligation two). C has no AII in year one. No payments are received on these obligations in taxable year two. In taxable year two, however, C sells property for a total contract price of $9,000. For the sale, C receives a cash down payment of $1,800 and an AIO (obligation three) with a face amount of $7,200 due in a balloon payment five years from the date of the sale. For taxable year two, C has $7,857 of AII to be allocated. However, the maximum amount allocable to obligation three (the only AIO arising in taxable year two) is $7,200, the excess of the total contract price ($9,000) over the amount of the actual payment ($1,800) received before the close of the taxable year. The remaining amount of AII, $657, is excess AII. The excess AII is allocated to the two obligations that arose in taxable year one and are still outstanding as of the close of taxable year two. Under the method of allocation described in paragraph (a) of this section, $298.64 (($10,000/$22,000)×$657) of the $657 excess AII is allocated to, and treated as a payment on, obligation one, and $358.36 (($12,000/$22,000×$657) of the excess AII is allocated to, and treated as a payment on obligation two.

[T.D. 8224, 53 FR 34722, Sept. 8, 1988]

§ 1.453C–6T Aggregation rules (temporary).

(a) In general. This section prescribes rules relating to the circumstances in which related taxpayers will be treated as one taxpayer for purposes of section 453C and the regulations thereunder.

(b) Controlled groups and businesses under common control. For purposes of section 453C and the regulations thereunder, all persons treated as a single employer under section 52 shall be treated as one taxpayer. Thus, for example, corporations that are members of the same controlled group (within the meaning of section 52(a)) shall be treated as one taxpayer. Similarly, trades or businesses under common control shall be treated as one taxpayer. In applying section 453C and the regulations thereunder to a group of persons treated as one taxpayer under this paragraph (b), AII is determined using the aggregate of the assets and liabilities of all the members of the group. The total AII so determined then is allocated (under § 1.453C-5T) to all AIOs held by members of the group. For purposes of this paragraph (b), the term "trades or businesses under common control" means a group of trades or businesses (including partnerships, sole proprietorships, etc.) that is—

(1) A "parent-subsidiary group under common control" as defined in § 1.52-1(c),

(2) A "brother-sister group under common control" as defined in § 1.52-1(d), or

(3) A "combined group under common control" as defined in § 1.52-1(e).

(c) Passthrough entities—(1) Application at entity level. Except as otherwise provided in paragraphs (b) and (d) of this section, section 453C and the regulations thereunder apply to a passthrough entity without regard to the adjusted bases of assets or the liabilities of the entity's members. For purposes of this section, the term "passthrough entity" includes, but is not limited to, partnerships, S corporations, and trusts.

(2) AIOs held by owners of certain passthrough entities—(i) Partnerships. For purposes of applying section 453C and the regulations thereunder to the AIOs separately held by a partner of a partnership subject to this paragraph (c), such partner shall take into account the adjusted basis of its partnership interest (as opposed to its share of the adjusted bases of underlying assets) and its share

of partnership liabilities (as determined under section 752).

(ii) S corporations. For purposes of applying section 453C and the regulations thereunder to AIOs separately held by a shareholder of an S corporation subject to this paragraph (c), such shareholder shall take into account the adjusted basis of the shareholder's stock in such corporation and the shareholder's adjusted basis in any liability of the corporation that is treated under section 1366(d) as indebtedness of the corporation to the shareholder. In addition, such shareholder must take into account any indebtedness of the shareholder, the proceeds of which are loaned to the corporation.

(d) Rule in case of tax avoidance—(1) In general. If, based on the facts and circumstances, a transaction between an entity (including any corporation, partnership, or other entity) and its owners is structured for a principal purpose of avoiding the application of section 453C, such entity and its owners shall be treated as one taxpayer for purposes of section 453C and the regulations thereunder (if not otherwise treated as one taxpayer under paragraph (b) of this section). In applying section 453C and the regulations thereunder to an entity and its owners under this paragraph (d), the entity and its owners shall determine the total AII using the aggregate of all the assets and all the liabilities of the entity and its owners. The total AII so determined then is allocated (under § 1.453C-5T) to the AIOs held by the entity and its owners.

(2) Example. Individual taxpayer A owns an unencumbered parcel of real property from which A derives rental income. The adjusted basis of this property is $400,000. A is primarily liable on unsecured indebtedness of $500,000. In anticipation of a sale of the rental property A organizes Y, an S corporation, and transfers the rental property to Y. A principal purpose of the transaction is to avoid the application of section 453C and the regulations thereunder. Corporation Y sells the property for an installment note with an outstanding face amount of $600,000 on December 31, 1987. Absent the application of the rule in paragraph (d)(1) of this section, no AII would be allocated to the installment obligation since Y has no outstanding indebtedness. However, the rule in paragraph (d)(1) of this section requires that A and Y be treated as one taxpayer. Thus, the indebtedness of A is allocated to the installment obligation and treated as a payment received by Y on December 31, 1987.

(e) Disregard of amounts attributable to certain related party transactions—(1) Liabilities. Except as provided in paragraph (e)(3) of this section, a liability that arises as a result of any transaction (including the issuance of stock or a partnership interest) between any persons treated as one taxpayer under paragraph (b) or (d) of this section shall not be considered an asset of the lender or indebtedness of the borrower for purposes of section 453C and the regulations thereunder.

(2) Assets. An ownership interest in any entity shall not be treated as an asset of the owner of such interest if the entity and its owners are treated as one taxpayer under paragraph (b) or (d) of this section.

(3) AIOs. Notwithstanding paragraph (e)(1) of this section, an AIO arising from a transaction described in that paragraph shall be treated as an AIO of the persons treated as one taxpayer. In addition, the persons treated as one taxpayer are treated as having a liability represented by the AIO. In computing the indebtedness of such persons, however, the face amount of a liability represented by such an AIO may be reduced by the amount of the basis reduction required by paragraph (e)(4) of this section.

(4) Basis reduction. For purposes of section 453C and the regulations thereunder, the adjusted basis of property transferred from one member of a group treated as one taxpayer to another member of such group shall be reduced by the portion of the gain that has not been recognized or otherwise has been deferred as of the end of the taxable year (but before the application of this section for such taxable year), either under § 1.1502-13 or because the gain on the transfer was eligible to be reported under the installment method.

(5) Example. The following example illustrates the provisions of this paragraph (e):

Example. (i) Corporations Y and Z are accrual basis, calendar year C corporations all of the outstanding stock of which is owned by A, an individual. At the end of 1987, Y has a note receivable from Z, and Z has a note payable to Y. This note relates to funds Z borrowed from Y. In addition, Z has an AIO with a face amount of $1,000,000 outstanding at the end of 1987 representing the purchase price of property sold by Z to Y. Z had a $600,000 basis in the property.

(ii) Pursuant to paragraph (b) of this section, Y and Z are treated as one taxpayer for purposes of applying section 453C. Paragraph (e)(1) of this section provides that the loan between Y and Z is disregarded both as indebtedness (i.e., the note payable) and as an asset (i.e., the note receivable) of the Y-Z group. Pursuant to paragraph (e)(3) of this section, however, the $1,000,000 AIO held by Z is not disregarded as an AIO of the Y-Z group for purposes of section 453C. In addition the $1,000,000 liability represented by the AIO is treated as indebtedness of the Y-Z group. The property Y purchased from Z is

treated as an asset of the Y-Z group, but pursuant to paragraph (e)(4) of this section the basis of such property for purposes of section 453C must be reduced by the $400,000 gain deferred by Z in the installment sale. The Y-Z group may also reduce the $1,000,000 indebtedness by the same $400,000 pursuant to paragraph (e)(3) of this section.

(f) Special rule in applying paragraphs (b) and (d) of this section. If two or more persons treated as one taxpayer under paragraphs (b) or (d) of this section have different taxable years, whenever a taxable year of such a person that holds an AIO ends, the taxable years of all other persons treated as one taxpayer are deemed to end for purposes of applying paragraph (b) and (d) of this section. The AII computed and allocated under this special rule shall be treated as a payment received on the last day of the actual taxable year of each such person.

(g) Example. The following example illustrates the provisions of this section:

Example. (i) X, a widely held C corporation, is the common parent of wholly owned subsidiaries S1 and S2. X is a calendar year taxpayer, and S1 and S2 are fiscal year taxpayers with taxable years ending November 30. Under paragraph (b) of this section, X, S1 and S2 are treated as one taxpayer.

(ii) On November 30, 1987, S1 has outstanding no AIOs, but S2 has outstanding one AIO (obligation one) and X has outstanding one AIO (obligation two). These obligations arose from dealer sales occurring on July 1, 1987, and have outstanding face amounts (as of November 30, 1987) of $100,000 and $150,000, respectively. The remaining contract prices of the obligations as of November 30, 1987, are also $100,000 and $150,000. The adjusted bases of X's assets (other than obligation two and the stock in S1 and S2) on November 30, 1987, is $38,000. The adjusted bases of S1's assets and S2's assets (other than obligation one) are $46,000 and $57,000, respectively. Thus, the aggregate adjusted bases of the group's assets (other than installment obligations) is $141,000. The liabilities of the group are as follows:

	2/28/87	5/31/87	8/31/87	11/30/87
X	$20,000	$22,000	$19,000	$24,000
S1	37,000	31,000	23,000	35,000
S2	10,000	8,000	11,000	18,000
Total	67,000	61,000	53,000	77,000

Thus, the aggregate average quarterly indebtedness for the group is $64,500. The group's installment percentage is .63939 ($250,000/($250,000+$141,000)). Thus, the aggregate AII for the group is $41,241 ($64,500×.63939). Both obligation one and obligation two arose during the taxable year ending November 30, 1987. Therefore, the aggregate AII must be allocated to obligations one and two using the method described in § 1.453C-5T(a): $16,496 (($100,000/$250,000)×$41,241) to obligation one and $24,745 (($150,000/$250,000)×$41,241) to obligation two. These amounts are treated as payments received on the obligations on November 30, 1987. S2 must report the income resulting from the deemed payment on obligation one on its income tax return for the taxable year ending November 30, 1987. X, however, must report the income resulting from the deemed payment on obligation two on its income tax return for the taxable year ending December 31, 1987.

(iii) On December 31, 1987, obligations one and two remain outstanding and no other AIOs are held by X, S1, or S2. The adjusted bases of X's assets (other than obligation two and the stock in S1 and S2) on December 31, 1987 is $39,000. The adjusted bases of S1's assets and S2's assets (other than obligation one) are $45,000 and $58,000 respectively. Thus, the aggregate adjusted basis of the group's assets (other than installment obligations) is $142,000. The liabilities of the group are as follows:

	3/31/87	6/30/87	9/30/87	12/31/87
X	$21,000	$21,000	$18,000	$25,000
S1	38,000	32,000	24,000	36,000
S2	10,000	8,000	11,000	18,000
Total	69,000	61,000	53,000	79,000

Thus, the aggregate average quarterly indebtedness for the group is $65,500. The group's installment percentage is .63776 ($250,000/($250,000+$142,000)). Thus, the aggregate AII for the group is $532 (($65,500×.63776)-$41,241 (the AII previously allocated to obligations one and two)). Since no obligations arose during December 1987, the $532 of AII must be allocated, under § 1.453C-5T(a), to obligations one and two: $213 to obligation one and $319 to obligation two. These amounts are treated as a payment received on the obligations on December 31, 1987. Thus, X reports on its 1987 tax return income attributable to $25,064 of deemed payments.

[T.D. 8224, 53 FR 34724, Sept. 8, 1988]

§ 1.453C–7T Special rules (temporary).

(a) Personal use property—(1) Definition. For purposes of section 453C and the regulations thereunder, the term "personal use property" means any property held by an individual substantially all the use of which is by an individual and not in connection with a trade or business or any activity described in section 212. The term does not include cash or cash equivalents.

(2) Indebtedness secured by personal use property. For purposes of paragraph (c) (1) and (2) of § 1.453C-3T (relating to the determination of annual and average quarterly indebtedness), any indebtedness secured by personal use property (as defined in paragraph (a) of this section), or by installment obligations arising from the disposition of such property, shall not be taken into account. For purposes of this section, indebtedness is "secured by personal use property" only if at least 90 percent of the value of the property securing the indebtedness is personal use property. However, if the amount of the indebtedness secured by personal use property exceeds the fair market value of such property, the excess is not considered to be secured by personal use property.

(b) Real property held for rental income—(1) In general. For purposes of section 453C and the regulations thereunder, except as otherwise provid-

ed in this paragraph (b), real property is held for the production of rental income if—

(i) The property is used by customers or held for use by customers; and

(ii) The gross income attributable to the property represents (or, in the case of property held for use by customers, the expected gross income attributable to the property would represent) amounts paid or to be paid principally for the use of such property (without regard to whether the use of the property by customers is pursuant to a lease or pursuant to a service contract or other arrangement that is not denominated a lease).

(2) Rental of property incidental to holding such property for investment. For purposes of this paragraph (b), real property is not held for the production of rental income if—

(i) The principal purpose for holding the property is to realize gain from the appreciation of the property (without regard to whether it is expected that such gain will be realized from the sale or exchange of the property in its current state of development); and

(ii) The annual gross rental income from the property (based on the 12 months preceding the disposition of such property) is less than two percent of the lesser of—

(A) The unadjusted basis of such property; or

(B) The selling price of such property (as defined in § 15a.453-1(b)(2)(ii)).

For purposes of this paragraph (b)(2), the term "unadjusted basis" means adjusted basis determined without regard to any adjustment described in section 1016 that decreases basis.

(c) Property used in trade or business of farming. For purposes of section 453C and the regulations thereunder, property is used in the trade or business of farming if such property is used by the taxpayer in the trade or business of farming as that term is defined in section 2032A(e) (4) or (5). For this purpose, the term "taxpayer" includes a "farm-related taxpayer," as defined in section 464 (f)(3)(B). The term "AIO," within the meaning of § 1.453C-2T (a), does not include any obligation arising from the disposition of property used or produced by a taxpayer (or a farm-related taxpayer) in the trade or business of farming.

[T.D. 8224, 53 FR 34734, Sept. 8, 1988]

§ 1.453C–8T Sales of timeshares and residential lots (temporary).

(a) In general—(1) Scope of election. If a taxpayer elects, section 453C and the regulations thereunder (except for this section) shall not apply to any AIO—

(i) Which arises from a sale in the ordinary course of the taxpayer's trade or business to an individual of—

(A) Any—

(1) Timeshare right to use or timeshare ownership interest in residential real property for not more than 6 weeks, or

(2) The right to use specified campgrounds for recreational purposes, or

(B) Any residential lot but only if the taxpayer (or any related person) is not to make any improvements with respect to such lot, and

(ii) Which is not guaranteed or insured by any person other than an individual. (Thus, for example, any Federal or private insurance relating to the payment of an obligation disqualifies such obligation from the election described in this paragraph (a)).

For rules relating to the making of the election to have section 453C not apply, see 26 CFR 5h.5 (temporary regulations relating to elections under the Tax Reform Act of 1986). Notwithstanding paragraph (a)(2) of those regulations, a taxpayer may make this election at any time on or before December 7, 1988. In the case of AIOs held by a partnership, S corporation, or trust, the election must be made by such entity and not by its owners.

(2) Determination of timeshare ownership. For purposes of paragraph (a)(1)(i)(A)(1) of this section, a timeshare right to use, or a timeshare interest in property held by an individual's spouse, children, grandchildren, or parents is considered held by such individual.

(3) Related persons. For purposes of paragraph (a)(1)(i)(B) of this section, a person is related to the taxpayer if such person has a relationship to the taxpayer as specified in section 267(b) or 707(b) determined by substituting 10 percent for 50 percent each place it appears.

(4) Residential lot. For purposes of paragraph (a)(1)(i)(B) of this section, a residential lot is a parcel of unimproved land upon which the purchaser intends to construct (or intends to contract to have another person construct) a dwelling unit

for use as a residence by the purchaser. The terms "dwelling unit" and "use as a residence" as used herein are defined by section 280A. A parcel of land shall not be considered improved merely because it has been provided with common infrastructure items such as roads and sewers.

(b) Interest must be paid on deferred tax—(1) In general. If a taxpayer makes the election to have section 453C and the regulations thereunder (excluding this paragraph (b)) not apply to any obligation described in paragraph (a) of this section, the taxpayer (or the taxpayer's owners, in the case of a partnership, S corporation, or trust) shall pay interest on the portion of any tax for any taxable year (determined without regard to any deduction allowable for such interest) that is attributable to the receipt of payments on the obligation in such year (other than payments received in the taxable year of sale).

(2) Determination of tax liability attributable to receipt of payments on an obligation. For purposes of paragraph (b)(1) of this section, the tax liability attributable to a payment received on any obligation for which the election under paragraph (a) of this section has been made shall be determined by allocating to such payment its applicable share of the excess of—

(i) The taxpayer's tax liability (including alternative minimum tax) for such year determined with regard to payments received on all obligations for which the election under paragraph (a) of this section applies, over

(ii) The taxpayer's tax liability (including alternative minimum tax) for such year determined without regard to payments received on all obligations for which the election under paragraph (a) of this section applies.

For this purpose, the applicable share of the excess that is allocated to a payment is an amount that bears the same ratio to the total excess as the gain attributable to the payment bears to the total gain attributable to all such payments received in the taxable year. The tax liability is determined without regard to any deduction for interest determined under paragraph (b) of this section. In the case of obligations held by a partnership, S corporation, or trust, the determination described in this paragraph (b)(2) shall be made at the owner level.

(3) Period for which interest is determined—(i) In general. Interest on any tax liability attributable to an obligation to which the election described in paragraph (a) of this section applies shall be determined for the period from the date of the sale to the date the payment on the obligation is received.

(ii) Midpoint method. For purposes of paragraph (b)(3)(i) of this section, a taxpayer may, at the taxpayer's option, treat all payments received during the taxable year on all obligations to which the election described in paragraph (a) of this section applies as if they were received on the day halfway between the beginning and end of the taxable year (midpoint method). A taxpayer adopts the midpoint method by using it to compute the interest owed under this paragraph (b). The midpoint method is a method of accounting that must be used consistently from one taxable year to the next and cannot be revoked without the consent of the Commissioner. In addition, for its first taxable year ending after December 31, 1986, a taxpayer may adopt the midpoint method by using it on an amended return filed on or before December 7, 1988.

(4) Computation of interest. The interest for the period described in paragraph (b)(3) of this section shall be determined by using the applicable Federal rate under section 1274(d) (determined without regard to section 1274(d) (2) or (3)) in effect as of the date of the sale, compounded semiannually, or as prescribed by the Commissioner in revenue rulings under section 1274, an equivalent rate based on compounding periods other than a semiannual period (e.g., annual, quarterly, or monthly compounding periods).

(5) Time when interest payment due. Any interest determined under paragraph (b) of this section shall be treated as an addition to tax for the taxable year during which the payment on the obligation is received, and the last date for payment of such tax shall be the due date (determined without regard to extensions) of the return for such taxable year.

(6) Deduction for interest allowable. The interest determined under paragraph (b) of this section shall be taken into account in computing the amount of any deduction allowable to the taxpayer for interest paid or accrued for the taxable year in which the payment on the obligation is received (subject to any applicable limitation on the deductibility of interest on an underpayment of tax). The timing of such deduction shall be determined under the taxpayer's method of accounting.

(c) Example. The provisions of this section may be illustrated by the following example:

Example. (i) A, an accrual basis corporation, is a calendar year dealer in undeveloped residential lots. In taxable year 1987, A receives two AIOs for which the election described in paragraph (a) of this section is effective. The face amount of each obligation is $180,000. Each obligation provides for

monthly principal payments of $1,000 for a period of 15 years and for adequate stated interest under sections 483 and 1274. The dates of the two sales are June 1, 1987, and July 1, 1987. The first monthly payment on the June 1, 1987 obligation is due on July 1, 1987, and on the first of every month thereafter until satisfied. The first monthly payment on the July 1, 1987 obligation is due on September 1, 1987, and on the first day of every month thereafter until satisfied.

(ii) Under paragraph (b)(1) of this section, no interest is required to be paid on the payments received in the year of sale. The first payments on which interest is required to be paid occur on January 1, 1988. With respect to the June 1, 1987 obligation, the first payment is received 7 whole monthly compounding periods from the date of the sale. With respect to the July 1, 1987 obligation, the first payment is received 6 whole monthly compounding periods from the date of the sale.

(iii) The gross profit ratio applicable to the June 1, 1987 sale is 0.6600. The gross profit ratio applicable to the July 1, 1987 sale is 0.4500. A has taxable income unrelated to these installment sales of $21,000 determined without regard to any deduction allowable for the interest determined under paragraph (b) of this section. With respect to the June 1, 1987 sale, A receives a partial payment of principal of $1,000 on January 1, 1988. Based on the gross profit ratio, $660 of the payment is gain and $340 is recovery of basis. With respect to the July 1, 1987 sale, A receives a partial payment of principal of on January 1, 1988. Based on the gross profit ratio, $450 of the payment is gain and $550 is recovery of basis. A's gain on the other eleven 1988 payments on the June 1, 1987 obligation is $7,260. A's gain on the other eleven payments on the July 1 obligation is $4,950. Thus, A recognizes total gain of $13,320 on the two obligations in 1988.

(iv) A determines that it has no alternative minimum tax liability when it calculates income with regard to payments received on all obligations for which the election has been made. Thus, A's tax liability determined with regard to such payments is $5,148 (0.15×$34,320). A also determines that it has no alternative minimum tax liability when it calculates income without regard to payments received on all obligations for which the election has been made. Thus, A's tax liability determined without regard to such payments is $3,150 (0.15×$21,000). The excess of A's tax liability with regard to such payments over its tax liability without regard to such payments is $1,998. Of this $1,998 excess, $99 ($1,998×$660/$13,320) is allocated to and treated as the tax liability attributable to the January 1, 1988 payment on the June 1, 1987 obligation and $67 ($1,998×$450/$13,320) is allocated to and treated as the tax liability attributable to the January 1, 1988 payment on the July 1, 1987 obligation.

(v) The long-term applicable Federal rate in effect on the date of the June 1, 1987 sale is 8.34 percent, compounded monthly. The long-term applicable Federal rate in effect on the date of the July 1, 1987 sale is 8.57 percent, compounded monthly. The amount of interest due with respect to the January 1, 1988 payment on the June 1, 1987 obligation is $4.92. The amount of interest due with respect to the January 1, 1988 payment on the July 1, 1987 obligation is $2.92. These amounts of interest are taken into account as interest on an underpayment of tax in computing the amount of any deduction allowable for interest for taxable year 1988, and are treated as an addition to tax due on the due date of A's return for taxable year 1988. A must similarly determine the interest due on the gain with respect to each monthly payment received on the two obligations in taxable year 1988. However, if A adopts the midpoint method described in paragraph (b)(3)(ii) of this section, A may treat all of the payments received during 1988 on each of the obligations as received on July 1, 1988.

[T.D. 8224, 53 FR 34725, Sept. 8, 1988]

§ 1.453C–9T Effective dates and transitional rules.

(a) Effective dates—(1) In general. Except as otherwise provided, section 453C and the regulations thereunder apply to taxable years ending after December 31, 1986, with respect to dispositions of property occurring after February 28, 1986, and before January 1, 1988.

(2) Certain dispositions deemed made on first day of effective taxable year. In the case of a taxpayer's first taxable year ending after December 31, 1986, for purposes of section 453C and the regulations thereunder only, any disposition made after February 28, 1986 (or August 16, 1986, in the case of a disposition of real property of the type described in § 1.453C-2T(a)(1)(ii)), and before the beginning of such taxable year, is deemed made on the first day of such taxable year.

(3) Example. The following example illustrates the provisions of paragraph (a) of this section:

Example. X is a fiscal year dealer in personal property with a taxable year ending on June 30. After February 28, 1986, but before July 1, 1986 (i.e., during X's 1986 taxable year), X receives AIOs. After June 30, 1986 (i.e., during X's 1987 taxable year), X receives more AIOs. Since the AIOs received after June 30, 1986, are received in X's first taxable year ending after December 31, 1986, section 453C applies to these obligations under paragraph (a)(1) of this section. Under paragraph (a)(2) of this section, for purposes of section 453C and the regulations thereunder, the AIOs arising after February 28, 1986, and on or before June 30, 1986, are deemed to arise on July 1, 1986, the first day of X's first taxable year beginning after February 28, 1986 and ending after December 31, 1986, and section 453C applies to the obligations.

(b) Certain transitional rules—(1) In general—(i) Applicability. This paragraph (b) applies to AIOs that—

(A) Arise from the sale of property in the ordinary course of the trade or business of the taxpayer; and

(B) Are outstanding as of the close of the first or second taxable year of the taxpayer ending after December 31, 1986.

(ii) Deemed 1987 and 1988 payments. (A) The term "deemed 1987 payment" means, with respect to any AIO to which paragraph (b) of this section applies, the amount of AII for the first taxable year of the taxpayer ending after December 31, 1986, that is treated under § 1.453C-5T(a) as a payment on such obligation.

(B) The term "deemed 1988 payment" means, with respect to any AIO to which paragraph (b) of this section applies, the amount of AII for the

second taxable year of the taxpayer ending after December 31, 1986, that is treated under § 1.453C-5T (a) and (d) as a payment received on such obligation.

(iii) Income attributable to deemed 1987 and 1988 payments. The income of a taxpayer that is attributable to a deemed 1987 payment or a deemed 1988 payment on an AIO to which paragraph (b) of this section applies is the amount that bears the same relationship to such deemed payment as the gross profit (realized or to be realized when payment is completed) bears to the total contract price.

(2) Dealer sales of real property—(i) Applicability. This paragraph (b)(2) applies to installment obligations described in paragraph (b) of this section that arise out of a sale of real property.

(ii) Treatment of deemed 1987 payments. A taxpayer's income attributable to deemed 1987 payments on AIOs to which paragraph (b)(2) of this section applies shall be taken into account ratably over the three taxable years beginning with the first taxable year of the taxpayer ending after December 31, 1986.

(iii) Treatment of deemed 1988 payments. A taxpayer's income attributable to deemed 1988 payments on AIOs to which paragraph (b)(2) of this section applies shall be taken into account ratably over the two taxable years beginning with the second taxable year of the taxpayer ending after December 31, 1986.

(3) Dealer sales of personal property—(i) Applicability. This paragraph (b)(3) applies to installment obligations described in paragraph (b) of this section that arise out of a sale of personal property.

(ii) Treatment of deemed 1987 and 1988 payments. Solely for purposes of determining the time for payment of tax and any interest payable with respect to such tax—

(A) Any increase in tax imposed on a taxpayer that is attributable to deemed 1987 payments on AIOs to which paragraph (b)(3) of this section applies shall be treated as imposed ratably over the three taxable years beginning with the first taxable year of the taxpayer that ends after December 31, 1986; and

(B) Any increase in tax imposed on a taxpayer that is attributable to deemed 1988 payments on AIOs to which paragraph (b)(3) of this section applies shall be treated as imposed ratably over the two taxable years beginning with the second taxable year of the taxpayer that ends after December 31, 1986.

(iii) Increase in tax attributable to deemed 1987 and 1988 payments. (A) The increase in tax imposed on a taxpayer that is attributable to deemed 1987 payments on AIOs to which this paragraph (b)(3) applies is the excess (if any) of—

(1) The tax that would be imposed on the taxpayer for the first taxable year ending after December 31, 1986, determined by taking into account income attributable to deemed 1987 payments on AIOs to which this paragraph (b)(3) applies, over

(2) The tax that would be imposed on the taxpayer for such taxable year, determined without regard to income attributable to deemed 1987 payments on AIOs to which paragraph (b)(3) of this section applies.

(B) The increase in tax imposed on a taxpayer that is attributable to deemed 1988 payments on AIOs to which paragraph (b)(3) of this section applies is the excess (if any) of—

(1) The tax that would be imposed on the taxpayer for the second taxable year ending after December 31, 1986, determined by taking into account income attributable to deemed 1988 payments on installment obligations to which paragraph (b)(3) of this section applies, over

(2) The tax that would be imposed on the taxpayer for such taxable year, determined without regard to income attributable to deemed 1988 payments on AIOs to which paragraph (b)(3) of this section applies.

(iv) Tax imposed. For purposes of paragraph (b)(3) of this section, the tax imposed is the greater of zero or the amount of tax imposed by chapter 1 of the Internal Revenue Code of 1986 (including the alternative minimum tax) determined without reducing such amount by—

(A) The credit under section 31 for tax withheld;

(B) The credit under section 33 for tax withheld at source on nonresident aliens and foreign corporations; and

(C) Payments of tax or estimated tax by the taxpayer.

(4) Application of §§ 1.453C-5T (b) and (c). The taxable year in which an amount is treated as received for purposes of § 1.453C-5T(b) (relating to the treatment of subsequent payments as the

receipt of tax paid amounts) and § 1.453C-5T(c) (relating to the limitation on amounts treated as received) shall be determined without regard to paragraphs (b) (2) and (3) of this section. Thus, an amount is treated as received in a taxable year for such purposes even if under paragraph (b) (2) or (3) of this section, the income or tax attributable to such amount is taken into account or treated as imposed over the two-year or three-year period beginning with such taxable year.

(5) **Examples.** The following examples illustrate the application of paragraph (b) of this section:

Example (1). (i) Corporation X is a fiscal year dealer in real property with a taxable year ending on June 30. At the close of its taxable year ending June 30, 1987, X holds 10 AIOs, all of which arose during that taxable year. These AIOs provide for adequate stated interest under sections 483 and 1274, and each has a year-end balance of $210,000.

(ii) Assume that the adjusted bases of assets (other than AIOs) held by X as of the close of the taxable year is $2,000,000. Thus, the installment percentage for the taxable year is .51220 ($2,100,000 (the outstanding face amount as of the close of the taxable year of all AIOs) /$4,100,000 (the sum of such amount and the adjusted bases of other assets held by X as of the close of the taxable year)). Assume further that X's average quarterly indebtedness for the taxable year is $460,976. Accordingly, the amount of AII for the taxable year is $236,112 (.51220×$460,976). Under § 1.453C-5T(a), a ratable portion of this amount is treated as a payment received on each AIO for X's taxable year ending June 30, 1987. Thus, X has a deemed 1987 payment of $23,611 on each of the 10 AIOs.

(iii) Assume that the gross profit ratio with respect to each of the 10 sales for which an AIO was received is 45.833%. Thus, $10,822 ($23,611×.45833) of each deemed 1987 payment is income. (The remaining portion of each deemed payment ($12,-789) is recovery of basis.) Accordingly, the total income attributable to the deemed 1987 payments is $108,220. Assume X has no other items of income or loss for the taxable year.

(iv) Under paragraph (b)(2)(ii) of this section, the $108,220 is taken into account ratably over the three taxable years beginning with taxable year 1987. Thus, $36,073 is taken into account in each such taxable year.

(v) During its taxable year ending June 30, 1988, X receives actual payments of $20,000 on each of the AIOs. All of each $20,000 payment is treated as the receipt of a tax paid amount under § 1.453C-5T(b) even though only one third of the income attributable to the 1987 AII has been taken into account.

Example (2). The facts are the same as in example (1), except that X receives the 10 AIOs in its 1988 taxable year. Under paragraph (b)(2)(iii) of this section, the $108,220 of income attributable to the deemed 1988 payments of $236,112 is taken into account ratably over the two taxable years beginning with taxable year 1988. Thus, $54,110 is taken into account in each such taxable year.

Example (3). (i) Corporation X is a calendar year dealer in personal property. On March 1, 1987, X receives an AIO with a face amount of $1,000,000 arising from the sale of property in the ordinary course of its business. The obligation provides for adequate stated interest under sections 483 and 1274. The gross profit ratio on the obligation is 66%. The total gain from such disposition is thus $660,000. X receives no payments on the obligation during 1987. On December 31, 1987, X has no other AIOs outstanding. X has no other items of income or deduction for the taxable year and no credits. X has AII of $650,000 for 1987. Thus, X has a deemed 1987 payment of $650,000 on the AIO and total income attributable to the deemed 1987 payment of $429,000 ($650,000 ×.66).

(ii) The increase in tax attributable to the deemed 1987 payment is $29,346, the excess of $161,346 over $132,000. The tax imposed with regard to income attributable to the deemed 1987 payment is $161,346, determined as follows:

Regular tax computation:

Taxable income.....$429,000

Regular tax.....$161,346

Alternative minimum tax computation:

Alternative minimum taxable
income.....$660,000

Tentative minimum tax.....$132,000

Because X's regular tax liability exceeds its tentative minimum tax, $161,346 is the tax imposed. The tax imposed without regard to income attributable to the deemed 1987 payment is $132,000, determined as follows:

Regular tax computation:

Taxable income.....$0

Regular tax.....$0

Alternative minimum tax computation:

Alternative minimum taxable
income.....$660,000

Tentative minimum tax.....$132,000

Because X's regular tax is $0 and X's tentative minimum tax exceeds its regular tax by $132,000, $132,000 is the tax imposed.

(iii) The increase of $29,346 attributable to the deemed 1987 payment will be imposed ratably over the three taxable years beginning with X's 1987 taxable year. Thus, X will pay taxes of $141,782 ($161,346-$29,346+$9,782) in 1987 and have an additional tax liability of $9,782 in 1988 and in 1989. X may not include the additional $9,782 in the amount of its regular tax in 1988 or 1989 for purposes of determining whether it is liable for alternative minimum tax. X is liable for an additional $9,782 of tax in each of those years whether it is liable for alternative minimum or regular tax in those years.

Example (4). (i) The facts are the same as in example (3), except that in 1988 X has a $30,000 net operating loss ("NOL") for purposes of the regular tax and a $10,000 NOL for purposes of the alternative minimum tax. Both of these NOLs are carried back under section 172(b) to 1987. Since the NOL carryback to 1987 is taken into account in computing X's taxable income for 1987, X's increase in tax attributable to the deemed 1987 payment must be computed.

(ii) The increase in tax attributable to the deemed 1987 payment is $19,362, the excess of $149,362 over $130,000. The tax imposed with regard to income attributable to the deemed 1987 payment is $149,362, determined as follows:

Regular tax computation:

Taxable income before NOL carryback	$429,000
NOL carryback	(30,000)
Taxable income	$399,000
Regular tax	$149,362

Alternative minimum tax computation:

Alternative minimum taxable income before NOL carryback	$660,000
NOL carryback	(10,000)
Alternative minimum taxable income	$650,000
Tentative minimum tax	$130,000

Because X's regular tax liability exceeds its tentative minimum tax, $149,362 is the tax imposed. The tax imposed without regard to income attributable to the deemed 1987 payment is $130,000, determined as follows:

Regular tax computation:

Taxable income..... $0

Regular tax..... $0

Alternative minimum tax computation:

Alternative minimum taxable income before NOL carryback	$660,000
NOL carryback	(10,000)
Alternative minimum taxable income	$650,000
Tentative minimum tax	$130,000

Since X's regular tax is $0 and X's tentative minimum tax exceeds its regular tax by $130,000, that amount is the tax imposed.

(iii) The increase of $19,362 attributable to the deemed 1987 payment will be imposed ratably over the three taxable years beginning with 1987. X will thus pay taxes of $136,454 ($149,362-$19,362+$6,454) in 1987 and have an additional tax liability of $6,454 in each of 1987 and 1988.

(6) Effect of death, termination or cessation of trade or business—(i) In general. If a taxpayer holding an AIO to which this section applies dies, terminates, or ceases to engage in the trade or business to which the obligation relates and paragraph (b)(6)(ii) of this section does not apply, the income or tax attributable to deemed 1987 or 1988 payments not taken into account under this section in any prior taxable year shall be taken into account in the taxable year of such death, termination, or cessation.

(ii) Section 381 transactions. If a corporation acquires AIOs to which this section applies in a transaction to which section 381 applies and continues to engage in the trade or business to which the obligations relate, the income or tax attributable to deemed 1987 or 1988 payments on such obligations shall be taken into account—

(A) By treating the acquiring corporation as if it were the distributor or transferor corporation for taxable years of the acquiring corporation ending after the last day of the last taxable year of the distributor or transferor corporation; and

(B) By taking into account for purposes of paragraphs (b) (2) and (3) of this section the taxable years of the distributor or transferor corporation beginning after December 31, 1986, and the taxable years of the acquiring corporation ending after the last day of the last taxable year of the distributor or transferor corporation.

(7) S corporation election and terminations. (i) In general. For purposes of paragraph (b)(6)(i) of this section, neither the election by an existing corporation taxable under subchapter C to be taxable under subchapter S nor the termination of an S election shall be treated as the termination of the taxpayer or the cessation by the taxpayer of engaging in the trade or business.

(ii) Change to S corporation status. If the tax attributable to deemed 1987 or 1988 payments on AIOs held by a corporation is treated under paragraph (b)(3) of this section as imposed ratably over a two-year or three-year period and the corporation is not an S corporation in the first year of such period, the S corporation shall pay the portion of the tax treated as imposed for taxable years in which the corporation is an S corporation. In any case in which the tax attributable to deemed 1987 or 1988 payments is payable by an S corporation, the tax treated as imposed for a taxable year shall be due as of the due date (without regard to extensions) of the return of the S corporation for such taxable year, and shall be reported on such return.

(iii) Termination of S corporation election. If the tax attributable to deemed 1987 or 1988 payments on AIOs held by a corporation is treated under paragraph (b)(3) of this section as imposed ratably over a two-year or three-year period and the corporation is an S corporation in the first year of such period, the owners shall pay the entire amount of such tax even if a portion of the tax is treated as imposed for a taxable year in which the corporation is no longer an S corporation.

(8) Tax returns to be identified. A dealer in personal property reporting a ratable portion of the tax attributable to deemed 1987 or 1988 payments on a return must type or legibly print on page 1 of the return (or such other place on the return as may be required by any instruction to the return) the following: "Section 453C tax computation."

(9) Estimated tax payments—(i) In general. For purposes of sections 6654(d)(1)(B) and 6655(d)(1)(B) (relating to the determination of the required payment for estimated tax purposes), the tax shown on the return for the taxable year (or, if no return is filed, the tax for such taxable year) shall—

(A) Exclude any portion of the tax attributable to deemed 1987 or 1988 payments that pursuant to

paragraph (b)(3)(ii) of this section is treated as imposed in a taxable year other than the current taxable year;

(B) Include any portion of the tax attributable to deemed 1987 or 1988 payments that pursuant to paragraph (b)(3)(ii) of this section is treated as imposed in the current taxable year.

(ii) Manner in which income is taken into account. For purposes of sections 6654(d)(2) and 6655(e), a taxpayer (whether a dealer in real or personal property) shall—

(A) Treat the 1987 portion of the income attributable to deemed 1987 payments on installment obligations to which paragraph (b) of this section applies (see paragraph (b)(9)(iii)(A) of this section) as income for the last month of the taxpayer's first taxable year ending after December 31, 1986; then

(B) Treat a ratable portion of one half of the remaining income attributable to deemed 1987 payments on installment obligations to which paragraph (b) of this section applies as income for each month of the taxpayer's second taxable year ending after December 31, 1986; then

(C) Treat a ratable portion of the remaining income attributable to deemed 1987 payments on installment obligations to which paragraph (b) of this section applies as income for each month of the third taxable year ending after December 31, 1986;

(D) Treat the 1988 portion of the income attributable to deemed 1988 payments on installment obligations to which paragraph (b) of this section applies (see paragraph (b)(9)(iii)(B) of this section) as income for the last month of the second taxable year ending after December 31, 1986; then

(E) Treat a ratable portion of the remaining income attributable to deemed 1988 payments on installment obligations to which paragraph (b) of this section applies as income for each month of the third taxable year ending after December 31, 1986.

(iii) 1987 and 1988 portions. (A) The 1987 portion of the income attributable to deemed 1987 payments on installment obligations to which paragraph (b) of this section applies is the amount of such income that would be taken into account for the first taxable year ending after December 31, 1986, determined as if all such obligations were obligations to which paragraph (b)(2) of this section applies.

(B) The 1988 portion of the income attributable to deemed 1988 payments on installment obligations to which paragraph (b) of this section applies is the amount of such income that would be taken into account for the second taxable year ending after December 31, 1986, determined as if all such obligations were obligations to which paragraph (b)(2) of this section applies.

(iv) Example. The following example illustrates the application of paragraph (b)(9) of this section:

Example. The facts are the same as in example (1) of paragraph (b)(5) of this section. For purposes of determining annualized income installments of estimated tax, X shall treat the 1987 portion of the income attributable to deemed 1987 payments on installment obligations to which this section applies as income for the last month of X's taxable year ending in 1987. For this purpose, the 1987 portion of the income attributable to such payments is the amount of such income that is taken into account for X's taxable year ending in 1987 under paragraph (b)(2) of this section. Thus, X must treat $36,073 as income for the last month of X's taxable year ending in 1987. In addition, X must treat a ratable portion of the remaining income attributable to the deemed 1987 payments ($72,146) as income for each month of the two succeeding taxable years (which also end June 30). Thus, $3,006 ($72,-146/24) is treated as income for each such month. Since the 1987 portion of the income attributable to deemed payments is determined by treating all installment obligations to which this section applies as if they were obligations to which paragraph (b)(2) of this section applies, the result would be the same even if X were a dealer in personal property.

[T.D. 8224, 53 FR 34726, Sept. 8, 1988]

§ 1.453C–10T Questions and answers relating to section 811(c)(2) of the Tax Reform Act of 1986 (temporary).

The following questions and answers relate to section 811(c)(2) of the Tax Reform Act of 1986:

Q-1. Are installment obligations that satisfy the requirements of section 811(c)(2) of the Tax Reform Act of 1986 (Pub. L. 99-514, 100 Stat. 2085) (the 1986 Act) subject to either: (a) section 453C of the Code as enacted by section 811(a) of the 1986 Act (the proportionate disallowance rule); or (b) the repeal of the installment method for dealers under section 10202 of the Revenue Act of 1987 (Pub. L. 100-203, 101 Stat. 1330) (the 1987 Act)?

A-1. Installment obligations that satisfy the requirements of section 811(c)(2) are exempt from the proportionate disallowance rule of section 453C, which applies to certain obligations arising from dispositions of property after February 28, 1986, and before January 1, 1988. Installment obligations that satisfy the requirements of section 811(c)(2) are also exempt from the repeal of the installment method for dealers under section 10202 of the 1987 Act (section 453(b)(2)(A)), effective for obligations arising from dispositions of

property after December 31, 1987. Thus, income from such obligations may be taken into account under the installment method of accounting allowed under the Code as in effect prior to the 1986 Act if the method is otherwise available to the taxpayer.

Q-2. What are the requirements of section 811(c)(2)?

A-2. Section 811(c)(2) applies only to obligations that satisfy the following requirements: One, the installment obligations must arise from the disposition of tangible personal property by a manufacturer or any affiliate thereof (collectively, the manufacturer) to a dealer (i.e., the sale of the property must be intended for resale or leasing by the dealer). Two, the obligation must include eligible terms, as defined below. (Obligations that satisfy these two requirements are hereinafter referred to as "eligible obligations"). Three, the obligation must arise from a disposition made in a taxable year for which the taxpayer is eligible for section 811(c)(2) treatment. In order to initially become eligible for section 811(c)(2) treatment, the aggregate outstanding face amount of the eligible obligations must be at least 50% of the total sales giving rise to eligible obligations (the 50% test) both for the taxpayer's first taxable year beginning after October 22, 1986, and for the preceding taxable year. See A-7 of this section for rules relating to the satisfaction of the 50% test for subsequent taxable years.

Q-3. What do the eligible terms require?

A-3. Eligible terms require that the dealer (and only the dealer) must be obligated to make payments on the principal of the obligation. Moreover, the dealer must not be obligated to make these payments until the dealer resells (or rents) the property. In addition, the manufacturer must have the right to repurchase the property at a fixed or ascertainable price, with such right to repurchase exercisable by the manufacturer beginning on any day within the first 9 months after the date of sale.

Q-4. If an installment obligation includes the eligible terms when issued and an eligible term is later eliminated, does section 811(c)(2) continue to apply? If not, on what date does section 811(c)(2) cease to apply to the obligation?

A-4. Section 811(c)(2) applies to an installment obligation only if the obligation includes the eligible terms at the time the obligation is issued and at all times thereafter. If an eligible term is eliminated, the general rules applicable to installment sales by dealers apply to the installment obligation as if the obligation arose from a disposition occurring on the first day of the month in which an eligible term is eliminated. Therefore, any gain on the obligation that remains to be recognized is included in income for the taxable year during which an eligible term is eliminated. (See section 10202(e)(2)(B)(ii) of the Revenue Act of 1987 for a special rule with respect to an obligation from which an eligible term is eliminated before January 1, 1988). The following examples illustrate the provisions of this A-4:

Example 1. Manufacturer A sells tangible personal property to Dealer B on January 1, 1987. B makes a 25% down payment and gives A an installment obligation for the remaining 75% of the purchase price. The obligation requires B to pay the remaining 75% of the purchase price when B resells the property. The obligation also grants A the right to repurchase the property at a fixed price beginning on or after July 1, 1987. Because of changed business conditions, A and B modify the installment obligation on June 5, 1987, to grant A the right to repurchase the property beginning on or after November 1, 1987. On June 1, 1987, section 811(c)(2) ceases to apply to the obligation because on June 5, 1987 A does not have the right to repurchase the property at a fixed or ascertainable price beginning on any day within the first 9 months after the date of the sale. On June 1, 1987, the obligation is subject to the proportionate disallowance rule of section 453C as amended by section 10202 of the 1987 Act as if the obligation arose from a disposition occurring on June 1, 1987.

Example 2. (i) Manufacturer A, a calendar year taxpayer, sells tangible personal property to Dealer B on January 1, 1988. For each item, B makes a 20% down payment and gives A an installment obligation for the remaining 80% of the purchase price. The obligation requires B to pay 50% of the remaining balance on the date B sells the property. The remaining 50% of the balance is due 60 days after the resale date. The obligation further grants A the right to repurchase the property at a fixed price beginning September 15, 1988.

(ii) Pursuant to a separate agreement between A and B existing on January 1, 1988, a customer who ultimately purchases the property from B may assume B's installment obligation to A. To effect the assumption, A must consider the retail customer credit worthy, and the retail customer must execute a promissory note to A for the unpaid principal. When A accepts the retail customer's promissory note in place of B's installment obligation, A releases B from liability on B's installment obligation except to the extent of the retail customer's failure to pay on its note. The financing agreement also provides that the maturity date and interest rate of the retail customer's promissory note may differ from that of the dealer's installment obligation.

(iii) B sells one piece of property to customer C on March 20, 1988. On that date, C assumes B's installment obligation to A. On March 1, 1988, section 811(c)(2) ceases to apply to A's installment obligation from B because on March 20, 1988, an eligible term was eliminated (i.e., a person other than the dealer became obligated to make payments on the principal of the obligation). Section 811(c)(2) ceases to apply whether or not the substitution of C for B as the obligor on the installment obligation constitutes a disposition of that obligation. Because of this substitution, the installment obligation must be accounted for under the general rules applicable to an obligation arising from a disposition occurring on March 1, 1988. Therefore, as required by section 453(b)(2)(A), the installment obligation cannot be accounted for under the installment method of

accounting for A's 1988 taxable year. See, however, A-5(a) of this section for rules relating to the treatment of the obligation as an eligible obligation during January and February for purposes of the 50% test.

Q-5. How is the 50% test calculated?

A-5. (a) To determine whether a taxpayer satisfies the 50% test for a taxable year, the taxpayer calculates a fraction (the testing fraction), the numerator of which is the average balance of outstanding eligible obligations, calculated on a monthly basis and including eligible obligations arising from sales in prior years, and the denominator of which is the sales for that year giving rise to eligible obligations. The testing fraction must be at least 50% to satisfy the requirements of section 811(c)(2). An obligation that ceases to be an eligible obligation because an eligible term is eliminated nonetheless remains, for purposes of calculating the 50% test, an eligible obligation for the period preceding the month in which the eligible term is eliminated. A sale giving rise to an obligation that ceases to be an eligible obligation because an eligible term is eliminated continues to be included in the denominator of the testing fraction.

(b) To determine the numerator of the testing fraction, the taxpayer first determines the monthly balance of eligible obligations (monthly eligible balance). The monthly eligible balance consists of the face amount of eligible obligations (including eligible obligations arising from sales in previous taxable years) outstanding at the end of the month. Payments of principal on an eligible obligation reduce the amount included in the monthly eligible balance. The sum of the monthly eligible balances is divided by the number of months in the taxable year (counting fractions of a month as whole months in the case of a short taxable year) to determine the numerator of the testing fraction. (In determining the number of months in a taxable year for purposes of this calculation, a month is counted even though no eligible obligations were outstanding at the end of that month.) The denominator of the testing fraction is a number equal to the total amount of all sales arising during the taxable year giving rise to eligible obligations. If a sale giving rise to an eligible obligation includes a down payment, the amount of the sale includes the amount of the down payment. The denominator includes only sales occurring in the taxable year of the determination. Sales occurring in a previous year are not included in the denominator, even though eligible obligations arising from those sales remain outstanding.

(c) The following example illustrates the provisions of this A-5:

Example. On January 1, 1987, Manufacturer A, a calendar year taxpayer, has five outstanding eligible obligations (1986 obligations). On January 1, 1987, the outstanding face amount of each 1986 obligation is $80,000. On January 15, 1987, A sells to Dealer B 15 pieces of tangible personal property for $75,000 each. For each sale, B makes a down payment of $25,000 and gives A an installment obligation with eligible terms for the remaining $50,000. Each obligation provides for adequate stated interest under sections 483 and 1274. On April 15, 1987, A sells to Dealer C 10 pieces of tangible personal property, each for $65,000 with no down payment. For each sale, C issues an installment obligation with the eligible terms for $65,000. Each obligation provides for adequate stated interest under sections 483 and 1274. During 1987, A makes no other dispositions of property giving rise to eligible obligations. During 1987 A receives no payments from B or C on their obligations. With respect to 1986 obligations, A receives $80,000 plus interest on each of the following dates: April 15, 1987; May 15, 1987; June 15, 1987; July 15, 1987 and August 15, 1987. A calculates the 50% test as follows:

Month	Monthly eligible balance	
January	$ 400,000	(5 × $80,000)
	750,000	(15 × $50,000)
	1,150,000	
February	1,150,000	
March	1,150,000	
April	1,150,000	
	(80,000)	
	650,000	(10 × $65,000)
	1,720,000	
May	1,720,000	
	(80,000)	
	1,640,000	
June	1,640,000	
	(80,000)	
	1,560,000	
July	1,560,000	
	(80,000)	
	1,480,000	
August	1,480,000	
	(80,000)	
	1,400,000	
September	1,400,000	
October	1,400,000	
November	1,400,000	
December	1,400,000	
Total	16,850,000	

The average balance of eligible obligations is $1,404,167 ($16,850,000/12). Total sales giving rise to eligible obligations equal $1,775,000 ((15 × $75,000) + (10 × $65,000)). The testing fraction is 79% ($1,404,167/$1,775,000). Because 79% is greater than 50%, A satisfies the 50% test for 1987. In order to become eligible for section 811(c)(2) treatment, A must also satisfy the 50% test for 1986. See A–6 of this section.

Q-6. For what taxable year must a taxpayer first satisfy the requirements of section 811(c)(2)?

A-6. (a) A taxpayer must meet the requirements of section 811(c)(2) for its first taxable year beginning after October 22, 1986. One of these requirements is that a taxpayer must satisfy the 50% test both for its first taxable year beginning after Octo-

ber 22, 1986, and for the preceding taxable year (i.e., its first taxable year ending on or after October 22, 1986). For example, section 811(c)(2) applies to a calendar year taxpayer only if the taxpayer satisfies the 50% test for both 1986 and 1987. If the taxpayer fails to satisfy the 50% test for either 1986 or 1987, section 811(c)(2) can never apply to any obligation arising from sales by the taxpayer.

(b) Section 811(c)(2)(C) treats obligations issued before October 22, 1986, as containing the eligible terms if the obligations were modified to contain the eligible terms within sixty days after October 22, 1986. Sales giving rise to modified obligations are taken into account in calculating the denominator, and the modified obligations themselves are taken into account in calculating the numerator, of the testing fraction as if the obligations were modified on the date of their original issuance. See A-5 of this section.

Q-7. Must a taxpayer always satisfy the 50% test for both the taxable year and the preceding taxable year?

A-7. (a) If a taxpayer satisfies the 50% test for both its first taxable year beginning after October 22, 1986, and its preceding taxable year (i.e., its first taxable year ending on or after October 22, 1986), such a taxpayer will not cease to be eligible for section 811(c)(2) treatment until the second consecutive taxable year for which it fails to satisfy the 50% test. A taxpayer that ceases to be eligible for section 811(c)(2) treatment because it fails the 50% test for two consecutive years can again become eligible for section 811(c)(2) treatment by subsequently satisfying the 50% test for two consecutive taxable years. The obligations of a taxpayer that arise from dispositions made in a taxable year for which the taxpayer is not eligible for section 811(c)(2) treatment, however, can never become eligible for section 811(c)(2) treatment. Likewise, eligible obligations arising from dispositions made in a taxable year for which the taxpayer is eligible for section 811(c)(2) treatment do not cease to be subject to section 811(c)(2) treatment if the taxpayer subsequently fails the 50% test for two consecutive taxable years.

(b) The following examples illustrate the provisions of this A-7:

Example (1). A calendar year taxpayer fails the 50% test in 1986, but satisfies the test in 1987 and 1988. Section 811(c)(2) does not apply for 1987 or for any year thereafter. See A-6 of this section.

Example (2). A calendar year taxpayer satisfies the 50% test in 1986 and 1987, fails the 50% test in 1988, and satisfies the 50% test in 1989. Section 811(c)(2) applies to the taxpayer's eligible obligations arising from dispositions made in 1987, 1988, and 1989.

Example (3). A calendar year taxpayer satisfies the 50% test in 1986 and 1987, but fails the 50% test in both 1988 and 1989. Section 811(c)(2) applies to the taxpayer's eligible obligations arising from dispositions made in 1987 and 1988 but does not apply to obligations arising from dispositions made in 1989 and 1990. If the taxpayer satisfies the 50% test for 1990 and 1991, section 811(c)(2) applies to eligible obligations arising from dispositions made in 1991.

[T.D. 8213, 53 FR 26244, July 12, 1988; T.D. 8224, 53 FR 34719, Sept. 8, 1988]

§ 1.454–1 Obligations issued at discount.

(a) Certain non-interest-bearing obligations issued at discount—(1) Election to include increase in income currently. If a taxpayer owns—

(i) A non-interest-bearing obligation issued at a discount and redeemable for fixed amounts increasing at stated intervals (other than an obligation issued by a corporation after May 27, 1969, as to which ratable inclusion of original issue discount is required under section 1232(a)(3)), or

(ii) An obligation of the United States, other than a current income obligation, in which he retains his investment in a matured series E U.S. savings bond, or

(iii) A nontransferable obligation (whether or not a current income obligation) of the United States for which a series E U.S. savings bond was exchanged (whether or not at final maturity) in an exchange upon which gain is not recognized because of section 1037(a) (or so much of section 1031(b) as relates to section 1037),

and if the increase, if any, in redemption price of such obligation described in subdivision (i), (ii), or (iii) of this subparagraph during the taxable year (as described in subparagraph (2) of this paragraph) does not constitute income for such year under the method of accounting used in computing his taxable income, then the taxpayer may, at his election, treat the increase as constituting income for the year in which such increase occurs. If the election is not made and section 1037 (or so much of section 1031 as relates to section 1037) does not apply, the taxpayer shall treat the increase as constituting income for the year in which the obligation is redeemed or disposed of, or finally matures, whichever is earlier. Any such election must be made in the taxpayer's return and may be made for any taxable year. If an election is made with respect to any such obligation described in subdivision (i), (ii), or (iii) of this subparagraph, it shall apply also to all other obligations of the type described in such subdivisions owned by the taxpayer at the beginning of the first

taxable year to which the election applies, and to those thereafter acquired by him, and shall be binding for the taxable year for which the return is filed and for all subsequent taxable years, unless the Commissioner permits the taxpayer to change to a different method of reporting income from such obligations. See section 446(e) and paragraph (e) of § 1.446–1, relating to requirement respecting a change of accounting method. Although the election once made is binding upon the taxpayer, it does not apply to a transferee of the taxpayer.

(2) Amount of increase in case of non-interest-bearing obligations. In any case in which an election is made under section 454, the amount which accrues in any taxable year to which the election applies is measured by the actual increase in the redemption price occurring in that year. This amount does not accrue ratably between the dates on which the redemption price changes. For example, if two dates on which the redemption price increases (February 1 and August 1) fall within a taxable year and if the redemption price increases in the amount of 50 cents on each such date, the amount accruing in that year would be $1 ($0.50 on February 1 and $0.50 on August 1). If the taxpayer owns a non-interest-bearing obligation of the character described in subdivision (i), (ii), or (iii) of subparagraph (1) of this paragraph acquired prior to the first taxable year to which his election applies, he must also include in gross income for such first taxable year (i) the increase in the redemption price of such obligation occurring between the date of acquisition of the obligation and the first day of such first taxable year and (ii), in a case where a series E bond was exchanged for such obligation, the increase in the redemption price of such series E bond occurring between the date of acquisition of such series E bond and the date of the exchange.

(3) Amount of increase in case of current income obligations. If an election is made under section 454 and the taxpayer owns, at the beginning of the first taxable year to which the election applies, a current income obligation of the character described in subparagraph (1)(iii) of this paragraph acquired prior to such taxable year, he must also include in gross income for such first taxable year the increase in the redemption price of the series E bond which was surrendered to the United States in exchange for such current income obligation; the amount of the increase is that occurring between the date of acquisition of the series E bond and the date of the exchange.

(4) Illustrations. The application of this paragraph may be illustrated by the following examples:

Example (1). Throughout the calendar year 1954, a taxpayer who uses the cash receipts and disbursements method of accounting holds series E U.S. savings bonds having a maturity value of $5,000 and a redemption value at the beginning of the year 1954 of $4,050 and at the end of the year 1954 of $4,150. He purchased the bonds on January 1, 1949, for $3,750, and holds no other obligation of the type described in this section. If the taxpayer exercises the election in his return for the calendar year 1954, he is required to include $400 in taxable income with respect to such bonds. Of this amount, $300 represents the increase in the redemption price before 1954 and $100 represents the increase in the redemption price in 1954. The increases in redemption value occurring in subsequent taxable years are includible in gross income for such taxable years.

Example (2). In 1958 B, a taxpayer who uses the cash receipts and disbursements method of accounting and the calendar year as his taxable year, purchased for $7,500 a series E United States savings bond with a face value of $10,000. In 1965, when the stated redemption value of the series E bond is $9,760, B surrenders it to the United States in exchange solely for a $10,000 series H U.S. current income savings bond in an exchange qualifying under section 1037(a), after paying $240 additional consideration. On the exchange of the series E bond for the series H bond in 1965, B realizes a gain of $2,260 ($9,760 less $7,500), none of which is recognized for that year by reason of section 1037(a). B retains the series H bond and redeems it at maturity in 1975 for $10,000, but in 1966 he exercises the election under section 454(a) in his return for that year with respect to five series E bonds he purchased in 1960. B is required to include in gross income for 1966 the increase in redemption price occurring before 1966 and in 1966 with respect to the series E bonds purchased in 1960; he is also required to include in gross income for 1966 the $2,260 increase in redemption price of the series E bond which was exchanged in 1965 for the series H bond.

(b) Short-term obligations issued on a discount basis. In the case of obligations of the United States or any of its possessions, or of a State, or Territory, or any political subdivision thereof, or of the District of Columbia, issued on a discount basis and payable without interest at a fixed maturity date not exceeding one year from the date of issue, the amount of discount at which such obligation originally sold does not accrue until the date on which such obligation is redeemed, sold, or otherwise disposed of. This rule applies regardless of the method of accounting used by the taxpayer. For examples illustrating rules for computation of income from sale or other disposition of certain obligations of the type described in this paragraph, see section 1221 and the regulations thereunder.

(c) Matured U.S. savings bonds—(1) Inclusion of increase in income upon redemption or final maturity. If a taxpayer (other than a corporation) holds—

(i) A matured series E U.S. savings bond,

(ii) An obligation of the United States, other than a current income obligation, in which he retains his investment in a matured series E U.S. savings bond, or

(iii) A nontransferable obligation (whether or not a current income obligation) of the United States for which a series E U.S. savings bond was exchanged (whether or not at final maturity) in an exchange upon which gain is not recognized because of section 1037(a) (or so much of section 1031(b) as relates to section 1037(a)),

the increase in redemption price of the series E bond in excess of the amount paid for such series E bond shall be included in the gross income of such taxpayer for the taxable year in which the obligation described in subdivision (i), (ii), or (iii) of this subparagraph is redeemed or disposed of, or finally matures, whichever is earlier, but only to the extent such increase has not previously been includible in the gross income of such taxpayer or any other taxpayer. If such obligation is partially redeemed before final maturity, or partially disposed of by being partially reissued to another owner, such increase in redemption price shall be included in the gross income of such taxpayer for such taxable year on a basis proportional to the total denomination of obligations redeemed or disposed of. The provisions of section 454(c) and of this subparagraph shall not apply in the case of any taxable year for which the taxpayer's taxable income is computed under an accrual method of accounting or for a taxable year for which an election made by the taxpayer under section 454(a) and paragraph (a) of this section applies. For rules respecting the character of the gain realized upon the disposition or redemption of an obligation described in subdivision (iii) of this subparagraph, see paragraph (b) of § 1.1037–1.

(2) Illustrations. The application of this paragraph may be illustrated by the following examples, in which it is assumed that the taxpayer uses the cash receipts and disbursements method of accounting and the calendar year as his taxable year:

Example (1). On June 1, 1941, A purchased for $375 a series E U.S. savings bond which was redeemable at maturity (10 years from issue date) for $500. At maturity of the bond, A exercised the option of retaining the matured series E bond for the 10-year extended maturity period. On June 2, 1961, A redeemed the series E bond, at which time the stated redemption value was $674.60. A never elected under section 454(a) to include the annual increase in redemption price in gross income currently. Under section 454(c), A is required to include $299.60 ($674.60 less $375) in gross income for 1961 by reason of his redemption of the bond.

Example (2). The facts are the same as in example (2) in paragraph (a)(4) of this section. On redemption of the series H bond received in the exchange qualifying under section 1037(a), B realizes a gain of $2,260, determined as provided in example (5) in paragraph (b)(4) of § 1.1037–1. None of this amount is includible in B's gross income for 1975, such amount having already been includible in his gross income for 1966 because of his election under section 454(a).

Example (3). C, who had elected under section 454(a) to include the annual increase in the redemption price of his non-interest-bearing obligations in gross income currently, owned a $1,000 series E U.S. savings bond, which was purchased on October 1, 1949, for $750, C died on February 1, 1955, when the redemption value of the bond was $820. The bond was immediately reissued to D, his only heir, who has not made an election under section 454(a). On January 15, 1960, when the redemption value of the bond is $1,000, D surrenders it to the United States in exchange solely for a $1,000 series H U.S. savings bond in an exchange qualifying under the provisions of section 1037(a). For 1960 D properly does not return any income from the exchange of bonds, although he returns the interest payments on the series H bond for the taxable years in which they are received. On September 1, 1964, prior to maturity of the series H bond, D redeems it for $1,000. For 1964, D must include $180 in gross income under section 454(c) from the redemption of the series H bond, that is, the amount of the increase in the redemption price of the series E bond ($1,000 less $820) occurring between February 1, 1955, and January 15, 1960, the period during which he owned the series E bond.

[T.D. 6500, 25 FR 11719, Nov. 26, 1960, as amended by T.D. 6935, 32 FR 15820, Nov. 17, 1967; T.D. 7154, 36 FR 24997, Dec. 28, 1971]

§ 1.455–1 Treatment of prepaid subscription income.

Effective with respect to taxable years beginning after December 31, 1957, section 455 permits certain taxpayers to elect with respect to a trade or business in connection with which prepaid subscription income is received, to include such income in gross income for the taxable years during which a liability exists to furnish or deliver a newspaper, magazine, or other periodical. If a taxpayer does not elect to treat prepaid subscription income under the provisions of section 455, such income is includible in gross income for the taxable year in which received by the taxpayer, unless under the method or practice of accounting used in computing taxable income such amount is to be properly accounted for as of a different period.

[T.D. 6591, 27 FR 1798, Feb. 27, 1962]

§ 1.455–2 Scope of election under section 455.

(a) If a taxpayer makes an election under section 455 and § 1.455–6 with respect to a trade or business, all prepaid subscription income from such trade or business shall be included in gross income for the taxable years during which the liability exists to furnish or deliver a newspaper,

magazine, or other periodical. Such election shall be applicable to all prepaid subscription income received in connection with the trade or business for which the election is made; except that the taxpayer may further elect to include in gross income for the taxable year of receipt (as described in section 455(d)(3) and paragraph (c) of § 1.455–5) the entire amount of any prepaid subscription income if the liability from which it arose is to end within 12 months after the date of receipt, hereinafter sometimes referred to as "within 12 months" election.

(b) If the taxpayer is engaged in more than one trade or business in which a liability is incurred to furnish or deliver a newspaper, magazine, or other periodical, a separate election 455 with respect to each such trade or business. In addition, a taxpayer may make a separate "within 12 months" election for each separate trade or business for which it has made an election under section 455.

(c) An election made under section 455 shall be binding for the first taxable year for which the election is made and for all subsequent taxable years, unless the taxpayer secures the consent of the Commissioner to the revocation of such election. Thus, in any case where the taxpayer has elected a method prescribed by section 455 for the inclusion of prepaid subscription income in gross income, such method of reporting income may not be changed without the prior approval of the Commissioner. In order to secure the Commissioner's consent to the revocation of such election, an application must be filed with the Commissioner in accordance with section 446(e) and the regulations thereunder. For purposes of subtitle A of the Code, the computation of taxable income under an election made under section 455 shall be treated as a method of accounting. For adjustments required by changes in method of accounting, see section 481 and the regulations thereunder.

(d) An election made under section 455 shall not apply to any prepaid subscription income received before the first taxable year to which the election applies. For example, Corporation M, which computes its taxable income under an accrual method of accounting and files its income tax returns on the calendar year basis, publishes a monthly magazine and customarily sells subscriptions on a 3-year basis. In 1958 it received $135,000 of 3-year prepaid subscription income for subscriptions beginning during 1958, and in 1959 it received $142,000 of prepaid subscription income for subscriptions beginning after December 31, 1958. In February 1959 it elected, with the consent of the Commissioner, to report its prepaid subscription income under the provisions of section 455 for the year 1959 and subsequent taxable years. The $135,000 received in 1958 from prepaid subscriptions must be included in gross income in full in that year, and no part of such 1958 income shall be allocated to the years 1959, 1960, and 1961 during which M was under a liability to deliver its magazine. The $142,000 received in 1959 from prepaid subscriptions shall be allocated to the years 1959, 1960, 1961, and 1962.

(e) No election may be made under section 455 with respect to a trade or business if, in computing taxable income, the cash receipts and disbursements method of accounting is used with respect to such trade or business. However, if the taxpayer is on a "combination" method of accounting under section 446(c)(4) and the regulations thereunder, it may elect the benefits of section 455 if it uses an accrual method of accounting for subscription income.

[T.D. 6591, 27 FR 1798, Feb. 27, 1962]

§ 1.455–3 Method of allocation.

(a) Prepaid subscription income to which section 455 applies shall be included in gross income for the taxable years during which the liability to which the income relates is discharged or is deemed to be discharged on the basis of the taxpayer's experience.

(b) For purposes of determining the period or periods over which the liability of the taxpayer extends, and for purposes of allocating prepaid subscription income to such periods, the taxpayer may aggregate similar transactions during the taxable year in any reasonable manner, provided the method of aggregation and allocation is consistently followed.

[T.D. 6591, 27 FR 1798, Feb. 27, 1962]

§ 1.455–4 Cessation of taxpayer's liability.

(a) If a taxpayer has elected to apply the provisions of section 455 to a trade or business in connection with which prepaid subscription income is received, and if its liability to furnish or deliver a newspaper, magazine, or other periodical ends for any reason, then so much of the prepaid subscription income attributable to such liability as was not includible in its gross income under section 455 for preceding taxable years shall be included in its gross income for the taxable year in which such liability ends. A taxpayer's liability may end, for example, because of the cancellation

of a subscription. See section 381(c)(4) and the regulations thereunder for the treatment of prepaid subscription income in a transaction to which section 381(a) applies.

(b) If a taxpayer who has elected to apply the provisions of section 455 to a trade or business dies or ceases to exist, then so much of the prepaid subscription income attributable to such trade or business which was not includible in its gross income under section 455 for preceding taxable years shall be included in its gross income for the taxable year in which such death or cessation of existence occurs. See section 381(c)(4) and the regulations thereunder for the treatment of prepaid subscription income in a transaction to which section 381(a) applies.

[T.D. 6591, 27 FR 1799, Feb. 27, 1962]

§ 1.455–5 Definitions and other rules.

(a) Prepaid subscription income. **(1)** The term "prepaid subscription income" means any amount includible in gross income which is received in connection with, and is directly attributable to, a liability of the taxpayer which extends beyond the close of the taxable year in which such amount is received and which is income from a newspaper, magazine, or other periodical. For example where Corporation X, a publisher of newspapers, magazines, and other periodicals makes sales on a subscription basis and the purchaser pays the subscription price in advance, prepaid subscription income would include the amounts actually received by X in connection with its liability to furnish or deliver the newspaper, magazine, or other periodical.

(2) For purposes of section 455, prepaid subscription income does not include amounts received by a taxpayer in connection with sales of subscriptions on a prepaid basis where such taxpayer does not have the liability to furnish or deliver a newspaper, magazine, or other periodical. The provisions of this subparagraph may be illustrated by the following example. Corporation D has a contract with each of several large publishers which grants it the right to sell subscriptions to their periodicals. Corporation D collects the subscription price from the subscribers, retains a portion thereof as its commission and remits the balance to the publishers. The amount retained by Corporation D represents commissions on the sale of subscriptions, and is not prepaid subscription income for purposes of section 455 since the commissions represent compensation for services rendered and are not directly attributable to a liability of Corporation D to furnish or deliver a newspaper, magazine, or other periodical.

(b) Liability. The term "liability" means a liability of the taxpayer to furnish or deliver a newspaper, magazine, or other periodical.

(c) Receipt of prepaid subscription income. For purposes of section 455, prepaid subscription income shall be treated as received during the taxable year for which it is includible in gross income under section 451, relating to general rule for taxable year of inclusion, without regard to section 455.

(d) Treatment of prepaid subscription income under an established accounting method. Notwithstanding the provisions of section 455 and § 1.455–1, any taxpayer who, for taxable years beginning before January 1, 1958, has reported prepaid subscription income for income tax purposes under an established and consistent method or practice of deferring such income may continue to report such income in accordance with such method or practice for all subsequent taxable years to which section 455 applies without making an election under section 455.

[T.D. 6591, 27 FR 1799, Feb. 27, 1962]

§ 1.455–6 Time and manner of making election.

(a) Election without consent. **(1)** A taxpayer may, without consent, elect to treat prepaid subscription income of a trade or business under section 455 for the first taxable year—

(i) Which begins after December 31, 1957, and

(ii) In which there is received prepaid subscription income from the trade or business for which the election is made. Such an election shall be made not later than the time prescribed by law for filing the income tax return for such year (including extensions thereof), and shall be made by means of a statement attached to such return.

(2) The statement shall indicate that the taxpayer is electing to apply the provisions of section 455 to his trade or business, and shall contain the following information:

(i) The name and a description of the taxpayer's trade or business to which the election is to apply;

(ii) The method of accounting used in such trade or business;

(iii) The total amount of prepaid subscription income from such trade or business for the taxable year;

(iv) The period or periods over which the liability of the taxpayer to furnish or deliver a newspaper, magazine, or other periodical extends;

(v) The amount of prepaid subscription income applicable to each such period; and

(vi) A description of the method used in allocating the prepaid subscription income to each such period.

In any case in which prepaid subscription income is received from more than one trade or business, the statement shall set forth the required information with respect to each trade or business subject to the election.

(3) See paragraph (c) of this section for additional information required to be submitted with the statement if the taxpayer also elects to include in gross income for the taxable year of receipt the entire amount of prepaid subscription income attributable to a liability which is to end within 12 months after the date of receipt.

(b) **Election with consent.** A taxpayer may, with the consent of the Commissioner, elect at any time to apply the provisions of section 455 to any trade or business in which it receives prepaid subscription income. The request for such consent shall be in writing, signed by the taxpayer or its authorized representative, and shall be addressed to the Commissioner of Internal Revenue, Attention: T:R:C, Washington, D.C. 20224. The request must be filed on or before the later of the following dates: (1) 90 days after the beginning of the first taxable year to which the election is to apply or (2) May 28, 1962, and must contain the information described in paragraph (a)(2) of this section. See paragraph (c) of this section for additional information required to be submitted with the request if the taxpayer also elects to include in gross income for the taxable year of receipt the entire amount of prepaid subscription income attributable to a liability which is to end within 12 months after the date of receipt.

(c) **"Within 12 months" election.** (1) A taxpayer who elects to apply the provisions of section 455 to any trade or business may also elect to include in gross income for the taxable year of receipt (as described in section 455(d)(3) and paragraph (c) of § 1.455–5) the entire amount of any prepaid subscription income from such trade or business if the liability from which it arose is to end within 12 months after the date of receipt. Any such election is binding for the first taxable year for which it is effective and for all subsequent taxable years, unless the taxpayer secures permission from the Commissioner to treat such income differently. Application to revoke or change a "within 12 months" election shall be made in accordance with the provisions of section 446(e) and the regulations thereunder.

(2) The "within 12 months" election shall be made by including in the statement required by paragraph (a) of this section or the request described in paragraph (b) of this section, whichever is applicable, a declaration that the taxpayer elects to include such income in gross income in the taxable year of receipt, and the amount of such income. If the taxpayer is engaged in more than one trade or business for which the election under section 455 is made, it must include, in such statement or request, a declaration for each trade or business for which it makes the "within 12 months" election. See also paragraph (e) of § 1.455–2.

(3) If the taxpayer does not make the "within 12 months" election for its trade or business at the time prescribed for making the election to include prepaid subscription income in gross income for the taxable years during which its liability to furnish or deliver a newspaper, magazine, or other periodical exists for such trade or business, but later wishes to make such election, it must apply for permission from the Commissioner. Such application shall be made in accordance with the provisions of section 446(e) and the regulations thereunder.

[T.D. 6591, 27 FR 1799, Feb. 27, 1962]

§ 1.456–1 Treatment of prepaid dues income.

Effective for taxable years beginning after December 31, 1960, a taxpayer which is a membership organization (as described in paragraph (c) of § 1.456–5) and which receives prepaid dues income as described in paragraph (a) of § 1.456–5 in connection with its trade or business of rendering services or making available membership privileges may elect under section 456 to include such income in gross income ratably over the taxable years during which its liability (as described in paragraph (b) of § 1.456–5) to render such services or extend such privileges exists, if such liability does not extend over a period of time in excess of 36 months. If the taxpayer does not elect to treat prepaid dues income under section 456, or if such income may not be reported under section 456, as for example, where the income relates to a liability to render services or make available membership privileges which extends beyond 36 months, then such income is includible in gross income for the

taxable year in which it is received (as described in paragraph (d) of § 1.456–5).

[T.D. 6937, 32 FR 16394, Nov. 30, 1967]

§ 1.456–2 Scope of election under section 456.

(a) An election made under section 456 and § 1.456–6, shall be applicable to all prepaid dues income received in connection with the trade or business for which the election is made. However, the taxpayer may further elect to include in gross income for the taxable year of receipt the entire amount of any prepaid dues income attributable to a liability extending beyond the close of the taxable year but ending within 12 months after the date of receipt, hereinafter referred to as the "within 12 months" election.

(b) If the taxpayer is engaged in more than one trade or business in connection with which prepaid dues income is received, a separate election may be made under section 456 with respect to each such trade or business. In addition, a taxpayer may make a separate "within 12 months" election for each separate trade or business for which it has made an election under section 456.

(c) A section 456 election and a "within 12 months" election shall be binding for the first taxable year for which the election is made and for all subsequent taxable years, unless the taxpayer secures the consent of the Commissioner to the revocation of either election. In order to secure the Commissioner's consent to the revocation of the section 456 election or the "within 12 months" election, an application must be filed with the Commissioner in accordance with section 446(e) and the regulations thereunder. However, an application for consent to revoke the section 456 election or the "within 12 months" election in the case of all taxable years which end before November 30, 1967 must be filed on or before February 28, 1968. For purposes of Subtitle A of the Code, the computation of taxable income under an election made under section 456 or under the "within 12 months" election shall be treated as a method of accounting. For adjustments required by changes in method of accounting, see section 481 and the regulations thereunder.

(d) Except as provided in section 456(d) and § 1.456–7, an election made under section 456 shall not apply to any prepaid dues income received before the first taxable year to which the election applies. For example, Corporation X, a membership organization which files its income tax returns on a calendar year basis, customarily sells 3-year memberships, payable in advance. In 1961 it received $160,000 of prepaid dues income for 3-year memberships beginning during 1961, and in 1962 it received $185,000 of prepaid dues income for 3-year memberships beginning on January 1, 1962. In March 1962 it elected, with the consent of the Commissioner, to report its prepaid dues income under the provisions of section 456 for the year 1962 and subsequent taxable years. The $160,000 received in 1961 from prepaid dues must be included in gross income in full in that year, and except as provided in section 456(d) and § 1.456–7, no part of such income shall be allocated to the taxable years 1962, 1963, and 1964 during which X was under a liability to make available its membership privileges. The $185,000 received in 1962 from prepaid dues income shall be allocated to the years 1962, 1963, and 1964.

(e) No election may be made under section 456 with respect to a trade or business if, in computing taxable income, the cash receipts and disbursements method (or a hybrid thereof) of accounting is used with respect to such trade or business, unless the combination of the section 456 election and the taxpayer's hybrid method of accounting does not result in a material distortion of income.

[T.D. 6937, 32 FR 16394, Nov. 30, 1967; 32 FR 17479, Dec. 6, 1967]

§ 1.456–3 Method of allocation.

(a) Prepaid dues income for which an election has been made under section 456 shall be included in gross income over the period of time during which the liability to render services or make available membership privileges exists. The liability to render the services or make available the membership privileges shall be deemed to exist ratably over the period of time such services are required to be rendered, or such membership privileges are required to be made available. Thus, the prepaid dues income shall be included in gross income ratably over the period of the membership contract. For example, Corporation X, a membership organization, which files its income tax returns on a calendar year basis, elects, for its taxable year beginning January 1, 1961, to report its prepaid dues income in accordance with the provisions of section 456. On March 31, 1961, it sells a 2-year membership for $48 payable in advance, the membership to extend from May 1, 1961, to April 30, 1963. X shall include in its gross income for the taxable year 1961 $\frac{8}{24}$ of the $48, or $16, and for the taxable year 1962 $\frac{12}{24}$ of the $48, or $24, and for the taxable year 1963 $\frac{4}{24}$ of the $48, or $8.

(b) For purposes of determining the period or periods over which the liability of the taxpayer exists, and for purposes of allocating prepaid dues income to such periods, the taxpayer may aggregate similar transactions during the taxable year in any reasonable manner, provided the method of aggregation and allocation is consistently followed.
[T.D. 6937, 32 FR 16395, Nov. 30, 1967]

§ 1.456–4 Cessation of liability or existence.

(a) If a taxpayer has elected to apply the provisions of section 456 to a trade or business in connection with which prepaid dues income is received, and if the taxpayer's liability to render services or make available membership privileges ends for any reason, as for example, because of the cancellation of a membership then so much of the prepaid dues income attributable to such liability as was not includible in the taxpayer's gross income under section 456 for preceding taxable years shall be included in gross income for the taxable year in which such liability ends. This paragraph shall not apply to amounts includible in gross income under § 1.456–7.

(b) If a taxpayer which has elected to apply the provisions of section 456 ceases to exist, then the prepaid dues income which was not includible in gross income under section 456 for preceding taxable years shall be included in the taxpayer's gross income for the taxable year in which such cessation of existence occurs. This paragraph shall not apply to amounts includible in gross income under § 1.456–7.

(c) If a taxpayer is a party to a transaction to which section 381(a) applies and the taxpayer's method of accounting with respect to prepaid dues income is used by the acquiring corporation under the provisions of section 381(c)(4), then neither the liability nor the existence of the taxpayer shall be deemed to have ended or ceased. In such cases see section 381(c)(4) and the regulations thereunder for the treatment of the portion of prepaid dues income which was not included in gross income under section 456 for preceding taxable years.
[T.D. 6937, 32 FR 16395, Nov. 30, 1967]

§ 1.456–5 Definitions and other rules.

(a) **Prepaid dues income.** (1) The term "prepaid dues income" means any amount for membership dues includible in gross income which is received by a membership organization in connection with, and is directly attributable to, a liability of the taxpayer to render services or make available membership privileges over a period of time which extends beyond the close of the taxable year in which such amount is received.

(2) For purposes of section 456, prepaid dues income does not include amounts received by a taxpayer in connection with sales of memberships on a prepaid basis where the taxpayer does not have the liability to furnish the services or make available the membership privileges. For example, where a taxpayer has a contract with several membership organizations to sell memberships in such organizations and retains a portion of the amounts received from the sale of such memberships and remits the balance to the membership organizations, the amounts retained by such taxpayer represent commissions and do not constitute prepaid dues income for purposes of section 456.

(b) **Liability.** The term "liability" means a liability of the taxpayer to render services or make available membership privileges over a period of time which does not exceed 36 months. Thus, if during the taxable year a taxpayer sells memberships for more than 36 months and also memberships for 36 months or less, section 456 does not apply to the income from the sale of memberships for more than 36 months. For the purpose of determining the duration of a liability, a bona fide renewal of a membership shall not be considered to be a part of the existing membership.

(c) **Membership organization.** (1) The term "membership organization" means a corporation, association, federation, or other similar organization meeting the following requirements:

(i) It is organized without capital stock of any kind.

(ii) Its charter, bylaws, or other written agreement or contract expressly prohibits the distribution of any part of the net earnings directly or indirectly, in money, property, or services, to any member, and

(iii) No part of the net earnings of which is in fact distributed to any member either directly or indirectly, in money, property, or services.

(2) For purposes of this paragraph an increase in services or reduction in dues to all members shall generally not be considered distributions of net earnings.

(3) If a corporation, association, federation, or other similar organization subsequent to the time it elects to report its prepaid dues income in accordance with the provisions of section 456, (i)

issues any kind of capital stock either to any member or nonmember, (ii) amends its charter, bylaws, or other written agreement or contract to permit distributions of its net earnings to any member or, (iii) in fact, distributes any part of its net earnings either in money, property, or services to any member, then immediately after such event the organization shall not be considered a membership organization within the meaning of section 456(e)(3).

(d) Receipt of prepaid dues income. For purposes of section 456, prepaid dues income shall be treated as received during the taxable year for which it is includible in gross income under section 451, relating to the general rule for taxable year of inclusion, without regard to section 456.
[T.D. 6937, 32 FR 16395, Nov. 30, 1967]

§ 1.456–6 Time and manner of making election.

(a) Election without consent. A taxpayer may make an election under section 456 without the consent of the Commissioner for the first taxable year beginning after December 31, 1960, in which it receives prepaid dues income in the trade or business for which such election is made. The election must be made not later than the time prescribed by law for filing the income tax return for such year (including extensions thereof). The election must be made by means of a statement attached to such return. In addition, there should be attached a copy of a typical membership contract used by the organization and a copy of its charter, bylaws, or other written agreement or contract of organization or association. The statement shall indicate that the taxpayer is electing to apply the provisions of section 456 to the trade or business, and shall contain the following information:

(1) The taxpayer's name and a description of the trade or business to which the election is to apply.

(2) The method of accounting used for prepaid dues income in the trade or business during the first taxable year for which the election is to be effective and during each of 3 preceding taxable years, and if there was a change in the method of accounting for prepaid dues income during such 3-year period, a detailed explanation of such change including the adjustments necessary to prevent duplications or omissions of income.

(3) Whether any type of deferral method for prepaid dues income has been used during any of the 3 taxable years preceding the first taxable year for which the election is effective. Where any type of such deferral method has been used during this period, an explanation of the method and a schedule showing the amounts received in each such year and the amounts deferred to each succeeding year.

(4) A schedule with appropriate explanations showing:

(i) The total amount of prepaid dues income received in the trade or business in the first taxable year for which the election is effective and the amount of such income to be included in each taxable year in accordance with the election,

(ii) The total amount, if any, of prepayments of dues received in the first taxable year for which the election is effective which are directly attributable to a liability of the taxpayer to render services or make available membership privileges over a period of time in excess of 36 months, and

(iii) The total amount, if any, of prepaid dues income received in the trade or business in—

(a) The taxable year preceding the first taxable year for which the election is effective if all memberships sold by the taxpayer are for periods of 1 year or less,

(b) Each of the 2 taxable years preceding the first taxable year for which the election is effective if any memberships are sold for periods in excess of 1 year but none are sold for periods in excess of 2 years, or

(c) Each of the 3 taxable years preceding the first taxable year for which the election is effective if any memberships are sold for periods in excess of 2 years.

In each case there shall be set forth the amount of such income which would have been includible in each taxable year had the election been effective for the years for which the information is required.

In any case in which prepaid dues income is received from more than one trade or business, the statement shall set forth separately the required information with respect to each trade or business for which the election is made. See paragraph (c) of this section for additional information required to be submitted with the statement if the taxpayer also elects to include in gross income for the taxable year of receipt the entire amount of prepaid dues income attributable to a liability which is to end within 12 months after the date of receipt.

(b) Election with consent. A taxpayer may elect with the consent of the Commissioner, to apply the provisions of section 456 to any trade or business in which it receives prepaid dues income. The request for such consent shall be in writing, signed by the taxpayer or its authorized representative, and shall be addressed to the Commissioner of Internal Revenue, Washington, D.C. 20224. The request must be filed on or before the later of the following dates: (1) 90 days after the beginning of the first taxable year to which the election is to apply, or (2) February 28, 1968 and should contain the information described in paragraph (a) of this section. See paragraph (c) of this section for additional information required to be submitted with the request if the taxpayer also elects to include in gross income for the taxable year of receipt the entire amount of prepaid dues income attributable to a liability which is to end within 12 months after the date of receipt.

(c) "Within 12 months" election. **(1)** The "within 12 months" election shall be made by including in the statement required by paragraph (a) of this section or the request described in paragraph (b) of this section, whichever is applicable, a declaration that the taxpayer elects to include such income in gross income in the taxable year of receipt, and the amount of such income for each taxable year to which the election is to apply which has ended prior to the time such statement or request is filed. If the taxpayer is engaged in more than one trade or business for which the election under section 456 is made, it must include, in such statement or request, a declaration for each trade or business for which it wishes to make the "within 12 months" election.

(2) If the taxpayer does not make the "within 12 months" election for a trade or business at the time it makes the election under paragraph (a) or (b) of this section, but later wishes to make such election, it must apply for permission from the Commissioner. Such application shall be made in accordance with the provisions of section 446(e).

[T.D. 6937, 32 FR 16395, Nov. 30, 1967; 32 FR 17479, Dec. 6, 1967]

§ 1.456–7 Transitional rule.

(a) Under section 456(d)(1), a taxpayer making an election under section 456 shall include in its gross income for the first taxable year to which the election applies and for each of the 2 succeeding taxable years not only that portion of prepaid dues income which is includible in gross income for each such taxable year under section 456(a), but also an additional amount equal to that portion of the total prepaid dues income received in each of the 3 taxable years preceding the first taxable year to which the election applies which would have been includible in gross income for such first taxable year and such 2 succeeding taxable years had the election under section 456 been effective during such 3 preceding taxable years. In computing such additional amounts—

(1) In the case of taxpayers who did not include in gross income for the taxable year preceding the first taxable year for which the election is effective, that portion of the prepaid dues income received in such year attributable to a liability which is to end within 12 months after the date of receipt, no effect shall be given to a "within 12 months" election made under paragraph (c) of § 1.456–6, and

(2) There shall be taken into account only prepaid dues income arising from a trade or business with respect to which an election is made under section 456 and § 1.456–6.

Section 481 and the regulations thereunder shall have no application to the additional amounts includible in gross income under section 456(d) and this section, but section 481 and the regulations thereunder shall apply to prevent other amounts from being duplicated or omitted.

(b) A taxpayer who makes an election with respect to prepaid dues income, and who includes in gross income for any taxable year to which the election applies an additional amount computed under section 456(d)(1) and paragraph (a) of this section, shall be permitted under section 456(d)(2) to deduct for such taxable year and for each of the 4 succeeding taxable years an amount equal to one-fifth of such additional amount, but only to the extent that such additional amount was also included in the taxpayer's gross income for any of the 3 taxable years preceding the first taxable year to which such election applies. The taxpayer shall maintain books and records in sufficient detail to enable the district director to determine upon audit that the additional amounts were included in the taxpayer's gross income for any of the 3 taxable years preceding such first taxable year. If, however, the taxpayer ceases to exist, as described in paragraph (b) of § 1.456–4, and there is included in gross income, under such paragraph, of the year of cessation the entire portion of prepaid dues income not previously includible in gross income under section 456 for preceding taxable years (other than for amounts received prior to the first year for which an election was made), all the amounts not previously deducted under this paragraph shall

be permitted as a deduction in the year of cessation of existence.

(c) The provisions of this section may be illustrated by the following example:

Example. (1) Assume that X Corporation, a membership organization qualified to make the election under section 456, elects to report its prepaid dues income in accordance with the provisions of section 456 for its taxable year ending December 31, 1961. Assume further that X Corporation receives in the middle of each taxable year $3,000 of prepaid dues income in connection with a liability to render services over a 3-year period beginning with the date of receipt. Under section 456(a), X Corporation will report income received in 1961 and subsequent years as follows:

Year of receipt	Total receipts	1961	1962	1963	1964	1965	1966	1967	1968
1961	$3,000	$500	$1,000	$1,000	$500	.....	.....	.....	.....
1962	3,000	.....	500	1,000	1,000	$500	.....	.....	.....
1963	3,000	.....	.....	500	1,000	1,000	$500	.....	.....
1964	3,000	.....	.....	.....	500	1,000	1,000	$500	.....
1965	3,000	.....	.....	.....	.....	500	1,000	1,000	$500
1966	3,000	.....	.....	.....	.....	.....	500	1,000	1,000
1967	3,000	.....	.....	.....	.....	.....	.....	500	1,000
1968	3,000	.....	.....	.....	.....	.....	.....	.....	500
Total reportable under section 456(a)		500	1,500	2,500	3,000	3,000	3,000	3,000	3,000

(2) Under section 456(d)(1), X Corporation must include in its gross income for the first taxable year to which the election applies and for each of the 2 succeeding taxable years, the amounts which would have been included in those years had the election been effective 3 years earlier. If the election had been effective in 1958, the following amounts received in 1958, 1959, and 1960 would have been reported in 1961 and subsequent years:

Year of receipt	Amount received	Years of including additional amounts		
		1961	1962	1963
1958	$3,000	$500	......	......
1959	3,000	1,000	$500	......
1960	3,000	1,000	1,000	$500
Total additional amounts to be included under section 456(d)(1)	2,500	1,500	500	

(3) Having included the additional amounts as required by section 456(d)(1), and assuming such amounts were actually included in gross income in the 3 taxable years preceding the first taxable year for which the election is effective, X Corporation is entitled to deduct under section 456(d)(2) in the year of inclusion and in each of the succeeding 4 years an amount equal to one-fifth of the amounts included, as follows:

Year of inclusion	Amount	Years of deduction						
		1961	1962	1963	1964	1965	1966	1967
1961	$2,500	$500	$500	$500	$500	$500	....	....
1962	1,500	....	300	300	300	300	$300	....
1963	500	....	....	100	100	100	100	$10
Total amount deductible under section 456(d)(2)	500	800	900	900	900	400	100	

(4) The net result of the inclusions under section 456(d)(1) and the deductions under section 456(d)(2) may be summarized as follows:

	1961	1962	1963	1964	1965	1966	1967	1968
Amount includible under section 456(a)	$500	$1,500	$2,500	$3,000	$3,000	$3,000	$3,000	$3,000
Amount includible under section 456(d)(1)	2,500	1,500	500	......	......	......	......	......
Total	3,000	3,000	3,000	3,000	3,000	3,000	3,000	3,000
Amount deductible under section 456(d)(2)	500	800	900	900	900	400	100	......
Net amount reportable under section 456	2,500	2,200	2,100	2,100	2,100	2,600	2,900	3,000

[T.D. 6937, 32 FR 16396, Nov. 30, 1967]

§ 1.457–1 Compensation deferred under eligible State deferred compensation plans.

(a) Year of inclusion in gross income—(1) In general. For taxable years beginning after December 31, 1978, section 457(a) provides that amounts deferred (within the meaning of § 1.457–1(d)(3)) under an eligible State deferred compensation plan that satisfies the requirements of § 1.457–2 (an "eligible plan") are includible in gross income only for the taxable year in which paid or otherwise made available to the participant or beneficiary under the plan.

(2) Maximum deferral; in general. Under section 457(c)(1), the exclusion from gross income described in this paragraph (a) does not apply to compensation deferred under one or more eligible plans to the extent that the compensation so deferred during a participant's taxable year exceeds the greater of—

(i) $7,500, or,

(ii) As applicable, the sum of the plan ceilings determined under § 1.457–2(f), to the extent such sum does not exceed $15,000.

(3) Maximum deferral; exclusions under section 403(b) taken into account. Under section 457(c)(2), for a participant's taxable year for which an amount is contributed to an annuity contract described in section 403(b) (including a custodial account described in section 403(b)(7)) on behalf of the participant, subparagraph (2) of this paragraph (a) is applied by substituting—

(i) For $7,500, an amount equal to $7,500, less the amount excludable from the participant's gross income under section 403(b) for the taxable year,

(ii) For the sum of the plan ceilings determined under § 1.457–2(f), an amount equal to the sum of the plan ceilings determined under § 1.457–2(f), less the amount excludable from the participant's gross income under section 403(b) for the taxable year, if such amount is not taken into account under such § 1.457–2(f), and

(iii) For $15,000, an amount equal to $15,000, less the amount excludable from the participant's gross income under section 403(b) for the taxable year.

(b) Amounts made available to participant or beneficiary—(1) In general. For purposes of section 457(a) and this section, amounts deferred under an eligible plan will not be considered made available to the participant or beneficiary if under the plan the participant or beneficiary may irrevocably elect, prior to the time any such amounts become payable, to defer payment of some or all of such amounts to a fixed or determinable future time. In addition, amounts deferred (including amounts previously deferred) under an eligible plan will not be considered made available to the participant solely because the participant is permitted to choose among various investment modes under the plan for the investment of such amounts whether before or after payments have commenced under the plan.

(2) Examples. Further examples of when amounts deferred will or will not be considered as being made available to the participant or beneficiary are provided below:

Example (1). (i) C, an individual, is a participant in an eligible State deferred compensation plan that provides the following:

(A) The total of the amounts deferred under the plan is payable to the participant in 120 substantially equal monthly installments commencing on the date 30 days after the participant attains normal retirement age under the plan (age 65), unless the participant elects, within the 90 day period ending on the date the participant attains normal retirement age, to receive a single sum payment of the deferred amounts. The single sum payment is payable to a participant on the date the first of the monthly payment would otherwise be payable to the participant.

(B) If a participant separates from the service of the State before attaining normal retirement age, the total of the amounts deferred under the plan is payable to the participant in a single sum payment on the date 90 days after the date of the separation, unless, before the date 30 days after the separation, the participant elects not to receive the single sum payment. The election is irrevocable. If the participant makes the election, the total of the amounts deferred under the plan is payable to the participant as described in (A), either in monthly installments or, at the election of the participant, in a single sum payment.

(ii) On June 6, 1982, C, a calendar year taxpayer aged 59, separates from the service of the State. On June 18, 1982, C elects not to receive the single sum payment payable on account of the separation. Because of C's election, no amount deferred under the plan is considered made available in 1982 by reason of C's right to receive the single sum payment.

(iii) On February 6, 1988, C attains age 65. C did not, within the 90 day period elect the single sum payment that is payable in lieu of the monthly installments. Amounts deferred under the plan are includible in C's gross income as they are paid to C in the monthly installments. No amount is considered made available by reason of C's right to elect the single sum payment.

Example (2). Assume the same facts as in example (1), except that the plan provides that notwithstanding that monthly installments have commenced under the plan, as described in (i)(A), the participant may, without restriction, elect to receive all or any portion of the amount remaining payable to the participant. The total of the amounts deferred under the plan is considered made available in 1988.

Example (3). Assume the same facts as in example (1), except that the plan provides that once monthly installment payments have commenced under the plan, as described in

(i)(A), the participant may accelerate the payment of the amount remaining payable to the participant upon the occurrence of an unforeseeable emergency as described in § 1.457–2(h)(4) in an amount not exceeding that described in § 1.457–2(h)(5). No amount is considered made available to C on account of C's right to accelerate payments upon the occurrence of an unforeseeable emergency.

Example (4). Under an eligible plan of which individual D is a participant, normal retirement age is age 65 at which time payments must begin. Payments may begin earlier upon a separation from the service. Under the plan, a participant who separates from the service before age 65 or the participant's beneficiary (if the separation is due to the participant's death) may elect to defer the distribution of the amounts deferred until the year in which the participant attains or would have attained age 65. This election may be made only prior to the time any payments commence and once made may not be revoked. If such an election is made, the participant, former participant, or beneficiary need not elect the method of payment, or if one is elected may change the method elected, until the date 30 days preceding the date upon which payments are to commence. No amount is considered made available by reason of D's right to defer the distribution of the amounts deferred until age 65, nor on account of D's right to delay the election of the method of payout. Similarly, if D dies at age 60, no amount is considered made available to D's beneficiary by reason of the beneficiary's right to defer the distribution of the amounts deferred until the year in which D would have attained age 65, nor on account of the beneficiary's right to delay the election of the method of payout.

Example (5). Under an eligible plan of which individual E is a participant, the maximum that may be deferred in any taxable year is 33⅓% of includible compensation, not to exceed $7,500. The plan does not provide for a catch-up deferral under section 457(b)(3). In one taxable year, E elects to have amounts deferred in excess of the limitation provided for under the plan. The amounts deferred in excess of the limitation will be considered to have been made available to E in the taxable year in which deferred.

Example (6). Assume the same facts as in example (5), except that E's employer also contributes amounts for the purchase of an annuity contract under section 403(b). In one taxable year, E has amounts contributed for the annuity within the limitations of section 403(b)(2), and also has amounts deferred under the eligible plan for the same year. The aggregate of the amounts contributed for the annuity contract and the amounts deferred under the plan exceed the deferral limitations under the plan. The excess deferrals will be considered made available to E in the year in which the amounts were deferred.

Example (7). Under an eligible plan of which F is a participant, amounts deferred have been invested in a money market investment fund. The plan then transfers the amounts deferred to a life insurance company for the purchase of life insurance contracts as an investment medium. However, the entity sponsoring the plan (1) retains all of the incidents of ownership of the contracts, (2) is the sole beneficiary under the contracts, and (3) is under no obligation to transfer the contracts or to pass through the proceeds of the contracts to any participant or a beneficiary of any participant. The movement of the amounts deferred to the life insurance company (whether or not made at the request of any plan participant) will not be considered to make the amounts available to the plan's participants. The cost of current life insurance protection under the life insurance contracts will not be considered made available to the plan's participants.

(c) Life insurance proceeds and death benefits paid under eligible plan. No amount received or made available under an eligible plan is excludable from gross income under section 101(a) (relating to life insurance contracts) or section 101(b) (relating to employees' death benefits).

(d) Definitions. For purposes of §§ 1.457–1 through 1.457–4:

(1) Participant. "Participant" means an individual who is eligible under § 1.457–2(d) to defer compensation under the plan.

(2) Beneficiary. "Beneficiary" means a beneficiary of a participant, a participant's estate, or any other person whose interest in the plan is derived from the participant.

(3) Amounts deferred. "Amount(s) deferred" under an eligible plan means compensation deferred under the plan, plus income attributable to compensation so deferred. Income attributable to compensation deferred under an eligible plan includes gain from the disposition of property. The term "amounts deferred" includes amounts deferred in taxable years beginning before January 1, 1979, if such amounts were deferred under a plan described in § 1.457–2(b), and such amounts were made a part of an eligible plan.

[T.D. 7836, 47 FR 42337, Sept. 27, 1982]

§ 1.457–2 Eligible State deferred compensation plan defined.

(a) In general. For purposes of §§ 1.457–1 through 1.457–4, an "eligible State deferred compensation plan" (sometimes referred to as "eligible plan") is a plan satisfying the requirements of paragraphs (c) through (k) of this section.

(b) Plan. For purposes of this section and § 1.457–3, the term "plan" includes any agreement or arrangement between a State (within the meaning of paragraph (c) of this section) and a participant or participants, under which the payment of compensation is deferred, but only if such agreement or arrangement is not described in § 1.457–3(b).

(c) State. The plan must be established and maintained by a State. For this purpose, the term "State" includes:

(1) The 50 states of the United States and the District of Columbia;

(2) A political subdivision of a State;

(3) Any agency or instrumentality of a State or political subdivision of a State;

(4) An organization that is exempt from tax under section 501(a) and engaged primarily in providing electrical service on a mutual or cooperative basis; and

(5) An organization that is described in section 501(c)(4) or (6) and exempt from tax under section 501(a) and at least 80% of the members of which are organizations described in subparagraph (4). Where it appears in this § 1.457–2, the term "State" means the entity described in this paragraph (c) that sponsors the plan.

(d) **Participants.** The plan must provide that only individuals who perform services for the State, either as an employee of the State or as an independent contractor, may defer compensation under the plan.

(e) **Maximum deferrals—(1) In general.** The plan must provide that the amount of compensation that may be deferred under the plan for a taxable year of a participant shall not exceed an amount specified in the plan (the "plan ceiling"). Except as described in paragraph (f) of this section, a plan ceiling shall not exceed the lesser of:

(i) $7,500, or

(ii) 33⅓% of the participant's includible compensation for the taxable year, reduced by any amount excludable from the participant's gross income for the taxable year under section 403(b) on account of contributions made by the State.

(2) **Includible compensation.** For purposes of this section, a participant's includible compensation for a taxable year includes only compensation from the State that is attributable to services performed for the State and that is includible in the participant's gross income for the taxable year. Accordingly, a participant's includible compensation for a taxable year does not include an amount payable by the State that is excludable from the employee's gross income under section 457(a) and § 1.457–1 or under section 403(b) (relating to annuity contracts purchased by section 501(c)(3) organizations or public schools), section 105(d) (relating to wage continuation plans) or section 911 (relating to citizens or residents of the United States living abroad). A participant's includible compensation for a taxable year is determined without regard to any community property laws.

(3) **Compensation taken into account at its present value.** For purposes of subparagraph (1) of this paragraph, compensation deferred under a plan shall be taken into account at its value in the plan year in which deferred. However, if the compensation deferred is subject to a substantial risk of forfeiture (as defined in section 457(e)(3)), such compensation shall be taken into account at its value in the plan year in which such compensation is no longer subject to a substantial risk of forfeiture.

(f) **Limited catch-up—(1) In general.** The plan may provide that, for 1 or more of the participant's last 3 taxable years ending before the participant attains normal retirement age, the plan ceiling is an amount not in excess of the lesser of:

(i) $15,000, reduced by any amount excludable from the participant's gross income for the taxable year under section 403(b) on account of contributions made by the State, or

(ii) The amount determined under subparagraph (2) of this paragraph.

(2) **Underutilized limitations.** The amount determined under this subparagraph (2) is the sum of:

(i) The plan ceiling established under paragraph (e)(1) of this section for the taxable year, plus

(ii) The plan ceiling established under paragraph (e)(1) of this section for any prior taxable year or years, less the amount of compensation deferred under the plan for such prior taxable year or years.

A prior taxable year shall be taken into account under subdivision (ii) of this subparagraph (2) only if (A) it begins after December 31, 1978, (B) the participant was eligible to participate in the plan during all or any portion of the taxable year, and (C) compensation deferred (if any) under the plan during the taxable year was subject to a plan ceiling established under paragraph (e)(1) of this section. A participant will be considered eligible to participate in the plan for a taxable year if the participant is described in paragraph (d) of this section for any part of that taxable year. A prior taxable year includes a taxable year in which the participant was eligible to participate in an eligible plan sponsored by a different entity, provided that the entities sponsoring the plans are located within the same State as that term is used in § 1.457–2(c)(1).

(3) **Restriction on limited catch-up.** The plan shall not provide that a participant may elect to have the limited catch-up provision of this paragraph (f) apply more than once, whether or not the limited catch-up is utilized in less than all of the three taxable years ending before the participant attains normal retirement age, and whether or not the participant or former participant rejoins

the plan or participates in another eligible plan after retirement. For example, if the participant elects to utilize the limited catch-up only for the one taxable year ending before normal retirement age, and, after retirement at that age, the participant renders services for the State as an independent contractor or otherwise, the plan may not provide that the participant may utilize the limited catch-up for any of the taxable years subsequent to retirement.

(4) Normal retirement age. For purposes of this paragraph (f), normal retirement age may be specified in the plan. If no normal retirement age is specified in the plan, then the normal retirement age is the later of the latest normal retirement age specified in the basic pension plan of the State, or age 65. A plan may define normal retirement age as any range of ages ending no later than age 70½ and beginning no earlier than the earliest age at which the participant has the right to retire under the State's basic pension plan without consent of the State and to receive immediate retirement benefits without actuarial or similar reduction because of retirement before some later specified age in the State's basic pension plan. The plan may further provide that in the case of a participant who continues to work beyond the ages specified in the preceding two sentences, the normal retirement age shall be that date or age designated by the participant, but such date or age shall not be later than the mandatory retirement age provided by the State, or the date or age at which the participant separates from the service with the State.

(g) Agreement for deferral. The plan must provide that, in general, compensation is to be deferred for any calendar month only if an agreement providing for such deferral has been entered into before the first day of the month. However, a plan may provide that, with respect to a new employee, compensation is to be deferred for the calendar month during which the participant first becomes an employee, if an agreement providing for such deferral is entered into on or before the first day on which the participant becomes an employee.

(h) Payments under the plan—(1) In general. The plan may not provide that amounts payable under the plan will be paid or made available to a participant or beneficiary before the participant separates from service with the State, or, if the plan provides for payment in the case of an unforeseeable emergency, before the participant incurs an unforeseeable emergency.

(2) Separation from service; general rule. An employee is separated from service with the State if there is a separation from the service within the meaning of section 402(e)(4)(A)(iii), relating to lump sum distributions, and on account of the participant's death or retirement.

(3) Separation from service; independent contractor—(i) In general. An independent contractor is considered separated from service with the State upon the expiration of the contract (or in the case of more than one contract, all contracts) under which services are performed for the State, if the expiration constitutes a good-faith and complete termination of the contractual relationship. An expiration will not constitute a good faith and complete termination of the contractual relationship if the State anticipates a renewal of a contractual relationship or the independent contractor becoming an employee. For this purpose, a State is considered to anticipate the renewal of the contractual relationship with an independent contractor if it intends to again contract for the services provided under the expired contract, and neither the State nor the independent contractor has eliminated the independent contractor as a possible provider of services under any such new contract. Further, a State is considered to intend to again contract for the services provided under an expired contract, if the State's doing so is conditioned only upon the State's incurring a need for the services, or the availability of funds or both.

(ii) Special rule. Notwithstanding subdivision (i), if, with respect to amounts payable to a participant who is an independent contractor, a plan provides that—

(A) No amount shall be paid to the participant before a date at least 12 months after the day on which the contract expires under which services are performed for the State (or, in the case of more than one contract, all such contracts expire), and

(B) No amount payable to the participant on that date shall be paid to the participant if, after the expiration of the contract (or contracts) and before that date, the participant performs services for the State as an independent contractor or an employee,

the plan is considered to satisfy the requirement described in subparagraph (1) that no amounts payable under the plan will be paid or made available to the participant before the participant separates from service with the State.

(4) Unforeseeable emergency. For purposes of this paragraph (h), an unforeseeable emergency is,

and if the plan provides for payment in the case of an unforeseeable emergency must be defined in the plan as, severe financial hardship to the participant resulting from a sudden and unexpected illness or accident of the participant or of a dependent (as defined in section 152(a)) of the participant, loss of the participant's property due to casualty, or other similar extraordinary and unforeseeable circumstances arising as a result of events beyond the control of the participant. The circumstances that will constitute an unforeseeable emergency will depend upon the facts of each case, but, in any case, payment may not be made to the extent that such hardship is or may be relieved—

(i) Through reimbursement or compensation by insurance or otherwise,

(ii) By liquidation of the participant's assets, to the extent the liquidation of such assets would not itself cause severe financial hardship, or

(iii) By cessation of deferrals under the plan.

Examples of what are not considered to be unforeseeable emergencies include the need to send a participant's child to college or the desire to purchase a home.

(5) Emergency withdrawals. Withdrawals of amounts because of an unforeseeable emergency must only be permitted to the extent reasonably needed to satisfy the emergency need.

(i) Distributions of deferrals—(1) Commencement of distributions. A plan is not an eligible plan unless under the plan the payment of amounts deferred will commence not later than the later of—

(i) 60 days after the close of the plan year in which the participant or former participant attains (or would have attained) normal retirement age (within the meaning of § 1.457–2(f)(4)), or

(ii) 60 days after the close of the plan year in which the participant separates from service (within the meaning of §§ 1.457–2(h)(2) and (3)) with the State.

A plan is not other than an eligible plan merely because, prior to October 27, 1982, the distribution of amounts deferred under the plan may commence no later than the close of the participant's taxable year in which the participant attains age 70½.

(2) Limitations on distributions. Distributions must be made primarily for the benefit of participants (or former participants). Thus, the schedule selected by the participant for payments of benefits under the plan must be such that benefits payable to a beneficiary are not more than incidental. For example, if provision is made for payment of a portion of the amounts deferred to a beneficiary, the amounts payable to the participant or former participant (as determined by use of the expected return multiples in § 1.72–9, or, in the case of payments under a contract issued by an insurance company, by use of the mortality tables of such company), must exceed one-half of the maximum that could have been payable to the participant if no provision were made for payment to a beneficiary.

(3) Distributions to beneficiaries. A plan is not an eligible plan unless the plan provides that, if the participant dies before the entire amount deferred is paid to the participant, the entire amount deferred (or the remaining part of such deferrals if payment thereof has commenced) must be paid to a beneficiary over—

(i) The life of the beneficiary (or any shorter period), if the beneficiary is the participant's surviving spouse, or

(ii) A period not in excess of 15 years, if the beneficiary is not the participant's surviving spouse.

(j) Administration of plan. A plan is not an eligible plan unless all amounts deferred under the plan, all property and rights to property (including rights as a beneficiary of a contract providing life insurance protection) purchased with the amounts, and all income attributable to the amounts, property, or rights to property, remain (until paid or made available to the participant or beneficiary under the plan) solely the property and rights of the State (without being restricted to the benefits under the plan) subject to the claims of the general creditors of the State only. However, nothing in this paragraph (j) prohibits a plan's permitting participants to direct, from among different modes under the plan, the investment of the above amounts (see § 1.457–1(b)).

(k) Plan-to-plan transfers. The plan may provide for the transfer of amounts deferred by a former participant to another eligible plan of which the former participant has become a participant if the following conditions are met—

(1) The entities sponsoring the plans are located within the same State (as that term is used in § 1.457–2(c)(1)),

(2) The plan receiving such amounts provides for the acceptance of the amounts, and

(3) The plan provides that if the participant separates from service in order to accept employment with another such entity, payout will not commence upon separation from service, regardless of any other provision of the plan, and amounts previously deferred will automatically be transferred.

(*l*) **Effect on plan when not administered in accordance with paragraphs (c) through (k).** A plan that is administered in a manner which is inconsistent with one or more of the requirements of paragraphs (c) through (k) of this section ceases to be an eligible plan on the first day of the first plan year beginning more than 180 days after the date of written notification by the Internal Revenue Service that the requirements are not satisfied, unless the inconsistency is corrected before the first day of that plan year.

(m) **Examples.** The provisions of this section may be illustrated by the following examples:

Example 1. A, born on June 1, 1917, is a participant in an eligible State deferred compensation plan providing a normal retirement age of 65. The plan provides limitations on deferrals up to the maximum permitted under § 1.457–2(e) and (f).

For 1979, A, who will be 62, is scheduled to receive a salary of $20,000 from the State. A desires to defer the maximum amount possible in 1979. The maximum amount that A may defer under the plan is the lesser of $7,500, or 33⅓% of A's includible compensation (generally the equivalent of 25 percent of gross compensation). Accordingly, the maximum that A may defer for 1979 is $5,000 [$5,000=$20,000×.25]. Although A's taxable year 1979 is one of A's last 3 taxable years before the year in which A attains normal retirement age under the plan, A is not able to utilize the catch-up provisions of § 1.457–2(f) in 1979 because only taxable years beginning after December 31, 1978, may be taken into account under those provisions.

Example 2. Assume the same facts as in example 1. In A's taxable year 1980, A receives a salary of $20,000, and elects to defer only $1,000 under the plan. In A's taxable year 1981, A again receives a salary of $20,000 and elects to defer the maximum amount permissible under the plan's catch-up provisions prescribed under § 1.457–2(f). The applicable limit on deferrals under the catch-up provision is the lesser of $15,000 or the sum of the normal plan ceiling for 1981, plus any under-utilized deferrals for any taxable year before 1981. Thus, the maximum amount that A may defer in 1981 is $9,000, the normal plan ceiling for 1981, $5,000, plus the under-utilized deferrals for 1980, $4,000.

Example 3. Assume the same facts as in examples 1 and 2. In A's taxable year 1982, the year in which A will attain age 65, normal retirement age under the plan, A desires to defer the maximum amount possible under the plan. For 1982 the normal limitations of § 1.457–2(e) are applicable, and the maximum amount that A may defer is $5,000, assuming that A's salary for 1982 was again $20,000. The plan's catch-up provisions prescribed under § 1.457–2(f) are not applicable because 1982 is not a year ending before the year in which A attains normal retirement age.

[T.D. 7836, 47 FR 42338, Sept. 27, 1982]

§ 1.457–3 Tax treatment of participants where plan is not an eligible plan.

(a) **In general.** If a State (within the meaning of § 1.457–2(c)) provides for a deferral of compensation (after the effective date described in paragraph (c)) under any agreement or arrangement described in § 1.457–2(b) that is not an eligible plan within the meaning of § 1.457–2—

(1) Compensation deferred under the agreement or arrangement shall be includible in the gross income of the participant of beneficiary for the first taxable year in which there is no substantial risk of forfeiture (within the meaning of section 457(e)(3)) of the rights to such compensation,

(2) Earnings credited on the compensation deferred under the agreement or arrangement shall be includible in the gross income of the participant or beneficiary only when paid or made available, provided that the interest of the participant or beneficiary in the assets (including amounts deferred under the plan) of the entity sponsoring the plan is not senior to the entity's general creditors, and

(3) Amounts paid or made available under the plan to a participant or beneficiary shall be taxable to the participant or beneficiary under section 72, relating to annuities.

(b) **Exceptions.** Paragraph (a) does not apply with respect to—

(1) A plan described in section 401(a) which includes a trust exempt from tax under section 501(a),

(2) An annuity plan or contract described in section 403,

(3) A qualified bond purchase plan described in section 405(a),

(4) That portion of any plan which consists of a transfer of property described in section 83, and

(5) That portion of any plan which consists of a trust to which section 402(b) applies.

(c) **Effective date.** This section is effective for taxable years beginning after December 31, 1981. For rules applicable in taxable years beginning after December 31, 1978, and before January 1, 1982, see § 1.457–4.

[T.D. 7836, 47 FR 42341, Sept. 27, 1982; 47 FR 46497, Oct. 19, 1982]

§ 1.457–4 Transitional rules.

(a) In general. Subject to the limitations described in paragraphs (b) and (c) of this section, amounts deferred (within the meaning of § 1.457–1(d)(3)) in taxable years beginning after December 31, 1978, and before January 1, 1982 under a plan described in § 1.457–2(b) (including an eligible plan within the meaning of § 1.457–2, but not including a plan described in section 457(e)(2) and § 1.457–3(b)) shall be includible in gross income only for the taxable year in which paid or otherwise made available to the participant or other beneficiary.

(b) General limitation. Except as described in paragraph (c) of this section, and excluding amounts deferred in taxable years beginning before January 1, 1979, compensation deferred under one or more plans described in paragraph (a) of this section is excludable from a participant's gross income under this section for a taxable year only to the extent it does not exceed the lesser of—

(1) $7,500, or

(2) 33⅓% of the participant's includible compensation (within the meaning of § 1.457–2(e)(2)) for the taxable year, reduced by any amount excludable from the participant's gross income for the taxable year under section 403(b) on account of contributions made by the State (within the meaning of § 1.457–2(c)). For purposes of this paragraph, compensation deferred under a plan shall be taken into account at its value in the plan year in which deferred. However, if the compensation deferred is subject to a substantial risk of forfeiture (as defined in section 457(e)(3)), such compensation shall be taken into account at its value in the plan year in which such compensation is no longer subject to a substantial risk of forfeiture.

(c) Limited catch-up. This paragraph (c) applies if all plans described in paragraph (a) of this section in which an individual is a participant are eligible plans within the meaning of § 1.457–2, and the participant's taxable year is a taxable year described in section 457(b)(3) and § 1.457–2(f). In such a case, compensation deferred under the plans for the taxable year is excluded from gross income under paragraph (a) of this section to the extent it does not exceed the amount determined under § 1.457–1(a)(2) or, as applicable, § 1.457–1(a)(3).

(d) Example. The provisions of this section may be illustrated by the following example:

Example. A is a participant in a State deferred compensation plan that is not an eligible plan within the meaning of § 1.457–2. The plan provides no limitations on the amount of compensation that may be deferred during any taxable year. For the taxable years 1979, 1980, and 1981 A has includible compensation of $40,000. In each of those years, A has deferred $10,000 of compensation. Under the transitional rules described in this section, $7,500 of A's deferrals in each year will be includible in gross income in the taxable year in which paid or made available to A or A's beneficiary. The remaining $2,500 of each year's deferrals ($10,000–$7,500) are includible in A's gross income for the deferral year. Thus, $2,500 is includible in A's gross income for each of the taxable years 1979, 1980, and 1981. The tax treatment of amounts deferred by A in taxable years after 1981 is described in § 1.457–3.

[T.D. 7836, 47 FR 42341, Sept. 27, 1982]

§ 1.458–10 Manner of and time for making election.

(a) Scope. For taxable years beginning after September 30, 1979, section 458 provides a special method of accounting for taxpayers who account for sales of magazines, paperbacks, or records using an accrual method of accounting. In order to use the special method of accounting under section 458, a taxpayer must make an election in the manner prescribed in this section. The election does not require the prior consent of the Internal Revenue Service. The election is effective for the taxable year for which it is made and for all subsequent taxable years, unless the taxpayer secures the prior consent of the Internal Revenue Service to revoke such election.

(b) Separate election for each trade or business. An election is made with respect to each trade or business of a taxpayer in connection with which qualified sales (as defined in section 458(b)(5)) of a category of merchandise were made. Magazines, paperbacks, and records are each treated as a separate category of merchandise. If qualified sales of two or more categories of merchandise are made in connection with the same trade or business, then solely for purposes of section 458, each category is treated as a separate trade or business. For example, if a taxpayer makes qualified sales of both magazines and paperbacks in the same trade or business, then solely for purposes of section 458, the qualified sales relating to magazines are considered one trade or business and the qualified sales relating to paperbacks are considered a separate trade or business. Thus, if the taxpayer wishes to account under section 458 for the qualified sales of both magazines and paperbacks, such taxpayer must make a separate election for each category.

(c) Manner of, and time for, making election. An election is made under section 458 and this section by filing a statement of election containing

the information described in paragraph (d) of this section with the taxpayer's income tax return for first taxable year for which the election is made. The election must be made no later than the time prescribed by law (including extensions) for filing the income tax return for the first taxable year for which the election is made. Thus, the election may not be filed with an amended income tax return after the prescribed date (including extensions) for filing the original return for such year.

(d) Required information. The statement of election required by paragraph (c) of this section must indicate that an election is being made under section 458(c) and must set forth the following information:

(1) The taxpayer's name, address, and identification number;

(2) A description of each trade or business for which an election is made;

(3) The first taxable year for which an election is made for each trade or business;

(4) The merchandise return period (as defined in section 458(b)(7)) for each trade or business for which an election is made;

(5) With respect to an election that applies to magazines, the amount of the adjustment computed under section 481(a) resulting from the change to the method of accounting described in section 458; and

(6) With respect to an election that applies to paperbacks or records, the initial opening balance (computed in accordance with section 458(e)) in the suspense account for each trade or business for which an election is made.

The statement of election should be made on a Form 3115 which need contain no information other than that required by this paragraph.

[T.D. 7628, 44 FR 33398, June 11, 1979]

Taxable Year for Which Deductions Taken

§ 1.461–1 General rule for taxable year of deduction.

(a) General rule—(1) Taxpayer using cash receipts and disbursements method. Under the cash receipts and disbursements method of accounting, amounts representing allowable deductions shall, as a general rule, be taken into account for the taxable year in which paid. Further, a taxpayer using this method may also be entitled to certain deductions in the computation of taxable income which do not involve cash disbursements during the taxable year, such as the deductions for depreciation, depletion, and losses under sections 167, 611, and 165, respectively. If an expenditure results in the creation of an asset having a useful life which extends substantially beyond the close of the taxable year, such an expenditure may not be deductible, or may be deductible only in part, for the taxable year in which made. An example is an expenditure for the construction of improvements by the lessee on leased property where the estimated life of the improvements is in excess of the remaining period of the lease. In such a case, in lieu of the allowance for depreciation provided by section 167, the basis shall be amortized ratably over the remaining period of the lease. See section 178 and the regulations thereunder for rules governing the effect to be given renewal options in determining whether the useful life of the improvements exceeds the remaining term of the lease where a lessee begins improvements on leased property after July 28, 1958, other than improvements which on such date and at all times thereafter, the lessee was under a binding legal obligation to make. See section 263 and the regulations thereunder for rules relating to capital expenditures.

(2) Taxpayer using an accrual method. Under an accrual method of accounting, an expense is deductible for the taxable year in which all the events have occurred which determine the fact of the liability and the amount thereof can be determined with reasonable accuracy. However, any expenditure which results in the creation of an asset having a useful life which extends substantially beyond the close of the taxable year may not be deductible, or may be deductible only in part, for the taxable year in which incurred. While no accrual shall be made in any case in which all of the events have not occurred which fix the liability, the fact that the exact amount of the liability which has been incurred cannot be determined will not prevent the accrual within the taxable year of such part thereof as can be computed with reasonable accuracy. For example, A renders services to B during the taxable year for which A claims $10,000. B admits the liability to A for $5,000 but contests the remainder. B may accrue only $5,000 as an expense for the taxable year in which the services were rendered. In the case of certain contested liabilities in respect of which a taxpayer

transfers money or other property to provide for the satisfaction of the contested liability, see § 1.461–2. Where a deduction is properly accrued on the basis of a computation made with reasonable accuracy and the exact amount is subsequently determined in a later taxable year, the difference, if any, between such amounts shall be taken into account for the later taxable year in which such determination is made.

(3) Other factors which determine when deductions may be taken. (i) Each year's return should be complete in itself, and taxpayers shall ascertain the facts necessary to make a correct return. The expenses, liabilities, or loss of one year cannot be used to reduce the income of a subsequent year. A taxpayer may not take advantage in a return for a subsequent year of his failure to claim deductions in a prior taxable year in which such deductions should have been properly taken under his method of accounting. If a taxpayer ascertains that a deduction should have been claimed in a prior taxable year, he should, if within the period of limitation, file a claim for credit or refund of any overpayment of tax arising therefrom. Similarly, if a taxpayer ascertains that a deduction was improperly claimed in a prior taxable year, he should, if within the period of limitation, file an amended return and pay any additional tax due. However, in a going business there are certain overlapping deductions. If these overlapping items do not materially distort income, they may be included in the years in which the taxpayer consistently takes them into account.

(ii) Where there is a dispute and the entire liability is contested, judgments on account of damages for patent infringement, personal injuries or other causes, or other binding adjudications, including decisions of referees and boards of review under workmen's compensation laws, are deductions from gross income when the claim is finally adjudicated or is paid, depending upon the taxpayer's method of accounting. However, see subparagraph (2) of this paragraph.

(iii) For special rules relating to certain deductions, see the following sections and the regulations thereunder: Section 1481, relating to accounting for amounts repaid in connection with renegotiation of a government contract; section 1341, relating to the computation of tax where the taxpayer repays a substantial amount received under a claim of right in a prior taxable year; section 165(e), relating to losses resulting from theft; and section 165(h), relating to an election of the year of deduction of disaster losses.

(4) Deductions attributable to certain foreign income. In any case in which, owing to monetary, exchange, or other restrictions imposed by a foreign country, an amount otherwise constituting gross income for the taxable year from sources without the United States is not includible in gross income of the taxpayer for that year, the deductions and credits properly chargeable against the amount so restricted shall not be deductible in such year but shall be deductible proportionately in any subsequent taxable year in which such amount or portion thereof is includible in gross income. See paragraph (b) of § 1.905–1 for rules relating to credit for foreign income taxes when foreign income is subject to exchange controls.

(b) Special rule in case of death. A taxpayer's taxable year ends on the date of his death. See section 443(a)(2) and paragraph (a)(2) of § 1.443–1. In computing taxable income for such year, there shall be deducted only amounts properly deductible under the method of accounting used by the taxpayer. However, if the taxpayer used an accrual method of accounting, no deduction shall be allowed for amounts accrued only by reason of his death. For rules relating to the inclusion of items of partnership deduction, loss, or credit in the return of a decedent partner, see subchapter K, chapter 1 of the Code, and the regulations thereunder.

(c) Accrual of real property taxes—(1) In general. If the accrual of real property taxes is proper in connection with one of the methods of accounting described in section 446(c), any taxpayer using such a method of accounting may elect to accrue any real property tax, which is related to a definite period of time, ratably over that period in the manner described in this paragraph. For example, assume that such an election is made by a calendar-year taxpayer whose real property taxes, applicable to the period from July 1, 1955, to June 30, 1956, amount to $1,200. Under section 461(c), $600 of such taxes accrue in the calendar year 1955, and the balance accrues in 1956. For special rule in the case of certain contested real property taxes in respect of which the taxpayer transfers money or other property to provide for the satisfaction of the contested tax, see § 1.461–2. For general rules relating to deductions for taxes, see section 164 and the regulations thereunder.

(2) Special rules—(i) Effective date. Section 461(c) and this paragraph do not apply to any real property tax allowable as a deduction under the Internal Revenue Code of 1939 for any taxable year beginning before January 1, 1954.

(ii) If real property taxes which relate to a period prior to the taxpayer's first taxable year beginning on or after January 1, 1954, would, but for section 461(c), be deductible in such first taxable year, the portion of such taxes which applies to the prior period is deductible in such first taxable year (in addition to the amount allowable under section 461(c)(1)).

(3) When election may be made—(i) Without consent. A taxpayer may elect to accrue real property taxes ratably in accordance with section 461(c) and this paragraph without the consent of the Commissioner for his first taxable year beginning after December 31, 1953, and ending after August 16, 1954, in which the taxpayer incurs real property taxes. Such election must be made not later than the time prescribed by law for filing the return for such year (including extensions thereof). An election may be made by the taxpayer for each separate trade or business (and for nonbusiness activities, if accounted for separately). Such an election shall apply to all real property taxes of the trade, business, or nonbusiness activity for which the election is made. The election shall be made in a statement submitted with the taxpayer's return for the first taxable year to which the election is applicable. The statement should set forth:

(a) The trades or businesses, or nonbusiness activity, to which the election is to apply, and the method of accounting used therein;

(b) The period of time to which the taxes are related; and

(c) The computation of the deduction for real property taxes for the first year of the election (or a summary of such computation).

(ii) With consent. A taxpayer may elect with the consent of the Commissioner to accrue real property taxes ratably in accordance with section 461(c) and this paragraph. A written request for permission to make such an election shall be submitted to the Commissioner of Internal Revenue, Washington, D.C. 20224, within 90 days after the beginning of the taxable year to which the election is first applicable, or before March 26, 1958, whichever date is later. The request for permission shall state:

(a) The name and address of the taxpayer;

(b) The trades or businesses, or nonbusiness activity, to which the election is to apply, and the method of accounting used therein;

(c) The taxable year to which the election first applies;

(d) The period to which the real property tax relate;

(e) The computation of the deduction for real property taxes for the first year of election (or a summary of such computation); and

(f) An adequate description of the manner in which all real property taxes were deducted in the year prior to the year of election.

(4) Binding effect of election. An election to accrue real property taxes ratably under section 461(c) is binding upon the taxpayer unless the consent of the Commissioner is obtained under section 446(e) and paragraph (e) of § 1.446–1 to change such method of deducting real property taxes. If the last day prescribed by law for filing a return for any taxable year (including extensions thereof) to which section 461(c) is applicable falls before March 25, 1958, consent is hereby given for the taxpayer to revoke an election previously made to accrue real property taxes in the manner prescribed by section 461(c). If the taxpayer revokes his election under the preceding sentence, he must, on or before March 25, 1958, notify the district director for the district in which the return was filed of such revocation. For any taxable year for which such revocation is applicable, an amended return reflecting such revocation shall be filed on or before March 25, 1958.

(5) Apportionment of taxes on real property between seller and purchaser. For apportionment of taxes on real property between seller and purchaser, see section 164(d) and the regulations thereunder.

(6) Examples. The provisions of this paragraph are illustrated by the following examples:

Example (1). A taxpayer on an accrual method reports his taxable income for the taxable year ending June 30. He elects to accrue real property taxes ratably for the taxable year ending June 30, 1955 (which is his first taxable year beginning on or after January 1, 1954). In the absence of an election under section 461(c), such taxes would accrue on January 1 of the calendar year to which they are related. The real property taxes are $1,200 for 1954; $1,600 for 1955; and $1,800 for 1956. Deductions for such taxes for the fiscal years ending June 30, 1955, and June 30, 1956, are computed as follows:

Fiscal year ending June 30, 1955

July through December 1954	[1]None
January through June 1955 (6/12 of $1,600)	$800
Deduction for fiscal year ending June 30, 1955	800

[1] The taxes for 1954 were deductible in the fiscal year ending June 30, 1954, since such taxes accrued on January 1, 1954.

Fiscal year ending June 30, 1956

July through December 1955 (6/12 of $1,600) ..	$800
January through June 1956 (6/12 of $1,800)....	900
Deduction for fiscal year ending June 30, 1956	1,700

Example (2). A calendar-year taxpayer on an accrual method elects to accrue real property taxes ratably for 1954. In the absence of an election under section 461(c), such taxes would accrue on July 1 and are assessed for the 12-month period beginning on that date. The real property taxes assessed for the year ending June 30, 1954, are $1,200; $1,600 for the year ending June 30, 1955; and $1,800 for the year ending June 30, 1956. Deductions for such taxes for the calendar years 1954 and 1955 are computed as follows:

Year ending December 31, 1954

January through June 1954	[1]None
July through December 1954 (6/12 of $1,600) ..	$800
Deduction for year ending December 31, 1954	800

[1] The entire tax of $1,200 for the year ended June 30, 1954, was deductible in the return for 1953, since such tax accrued on July 1, 1953.

Year ending December 31, 1955

January through June 1955 (6/12 of $1,600)	$800
July through December 1955 (6/12 of $1,800) ..	900
Deduction for year ending December 31, 1955	1,700

Example (3). A calendar-year taxpayer on an accrual method elects to accrue real property taxes ratably for 1954. In the absence of an election under section 461(c), such taxes, which relate to the calendar year 1954, are accruable on December 1 of the preceding calendar year. No deduction for real property taxes is allowable for the taxable year 1954 since such taxes accrued in the taxable year 1953 under section 23(c) of the Internal Revenue Code of 1939.

Example (4). A taxpayer on an accrual method reports his taxable income for the taxable year ending March 31. He elects to accrue real property taxes ratably for the taxable year ending March 31, 1955. In the absence of an election under section 461(c), such taxes are accruable on June 1 of the calendar year to which they relate. The real property taxes are $1,200 for 1954; $1,600 for 1955; and $1,800 for 1956. Deductions for such taxes for the taxable years ending March 31, 1955, and March 31, 1956, are computed as follows:

Fiscal year ending March 31, 1955

April through December 1954 (9/12 of $1,200)	$900
January through March 1955 (3/12 of $1,600) ..	400
Taxes accrued ratably in fiscal year ending March 31, 1955	1,800
Tax relating to period January through March 1954, paid in June 1954, and not deductible in prior taxable year (3/12 of $1,200)	300
Deduction for fiscal year ending March 31, 1955	1,600

Fiscal year ending March 31, 1956

April through December 1955 (9/12 of $1,600)	$1,200
January through March 1956 (3/12 of $1,800) ..	450
Deduction for fiscal year ending March 31, 1956	1,650

Example (5). The facts are the same as in example (4) except that in June 1955, when the taxpayer pays his $1,600 real property taxes for 1955, he pays $400 of such amount under protest. Deductions for taxes for the taxable years ending March 31, 1955, and March 31, 1956, are computed as follows:

Fiscal year ending March 31, 1955

April through December 1954 (9/12 of $1,200)	$900
January through March 1955 (3/12 of $1,200, that is, $1,600 minus $400 (the contested portion which is not properly accruable))	300
Taxes accrued ratably in fiscal year ending March 31, 1955	1,200
Tax relating to period January through March 1954, paid in June 1954, and not deductible in prior taxable years (3/12 of $1,200)	300
Deduction for fiscal year ending March 31, 1955	1,500

Fiscal year ending March 31, 1956

April through December 1955 (9/12 of $1,200)	$900
January through March 1956 (3/12 of $1,800) ..	450
Taxes accrued ratably in fiscal year ending March 31, 1956	1,350
Contested portion of tax relating to period January through December 1955, paid in June 1955, and deductible, under section 461(f), for taxpayer's fiscal year ending March 31, 1956	400
Deduction for fiscal year ending March 31, 1956	1,750

(d) Limitation on acceleration of accrual of taxes. (1) Section 461(d)(1) provides that, in the case of a taxpayer whose taxable income is computed under an accrual method of accounting, to the extent that the time for accruing taxes is earlier than it would be but for any action of any taxing jurisdiction taken after December 31, 1960, such taxes are to be treated as accruing at the time they would have accrued but for such action. Any such action which, but for the provisions of section 461(d) and this paragraph, would accelerate the time for accruing a tax is to be disregarded in determining the time for accruing such tax for purposes of the deduction allowed for such tax. Such action is to be disregarded not only with respect to a taxpayer (whose taxable income is computed under an accrual method of accounting) upon whom the tax is imposed at the time of the action, but also with respect to such a taxpayer upon whom the tax is imposed at any time subsequent to such action. Thus, in the case of a tax imposed on property, the acceleration of the time for accruing taxes is to be disregarded not only with respect to the taxpayer who owned the property at the time of such acceleration, but also with respect to any subsequent owner of the property whose taxable income is computed under an accrual method of accounting. Similarly, such action is to be disregarded with respect to all property

subject to such tax, even if such property is acquired after the action. Whenever the time for accruing taxes is to be disregarded in accordance with the provisions of this paragraph, the taxpayer shall accrue the tax at the time (original accrual date) the tax would have accrued but for such action, and shall, in the absence of any action of the taxing jurisdiction placing the time for accruing such tax at a time subsequent to the original accrual date, continue to accrue the tax as of the original accrual date for all future taxable years.

(2) For purposes of this paragraph—

(i) The term "a taxpayer whose taxable income is computed under an accrual method of accounting" means a taxpayer who, for Federal income tax purposes, accounts for any tax which is the subject of "any action" (as defined in subdivision (iii) of this subparagraph) under an accrual method of accounting. See section 446 and the regulations thereunder. If a taxpayer uses an accrual method as his overall method of accounting, it shall be presumed that he is "a taxpayer whose taxable income is computed under an accrual method of accounting." However, if the taxpayer establishes to the satisfaction of the district director that he has, for Federal income tax purposes, consistently accounted for such tax under the cash method of accounting, he shall be considered not to be "a taxpayer whose taxable income is computed under an accrual method of accounting."

(ii) The time for accruing taxes shall be determined under section 461 and the regulations in this section.

(iii) The term "any action" includes the enactment or reenactment of legislation, the adoption of an ordinance, the exercise of any taxing or administrative authority, or the taking of any other step, the result of which is an acceleration of the accrual event of any tax. The term also applies to the substitution of a substantially similar tax by either the original taxing jurisdiction or a substitute jurisdiction. However, the term does not include either a judicial interpretation, or an administrative determination by the Internal Revenue Service, as to the event which fixes the accrual date for the tax.

(iv) The term "any taxing jurisdiction" includes the District of Columbia, any State, possession of the United States, city, county, municipality, school district, or other political subdivision or authority, other than the United States, which imposes, assesses, or collects a tax.

(3) The provisions of this paragraph may be illustrated by the following examples:

Example (1). State X imposes a tax on intangible and tangible personal property used in a trade or business conducted in the State. The tax is assessed as of July 1, and becomes a lien as of that date. As a result of administrative and judicial decisions, July 1 is recognized as the proper date on which accrual method taxpayers may accrue their personal property tax for Federal income tax purposes. In 1961 State X, by legislative action, changes the assessment and lien dates from July 1, 1962, to December 31, 1961, for the property tax year 1962. The action taken by State X is considered to be "any action" of a taxing jurisdiction which results in the time for accruing taxes being earlier than it would have been but for that action. Therefore, for purposes of the deduction allowed for such tax, the personal property tax imposed by State X, for the property tax year 1962, shall be treated as though it accrued on July 1, 1962.

Example (2). Assume the same facts as in example (1) except that State X repeals the personal property tax and in lieu thereof enacts a franchise tax which is imposed on the privilege of conducting a trade or business within State X, and is based on the value of intangible and tangible personal property used in the trade or business. The franchise tax is to be assessed and will become a lien as of December 31, 1961, for the franchise tax year 1962, and on December 31 for all subsequent franchise tax years. Since the franchise tax is substantially similar to the former personal property tax and since the enactment of the franchise tax has the effect of accelerating the accrual date of the personal property tax from July 1, 1962, to December 31, 1961, the action taken by State X is considered to be "any action" of a taxing jurisdiction which results in the time for accruing taxes being earlier than it would have been but for that action. Therefore, for purposes of the deduction allowed for such tax, the franchise tax imposed by State X shall be treated as though it accrued on July 1, 1962, for the franchise tax year 1962, and on July 1 for all subsequent franchise tax years.

Example (3). Assume the same facts as in example (1) except that State X repealed the personal property tax and empowered the counties within the State to impose a personal property tax. Assuming the counties in State X subsequently imposed a personal property tax and chose December 31 of the preceding year as the assessment and lien date, the action of each of the counties would be considered to be "any action" of a taxing jurisdiction which results in the time for accruing taxes being earlier than it would have been but for that action since it is immaterial whether the original taxing jurisdiction or a substitute jurisdiction took the action.

(4) Section 461(d)(1) shall not be applicable to the extent that it would prevent the taxpayer and all other persons, including successors in interest, from ever taking into account, for Federal income tax purposes, any tax to which that section would otherwise apply. For example, assume that State Y imposes a personal property tax on tangible personal property used in a trade or business conducted in the State during a calendar year. The tax is assessed as of February 1 of the year following the personal property tax year, and becomes a lien as of that date. As a result of administrative and judicial decisions, February 1 of the following year is recognized as the proper date on which accrual method taxpayers may ac-

crue the personal property tax for Federal income tax purposes. In 1962 State Y, by legislative action, changes the assessment and lien dates for the personal property tax year 1962 from February 1, 1963, to December 1, 1962, and to December 1 of the personal property tax year for all subsequent years. Corporation A, an accrual method taxpayer which uses the calendar year as its taxable year, pays the tax for 1962 on December 10, 1962. On December 15, 1962, the property which was taxed is completely destroyed and, on December 20, 1962, corporation A transfers all of its remaining assets to its shareholders, and is dissolved. Since corporation A is not in existence in 1963, and therefore could not take the personal property tax into account in computing its 1963 Federal income tax if February 1, 1963, is considered to be the time for accruing the tax, and no other person could ever take such tax into account in computing his Federal income tax, such tax shall be treated as accruing as of December 1, 1962. To the extent that any person other than the taxpayer may at any time take such tax into account in computing his taxable income, the provisions of section 461(d)(1) shall apply. Thus, upon the dissolution of a corporation or the termination of a partnership between the time which, but for the provisions of section 461(d)(1) and this paragraph, would be the time for accruing any tax which was the subject of "any action" (as defined in subdivision (iii) of subparagraph (2)), and the original accrual date, the corporation or the partnership would be entitled to a deduction for only that portion, if any, of such tax with respect to which it can establish, to the satisfaction of the district director, that no other taxpayer can properly take into account in computing his taxable income. However, to the extent that the corporation or partnership cannot establish, at the time of its dissolution or termination, as the case may be, that no other taxpayer would be entitled to take such tax into account in computing his taxable income, and it is subsequently determined that no other taxpayer is entitled to take such tax into account in computing his taxable income, the corporation or partnership may file a claim for refund for the year of its dissolution or termination (subject to the limitations prescribed in section 6511) and claim as a deduction therein the portion of such tax determined to be not deductible by any other taxpayer.

(5) Section 461(d) and this paragraph shall apply to taxable years ending after December 31, 1960.

(e) Dividends or interest paid by certain savings institutions on certain deposits or withdrawable accounts—(1) Deduction not allowable—(i) In general. Except as otherwise provided in this paragraph, pursuant to section 461(e) amounts paid to, or credited to the accounts of, depositors or holders of accounts as dividends or interest on their deposits or withdrawable accounts (if such amounts paid or credited are withdrawable on demand subject only to customary notice to withdraw) by a mutual savings bank not having capital stock represented by shares, a domestic building and loan association, or a cooperative bank shall not be allowed as a deduction for the taxable year to the extent such amounts are paid or credited for periods representing more than 12 months. The provisions of section 461(e) are applicable with respect to taxable years ending after December 31, 1962. Whether amounts are paid or credited for periods representing more than 12 months depends upon all the facts and circumstances in each case. For example, payments or credits which under all the facts and circumstances are in the nature of bona fide bonus interest or dividends paid or credited because a shareholder or depositor maintained a certain balance for more than 12 months, will not be considered made for more than 12 months, providing the regular payments or credits represent a period of 12 months or less. The nonallowance of a deduction to the taxpayer under section 461(e) and this subparagraph has no effect either on the proper time for reporting dividends or interest by a depositor or holder of a withdrawable account, or on the obligation of the taxpayer to make a return setting forth, among other things, the aggregate amounts paid to a depositor or shareholder under section 6049 (relating to returns regarding payments of interest) and the regulations thereunder. With respect to a short period (a taxable year consisting of a period of less than 12 months), amounts of dividends or interest paid or credited shall not be allowed as a deduction to the extent that such amounts are paid or credited for a period representing more than the number of months in such short period. In such a case, the rules contained in section 461(e) and this paragraph apply to the short period in a manner consistent with the application of such rules to a 12-month taxable year. Subparagraph (2) of this paragraph provides rules for computing amounts not allowed in the taxable year and subparagraph (3) provides rules for determining when such amounts are allowed. See section 7701(a)(19) and (32) and the regulations thereunder for the definitions of domestic building and loan association and cooperative bank.

(ii) Exceptions. The rule of nonallowance set forth in subdivision (i) of this subparagraph is not applicable to a taxpayer in the year in which it liquidates (other than following, or as part of, an acquisition of its assets in which the acquiring corporation, pursuant to section 381(a), takes into account certain items of the taxpayer, which for purposes of this paragraph shall be referred to as an acquisition described in section 381(a)). In addition, such rule of nonallowance is not applicable to a taxpayer which pays or credits grace interest or dividends to terminating depositors or shareholders, provided the total amount of the grace interest or dividends paid or credited during the payment or crediting period (for example, a quarterly or semiannual period) does not exceed 10 percent of the total amount of the interest or dividends paid or credited during such period, computed without regard to the grace interest or dividends. For example, providing the 10 percent limitation is met, the rule of nonallowance does not apply in a case in which a calendar year taxpayer, with regular interest payment dates of January 1, April 1, July 1, and October 1, pays grace interest for the period beginning October 1 to a depositor who terminates his account on December 10.

(2) Computation of amounts not allowed as a deduction—(i) Method of computation. The amount of the dividends or interest to which subparagraph (1) of this paragraph applies, which is not allowed as a deduction, shall be computed under the rules of this subparagraph. The amount which is not allowed as a deduction is the difference between the total amount of dividends or interest paid or credited to that class of accounts with respect to which a deduction is not allowed under subparagraph (1) of this paragraph during the taxable year (or short period, if applicable) and an amount which bears the same ratio to such total as the number 12 (or number of months in the short period) bears to the number of months with respect to which such amounts of dividends or interest are paid or credited.

(ii) Examples. The provisions of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example (1). X Association, a domestic building and loan association filing its return on the basis of a calendar year, regularly credits dividends on its withdrawable accounts quarterly on the first day of the quarter following the quarter with respect to which they are earned. X changes the time of crediting dividends commencing with the credit for the fourth quarter of 1964. Such credit and all subsequent credits are made on the last day of the quarter with respect to which they are earned. As a result of this change X's credits for the year 1964 are as follows:

Period with respect to which earned	Date credited in 1964	Amt.
4th quarter, 1963	Jan. 1	$250,000
1st quarter, 1964	Apr. 1	300,000
2d quarter, 1964	July 1	300,000
3d quarter, 1964	Oct. 1	300,000
4th quarter, 1964	Dec. 31	350,000
Total dividends credited		1,500,000

Since the change in the time of crediting dividends results in the crediting in 1964 of amounts of dividends representing periods totaling 15 months (October 1963 through December 1964), amounts shall not be allowed as a deduction in 1964 which are in excess of $1,200,000, which is the amount which bears the same ratio to the amounts of dividends credited during the year ($1,500,000) as the number 12 bears to the number of months (15) with respect to which such dividends are credited. Thus, $300,000 ($1,500,000 minus $1,200,000) is not allowed as a deduction in 1964.

Example (2). Y Association, a domestic building and loan association filing its return on the basis of a calendar year, regularly credits dividends on its withdrawable accounts on the basis of a semiannual period on March 31 and September 30 of each year. Y changes the period with respect to which credits are made from the semiannual period to the quarterly basis, commencing with the last quarter in 1964. The credit for this last quarter and all subsequent credits are made on the last day of the quarter with respect to which they are earned. As a result of this change, Y's credits for the year 1964 are as follows:

Period with respect to which earned	Date credited in 1964	Amt.
6-month period ending Mar. 31, 1964	Mar. 31	$300,000
6-month period ending Sept. 30, 1964	Sept. 30	400,000
4th quarter, 1964	Dec. 31	200,000
Total dividends credited		900,000

Since the change in the basis of crediting dividends results in a crediting in 1964 of dividends representing periods totaling 15 months (October 1963 through December 1964), amounts shall not be allowed as a deduction in 1964 which are in excess of $720,000, which is the amount which bears the same ratio to the amounts of dividends credited during the year ($900,000) as the number 12 bears to the number of months (15) with respect to which such dividends are credited. Thus, $180,000 ($900,-000 minus $720,000) is not allowed as a deduction in 1964.

Example (3). Z Association, a domestic building and loan association regularly files its return on the basis of a fiscal year ending on the last day of February and regularly credits dividends on its withdrawable accounts quarterly on the last day of the quarter with respect to which they are earned. Z receives approval from the Commissioner of Internal Revenue to change its accounting period to a calendar year and effects the change by filing a return for a short period ending on December 31, 1964. Dividend credits for the short period beginning on March 1 and ending on December 31, 1964, are as follows:

Period with respect to which earned	Date credited in 1964	Amt.
January–March 1964	Mar. 31	$250,000
April–June 1964	June 30	300,000
July–September 1964	Sept. 30	300,000
October–December 1964	Dec. 31	350,000
Total dividends credited		1,200,000

Since the change of accounting period results in amounts of dividends credited ($1,200,000) representing periods totaling 12 months (January through December 1964), and such periods represent more than the number of months (10) in the short period, an amount shall not be allowed as a deduction in such short period which is in excess of $1,000,000, which is the amount which bears the same ratio to the amount of dividends credited in the short period ($1,200,000) as the number of months (10) in the short period bears to the number of months (12) with respect to which such dividends are credited. Thus, $200,000 ($1,200,000 minus $1,000,000) is not allowed as a deduction in the short period.

(3) **When amounts allowable.** The amount of dividends or interest not allowed as a deduction under subparagraph (1) of this paragraph shall be allowed as follows (subject to the limitation that the total of the amounts so allowed shall not exceed the amount not allowed under subparagraph (1)):

(i) Such amount shall be allowed as a deduction in a later taxable year or years subject to the limitation that, when taken together with the deductions otherwise allowable in the later taxable year or years, it does not bring the deductions for any later taxable year to a total representing a period of more than 12 months (or number of months in the short period, if applicable). However, in any event, an amount otherwise allowable under subdivision (ii) of this subparagraph shall be allowed notwithstanding the fact that it may bring the deductions allowable to a total representing a period of more than 12 months (or number of months in the short period, if applicable).

(ii) In any case in which it is established to the satisfaction of the Commissioner that the taxpayer does not intend to avoid taxes, one-tenth of such amount shall be allowed as a deduction in each of the 10 succeeding taxable years—

(a) Commencing with the taxable year for which such amount is not allowed as a deduction under subparagraph (1), or

(b) In the case of such amount not allowed for a taxable year ending before July 1, 1964, commencing with either the first or second taxable year after the taxable year for which such amount is not allowed as a deduction under subparagraph (1) if the taxpayer has not taken a deduction on his return, or filed a claim for credit or refund, in respect of such amount under (a).

Normally, if the deduction not allowed under subparagraph (1) is a result of a change, not requested by the taxpayer, in the taxpayer's annual accounting period or dividend or interest payment or crediting dates solely as a consequence of a requirement of a Federal or State regulatory authority, or if the deduction is not allowed solely as a result of the taxpayer being a party to an acquisition to which section 381(a) applies, the Commissioner will permit the allowance of the amount not allowed in the manner provided in this subdivision. Nothing set forth in this subdivision shall be construed as permitting the allowance of a credit or refund for any year which is barred by the limitations on credit or refund provided by section 6511.

(iii) If the total of the amounts, if any, allowed under subdivisions (i) and (ii) of this subparagraph before the taxable year in which the taxpayer liquidates or otherwise ceases to engage in trade or business is less than the amount not allowed under subparagraph (1), there shall be allowed a deduction in such taxable year for the difference between the amount not allowed under subparagraph (1) and the amounts allowed, if any, as deductions under subdivisions (i) and (ii) unless the circumstances under which the taxpayer ceased to do business constitute an acquisition described in section 381(a) (relating to carryovers in certain corporate acquisitions). If the circumstances under which the taxpayer ceased to do business constitute an acquisition described in section 381(a), the acquiring corporation shall succeed to and take into account the balance of the amounts not allowed on the same basis as the taxpayer, had it not ceased to engage in business.

[T.D. 6500, 25 FR 11720, Nov. 26, 1960, as amended by T.D. 6520, 25 FR 13692, Dec. 24, 1960; T.D. 6710, 29 FR 3473, March 18, 1964; T.D. 6735, 29 FR 6494, May 19, 1964; T.D. 6772, 29 FR 15753, Nov. 24, 1964; T.D. 6917, 32 FR 6682, May 2, 1967]

§ 1.461–2 Timing of deductions in certain cases where asserted liabilities are contested.

(a) General rule—(1) Taxable year of deduction. If—

(i) The taxpayer contests an asserted liability,

(ii) The taxpayer transfers money or other property to provide for the satisfaction of the asserted liability,

(iii) The contest with respect to the asserted liability exists after the time of the transfer, and

(iv) But for the fact that the asserted liability is contested, a deduction would be allowed for the taxable year of the transfer (or, in the case of an accrual method taxpayer, for an earlier taxable year for which such amount would be accruable), then the deduction with respect to the contested amount shall be allowed for the taxable year of the transfer.

(2) **Exception.** Subparagraph (1) of this paragraph shall not apply in respect of the deduction for income, war profits, and excess profits taxes imposed by the authority of any foreign country or possession of the United States, including a tax paid in lieu of a tax on income, war profits, or excess profits otherwise generally imposed by any foreign country or by any possession of the United States.

(3) **Refunds includible in gross income.** If any portion of the contested amount which is deducted under subparagraph (1) of this paragraph for the taxable year of transfer is refunded when the contest is settled, such portion is includible in gross income except as provided in § 1.111–1, relating to recovery of certain items previously deducted or credited. Such refunded amount is includible in gross income for the taxable year of receipt, or for an earlier taxable year if properly accruable for such earlier year.

(4) **Examples.** The provisions of this paragraph are illustrated by the following examples:

Example (1). X Corporation, which uses an accrual method of accounting, in 1964 contests $20 of a $100 asserted real property tax liability but pays the entire $100 to the taxing authority. In 1968, the contest is settled and X receives a refund of $5. X deducts $100 for the taxable year 1964, and includes $5 in gross income for the taxable year 1968 (assuming § 1.111–1 does not apply to such amount). If in 1964 X pays only $80 to the taxing authority, X deducts only $80 for 1964. The result would be the same if X Corporation used the cash method of accounting.

Example (2). Y Corporation makes its return on the basis of a calendar year and uses an accrual method of accounting. Y's real property taxes are assessed and become a lien on December 1, but are not payable until March 1 of the following year. On December 10, 1964, Y contests $20 of the $100 asserted real property tax which was assessed and became a lien on December 1, 1964. On March 1, 1965, Y pays the entire $100 to the taxing authority. In 1968, the contest is settled and Y receives a refund of $5. Y deducts $80 for the taxable year 1964, deducts $20 for the taxable year 1965, and includes $5 in gross income for the taxable year 1968 (assuming § 1.111–1 does not apply to such amount).

(b) **Production costs—(1) In general; asserted liability.** For purposes of paragraph (a)(1) of this section, the term "asserted liability" means an item with respect to which, but for the existence of any contest in respect of such item, a deduction would be allowable under an accrual method of accounting. For example, a notice of a local real estate tax assessment and a bill received for services may represent asserted liabilities.

(2) **Definition of the term "contest".** Any contest which would prevent accrual of a liability under section 461(a) shall be considered to be a contest in determining whether the taxpayer satisfies paragraph (a)(1)(i) of this section. A contest arises when there is a bona fide dispute as to the proper evaluation of the law or the facts necessary to determine the existence or correctness of the amount of an asserted liability. It is not necessary to institute suit in a court of law in order to contest an asserted liability. An affirmative act denying the validity or accuracy, or both, of an asserted liability to the person who is asserting such liability, such as including a written protest with payment of the asserted liability, is sufficient to commence a contest. Thus, lodging a protest in accordance with local law is sufficient to contest an asserted liability for taxes. It is not necessary that the affirmative act denying the validity or accuracy, or both, of an asserted liability be in writing if, upon examination of all the facts and circumstances, it can be established to the satisfaction of the Commissioner that a liability has been asserted and contested.

(3) **Example.** The provisions of this paragraph are illustrated by the following example:

Example. O Corporation makes its return on the basis of a calendar year and uses an accrual method of accounting. O receives a large shipment of typewriter ribbons from S Company on January 30, 1964, which O pays for in full on February 10, 1964. Subsequent to their receipt, several of the ribbons prove defective because of inferior materials used by the manufacturer. On August 9, 1964, O orally notifies S and demands refund of the full purchase price of the ribbons. After negotiations prove futile and a written demand is rejected by S, O institutes an action for the full purchase price. For purposes of paragraph (a)(1)(i) of this section, S has asserted a liability against O which O contests on August 9, 1964. O deducts the contested amount for 1964.

(c) **Transfer to provide for the satisfaction of an asserted liability—(1) In general.** A taxpayer may provide for the satisfaction of an asserted liability by transferring money or other property beyond his control (i) to the person who is asserting the liability, (ii) to an escrowee or trustee pursuant to a written agreement (among the escrowee or trustee, the taxpayer, and the person who is asserting the liability) that the money or other property be delivered in accordance with the settlement of the contest, or (iii) to an escrowee or trustee pursuant to an order of the United States, any State or political subdivision thereof, or any agency or instrumentality of the foregoing, or a court that the money or other property be deliv-

ered in accordance with the settlement of the contest. A taxpayer may also provide for the satisfaction of an asserted liability by transferring money or other property beyond his control to a court with jurisdiction over the contest. Purchasing a bond to guarantee payment of the asserted liability, an entry on the taxpayer's books of account, and a transfer to an account which is within the control of the taxpayer are not transfers to provide for the satisfaction of an asserted liability. In order for money or other property to be beyond the control of a taxpayer, the taxpayer must relinquish all authority over such money or other property.

(2) Examples. The provisions of this paragraph are illustrated by the following examples:

Example (1). M Corporation contests a $5,000 liability asserted against it by L Company for services rendered. To provide for the contingency that it might have to pay the liability, M establishes a separate bank account in its own name. M then transfers $5,000 from its general account to such separate account. Such transfer does not qualify as a transfer to provide for the satisfaction of an asserted liability because M has not transferred the money beyond its control.

Example (2). M Corporation contests a $5,000 liability asserted against it by L Company for services rendered. To provide for the contingency that it might have to pay the liability, M transfers $5,000 to an irrevocable trust pursuant to a written agreement among the trustee, M (the taxpayer), and L (the person who is asserting the liability) that the money shall be held until the contest is settled and then disbursed in accordance with the settlement. Such transfer qualifies as a transfer to provide for the satisfaction of an asserted liability.

(d) Contest exists after transfer. In order for a contest with respect to an asserted liability to exist after the time of transfer, such contest must be pursued subsequent to such time. Thus, the contest must have been neither settled nor abandoned at the time of the transfer. A contest may be settled by a decision, judgment, decree, or other order of any court of competent jurisdiction which has become final, or by written or oral agreement between the parties. For example, Z Corporation, which uses an accrual method of accounting, in 1964 contests a $100 asserted liability. In 1967 the contested liability is settled as being $80 which Z accrues and deducts for such year. In 1968 Z pays the $80. Section 461(f) does not apply to Z with respect to the transfer because a contest did not exist after the time of such transfer.

(e) Deduction otherwise allowed—(1) In general. The existence of the contest with respect to an asserted liability must prevent (without regard to section 461(f)) and be the only factor preventing a deduction for the taxable year of the transfer (or, in the case of an accrual method taxpayer, for an earlier taxable year for which such amount would be accruable) to provide for the satisfaction of such liability. Nothing in section 461(f) or this section shall be construed to give rise to a deduction since section 461(f) and this section relate only to the timing of deductions which are otherwise allowable under the Code.

(2) Example. The provisions of this paragraph are illustrated by the following example:

Example. A, an individual, makes a gift of certain property to B, an individual. A pays the entire amount of gift tax assessed against him but contests his liability for such tax. Section 275(a)(3) provides that gift taxes are not deductible. A does not satisfy the requirement of paragraph (a)(1)(iv) of this section since a deduction would not be allowed for the taxable year of the transfer even if A did not contest his liability for such tax.

(f) Effective date. Paragraphs (a) through (e) of this section apply to transfers of money or other property made in taxable years beginning after December 31, 1953, and ending after August 16, 1954.

(g) Election as to transfers in taxable years beginning before January 1, 1964—(1) Statutory provisions. Section 223(c) of the Revenue Act of 1964 (78 Stat. 76) provides as follows:

SEC. 223. **Timing of deductions in certain cases where asserted liabilities are contested.**

* * * * *

(c) Election as to transfers in taxable years beginning before January 1, 1964. (1) The amendments made by subsection (a) shall not apply to any transfer of money or other property described in subsection (a) made in a taxable year beginning before January 1, 1964, if the taxpayer elects, in the manner provided by regulations prescribed by the Secretary of the Treasury or his delegate, to have this paragraph apply. Such an election—

(A) Must be made within one year after the date of the enactment of this Act,

(B) May not be revoked after the expiration of such one-year period, and

(C) Shall apply to all transfers described in the first sentence of this paragraph (other than transfers described in paragraph (2)).

In the case of any transfer to which this paragraph applies, the deduction shall be allowed only for the taxable year in which the contest with respect to such transfer is settled.

(2) Paragraph (1) shall not apply to any transfer if the assessment of any deficiency which would result from the application of the election in respect of such transfer is, on the date of the election under paragraph (1), prevented by the operation of any law or rule of law.

(3) If the taxpayer makes an election under paragraph (1), and if, on the date of such election, the assessment of any deficiency which results from the application of the election in respect of any transfer is not prevented by the operation of any law or rule of law, the period within which assessment of such deficiency may be made shall not expire earlier than 2 years after the date of the enactment of this Act.

(2) In general. Except as provided in subparagraph (3) of this paragraph, section 461(f) of the Internal Revenue Code of 1954 and the last two sentences of section 43 of the Internal Revenue Code of 1939, as added by section 223(a) of the Revenue Act of 1964, shall not apply to any transfers of money or other property described in either such section which are made in taxable years beginning before January 1, 1964, if the taxpayer makes a valid election, in the manner and within the time provided in subparagraph (4) of this paragraph, to have this paragraph apply to such transfers. In the case of any transfer to which this paragraph applies, the deduction with respect to the contested amount shall be allowed only for the taxable year in which the contest with respect to such transfer is settled.

(3) Transfers covered. A valid election under this paragraph shall apply to all transfers of money or other property described in section 461(f) of the 1954 Code or the last two sentences of section 43 of the 1939 Code made in taxable years beginning before January 1, 1964, except that such election shall not apply to any such transfer if the assessment of any deficiency which would result from the application of such election in respect of such transfer is, on the date such election is made, prevented by the operation of any law or rule of law.

(4) Time and manner of making election. (i) The taxpayer shall make the election referred to in subparagraph (2) of this paragraph by filing a statement, containing the information required by subdivision (ii) of this subparagraph, with the district director with whom he files his income tax return for the taxable year in which the election is made. The election must be made on or before February 26, 1965, and shall be irrevocable after such date. A copy of the statement of election shall be attached to the taxpayer's income tax return or claim for refund for the taxable year in which the contest is settled; except that if, before the time the election is made, the taxpayer filed an income tax return or a claim for refund for the taxable year in which the contest was settled, and if, after the time the election is made, such taxpayer does not file an amended income tax return or claim for refund for such year, then such taxpayer shall provide a copy of the statement of election to the district director with whom he filed his income tax return or claim for refund for the taxable year in which the contest was settled. In addition, the taxpayer shall provide copies of the statement of election to the district directors with whom he filed his income tax returns for the taxable years of the transfers with respect to which the election is made no later than 30 days after making such election.

(ii) The statement referred to in subdivision (i) of this subparagraph shall contain the following information:

(a) The name, address, and taxpayer account number of the taxpayer;

(b) A statement that the taxpayer elects, under section 223(c) of the Revenue Act of 1964, not to have the amendments made by section 223(a) of such Act apply to any transfers described in section 461(f) of the Internal Revenue Code of 1954 or the last two sentences of section 43 of the Internal Revenue Code of 1939 made by him in taxable years beginning before January 1, 1964;

(c) The amount and date of each transfer described in such sections made in a taxable year beginning before January 1, 1964, to which the election under this paragraph applies; and

(d) The district director with whom the taxpayer's return was filed for each taxable year affected by the election under this paragraph.

(5) Period of assessment extended. If the taxpayer makes a valid election under this paragraph, and if, on the date of such election, the assessment of any deficiency which results from the application of the election in respect of any transfer is not prevented by the operation of any law or any rule of law, the period within which assessment of such deficiency may be made shall not expire before February 26, 1966, and such election shall be considered as a consent to such extension.

(6) Example. The provisions of this paragraph are illustrated by the following example:

Example. Z Corporation makes its return on the basis of a calendar year and uses an accrual method of accounting. Z contests $20 of the $100 real property tax liability asserted against it for each of the years 1958 through 1963 but pays the entire $100 in each such year. Z does not contest any other asserted liabilities in the years 1958 through 1963. Z deducts $100 for each of the years 1958 through 1963 and for each of such years files its income tax return on March 15 of the following year. On October 1, 1964, Z makes a valid election under this paragraph. The contests with respect to the real property taxes for each of the years 1958 through 1963 are settled in 1967. Assuming that the assessment of any deficiencies which would result from the application of such election to the transfers in the taxable years 1958, 1959, and 1960 are, on October 1, 1964, prevented by the operation of section 6501, the election under this paragraph does not apply to the transfers made in such years. Since the assessment of any deficiencies which would result from the application of such election to the transfers in the taxable years 1961, 1962, and 1963 are not, on October 1, 1964, prevented by the operation of section 6501, the election under this paragraph does apply to the transfers

made in such years. Thus, Z deducts $60 (that is, $20 of the 1961 transfer, $20 of the 1962 transfer, and $20 of the 1963 transfer) for the taxable year 1967 and files amended returns for taxable years 1961, 1962, and 1963, deducting only $80 rather than $100 in each such year. The period within which the assessment of any deficiencies may be made which result from the application of such election to the transfers in the taxable years 1961, 1962, and 1963 shall not expire before February 26, 1966. The result would be the same if Z Corporation used the cash method of accounting.

(h) Certain other transfers in taxable years beginning before January 1, 1964—(1) Statutory provisions. Section 223(d) of the Revenue Act of 1964 (78 Stat. 77) provides as follows:

SEC. 223. Timing of deductions in certain cases where asserted liabilities are contested.

* * * * *

(d) Certain other transfers in taxable years beginning before January 1, 1964. The amendments made by subsection (a) shall not apply to any transfer of money or other property described in subsection (a) made in a taxable year beginning before January 1, 1964, if—

(1) No deduction has been allowed in respect of such transfer for any taxable year before the taxable year in which the contest with respect to such transfer is settled, and

(2) Refund or credit of any overpayment which would result from the application of such amendments to such transfer is prevented by the operation of any law or rule of law.

In the case of any transfer to which this subsection applies, the deduction shall be allowed for the taxable year in which the contest with respect to such transfer is settled.

(2) Deduction allowed in year contest is settled. Section 461(f) of the Internal Revenue Code of 1954 and the last two sentences of section 43 of the Internal Revenue Code of 1939, as added by section 223(a) of the Revenue Act of 1964, shall not apply to any transfer of money or other property described in either such section which is made in a taxable year beginning before January 1, 1964, if—

(i) No deduction has been allowed in respect of such transfer for any taxable year before the taxable year in which the contest with respect to such transfer is settled, and

(ii) Refund or credit of any overpayment which would result from the application of section 461(f) of the Internal Revenue Code of 1954 or the last two sentences of section 43 of the Internal Revenue Code of 1939 to such transfer is prevented by the operation of any law or rule of law.

In the case of any transfer to which this subparagraph applies, the deduction with respect to the contested amount shall be allowed only for the taxable year in which the contest with respect to such transfer is settled. Thus, if, at any time when a refund or credit of any overpayment, which would result from the application of paragraph (a)(1) of this section to a transfer of money or other property described in such paragraph (a)(1) made in a taxable year beginning before January 1, 1964, is prevented by the operation of any law or rule of law, no deduction has been allowed in respect of such transfer for any taxable year before the taxable year in which the contest with respect to such transfer is settled, then a deduction shall be allowed to the taxpayer for the taxable year in which such contest is settled.

(3) Example. The provisions of this paragraph are illustrated by the following example:

Example. R Corporation makes its return on the basis of a calendar year and uses an accrual method of accounting. In 1962, R contests $20 of a $100 asserted real property tax liability but pays the entire $100 to the taxing authority. R deducts $80 for the taxable year 1962. R files its income tax return for 1962 on March 15, 1963. In 1967, the contested tax is settled as being $100. Assuming that R did not deduct such contested $20 for any taxable year prior to 1967, and that a refund or credit of any overpayment which would result from the application of paragraph (a)(1) of this section to the transfer of such $20 in 1962 is prevented by the operation of section 6501, paragraph (a)(1) of this section does not apply to the transfer of such $20 in 1962, and R deducts such $20 for the taxable year 1967. The result would be the same if R Corporation used the cash method of accounting.

[T.D. 6772, 29 FR 15753, Nov. 24, 1964]

§ 1.461–3T Questions and answers relating to the effective dates of section 461(h) (temporary).

Q–1. What is the effective date of section 461(h)?

A–1. Except as otherwise provided in this section, section 461(h) applies to amounts that would be allowable as deductions after July 18, 1984, under the law in effect before the enactment of section 461(h) ("cut-off method"). See A–2 of this section for alternative effective dates that may be elected by a taxpayer and A–12 of this section for the effective date applicable to the accrual of interest expense. The following example illustrates the effective date provided in the first sentence of this A–1.

Example—(1) Facts. X corporation, a calendar year, accrual method taxpayer, has been a self-insurer with respect to workers' compensation claims since 1977. Before July 19, 1984, X accrues workers' compensation liabilities for the taxable year in which the award is determined by the applicable state commission. In addition, workers' compensation liabilities are not inventoriable costs of X under § 1.471–3 or § 1.471–11(c)(2). For the taxable year ending December 31, 1983, X accrues a liability to employee A in the amount of $12,000 based on a determination by the state commission that occurred during 1983. X pays A $6,000 on both March 15, 1984, and November 15, 1984, in complete satisfaction of the workers' compensation liability. On May 15, 1984, the state commission determines that X is liable to pay B $8,000 as

workers' compensation, and on December 15, 1984, the state commission determines that X is liable to pay C $4,000 as workers' compensation. The liabilities to B and C remain unpaid as of December 31, 1984. The exception provided in section 461(h)(3)(A) for certain recurring items does not apply to workers' compensation liabilities.

(2) Cut-off method. If X does not elect the alternative effective dates provided in A–2 of this section, the cut-off method applies to the workers' compensation liabilities. Under the cut-off method, the $12,000 liability to A is deductible under the law in effect before the enactment of section 461(h) for the taxable year ending December 31, 1983. The $8,000 liability to B is deductible under the law in effect before the enactment of section 461(h) for the taxable year ending December 31, 1984. The $4,000 liability to C is subject to section 461(h) and is not deductible until paid. Because the full amount of the liabilities to A and B is deductible under the law in effect before the enactment of section 461(h), no deduction is permitted when those liabilities are paid.

Q–2. What elections are available to a taxpayer with respect to the effective dates of section 461(h)?

A–2. A taxpayer may elect to treat the changes in the timing of deductions required by section 461(h) as a change in method of accounting initiated by the taxpayer and deemed made with the consent of the Commissioner. A taxpayer making this election must further elect for the change in method of accounting to be applicable either to—

(a) Taxable years ending after July 18, 1984, but, in the case of a taxable year that includes July 19, 1984 ("taxable year of change"), only to the portion of such taxable year that occurs after July 18, 1984 ("part-year change in method"); or

(b) Taxable years ending after July 18, 1984 ("full-year change in method").

If an election under this A–2 is not properly made in accordance with this section, the effective date provided in A–1 of this section (the cut-off method) shall apply.

Q–3. What items are subject to the elections described in A–2 of this section?

A–3. (a) With respect to any separate trade or business of a taxpayer, a part-year change in method may be elected for one or more types of items incurred in such separate trade or business. If the part-year change in method is elected with respect to a type of item in a separate trade or business, the election applies to the entire amount of each item of that type incurred in that trade or business. If the part-year change in method is elected with respect to one or more types of items in a separate trade or business, the other types of items in such trade or business with respect to which the part-year change in method is not elected are subject to the cut-off method. A taxpayer may elect a part-year change in method with respect to a type of item incurred in one trade or business and not with respect to the same type of item incurred in a separate trade or business.

(b) With respect to any separate trade or business of a taxpayer, a full-year change in method may be elected for all items incurred in such separate trade or business. If the full-year change in method is elected for a trade or business, the election applies to the entire amount of all items of all types incurred in the trade or business. Thus, an election to use a full-year change in method for a trade or business precludes the use of the part-year change in method or the cut-off method with respect to any item incurred in the trade or business. A taxpayer may, however, elect a full-year change in method for one trade or business and not for a separate trade or business.

(c) For purposes of this section, a taxpayer is engaged in separate trades or businesses (whether or not different methods of accounting are used for such trades or businesses) if, and only if, the trades or businesses are separate and distinct within the meaning of § 1.446–1(d).

(d) For purposes of this section, items are to be classified by type in a manner that results in classifications that are no less inclusive than the classifications of production costs provided in the full-absorption regulations of § 1.471–11(b) and (c), whether or not the taxpayer is required to maintain inventories.

(e) The following example illustrates the provisions of this A–3:

Example—(1) Facts. Y corporation, a calendar year, accrual method taxpayer, is engaged in a personal service business and a manufacturing business that are separate and distinct trades or businesses within the meaning of § 1.446–1(d). During the taxable year ending December 31, 1984, the personal service business of Y incurs advertising expenses and insurance costs, and the manufacturing business of Y incurs advertising expenses, insurance costs and research and experimental expenses.

(2) Part-year change in method. (i) Y may elect the part-year change in method with respect to a type of item incurred in either trade or business without electing the part-year change in method with respect to other types of items incurred in the same trade or business. Thus, Y may elect the part-year change in method with respect to the advertising expenses incurred in the personal service business without electing the part-year change in method with respect to the insurance costs incurred in the personal service business.

(ii) Y may also elect the part-year change in method with respect to a type of item incurred in either trade or business without electing the part-year change in method with respect to items of the same type incurred in the other trade or business. Thus, Y may elect the part-year change in method with respect to the advertising expenses or the insurance costs incurred in the personal service business without electing the part-year

change in method with respect to the advertising expenses or the insurance costs incurred in the manufacturing business.

(3) **Full-year change in method.** (i) If Y elects the full-year change in method for either trade or business, the election applies to all items incurred in that trade or business. Thus, if Y elects the full-year change in method for the manufacturing business, the election applies to the advertising expenses, insurance costs and research and experimental expenses.

(ii) Y may elect the full-year change in method for either trade or business without electing the full-year change in method for the other trade or business. Thus, Y may elect the full-year change in method for the manufacturing business without electing the full-year change in method for the personal service business.

Q–4. What is the effect of electing a part-year change in method or a full-year change in method?

A–4. (a) An election to use a part-year change in method or a full-year change in method shall be treated for purposes of section 446(e) as a change in method of accounting initiated by the taxpayer and deemed made with the consent of the Commissioner.

(b) In the case of a part-year change in method, the change in method of accounting occurs on July 19, 1984, and a section 481(a) adjustment for each type of item is determined as of that date (i.e., for purposes of computing the section 481(a) adjustment, the first day of the taxable year of change is July 19, 1984, and the last day of the preceding taxable year is July 18, 1984). Although July 18, 1984, is treated as the last day of a taxable year for purposes of computing the section 481(a) adjustment, an election to use a part-year change in method does not terminate the taxable year of change for any other purpose.

(c) In the case of a full-year change in method, the change in method of accounting occurs on the first day of the taxable year that includes July 19, 1984 ("taxable year of change"), and the section 481(a) adjustment is determined as of that date.

(d) The following example illustrates the provisions of this A–4:

Example—(1) Facts. Assume the same facts as provided in the example contained in A–1 of this section.

(2) **Part-year change in method.** (i) If X elects to use a part-year change in method with respect to employee benefits (a type of item that includes workers' compensation liabilities under § 1.471–11(c)(2)(iii)(c)), the $12,000 liability to A is deductible under the law in effect before the enactment of section 461(h) for the taxable year ending December 31, 1983. In addition, the $8,000 liability to B is deductible under the law in effect before the enactment of section 461(h) for the taxable year ending December 31, 1984. The $6,000 paid to A on November 15, 1984, and the $8,000 paid to B in a later taxable year are deductible under section 461(h) for the taxable year in which paid. The $4,000 liability to C is not deductible for the taxable year ending December 31, 1984, but, instead, is deductible under section 461(h) for the taxable year in which paid.

(ii) A section 481(a) adjustment of $14,000 (determined as of July 19, 1984) is required and ordinarily is to be taken into account ratably for X's 1984, 1985 and 1986 taxable years (see A–9 of this section).

(3) **Full-year change in method.** (i) If X elects to use a full-year change in method, the $12,000 liability to A is deductible under the law in effect before the enactment of section 461(h) for the taxable year ending December 31, 1983. In addition, the $6,000 amounts paid to A on March 15, 1984, and November 15, 1984, are deductible under section 461(h) for the taxable year ending December 31, 1984. The liabilities to B and C are not deductible for the taxable year ending December 31, 1984, but, instead, are deductible under section 461(h) for the taxable year in which paid.

(ii) A section 481(a) adjustment of $12,000 (determined as of January 1, 1984, the first day of the taxable year of change) is required and ordinarily is to be taken into account ratably for X's 1984, 1985 and 1986 taxable years (see A–9 of this section).

Q–5. How does a taxpayer elect to use a part-year change in method or a full-year change in method?

A–5. (a) The election to use a part-year change in method or a full-year change in method is irrevocable and must be made by attaching a statement (hereafter "Election Statement") to the taxpayer's timely filed Federal income tax return for the taxable year that includes July 19, 1984 ("taxable year of change"). If the taxpayer has filed a return for the taxable year of change on or before June 19, 1985, the taxpayer may make the election by attaching the Election Statement to a return, as amended, or an amended return for such year provided that the return or amended return is filed on or before August 19, 1985.

(b) The Election Statement shall include the following information—

(1) The legend "Election under § 1.461–3T" typed or legibly printed at the top of the first page;

(2) The taxpayer's name, address and taxpayer identification number;

(3) An identification of the election as either a part-year or full-year change in method;

(4) The dates on which the taxable year of change begins and ends;

(5) Whether the electing taxpayer is subject to any of the conditions listed in section 4.01 of Rev.Proc. 84–74, 1984–44 I.R.B. 15, at the time the Election Statement is filed, and, if so, a description of each such condition;

(6) Whether the electing taxpayer has an application for change in accounting method pending with the Internal Revenue Service at the time the Election Statement is filed, and, if so, the type of change requested in each application;

(7) Whether the electing taxpayer has a request for a ruling or technical advice pertaining to any

accounting method pending with the Internal Revenue Service at the time the Election Statement is filed, and, if so, a description of the issue involved in each request;

(8) If the electing taxpayer is a member of an affiliated group filing a consolidated return for the taxable year of change, the information required in paragraph (b)(5), (6), and (7) of this A–5 for each member of the group that is not an electing taxpayer (if more than one member of the group is an electing taxpayer, this information may be provided in a separate statement that is attached to the consolidated return and incorporated by reference in each Election Statement);

(9) For each type of item with respect to which an election of a part-year change in method is to apply—

(i) A description of the type of item;

(ii) Whether the method of accounting for the type of item has been used for two taxable years or less, and, if so, the number of years;

(iii) Whether the type of item includes inventoriable costs within the meaning of § 1.471–3 or § 1.471–11 or costs that must be capitalized;

(iv) The amount of the section 481(a) adjustment for the type of item; and

(v) The amount of the section 481(a) adjustment for the type of item that is attributable to the taxable year immediately preceding the taxable year of change (see paragraph (c) of A–9 of this section); and

(10) If the election is a full-year change in method—

(i) Whether the method of accounting being changed has been used for two taxable years or less, and, if so, the number of years;

(ii) Whether any of the types of items that are subject to the election include inventoriable costs within the meaning of § 1.471–3 or § 1.471–11 or costs that must be capitalized, and, if so, a description of each such type of item;

(iii) The amount of the section 481(a) adjustment required by the change in method of accounting; and

(iv) The amount of the section 481(a) adjustment that is attributable to the taxable year immediately preceding the taxable year of change (see paragraph (c) of A–9 of this section).

(c) If a taxpayer elects to use a part-year change in method or a full-year change in method with respect to a separate trade or business (as defined in paragraph (c) of A–3 of the section), but does not make the same election with respect to all trades or business, separate Election Statement containing the information specified in paragraph (b) of this A–5 is required for each separate trade or business with respect to which an election is made. In addition, the separate Election Statement shall describe the nature of the trade or business.

Q–6. If a taxpayer elects to use either a part-year change in method or a full-year change in method, how does the recurring item exception apply?

A–6. If, with respect to a type of item, the taxpayer elects to use a part-year change in method or a full-year change in method and also adopts the recurring item exception of section 461(h)(3) as a method of accounting for the taxable year of change (see A–7 of the section), the following rules apply:

(a) An amount that was taken into account under the taxpayer's method of accounting for a taxable year preceding the taxable year of change and that would have been taken into account under the recurring item exception for the same taxable year preceding the taxable year of change shall not be taken into account in computing the taxable income of the taxpayer under the taxpayer's new method of accounting. An amount would have been taken into account under the recurring item exception for a taxable year preceding the taxable year of change if all elements of the recurring item exception were satisfied for any taxable year preceding the taxable year of change.

(b) If, under paragraph (a) of this A–6, an amount is not permitted to be taken into account under the taxpayer's new method of accounting, the amount shall not be taken into account in computing the amount of the section 481(a) adjustment.

(c) For purposes of the A–6, in the case of a part-year change in method, the recurring item exception and the rules of paragraph (a) and (b) of this A–6 shall be applied as if the portion of the taxable year of change that precedes July 19, 1984, were a separate taxable year preceding the taxable year of change, except as provided below with respect to the determination of whether an item is material and whether a more proper match with income will result. Thus, in the case of a part-year change in method, an amount would have been taken into account under the recurring item exception for a taxable year preceding the taxable year of change if all elements of the recurring item exception were satisfied for any taxable year pre-

ceding the taxable year of change or for the portion of the taxable year of change that precedes July 19, 1984. In determining whether economic performance occurs within the shorter of (1) a reasonable period after the close of the portion of the taxable year of change that precedes July 19, 1984, or (2) 8 ½ months after the close of such portion of the taxable year of change, the last day of the taxable year is to be considered July 18, 1984, and the 8 ½ month period does not extend beyond March 31, 1985. In determining whether an item is a material item, and in determining whether the accrual of an item in the portion of the taxable year of change that precedes July 19, 1984, results in a more proper match against income than accruing such item in the taxable year in which economic performance occurs, all items of income, gain, loss, deduction, or credit for the entire taxable year that includes July 18, 1984, shall be considered.

(d) The following examples illustrate the principles of this A–6:

Example (1)—(i) Facts. V corporation, a calendar year, accrual method taxpayer, properly elects to use a full-year change in method and adopts the recurring item exception as a method of accounting for items of type 1. For the taxable year ending December 31, 1983, V incurs A, an item of type 1, under the law in effect before the enactment of section 461(h). Economic performance with respect to item A occurs on August 1, 1984. In addition, all the elements of the recurring item exception are satisfied with respect to item A for the taxable year ending December 31, 1983.

(ii) Full-year change in method. Under the law in effect before the enactment of section 461(h), V takes item A into account for the taxable year ending December 31, 1983. Even though economic performance occurs with respect to item A in the taxable year ending December 31, 1984, the item is not taken into account a second time because, under the recurring item exception, the item would have been taken into account for the taxable year ending December 31, 1983. Since there is no duplication or omission with respect to item A by reason of the change in method of accounting, V will not take A into account in computing the section 481(a) adjustment.

Example (2)—(i) Facts. W corporation, a calendar year, accrual method taxpayer, properly elects to use a part-year change in method for items of type 2 and adopts the recurring item exception as a method of accounting for items of type 2. The books and records of W indicate that, under the law in effect before the enactment of section 461(h), B, an item of type 2, was incurred during the taxable year ending December 31, 1984, and before July 19, 1984. Economic performance with respect to item B occurs on August 1, 1984. Income with respect to item B is properly accounted for after July 18, 1984, but during the taxable year ending December 31, 1984. In addition, all the other elements of the recurring item exception are satisfied with respect to item B as of July 18, 1984.

(ii) Part-year change in method. Under the law in effect before the enactment of section 461(h), W takes item B into account for the taxable year ending December 31, 1984. Even though economic performance occurs with respect to item B after July 18, 1984, and even though income with respect to item B is accounted for after July 18, 1984, the item is not taken into account a second time because, under the recurring item exception, the item would have been taken into account for the portion of the taxable year that precedes July 19, 1984. Since there is no duplication or omission with respect to item B by reason of the change in method of accounting, W will not take item B into account in computing the section 481(a) adjustment. The result provided in this example would be the same even though economic performance with respect to item B occurred on February 1, 1985, provided that such date is within the reasonable period specified in section 461(h)(3)(A)(ii).

Q–7. How does a taxpayer adopt the recurring item exception of section 461(h)(3) as a method of accounting?

A–7. (a) The recurring item exception of section 461(h)(3) is a method of accounting that must be consistently applied with respect to a type of item from one taxable year to the next in order to clearly reflect income. Except as otherwise provided in paragraph (b) of this A–7 (relating to the adoption of the recurring item exception for the taxable year that includes July 19, 1984), the rules of section 446(e) and § 1.446–1(e) apply to changes to or from the recurring item exception as a method of accounting for a type of item.

(b) For the taxable year that includes July 19, 1984, a taxpayer need not obtain the Commissioner's consent to adopt the recurring item exception as a method of accounting for a type of item, but must instead—

(1) Account for the type of item on its return for such taxable year by using the recurring item exception as a method of accounting (see paragraph (a) of A–6 of this section for the manner in which the recurring item exception applies to those types of items with respect to which the taxpayer elects to use a part-year or full-year change in method); and

(2) Identify on a statement attached to the return for such taxable year each trade or business with respect to which the recurring item exception is adopted and, unless the recurring item exception is adopted with respect to all types of items (as defined in paragraph (d) of A–3 of this section) incurred in the trade or business (in which case the attached statement must so indicate), the types of items with respect to which the recurring item exception is adopted.

Q–8. If a taxpayer elects to use either a part-year change in method or a full-year change in method, how is the section 481(a) adjustment calculated?

A–8. (a) If a taxpayer elects to use a part-year change in method, the section 481(a) adjustment is calculated as follows:

(1) If the taxpayer elects to use a part-year change in method for more than one trade or business, or with respect to more than one type of item, a separate section 481(a) adjustment is required for each type of item incurred in each separate trade or business.

(2) For each type of item, the section 481(a) adjustment is determined as of July 19, 1984, and may be computed in the following manner. First, a hypothetical section 481(a) adjustment is calculated as if section 461(h) became effective as of the first day of the taxable year that follows the taxable year of change (as defined in paragraph (a) of A–2 of this section). This amount is reduced by the amount of items incurred during the taxable year of change and after July 18, 1984, under the law in effect before the enactment of section 461(h) and increased by the amount of items incurred during the taxable year of change and after July 18, 1984, under the law in effect after the enactment of section 461(h). For an example of the computation of the section 481(a) adjustment, see the example contained in paragraph (b) of A–10 of this section.

(b) If a taxpayer elects to use a full-year change in method for more than one separate trade or business, a separate section 481(a) adjustment must be determined for each trade or business as of the first day of the taxable year of change (as defined in paragraph (c) of A–4 of this section).

(c) A taxpayer must maintain adequate books and records so that the Service may, upon examination, verify the calculation of the section 481(a) adjustment.

Q–9. If a taxpayer elects to use either a part-year change in method or a full-year change in method, how are the separate section 481(a) adjustments taken into account?

A–9. (a) Except as otherwise provided in paragraph (b) of this A–9, a taxpayer who elects either a part-year change in method or a full-year change in method shall take into account one-third of any separate section 481(a) adjustment (determined in accordance with A–8 of this section) in the taxable year of change and one-third of such adjustment in each of the two immediately succeeding taxable years.

(b) Any separate section 481(a) adjustment shall be taken into account in fewer than three taxable years in the following cases:

(1) If 75% or more of the section 481(a) adjustment is attributable to the taxable year immediately preceding the taxable year of change, the amount of the adjustment attributable to the taxable year immediately preceding the taxable year of change shall be taken into account in the taxable year of change and, except as otherwise provided in paragraph (b)(2) of this A–9, one-half of the remaining section 481(a) adjustment shall be taken into account in each of the two immediately succeeding taxable years.

(2) If the taxpayer has employed the same method of accounting with respect to the type of item or for the trade or business for only the two taxable years immediately preceding the taxable year of change, one-half of the section 481(a) adjustment, or, if greater, the amount determined under paragraph (b)(1) of this A–9, is to be taken into account in the taxable year of change and the remaining section 481(a) adjustment is to be taken into account in the immediately succeeding taxable year.

(3) The taxpayer shall take into account, in the taxable year in which the taxpayer dies or ceases to engage in the trade or business to which the section 481(a) adjustment relates, the balance of the adjustment not previously taken into account. For purposes of the preceding sentence, a taxpayer is not considered to have ceased to engage in a trade or business if the cessation is the result of a transaction to which section 381 of the Code applies, but in that case the acquiring corporation shall continue to be subject to the provisions of this A–9.

(4) If the taxpayer is a cooperative within the meaning of section 1381(a) of the Code, the total amount of the section 481(a) adjustment is to be taken into account in the taxable year of change.

(c) For purposes of this A–9, the taxable year immediately preceding the taxable year of change is the last taxable year of the taxpayer ending before July 19, 1984. The amount of the section 481(a) adjustment attributable to the taxable year immediately preceding the taxable year of change is the excess of (1) the amount of the section 481(a) adjustment (determined under A–8 of this section), over (2) the amount of the adjustment that would have been required under section 481(a) if the same change in method of accounting had been made in the taxable year immediately preceding the taxable year of change. If a taxpayer's books and records do not contain sufficient information to compute the section 481(a) adjustment attributable to the taxable year immediately preceding the taxable year of change, the taxpayer must reasonably estimate the amount of such adjustment and must include the following statement as part of the Election Statement:

(1) The books and records of (name of taxpayer) do not contain sufficient information to permit a computation of the section 481(a) adjustment attributable to the taxable year immediately preceding the taxable year of change.

(2) Based on the information contained in the books and records, (indicate "75% or more" or "less than 75%" as the case may be) of the section 481(a) adjustment is attributable to the taxable year immediately preceding the taxable year of change.

For the penalties of perjury applicable to this statement, see section 6065 and the declaration of the taxpayer included on the return.

Q–10. If a taxpayer elects to use a part-year change in method with respect to a type of item, how is the amount of an item of that type taken into account in computing taxable income for the taxable year of change?

A–10. (a) If a taxpayer elects to use a part-year change in method with respect to a type of item, the amount of an item of that type is taken into account in computing taxable income for the taxable year of change in accordance with the following rules:

(1) If the taxpayer can determine that, under the law in effect before the enactment of section 461(h), the amount was incurred during the taxable year of change and before July 19, 1984, the amount is taken into account for the taxable year of change.

(2) If, under the law in effect before the enactment of section 461(h), the amount was incurred during the taxable year of change, but the taxpayer cannot determine whether the amount was so incurred before July 19, 1984, or after July 18, 1984, a portion of the amount is taken into account under this paragraph (a)(2) for the taxable year of change. The portion taken into account under this paragraph (a)(2) is the entire amount of the item multiplied by a fraction, the numerator of which is the number of days in the taxable year of change that precede July 19, 1984, and the denominator of which is the total number of days in such year (*e.g.*, in the case of a calendar taxable year, the fraction is $^{200}/_{366}$ or .55 if rounded).

(3) If the taxpayer can determine that, under the law in effect after the enactment of section 461(h), the amount was incurred during the taxable year of change and after July 18, 1984, the amount is taken into account for the taxable year of change.

(4) If, under the law in effect after the enactment of section 461(h), the amount was incurred during the taxable year of change, but the taxpayer cannot determine whether the amount was so incurred before July 19, 1984, or after July 18, 1984, a portion of the amount is taken into account under this paragraph (a)(4) for the taxable year of change. The portion taken into account under this paragraph (a)(4) is the entire amount of the item multiplied by a fraction, the numerator of which is the number of days in the taxable year of change that follow July 18, 1984, and the denominator of which is the total number of days in such year (*e.g.*, in the case of a calendar taxable year, the fraction is $^{166}/_{366}$ or .45 if rounded).

(5) The amount taken into account with respect to the item for the taxable year of change equals the amount, if any, determined under paragraph (a)(1) or paragraph (a)(2) of this A–10, plus the amount, if any, determined under paragraph (a)(3) or paragraph (a)(4) of this A–10.

(6) If a taxpayer maintains books and records that permit a determination of amounts incurred as of the end of a calendar month or calendar quarter but do not permit a determination of whether amounts were incurred before July 19, 1984, or after July 18, 1984, the proration rules of paragraph (a)(2) and paragraph (a)(4) of this A–10 may be applied at the election of the taxpayer by treating the calendar month or calendar quarter as the taxable year.

(7) The rules of paragraphs (a)(1) through (a)(6) of this A–10 are to be applied in determining the amount of each separate section 481(a) adjustment under paragraph (a) of A–8 of this section.

(b) The following example illustrates the principles of paragraph (a) of this A–10.

Example—(1) Facts. Z corporation, a calendar year, accrual method taxpayer, properly elects to use a part-year change in method with respect to items of type 1 and type 2, Z can determine that, under the law in effect before the enactment of section 461(h), items of type 1 in the amount of $12,000 were incurred during the taxable year ending December 31, 1984, $10,000 of which were so incurred before July 19, 1984, and $2,000 of which were so incurred after July 18, 1984. Of the items of type 1 in the amount of $12,000, Z can determine that, under the law in effect after the enactment of section 461(h), items in the amount of $7,000 were incurred during the taxable year ending December 31, 1984, and after July 18, 1984. The books and records of Z also indicate that as of December 31, 1984, the remaining items of type 1 in the amount of $5,000 had not been incurred under the law in effect after the enactment of section 461(h). The recurring item exception does not apply to items of type 1.

The books and records of Z also indicate that, under the law in effect before the enactment of section 461(h), items of type 2 in the amount of $15,000 were incurred during the taxable year ending December 31, 1984, but Z cannot determine whether the items were so incurred before July 19, 1984, or after July 18, 1984. Of the items of type 2 in the amount of $15,000, Z can determine that, under the law in effect after the enactment of section 461(h), items in the amount of $12,000 were incurred during the taxable year ending December 31, 1984, but Z

cannot determine whether the items were so incurred before July 19, 1984, or after July 18, 1984. The books and records of Z also indicate that, as of December 31, 1984, the remaining items of type 2 in the amount of $3,000 had not been incurred under the law in effect after the enactment of section 461(h). The recurring item exception does not apply to items of type 2.

(2) Part-year change in method. In computing taxable income for the taxable year ending December 31, 1984, Z takes into account items of type 1 in the amount of $17,000. Of this $17,000 amount, items in the amount of $10,000 are taken into account under paragraph (a)(1) of this A–10 and items in the amount of $7,000 are taken into account under paragraph (a)(3) of this A–10. Under paragraph (a)(2) of A–8 of this section, a section 481(a) adjustment of $10,000 is required with respect to items of type 1 ($5,000 end of year adjustment, decreased by $2,000 for the amount of items incurred during the taxable year of change and after July 18, 1984, under the law in effect before the enactment of section 461(h) and increased by $7,000 for the amount of items incurred during the taxable year of change and after July 18, 1984, under the law in effect after the enactment of section 461(h)).

In addition, in computing taxable income for the taxable year ending December 31, 1984, Z takes into account items of type 2 in the amount of $13,640. Of this $13,640 amount, items in the amount of $8,197 ($15,000×200/366) are taken into account under paragraph (a)(2) of this A–10 and items in the amount of $5,443 ($12,000×166/366) are taken into account under paragraph (a)(4) of this A–10. Under paragraph (a)(2) of A–8 of this section, a section 481(a) adjustment of $1,640 is required with respect to items of type 2 ($3,000 end of year adjustment reduced by $6,803 for the amount of items incurred during the taxable year of change and after July 18, 1984, under the law in effect before the enactment of section 461(h) and increased by $5,443 for the amount of items incurred during the taxable year of change and after July 18, 1984, under the law in effect after the enactment of section 461(h)).

Q–11. If a taxpayer does not elect to use a full-year change in method or a part-year change in method with respect to a type of item, how is the amount of an item of such type taken into account in computing taxable income?

A–11. (a) If a taxpayer does not elect to use a full-year change in method or a part-time change in method with respect to a type of item (*i.e.*, the cut-off method applies to the type of item), the amount of an item of that type is taken into account in computing taxable income in accordance with the following rules:

(1) If the taxpayer can determine that, under the law in effect before the enactment of section 461(h), the amount was incurred before July 19, 1984, the amount is taken into account for the taxable year in which so incurred.

(2) If the taxpayer can determine that, under the law in effect before the enactment of section 461(h), the amount was incurred after July 18, 1984, the amount is taken into account for the taxable year in which incurred under the law in effect after the enactment of section 461(h).

(3) If, under the law in effect before the enactment of section 461(h), the amount was incurred during the taxable year that includes July 19, 1984, but the taxpayer cannot determine whether the amount was so incurred before July 19, 1984, or after July 18, 1984—

(i) The amount is taken into account for the taxable year in which incurred under the law in effect after the enactment of section 461(h); or

(ii) At the taxpayer's election, the amount is taken into account under paragraph (a)(4) of this A–11.

(4) An amount is taken into account under this paragraph (a)(4) as follows:

(i) A portion of the amount equal to the entire amount of the item multiplied by a fraction, the numerator of which is the number of days in such taxable year that precede July 19, 1984, and the denominator of which is the total number of days in such year (*e.g.*, in the case of a calendar year, the fraction is 200/366 or .55 if rounded) is taken into account for the taxable year that includes July 19, 1984.

(ii) The remainder of the amount is taken into account for the taxable year or years (which may include the taxable year that includes July 19, 1984) that include all or a part of the adjustment period (as defined in paragraph (a)(5) of this A–11). The amount taken into account for a taxable year that includes all or a part of the adjustment period is the amount not taken into account under paragraph (a)(4)(i) of this A–11 multiplied by a fraction, the numerator of which is the number of days in the adjustment period that occur during the taxable year and the denominator of which is the total number of days in the adjustment period.

(5) For purposes of paragraph (a)(4)(ii) of this A–11, the adjustment period is the period that begins on the day following the last day of the transition period and that is equal in duration to the period that begins on July 19, 1984, and ends on the last day of the taxable year that includes July 19, 1984. For this purpose, the transition period is the period that begins on August 1, 1984, and is equal in duration to the number of full months that typically elapse (determined on a reasonable and consistent basis) between the date an item of that type is incurred under the law in effect before the enactment of section 461(h) and the date such an item is incurred under the law in effect after the enactment of section 461(h).

(b) The following example illustrates the principles of paragraph (a) of this A–11.

Example—(1) *Facts.* Assume the same facts as provided in the example contained in paragraph (b) of A-10 of this section, except that Z does not elect a part-year change in method with respect to items of type 1 and type 2. In addition, assume that the items of type 1 in the amount of $7,000 that were incurred during the taxable year ending December 31, 1984, and after July 18, 1984, under the law in effect after the enactment of section 461(h) were among the items of type 1 in the amount of $10,000 that were incurred during the taxable year ending December 31, 1984, and before July 19, 1984, under the law in effect before the enactment of section 461(h). Finally, assume that the transition period for items of type 2 is one month, beginning on August 1, 1984, and ending on August 31, 1984. Thus, the adjustment period for items of type 2 begins on September 1, 1984, and ends on February 13, 1985.

(2) *Cut-off method.* In computing taxable income for the taxable year ending December 31, 1984, Z takes into account items of type 1 in the amount of $10,000 under paragraph (a)(1) of this A-11. No additional amount is taken into account when the items taken into account under the preceding sentence are incurred under the law in effect after the enactment of section 461(h). Thus, neither the amount of items so incurred during the taxable year ending December 31, 1984 ($7,000), nor the amount of items to be incurred in a later taxable year ($3,000) are taken into account under the law in effect after the enactment of section 461(h). In addition, the items of type 1 in the amount of $2,000 that were incurred during the taxable year ending December 31, 1984, and after July 18, 1984, under the law in effect before the enactment of section 461(h), are not to be taken into account for the taxable year ending December 31, 1984, but, instead, are to be taken into account under paragraph (a)(2) of this A-11 for the taxable year in which incurred under the law in effect after the enactment of section 461(h).

If Z does not elect the rules contained in paragraph (a)(4) of this A-11 for all items of type 2, in computing taxable income for the taxable year ending December 31, 1984, Z takes into account items of type 2 in the amount of $12,000 under paragraph (a)(3)(i) of this A-11. The remaining items of type 2 in the amount of $3,000 are to be taken into account under paragraph (a)(3)(i) of this A-11 for the taxable year in which incurred under the law in effect after the enactment of section 461(h).

If Z elects the rules contained in paragraph (a)(4) of this A-11 for all items of type 2, in computing taxable income for the taxable year ending December 31, 1984, Z takes into account items of type 2 in the amount of $13,197. The remaining items of type 2 in the amount of $1,803 are taken into account for the taxable year ending December 31, 1985. These amounts are determined as follows:

(i) Under paragraph (a)(4)(i) of this A-11, items of type 2 in the amount of $8,197 ($15,000×200/366) are taken into account for the taxable year ending December 31, 1984.

(ii) Under paragraph (a)(5) of this A-11, the one month transition period begins on August 1, 1984, and ends on August 31, 1984, and the adjustment period begins on September 1, 1984, and ends on February 13, 1985. Thus, 122 days (the number of days from September 1, 1984, through December 31, 1984) of the 166 day adjustment period occur in the taxable year ending December 31, 1984. Under paragraph (a)(4)(ii) of this A-11, items of type 2 in the amount of $5,000 ($6,803×122/166) are taken into account for the taxable year ending December 31, 1984.

(iii) The remaining 44 days of the 166 day adjustment period occur in the taxable year ending December 31, 1985. Under paragraph (a)(4)(ii) of this A-11, items of type 2 in the amount of $1,803 ($6,803×44/166) are taken into account for the taxable year ending December 31, 1985.

Q-12. What is the effective date of section 461(h) with respect to the accrual of interest expense?

A-12. Section 461(h) applies to interest accruing under any obligation (whether or not evidenced by a debt instrument) if the obligation (a) is incurred in any transaction occurring after June 8, 1984, and (b) is not incurred under a written contract which was binding on March 1, 1984, and at all times thereafter until the obligation is incurred. Interest accruing under an obligation described in the preceding sentence is subject to section 461(h) even if the interest accrues before July 19, 1984. Similarly, interest accruing under any obligation incurred in a transaction occurring before June 9, 1984, (or under a written contract which was binding on March 1, 1984, and at all times thereafter until the obligation is incurred) is not subject to section 461(h) even to the extent the interest accrues after July 18, 1984.

Q-13. How do section 461(h) and this section affect taxpayers subject to any of the conditions listed in section 4.01 of Rev.Proc. 84-74, 1984-44 I.R.B. 15?

A-13. An accrual method taxpayer that is subject to any of the conditions listed in section 4.01 of Rev.Proc. 84-74, 1984-44 I.R.B. 15, on the date a return is filed for the taxable year that includes July 19, 1984, may be required to change its method of accounting for a taxable year preceding the taxable year that includes July 19, 1984. If a change is required, such change shall be taken into account in applying the rules of this section.

[T.D. 8024, 50 FR 20749, May 20, 1985]

§ 1.461(h)-4T Questions and answers relating to the economic performance requirement for certain employee benefits (temporary).

Q-1: What is the relationship between the economic performance requirement of section 461(h) and sections 404 and 419?

A-1: Section 404 provides that contributions paid and compensation paid or incurred with respect to a plan, or method or arrangement, deferring the receipt of compensation or providing for deferred benefits will be deductible only to the extent that they satisfy the requirements of section 162 or 212. Section 419 provides that contributions paid or accrued with respect to a "welfare benefit fund" (as defined in section 419(e) and Q&A-3 of § 1.419-1T) will be deductible only to

the extent that they satisfy the requirements of section 162 or 212. In the case of an accrual method taxpayer, a contribution or compensation satisfies the requirements of section 162 or 212 only to the extent that the all events test (as defined in section 461(h)(4)) and the economic performance requirement of section 461(h)(1) are satisfied. In the case of a contribution or compensation subject to section 404 or 419, pursuant to the authority under section 461(h)(2), economic performance occurs (a) in the case of a plan subject to section 404, either as the contribution is made under the plan or, if section 404(a)(5) is applicable, as an amount attributable to such contribution is includible in the gross income of an employee (or, if section 404(d) applies, a nonemployee); or (b) in the case of a welfare benefit fund, as a contribution is made to the welfare benefit fund. Solely for purposes of section 461(h), in the case of an employer's taxable year ending on or after July 18, 1984, and on or before March 21, 1986 contributions made to a welfare benefit fund after the end of such taxable year and on or before March 21, 1986 shall be deemed to have been made on the last day of such taxable year.

[T.D. 8073, 51 FR 4329, Feb. 4, 1986; T.D. 8073, 51 FR 11303, April 2, 1986]

§ 1.463–1T Transitional rule for vested accrued vacation pay (temporary).

(a) Introduction. Section 91(i) of the Tax Reform Act of 1984 provides a transitional rule for the election under section 463, relating to accrual of vacation pay. Section 91(i) applies only in the case of taxpayers with respect to which a deduction was allowable (other than under section 463) for vested accrued vacation pay for the last taxable year ending on or before July 18, 1984.

(b) Election under transitional rule. A taxpayer described in paragraph (a) of this section that makes an election under section 463 for the first taxable year ending after July 18, 1984, shall compute the opening balance of the account described in section 463(a)(1) ("accrual account") with respect to such vacation pay under the rules provided in paragraph (e)(3) of this section.

(c) Multiple vacation pay accounts within a single trade or business. **(1)** An election under section 463 must be made with respect to all vacation pay accounts maintained by the taxpayer within a single trade or business whether the liability is for vested accrued vacation pay or for vacation pay that is contingent.

(2) If a taxpayer has elected, in a taxable year ending on or before July 18, 1984, to treat contingent vacation pay with respect to a single trade or business under section 463, the taxpayer may elect, under the provisions of section 91(i) of the Tax Reform Act of 1984, to treat vested accrued vacation pay with respect to the same trade or business under section 463. However, no election may be made with respect to vacation pay for which a prior section 463 election was made and that is accounted for under section 463.

(d) Time for making election. A taxpayer described in paragraph (a) of this section that makes an election under section 463 for the first taxable year ending after July 18, 1984, must make the election on or before the due date (determined with regard to extensions) for filing the taxpayer's income tax return for such taxable year. However, if the taxpayer's income tax return was filed for the first taxable year ending after July 18, 1984, prior to March 6, 1986, the taxpayer must make the election by the later of the due date (determined with regard to extensions) for filing the taxpayer's income tax return, or May 5, 1986. In this case, the election must be made by filing an amended return (showing adjustments, if any) for such year and attaching the statement required by paragraph (e) of this section on or before the later of the due date (determined with regard to extensions) for filing the taxpayer's income tax return, or May 5, 1986.

(e) Manner of making election. A taxpayer must make the election described in paragraph (b) of this section by attaching a statement to the taxpayer's income tax return for the first taxable year ending after July 18, 1984. The statement must indicate that the taxpayer is electing to apply the provisions of section 463 with respect to vested accrued vacation pay for the taxpayer's first taxable year ending after July 18, 1984. The statement must contain the following information:

(1) The taxpayer's name and a description of the vacation pay plans to which the election applies.

(2) If a taxpayer has more than one trade or business and is not making the election with respect to all trades or businesses, a description of the trades or businesses to which the election applies.

(3) The opening balance in the taxpayer's accrual account. This balance equals the amount determined as if the taxpayer had maintained an account for the last taxable year ending on or before July 18, 1984, representing the taxpayer's liability

for vested accrued vacation pay earned by employees before the close of the last taxable year ending on or before July 18, 1984, and payable during that taxable year or within 12 months following the close of that taxable year. If the taxpayer's liability for vacation pay includes both vested accrued vacation pay and vacation pay the liability for which is contingent, the amount in the opening balance of the accrual account that represents the taxpayer's liability for contingent vacation pay is to be determined under the rules provided in section 463(b)(2).

(4) The opening balance in the taxpayer's suspense account. This balance equals the amount determined under paragraph (e)(3) of this section less the portion allowed as deductions under section 162 for prior taxable years for vacation pay earned but not paid at the close of the last taxable year ending on or before July 18, 1984.

(f) **Vested accrued vacation pay.** For purposes of paragraphs (a) through (e) of this section, "vested accrued vacation pay" means any amount allowable as a deduction under section 162(a) for a taxable year with respect to vacation pay of employees of the taxpayer (determined without regard to section 463). For purposes of this section, vacation pay will be considered vested accrued vacation pay even though there is a limit or ceiling on the amount of vacation pay an employee is entitled to as of the close of any plan year.

For example, if under a vacation pay plan an employee may accumulate no more than 40 days of vacation leave by the end of any plan year and any unused days in excess of 40 days are forfeited, the taxpayer is considered to have vested accrued vacation pay (even though the plan is not fully vested) and may make an election under the transitional rule.

[T.D. 8073, 51 FR 4329, Feb. 4, 1986; 51 FR 11303, April 2, 1986]

§ 1.465–1T Aggregation of certain activities (temporary).

(a) **General rule.** A partner in a partnership or an S corporation shareholder may aggregate and treat as a single activity—

(1) The holding, production, or distribution of more than one motion picture film or video tape by the partnership or S corporation,

(2) The farming (as defined in section 464(e)) of more than one farm by the partnership or S corporation,

(3) The exploration for, or exploitation of, oil and gas resources with respect to more than one oil and gas property by the partnership or S corporation, or

(4) The exploration for, or exploitation of, geothermal deposits (within the meaning of section 613(e)(3)) with respect to more than one geothermal property by the partnership or S corporation.

Thus, for example, if a partnership or S corporation is engaged in the activity of exploring for, or exploiting, oil and gas resources with respect to 10 oil and gas properties, a partner or S corporation shareholder may aggregate those properties and treat the aggregated oil and gas activities as a single activity. If that partnership or S corporation also is engaged in the activity of farming with respect to two farms, the partner or shareholder may aggregate the farms and treat the aggregated farming activities as a single separate activity. Except as provided in section 465(c)(2)(B)(ii), the partner or shareholder cannot aggregate the farming activity with the oil and gas activity.

(b) **Effective date.** This section shall apply to taxable years beginning after December 31, 1983 and before January 1, 1985.

[T.D. 8012, 50 FR 9614, March 11, 1985]

§ 1.466–1 Method of accounting for the redemption cost of qualified discount coupons.

(a) **Introduction.** Section 466 permits taxpayers who elect to use the method of accounting description in section 466 to deduct the redemption cost (as defined in paragraph (b) of this section) of qualified discount coupons (as defined in paragraph (c) of this section) outstanding at the end of the taxable year and redeemed during the redemption period (within the meaning of paragraph (d)(2) of this section) in addition to the redemption cost of qualified discount coupons redeemed during the taxable year which were not deducted for a prior taxable year. For the taxable year in which the taxpayer first uses this method of accounting, the taxpayer is not allowed to deduct the redemption costs of qualified discount coupons redeemed during the taxable year that would have been deductible for the prior taxable year had the taxpayer used this method of accounting for such prior year. (See paragraph (e) of this section for rules describing how this amount should be taken into account.) A taxpayer must use the accrual method of accounting for any trade or business for which an election is made under section 466. Furthermore, the taxpayer must make an election

in accordance with the rules in section 466(d) and § 1.466–3 for that trade or business. The method of accounting in section 466 is applicable only to the taxpayer's redemption of qualified discount coupons. Section 466 does not apply to trading stamps or premium coupons, which are subject to the method of accounting in § 1.451–4, or to discount coupons that are not qualified discount coupons.

(b) Redemption costs—(1) Costs deductible under section 466. The deduction allowed by section 466 applies only to the redemption cost of qualified discount coupons. The term "redemption cost" means an amount equal to:

(i) The lesser of:

(A) The amount of the discount stated on the coupon, or

(B) The cost incurred by the taxpayer for paying the discount; plus

(ii) The amount payable to the retailer (or other person redeeming the coupon from the person receiving the price discount) for services in redeeming the coupon.

The amount payable to the retailer or other person for services in redeeming the coupon is allowed only if the amount payable is stated on the coupon.

(2) Costs not deductible under section 466. The term "redemption cost" includes only the amounts stated in paragraph (b)(1) of this section. Amounts other than those mentioned in paragraph (b)(1) of this section cannot be deducted under the method of accounting described in section 466 even though such amounts are incurred in relation to the redemption of qualified discount coupons. Therefore, those amounts must be taken into account as if section 466 did not apply. Examples of such amounts are fees paid to the redemption center or clearinghouse and amounts payable to the retailer in excess of the amount stated on the coupon.

(c) Qualified discount coupons—(1) General rule. In order for a discount coupon (as defined in paragraph (c)(2)(i) of this section) to be considered a qualified discount coupon, all of the following requirements must be met:

(i) The coupon must have been issued by and must be redeemable by the taxpayer;

(ii) The coupon must allow a discount on the purchase price of merchandise or other tangible personal property;

(iii) The face amount of the coupon must not exceed five dollars;

(iv) The coupon, by its terms, may not be used with other coupons to bring about a price discount reimbursable by the issuer of more than five dollars with respect to any item; and

(v) There must exist a redemption chain (as defined in paragraph (c)(2)(ii) of this section) with respect to the coupon.

(2) Definitions—(i) Discount coupon. A discount coupon is a sales promotion device used to encourage the purchase of a specific product by allowing a purchaser of that product to receive a discount on its purchase price. The term "discount coupon" does not include trading stamps or premium coupons, which are subject to the method of accounting in § 1.451–4. A discount coupon may or may not be issued as part of a prior purchase. A discount coupon normally entitles its holders to receive nothing more than a reduction in the sales price of one of the issuer's products. The discount may be stated in terms of a cash amount, a percentage or fraction of the purchase price, a "two for the price of one" deal, or any other similar provision. A discount coupon need not be printed on paper in the form usually associated with coupons; it may be a token or other object so long as it functions as a coupon.

(ii) Redemption chain. A redemption chain exists when the issuer redeems the coupon from some person other than the customer who used the coupon to receive the price discount. Thus, in order to be treated as a qualified discount coupon, the coupon must not be issued by the person that initially redeems the coupon from the customer. For purposes of determining whether a redemption chain exists, corporations that are members of the same controlled group of corporations (as defined in section 1563(a)) as the issuer of the coupon shall be treated as the issuer. Thus, if the issuer of the coupon and the retailer that initially redeems the coupon from the customer are members of the same controlled group of corporations, the coupon shall not be treated as a qualified discount coupon.

(d) Deduction for coupons redeemed during the redemption period—(1) General rule. Two special conditions must be met before the cost of redeeming qualified discount coupons during the redemption period can be deducted from the taxpayer's gross income for the taxable year preceding the redemption period. First, the qualified discount coupons must have been outstanding at the

close of such taxable year. Second, the qualified discount coupons must have been received by the taxpayer before the close of the redemption period for that taxable year.

(2) **Redemption period.** The taxpayer can select any redemption period so long as the period does not extend longer than 6 months after the close of the taxpayer's taxable year. A change in the redemption period so selected shall be treated as a change in method of accounting.

(3) **Coupons received.** The deduction provided for in section 466(a)(1) is limited to the redemption costs associated with coupons that are actually received by the taxpayer within the redemption period. For purposes of this paragraph, if the issuer uses a redemption agent or clearinghouse to group, count, and verify coupons after they have been redeemed by a retailer, the coupons received by the redemption agent or clearinghouse will be considered to have been received by the issuer. Nothing in section 466, however, allows deductions to be made on the basis of estimated redemptions, whether such estimates are made by either the issuer or some other party.

(e) **Transitional adjustment—(1) In general.** An election to change from some other method of accounting for the redemption of discount coupons to the method of accounting described in section 466 is a change in method of accounting that requires a transitional adjustment. Unless the taxpayer can qualify for a waiver of the suspense account requirement as provided for in section 373(c) of the Revenue Act of 1978 (92 Stat. 2865), the taxpayer should compute the transitional adjustment described in section 481(a)(2) according to the rules contained in this section. This adjustment should be taken into account according to the special rules in subsections (e) and (f) of section 466.

(2) **Net increase in taxable income.** In the case of a transitional adjustment that would result in a net increase in taxable income under section 481(a)(2) for the year of change, that increase should be taken into income over a ten-year period consisting of the year of change and the immediately succeeding nine taxable years. For example, assume that A, a calendar year taxpayer, makes an election to use the method of accounting described in section 466 for the year 1980 and for subsequent years. Assume further that the amount of the transitional adjustment computed under section 481(a)(2) would result in a net increase in taxable income of $100 for 1980. Under these facts, A should increase taxable income for 1980 and each of the next nine taxable years by $10.

(3) **Suspense account—(i) In general.** In the case of a transitional adjustment that would result in a net decrease in taxable income under section 481(a)(2) for the year of change, in lieu of applying section 481, the taxpayer must establish a separate suspense account for each trade or business for which the taxpayer has made an election to use section 466. The computation of the initial opening balance in the suspense account is described in paragraph (e)(3)(ii)(A) of this section. An initial adjustment to gross income for the year of election is described in paragraph (e)(3)(ii)(B) of this section. Annual adjustments to the suspense account are described in paragraph (e)(3)(iii)(A) of this section, and gross income adjustments are described in paragraph (e)(3)(iii)(B) of this section. Examples are provided in paragraph (e)(4) of this section. The effect of the suspense account is to defer some part of, or all of, the deduction of the transitional adjustment until the taxpayer no longer redeems discount coupons in connection with the trade or business to which the suspense account relates.

(ii) **Establishing a suspense account**—(A) Initial opening balance. To compute the initial opening balance of the suspense account for the first taxable year for which the election to use section 466 is effective, the taxpayer must determine the dollar amount of the deduction that would have been allowed for qualified discount coupon redemption costs during the redemption period for each of the three immediately preceding taxable years had the election to use section 466 been in effect for those years. The initial opening balance of the suspense account is the largest such dollar amount reduced by the sum of the adjustments attributable to the change in method of accounting that increase income for the year of change.

(B) Initial year adjustment. If, in computing the initial opening balance, the largest dollar amount of deduction that would have been allowed in any of the three prior years exceeds the actual cost of redeeming qualified discount coupons received during the redemption period following the close of the year immediately preceding the year of election, the excess is included in income in the year of election. Section 481(b) does not apply to this increase in gross income.

(iii) **Annual adjustments**—(A) Adjustment to the suspense account. Adjustments are made to the suspense account each year to account for fluctuations in coupon redemptions. To compute

the annual adjustment, the taxpayer must determine the amount to be deducted under section 466(a)(1) for the taxable year. If the amount is less than the opening balance in the suspense account for the taxable year, the balance in the suspense account is reduced by the difference. Conversely, if such amount is greater than the opening balance in the suspense account for the taxable year, the account is increased by the difference (but not to an amount in excess of the initial opening balance described in paragraph (e)(3)(ii) of this section). Therefore, the balance in the suspense account will never be greater than the initial opening balance in the suspense account determined in paragraph (e)(3)(ii) of this section. However, the balance in the suspense account after adjustments may be less than this initial opening balance in the suspense account.

(B) Gross income adjustments. Adjustments to the suspense account for years subsequent to the year of the election also produce adjustments in the taxpayer's gross income. Adjustments which reduce the balance in the suspense account reduce gross income for the year in which the adjustment to the suspense account is made. Adjustments which increase the balance in the suspense account increase gross income for the year in which the adjustment to the suspense account is made.

(4) Examples. (i) The provisions of paragraph (e)(3) of this section may be illustrated by the following examples:

Example (1). Assume that the issuer of qualified discount coupons makes a timely election under section 466 for its taxable year ending December 31, 1979, and does not select a coupon redemption period shorter than the statutory period of 6 months. Assume further that the taxpayer's qualified discount coupon redemption costs in the first 6 months of 1977, 1978, and 1979 were $7, $13, and $8 respectively, and that the accounting change adjustments that increase income for 1979 are $10. Since the accounting change adjustment that increases income for 1979, ($10), is greater than the taxpayer's discount coupon redemptions during the first 6 months of 1979 ($8), the net section 481(a)(2) adjustment for the year of change results in a positive adjustment. Because of this, a suspense account is not required. The taxpayer should instead follow the rules in section 466(f) and in paragraph (e)(2) of this section in order to take this positive transitional adjustment into account.

Example (2). Assume the same facts as in example (1), except that the sum of the accounting change adjustments that increase income for 1979 is equal to $2. Under these facts the initial opening balance in the suspense account on January 1, 1979 would be $11 (that is, the largest dollar amount of qualified coupon redemption costs in the pertinent years ($13), reduced by the sum of the accounting change adjustments that increase income in the year of change ($2)). Since the coupon redemption costs taken into account in determining the initial opening balance ($13 in 1979) exceed the actual redemption costs in the first 6 months of the taxable year for which the election is first effective ($8 in 1979), the excess of $5 is added to gross income for the year of election (1979).

Example (3). Assume, in addition to the facts of example (2), that coupon redemption costs during the redemption period for the 1979 taxable year are $7. Since the qualifying redemption costs ($7) during the redemption period for the taxable year are less than the opening balance in the suspense account ($11) the taxpayer must reduce the suspense account balance by the difference ($4). The taxpayer is also allowed to take a deduction equal to the amount of this adjustment to the suspense account. Thus, the net amount deductible for the 1979 taxable year after taking into account the coupon redemptions during the redemption period, the amount deductible because of the decrease in the suspense account, and the initial year adjustment determined in example (2) is $6 ($7+$4–$5).

Example (4). Assume, in addition to the facts of example (3), that coupon redemption costs during the redemption period for the 1980 taxable year are $10. Since the qualifying redemption costs during the redemption period for the taxable year ($10) exceed the opening balance of the suspense account at the beginning of the taxable year ($7), the suspense account must be increased by the difference ($3). The taxpayer must also include $3 in gross income for the taxable year. Thus, the net amount deductible for the 1980 taxable year is $7 ($10–$3).

Example (5). Assume, in addition to the facts of example (4), that coupon redemption costs during the redemption period for the 1981 taxable year are $12. Since the qualifying redemption costs for the 1961 taxable year ($12) exceed the opening balance of the suspense account at the beginning of the taxable year ($10), the suspense account must be increased by the difference ($2) but not above the initial opening balance ($11). Thus, the taxpayer will increase the balance by $1. The taxpayer must also include $1 in gross income for the taxable year. Thus, the net amount deductible for the 1981 taxable year is $11 ($12–$1).

(ii) The following table summarizes examples (2) through (5):

	Years ending Dec. 31—					
	1977	1978	1979	1980	1981	1982
Facts:						
Actual coupon redemption costs in first six months	$7	$13	$8	$7	$10	$12
Accounting change adjustments that increase income in year of change	.....	.....	2	.....	.....	.....
Net adjustment decreasing income in year of change under sec. 481(a)(2)	.....	.....	6	.....	.....	.....
Adjustment to suspense account:						
Opening balance	.....	.....	11	7	10	11
Addition to account	.....	.....	.....	3	1	.....
Reduction to account	.....	.....	(4)	.....	.....	.....

	Years ending Dec. 31— 1977	1978	1979	1980	1981	1982
Opening balance for next year	.....	.....	7	10	11	.....
Amount deductible:						
Initial year adjustment	.....	.....	(5)	.....	.....	.....
Amount of deductible as actual coupon redemptions during redemption period	.....	.....	7	10	12	.....
Adjustment for increase in suspense account	.....	.....	.....	(3)	(1)	.....
Adjustment for decrease in suspense account	.....	.....	4	.....	.....	.....
Net amount deductible for the year for coupons redeemed during the redemption period	.....	.....	6	7	11	.....

(f) Subchapter C transactions—(1) General rule. If a transfer of substantially all the assets of a trade or business in which discount coupons are redeemed is made to an acquiring corporation, and if the acquiring corporation determines its bases in these assets, in whole or part, with reference to the basis of these assets in the hands of the transferor, then for the purposes of section 466(e) the principles of section 381 and § 1.381(c)(4)–1 will apply. The application of this rule is not limited to the transactions described in section 381(a). Thus, the rule also applies, for example, to transactions described in section 351.

(2) Special rules. If, in the case of a transaction described in paragraph (f)(1) of this section, an acquiring corporation acquires assets that were used in a trade or business that was not subject to a section 466 election from a transferor that is owned or controlled directly (or indirectly through a chain of corporations) by the same interests, and if the acquiring corporation uses the acquired assets in a trade or business for which the acquiring corporation later makes an election to use section 466, then the acquiring corporation must establish a suspense account by taking into account not only its own experience but also the transferor's experience when the transferor held the assets in its trade or business. Furthermore, the transferor is not allowed a deduction for qualified discount coupons redeemed after the date of the transfer attributable to discount coupons issued by the transferor before the date of the transfer. Such redemptions shall be considered to be made by the acquiring corporation.

(3) Example. The provisions of paragraph (f)(2) of this section may be illustrated by the following example:

Example. Corporation S, a calendar year taxpayer, is a wholly owned subsidiary of Corporation P, a calendar year taxpayer. On December 31, 1982, S acquires from P substantially all of the assets used in a trade or business in which qualified discount coupons are redeemed. P had not made an election under section 466 with respect to the redemption costs of the qualified discount coupons issued in connection with that trade or business. S makes an election to use section 466 for its taxable year ending December 31, 1983, for the trade or business in which the acquired assets are used, and selects a redemption period of 6 months. Assume that P's qualified discount coupon redemption costs in the first 6 months of 1981 and 1982 were $120 and $140 respectively. Assume further that S's qualified discount coupon redemption costs in the first 6 months of 1983 were $130, and that there are no accounting change adjustments that increase income with respect to the election. S must establish a suspense account by taking into account the largest dollar amount of deductions that would have been allowed under section 466(a)(1) for the 3 immediately preceding taxable years of P, including both P's and S's experience with respect to costs actually incurred during the redemption periods relating to those years. Thus, the initial opening balance of S's suspense account is $140. S must also make an initial year adjustment of $10 ($140–$130), which S must include in income for S's taxable year ending December 31, 1983. P may not take a deduction for the qualified coupon redemptions made after December 31, 1982, that are attributable to coupons issued by P before December 31, 1982. Thus, none of the $130 qualified discount coupon redemption costs incurred by S during the first six months of 1983 may be deducted by P.

[T.D. 8022, 50 FR 18474, May 1, 1985; as amended by 50 FR 21046, May 22, 1985]

§ 1.466–2 Special protective election for certain taxpayers.

(a) General rule. Section 373(c) of the Revenue Act of 1978 (92 Stat. 2865) allows certain taxpayers, who in prior years have accounted for discount coupons under a method of accounting reasonably similar to the method described in § 1.451–4, to elect to treat that method of accounting as a proper one for those prior years. There are several differences between this protective election and the section 466(d) election. First, the protective election applies only to a single continuous period of taxable years the last year of which ends before January 1, 1979. Second, an otherwise qualifying protective election may apply to coupons which are discount coupons but which would not be treated as qualified discount coupons under Code section 466. Third, certain expenses such as the cost of redemption center service fees, and amounts that are payable

to the retailer (or other person redeeming the coupons from the person receiving the price discount) for services in redeeming the coupons but that are not stated on the coupon, can be subtracted from gross receipts for prior years covered by a protective election (if treated as deductible under the accounting method for such years), even though such expenses would not be deductible under Code section 466.

(b) Requirements. In order to qualify for this special protective election, the following conditions must be met:

(1) For a continuous period of one or more prior taxable years (the last year of which ends before Jan. 1, 1979), the taxpayer must have used a method of accounting for discount coupons that is reasonably similar to the method provided in § 1.451–4 or its predecessors under the Internal Revenue Code of 1954;

(2) The taxpayer must make an election under section 466 of the Internal Revenue Code of 1954 according to the rules contained in § 1.466–3 for its first taxable year ending after December 31, 1978; and

(3) The taxpayer must make an election under section 373(c) of the Revenue Act of 1978 according to the rules contained in § 1.466–4 for its first taxable year ending after December 31, 1978.

(c) Amount to be subtracted from gross receipts. The amount the taxpayer may subtract under this section for the redemption costs of coupons shall include only:

(1) Costs of the type permitted by § 1.451–4 to be included in the estimated average cost of redeeming coupons, plus

(2) Any amount designated or referred to on the coupon payable by the taxpayer to the person who allowed the discount on a sale by such person to the user of the coupon.

Nothing in this paragraph shall allow an item to be deducted more than once.

(d) Right to amend prior tax returns. This paragraph applies only to those taxpayers who have agreed in a prior year to discontinue the use of the method of accounting described in § 1.451–4 for discount coupon redemptions. If the taxpayer used such method of accounting on the original return filed for the prior taxable year, and if any such year is not closed under the statute of limitations or by reason of a closing agreement with the Internal Revenue Service, a taxpayer who has made a protective election may file an amended return and a claim for refund for such years. In this amended return, the taxpayer should account for its discount coupon redemptions, according to the method of accounting described in § 1.451–4. This is not to be construed, however, to abrogate in any way the rules regarding the close of taxable years due to the statute of limitations or a binding closing agreement between the Internal Revenue Service and the taxpayer.

(e) Suspense account not required. If the following three conditions are satisfied, the taxpayer need not establish the suspense account otherwise required by section 466(e). First, the taxpayer must make a timely election under these rules to protect prior years. Second, the method of accounting used in those years must have been used for all discount coupons issued by the taxpayer in those years in all the taxpayer's separate trades or businesses in which coupons were issued. Third, either before or after an amendment to the taxpayer's tax returns as described in paragraph (d) of this section, a method of accounting reasonably similar to the method of accounting described in § 1.451–4 must have been used for the taxable year ending on or before December 31, 1978. If these conditions are met, the taxpayer will treat the election of the method under section 466 as a change in method of accounting to which the rules in section 481 and the regulations thereunder apply.

(f) Definition: reasonably similar. For purposes of paragraphs (b)(1) and (e) of this section, a taxpayer will be considered to have used a method of accounting for discount coupons that is "reasonably similar" to the method of accounting provided in § 1.451–4 if the taxpayer followed the method of accounting described in § 1.451–4 as if that method were a valid method of accounting for discount coupon redemptions.

[T.D. 8022, 50 FR 18476, May 1, 1985]

§ 1.466–3 Manner of and time for making election under section 466.

(a) In general. Section 466 provides a special method of accounting for accrual basis taxpayers who issue qualified discount coupons (as defined in section 466(b)). In order to use the special method under section 466, a taxpayer must make an election with respect to the trade or business in connection with which the qualified discount coupons are issued. If a taxpayer issues qualified discount coupons in connection with more than one trade or business, the taxpayer may use the special method of accounting under section 466 only with respect to the qualified discount coupons

issued in connection with a trade or business for which an election is made. The election must be made in the manner prescribed in this section. The election does not require the prior consent of the Internal Revenue Service. An election under section 466 is effective for the taxable year for which it is made and for all subsequent taxable years, unless the taxpayer secures the prior consent of the Internal Revenue Service to revoke such election.

(b) Manner of and time for making election—(1) General rule. Except as provided in paragraph (b)(2) of this section, an election is made under section 466 and this section by filing a statement of election containing the information described in paragraph (c) of this section with the taxpayer's income tax return for the taxpayer's first taxable year for which the election is made. The election must be made not later than the time prescribed by law (including extensions thereof) for filing the income tax return for the first taxable year for which the election is made. Thus, the election may not be made for a taxable year by filing an amended income tax return after the time prescribed (including extensions) for filing the original return for such year.

(2) Transitional rule. If the last day of the time prescribed by law (including extensions thereof) for filing a taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978, falls before December 3, 1979, and the taxpayer does not make an election under section 466 with respect to such taxable year in the manner prescribed by paragraph (b)(1) of this section, an election is made under section 466 and this section with respect to such taxable year if—

(i) Within the time prescribed by law (including extensions thereof) for filing the taxpayer's income tax return for such taxable year, the taxpayer has made a reasonable effort to notify the Commissioner of the taxpayer's intent to make an election under section 466 with respect to such taxable year, and

(ii) Before January 2, 1980, the taxpayer files a statement of election containing the information described in paragraph (c) of this section to be associated with the taxpayer's income tax return for such taxable year.

For purposes of paragraph (b)(2)(i) of this section, a reasonable effort to notify the Commissioner of an intent to make an election under section 466 with respect to a taxable year includes the timely filing of an income tax return for such taxable year if the taxable income reported on the return reflects a deduction for the redemption costs of qualified discount coupons as determined under section 466(a).

(c) Required information. The statement of election required by paragraph (b) of this section must indicate that the taxpayer (identified by name, address, and taxpayer identification number) is making an election under section 466 and must set forth the following information:

(1) A description of each trade or business for which the election is made;

(2) The first taxable year for which the election is made;

(3) The redemption period (as defined in section 466(c)(2)) for each trade or business for which the election is made;

(4) If the taxpayer is required to establish a suspense account under section 466(e) for a trade or business for which the election is made, the initial opening balance of such account (as defined in section 466(e)(2)) for each such trade or business; and

(5) In the case of an election under section 466 that results in a net increase in taxable income under section 481(a)(2), the amount of such net increase.

The statement of election should be made on a Form 3115, which need contain no information other than that required by this paragraph or paragraph (c) of § 1.466–4.

[T.D. 8022, 50 FR 18477, May 1, 1985]

§ 1.466–4 Manner of and time for making election under section 373(c) of the Revenue Act of 1978.

(a) In general. Section 373(c)(2) of the Revenue Act of 1978 (92 Stat. 2865) provides an election for taxpayers who satisfy the requirements of section 373(c)(2)(A)(i) and (ii) of the Act. The election is made with respect to a method of accounting for the redemption costs of discount coupons used by the electing taxpayer in a continuous period of one or more taxable years ending before January 1, 1979. The election must be made in the manner prescribed by this section. The election does not require the prior consent of the Internal Revenue Service.

(b) Manner of and time for making election—(1) General rule. Except as provided in paragraph (b)(2) of this section, the election under section 373(c) of the Revenue Act of 1978 is made by filing a statement of election containing the infor-

mation described in paragraph (c) of this section with the taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978. The election must be made not later than the time prescribed by law (including extensions thereof) for filing the income tax return for the taxpayer's first taxable year ending after December 31, 1978. Thus, the election may not be made with an amended income tax return for such year filed after the time prescribed (including extensions) for filing the original return.

(2) Transitional rule. If the last day of the time prescribed by law (including extensions thereof) for filing a taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978, falls before December 3, 1979, and the taxpayer does not make an election in the manner prescribed by paragraph (b)(1) of this section, an election is made under section 373(c) of the Act and this section with respect to a continuous period if—

(i) Within the time prescribed by law (including extensions thereof) for filing the taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978, the taxpayer has made a reasonable effort to notify the Commissioner of the taxpayer's intent to make election under section 373(c) of the Act with respect to the continuous period, and

(ii) Before January 2, 1980, the taxpayer files a statement of election containing the information described in paragraph (c) of this section to be associated with the taxpayer's income tax return for the taxpayer's first taxable year ending after December 31, 1978.

(c) Required information. The statement of election required by paragraph (b) of this section must indicate that the taxpayer (identified by name, address, and taxpayer identification number) is making an election under section 373(c) of the Revenue Act of 1978 and must set forth the taxable years in the continuous period for which the election is made. The statement of election should be made on the same Form 3115 on which the taxpayer has made a statement of election under section 466. The Form 3115 need contain no information other than that required by this paragraph or paragraph (c) of § 1.466–3.

[T.D. 8022, 50 FR 18478, May 1, 1985]

§ 1.468A–0 Nuclear decommissioning costs; table of contents.

This section lists the paragraphs contained in §§ 1.468A-1 through 1.468A-8.

(j) Special rule permitting payments to a nuclear decommissioning fund before receipt of an initial or revised ruling amount applicable to a taxable year.

§ 1.468A-4 Treatment of nuclear decommissioning fund.

(a) In general.

(b) Modified gross income.

(c) Special rules.

(1) Period for computation of modified gross income.

(2) Gain or loss upon distribution of property by a fund.

(3) Denial of credits against tax.

(4) Other corporate taxes inapplicable.

(d) Treatment as corporation for purposes of subtitle F.

§ 1.468A-5 Nuclear decommissioning fund—miscellaneous provisions.

(a) Qualification requirements.

(1) In general.

(2) Limitation on contributions.

(3) Limitation on use of fund.

(i) In general.

(ii) Terms defined.

(b) Prohibitions against self-dealing.

(1) In general.

(2) Self-dealing defined.

(3) Disqualified person defined.

(c) Disqualification of nuclear decommissioning fund.

(1) In general.

(2) Exception to disqualification.

(i) In general.

(ii) Excess contribution defined.

(iii) Taxation of income attributable to an excess contribution.

(3) Effect of disqualification.

(d) Termination of nuclear decommissioning fund upon substantial completion of decommissioning.

(1) In general.

(2) Substantial completion of decommissioning defined.

§ 1.468A-6 Disposition of an interest in a nuclear power plant. [Reserved]

§ 1.468A-7 Manner of and time for making election.

(a) In general.

(b) Required information.

§ 1.468A-8 Effective date and transitional rules.

(a) Effective date.

(1) In general.

(2) Cut-off method applicable to electing taxpayers.

(b) Transitional rules.

(1) Time for filing request for schedule of ruling amounts.

(2) Manner of and time for making contributions to a nuclear decommissioning fund.

(3) Manner of and time for making election.

(4) Determination of cost of service limitation.

(5) Assumptions and determinations to be used in determining ruling amounts.

(6) Exception to level funding limitation.

(7) Determination of qualifying percentage.

(8) Limitation on payments to a nuclear decommissioning fund.

(9) Denial of interest on overpayment.

(10) Determination of addition to tax for failure to pay estimated tax.

[T.D. 8184, 53 FR 6804, March 2, 1988]

§ 1.468A–1 Nuclear decommissioning costs; general rules.

(a) Introduction. Section 468A provides an elective method for taking into account nuclear decommissioning costs for Federal income tax purposes. In general, an eligible taxpayer that elects the application of section 468A pursuant to the rules contained in § 1.468A-7 is allowed a deduction (as determined under § 1.468A-2) for the taxable year in which the taxpayer makes a cash payment to a nuclear decommissioning fund. Taxpayers using an accrual method of accounting that do not elect the application of section 468A are not allowed a deduction for nuclear decommissioning costs prior to the taxable year in which economic performance occurs with respect to such costs (see section 461(h)).

(b) Definitions. The following terms are defined for purposes of §§ 1.468A-1 through 1.468A-5, 1.468A-7 and 1.468A-8:

(1) The term "eligible taxpayer" means any taxpayer that possesses a qualifying interest in a nuclear power plant (including a nuclear power plant that is under construction).

(2) The term "qualifying interest" means—

(i) A direct ownership interest; and

(ii) A leasehold interest in any portion of a nuclear power plant if—

(A) The holder of the leasehold interest is subject to the jurisdiction of a public utility commission with respect to such portion of the nuclear power plant;

(B) The holder of the leasehold interest is primarily liable under Federal or State law for decommissioning such portion of the nuclear power plant; and

(C) No other person establishes a nuclear decommissioning fund with respect to such portion of the nuclear power plant.

A direct ownership interest includes an interest held as a tenant in common or joint tenant, but does not include stock in a corporation that owns a nuclear power plant or an interest in a partner-

ship that owns a nuclear power plant. Thus, in the case of a partnership that owns a nuclear power plant, the election under section 468A must be made by the partnership and not by the partners. In the case of an unincorporated organization described in § 1.761-2(a)(3) that elects under section 761(a) to be excluded from the application of subchapter K, each taxpayer that is a co-owner of the nuclear power plant is eligible to make a separate election under section 468A.

(3) The term "nuclear decommissioning fund" means a fund that satisfies the requirements of § 1.468A.-5.

(4) The term "nuclear power plant" means any nuclear power reactor that is used predominantly in the trade or business of the furnishing or sale of electric energy, if the rates for such furnishing or sale, as the case may be, have been established or approved by a public utility commission. Each unit (i.e., nuclear reactor) located on a multi-unit site is a separate nuclear power plant.

(5) The term "nuclear decommissioning costs" or "decommissioning costs" means all otherwise deductible expenses to be incurred in connection with the entombment, decontamination, dismantlement, removal and disposal of the structures, systems and components of a nuclear power plant that has permanently ceased the production of electric energy. Such term includes all otherwise deductible expenses to be incurred in connection with the preparation for decommissioning, such as engineering and other planning expenses, and all otherwise deductible expenses to be incurred with respect to the plant after the actual decommissioning occurs, such as physical security and radiation monitoring expenses. Such term does not include otherwise deductible expenses to be incurred in connection with the disposal of spent nuclear fuel under the Nuclear Waste Policy Act of 1982 (Pub. L. 97-425). An expense is otherwise deductible for purposes of this paragraph (b)(5) if it would be deductible under chapter 1 of the Internal Revenue Code without regard to section 280B.

(6) The term "public utility commission" means any State or political subdivision thereof, any agency, instrumentality or judicial body of the United States, or any judicial body, commission or other similar body of the District of Columbia or of any State or any political subdivision thereof that establishes or approves rates for the furnishing or sale of electric energy.

(7) The term "ratemaking proceeding" means any proceeding before a public utility commission in which rates for the furnishing or sale of electric energy are established or approved. Such term includes a generic proceeding that applies to two or more taxpayers that are subject to the jurisdiction of a single public utility commission.

(c) Special rules applicable to certain experimental nuclear facilities. (1) The owner of a qualifying interest in an experimental nuclear facility possesses a qualifying interest in a nuclear power plant for purposes of paragraph (b) of this section if—

(i) Such person is engaged in the trade or business of the furnishing or sale of electric energy;

(ii) The rates charged for electric energy furnished or sold by such person are established or approved by a public utility commission; and

(iii) The cost of decommissioning the facility is included in the cost of service of such person.

(2) An owner of stock in a corporation that owns an experimental nuclear facility possesses a qualifying interest in a nuclear power plant for purposes of paragraph (b)(1) of this section if—

(i) Such stockholder satisfies the conditions of paragraph (c)(1) (i) through (iii) of this section; and

(ii) The corporation that directly owns the facility is not engaged in the trade or business of the furnishing or sale of electric energy.

(3) For purposes of this paragraph (c), an experimental nuclear facility is a nuclear power reactor that is used predominantly for the purpose of conducting experimentation and research.

[T.D. 8805, 53 FR 6805, March 3, 1988]

§ 1.468A–2 Treatment of electing taxpayer.

(a) In general. An eligible taxpayer that elects the application of section 468A pursuant to the rules contained in § 1.468A-7 (an "electing taxpayer") is allowed a deduction for the taxable year in which the taxpayer makes a cash payment (or is deemed to make a cash payment as provided in paragraph (c) of this section) to a nuclear decommissioning fund. The amount of the deduction for any taxable year equals the total amount of cash payments made (or deemed made) by the electing taxpayer to a nuclear decommissioning fund (or nuclear decommissioning funds) during such taxable year. A payment may not be made (or deemed made) to a nuclear decommissioning fund before the first taxable year in which all of the following conditions are satisfied:

(1) The construction of the nuclear power plant to which the nuclear decommissioning fund relates has commenced.

(2) Nuclear decommissioning costs of the nuclear power plant to which the nuclear decommissioning fund relates are included in the taxpayer's cost of service for ratemaking purposes (see paragraph (b) of this section).

(3) A ruling amount is applicable to the nuclear decommissioning fund (see § 1.468A-3).

(b) Limitation on payments to a nuclear decommissioning fund—(1) In general. For purposes of paragraph (a) of this section, the maximum amount of cash payments made (or deemed made) to a nuclear decommissioning fund during any taxable year shall not exceed the lesser of:

(i) The cost of service amount applicable to the nuclear decommissioning fund for such taxable year (as defined in paragraph (b)(2) of this section); or

(ii) The ruling amount applicable to the nuclear decommissioning fund for such taxable year (as determined under § 1.468A-3).

If the amount of cash payments made (or deemed made) to a nuclear decommissioning fund during any taxable year exceeds the limitation of this paragraph (b)(1), the excess is not deductible by the electing taxpayer. In addition, see paragraph (c) of § 1.468A-5 for rules which provide that the Internal Revenue Service may disqualify a nuclear decommissioning fund if the amount of cash payments made (or deemed made) to a nuclear decommissioning fund during any taxable year exceeds the limitation of this paragraph (b)(1).

(2) Cost of service amount. (i) For purposes of section 468A and the regulations thereunder, the "cost of service amount applicable to a nuclear decommissioning fund for a taxable year" is the amount of decommissioning costs included in the electing taxpayer's cost of service for ratemaking purposes for such taxable year. Decommissioning costs are included in cost of service for a taxable year only to the extent such costs are directly or indirectly charged to customers of the taxpayer by reason of electric energy consumed during such taxable year or are otherwise required to be included in the taxpayer's income under section 88 and the regulations thereunder.

(ii) Except as otherwise provided in paragraph (b)(4)(i) of § 1.468A-8 (relating to a special transitional rule), decommissioning costs shall generally not be considered included in cost of service for purposes of this section unless—

(A) The order or opinion of the applicable public utility commission identifies the amount of decommissioning costs that is included in cost of service for ratemaking purposes; or

(B) The written records of the ratemaking proceeding clearly and unambiguously indicate the amount of decommissioning costs that is included in cost of service for ratemaking purposes.

(iii) Except as otherwise provided in paragraph (f)(2) of this section (relating to a special rule that applies to certain retroactive adjustments to interim rate orders), orders or opinions of a public utility commission that are issued after the close of any taxable year shall not be considered in determining the amount of decommissioning costs included in cost of service for such taxable year.

(iv) If a taxpayer possesses a qualifying interest in two or more nuclear power plants that are the subject of a single ratemaking proceeding, the amount of decommissioning costs included in cost of service pursuant to such ratemaking proceeding must be allocated among such nuclear power plants. Such allocation must be reasonable and consistent, and must take into account the assumptions and determinations, if any, used by the public utility commission in establishing or approving the amount of decommissioning costs included in cost of service.

(c) Deemed payment rules. (1) The amount of any cash payment made by an electing taxpayer to a nuclear decommissioning fund on or before the 15th day of the third calendar month after the close of any taxable year (the "deemed payment deadline date") shall be deemed made during such taxable year if the electing taxpayer irrevocably designates the amount as relating to such taxable year on its timely filed Federal income tax return for such taxable year (see paragraph (b)(4)(iv) of § 1.468A-7 for rules relating to such designation).

(2) The amount of any cash payment made by a customer of an electing taxpayer to a nuclear decommissioning fund of such electing taxpayer shall be deemed made by the electing taxpayer if the amount is included in the gross income of the electing taxpayer in the manner prescribed by section 88 and § 1.88-1.

(d) Treatment of distributions—(1) In general. Except as otherwise provided in paragraph (d)(2) of this section, the amount of any actual or deemed distribution from a nuclear decommissioning fund shall be included in the gross income of the electing taxpayer for the taxable year in which

the distribution occurs. The amount of any distribution of property equals the fair market value of the property on the date of the distribution. A distribution from a nuclear decommissioning fund shall include an expenditure from the fund or the use of the fund's assets—

(i) To satisfy, in whole or in part, the liability of the electing taxpayer for decommissioning costs of the nuclear power plant to which the fund relates; and

(ii) To pay administrative costs and other incidental expenses of the fund.

See paragraphs (c) and (d) of § 1.468A-5 for rules relating to the deemed distribution of the assets of a nuclear decommissioning fund in the case of a disqualification or termination of the fund.

(2) Exceptions to inclusion in gross income—(i) Payment of administrative costs and incidental expenses. The amount of any payment by a nuclear decommissioning fund for administrative costs or other incidental expenses of such fund (as defined in paragraph (a)(3)(ii)(A) of § 1.468A-5) shall not be included in the gross income of the electing taxpayer unless such amount is paid to the electing taxpayer (in which case the amount of the payment is included in the gross income of the electing taxpayer under section 61).

(ii) Withdrawals of excess contributions. The amount of a withdrawal of an excess contribution (as defined in paragraph (c)(2)(ii) of § 1.468A-5) by an electing taxpayer pursuant to the rules of paragraph (c)(2) of § 1.468A-5 shall not be included in the gross income of the electing taxpayer. See paragraph (b)(1) of this section, which provides that the payment of such amount to the nuclear decommissioning fund is not deductible by the electing taxpayer.

(iii) Actual distributions of amounts included in gross income as deemed distributions. If the amount of a deemed distribution is included in the gross income of the electing taxpayer for the taxable year in which the deemed distribution occurs, no further amount is required to be included in gross income when the amount of the deemed distribution is actually distributed by the nuclear decommissioning fund. The amount of a deemed distribution is actually distributed by a nuclear decommissioning fund as the first actual distributions are made by the nuclear decommissioning fund on or after the date of the deemed distribution.

(e) Deduction when economic performance occurs. An electing taxpayer using an accrual method of accounting is allowed a deduction for nuclear decommissioning costs no earlier than the taxable year in which economic performance occurs with respect to such costs (see section 461 (h)(2)). The amount of nuclear decommissioning costs that is deductible under this paragraph (e) is determined without regard to section 280B (see paragraph (b)(5) of § 1.468A-1). A deduction is allowed under this paragraph (e) whether or not a deduction was allowed with respect to such costs under section 468A(a) and paragraph (a) of this section for an earlier taxable year (see paragraph (a)(2) of § 1.468A-8, however, for the effective date applicable to this paragraph (e)).

(f) Effect of interim rate orders and retroactive adjustments to such orders—(1) In general. (i) The amount of decommissioning costs included in cost of service for any taxable year that ends before the date of a retroactive adjustment to an interim rate order or interim determination of a public utility commission shall include amounts authorized pursuant to such interim rate order or interim determination unless a taxpayer elects the application of paragraph (f)(2) of this section for such taxable year. For purposes of this paragraph (f), a retroactive adjustment occurs on the effective date of the revised rate schedule that implements the retroactive adjustment.

(ii) If a retroactive adjustment to an interim rate order or interim determination reduces the amount of decommissioning costs included in cost of service for one or more taxable years ending before the date of the adjustment, the amount of such reduction must be subtracted from the amount of decommissioning costs included in cost of service (as determined under paragraph (b)(2) of this section) for one or more taxable years ending on or after the date of the adjustment. For this purpose, the amount of such reduction must be taken into account in the following manner:

(A) If the retroactive adjustment reduces the amount of decommissioning costs included in cost of service for one taxable year ending before the date of the adjustment, the total amount of the reduction must be taken into account for the taxable year that includes the date of the adjustment.

(B) If the retroactive adjustment reduces the amount of decommissioning costs included in cost of service for two taxable years ending before the date of the adjustment, at least one-half of the total amount of the reduction must be taken into

account for the first taxable year ending on or after the date of the adjustment and the total amount of the reduction must be taken into account over the first two taxable years ending on or after the date of the adjustment.

(C) If the retroactive adjustment reduces the amount of decommissioning costs included in cost of service for three or more taxable years ending before the date of the adjustment, at least one-third of the total amount of the reduction must be taken into account for the first taxable year ending on or after the date of the adjustment, at least two-thirds of the total amount of the reduction must be taken into account over the first two taxable years ending on or after the date of the adjustment, and the total amount of the reduction must be taken into account over the first three taxable years ending on or after the date of the adjustment.

(2) Special rule permitting withdrawal of excess contribution that results from retroactive adjustment to interim rate order. (i) If a retroactive adjustment that reduces the amount of decommissioning costs included in cost of service for a taxable year occurs on or before the date prescribed by law (including extensions) for filing the return of the nuclear decommissioning fund for such taxable year, a taxpayer may elect the application of this paragraph (f)(2) for such taxable year by—

(A) Including in the amount of decommissioning costs included in cost of service for such taxable year only the amount of decommissioning costs authorized for such taxable year under the retroactive adjustment; and

(B) Withdrawing any excess contribution that results from such treatment in accordance with the rules of paragraph (c)(2) of § 1.468A-5.

(ii) If a taxpayer elects the application of this paragraph (f)(2) for any taxable year, the retroactive adjustment shall not be treated for purposes of paragraph (f)(1)(ii) of this section as a reduction in the amount of decommissioning costs included in cost of service for such taxable year.

(3) Revised schedule of ruling amounts. If the rules provided in this paragraph (f) result in a cost of service amount applicable to a nuclear decommissioning fund for any taxable year that is less than the cost of service amount applicable to the nuclear decommissioning fund for the immediately preceding taxable year, the taxpayer must request a revised schedule of ruling amounts on or before the deemed payment deadline date for the taxable year in which the retroactive adjustment occurs. The first taxable year to which the revised schedule of ruling amount applies shall be the taxable year in which the retroactive adjustment occurs.

(4) Example. The following example illustrates the application of the principles of this paragraph (f):

Example. (i) X corporation is a calendar year, accrual method taxpayer engaged in the sale of electric energy generated by a nuclear power plant owned by X. During 1989, X is authorized pursuant to an interim rate order issued by the public utility commission of State A to collect nuclear decommissioning costs of $500,000 per year beginning on January 1, 1990. On May 1, 1992, the public utility commission of State A issues a final rate order that is effective on July 1, 1992. The final rate order authorizes X to collect decommissioning costs of $400,000 per year and requires X to refund to the ratepayers of State A excess decommissioning costs of $250,000 collected between January 1, 1990, and July 1, 1992.

(ii) If X elects the application of paragraph (f)(2) of this section for the 1991 taxable year, the amount of decommissioning costs included in cost of service for such taxable year is $400,000. If X made a contribution of $500,000 to a nuclear decommissioning fund for the 1991 taxable year, X must withdraw $100,000 from the nuclear decommissioning fund on or before the date prescribed by law (including extensions) for filing the return of the nuclear decommissioning fund for the 1991 taxable year (see paragraph (c)(2) of § 1.468A-5).

(iii) In addition, under paragraph (f)(1)(i) of this section, the amount of decommissioning costs included in cost of service for the 1990 taxable year is $500,000, and, under paragraph (f)(1)(ii) of this section, the amount of decommissioning costs included in cost of service for the 1992 taxable year is $300,000. Because the cost of service amount for the 1991 taxable year ($400,000) is less than the cost of service amount for the 1990 taxable year ($500,000), paragraph (f)(3) of this section applies and X must file a request for a revised schedule of ruling amounts for the period beginning with the 1992 taxable year on or before March 15, 1993.

(iv) Alternatively, if X does not elect the application of paragraph (f)(2) section, the amount of decommissioning costs included in cost of service for the 1990 and 1991 taxable years is $500,000, and, under paragraph (f)(1)(ii) of this section, the amount of decommissioning costs included in cost of service for the 1992 taxable year may not exceed $300,000. Because the cost of service amount for the 1992 taxable year is less than the cost of service amount for the 1991 taxable year, paragraph (f)(3) of this section applies and X must file a request for a revised schedule of ruling amounts for the period beginning with the 1992 taxable year on or before March 15, 1993. [T.D. 8184, 53 FR 6806, March 3, 1988]

§ 1.468A–3 Ruling amount.

(a) In general. (1) Except as otherwise provided in paragraph (j) of this section, an electing taxpayer is allowed a deduction under section 468A(a) for the taxable year in which the taxpayer makes a cash payment (or is deemed to make a cash payment) to a nuclear decommissioning fund only if the taxpayer has received a schedule of ruling amounts for the nuclear decommissioning fund that includes a ruling amount for such taxable

year. Except as provided in paragraph (a) (4) or (5) of this section, a schedule of ruling amounts for a nuclear decommissioning fund ("schedule of ruling amounts") is a ruling (within the meaning of paragraph (a)(2) of § 601.201) specifying the annual payments ("ruling amounts") that, over the taxable years remaining in the "funding period" as of the date the schedule first applies, will result in a projected balance of the nuclear decommissioning fund as of the last day of the funding period equal to (and in no event greater than) the "amount of decommissioning costs allocable to the fund." The projected balance of a nuclear decommissioning fund as of the last day of the funding period shall be calculated by taking into account the fair market value of the assets of the fund as of the first day of the first taxable year to which the schedule of ruling amounts applies and the estimated rate of return to be earned by the assets of the fund after payment of the estimated administrative costs and incidental expenses to be incurred by the fund (as defined in paragraph (a)(3)(ii)(A) of § 1.468A-5), including all Federal, State and local income taxes to be incurred by the fund (the "after-tax rate of return"). See paragraph (c) of this section for a definition of funding period and paragraph (d) of this section for guidance with respect to the amount of decommissioning costs allocable to a fund.

(2) To the extent consistent with the principles and provisions of this section, each schedule of ruling amounts shall be based on the reasonable assumptions and determinations used by the applicable public utility commission(s) in establishing or approving the amount of decommissioning costs to be included in cost of service for ratemaking purposes, taking into account amounts that are otherwise required to be included in the taxpayer's income under section 88 and the regulations thereunder. Thus, for example, each schedule of ruling amounts shall be based on the public utility commission's reasonable assumptions concerning—

(i) The after-tax rate of return to be earned by the amounts collected for decommissioning;

(ii) The total estimated cost of decommissioning the nuclear power plant (see paragraph (d)(2) of this section); and

(iii) The frequency of contributions to a nuclear decommissioning fund for a taxable year (e.g., monthly, quarterly, semi-annual or annual contributions).

(3) The Internal Revenue Service shall provide a schedule of ruling amounts that is identical to the schedule of ruling amounts proposed by the taxpayer in connection with the taxpayer's request for a schedule of ruling amounts (see paragraph (h)(2)(viii) of this section), but no schedule of ruling amounts shall be provided unless the taxpayer's proposed schedule of ruling amounts is consistent with the principles and provisions of this section. If a proposed schedule of ruling amounts is not consistent with the principles and provisions of this section, the taxpayer may propose an amended schedule of ruling amounts that is consistent with such principles and provisions.

(4) If, in establishing or approving the amount of decommissioning costs to be included in cost of service for ratemaking purposes, the applicable public utility commission uses an estimated cost of decommissioning that is based on price levels in effect at the time of the ratemaking proceeding (i.e., the public utility commission does not estimate the cost of decommissioning in future dollars), the Internal Revenue Service may, in its discretion, provide a formula or method for determining a schedule of ruling amounts (rather than a schedule specifying a dollar amount for each taxable year) that is consistent with the principles and provisions of this section. See paragraph (i)(1)(ii) of this section for a special rule relating to the mandatory review of ruling amounts that are determined pursuant to a formula or method.

(5) The Internal Revenue Service may, in its discretion, provide a schedule of ruling amounts that is determined on a basis other than the rules of paragraphs (a) through (g) of this section if—

(i) In connection with its request for a schedule of ruling amounts, the taxpayer explains the need for special treatment and sets forth an alternative basis for determining the schedule of ruling amounts; and

(ii) The Internal Revenue Service determines that special treatment is consistent with the purpose of section 468A.

(b) Level funding limitation. (1) Except as otherwise provided in paragraph (b)(4) of this section and paragraph (b)(6) of § 1.468A-8 (relating to a special transitional rule), the ruling amount specified in a schedule of ruling amounts for any taxable year in the level funding limitation period shall not be less than the ruling amount specified in such schedule for any earlier taxable year.

(2) For purposes of this section, the level funding limitation period for a nuclear decommissioning fund is the period that—

(i) Begins on the first day of the first taxable year for which a deductible payment is made (or deemed made) to such nuclear decommissioning fund (see paragraph (a) of § 1.468A-2 for rules relating to the first taxable year for which a payment may be made (or deemed made) to a nuclear decommissioning fund); and

(ii) Ends on the last day of the taxable year that includes the estimated date on which the nuclear power plant to which the nuclear decommissioning fund relates will no longer be included in the taxpayer's rate base for ratemaking purposes (see paragraphs (e) (2) and (4) of this section).

(3) The ruling amount specified in a schedule of ruling amounts for a taxable year after the end of the level funding limitation period may be less than the ruling amount specified in such schedule for an earlier taxable year.

(4) The ruling amount specified in a schedule of ruling amounts for the last taxable year in the level funding limitation period may be less than the ruling amount specified in such schedule for any earlier taxable year if the applicable public utility commission assumes for cost of service purposes that decommissioning costs will be included in cost of service for only a portion of the last taxable year in the level funding limitation period. The ruling amount for the last taxable year in the level funding limitation period, however, may not be less than the amount that bears the same relationship to the ruling amount for the preceding taxable year as the period for which decommissioning costs will be included in cost of service for such last taxable year bears to one year.

(c) **Funding period—(1) General rule.** For purposes of this section, the funding period for a nuclear decommissioning fund is the period that—

(i) Begins on the first day of the first taxable year for which a deductible payment is made (or deemed made) to such nuclear decommissioning fund (see paragraph (a)(1) § 1.468A-2 for rules relating to the first taxable year for which a payment may be made (or deemed made) to a nuclear decommissioning fund); and

(ii) Ends on the later of—

(A) The last day of the taxable year that includes the estimated date on which decommissioning costs of the nuclear power plant to which the nuclear decommissioning fund relates will no longer be included in the taxpayer's cost of service for ratemaking purposes (see paragraph (e)(1) of this section); or

(B) The last day of the taxable year that includes the estimated date on which the nuclear power plant to which the nuclear decommissioning fund relates will no longer be included in the taxpayer's rate base for ratemaking purposes (see paragraph (e)(2) of this section).

(2) **Examples.** The following examples illustrate the application of the principles of paragraphs (a), (b) and (c) of this section:

Example (1). (i) X corporation is a calendar year, accrual method taxpayer engaged in the sale of electric energy generated by power plants owned by X. On March 15, 1995, X commences the construction of a nuclear power plant in State A. On May 15, 1995, the public utility commission of State A issues a final rate order for the four-year period beginning on January 1, 1995, that authorizes X to collect decommissioning costs from ratepayers residing in State A. For the 1995 taxable year, X is authorized to collect decommissioning costs of $500,000, and, for each taxable year during the remainder of the period to which the rate order applies, X is authorized to collect decommissioning costs in an amount equal to 105 percent of the amount authorized to be collected for the preceding taxable year.

(ii) In determining the amount of decommissioning costs to be collected from ratepayers residing in State A, the public utility commission assumes that (A) decommissioning costs will be included in cost of service for each taxable year in the period that begins with 1995 and ends with 2025 and (B) decommissioning costs collected pursuant to subsequent rate orders will increase in the same manner as amounts collected pursuant to the rate order issued on May 15, 1995. In addition, in determining the rate of return to be earned by X with respect to the nuclear power plant, the public utility commission assumes that the nuclear power plant will be included in rate base for each year in the period that begins with 2000 and ends with 2025.

(iii) X requests a schedule of ruling amounts in accordance with the rules of paragraph (h) of this section for the period beginning with the 1995 taxable year. In determining the level funding limitation period and the funding period, the Internal Revenue Service shall assume that a deductible payment will be made to a nuclear decommissioning fund for the 1995 taxable year. Thus, under paragraph (b) of this section, the level funding limitation period begins on January 1, 1995, and ends on December 31, 2025. Under paragraph (c)(1) of this section, the funding period begins on January 1, 1995, and ends on December 31, 2025.

(iv) In its request for a schedule or ruling amounts, X proposes a ruling amount for each taxable year in the funding period that corresponds to the projected cost of service amount for such taxable year. If (A) the assumptions and determinations used by the public utility commission in establishing the amount of decommissioning costs to be included in cost of service are reasonable and (B) the amounts collected pursuant to the proposed schedule, combined with the after-tax earnings on such amounts, will result in a projected balance of the nuclear decommissioning fund as of December 31, 2025, equal to the amount of decommissioning costs allocable to the fund, then, under paragraph (a)(3) of this section, each ruling amount in the initial schedule of ruling amounts shall equal the ruling amount proposed by X in connection with its request for a schedule of ruling amounts. Thus, the ruling amount for the 1995 taxable year would be $500,000, and the ruling amount for each subsequent taxable year would be 105 percent of the ruling amount for the preceding taxable year.

Example (2). (i) Assume the same facts as in Example (1), except that on May 15, 1995, the public utility commission of State A issues a final rate order for the four-year period beginning on January 1, 1995, that authorizes X to collect decommissioning costs of $600,000 per year from ratepayers residing in State A. In determining the amount of decommissioning costs to be collected from ratepayers residing in State A, the public utility commission assumes that decommissioning costs of $600,000 will be collected for each taxable year in the period that begins with 1995 and ends with 2004 and that decommissioning costs of $200,000 will be collected for each taxable year in the period that begins with 2005 and ends with 2025.

(ii) X requests a schedule of ruling amounts in accordance with the rules of paragraph (h) of this section for the period beginning with the 1995 taxable year. In determining the level funding limitation period and the funding period, the Internal Revenue Service shall assume that a deductible payment will be made to a nuclear decommissioning fund for the 1995 taxable year. Thus, under paragraph (b) of this section, the level funding limitation period begins on January 1, 1995, and ends on December 31, 2025. Under paragraph (c)(1) of this section, the funding period begins on January 1, 1995, and ends on December 31, 2025.

(iii) In its request for a schedule of ruling amounts, X proposes a ruling amount for each taxable year in the funding period that corresponds to the projected cost of service amount for such taxable year. A schedule of ruling amounts based on the projected cost of service amount would be inconsistent with the level funding limitation of paragraph (b) of this section because the projected cost of service amount for 2005 is less than the projected cost of service amount for 2004. Consequently, under paragraph (a)(3) of this section, no schedule of ruling amounts shall be provided to X unless X proposes an amended schedule of ruling amounts that is consistent with the level funding limitation and the other principles and provisions of this section.

(iv) Assume that X proposes an amended schedule of ruling amounts that provides for ruling amounts of $400,000 for each taxable year in the funding period. If (A) the schedule of ruling amounts proposed by X is based on the reasonable assumptions and determinations used by the public utility commission in establishing the amount of decommissioning costs to be included in cost of service and (B) the amounts collected pursuant to the proposed schedule, combined with the after-tax earnings on such amounts, will result in a projected balance of the nuclear decommissioning fund as of December 31, 2025, equal to the amount of decommissioning costs allocable to the fund, then, under paragraph (a)(3) of this section, each ruling amount in the initial schedule of ruling amounts shall equal the ruling amount proposed by X in connection with its request for a schedule of ruling amounts. Thus, the ruling amount for the 1995 taxable year and for each subsequent taxable year through 2025 would be $400,000.

(v) Under section 468A(b) and paragraph (b)(1) of § 1.468A-2, the maximum amount of cash payments that X can make to a nuclear decommissioning fund for any taxable year shall not exceed the lesser of (A) the cost of service amount for such taxable year or (B) the ruling amount for such taxable year. If the projected cost of service amount that was assumed in determining rates under the rate order that was issued on May 15, 1995, is the actual cost of service amount for each taxable year in the funding period and the ruling amounts provided in the initial schedule of ruling amounts are not changed by a subsequent schedule of ruling amounts, then X would be allowed to make a deductible contribution of $400,000 to a nuclear decommissioning fund for each taxable year in the period that begins with 1995 and ends with 2004 and to make a deductible contribution of $200,000 to such nuclear decommissioning fund for each taxable year in the period that begins with 2005 and ends with 2025.

Example (3). (i) Y corporation is a calendar year, accrual method taxpayer engaged in the sale of electric energy generated by power plants owned by Y. On June 1, 1990, a nuclear power plant owned by Y began commercial operations in State B. In the first ratemaking proceeding in which the nuclear power plant was included in rate base, the public utility commission of State B assumed that the nuclear power plant would be included in rate base for each year in the period that began with 1990 and ended with 2020. In addition, for each taxable year in the period that began with 1990 and ended with 2017, Y made a deductible contribution of $750,000 to a nuclear decommissioning fund established by Y. The $750,000 contribution equalled the cost of service amount and the ruling amount for each taxable year in the 28-year period.

(ii) On August 30, 2017, the public utility commission of State B issues a final rate order for the six-year period beginning on January 1, 2018, that authorizes Y to collect decommissioning costs of: (A) $500,000 for 2018, 2019 and 2020; (B) $1,500,000 for 2021; (C) $1,000,000 for 2022; and (D) $750,000 for 2023. In determining the amount of decommissioning costs to be collected from ratepayers residing in State B, the public utility commission assumes that decommissioning costs will no longer be included in cost of service after 2023. In addition, in determining the rate of return to be earned by Y with respect to the nuclear power plant, the public utility commission assumes that the nuclear power plant will no longer be included in rate base after 2020.

(iii) Under paragraph (i)(1)(iii) of this section, Y is required to request a revised schedule of ruling amounts on or before March 15, 2019. Assume that Y makes a timely request for a revised schedule of ruling amounts in accordance with the rules of paragraph (h) of this section. In its request, Y proposes a ruling amount for each taxable year in the period that begins with 2018 and ends with 2023 that corresponds to the amount of decommissioning costs to be included in cost of service under the rate order of August 30, 2017.

(iv) Under paragraph (b) of this section, the level funding limitation period begins on January 1, 1990, and ends on December 31, 2020. Under paragraph (c)(1) of this section, the funding period begins on January 1, 1990, and ends on December 31, 2023.

(v) If (A) the assumptions and determinations used by the public utility commission in establishing the amount of decommissioning costs to be included in cost of service are reasonable and (B) the projected balance of the nuclear decommissioning fund as of December 31, 2023 (taking into account the fair market value of the assets of the fund as of January 1, 2018, and the estimated after-tax rate of return to be earned by the assets of the fund) will equal the amount of decommissioning costs allocable to the fund, then, under paragraph (a)(3) of this section, each ruling amount in the revised schedule of ruling amounts shall equal the ruling amount proposed by Y in connection with its request for a schedule of ruling amounts. Thus, the ruling amount for 2018, 2019 and 2020 would be $500,000, the ruling amount for 2021 would be $1,500,000, the ruling amount for 2022 would be $1,000,000 and the ruling amount for 2023 would be $750,000.

(vi) Although the ruling amount specified in the revised schedule of ruling amounts for 2018, 2019 and 2020 is less than a ruling amount specified in a prior schedule of ruling amounts for years prior to 2018, the revised schedule of ruling amounts is consistent with the level funding limitation. Under paragraph (i)(3) of this section, a ruling amount specified in a

revised schedule of ruling amounts for any taxable year in level funding limitation period may be less than one or more ruling amounts specified in a prior schedule of ruling amounts for a prior taxable year. In addition, although the ruling amount specified in the revised schedule of ruling amounts for 2022 and 2023 is less than a ruling amount specified in such schedule for a prior taxable year, the revised schedule of ruling amounts is consistent with the level funding limitation because the level funding limitation period ends on December 31, 2020.

(d) Decommissioning costs allocable to a fund. The amount of decommissioning costs allocable to a nuclear decommissioning fund is determined for purposes of this section by applying the following rules and definitions:

(1) General rule. The amount of decommissioning costs allocable to a nuclear decommissioning fund is the taxpayer's share of the total estimated cost of decommissioning the nuclear power plant to which the fund relates, multiplied by the qualifying percentage.

(2) Total estimated cost of decommissioning. (i) Except as otherwise provided in paragraph (d)(2)(ii) of this section, the total estimated cost of decommissioning a nuclear power plant is the reasonably estimated cost of decommissioning used by the applicable public utility commission in establishing or approving the amount of decommissioning costs to be included in cost of service for ratemaking purposes. If, in establishing or approving the amount of decommissioning costs to be included in cost of service, the public utility commission uses an estimated cost of decommissioning that is equal to a generic estimate of the cost of decommissioning as determined by the Nuclear Regulatory Commission (or an estimated cost that is based on the generic estimate adjusted for inflation), the Internal Revenue Service may, at its discretion, accept such amount as a reasonable estimate of the cost of decommissioning. In addition, if the estimated costs used by the applicable public utility commission are expected to be paid in any taxable year other than the taxable year that includes the last day of the funding period or the immediately succeeding taxable year, such costs must be adjusted (increased or decreased, as the case may be) by discounting or compounding such costs at the after-tax rate of return from the date such costs are expected to be paid to the last day of the funding period.

(ii) If, in establishing or approving the amount of decommissioning costs to be included in cost of service, the applicable public utility commission assumes a projected balance of amounts set aside for decommissioning (whether or not such amounts are provided by a nuclear decommissioning fund) that is less than the total estimated cost of decommissioning assumed by the public utility commission, the total estimated cost of decommissioning for purposes of determining the schedule of ruling amounts shall equal the projected balance of amounts set aside for decommissioning that was assumed by the public utility commission.

(3) Taxpayer's share. The taxpayer's share of the total estimated cost of decommissioning a nuclear power plant equals the total estimated cost of decommissioning such nuclear power plant multiplied by the percentage of such nuclear power plant that the qualifying interest of the taxpayer represents (see paragraph (b)(2) of § 1.468A-1 for circumstances in which a taxpayer possesses a qualifying interest in a nuclear power plant).

(4) Qualifying percentage. (i) Except as otherwise provided in paragraph (b)(7)(iii) of § 1.468A-8 (relating to a special transitional rule), the qualifying percentage for any nuclear decommissioning fund is equal to the fraction, the numerator of which is the number of taxable years in the estimated period for which the nuclear decommissioning fund is to be in effect and the denominator of which is the number of taxable years in the estimated useful life of the applicable nuclear power plant.

(ii) Except as otherwise provided in paragraph (b)(7) (i) or (ii) of § 1.468A-8 (relating to special transitional rules), the estimated period for which a nuclear decommissioning fund is to be in effect—

(A) Begins on the later of—

(*1*) The first day of the first taxable year for which a deductible payment is made (or deemed made) to such nuclear decommissioning fund; or

(*2*) The first day of the taxable year that includes the date the nuclear power plant to which such nuclear decommissioning fund relates begins commercial operations; and

(B) Ends on the last day of the taxable year that includes the estimated date on which the nuclear power plant to which such nuclear decommissioning fund relates will no longer be included in the taxpayer's rate base for ratemaking purposes (see paragraph (e) (3) and (4) of this section).

(iii) Except as otherwise provided in paragraph (b)(7)(ii) of § 1.468A-8 (relating to a special transitional rule), the estimated useful life of a nuclear power plant.

(A) Begins on the first day of the taxable year that includes the date that the nuclear power plant begins commercial operations; and

(B) Ends on the last day of the taxable year that includes the estimated date on which the nuclear power plant will no longer be included in the taxpayer's rate base for ratemaking purposes (see paragraph (e) (3) and (4) of this section).

(e) Determination of estimated dates. (1) For purposes of paragraph (c)(1)(ii)(A) of this section (relating to the funding period), the estimated date on which decommissioning costs of the nuclear power plant to which the nuclear decommissioning fund relates will no longer be included in the taxpayer's cost of service for ratemaking purposes is determined under the ratemaking assumptions that were used to determine the last rates (whether interim or final) that were established or approved by the applicable public utility commission prior to the filing of the current request for a schedule of ruling amounts.

(2) For purposes of paragraphs (b)(2)(ii) and (c)(1)(ii)(B) of this section (relating to the level funding limitation period and the funding period), the estimated date on which the nuclear power plant to which the nuclear decommissioning fund relates will no longer be included in the taxpayer's rate base for ratemaking purposes is determined under the ratemaking assumptions that were used to determine the last rates (whether interim or final) that were established or approved by the applicable public utility commission prior to the filing of the current request for a schedule of ruling amounts.

(3) For purposes of paragraph (d)(4) (ii)(B) and (iii)(B) of this section (relating to the qualifying percentage), the estimated date on which the nuclear power plant to which the nuclear decommissioning fund relates will no longer be included in the taxpayer's rate base for ratemaking purposes is determined under the ratemaking assumptions used by the applicable public utility commission in establishing or approving rates during the first ratemaking proceeding in which the nuclear power plant was included in the taxpayer's rate base.

(4) For purposes of this section, in the case of a taxpayer whose interest in the nuclear power plant is described in paragraph (b)(2)(ii) of § 1.468A-1, the date corresponding to "the estimated date on which the nuclear power plant to which the nuclear decommissioning fund relates will no longer be included in the taxpayer's rate base" will be determined upon the basis of all the facts and circumstances in a manner consistent with the provisions of this section and section 468A of the Code.

(f) Special rules in the case of rates established or approved by two or more public utility commissions. If two or more public utility commissions establish or approve rates for electric energy generated by a single nuclear power plant, the following rules shall apply in determining the schedule of ruling amounts for the nuclear decommissioning fund that relates to such nuclear power plant.

(1) A schedule of ruling amounts shall be separately determined pursuant to the rules of paragraphs (a) through (e) of this section for each public utility commission that has determined the amount of decommissioning costs to be included in cost of service for ratemaking purposes with respect to such nuclear power plant (see paragraph (g) of this section).

(2) The separate determination with respect to a public utility commission shall be based on the reasonable assumptions and determinations used by such public utility commission and shall take into account only that portion of the total estimated cost of decommissioning the nuclear power plant that is properly allocable to the ratepayers whose rates are established or approved by such public utility commission.

(3) The ruling amount applicable to the nuclear decommissioning fund for any taxable year is the sum of the ruling amounts for such taxable year determined under the separate schedules of ruling amounts.

(4) The schedule of ruling amounts for the nuclear decommissioning fund is the schedule of the ruling amounts determined under paragraph (f)(3) of this section.

(g) Requirement of determination by public utility commission of decommissioning costs to be included in cost of service. The Internal Revenue Service shall not provide a taxpayer with a schedule of ruling amounts for any nuclear decommissioning fund unless a public utility commission that establishes or approves rates for electric energy generated by the nuclear power plant to which the nuclear decommissioning fund relates has—

(1) Determined the amount of decommissioning costs of such nuclear power plant to be included in the taxpayer's cost of service for ratemaking purposes; and

(2) Disclosed the after-tax return and any other assumption and determinations used in establishing or approving such amount for any taxable year beginning on or after January 1, 1987.

(h) Manner of requesting schedule of ruling amounts—(1) In general. (i) In order to receive a ruling amount for any taxable year, a taxpayer

must file a request for a schedule of ruling amounts that complies with the requirements of this paragraph (h), the applicable procedural rules set forth in paragraph (e) of § 601.201 (Statement of Procedural Rules) and the requirements of any applicable revenue procedure that is in effect on the date the request is filed.

(ii) A separate request for a schedule of ruling amounts is required for each nuclear decommissioning fund established by a taxpayer (see paragraph (a) of § 1.468A-5 for rules relating to the number of nuclear decommissioning funds that a taxpayer can establish).

(iii) A request for a schedule of ruling amounts must not contain a request for a ruling on any other issue, whether the issue involves section 468A or another section of the Internal Revenue Code.

(iv) In the case of an affiliated group of corporations that join in the filing of a consolidated return, the common parent of the group may request a schedule of ruling amounts for each member of the group that possesses a qualifying interest in the same nuclear power plant by filing a single submission with the Internal Revenue Service.

(v) A request for a schedule of ruling amounts must be mailed or delivered to the Internal Revenue Service, Associate Chief Counsel (Technical), Attention CC:C:2:6, 1111 Constitution Avenue, NW., Washington, DC 20224.

(vi) Except as otherwise provided in paragraph (b)(1) of § 1.468A-8, the Internal Revenue Service shall not provide or revise a ruling amount applicable to a taxable year in response to a request for a schedule of ruling amounts that is filed after the deemed payment deadline date (as defined in paragraph (c)(1) of § 1.468A-2) for such taxable year. In determining the date when a request is filed, the principles of sections 7502 and 7503 shall apply.

(vii) Except as provided in paragraph (h)(1)(viii) of this section, a request for a schedule of ruling amounts shall be considered filed only if such request complies substantially with the requirements of this paragraph (h).

(viii) If a request does not comply substantially with the requirements of this paragraph (h), the Internal Revenue Service shall notify the taxpayer of this fact. If the information or materials necessary to comply substantially with the requirements of this paragraph (h) are provided to the Internal Revenue Service within 60 days after such notification, the request shall be considered filed on the date of original submission. If the information or materials necessary to comply substantially with the requirements of this paragraph (h) are not provided within 60 days after such notification, the request shall be considered filed on the date that all information or materials necessary to comply substantially with the requirements of this paragraph (h) are provided.

(2) **Information required.** A request for a schedule of ruling amounts must contain the following information:

(i) The taxpayer's name, address and taxpayer identification number.

(ii) Whether the request is for an initial schedule of ruling amounts, a mandatory review of the schedule of ruling amounts (see paragraph (i)(1) of this section) or an elective review of the schedule of ruling amounts (see paragraph (i)(2) of this section).

(iii) The name and location of the nuclear power plant with respect to which a schedule of ruling amounts is requested.

(iv) A description of the taxpayer's qualifying interest in the nuclear power plant and the percentage of such nuclear power plant that the qualifying interest of the taxpayer represents.

(v) An identification of each public utility commission that establishes or approves rates for the furnishing or sale by the taxpayer of electric energy generated by the nuclear power plant, and, for each public utility commission identified—

(A) Whether the public utility commission has determined the amount of decommissioning costs to be included in the taxpayer's cost of service for ratemaking purposes; and

(B) Whether a proceeding is pending before the public utility commission that may result in an increase or decrease in the amount of decommissioning costs to be included in cost of service.

(vi) For each public utility commission that has determined the amount of decommissioning costs to be included in the taxpayer's cost of service for ratemaking purposes—

(A) The amount of decommissioning costs that are to be included in the taxpayer's cost of service for each taxable year under the current determination and amounts that otherwise are required to be included in the taxpayer's income under section 88 and the regulations thereunder;

(B) A description of the assumptions, estimates and other factors that were used in determining the amounts described in paragraph (h)(2)(vi)(A) of this section, including each of the following if applicable—

(*1*) A description of the proposed method of decommissioning the nuclear power plant (for example, prompt removal/dismantlement, safe storage entombment with delayed dismantlement, or safe storage mothballing with delayed dismantlement);

(*2*) The estimated year in which substantial decommissioning costs will first be incurred;

(*3*) The estimated year in which the decommissioning of the nuclear power plant will be substantially complete (see paragraph (d)(2) of § 1.468A-5 for a definition of substantial completion of decommissioning);

(*4*) The total estimated cost of decommissioning expressed in current dollars (i.e., based on price levels in effect at the time of the current determination);

(*5*) The total estimated cost of decommissioning expressed in future dollars (i.e., based on anticipated price levels when expenses are expected to be paid);

(*6*) For each taxable year in the period that begins with the year specified in paragraph (h)(2)(vi)(B)(*2*) of this section ("the estimated year in which substantial decommissioning costs will first be incurred") and ends with the year specified in paragraph (h)(2)(vi)(B)(*3*) of this section ("the estimated year in which the estimated year in which the decommissioning of the nuclear power plant will be substantially complete"), the estimated cost of decommissioning expressed in future dollars;

(*7*) A description of the methodology used in converting the estimated cost of decommissioning expressed in current dollars to the estimated cost of decommissioning expressed in future dollars;

(*8*) The assumed after-tax rate of return to be earned by the amounts collected for decommissioning (if two or more after-tax rates of return are assumed by the public utility commission, each assumed after-tax rate of return and the amounts collected for decommissioning to which each assumed after-tax rate of return applies);

(*9*) The proposed period over which decommissioning costs will be included in the cost of service of the taxpayer and the projected amount that will be included in cost of service for each taxable year in the proposed period;

(*10*) The estimated date on which the nuclear power plant will no longer be included in the taxpayer's rate base for ratemaking purposes as determined under the ratemaking assumptions that were used to determine the last rates (whether interim or final) that were established or approved by the applicable public utility commission prior to the filing of the current request for a schedule of ruling amounts (or a corresponding date in the case of a taxpayer whose interest in the nuclear power plant is described in paragraph (b)(2)(ii) of § 1.468A-1; see paragraph (e)(4) of this section); and

(*11*) The estimated date on which the nuclear power plant will no longer be included in the taxpayer's rate base for ratemaking purposes as determined under the ratemaking assumptions that were used by the applicable public utility commission in establishing or approving rates during the first ratemaking proceeding in which the nuclear power plant was included in the taxpayer's rate base (or a corresponding date in the case of a taxpayer whose interest in the nuclear power plant is described in paragraph (b)(2)(ii) of § 1.468A-1; see paragraph (e)(4) of this section);

(C) A copy of such portions of any order or opinion of the public utility commission as pertain to the commission's most recent determination of the amount of decommissioning costs to be included in cost of service; and

(D) A copy of each engineering or cost study that was relied on or used by the taxpayer or the public utility commission in determining the amount of decommissioning costs to be included in the taxpayer's cost of service under the current determination.

(vii) For each proceeding pending before a public utility commission that may result in an increase or decrease in the amount of decommissioning costs to be included in the taxpayer's cost of service—

(A) A description of the stage of the proceeding;

(B) The amount of decommissioning costs that are proposed to be included in the taxpayer's cost of service for each taxable year;

(C) A description of the assumptions, estimates and other factors that were used in determining the amount of decommissioning costs that are proposed to be included in the taxpayer's cost of service for each taxable year, including each of the

items described in paragraph (h)(2)(vi)(B) of this section if applicable; and

(D) A copy of each engineering or cost study that was relied on or used by the taxpayer or the public utility commission in determining the amount of decommissioning costs that are proposed to be included in the taxpayer's cost of service.

(viii) A proposed schedule of ruling amounts for each taxable year remaining in the funding period as of the date the schedule of ruling amounts will first apply.

(ix) A description of the assumptions, estimates and other factors that were used in determining the proposed schedule of ruling amounts, including each of the following if applicable—

(A) The level funding limitation period (as such term is defined in paragraph (b)(2) of this section);

(B) The funding period (as such term is defined in paragraph (c) of this section);

(C) The assumed after-tax rate of return to be earned by the assets of the nuclear decommissioning fund;

(D) The fair market value of the assets (if any) of the nuclear decommissioning fund as of the first day of the first taxable year to which the schedule of ruling amounts will apply;

(E) The amount expected to be earned by the assets of the nuclear decommissioning fund (based on the after-tax rate of return applicable to the fund) over the period that begins on the first day of the first taxable year to which the schedule of ruling amounts will apply and ends on the last day of the funding period;

(F) The amount of decommissioning costs allocable to the nuclear decommissioning fund (as determined under paragraph (d) of this section);

(G) The total estimated cost of decommissioning (as such term is defined in paragraph (d)(2) of this section);

(H) The taxpayer's share of the total estimated cost of decommissioning (as such term is defined in paragraph (d)(3) of this section);

(I) The qualifying percentage (as such term is defined in paragraph (d)(4)(i) of this section);

(J) The estimated period for which the nuclear decommissioning fund is to be in effect (as such term is defined in paragraph (d)(4)(ii) of this section); and

(K) The estimated useful life of the nuclear power plant (as such term is defined in paragraph (d)(4)(iii) of this section).

(x) If the request is for a revised schedule of ruling amounts, the after-tax rate of return earned by the assets of the nuclear decommissioning fund for each taxable year in the period that begins with the date of the initial contribution to the fund and ends with the first day of the first taxable year to which the revised schedule of ruling amounts applies.

(xi) If applicable, an explanation of the need for a schedule of ruling amounts determined on a basis other than the rules of paragraphs (a) through (g) of this section and a description of an alternative basis for determining a schedule of ruling amounts (see paragraph (a)(5) of this section).

(xii) Any other information required by the Internal Revenue Service that may be necessary or useful in determining the schedule of ruling amounts.

(3) **Administrative procedures.** The Internal Revenue Service may prescribe administrative procedures that supplement the provisions of paragraph (h) (1) and (2) of this section. In addition, the Internal Revenue Service may, in its discretion, waive the requirements of paragraph (h) (1) and (2) of this section under appropriate circumstances.

(i) **Review and revision of schedule of ruling amounts—(1) Mandatory review.** (i) Any taxpayer that has obtained a schedule of ruling amounts pursuant to paragraph (h) of this section must file a request for a revised schedule of ruling amounts on or before the deemed payment deadline date for the 10th taxable year that begins after the taxable year in which the most recent schedule of ruling amounts was received. The first taxable year to which the revised schedule of ruling amounts applies shall be the 10th taxable year that begins after the taxable year in which the most recent schedule of ruling amounts was received.

(ii) Any taxpayer that has obtained a formula or method for determining a schedule of ruling amounts (see paragraph (a)(4) of this section) must file a request for a revised schedule of ruling amounts on or before the deemed payment deadline date for the 5th taxable year that begins after the taxable year in which the most recent formula or method was received. The first taxable year to which the revised schedule of ruling amounts applies (whether or not the ruling amounts continue

to be determined pursuant to a formula or method) shall be the 5th taxable year that begins after the taxable year in which the most recent formula or method was received.

(iii) A taxpayer is required to request a revised schedule of ruling amounts for a nuclear decommissioning fund If—

(A) Any public utility commission that establishes or approves rates for the furnishing or sale of electric energy generated by a nuclear power plant to which the nuclear decommissioning fund relates—

(1) Increases the proposed period over which decommissioning costs of such nuclear power plant will be included in cost of service for ratemaking purposes;

(2) Adjusts the estimated date on which such nuclear power plant will no longer be included in the taxpayer's rate base for ratemaking purposes; or

(3) Reduces the amount of decommissioning costs to be included in cost of service for any taxable year; and

(B) The taxpayer's most recent request for a schedule of ruling amounts did not provide notice to the Internal Revenue Service of such action by the public utility commission.

(iv) If a taxpayer is required to request a revised schedule of ruling amounts by reason of an action described in paragraph (i)(1)(iii) of this section, the taxpayer must file the request for a revised schedule of ruling amounts on or before the deemed payment deadline date for the first taxable year in which rates that reflect such action become effective. The first taxable year to which the revised schedule of ruling amounts applies shall be the first taxable year in which such rates become effective.

(v) A request for a schedule of ruling amounts required by this paragraph (i)(1) must be made in accordance with the rules of paragraph (h) of this section. If a taxpayer does not properly file a request for a revised schedule of ruling amounts by the date provided in paragraph (i)(1) (i), (ii) or (iv) of this section (whichever is applicable), the taxpayer's ruling amount for the first taxable year to which the revised schedule of ruling amounts would have applied and for all succeeding taxable years until a new schedule is obtained shall be zero, unless, in its discretion, the Internal Revenue Service provides otherwise in such new schedule of ruling amounts.

(vi) See paragraph (f)(3) of § 1.468A-2 for the application of the rules in paragraph (i)(1) (iii), (iv), and (v) of this section in the case of certain retroactive adjustments to interim rate orders.

(2) **Elective review.** Any taxpayer that has obtained a schedule of ruling amounts pursuant to paragraph (h) of this section can request a revised schedule of ruling amounts. Such a request must be made in accordance with the rules of paragraph (h) of this section; thus, the Internal Revenue Service shall not provide a revised ruling amount applicable to a taxable year in response to a request for a schedule of ruling amounts that is filed after the deemed payment deadline date for such taxable year (see paragraph (h)(1)(vi) of this section).

(3) **Determination of revised schedule of ruling amounts.** A revised schedule of ruling amounts for a nuclear decommissioning fund shall be determined under this section without regard to any schedule of ruling amounts for such nuclear decommissioning fund that was issued prior to such revised schedule. Thus, a ruling amount specified in a revised schedule of ruling amounts for any taxable year in the level funding limitation period can be less than one or more ruling amounts specified in a prior schedule of ruling amounts for a prior taxable year.

(j) **Special rule permitting payments to a nuclear decommissioning fund before receipt of an initial or revised ruling amount applicable to a taxable year.** (1) If an electing taxpayer has filed a timely request for an initial or revised ruling amount for a taxable year beginning on or after January 1, 1987, and does not receive the ruling amount on or before the deemed payment deadline date for such taxable year, the taxpayer may make a payment to a nuclear decommissioning fund on the basis of the ruling amount proposed in the taxpayer's request. Thus, under the preceding sentence, an electing taxpayer may make a payment to a nuclear decommissioning fund for such taxable year that does not exceed the lesser of—

(i) The cost of service amount applicable to the nuclear decommissioning fund for such taxable year; or

(ii) The ruling amount proposed by the taxpayer for such taxable year in a timely filed request for a schedule of ruling amounts.

(2) If an electing taxpayer makes a payment to a nuclear decommissioning fund for any taxable year pursuant to paragraph (j)(1) of this section and the ruling amount that is provided by the

Internal Revenue Service is greater than the ruling amount proposed by the taxpayer for such taxable year, the taxpayer is not allowed to make an additional payment to the fund for such taxable year after the deemed payment deadline date for such taxable year.

(3) If—(i) An electing taxpayer makes a payment to a nuclear decommissioning fund for any taxable year pursuant to paragraph (j)(1) of this section,

(ii) The ruling amount that is provided by the Internal Revenue Service is less than the ruling amount proposed by the taxpayer for such taxable year, and

(iii) As a result, there is an excess contribution (as defined in paragraph (c)(2)(ii) of § 1.468A-5) for such taxable year,

Then the amount of the excess contribution is not deductible (see paragraph (b)(1) of § 1.468A-2) and must be withdrawn by the taxpayer pursuant to the rules of paragraph (c)(2)(i) of § 1.468A-5. Thus, an electing taxpayer that files a return based on a payment made pursuant to paragraph (j)(1) of this section should file an amended return if an excess contribution results when the ruling amount is issued for such taxable year.

[T.D. 8184, 53 FR 6808, March 3, 1988]

§ 1.468A-4 Treatment of nuclear decommissioning fund.

(a) In general. A nuclear decommissioning fund is subject to tax on all of its modified gross income (as defined in paragraph (b) of this section) for any taxable year at a single rate equal to the maximum rate in effect under section 11(b) (determined without regard to any rate that is added to the otherwise applicable rate in order to offset the effect of the graduated rate schedule). Such tax is in lieu of any other tax that may be imposed under subtitle A of the Internal Revenue Code on the income earned by the assets of the nuclear decommissioning fund.

(b) Modified gross income. For purposes of this section, the term "modified gross income" means gross income as defined under section 61 computed with the following modifications:

(1) The amount of any payment to the nuclear decommissioning fund with respect to which a deduction is allowed under section 468A(a) is excluded from gross income.

(2) A deduction is allowed for the amount of administrative costs and other incidental expenses of the nuclear decommissioning fund (including taxes, legal expenses, accounting expenses, actuarial expenses and trustee expenses, but not including decommissioning costs) that are otherwise deductible and that are paid by the nuclear decommissioning fund to any person other than the electing taxpayer. An expense is otherwise deductible for purposes of this paragraph (b)(2) if it would be deductible under chapter 1 of the Internal Revenue Code in determining the taxable income of a corporation. For example, because Federal income taxes are not deductible under chapter 1 of the Internal Revenue Code in determining the taxable income of a corporation, the tax imposed by section 468A(e)(2) and paragraph (a) of this section is not deductible in determining the modified gross income of a nuclear decommissioning fund. Similarly, because certain expenses allocable to tax-exempt interest income are not deductible under section 265 of the Internal Revenue Code in determining the taxable income of a corporation, such expenses are not deductible in determining the modified gross income of a nuclear decommissioning fund.

(3) A deduction is allowed for the amount of otherwise deductible losses that are sustained by the nuclear decommissioning fund in connection with the sale, exchange or worthlessness of an investment described in paragraph (a)(3)(i)(C) of § 1.468A-5. A loss is otherwise deductible for purposes of this paragraph (b)(3) if such a loss would be deductible by a corporation under section 165 (f) or (g) and sections 1211(a) and 1212(a).

(4) A deduction is allowed for the amount of an otherwise deductible net operating loss of the nuclear decommissioning fund. For purposes of this paragraph (b), the net operating loss of a nuclear decommissioning fund for a taxable year is the amount by which the deductions allowable under paragraph (b) (2) and (3) of this section exceed the gross income of the nuclear decommissioning fund computed with the modification described in paragraph (b)(1) of this section. A net operating loss is otherwise deductible for purposes of this paragraph (b)(4) if such a net operating loss would be deductible by a corporation under section 172(a).

(c) Special rules—(1) Period for computation of modified gross income. The modified gross income of a nuclear decommissioning fund must be computed on the basis of the taxable year of the electing taxpayer. If an electing taxpayer changes its taxable year, each nuclear decommissioning fund of the electing taxpayer must change to the new taxable year. See section 442 and § 1.442-1

for rules relating to the change to a new taxable year.

(2) Gain or loss upon distribution of property by a fund. A distribution of property by a nuclear decommissioning fund (whether an actual distribution or a deemed distribution) shall be considered a disposition of property by the nuclear decommissioning fund for purposes of section 1001. In determining the amount of gain or loss from such disposition, the amount realized by the nuclear decommissioning fund shall be the fair market value of the property on the date of disposition.

(3) Denial of credits against tax. The tax imposed on the modified gross income of a nuclear decommissioning fund under paragraph (a) of this section is not to be reduced or offset by any credits against tax provided by part IV of subchapter A of chapter 1 of the Internal Revenue Code other than the credit provided by section 31(c) for amounts withheld under section 3406 (back-up withholding).

(4) Other corporate taxes inapplicable. Although the modified gross income of a nuclear decommissioning fund is subject to tax at a rate equal to the maximum rate in effect under section 11(b) (determined without regard to any rate that is added to the otherwise applicable rate in order to offset the effect of the graduated rate schedule), a nuclear decommissioning fund is not subject to the other taxes imposed on corporations under subtitle A of the Internal Revenue Code. For example, a nuclear decommissioning fund is not subject to the alternative minimum tax imposed by section 55, the accumulated earnings tax imposed by section 531, the personal holding company tax imposed by section 541, and the alternative tax imposed on a corporation under section 1201(a).

(d) Treatment as corporation for purposes of subtitle F. For purposes of subtitle F of the Internal Revenue Code and the regulations thereunder, a nuclear decommissioning fund is to be treated as if it were a corporation and the tax imposed by section 468A(e)(2) and paragraph (a) of this section is to be treated as a tax imposed by section 11. Thus, for example, the following rules apply:

(1) A nuclear decommissioning fund must file a return with respect to the tax imposed by section 468A(e)(2) and paragraph (a) of this section for each taxable year (or portion thereof) that the fund is in existence even though no amount is included in the gross income of the fund for such taxable year. The return is to be made on Form 1120-ND in accordance with the instructions relating to such form. For purposes of this paragraph (d)(1), a nuclear decommissioning fund is in existence for the period that—

(i) Begins on the date that the first deductible payment is actually made to such nuclear decommissioning fund; and

(ii) Ends on the date of termination (see paragraph (d) of § 1.468A-5), the date that the entire fund is disqualified (see paragraph (c) of § 1.468A-5), or the date that the electing taxpayer disposes of its entire qualifying interest in the nuclear power plant to which the nuclear decommissioning fund relates, whichever is applicable.

(2) For each taxable year of the nuclear decommissioning fund, the return described in paragraph (d)(1) of this section must be filed on or before the 15th day of the third month following the close of such taxable year unless the nuclear decommissioning fund is granted an extension of time for filing under section 6081. If such an extension is granted for any taxable year, the return for such taxable year must be filed on or before the extended due date for such taxable year. In no event will the filing of the initial return of a nuclear decommissioning fund be required before January 6, 1987.

(3) A nuclear decommissioning fund must provide its employer identification number on returns, statements and other documents as required by the forms and instructions relating thereto. The employer identification number is obtained by filing a Form SS-4 in accordance with the instructions relating thereto.

(4) A nuclear decommissioning fund must make payments of estimated tax during its taxable year as provided in section 6154(b) if its estimated tax for such taxable year can reasonably be expected to be $40 or more. For purposes of section 6154 and this section, the estimated tax of a nuclear decommissioning fund for any taxable year is the amount that the nuclear decommissioning fund estimates as the amount of tax imposed by section 468A(e)(2) and paragraph (a) of this section for such taxable year.

(5) A nuclear decommissioning fund must deposit all payments of tax imposed by section 468A(e)(2) and paragraph (a) of this section (including any payments of estimated tax) with an authorized government depositary in accordance with § 1.6302-1.

(6) A nuclear decommissioning fund is subject to the addition to tax imposed by section 6655 in

case of a failure to pay estimated income tax. For purposes of section 6655 and this section—

(i) The tax with respect to which the amount of the underpayment is computed in the case of a nuclear decommissioning fund is the tax imposed by section 468A(e)(2) and paragraph (a) of this section; and

(ii) A nuclear decommissioning fund is to be considered a large corporation under section 6655(i) if such nuclear decommissioning fund had modified gross income (as defined in paragraph (b) of this section) of $1,000,000 or more for any taxable year during the testing period.

[T.D. 8184, 53 FR 6814, March 3, 1988]

§ 1.468A–5 Nuclear decommissioning fund qualification requirements; prohibitions against self-dealing; disqualification of nuclear decommissioning fund; termination of fund upon substantial completion of decommissioning.

(a) Qualification requirements—(1) In general. (i) A nuclear decommissioning fund must be established and maintained at all times in the United States pursuant to an arrangement that qualifies as a trust under State law. Such trust must be established for the exclusive purpose of providing funds for the decommissioning of one or more nuclear power plants, but a single trust agreement may establish multiple funds for such purpose. Thus—

(A) Two or more nuclear decommissioning funds can be established and maintained pursuant to a single trust agreement; and

(B) One or more funds that are to be used for the decommissioning of a nuclear power plant and that do not qualify as nuclear decommissioning funds under this paragraph (a) (nonqualified decommissioning funds) can be established and maintained pursuant to a trust agreement that governs one or more nuclear decommissioning funds.

(ii) A separate nuclear decommissioning fund is required for each electing taxpayer and for each nuclear power plant with respect to which an electing taxpayer possesses a qualifying interest. The Internal Revenue Service shall issue a separate schedule of ruling amounts with respect to each nuclear decommissioning fund and each nuclear decommissioning fund must file a separate income tax return even if other nuclear decommissioning funds or nonqualified decommissioning funds are established and maintained pursuant to the trust agreement governing such fund or the assets of other nuclear decommissioning funds or nonqualified decommissioning funds are pooled with the assets of such fund.

(iii) The assets of two or more nuclear decommissioning funds (whether or not established pursuant to a single trust agreement) can be pooled for the purpose of investing the assets in property described in paragraph (a)(3)(i)(C) of this section if and only if—

(A) The trustee of each nuclear decommissioning fund separately accounts for the contributions, earnings, expenses, and distributions of such fund;

(B) The earnings and expenses are reasonably apportioned among such nuclear decommissioning funds; and

(C) The books and records of such funds enable the Internal Revenue Service to verify that the requirements of section 468A and §§ 1.468A-1 through 1.468A-5, 1.468A-7 and 1.468A-8 are satisfied with respect to each nuclear decommissioning fund.

(iv) The assets of nonqualified decommissioning funds can be pooled with the assets of one or more nuclear decommissioning funds for the purpose of investing the assets in property described in paragraph (a)(3)(i)(C) of this section if and only if the requirements of paragraph (a)(1)(iii) (A) and (C) of this section are satisfied and earnings and expenses are reasonably apportioned among the pooled funds.

(v) An electing taxpayer can maintain only one nuclear decommissioning fund for each nuclear power plant with respect to which the taxpayer elects the application of section 468A. If a nuclear power plant is subject to the ratemaking jurisdiction of two or more public utility commissions and any such public utility commission requires a separate fund to be maintained for the benefit of ratepayers whose rates are established or approved by the public utility commission, the separate funds maintained for such plant (whether or not established and maintained pursuant to a single trust agreement) shall be considered a single nuclear decommissioning fund for purposes of section 468A and §§ 1.468A-1 through 1.468A-5, 1.468A-7 and 1.468A-8. Thus, for example, the Internal Revenue Service shall issue one schedule of ruling amounts with respect to such nuclear power plant (see paragraph (f) of § 1.468A-3), the nuclear decommissioning fund must file a single income tax return (see paragraph (d)(1) of § 1.468A-4), and, if the Internal Revenue Service

disqualifies the nuclear decommissioning fund, the assets of each separate fund are treated as distributed on the date of disqualification (see paragraph (c)(3) of this section).

(2) Limitation on contributions. Except as otherwise provided in paragraph (b)(2)(ii) of § 1.468A-8 (relating to a special transitional rule), a nuclear decommissioning fund is not permitted to accept any contributions in cash or property other than cash payments with respect to which a deduction is allowed under section 468A(a) and paragraph (a) of § 1.468A-2. Thus, for example, unless the exception contained in paragraph (b)(2)(ii) of § 1.468A-8 applies, securities may not be contributed to a nuclear decommissioning fund even if the taxpayer or a fund established by the taxpayer previously held such securities for the purpose of providing funds for the decommissioning of a nuclear power plant.

(3) Limitation on use of fund—(i) In general. The assets of a nuclear decommissioning fund are to be used exclusively—

(A) To satisfy, in whole or in part, the liability of the electing taxpayer for decommissioning costs of the nuclear power plant to which the nuclear decommissioning fund relates;

(B) To pay administrative costs and other incidental expenses of the nuclear decommissioning fund; and

(C) To the extent that the assets of the nuclear decommissioning fund are not currently required for the purposes described in paragraph (a)(3)(i) (A) or (B) of this section, to invest directly in—

(1) Public debt securities of the United States;

(2) Obligations of a State or local government that are not in default as to principal or interest; or

(3) Time or demand deposits in a bank (as defined in section 581) or an insured credit union (within the meaning of section 101(6) of the Federal Credit Union Act, 12 U.S.C. 1752(7) (1982)), located in the United States.

(ii) Terms defined. The following terms are defined for purposes of paragraph (a)(3)(i) of this section:

(A) The term "administrative costs and other incidental expenses of a nuclear decommissioning fund" means all ordinary and necessary expenses incurred in connection with the operation of the nuclear decommissioning fund. Such term includes the tax imposed by section 468A(e)(2) and paragraph (a) of § 1.468A-4, any State or local tax imposed on the income or the assets of the fund, legal expenses, accounting expenses, actuarial expenses and trustee expenses. Such term does not include decommissioning costs. Such term also does not include the excise tax imposed on the trustee or other disqualified person under section 4951 or the reimbursement of any expenses incurred in connection with the assertion of such tax unless such expenses are considered reasonable and necessary under section 4951(d)(2)(C) and it is determined that the trustee or other disqualified person is not liable for the excise tax.

(B) The term "public debt securities of the United States" means obligations that are taken into consideration for purposes of the public debt limit.

(C) The term "obligations of a State or local government" means obligations of a State or local governmental unit the interest on which is exempt from tax under section 103(a).

(D) The term "time or demand deposits" includes checking accounts, savings accounts, certificates of deposit or other time or demand deposits. The term does not include common or collective trust funds, such as a common trust fund as defined in section 584.

(b) Prohibitions against self-dealing—(1) In general. Except as otherwise provided in this paragraph (b), the excise taxes imposed by section 4951 shall apply to each act of self-dealing between a disqualified person and a nuclear decommissioning fund.

(2) Self-dealing defined. For purposes of this paragraph (b), the term "self-dealing" means any act described in section 4951(d), except—

(i) A payment by a nuclear decommissioning fund for the purpose of satisfying, in whole or in part, the liability of the electing taxpayer for decommissioning costs of the nuclear power plant to which the nuclear decommissioning fund relates;

(ii) A withdrawal of an excess contribution by the electing taxpayer pursuant to the rules of paragraph (c)(2) of this section;

(iii) A withdrawal by the electing taxpayer of amounts that have been treated as distributed under paragraph (c)(3) of this section;

(iv) A payment of amounts remaining in a nuclear decommissioning fund to the electing taxpayer after the termination of such fund (as determined under paragraph (d) of this section);

(v) Any act described in section 4951(d)(2) (B) or (C); or

(vi) A payment by a nuclear decommissioning fund for the performance of trust functions and certain general banking services by a bank or trust company which is a disqualified person, where the banking services are reasonable and necessary to carry out the purposes of the fund, if the compensation paid to the bank or trust company, taking into account the fair interest rate for the use of the funds by the bank or trust company, for such services is not excessive. The general banking services allowed by this paragraph (b)(2)(vi) are—

(A) Checking accounts, as long as the bank does not charge interest on any overwithdrawals,

(B) Savings accounts, as long as the fund may withdraw its funds on no more than 30 days' notice without subjecting itself to a loss of interest on its money for the time during which the money was on deposit, and

(C) Safekeeping activities. (See example 3 of § 53.4941(d)-3(c)(2).)

(3) Disqualified person defined. For purposes of this paragraph (b), the term "disqualified person" includes each person described in section 4951(e)(4) and paragraph (d) of § 53.4951-1.

(c) Disqualification of nuclear decommissioning fund—(1) In general. Except as otherwise provided in paragraph (c)(2) of this section, if at any time during a taxable year of a nuclear decommissioning fund—

(i) The nuclear decommissioning fund does not satisfy the requirements of paragraph (a) of this section, or

(ii) The nuclear decommissioning fund and a disqualified person engage in an act of self-dealing (as defined in paragraph (b)(2) of this section), the Internal Revenue Service may, in its discretion, disqualify all or any portion of the fund as of the date that the fund does not satisfy the requirements of paragraph (a) of this section or the date on which the act of self-dealing occurs, whichever is applicable, or as of any subsequent date ("date of disqualification"). The Internal Revenue Service shall notify the electing taxpayer of the disqualification of a nuclear decommissioning fund and the date of disqualification by registered or certified mail to the last known address of the electing taxpayer (the "notice of disqualification").

(2) Exception to disqualification—(i) In general. A nuclear decommissioning fund will not be disqualified under paragraph (c)(1) of this section by reason of an excess contribution or the withdrawal of such excess contribution by an electing taxpayer if the amount of the excess contribution is withdrawn by the electing taxpayer on or before the date prescribed by law (including extensions) for filing the return of the nuclear decommissioning fund for the taxable year to which the excess contribution relates. In the case of an excess contribution that is the result of a payment made pursuant to paragraph (j)(1) of § 1.468A-3, a nuclear decommissioning fund will not be disqualified under paragraph (c)(1) of this section if the amount of the excess contribution is withdrawn by the electing taxpayer on or before the later of—

(A) The date prescribed by law (including extensions) for filing the return of the nuclear decommissioning fund for the taxable year to which the excess contribution relates; or

(B) The date that is 30 days after the date that the taxpayer receives the ruling amount for such taxable year.

(ii) Excess contribution defined. For purposes of this section, an excess contribution is the amount by which cash payments made (or deemed made) to a nuclear decommissioning fund during any taxable year exceed the payment limitation contained in section 468A(b) and paragraph (b) of § 1.468A-2.

(iii) Taxation of income attributable to an excess contribution. The income of a nuclear decommissioning fund attributable to an excess contribution is required to be included in the gross income of the nuclear decommissioning fund under paragraph (b) of § 1.468A-4.

(3) Effect of disqualification. If all or any portion of a nuclear decommissioning fund is disqualified under paragraph (c)(1) of this section, the portion of the nuclear decommissioning fund that is disqualified is treated as distributed to the electing taxpayer on the date of disqualification. Such a distribution shall be treated for purposes of section 1001 as a disposition of property held by the nuclear decommissioning fund (see paragraph (c)(2) of § 1.468A-4). In addition, the electing taxpayer must include in gross income for the taxable year that includes the date of disqualification an amount equal to the product of—

(i) The fair market value of the assets of the fund determined as of the date of disqualification, reduced by—

(A) The amount of any excess contribution that was not withdrawn before the date of disqualifica-

tion if no deduction was allowed with respect to such excess contribution;

(B) The amount of any deemed distribution that was not actually distributed before the date of disqualification (as determined under paragraph (d)(2)(iii) of § 1.468A-2) if the amount of the deemed distribution was included in the gross income of the electing taxpayer for the taxable year in which the deemed distribution occurred; and

(C) The amount of any tax that—

(1) Is imposed on the income of the fund;

(2) Is attributable to income taken into account before the date of disqualification or as a result of the disqualification; and

(3) Has not been paid as of the date of disqualification; and

(ii) The fraction of the nuclear decommissioning fund that was disqualified under paragraph (c)(1) of this section.

Contributions made to a disqualified fund after the date of disqualification are not deductible under section 468A(a) and paragraph (a) of § 1.468A-2, or, if the fund is disqualified only in part, are deductible only to the extent provided in the notice of disqualification. In addition, if any assets of the fund that are deemed distributed under this paragraph (c)(3) are held by the fund after the date of disqualification (or if additional assets are acquired with nondeductible contributions made to the fund after the date of disqualification), the income earned by such assets after the date of disqualification must be included in the gross income of the electing taxpayer (see section 671) to the extent that such income is otherwise includible under chapter 1 of the Internal Revenue Code. An electing taxpayer can establish a nuclear decommissioning fund to replace a fund that has been disqualified in its entirety only if the Internal Revenue Service specifically consents to the establishment of a replacement fund in connection with the issuance of an initial schedule of ruling amounts for such replacement fund.

(d) Termination of nuclear decommissioning fund upon substantial completion of decommissioning—(1) In general. Upon substantial completion of the decommissioning of a nuclear power plant to which a nuclear decommissioning fund relates, such nuclear decommissioning fund shall be considered terminated and treated as having distributed all of its assets on the date the termination occurs. Such a distribution shall be treated for purposes of section 1001 as a disposition of property held by the nuclear decommissioning fund (see paragraph (c)(2) of § 1.468A-4). In addition, the electing taxpayer shall include in gross income for the taxable year in which the termination occurs an amount equal to the fair market value of the assets of the fund determined as of the date of termination, reduced by—

(i) The amount of any deemed distribution that was not actually distributed before the date of termination if the amount of the deemed distribution was included in the gross income of the electing taxpayer for the taxable year in which the deemed distribution occurred; and

(ii) The amount of any tax that—

(A) Is imposed on the income of the fund;

(B) Is attributable to income taken into account before the date the termination occurs or as a result of the termination; and

(C) Has not been paid as of the date the termination occurs.

Contributions made to a nuclear decommissioning fund after the termination date are not deductible under section 468A(a) and paragraph (a) of § 1.468A-2. In addition, if any assets are held by the fund after the termination date, the income earned by such assets after the termination date must be included in the gross income of the electing taxpayer (see section 671) to the extent that such income is otherwise includible under chapter 1 of the Internal Revenue Code. Finally, an electing taxpayer using an accrual method of accounting is allowed a deduction for nuclear decommissioning costs that are incurred during any taxable year (see paragraph (e) of § 1.468A-2) even if such costs are incurred after substantial completion of decommissioning (e.g., expenses incurred to monitor or safeguard the plant site).

(2) Substantial completion of decommissioning defined. (i) Except as otherwise provided in paragraph (d)(2)(ii) of this section, the substantial completion of the decommissioning of a nuclear power plant occurs on the date that the maximum acceptable radioactivity levels mandated by the Nuclear Regulatory Commission with respect to a decommissioned nuclear power plant are satisfied (the "substantial completion date").

(ii) If a significant portion of the total estimated decommissioning costs with respect to a nuclear power plant are not incurred on or before the substantial completion date, an electing taxpayer may request, and the Internal Revenue Service shall issue, a ruling that designates the date on

which substantial completion of decommissioning occurs. The date designated in the ruling shall not be later than the last day of the third taxable year after the taxable year that includes the substantial completion date. The request for a ruling under this paragraph (d)(2)(ii) must be filed during the taxable year that includes the substantial completion date and must comply with the procedural rules in effect at the time of the request.
[T.D. 8184, 53 FR 6815, March 3, 1988]

§ 1.468A-6 Disposition of an interest in a nuclear power plant. [Reserved]

§ 1.468A-7 Manner of and time for making election.

(a) **In general.** An eligible taxpayer is allowed a deduction for the taxable year in which the taxpayer makes a cash payment (or is deemed to make a cash payment) to a nuclear decommissioning fund only if the taxpayer elects the application of section 468A. A separate election is required for each nuclear decommissioning fund and for each taxable year with respect to which payments are to be deducted under section 468A. In the case of an affiliated group of corporations that join in the filing of a consolidated return for a taxable year, the common parent must make a separate election on behalf of each member whose payments to a nuclear decommissioning fund during such taxable year are to be deducted under section 468A. The election under section 468A for any taxable year is irrevocable and must be made by attaching a statement ("Election Statement") and a copy of the schedule of ruling amounts provided pursuant to the rules of § 1.468A-3 to the taxpayer's Federal income tax return (or, in the case of an affiliated group of corporations that join in the filing of a consolidated return, the consolidated return) for such taxable year. Except as otherwise provided in paragraph (b)(3) of § 1.468A-8, the return to which the Election Statement and a copy of the schedule of ruling amounts is attached must be filed on or before the time prescribed by law (including extensions) for filing the return for the taxable year with respect to which payments are to be deducted under section 468A.

(b) **Required information.** The Election Statement must include the following information:

(1) The legend "Election Under Section 468A" typed or legibly printed at the top of the first page.

(2) The electing taxpayer's name, address and taxpayer identification number (or, in the case of an affiliated group of corporations that join in the filing of a consolidated return, the name, address and taxpayer identification number of each electing taxpayer).

(3) The taxable year for which the election is made.

(4) For each nuclear decommissioning fund for which an election is made—

(i) The name and location of the nuclear power plant to which the fund relates;

(ii) The name and employer identification number of the nuclear decommissioning fund;

(iii) The total amount of actual cash payments made to the nuclear decommissioning fund during the taxable year that were not treated as deemed cash payments under paragraph (c)(1) of § 1.468A-2 for a prior taxable year;

(iv) The total amount of cash payments deemed made to the nuclear decommissioning fund under paragraph (c)(1) of § 1.468A-2 for the taxable year; and

(v) The cost of service amount for the taxable year (see paragraph (b)(2) of § 1.468A-2).
[T.D. 8184, 53 FR 6818, March 3, 1988]

§ 1.468A-8 Effective date and transitional rules.

(a) **Effective date—(1) In general.** Section 468A and §§ 1.468A-1 through 1.468A-5, 1.468A-7 and 1.468A-8 are effective on July 18, 1984, and apply with respect to taxable years ending on or after such date.

(2) **Cut-off method applicable to electing taxpayers.** Any amount of nuclear decommissioning costs taken into account before July 18, 1984, for a taxable year beginning before such date, is not allowable as a deduction after July 17, 1984, under section 468A(c)(2) and paragraph (e) of § 1.468A-2.

(b) **Transitional rules—(1) Time for filing request for schedule of ruling amounts.** The Internal Revenue Service shall provide a ruling amount for any taxable year that ends on or after July 18, 1984, and begins before January 1, 1987, if—

(i) Paragraph (g) of § 1.468A-3 is satisfied for the taxable year; and

(ii) The taxpayer files a request for a schedule of ruling amounts that includes a proposed ruling amount for the taxable year on or before June 1, 1988.

(2) Manner of and time for making contributions to a nuclear decommissioning fund. (i) The amount of any contribution (including a contribution of property allowed under paragraph (b)(2)(ii) of this section) to a nuclear decommissioning fund that relates to a taxable year that ends on or after July 18, 1984, and begins before January 1, 1987, shall be deemed made during such taxable year if—

(A) The taxpayer makes such contribution on or before the 30th day after the date the taxpayer receives a ruling amount applicable to such taxable year; and

(B) The taxpayer irrevocably designates the amount of such contribution as relating to such taxable year on the Election Statement attached to its Federal income tax return (or amended return) for such taxable year.

(ii) (A) An electing taxpayer may contribute property to a nuclear decommissioning fund if the property—

(*1*) Is described in paragraph (a)(3)(i)(C) of § 1.468-5;

(*2*) Was acquired after July 18, 1984, and before March 3, 1988; and

(*3*) Is contributed for any taxable year ending after July 18, 1984, and beginning before March 3, 1988.

(B) If a taxpayer contributes property to a nuclear decommissioning fund under this paragraph (b)(2)(ii)—

(*1*) The amount of the contribution (and the basis of the property to the nuclear decommissioning fund) shall equal the fair market value of the property on the date the property is contributed to the nuclear decommissioning fund;

(*2*) The contribution of the property to the nuclear decommissioning fund shall be considered a sale or exchange of the property by the taxpayer for purposes of section 1001; and

(*3*) For purposes of section 1001, the amount realized by the taxpayer shall be the fair market value of the property on the date the property was contributed to the nuclear decommissioning fund.

(iii) A fund established by a taxpayer for the purpose of paying the decommissioning costs of a nuclear power plant is not treated as a nuclear decommissioning fund before the earlier of—

(A) The date the taxpayer receives an initial schedule of ruling amounts with respect to the fund, or

(B) The first day of the first taxable year of the taxpayer that begins on or after January 1, 1987, even if the taxpayer elects the application of section 468A for a taxable year that begins before such date. Any income earned before such date by the assets of a fund that satisfies the requirements of § 1.468A-5 must be included in the gross income of the taxpayer treated under section 671 as the owner of such assets.

(iv) If a fund is first treated as a nuclear decommissioning fund on the date described in paragraph (b)(2)(iii) of this section—

(A) The assets held in the fund on such date shall be treated for purposes of this paragraph (b)(2) as assets contributed to the nuclear decommissioning fund on such date; and

(B) The withdrawal of any such assets on or before the date prescribed by law (including extensions) for filing the return of the nuclear decommissioning fund for the taxable year that includes such date shall be treated in the same manner as the withdrawal of an excess contribution (see paragraph (c)(2) of § 1.468A-5).

(3) Manner of and time for making election. A taxpayer may elect the application of section 468A for a taxable year that ends on or after July 18, 1984, and begins before January 1, 1987, by attaching the Election Statement and a copy of the schedule of ruling amounts to—

(i) A return that is filed on or before the time prescribed by law (including extensions) for filing to return for such taxable year; or

(ii) An amended return for such taxable year that is filed on or before the 90th day after the date that the taxpayer receives a ruling amount for such table year.

(4) Determination of cost of service limitation. (i) For purposes of section 468A(b)(1) and paragraph (b)(2)(ii) of § 1.468A-2, decommissioning costs included in cost of service for any taxable year beginning before January 1, 1987, shall include decommissioning costs that can be accurately determined from information contained in the regulated books of account or other written records of the taxpayer.

(ii) For purposes of section 468A(b)(1) and paragraph (b)(2) of § 1.468A-2, the cost of service amount applicable to a nuclear decommissioning fund for the taxable year that includes July 18,

1984, is the amount determined under paragraph (b)(2) of § 1.468A-2 multiplied by a fraction, the numerator of which is the amount of nuclear decommissioning costs that is directly or indirectly charged to customers in such taxable year and that is included in the taxable income of the taxpayer for such taxable year and the denominator of which is the amount of nuclear decommissioning costs that is directly or indirectly charged to customers in such taxable year and that would have been included in the gross income of the taxpayer if such costs were taken into account by the taxpayer in the same manner as amounts charged for electric energy (see § 1.88-1). Under the preceding sentence, an amount of decommissioning costs is included in the taxable income of a taxpayer for the taxable year that includes July 18, 1984, if the amount is included in gross income for such taxable year and no deduction (other than a deduction allowed under section 468A(a) and paragraph (a) of § 1.468A-2) is claimed with respect to such amount for such taxable year.

(5) Assumptions and determinations to be used in determining ruling amounts. (i) To the extent consistent with the principles and provisions of § 1.468A-3, a ruling amount for any taxable year beginning before January 1, 1987, shall be based on the reasonable assumptions and determinations used by the applicable public utility commission(s) in establishing or approving the amount of decommissioning costs included in cost of service for ratemaking purposes for such taxable year.

(ii) If the applicable public utility commission(s) did not disclose the after-tax rate of return used in establishing or approving the amount of decommissioning costs included in cost of service for any period during a taxable year that ends on or after July 18, 1984, and begins before January 1, 1987, the after-tax rate of return during such period is equal to 54 percent of the overpayment rate in effect under section 6621 during such period.

(iii) If the applicable public utility commission(s) did not disclose the other assumptions and determinations used in establishing or approving the amount of decommissioning costs included in cost of service for any taxable year that ends on or after July 18, 1984, and begins before January 1, 1987, ruling amount for each such taxable year shall be determined by taking into account—

(A) The amount of decommissioning costs included in cost of service for such taxable year;

(B) The qualifying percentage (as determined under paragraph (d)(4) of § 1.468A-3 and paragraph (b)(7) of this section); and

(C) The amount of decommissioning costs included in cost of service for any earlier taxable year.

(6) Exception to level funding limitation. Notwithstanding paragraph (b) of § 1.468A-3, the Internal Revenue Service may, in its discretion, provide a schedule of ruling amounts specifying a ruling amount for a taxable year that ends on or after July 18, 1984, and begins before January 1, 1987, that is greater than the ruling amount specified in such schedule for a later taxable year.

(7) Determination of qualifying percentage. (i) (A) The qualifying percentage shall be determined under this paragraph (b)(7)(i) if a nuclear power plant began commercial operations on or before July 10, 1986, and a taxpayer—

(*1*) Files a request for a schedule of ruling amounts for the nuclear decommissioning fund maintained with respect to such nuclear power plant on or before June 1, 1988; and

(*2*) Elects the application of this paragraph (b)(7)(i) in its request for a schedule of ruling amounts.

(B) If the qualifying percentage is determined under this paragraph (b)(7)(i), the estimated period for which the nuclear decommissioning fund is to be in effect for purposes of paragraph (d)(4)(ii) of § 1.468A-3 begins on the later of—

(*1*) The first day of the taxable year that includes the date that the nuclear power plant began commercial operations; or

(*2*) The first day of the taxable year that includes July 18, 1984.

(ii) (A) The qualifying percentage shall be determined under this paragraph (b)(7)(ii) if a nuclear power plant began commercial operations before July 18, 1984, and a taxpayer—

(*1*) Files a request for a schedule of ruling amounts for the nuclear decommissioning fund maintained with respect to such nuclear power plant on or before June 1, 1988; and

(*2*) Elects the application of this paragraph (b)(7)(ii) in its request for a schedule of ruling amounts.

(B) If the qualifying percentage is determined under this paragraph (b)(7)(ii), the estimated period for which the nuclear decommissioning fund is to be in effect for purposes of paragraph (d)(4)(ii) of § 1.468A-3 and the estimated useful life of the nuclear power plant for purposes of paragraph

(d)(4)(iii) of § 1.468A-3 shall end on the earlier of—

(*1*) The last day of the taxable year in which it is estimated that decommissioning will begin; or

(*2*) The last day of the taxable year that includes the expiration date of the Nuclear Regulatory Commission operating license as in effect on July 18, 1984, without regard to any extensions or amendments thereto.

(iii) In the case of a nuclear power plant that began commercial operations before July 18, 1984, and whose estimated useful life for ratemaking purposes was adjusted by a public utility commission before July 18, 1984, a taxpayer may elect in its request for a schedule of ruling amounts to compute the qualifying percentage in accordance with the following rules:

(A) If the taxpayer files a request for a schedule of ruling amounts for the nuclear decommissioning fund maintained with respect to such nuclear power plant on or before June 1, 1988, the qualifying percentage equals the percentage of original depreciation costs (determined without regard to capitalized decommissioning costs) with respect to the nuclear power plant that remains to be recovered for ratemaking purposes as of the first day of the taxable year that includes July 18, 1984.

(B) If a taxpayer does not file a request for a schedule of ruling amounts for the nuclear decommissioning fund maintained with respect to such nuclear power plant on or before June 1, 1988, the qualifying percentage equals the percentage of original depreciation costs (determined without regard to capitalized decommissioning costs) with respect to the nuclear power plant that remains to be recovered for ratemaking purposes as of the first day of the first taxable year for which a deductible payment is made to the nuclear decommissioning fund that relates to such nuclear power plant.

(C) For purposes of this paragraph (b)(7)(iii), original depreciation costs with respect to a nuclear power plant include only those costs that were taken into account in determining the amount of depreciation with respect to such plant in the first ratemaking proceeding in which such depreciation was treated as a cost of service.

(8) Limitation on payments to a nuclear decommissioning fund—(i) The limitation on payments to a nuclear decommissioning fund (see section 468A(b) and paragraph (b) of § 1.468A-2) for a taxable year that ends on or after July 18, 1984, and begin before January 1, 1987, shall be determined under paragraph (b)(8)(ii) of this section if—

(A) The electing taxpayer receives a ruling amount applicable to such taxable year after the deemed payment deadline date for such taxable year; and

(B) The requirements of paragraph (b)(8)(iii) of this section are satisfied.

(ii) If the limitation on payments to a nuclear decommissioning fund for a taxable year is determined under this paragraph (b)(8)(ii), the maximum amount of payments made (or deemed made) to the nuclear decommissioning fund during such taxable year shall not exceed the sum of—

(A) The amount determined under section 468A(b) and paragraph (b) of § 1.468A-2 (i.e., the lesser of the cost of service amount or the ruling amount) after application of the transitional rules contained in paragraph (b)(4), (5), (6) and (7) of this section; and

(B) The amount of after-tax earnings that would have accumulated to the date of actual payment to the nuclear decommissioning fund if the amount described in paragraph (b)(8)(ii)(A) of this section had been contributed to the nuclear decommissioning fund on the deemed payment deadline date for such taxable year.

In determining the after-tax earnings that would have accumulated to the date of payment, an electing taxpayer must use the after-tax rate of return of the nuclear decommissioning fund that was used in determining the initial schedule of ruling amounts.

(iii) In order to compute the payment limitation under paragraph (b)(8)(ii) of this section for any taxable year, an electing taxpayer must—

(A) Indicate on the Election Statement for the taxable year that the amount of the deductible payment is greater than the amount determined under section 468A(b) and paragraph (b) of § 1.468A-2 because paragraph (b)(8) of § 1.468A-8 applies;

(B) Not have claimed a deduction for the taxable year under section 468A(a) or paragraph (a) of § 1.468A-2 on any return that is filed before the date that a ruling amount is received for the taxable year;

(C) Not have taken a deduction under section 468A (a) or paragraph (a) of § 1.468A-2 into account in determining the amount properly estimated as tax for the taxable year under section

6081 (b) (relating to the automatic extension for filing corporate income tax returns); and

(D) Not take the deduction allowed with respect to such payment into account in determining the amount of any overpayment of tax (within the meaning of section 6611) or underpayment of tax (within the meaning of section 6601) for the period ending on the date of such payment (see paragraph (b)(9) of this section).

(iv) The following example illustrates the application of the principles of paragraph (b)(8) of this section:

Example. X corporation is a calendar year, accrual method taxpayer engaged in the sale of electric energy generated by a nuclear power plant owned by X. On September 15, 1987, X receives a schedule of ruling amounts from the Internal Revenue Service that includes a ruling amount of $1,000,000 for the 1986 taxable year. For purposes of this example, assume that the cost of service amount applicable to the nuclear decommissioning fund for the 1986 taxable year is also $1,000,000 and that the after-tax rate of return of the nuclear decommissioning fund that was used in determining the schedule of ruling amounts is 10 percent compounded semi-annually. On September 15, 1987, X makes a contribution of $1,050,000 to a nuclear decommissioning fund established by X. Under paragraph (b)(8)(ii) of this section, this contribution does not exceed the limitation on payments for the 1986 taxable year and the entire amount of the contribution is deductible for such year. The additional $50,000 deductible payment that is allowed under this paragraph (b)(8) reflects the foregone earnings of the fund for the six-month period beginning on the deemed payment deadline date for the 1986 taxable year (March 15, 1987) and ending on the date of the contribution (September 15, 1987).

(9) Denial of interest on overpayment. If a deduction is allowed by reason of paragraph (b)(2) of this section for the amount of any payment made after the 15th day of the third calendar month after the close of the taxable year to which such payment relates, such deduction shall not be taken into account in determining the amount of any overpayment of tax (within the meaning of section 6611) or underpayment of tax (within the meaning of section 6601) for the period ending on the date of such payment.

(10) Determination of addition to tax for failure to pay estimated tax. In the case of any taxable year that ends on or after July 18, 1984, and begins before January 1, 1987, the tax shown on the return for such taxable year for purposes of section 6655(b) shall equal the tax that would be shown on the return if a deduction were allowed for the lesser of—

(i) The amount of the payment made to the nuclear decommissioning fund for such taxable year; or

(ii) The amount determined under section 468A(b) and paragraph (b) of § 1.468A-2 (i.e., the lesser of the cost of service amount or the ruling amount) after application of the transitional rules contained in paragraph (b)(4), (5), (6) and (7) of this section but without regard to the transitional rule contained in paragraph (b)(8) of this section.

(3) Disallowance of consolidated group's passive activity loss or credit.

(4) Status and material participation of members.

(i) Determination by reference to status and participation of group.

(ii) Determination of status and material participation of consolidated group.

(5) Modification of rules for identifying disallowed passive activity deductions and credits.

(i) Identification of disallowed deductions.

(ii) Ratable portion of disallowed passive activity loss.

(iii) Identification of disallowed credits.

(6) Transactions between members of a consolidated group.

(i) Scope.

(ii) Recharacterization of gain or loss from intercompany transactions other than deferred intercompany transactions.

(A) In general.

(B) Recharacterization of gain or loss as portfolio items.

(iii) Deferred intercompany transactions.

(A) In general.

(B) Deferred intercompany transactions involving property subject to depreciation, amortization, or depletion.

(C) Restoration of deferred gain or loss or dispositions.

(D) Certain recharacterized items treated as portfolio items.

(E) Property involved in deferred intercompany transaction.

(iv) Definitions.

(A) Deferred intercompany transaction.

(B) Directly related.

(C) Intercompany transaction.

(D) Purchasing member.

(E) Selling member.

(7) Disposition of stock of a member of an affiliated group.

(8) Dispositions of property used in multiple activities.

(i) [Reserved]

(j) Spouses filing joint return.

(1) In general.

(2) Exceptions to treatment as one taxpayer.

(i) Identification of disallowed deductions and credits.

(ii) Treatment of deductions disallowed under sections 704(d), 1366(d) and 465.

(iii) Treatment of losses from working interests.

(3) Joint return no longer filed.

(4) Participation of spouses.

(k) Former passive activities and changes in status of corporations. [Reserved]

§ 1.469-2T Passive activity loss (temporary).

(a) Scope of this section.

(b) Definition of passive activity loss.

(1) In general.

(2) Cross references.

(c) Passive activity gross income.

(1) In general.

(2) Treatment of gain from disposition of an interest in an activity or an interest in property used in an activity.

(i) In general.

(A) Treatment of gain.

(B) Dispositions of partnership interests and S corporation stock.

(C) Interest in property.

(D) Examples.

(ii) Disposition of property used in more than one activity in 12-month period preceding disposition.

(iii) Disposition of substantially appreciated property formerly used in nonpassive activity.

(A) In general.

(B) Date of disposition.

(C) Substantially appreciated property.

(D) Coordination with paragraph (c)(2)(ii) of this section.

(E) Coordination with section 163(d).

(F) Example.

(3) Items of portfolio income specifically excluded.

(i) In general.

(ii) Gross income derived in the ordinary course of a trade or business.

(iii) Special rules.

(A) Income from property held for investment by dealer.

(B) Royalties derived in the ordinary course of the trade or business of licensing intangible property.

(1) In general.

(2) Substantial services or costs.

(ii) Exception.

(iii) Expenditures taken into account.

(3) Passthrough entities.

(4) Cross reference.

(C) Mineral production payments.

(iv) Examples.

(4) Items of personal service income specifically excluded.

(i) In general.

(ii) Example.

(5) Income from section 481 adjustment.

(i) In general.

(ii) Positive section 481 adjustments.

(iii) Ratable portion.

(6) Gross income from certain oil or gas properties.

(i) In general.

(ii) Net income from the property.

(iii) Property.

(iv) Examples.

(7) Other items specifically excluded.

(d) Passive activity deductions.

(1) In general.

(2) Exceptions.

(3) Interest expense.

(4) Clearly and directly allocable expenses.

(5) Treatment of loss from disposition.

(i) In general.

(ii) Disposition of Property used in more than one activity in 12-month period preceding disposition.

(iii) Other applicable rules.

(A) Interest in property.

(B) Dispositions of partnership interests and S Corporation stock.

(6) Coordination with other limitations on deduction that apply before section 469.

(i) In general.

(ii) Proration of deductions disallowed under basis limitations.

(A) Deductions disallowed under section 704(d).

(B) Deductions disallowed under section 1366(d).

(iii) Proration of deductions disallowed under at-risk limitation.

(iv) Coordination of basis and at-risk limitations.

(v) Separately identified items of deduction and loss.

(7) Deductions from section 481 adjustment.

(i) In general.

(ii) Negative section 481 adjustment.

(iii) Ratable portion.

(8) Taxable year in which item arises.

(e) Special rules for partners and S corporation shareholders.

(1) In general.

(2) Payments under section 707(a), 707(c), and 736(b).

(i) Section 707(a).

(ii) Section 707(c).

(A) In general.

(B) Exception.

(iii) Section 736 (b).

(3) Sale or exchange of interest in passthrough entity.

(i) Application of this paragraph (e) (3).

(ii) General rule.

(A) Allocation among activities.

(B) Ratable portion.

(1) Dispositions on which gain is recognized.

(2) Dispositions on which loss is recognized.

(C) Default rule.

(D) Special rules.

(1) Applicable valuation date.

(i) In general.

(ii) Exception.

(2) Basis adjustments.

(3) Tiered passthrough entities.

(E) Meaning of certain terms.

(iii) Treatment of gain allocated to certain passive activities as not from a passive activity.

(iv) Dispositions occurring in taxable years beginning before February 19, 1988.

(A) In general.

(B) Exceptions.

(v) Treatment of portfolio assets.

(vi) Definitions.

(vii) Examples.

(f) Recharacterization of passive income in certain situations.

(1) In general.

(2) Special rule for significant participation.

(i) In general.

(ii) Significant participation passive activity.

(iii) Example.

(3) Rental of nondepreciable property.

(4) Net interest income from passive equity-financed lending activity.

(i) In general.

(ii) Equity-financed lending activity.

(A) In general.

(B) Certain liabilities not taken into account.

(iii) Equity-financed interest income.

(iv) Net interest income.

(v) Interest-bearing assets.

(vi) Liabilities incurred in the activity.

(vii) Average outstanding balance.

(viii) Example.

(5) Net income from certain property rented incidental to development activity.

(i) In general.

(ii) Commencement of use.

(iii) Services performed for the purpose of enhancing the value of property.

(iv) Example.

(6) Property rented to a nonpassive activity.

(7) Special rules applicable to the acquisition of an interest in a passthrough entity engaged in the trade or business of licensing intangible property.

(i) In general.

(ii) Royalty income from property.

(iii) Exceptions.

(iv) Capital expenditures.

(v) Example.

(8) Limitation on recharacterized income.

(9) Meaning of certain terms.

(10) Coordination with section 163 (d).

(11) Effective date.

§ 1.469-3T Passive activity credit (temporary).

(a) Computation of passive activity credit.

(b) Credits subject to section 469.

(1) In general.

(2) Treatment of credits attributable to qualified progress expenditures.

(3) Special rule for partners and S corporation shareholders.

(4) Exception for pre-1987 credits.

(c) Taxable year to which credit is attributable.

(d) Regular tax liability allocable to passive activities.

(1) In general.

(2) Regular tax liability.

(e) Coordination with section 39.

(f) Examples.

§ 1.469-4T Definition of activity (temporary). [Reserved]

§ 1.469-5T Material participation (temporary).

(a) In general.

(b) Facts and circumstances.

(1) In general. [Reserved]

(2) Certain participation insufficient to constitute material participation under this paragraph (b).

(i) Participation satisfying standards not contained in section 469.

(ii) Certain management activities.

(iii) Participation less than 100 hours.

(c) Significant participation activity.

(1) In general.

(2) Significant participation.

(d) Personal service activity.

(e) Treatment of limited partners.

(1) General rule.

(2) Exceptions.

(3) Limited Partnership interest.

(i) In general.

(ii) Limited Partner holding general partner interest.

(f) Participation.

(1) In general.

(2) Exceptions.

(i) Certain work not customarily done by owners.

(ii) Participation as an investor.

(A) In general.

(B) Work done in individual's capacity as an investor.

(3) Participation of spouse.

(4) Methods of proof.

(g) Material participation of trusts and estates. [Reserved]

(h) Miscellaneous rules.

(1) Participation of corporations.

(2) Treatment of certain retired farmers and surviving spouses of retired or disabled farmers.

(i) [Reserved]

(j) Material participation for taxable years beginning before January 1, 1987.

(k) Examples.

§ 1.469-6T Treatment of losses upon certain dispositions (temporary). [Reserved]

§ 1.469-7T Treatment of self-charged items of income and expense (temporary). [Reserved]

§ 1.469-8T Application of section 469 to trusts, estates, and their beneficiaries (temporary). [Reserved]

§ 1.469-9T Treatment of income, deductions, and credits from certain rental real estate activities (temporary). [Reserved]

§ 1.469-10T Application of section 469 to publicly traded partnerships (temporary). [Reserved]

§ 1.469-11T Effective date and transition rules (temporary).

(a) Effective date.

(1) In general.

(2) Application of certain income recharacterization rules.

(i) In general.

(ii) Property rented to a nonpassive activity.

(3) Qualified low-income housing projects.

(4) Effect of events occurring in years prior to 1987.

(5) Examples.

(b) Transitional rule for pre-enactment loss and pre-enactment credit.

(1) In general.

(2) Applicable percentage.

(3) Pre-enactment loss.

(4) Pre-enactment credit.

(5) Examples.

(c) Definitions of pre-enactment interest.

(1) General rule.

(2) Qualified interest.

(i) In general.

(ii) Stock in a C corporation.

(3) Pre-enactment activity.

(i) In general.

(ii) Character before 1987 irrelevant.

(4) Examples.

(5) Effect of changes in a taxpayer's interest in a pre-enactment activity.

(i) In general.

(ii) Partnership terminations under section 708(b)(1)(B).

(iii) Examples.

(6) Special rule for beneficiaries of trusts or estates.

(i) In general.

(ii) Interests distributed to beneficiaries.

(7) Written binding contract.

(i) In general.

(ii) Special rule for contract of partnership or S corporation.

(iii) Application of rule to partnership agreements.

[T.D. 8175, 53 FR 5698, Feb. 25, 1988]

§ 1.469–1T General rules (temporary).

(a) Passive activity loss and credit disallowed—(1) In general. Except as otherwise provided in paragraph (a)(2) of this section—

(i) The passive activity loss for the taxable year shall not be allowed as a deduction; and

(ii) The passive activity credit for the taxable year shall not be allowed.

(2) Exceptions. Paragraph (a)(1) of this section shall not apply to the passive activity loss or the passive activity credit for the taxable year to the extent provided in—

(i) Section 469(i) and the rules to be contained in § 1.469-9T (relating to losses and credits attributable to certain rental real estate activities); and

(ii) Section 1.469-11T (relating to losses and credits attributable to certain pre-enactment interests in activities).

(b) Taxpayers to whom these rules apply. The rules of section 469 and the regulations thereunder generally apply to—

(1) Individuals;

(2) Trusts (other than trusts (or portions of trusts) described in section 671);

(3) Estates;

(4) Personal service corporations (within the meaning of paragraph (g)(2)(i) of this section); and

(5) Closely held corporations (within the meaning of paragraph (g)(2)(ii) of this section).

(c) Cross references—(1) Definition of "passive activity." Rules relating to the definition of the term "passive activity" are contained in paragraph (e) of this section.

(2) Passive activity loss. Rules relating to the computation of the passive activity loss for the taxable year are contained in § 1.469-2T.

(3) Passive activity credit. Rules relating to the computation of the passive activity credit for the taxable year are contained in § 1.469-3T.

(4) Effect of rules for other purposes. Rules relating to the effect of section 469 and the regulations thereunder for other purposes under the Code are contained in paragraph (d) of this section.

(5) Special rule for oil and gas working interests. Rules relating to the treatment of losses and credits from certain interests in oil and gas wells are contained in paragraph (e)(4) of this section

(6) Treatment of disallowed losses and credits. Paragraph (f) of this section contains rules relating to—

(i) The treatment of deductions from passive activities in taxable years in which the passive activity loss is disallowed in whole or in part under paragraph (a)(1)(i) of this section; and

(ii) The treatment of credits from passive activities in taxable years in which the passive activity credit is disallowed in whole or in part under paragraph (a)(1)(ii) of this section.

(7) Corporation subject to section 469. Rules relating to the application of section 469 and regulations thereunder to C corporations are contained in paragraph (g) of this section.

(8) Consolidated groups. Rules relating to the application of section 469 and the regulations thereunder to affiliated groups of corporations filing a consolidated return for the taxable year are contained in paragraph (h) of this section.

(9) Joint returns. Rules relating to the application of section 469 and the regulations thereunder to spouses filing a joint return for the taxable year are contained in paragraph (j) of this section.

(10) Material participation. Rules defining the term "material participation" are contained in § 1.469-5T.

(11) Effective date and transition rules. Rules relating to the effective date of section 469 and the regulations thereunder and transition rules applicable to pre-enactment interests in activities are contained in § 1.469-11T.

(12) Future regulations. (i) Rules relating to former passive activities and changes in corporate status will be contained in paragraph (k) of this section.

(ii) Rules relating to the definition of "activity" will be contained in § 1.469-4T.

(iii) Rules relating to the treatment of deductions from activities that are disposed of in certain transactions will be contained in § 1.469-6T.

(iv) Rules relating to the treatment of self-charged items of income and expense will be contained in § 1.469-7T.

(v) Rules relating to the application of section 469 and the regulations thereunder to trusts, estates, and their beneficiaries will be contained in § 1.469-8T.

(vi) Rules relating to the treatment of income, deductions, and credits from certain rental real estate activities of individuals and certain estates will be contained in § 1.469-9T.

(vii) Rules relating to the application of section 469 to publicly traded partnerships will be contained in § 1.469-10T.

(d) Effect of section 469 and the regulations thereunder for other purposes—(1) Treatment of items of passive activity income and gain. Neither the provisions of section 469 (a) (1) and paragraph (a)(1) of this section nor the characterization of items of income or deduction as passive activity gross income (within the meaning of § 1.469-2T (c)) or passive activity deductions (within the meaning of § 1.469-2T (d)) affects the treatment of any item of income or gain under any provision of the Internal Revenue Code other than section 469. The following example illustrates the application of this paragraph (d)(1):

Example. (i) In 1991, an individual's only income and loss from passive activities are a $10,000 capital gain from passive activity X and a $12,000 ordinary loss from passive activity Y. The taxpayer also has a $10,000 capital loss that is not derived from a passive activity.

(ii) Under § 1.469-2T (b), the taxpayer has a $2,000 passive activity loss for the taxable year. The only effect of section 469 and the regulations thereunder is to disallow a deduction for the taxpayer's $2,000 passive activity loss for the taxable year. Thus, the taxpayer's capital loss for the taxable year is allowed because the $10,000 capital gain from passive activity X is taken into account under section 1211 (b) in computing the taxpayer's allowable capital loss for the year.

(2) Coordination with section 1211. A passive activity deduction that is not disallowed for the taxable year under section 469 and the regulations thereunder may nonetheless be disallowed for the taxable year under section 1211. The following example illustrates the application of this paragraph (d)(2):

Example. In 1987, an individual derives $10,000 of ordinary income from passive activity X, no gains from the sale or exchange of capital assets or assets used in a trade or business, $12,000 of capital loss from passive activity Y, and no income, gain, deductions, or losses from any other passive activity. The capital loss from activity Y is a passive activity deduction (within the meaning of § 1.469-2T(d)). Under section 469 and the regulations thereunder, the taxpayer is allowed $10,000 of the $12,000 passive activity deduction and has a $2,000 passive activity loss for the taxable year. Since the $10,000 passive activity deduction allowed under section 469 is a capital loss, such deduction is allowable for the taxable year only to the extent provided under section 1211. Therefore, the taxpayer is allowed $3,000 of the $10,000 capital loss under section 1211 and has a $7,000 capital loss carryover (within the meaning of section 1212 (b)) to the succeeding taxable year.

(3) Treatment of passive activity losses. Except as otherwise provided by regulations, a deduction that is disallowed for a taxable year under section 469 and the regulations thereunder is not taken into account as a deduction that is allowed for the taxable year in computing the amount subject to any tax imposed by subtitle A of the Internal Revenue Code. The following example illustrates the application of this paragraph (d)(3):

Example. An individual has a $5,000 passive activity loss for a taxable year, all of which is disallowed under paragraph (a)(1) of this section. All of the disallowed loss is allocated under paragraph (f) of this section to activities that are trades or businesses (within the meaning of section 1402(c)). Such loss is not taken into account for the taxable year in computing the taxpayer's taxable income subject to tax under section 1. In addition, under this paragraph (d)(3), such loss is not taken into account for the taxable year in computing the taxpayer's net earnings from self-employment subject to tax under section 1401.

(e) Definition of "passive activity"—(1) In general. Except as otherwise provided in this paragraph (e), an activity is a passive activity of the taxpayer for a taxable year if and only if the activity—

(i) Is a trade or business activity (within the meaning of paragraph (e)(2) of this section) in which the taxpayer does not materially participate for such taxable year; or

(ii) Is a rental activity (within the meaning of paragraph (e) (3) of this section), without regard to whether or to what extent the taxpayer participates in such activity.

(2) Trade or business activity—(i) In general. An activity is a trade or business activity for a taxable year if for such year—

(A) (1) The activity involves the conduct of a trade or business (within the meaning of section 162);

(2) Research or experimental expenditures paid or incurred with respect to the activity are deductible under section 174 (or would be deductible if the taxpayer adopted the method described in section 174(a)); or

(3) The activity is described in paragraph (e)(2)(ii) of this section; and

(B) The activity is not a rental activity or an activity involving the rental of property described in paragraph (e)(3) (vi)(B) of this section.

(ii) Certain activities not involving the conduct of a trade or business treated as trade or business activities. [Reserved]

(3) Rental activity—(1) In general. Except as otherwise provided in this paragraph (e)(3), an activity is a rental activity for a taxable year if—

(A) During such taxable year, tangible property held in connection with the activity is used by customers or held for use by customers; and

(B) The gross income attributable to the conduct of the activity during such taxable year represents (or, in the case of an activity in which property is held for use by customers, the expected gross income from the conduct of the activity will represent) amounts paid or to be paid principally for the use of such tangible property (without regard to whether the use of the property by customers is pursuant to a lease or pursuant to a service contract or other arrangement that is not denominated a lease).

(ii) Exceptions. For purposes of this paragraph (e)(3), an activity involving the use of tangible property is not a rental activity for a taxable year if for such taxable year—

(A) The average period of customer use for such property is seven days or less;

(B) The average period of customer use for such property is 30 days or less, and significant personal services (within the meaning of paragraph (e)(3)(iv) of this section) are provided by or on behalf of the owner of the property in connection with making the property available for use by customers;

(C) Extraordinary personal services (within the meaning of paragraph (e)(3)(v) of this section) are provided by or on behalf of the owner of the property in connection with making such property available for use by customers (without regard to the average period of customer use);

(D) The rental of such property is treated as incidental to a nonrental activity of the taxpayer under paragraph (e)(3)(vi) of this section;

(E) The taxpayer customarily makes the property available during defined business hours for nonexclusive use by various customers; or

(F) The provision of the property for use in an activity conducted by a partnership, S corporation, or joint venture in which the taxpayer owns an interest is not a rental activity under paragraph (e)(3)(vii) of this section.

(iii) Average period of customer use. For purposes of this paragraph (e)(3), the average period of customer use for property held in connection

with an activity is determined for a taxable year by dividing—

(A) The aggregate number of days in all periods of customer use for such property ending during the taxable year; by

(B) The number of such periods of customer use.

For this purpose, each period during which a customer has a continuous or recurring right to use an item of property held in connection with the activity (without regard to whether the customer uses the property for the entire period or whether such right to use the property is pursuant to a single agreement or to renewals thereof) is treated as a separate period of customer use.

(iv) Significant personal services—(A) In general. For purposes of paragraph (e)(3)(ii)(B) of this section, personal services include only services performed by individuals, and do not include excluded services (within the meaning of paragraph (e)(3)(iv)(B) of this section). In determining whether personal services provided in connection with making property available for use by customers are significant, all of the relevant facts and circumstances shall be taken into account. Relevant facts and circumstances include the frequency with which such services are provided, the type and amount of labor required to perform such services, and the value of such services relative to the amount charged for the use of the property.

(B) Excluded services. For purposes of paragraph (e)(3)(iv)(A) of this section, the term "excluded services" means, with respect to any property made available for use by customers—

(1) Services necessary to permit the lawful use of the property;

(2) Services performed in connection with the construction of improvements to the property, or in connection with the performance of repairs that extend the property's useful life for a period substantially longer than the average period for which such property is used by customers; and

(3) Services, provided in connection with the use of any improved real property, that are similar to those commonly provided in connection with long-term rentals of high-grade commercial or residential real property (e.g., cleaning and maintenance of common areas, routine repairs, trash collection, elevator service, and security at entrances or perimeters).

(v) Extraordinary personal services. For purposes of paragraph (e)(3)(ii)(C) of this section, extraordinary personal services are provided in connection with making property available for use by customers only if the services provided in connection with the use of the property are performed by individuals, and the use by customers of the property is incidental to their receipt of such services. For example, the use by patients of a hospital's boarding facilities generally is incidental to their receipt of the personal services provided by the hospital's medical and nursing staff. Similarly, the use by students of a boarding school's dormitories generally is incidental to their receipt of the personal services provided by the school's teaching staff.

(vi) Rental of property incidental to a nonrental activity of the taxpayer—(A) In general. For purposes of paragraph (e)(3)(ii)(D) of this section, the rental of property shall be treated as incidental to a nonrental activity of the taxpayer only to the extent provided in this paragraph (e)(3)(vi).

(B) Property held for investment. The rental of property during a taxable year shall be treated as incidental to an activity of holding such property for investment if and only if—

(1) The principal purpose for holding the property during such taxable year is to realize gain from the appreciation of the property (without regard to whether it is expected that such gain will be realized from the sale or exchange of the property in its current state of development); and

(2) The gross rental income from the property for such taxable year is less than two percent of the lesser of—

(i) The unadjusted basis of such property; and

(ii) The fair market value of such property.

(C) Property used in a trade or business. The rental of property during a taxable year shall be treated as incidental to a trade or business activity (within the meaning of paragraph (e)(2) of this section) if and only if—

(1) The taxpayer owns an interest in such trade or business activity during the taxable year;

(2) The property was predominantly used in such trade or business activity during the taxable year or during at least two of the five taxable years that immediately precede the taxable year; and

(3) The gross rental income from such property for the taxable year is less than two percent of the lesser of—

(i) The unadjusted basis of such property; and

(ii) The fair market value of such property.

(D) Property held for sale to customers. The rental of property during the taxable year in which the property is sold or exchanged (in a transaction in which gain or loss is recognized) shall be treated as incidental to an activity of dealing in such property if at the time of the sale or exchange the property is held by the taxpayer primarily for sale to customers in the ordinary course of a trade or business of the taxpayer (within the meaning of section 1221(1)).

(E) Lodging rented for convenience of employer. The provision of lodging to an employee or to an employee's spouse or dependents shall be treated as incidental to the activity (or activities) of the taxpayer in which the employee performs services if such lodging is furnished for the taxpayer's convenience (within the meaning of section 119).

(F) Unadjusted basis. For purposes of this paragraph (e)(3)(vi), the term "unadjusted basis" means adjusted basis determined without regard to any adjustment described in section 1016 that decreases basis.

(vii) Property made available for use in a nonrental activity conducted by a partnership, S corporation, or joint venture in which the taxpayer owns an interest. If the taxpayer owns an interest in a partnership, S corporation, or joint venture conducting an activity other than a rental activity, and the taxpayer provides property for use in the activity in the taxpayer's capacity as an owner of an interest in such partnership, S corporation, or joint venture, the provision of such property is not a rental activity. Thus, if a partner contributes the use of property to a partnership, none of the partner's distributive share of partnership income is income from a rental activity unless the partnership is engaged in a rental activity. In addition, a partner's gross income attributable to a payment described in section 707(c) is not income from a rental activity under any circumstances (see § 1.469-2T (e)(2)). The determination of whether property used in an activity is provided by the taxpayer in the taxpayer's capacity as an owner of an interest in a partnership, S corporation, or joint venture shall be made on the basis of all of the facts and circumstances.

(viii) Examples. The following examples illustrate the application of this paragraph (e)(3):

Example (1). The taxpayer is engaged in an activity of leasing photocopying equipment. The average period of customer use for the equipment exceeds 30 days. Pursuant to the lease agreements, skilled technicians employed by the taxpayer maintain the equipment and service malfunctioning equipment for no additional charge. Service calls occur frequently (three times per week on average) and require substantial labor. The value of the maintenance and repair services (measured by the cost to the taxpayer of employees performing these services) exceeds 50 percent of the amount charged for the use of the equipment. Under these facts, services performed by individuals are provided in connection with the use of the photocopying equipment, but the customers' use of the photocopying equipment is not incidental to their receipt of the services. Therefore, extraordinary personal services (within the meaning of paragraph (e)(3)(v) of this section) are not provided in connection with making the photocopying equipment available for use by customers, and the activity is a rental activity.

Example (2). The facts are the same as in example (1), except that the average period of customer use for the photocopying equipment exceeds seven days but does not exceed 30 days. Under these facts, significant personal services (within the meaning of paragraph (e)(3)(iv) of this section) are provided in connection with making the photocopying equipment available for use by customers and, under paragraph (e)(3)(ii)(B) of this section, the activity is not a rental activity.

Example (3). The taxpayer is engaged in an activity of transporting goods for customers. In conducting the activity, the taxpayer provides tractor-trailers to transport goods for customers pursuant to arrangements under which the tractor-trailers are selected by the taxpayer, may be replaced at the sole option of the taxpayer, and are operated and maintained by drivers and mechanics employed by the taxpayer. The average period of customer use for the tractor-trailers exceeds 30 days. Under these facts, the use of tractor-trailers by the taxpayer's customers is incidental to their receipt of personal services provided by the taxpayer. Accordingly, the services performed in the activity are extraordinary personal services (within the meaning of paragraph (e)(3)(v) of this section) and, under paragraph (e)(3)(ii)(C) of this section, the activity is not a rental activity.

Example (4). The taxpayer is engaged in an activity of owning and operating a residential apartment hotel. For the taxable year, the average period of customer use for apartments exceeds seven days but does not exceed 30 days. In addition to cleaning public entrances, exists, stairways, and lobbies, and collecting and removing trash, the taxpayer provides a daily maid and linen service at no additional charge. All of the services other than maid and linen service are excluded services (within the meaning of paragraph (e)(3)(iv)(B) of this section), because such services are similar to those commonly provided in connection with long-term rentals of high-grade residential real property. The value of the maid and linen services (measured by the cost to the taxpayer of employees performing such services) is less than 10 percent of the amount charged to tenants for occupancy of apartments. Under these facts, neither significant personal services (within the meaning of paragraph (e)(3)(iv) of this section) nor extraordinary personal services (within the meaning of paragraph (e)(3)(v) of this section) are provided in connection with making apartments available for use by customers. Accordingly, the activity is a rental activity.

Example (5). The taxpayer owns 1,000 acres of unimproved land with a fair market value of $350,000 and an unadjusted basis of $210,000. The taxpayer holds the land for the principal purpose of realizing gain from appreciation. In order to defray the cost of carrying the land, the taxpayer leases the land to a rancher, who uses the land to graze cattle and pays rent of $4,000 per year. Thus, the gross rental income from the land is less than two percent of the lesser of the fair market value and the unadjusted basis of the land (.02×$210,000=$4,200). Accordingly, under paragraph (e)(3)(ii)(D) of this section, the rental of the land is not a rental activity because the

rental is treated under paragraph (e)(3)(vi)(B) of this section as incidental to an activity of holding the property for investment.

Example (6). (i) A calendar year taxpayer owns an interest in a farming activity which is a trade or business activity (within the meaning of paragraph (e)(2) of this section) and owns farmland which was used in the farming activity in 1985 and 1986. The fair market value of the farmland is $350,000 and its unadjusted basis is $210,000. In 1987, 1988, and 1989, the taxpayer continues to own an interest in the farming activity but does not use the land in the activity. In 1987, the taxpayer leases the land for $4,000 to a rancher, who uses the land to graze cattle. In 1988, the taxpayer leases the land for $10,000 to a film production company, which uses the land to film scenes for a movie. In 1989, the taxpayer again leases the land for $4,000 to the rancher.

(ii) For 1987 and 1989, the taxpayer owns an interest in a trade or business activity, and the farmland which the taxpayer leases to the rancher was used in such activity for two out of the five immediately preceding taxable years. In addition, the gross rental income from the land ($4,000) is less than two percent of the lesser of the fair market value and the unadjusted basis of the land (.02x$210,000=$4,200). Accordingly, the taxpayer's rental of the land is treated under paragraph (e)(3)(vi)(C) of this section as incidental to the taxpayer's farming activity, and is not a rental activity.

(iii) Because the taxpayer's gross rental income from the land for 1988 ($10,000) is not less than two percent of the lesser of the fair market value and the unadjusted basis of the land, the requirement of paragraph (e)(3)(vi)(C)(3) of this section is not met. Therefore, the taxpayer's rental of the land in 1988 is not treated as incidental to the taxpayer's farming activity and is a rental activity.

Example (7). (i) In 1988, the taxpayer acquires vacant land for the purpose of constructing a shopping mall. Before commencing construction, the taxpayer leases the land under a one-year lease to an automobile dealer, who uses the land to park cars held in its inventory. The taxpayer commences construction of the shopping mall in 1989.

(ii) The taxpayer acquired the land for the principal purpose of constructing the shopping mall, not for the principal purpose or realizing gain from the appreciation of the property. Therefore, the rental of the property in 1988 is not treated under paragraph (e)(3)(vi)(B) of this section as incidental to an activity of holding the property for investment.

(iii) The land has not been used in any taxable year in any trade or business of the taxpayer. Therefore, the rental of the property in 1988 is not treated under paragraph (e)(3)(vi)(C) of this section as incidental to a trade or business activity.

(iv) Since the rental of the land in 1988 is not treated under paragraph (e)(3)(vi) of this section as incidental to a nonrental activity of the taxpayer, the rental of the land in 1988 is a rental activity. See § 1.469-2T(f)(3) for a special rule relating to the treatment of gross income from the rental of nondepreciable property.

Example (8). The taxpayer makes farmland available to a tenant farmer pursuant to an arrangement designated a "crop-share lease." Under the arrangement, the tenant is required to use the tenant's best efforts to farm the land and produce marketable crops. The taxpayer is obligated to pay 50 percent of the costs incurred in the activity (without regard to whether any crops are successfully produced or marketed), and is entitled to 50 percent of the crops produced (or 50 percent of the proceeds from marketing the crops). For purposes of paragraph (e)(3)(vii) of this section, the taxpayer is treated as providing the farmland for use in a farming activity conducted by a joint venture in the taxpayer's capacity as an owner of an interest in the joint venture. Accordingly, under paragraph (e)(3)(ii)(F) of this section, the taxpayer is not engaged in a rental activity, without regard to whether the taxpayer performs any services in the farming activity.

Example (9). The taxpayer owns a taxicab which the taxpayer operates during the day and leases to another driver for use at night under a one-year lease. Under the terms of the lease, the other driver is charged a fixed rental for use of the taxicab. Assume that, under the rules to be contained in § 1.469-4T, the taxpayer is engaged in two separate activities, an activity of operating the taxicab and an activity of making the taxicab available for use by the other driver. Under these facts, the period for which the other driver uses the taxicab exceeds 30 days, and the taxpayer does not provide extraordinary personal services in connection with making the taxicab available to the other driver. Accordingly, the lease of the taxicab is a rental activity.

Example (10). The taxpayer operates a golf course. Some customers of the golf course pay green fees upon each use of the golf course, while other customers purchase weekly, monthly, or annual passes. The golf course is open to all customers from sunrise to sunset every day of the year except certain holidays and days on which the taxpayer determines that the course is to wet for play. The taxpayer thus makes the golf course available during prescribed hours for nonexclusive use by various customers. Accordingly, under paragraph (e)(3)(ii)(E) of this section, the taxpayer is not engaged in a rental activity, without regard to the average period of customer use for the golf course.

(4) Special rule for oil and gas working interests—(i) In general. Except as otherwise provided in paragraph (e)(4)(ii) of this section, an interest in an oil or gas well drilled or operated pursuant to a working interest (within the meaning of paragraph (e)(4)(iv) of this section) of a taxpayer is not an interest in a passive activity for the taxpayer's taxable year (without regard to whether the taxpayer materially participates in such activity) if at any time during such taxable year the taxpayer holds such working interest either—

(A) Directly; or

(B) Through an entity that does not limit the liability of the taxpayer with respect to the drilling or operation of such well pursuant to such working interest.

(ii) Exception for deductions attributable to a period during which liability is limited—(A) In general. If paragraph (e)(4)(i) of this section applies for a taxable year to the taxpayer's interest in an oil or gas well that would, but for the application of paragraph (e)(4)(i) of this section, by an interest in a passive activity for the taxable year, and the taxpayer has a net loss (within the meaning of paragraph (e)(4)(ii)(C)(3) of this section) from the well for the taxable year—

(1) The taxpayer's disqualified deductions (within the meaning of paragraph (e)(4)(ii)(C)(2) of this section) from such oil or gas well for such year shall be treated as passive activity deductions for

such year (within the meaning of § 1.469-2T(d)); and

(2) A ratable portion (within the meaning of paragraph (e)(4)(ii)(C)(4) of this section) of the taxpayer's gross income from such oil or gas well for such year shall be treated as passive activity gross income for such year (within the meaning of § 1.469-2T(c)).

(B) Coordination with rules governing the identification of disallowed passive activity deductions. If gross income and deductions from an activity for a taxable year are treated as passive activity gross income and passive activity deductions under paragraph (e)(4)(ii)(A) of this section, such activity shall be treated as a passive activity for such year for purposes of applying paragraph (f) (2) and (4) of this section.

(C) Meaning of certain terms. For purposes of this paragraph (e)(4)(ii), the following terms shall have the meanings set forth below:

(1) Allocable deductions. The deductions allocable to a taxable year are any deductions that arise in such year (within the meaning of § 1.469-2T (d)(8)) and any deductions that are treated as deductions for such year under paragraph (f)(4) of this section.

(2) Disqualified deductions. The taxpayer's "disqualified deductions" from an oil or gas well for a taxable year are the taxpayer's deductions—

(i) That are attributable to such well and allocable to the taxable year; and

(ii) With respect to which economic performance (within the meaning of section 461(h), without regard to section 461 (h)(3) or (i)(2)) occurs at a time during which the taxpayer's only interest in the working interest is held through an entity that limits the taxpayer's liability with respect to the drilling or operation of such well.

(3) Net loss. The "net loss" of a taxpayer from an oil or gas well for a taxable year equals the amount by which the taxpayer's deductions that are attributable to such oil or gas well and allocable to such year exceeds the gross income of the taxpayer from such well for such year.

(4) Ratable portion. The "ratable portion" of the taxpayer's gross income from an oil or gas well for a taxable year equals the total amount of such gross income multiplied by the fraction obtained by dividing—

(i) The disqualified deductions from such oil or gas well for the taxable year; by

(ii) The total amount of the deductions that are attributable to such oil or gas well and allocable to the taxable year.

(iii) Examples. The following examples illustrate the application of paragraphs (e)(4) (i) and (ii) of this section:

Example (1). (i) A, a calendar year individual, acquires on January 1, 1987, a general partnership interest in P, a calendar year partnership that holds a working interest in an oil or gas property. Pursuant to the partnership agreement, A is entitled to convert the general partnership interest into a limited partnership interest at any time. On December 1, 1987, pursuant to a contract with D, an independent drilling contractor, P commences drilling a single well pursuant to the working interest. Under the drilling contract, P pays D for the drilling only as the work is performed. All drilling costs are deducted by P in the year in which they are paid. At the end of 1987, A converts the general partnership interest into a limited partnership interest, effective immediately. The drilling of the well is completed on February 28, 1988. A's interest in the well would but for this paragraph (e)(4) be an interest in a passive activity.

(ii) Throughout 1987, A holds the working interest through an entity that does not limit A's liability with respect to the drilling of the well pursuant to the working interest. In 1988, however, A holds the working interest through an entity that limits A's liability with respect to the drilling and operation of the well throughout such year. Accordingly, under paragraph (e)(4)(i) of this section, A's interest in P's well is not an interest in a passive activity for 1987 but is an interest in a passive activity for 1988. Moreover, since economic performance occurs in 1987 with respect to all items of deduction for drilling costs that are allocable to 1987, A has no disqualified deductions for 1987.

Example (2). The facts are the same as in example (1), except that all costs of drilling under the contract with D (including costs of drilling performed after 1987) are paid before the end of 1987 and A has a net loss for 1987. In addition, A has $15,000 of total deductions that are attributable to the well and allocable to 1987, but economic performance (as that term is used in paragraph (e)(4)(ii)(C)(2)(ii) of this section) does not occur with respect to $5,000 of those deductions until 1988. Under paragraph (e)(4)(ii) of this section, the $5,000 of deductions with respect to which economic performance occurs in 1988 are disqualified deductions and are treated as passive activity deductions for 1987. In addition, one-third ($5,000/$15,000) of A's gross income from the well for 1987 is treated as passive activity gross income.

(iv) Definition of "working interest." For purposes of section 469 and the regulations thereunder, the term "working interest" means an operating mineral interest (within the meaning of section 614(d) and the regulations thereunder).

(v) Entities that limit liability—(A) General rule. For purposes of paragraph (e)(4)(i)(B) of this section, an entity limits the liability of the taxpayer with respect to the drilling or operation of a well pursuant to a working interest held through such entity if the taxpayer's interest in the entity is in the form of—

(1) A limited partnership interest in a partnership in which the taxpayer is not a general partner;

(2) Stock in a corporation; or

(3) An interest in any entity (other than a limited partnership or corporation) that, under applicable State law, limits the potential liability of a holder of such an interest for all obligations of the entity to a determinable fixed amount (for example, the sum of the taxpayer's capital contributions).

(B) Other limitations disregarded. For purposes of this paragraph (e)(4), protection against loss through any of the following is not taken into account in determining whether a taxpayer holds a working interest through an entity that limits the taxpayer's liability:

(1) An indemnification agreement;

(2) A stop loss arrangement;

(3) Insurance;

(4) Any similar arrangement; or

(5) Any combination of the foregoing.

(C) Examples. The following examples illustrate the application of this paragraph (e)(4)(v):

Example (1). A owns a 20 percent interest as a general partner in the capital and profits of P, a partnership which owns oil or gas working interests. The other partners of P agree to indemnify A against liability in excess of A's capital contribution for any of P's costs and expenses with respect to P's working interests. As a general partner, however, A is jointly and severally liable for all of P's liabilities and, under paragraph (e)(4)(v)(B)(1) of this section, the indemnification agreement is not taken into account in determining whether A holds the working interests through an entity that limits A's liability. Accordingly, the partnership does not limit A's liability with respect to the drilling or operation of wells pursuant to the working interests.

Example (2). B owns a 10 percent interest in X, an entity (other than a limited partnership or corporation) created under applicable State law to hold working interests in oil or gas properties. Under applicable State law, B is liable without limitation for 10 percent of X's costs and expenses with respect to X's working interests but is not liable for the remaining 90 percent of such costs and expenses. Since B's liability for the obligations of X is not limited to a determinable fixed amount (within the meaning of paragraph (e)(4)(v)(A)(3) of this section), the entity does not limit B's liability with respect to the drilling or operation of wells pursuant to the working interests.

Example (3). C is both a general partner and a limited partner in a partnership that owns a working interest in oil or gas property. Because C owns an interest as a general partner in each well drilled pursuant to the working interest, C's entire interest in each well drilled pursuant to the working interest is treated under paragraph(e)(4)(i) of this section as an interest in an activity that is not a passive activity (without regard to whether C materially participates in such activity).

(vi) Cross reference to special rule for income from certain oil or gas properties. A special rule relating to the treatment of income from certain interests in oil or gas properties is contained in § 1.469-2T(c)(6).

(5) Rental of dwelling unit. An activity involving the rental of a dwelling unit that is used as a residence by the taxpayer during the taxable year (within the meaning of section 280A(c)(5)) is not a passive activity of the taxpayer for such year.

(6) Activity of trading personal property—(i) In general. An activity of trading personal property for the account of owners of interests in the activity is not a passive activity (without regard to whether such activity is a trade or business activity (within the meaning of paragraph (e)(2) of this section)).

(ii) Personal property. For purposes of this paragraph (e)(6), the term "personal property" means personal property (within the meaning of section 1092(d), without regard to paragraph (3) thereof).

(iii) Example. The following example illustrates the application of this paragraph (e)(6):

Example. A partnership is a trader of stocks, bonds, and other securities (within the meaning of section 1236(c)). The capital employed by the partnership in the trading activity consists of amounts contributed by the partners in exchange for their partnership interests, and funds borrowed by the partnership. The partnership derives gross income from the activity in the form of interest, dividends, and capital gains. Under these facts, the partnership is treated as conducting an activity of trading personal property for the account of its partners. Accordingly, under this paragraph (e)(6), the activity is not a passive activity.

(f) Treatment of disallowed passive activity losses and credits—(1) Scope of this paragraph. The rules in this paragraph (f)—

(i) Identify the passive activity deductions that are disallowed for any taxable year in which all or a portion of the taxpayer's passive activity loss is disallowed under paragraph (a)(1)(i) of this section;

(ii) Identify the credits from passive activities that are disallowed for any taxable year in which all or a portion of the taxpayer's passive activity credit is disallowed under paragraph (a)(1)(i) of this section; and

(iii) Provide for the carryover of disallowed deductions and credits.

(2) Identification of disallowed passive activity deductions—(i) Allocation of disallowed passive activity loss among activities—(A) General rule. If all or any portion of the taxpayer's passive activity

loss is disallowed for the taxable year under paragraph (a)(1)(i) of this section, a ratable portion of the loss (if any) from each passive activity of the taxpayer is disallowed. For purposes of the preceding sentence, the ratable portion of a loss from an activity is computed by multiplying the passive activity loss that is disallowed for the taxable year by the fraction obtained by dividing—

(1) The loss from the activity for the taxable year; by

(2) The sum of the losses for the taxable year from all activities having losses for such year.

(B) Loss from an activity. For purposes of this paragraph (f)(2)(i), the term "loss from an activity" means—

(1) The amount by which the passive activity deductions from the activity for the taxable year (within the meaning of § 1.469-2T(d)) exceed the passive activity gross income from the activity for the taxable year (within the meaning of § 1.469-2T(c)); reduced by

(2) Any part of such amount that is allowed under section 469(i) and the rules to be contained in § 1.469-9T (relating to the $25,000 allowance for certain rental real estate activities).

(C) Significant participation passive activities. If the taxpayer's passive activity gross income from significant participation passive activities (within the meaning of § 1.469-2T(f) (2)(ii)) for the taxable year (determined without regard to § 1.469-2T(f)(2) through (4)) exceeds the taxpayer's passive activity deductions from such activities for the taxable year, such activities shall be treated, solely for purposes of applying this paragraph (f)(2)(i) for the taxable year, as a single activity that does not have a loss for such taxable year.

(D) Examples. The following examples illustrate the application of this paragraph (f)(2)(i):

Example (1). An individual holds interests in three passive activities, A, B, and C. The gross income and deductions from these activities for the taxable year are as follows:

	A	B	C	Total
Gross income	$ 7,000	$ 4,000	$12,000	$23,000
Deductions	(16,000)	(20,000)	(8,000)	(44,000)
Net income (loss)	($ 9,000)	($16,000)	$ 4,000	($21,000)

The taxpayer's $21,000 passive activity loss for the taxable year is disallowed under paragraph (a)(1)(i) of this section. Therefore, a ratable portion of the losses from activities A and B is disallowed. The disallowed portion of each loss is determined as follows:

A: $21,000 X $9,000/$25,000 .... $ 7,560

B: $21,000 X $16,000/$25,000 .... $13,440

Total $21,000

Example (2). An individual holds interests in four passive activities, A, B, C, and D. The results of operations of these activities for the taxable year are as follows:

	A	B	C	D	Total
Gross income	15,000	5,000	10,000	10,000	40,000
Deductions	(5,000)	(10,000)	(20,000)	(8,000)	(43,000)
Net income (loss)	10,000	(5,000)	(10,000)	2,000	(3,000)

Activities A and B are significant participation passive activities (within the meaning of § 1.469-2T(f)(2)(ii)). The gross income from these activities for the taxable year ($20,000) exceeds the passive activity deductions from those activities for the taxable year ($15,000) by $5,000 and, under § 1.469-2T(f)(2), $5,000 of gross income from those activities is treated as not from a passive activity. Therefore, solely for purposes of applying this paragraph (f)(2)(i) for the taxable year, activities A and B are treated as a single activity that does not have a loss for the taxable year. Under § 1.469-2T(b), the taxpayer's passive activity loss for the taxable year is $8,000 ($43,000 of passive activity deductions minus $35,000 of passive activity gross income). The results of treating activities A and B as a single activity that does not have a loss for the taxable year is that none of the $8,000 passive activity loss is allocated under this paragraph (f)(2)(i) to activity B for the taxable year, even though the taxpayer incurred a loss in that activity for the taxable year.

(ii) **Allocation within loss activities**—(A) In general. If all or any portion of a taxpayer's loss from an activity is disallowed under paragraph (f)(2)(i) of this section for the taxable year, a ratable portion of each passive activity deduction (other than an excluded deduction (within the meaning of paragraph (f)(2)(ii)(B) of this section)) of the taxpayer from such activity is disallowed. For purposes of the preceding sentence, the ratable portion of a passive activity deduction of a taxpayer is the amount of the disallowed portion of the taxpayer's loss from the activity (within the meaning of paragraph (f)(2)(i)(B) of this section) for the taxable year multiplied by the fraction obtained by dividing—

(1) The amount of such deduction; by

(2) The sum of all passive activity deductions (other than excluded deductions (within the meaning of paragraph (f)(2)(ii)(B) of this section)) of the taxpayer from such activity from the taxable year.

(B) Excluded deductions. The term "excluded deduction" means any passive activity deduction of a taxpayer that is taken into account in computing the taxpayer's net income from an item of property for a taxable year in which an amount of the taxpayer's gross income from such item of

property is treated as not from a passive activity under § 1.469-2T(c)(6) or § 1.469-2T(f) (5), (6), or (7).

(iii) Separately identified deductions. In identifying the deductions from an activity that are disallowed under this paragraph (f)(2), the taxpayer need not account separately for a deduction unless such deduction may, if separately taken into account, result in an income tax liability for any taxable year different from that which would result were such deduction not taken into account separately. For related rules applicable to partnerships and S corporations, see § 1.702-1(a)(8)(ii) and section 1366(a)(1)(A), respectively. Deductions that must be accounted for separately include (but are not limited to) deductions that—

(A) Arise in a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in taxable years in which the taxpayer actively participates (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in such activity;

(B) Arise in a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in taxable years in which the taxpayer does not actively participate (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in such activity; or

(C) Are taken into account under section 1211 (relating to the limitation on capital losses) or section 1231 (relating to property used in a trade or business and involuntary conversions).

(3) Identification of disallowed credits from passive activities—(i) General rule. If all or any portion of the taxpayer's passive activity credit is disallowed for the taxable year under paragraph (a)(1)(ii) of this section, a ratable portion of each credit from each passive activity of the taxpayer is disallowed. For purposes of the preceding sentence, the ratable portion of a credit of a taxpayer is computed by multiplying the portion of the taxpayer's passive activity credit that is disallowed for the taxable year by the fraction obtained by dividing—

(A) The amount of the credit; by

(B) The sum of all of the taxpayer's credits from passive activities for the taxable year.

(ii) Coordination rule. For purposes of paragraph (f)(3)(i) of this section, the credits from a passive activity do not include any credit or portion of a credit that—

(A) Is allowed for the taxable year under section 469(i) and the rules to be contained in § 1.469-9T (relating to the $25,000 allowance for certain rental real estate activities); or

(B) Increases the basis of property during the taxable year under section 469(j)(9) and the rules to be contained in § 1.469-6T (relating to the election to increase the basis of certain property by disallowed credits).

(iii) Separately identified credits. In identifying the credits from an activity that are disallowed under this paragraph (f)(3), the taxpayer need not account separately for any credit unless such credit may, if separately taken into account, result in an income tax liability for any taxable year different from that which would result were such credit not taken into account separately. For related rules applicable to partnerships and S corporations, see § 1.702-1(a)(8)(ii) and section 1366(a)(1)(A), respectively. Credits that must be accounted for separately include (but are not limited to)—

(A) Credits (other than the low-income housing and rehabilitation investment credits) from a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) that arise in a taxable year in which the taxpayer actively participates (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in such activity;

(B) Credits (other than the low-income housing and rehabilitation investment credits) from a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) that arise in a taxable year in which the taxpayer does not actively participate (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T) in such activity;

(C) Low-income housing and rehabilitation investment credits from a rental real estate activity (within the meaning of section 469(i) and the rules to be contained in § 1.469-9T); and

(D) Any credit that is subject to the limitations of sections 26(a), 28(d)(2), 29(b)(5), or 38(c) in a manner that differs from the manner in which any other credit is subject to such limitations.

(4) Carryover of disallowed deductions and credits. Any deduction or credit from an activity of the taxpayer that is disallowed for a taxable year under paragraph (f)(2) or (3) of this section, respectively, shall be treated for purposes of section 469 and the regulations thereunder as a deduction or credit, as the case may be, from such activity

for the taxpayer's immediately succeeding taxable year. The following example illustrates the application of this paragraph (f)(4):

Example. The facts are the same as in example (1) in paragraph (f)(2)(i)(D) of this section. The $7,560 of loss from activity A and the $13,440 of loss from activity B that are disallowed for the taxable year under paragraph (f)(2) of this section are allocated among the passive activity deductions from those activities for such year under paragraph (f)(2)(ii) of this section and are treated under this paragraph (f)(4) as deductions from activities A and B, respectively, for the succeeding taxable year.

(g) **Application of these rules to C corporations—(1) In general.** Except as otherwise provided in the rules to be contained in paragraph (k) of this section, section 469 and the regulations thereunder do not apply to any corporation that is not a personal service corporation or a closely held corporation for the taxable year. See paragraphs (g)(4) and (5) of this section for special rules for computing the passive activity loss and passive activity credit, respectively, of a closely held corporation.

(2) **Definitions.** For purposes of section 469 and the regulations thereunder—

(i) The term "personal service corporation" means a C corporation that is a personal service corporation for the taxable year (within the meaning of § 1.441-4T(d)); and

(ii) The term "closely held corporation" means a C corporation that meets the stock ownership requirements of section 542(a)(2) (taking into account the modifications in section 465(a)(3)) for the taxable year and is not a personal service corporation for such year.

(3) **Participation of corporations—(i) Material participation.** For purposes of section 469 and the regulations thereunder, a corporation described in paragraph (g)(2) of this section shall be treated as materially participating in an activity for a taxable year if and only if—

(A) One or more individuals, each of whom is treated under paragraph (g)(3)(iii) of this section as materially participating in such activity for the taxable year, directly or indirectly hold (in the aggregate) more than 50 percent (by value) of the outstanding stock of such corporation; or

(B) In the case of a closely held corporation (within the meaning of paragraph (g)(2)(ii) of this section), the requirements of section 465(c)(7)(C) (without regard to clause (iv) thereof and taking into account section 465(c)(7)(D)) are met with respect to such activity.

(ii) **Significant participation.** For purposes of § 1.469-2T(f)(2), an activity of a corporation described in paragraph (g)(2) of this section shall be treated as a significant participation passive activity for a taxable year if and only if—

(A) The corporation is not treated as materially participating in such activity for the taxable year; and

(B) One or more individuals, each of whom is treated under paragraph (g)(3)(iii) of this section as significantly participating in such activity, directly or indirectly hold (in the aggregate) more than 50 percent (by value) of the outstanding stock of such corporation.

(iii) **Participation of individual.** Whether an individual is treated for purposes of this paragraph (g)(3) as materially participating or significantly participating in an activity of a corporation shall be determined under the rules of § 1.469-5T, except that in applying such rules—

(A) All activities of the corporation shall be treated as activities in which the individual holds an interest in determining whether the individual participates (within the meaning of § 1.469-5T(f)) in an activity of the corporation; and

(B) The individual's participation in all activities other than activities of the corporation shall be disregarded in determining whether the individual's participation in an activity of the corporation is treated as material participation under § 1.469-5T(a)(4) (relating to material participation in significant participation activities).

(4) **Modified computation of passive activity loss in the case of closely held corporations.—(i) In general.** A closely held corporation's passive activity loss for the taxable year is the amount, if any, by which the corporation's passive activity deductions for the taxable year (within the meaning of § 1.469-2T(d)) exceed the sum of—

(A) The corporation's passive activity gross income for the taxable year (within the meaning of § 1.469-2T(c)); and

(B) The corporation's net active income for the taxable year.

(ii) **Net active income.** For purposes of this paragraph (g)(4), a corporation's net active income for the taxable year is such corporation's taxable income for the taxable year, determined without regard to the following items for the year:

(A) Passive activity gross income;

(B) Passive activity deductions;

(C) Portfolio income (within the meaning of § 1.469-2T(c)(3)(i)), including any gross income that is treated as portfolio income under any other provision of the regulations (see, e.g., § 1.469-2T(c)(2)(iii)(E) (relating to gain from the disposition of substantially appreciated property formerly held for investment) and § 1.469-2T(f)(10) (relating to certain recharacterized passive activity gross income);

(D) Gross income that is treated under § 1.469-2T(c)(6) (relating to gross income from certain oil or gas properties) as not from a passive activity;

(E) Gross income and deductions from any trade or business activity (within the meaning of paragraph (e)(2) of this section) that is described in paragraph (e)(6) of this section (relating to certain activities of trading personal property) but only if the corporation did not materially participate in such activity for the taxable year;

(F) Deductions described in § 1.469-2T(d)(2)(i), (ii), and (iv) (relating to certain deductions attributable to portfolio income); and

(G) Interest expense allocated under § 1.163-8T to a portfolio expenditure (within the meaning of § 1.163-8T(b)(6)).

(iii) **Examples.** The following examples illustrate the application of this paragraph (g)(4):

Example (1). (i) For 1987, X, a closely held corporation, is engaged in two activities, a trade or business activity in which X materially participates for 1987 and a rental activity. X also holds portfolio investments. For 1987, X has the following gross income and deductions:

Gross income:	
Rents	$60,000
Gross income from business	100,000
Portfolio income	35,000
Total	$195,000
Deductions:	
Rental deductions	($100,000)
Business deductions	(80,000)
Interest expense allocable to portfolio expenditures under § 1.163–8T	(10,000)
Deductions (other than interest expense) clearly and directly allocable to portfolio income	(5,000)
Total	($195,000)

(ii) The corporation's net active income for 1987 is $20,000, computed as follows:

Gross income		$195,000	
Amounts not taken into account in computing net active income:			
Rents (see paragraph (g)(4)(ii)(A) of this section)	$60,000		
Portfolio income (see paragraph (g)(4)(ii)(C) of this section)	$35,000		
	$95,000	($95,000)	
Gross income taken into account in computing net active income		$100,000	$100,000
Deductions		($195,000)	
Amounts not taken into account in computing net active income:			
Rental deductions (see paragraph (g)(4)(ii)(B) of this section)	($100,000)		
Interest expense allocated to portfolio expenditures (see paragraph (g)(4)(ii)(G) of this section)	($10,000)		
Other deductions clearly and directly allocable to portfolio income (see paragraph (g)(4)(ii)(F) of this section)	(5,000)		
	($115,000)	$115,000	
Deductions taken into account in computing net active income		($80,000)	($80,000)
Net active income			$20,000

(iii) Under paragraph(g)(4)(i) of this section, X's passive activity loss for 1987 is $20,000, the amount by which the passive activity deductions for the taxable year ($100,000) exceed the sum of (a) the passive activity gross income for the taxable year ($60,000) and (b) the net active income for the taxable year ($20,000). Under paragraph (f)(4) of this section, the $20,000 of deductions from X's rental activity that are disallowed for 1987 are treated as deductions from the rental activity for 1988. If computed without regard to the net active income for the taxable year, X's passive activity loss would be $40,000 ($100,000 of rental deductions minus $60,000 of rental income). Thus, the effect of the rule in paragraph (g)(4)(i) of this section is to reduce the corporation's passive activity loss for the taxable year by the amount of the corporation's net active income for such year.

(iv) Under these facts, X's taxable income for 1987 is $20,000, computed as follows:

Gross income		$195,000
Deductions:		
Total deductions	($195,000)	
Passive activity loss	$20,000	
Allowable deductions	($175,000)	($175,000)
Taxable income		$20,000

Example (2). (i) The facts are the same as in example (1), except that, in 1988, X has a loss from the trade or business activity, and a net operating loss ("NOL") of $15,000 that is carried back under section 172(b) to 1987. Since NOL carry-

backs are taken into account in computing net active income, X's net active income for 1987 must be recomputed as follows:

Net active income before NOL carryback	$20,000
NOL carryback	($15,000)
Net active income	$5,000

(ii) Under these facts, X's disallowed passive activity loss for 1987 is $35,000, the amount by which the passive activity deductions for the taxable year ($100,000) exceed the sum of (a) the passive activity gross income for the taxable year ($60,000) and (b) the net active income for the taxable year ($5,000).

(iii) Under paragraph (f)(4) of this section, the $35,000 of deductions from X's rental activity that are disallowed for 1987 are treated as deductions from the rental activity for 1988. X's taxable income for 1987 is $20,000, computed as follows:

Gross income		$195,000
Deductions:		
Total deductions	($210,000)	
Passive activity loss	$35,000	
Allowable deductions	($175,000)	($175,000)
Taxable income		$20,000

Thus, taking the NOL carryback into account in computing net active income for 1987 does not affect X's taxable income for 1987, but increases the deductions treated under paragraph (f)(4) as deductions from X's rental activity for 1988 and decreases X's NOL carryover to years other than 1987.

(5) Allowance of passive activity credit of closely held corporations to extent of net active income tax liability—(i) In general. Solely for purposes of determining the amount disallowed under paragraph (a)(1)(ii) of this section, a closely held corporation's passive activity credit for the taxable year shall be reduced by such corporation's net active income tax liability for such year.

(ii) Net active income tax liability. For purposes of paragraph (g)(5)(i) of this section, a corporation's net active income tax liability for a taxable year is the amount (if any) by which—

(A) The corporation's regular tax liability (within the meaning of section 26(b)) for the taxable year, determined by reducing the corporation's taxable income for such year by an amount equal to the excess (if any) of the corporation's passive activity gross income for such year over the corporation's passive activity deductions for such year; exceeds

(B) The sum of—

(*1*) The corporation's regular tax liability for the taxable year, determined by reducing the corporation's taxable income for such year by an amount equal to the excess (if any) of the sum of the corporation's net active income (within the meaning of paragraph (g)(4)(ii) of this section) and passive activity gross income for such year over the corporation's passive activity deductions for such year; and

(*2*) The corporation's credits (other than credits from passive activities) that are allowable for the taxable year (without regard to the limitations contained in sections 26(a), 28(d)(2), 29(b)(5), 38(c), and 469).

(h) Special rules for affiliated group filing consolidated return—(1) In general. For purposes of computing the consolidated taxable income and tax liability of an affiliated group of corporations filing a consolidated return for the taxable year, and the separate taxable income (within the meaning of § 1.1502-12) of each member of such group, section 469 and the regulations thereunder shall be applied in the manner provided in this paragraph (h).

(2) Definitions. For purposes of this paragraph (h)—

(i) The terms "group," "member," "subsidiary," and "consolidated return year" shall have the meanings set forth in § 1.1502-1;

(ii) The term "consolidated group" means a group filing a consolidated return for the taxable year; and

(iii) The term "consolidated taxable income" shall have the meaning set forth in § 1.1502-11.

(3) Disallowance of consolidated group's passive activity loss or credit. A consolidated group's passive activity loss or passive activity credit for the taxable year shall be disallowed to the extent provided in paragraph (a) of this section. For purposes of the preceding sentence, a consolidated group's passive activity loss and passive activity credit shall be determined by taking into account the following items of each member of such group:

(i) Passive activity gross income;

(ii) Passive activity deductions;

(iii) Net active income (in the case of a consolidated group treated as a closely held corporation under paragraph (h)(4)(ii) of this section); and

(iv) Credits from passive activities.

(4) Status and material participation of members—(i) Determination by reference to status and participation of group. For purposes of section 469 and the regulations thereunder—

(A) Each member of a consolidated group shall be treated as a closely held corporation or personal service corporation, respectively, for the taxable year, if and only if the consolidated group is treated (under the rules of paragraph (h)(4)(ii) of

this section) as a closely held corporation or personal service corporation for such year; and

(B) The determination of whether a trade or business activity (within the meaning of paragraph (e)(2) of this section) conducted by one or more members of a consolidated group is a passive activity of such members shall be made by reference to the consolidated group's participation in such activity.

(ii) Determination of status and material participation of consolidated group. For purposes of determining under paragraph (g)(2) of this section whether a consolidated group is treated as a closely held corporation or a personal service corporation, and determining under paragraph (g)(3) of this section whether the consolidated group materially participates in any activity conducted by one or more members of such group—

(A) The members of such consolidated group shall be treated as one corporation;

(B) Only the outstanding stock of the common parent shall be treated as outstanding stock of such corporation;

(C) An employee of any member of such group shall be treated as an employee of such corporation; and

(D) An activity is treated as the principal activity of such corporation if and only if it is the principal activity (within the meaning of § 1.44-4T(f)) of the consolidated group.

(5) Modification of rules for identifying disallowed passive activity deductions and credits—(i) Identification of disallowed deductions. In applying paragraphs (f) (2) and (4) of this section to a consolidated group for purposes of identifying the passive activity deductions of such consolidated group and of each member of such consolidated group that are disallowed for the taxable year and treated as deductions from activities for the succeeding taxable year, the following rules shall apply:

(A) A ratable portion (within the meaning of paragraph (h)(5)(ii) of this section) of the passive activity loss of the consolidated group that is disallowed for the taxable year shall be allocated to each member of the group;

(B) Paragraph (f)(2) of this section shall then be applied to each member of the group as if—

(1) Such member were a separate taxpayer; and

(2) The amount allocated to such member under paragraph (h)(5)(i)(A) of this section were the amount of such member's passive activity loss that is disallowed for the taxable year; and

(C) Paragraph (f)(4) of this section shall be applied to each member of the group as if it were a separate taxpayer.

(ii) Ratable portion of disallowed passive activity loss. For purposes of paragraph (h)(5)(i)(A) of this section, a member's ratable portion of the disallowed passive activity loss of the consolidated group is the amount of such disallowed loss multiplied by the fraction obtained by dividing—

(A) The amount of the passive activity loss of such member of the consolidated group that would be disallowed for the taxable year if the items of gross income and deduction of such member were the only items of the group for such year; by

(B) The sum of the amounts described in paragraph (h)(5)(ii)(A) of this section for all members of the group.

(iii) Identification of disallowed credits. In applying paragraph (f)(3) of this section to a consolidated group for purposes of identifying the credits from passive activities of members of such consolidated group that are disallowed for the taxable year, the consolidated group shall be treated as one taxpayer. Thus, a ratable portion of each of the group's credits from passive activities is disallowed.

(6) Transactions between members of a consolidated group—(i) Scope. This paragraph (h)(6) provides rules regarding the treatment, for purposes of section 469 and the regulations thereunder, of items of income and deduction attributable to intercompany transactions. See paragraph (h)(6)(iv) of this section for the definition of "intercompany transaction" and certain other terms used in this paragraph (h)(6).

(ii) Recharacterization of gain or loss from intercompany transactions other than deferred intercompany transactions—(A) In general. If the selling member in an intercompany transaction (other than a deferred intercompany transaction) recognizes an item of gain or loss described in § 1.1502-13(b) that is directly related to an item of deduction of the purchasing member, and both the gain or loss and the directly related item of deduction are taken into account in computing consolidated taxable income for the same taxable year, the items of income or deduction that are taken into account by the selling member in computing such gain or loss shall be taken into account in computing consolidated taxable income

for such taxable year as items of income or deduction of the selling member from the activity to which the directly related deduction of the purchasing member is attributable.

(B) Recharacterization of gain or loss as portfolio items. Any item of income or deduction of a selling member that is recharacterized under this paragraph (h)(6)(ii) shall be treated as an item of income or deduction described in § 1.469-2T(c)(3)(i) (relating to portfolio income) or § 1.469-2T(d)(2)(i) (relating to expenses clearly and directly allocable to portfolio income), as the case may be, if and only if the directly related item of deduction is a deduction described in § 1.469-2T (d)(2)(i) or a deduction for interest expense that is allocated under § 1.163-8T to a portfolio expenditure (within the meaning of § 1.163-8T (b)(6)).

(iii) **Deferred intercompany transactions**—(A) In general. For purposes of section 469 and the regulations thereunder, the treatment of deferred gain or loss on a deferred intercompany transaction between members of a group shall be determined in accordance with this paragraph (h)(6)(iii).

(B) Deferred intercompany transactions involving property subject to depreciation, amortization, or depletion. If, for any consolidated return year, the selling member in a deferred intercompany transaction is required to take into account deferred gain or loss under § 1.1502-13(d) as a result of depreciation, amortization, or depletion of a member of the group, then for purposes of section 469 and the regulations thereunder such deferred gain or loss shall be taken into account for such year as gain or loss of the selling member from the activity (or activities) to which such depreciation, amortization, or depletion deductions are attributable.

(C) Restoration of deferred gain or loss on dispositions. If, for any consolidated return year, the selling member in a deferred intercompany transaction (other than a deferred intercompany transaction described in § 1.1502-13(e)(1)) is required to take deferred gain or loss into account under § 1.1502-13(e)(2) or (f), then for purposes of section 469 and the regulations thereunder—

(1) Such deferred gain or loss shall be treated as gain or loss of the selling member from a disposition of the property involved in such deferred intercompany transaction at the time of (i) the event that requires such gain or loss to be taken into account or (ii) in the case of a transaction described in § 1.1502-13(e)(2), the disposition of such property outside the consolidated group; and

(2) Such deferred gain or loss shall, except as otherwise provided in § 1.1502-2T (c)(2) or (d)(5), be taken into account for such year as gain or loss of the selling member from the activity (or activities) of the affiliated group in which the property involved in such deferred intercompany transaction is used immediately preceding the time specified in paragraph (h)(6)(iii)(C)(1) of this section.

See paragraph (h)(8) of this section, relating to dispositions by a member of substantially appreciated property formerly used in a nonpassive activity.

(D) Certain recharacterized items treated as portfolio items. Any deferred gain or loss or a selling member that is recharacterized under this paragraph (h)(6)(iii) shall be treated as an item of income or deduction described in § 1.469-2T(c)(3)(i) (relating to portfolio income) or § 1.469-2T(d)(2)(i) (relating to expenses clearly and directly allocable to portfolio income), as the case may be, if and only if the property involved in the transaction is property that produces portfolio income (within the meaning of § 1.469-2T(c)(3)((i)).

(E) Property involved in deferred intercompany transaction. For purposes of this paragraph (h)(6)(iii), the property involved in a deferred intercompany transaction is the property sold or exchanged in such transaction or the property with respect to which expenditures incurred in such transaction are capitalized.

(iv) **Definitions.** For purposes of this paragraph (h)(6), the terms set forth below shall have the following meanings:

(A) Deferred intercompany transaction. The term "deferred intercompany transaction" shall have the meaning set forth in § 1.1502-13(a)(2).

(B) Directly related. An item of gross income and an item of deduction are "directly related" if and to the extent that the same amount paid or accrued generates both the income and the deduction, without regard to whether the income and the deduction are taken into account by the taxpayer in the same taxable year.

(C) Intercompany transaction. The term "intercompany transaction" shall have the meaning set forth in § 1.1502-13(a)(1).

(D) Purchasing member. The term "purchasing member" shall have the meaning set forth in § 1.1502-13(a).

(E) Selling member. The term "selling member" shall have the meaning set forth in § 1.502-13(a).

(7) Disposition of stock of a member of an affiliated group. Any gain recognized by a member on the disposition of stock of a subsidiary (including income resulting from the recognition of an excess loss account under § 1.1502-19 (a)) shall be treated as portfolio income (within the meaning of § 1.469-2T (c)(3)(i)).

(8) Dispositions of property used in multiple activities. The determination of whether § 1.469-2T(c)(2)(ii) or (iii) or (d)(5)(ii) applies to a disposition (including a deemed disposition described in paragraph (h)(6)(iii)(C)(1) of this section) of property by a member of a consolidated group shall be made by treating such member as having held the property for the entire period that the group has owned such property and as having used the property in all of the activities in which the group has used such property

(i) [Reserved]

(j) Spouses filing joint return—(1) In general. Except as otherwise provided in the regulations under section 469, spouses filing a joint return for a taxable year shall be treated for such year as one taxpayer for purposes of section 469 and the regulations thereunder. Thus, for example, spouses filing a joint return are treated as one taxpayer for purposes of—

(i) Section 1.469-2T (relating generally to the computation of such taxpayer's passive activity loss); and

(ii) Paragraph (f) of this section (relating to the allocation of such taxpayer's disallowed passive activity loss and passive activity credit among activities and the identification of disallowed passive activity deductions and credits from passive activities).

(2) Exceptions to treatment as one taxpayer—(i) Identification of disallowed deductions and credits. For purposes of paragraphs (f)(2)(iii) and (3) (iii) of this section, spouses filing a joint return for the taxable year must account separately for the deductions and credits attributable to the interests of each spouse in any activity.

(ii) Treatment of deductions disallowed under sections 704(d), 1366(d), and 465. Notwithstanding any other provision of this section or § 1.469-2T, this paragraph (j) shall not affect the application of section 704(d), section 1366(d), or section 465 to taxpayers filing a joint return for the taxable year.

(iii) Treatment of losses from working interests. Paragraph (e)(4) of this section (relating to losses and credits from certain interests in oil and gas wells) shall be applied by treating a husband and wife (whether or not filing a joint return) as separate taxpayers.

(3) Joint return no longer filed. If an individual—

(A) Does not file a joint return for the taxable years; and

(B) Filed a joint return for the immediately preceding taxable year;

then the passive activity deductions and credits allocable to such individual's activities for the taxable year under paragraph (f)(4) of this section shall be determined by taking into account the items of deduction and credit attributable to such individual's interests in passive activities for the immediately preceding taxable year. See paragraph (j)(2)(i) of this section.

(4) Participation of spouses. Rules treating an individual's participation in an activity as participation of such individual's spouse in such activity (without regard to whether the spouses file a joint return) are contained in § 1.469-5T(f)(3).

(k) Former passive activities and changes in status of corporations. [Reserved]

[T.D. 8175, 53 FR 5700, Feb. 25, 1988]

§ 1.469–2T Passive activity loss (temporary).

(a) Scope of this section. This section contains rules for determining the amount of the taxpayer's passive activity loss for the taxable year for purposes of section 469 and the regulations thereunder. The rules contained in this section—

(1) Provide general guidance for identifying items of income and deduction that are taken into account in determining the amount of the passive activity loss for the taxable year;

(2) Specify particular items of income and deduction that are not taken into account in determining the amount of the passive activity loss for the taxable year; and

(3) Specify the manner in which provisions of the Internal Revenue Code and the regulations, other than section 469 and the regulations thereunder, are applied for purposes of determining the extent to which items of deduction are taken into account for a taxable year in computing the amount of the passive activity loss for such year.

(b) Definition of passive activity loss—(1) In general. In the case of a taxpayer other than a closely held corporation (within the meaning of § 1.469-1T(g)(2)(ii)), the passive activity loss for the taxable year is the amount, if any, by which the passive activity deductions for the taxable year exceed the passive activity gross income for the taxable year.

(2) Cross references. See paragraph (c) of this section for the definition of "passive activity gross income," paragraph (d) of this section for the definition of "passive activity deduction," and § 1.469-1T(g)(4) for the computation of the passive activity loss of a closely held corporation.

(c) Passive activity gross income—(1) In general. Except as otherwise provided in the regulations under section 469, passive activity gross income for a taxable year includes an item of gross income if and only if such income is from a passive activity.

(2) Treatment of gain from disposition of an interest in an activity or an interest in property used in an activity—(i) In general—(A) Treatment of gain. Except as otherwise provided in the regulations under section 469, any gain recognized upon the sale, exchange or other disposition (a "disposition") of an interest in property used in an activity at the time of the disposition or of an interest in an activity held through a partnership or S corporation is treated in the following manner:

(1) The gain is treated as gross income from such activity for the taxable year or years in which it is recognized;

(2) If the activity is a passive activity of the taxpayer for the taxable year of the disposition, the gain is treated as passive activity gross income for the taxable year or years in which it is recognized; and

(3) If the activity is not a passive activity of the taxpayer for the taxable year of the disposition, the gain is treated as not from a passive activity.

(B) Dispositions of partnership interests and S corporation stock. A partnership interest or S corporation stock is not property used in an activity for purposes of this paragraph (c)(2). See paragraph (e)(3) of this section for rules treating the gain recognized upon the disposition of a partnership interest or S corporation stock as gain from the disposition of interests in the activities in which the partnership or S corporation has an interest.

(C) Interest in property. For purposes of applying this paragraph (c)(2) to a disposition of property—

(1) Any material portion of the property that was used, at any time before the disposition, in any activity at a time when the remainder of the property was not used in such activity shall be treated as a separate interest in property; and

(2) The amount realized from the disposition and the adjusted basis of the property must be allocated among the separate interests in a reasonable manner.

(D) Examples. The following examples illustrate the application of this paragraph (c)(2)(i):

Example (1). A owns an interest in a trade or business activity in which A has never materially participated. In 1987, A sells equipment that was used exclusively in the activity and realizes a gain on the sale. Under paragraph (c)(2)(i)(A)(2) of this section, the gain is passive activity gross income.

Example (2). B owns an interest in a trade or business activity in which B materially participates for 1987. In 1987, B sells a building used in the activity in an installment sale and realizes a gain on the sale. B does not materially participate in the activity for 1988 or any subsequent year. Under paragraph (c)(2)(i)(A)(3) of this section, none of B's gain from the sale (including gain taken into account after 1987) is passive activity gross income.

Example (3). C enters into a contract to acquire property used by the seller in a rental activity. Before acquiring the property pursuant to the contract, C sells all rights under the contract and realizes a gain on the sale. Since C's rights under the contract are not property used in a rental activity, the gain is not income from a rental activity. The result would be the same if C owned an option to acquire the property and sold the option.

Example (4). D sells a ten-floor office building. D owned the building for three years preceding the sale and at all times during that period used seven floors of the building in a trade or business activity and three floors in a rental activity. The fair market value per square foot is substantially the same throughout the building, and D did not maintain a separate adjusted basis for any part of the building. Under paragraph (c)(2)(i)(C)(1) of this section, the seven floors used in the trade or business activity and the three floors used in the rental activity are treated as separate interests in property. Under paragraph (c)(2)(i)(C)(2) of this section, the amount realized and the adjusted basis of the building must be allocated between the separate interests in a reasonable manner. Under these facts, an allocation based on the square footage of the parts of the building used in each activity would be reasonable.

Example (5). The facts are the same as in example (4), except that two of the seven floors used in the trade or business activity were used in the rental activity until five months before the sale. Under paragraph (c)(2)(i)(C)(1) of this section, the five floors used exclusively in the trade or business activity and the two floors used first in the rental activity and then in the trade or business activity are treated as separate interests in property. See paragraph (c)(2)(ii) of this section for rules for allocating amount realized and adjusted basis upon a disposition of an interest in property used in more than one activity during the 12-month period ending on the date of the disposition.

(ii) Disposition of property used in more than one activity in 12-month period preceding disposition. In the case of a disposition of an interest in property that is used in more than one activity during the 12-month period ending on the date of the disposition, the amount realized from the disposition and the adjusted basis of such interest must be allocated among such activities on a basis that reasonably reflects the use of such interest in property during such 12-month period. For purposes of this paragraph (c)(2)(ii), an allocation of the amount realized and adjusted basis solely to the activity in which an interest in property is predominantly used during the 12-month period ending on the date of the disposition reasonably reflects the use of such interest in property if the fair market value of such interest does not exceed the lesser of—

(A) $10,000; and

(B) 10 percent of the sum of the fair market value of such interest and the fair market value of all other property used in such activity immediately before the disposition.

The following examples illustrate the application of this paragraph (c)(2)(ii):

Example (1). The facts are the same as in example (5) of paragraph (c)(2)(i)(D) of this section. Under paragraph (c)(2)(i)(C)(2) of this section, D allocates the amount realized and adjusted basis of the building 30 percent to the three floors used exclusively in the rental activity, 50 percent to the five floors used exclusively in the trade or business activity, and 20 percent to the two floors used first in the rental activity and then in the trade or business activity. Under this paragraph (c)(2)(ii), the amount realized and adjusted basis allocated to the two floors that were used in both activities during the 12-month period ending on the date of the disposition must also be allocated between such activities. Under these facts, an allocation of 7/12 of such amounts to the rental activity and 5/12 of such amounts to the trade or business activity would reasonably reflect the use of the two floors during the 12-month period ending on the date of the disposition.

Example (2). B is a limited partner in a partnership that sells a tractor-trailer. During the 12-month period ending on the date of the sale, the tractor-trailer was used in several activities, and the partnership allocates the amount realized from the disposition and the adjusted basis of the tractor-trailer among the activities based on the number of days during the 12-month period that the partnership used the tractor-trailer in each activity. Under these facts, the partnership's allocation reasonably reflects the use of the tractor-trailer during the 12-month period ending on the date of the sale.

Example (3). C sells a personal computer for $8,000. During the 12-month period ending on the date of the sale, 70 percent of C's use of the computer was in a passive activity. Immediately before the sale, the fair market value of all property used in the passive activity (including the personal computer) was $200,000. Under these facts, the computer was predominately used in the passive activity during the 12-month period ending on the date of the sale, and the value of the computer, as measured by its sale price ($8,000), does not exceed the lesser of (a) $10,000, and (b) 10 percent of the value of all property used in the activity immediately before the sale ($20,000). C allocates the amount realized and the adjusted basis solely to the passive activity. Under this paragraph (c)(2)(ii), C's allocation reasonably reflects the use of the computer during the 12-month period ending on the date of the sale.

(iii) Disposition of substantially appreciated property formerly used in nonpassive activity—(A) In general. If an interest in property used in an activity is substantially appreciated at the time of its disposition, any gain from the disposition shall be treated as not from a passive activity unless such interest in property was used in a passive activity for either—

(1) 20 percent of the period during which the taxpayer held such interest in property; or

(2) The entire 24-month period ending on the date of the disposition.

(B) Date of disposition. For purposes of this paragraph (c)(2)(iii), a disposition of an interest in property shall be deemed to occur on the date that such interest in property becomes subject to an oral or written agreement that either requires the owner or gives the owner an option to transfer such interest in property for consideration that is fixed or otherwise determinable on such date.

(C) Substantially appreciated property. For purposes of this paragraph (c)(2)(iii), an interest in property is substantially appreciated if the fair market value of such interest in property exceeds 120 percent of the adjusted basis of such interest.

(D) Coordination with paragraph (c)(2)(ii) of this section. If paragraph (c)(2)(ii) of this section applies to the disposition of an interest in property, this paragraph (c)(2)(iii) shall apply only to that portion of the gain from the disposition of such interest in property that is characterized as gain from a passive activity after the application of paragraph (c)(2)(ii) of this section.

(E) Coordination with section 163(d). Gain that is treated as not from a passive activity under this paragraph (c)(2)(iii) shall be treated as income described in section 469(e)(1)(A) and paragraph (c)(3)(i) of this section if and only if such gain is from the disposition of an interest in property that was held for investment for more than 50 percent of the period during which the taxpayer held such interest in property in activities other than passive activities.

(F) Example. The following example illustrates the application of this paragraph (c)(2)(iii):

Example. A acquires a building on January 1, 1987, and uses the building in a trade or business activity in which A material-

ly participates until March 31, 1997. On April 1, 1998, A leases the building to B. On December 31, 1999, A sells the building. Assuming A's lease of the building to B constitutes a rental activity (within the meaning of § 1.469-1T(e)(3)), the building is used in a passive activity for 21 months (April 1, 1998, through December 31, 1999). Thus, the building was not used in a passive activity for the entire 24-month period ending on the date of the sale. In addition, the 21-month period during which the building was used in a passive activity is less than 20 percent of A's holding period for the property (13 years). Therefore, the gain from the sale is treated under this paragraph (c)(2)(iii) as not from a passive activity.

(3) Items of portfolio income specifically excluded—(i) In general. Passive activity gross income does not include portfolio income. For purposes of the preceding sentence, portfolio income includes all gross income, other than income derived in the ordinary course of a trade or business (within the meaning of paragraph (c)(3)(ii) of this section), that is attributable to—

(A) Interest (including amounts treated as interest under paragraph (e)(2)(ii) of this section, relating to certain payments to partners for the use of capital); annuities; royalties (including fees and other payments for the use of intangible property); dividends on C corporation stock; and income (including dividends) from a real estate investment trust (within the meaning of section 856), regulated investment company (within the meaning of section 851), real estate mortgage investment conduit (within the meaning of section 860D), common trust fund (within the meaning of section 584), controlled foreign corporation (within the meaning of section 957), qualified electing fund (within the meaning of section 1295(a)), or cooperative (within the meaning of section 1381(a));

(B) Dividends on S corporation stock (within the meaning of section 1368(c)(2);

(C) The disposition of property that produces income of a type described in paragraph (c)(3)(i)(A) of this section; and

(D) The disposition of property held for investment (within the meaning of section 163 (d)).

(ii) Gross income derived in the ordinary course of a trade or business. Solely for purposes of paragraph (c)(3)(i) of this section, gross income derived in the ordinary course of a trade or business includes only—

(A) Interest income on loans and investments made in the ordinary course of a trade or business of lending money;

(B) Interest on accounts receivable arising from the performance of services or the sale of property in the ordinary course of a trade or business of performing such services or selling such property, but only if credit is customarily offered to customers of the business;

(C) Income from investments made in the ordinary course of a trade or business of furnishing insurance or annuity contracts or reinsuring risks underwritten by insurance companies;

(D) Income or gain derived in the ordinary course of an activity of trading or dealing in any property if such activity constitutes a trade or business (but see paragraph (c)(3)(iii)(A) of this section);

(E) Royalties derived by the taxpayer in the ordinary course of a trade or business of licensing intangible property (within the meaning of paragraph (c)(3)(iii)(B) of this section);

(F) Amount included in the gross income of a patron of a cooperative (within the meaning of section 1381(a), without regard to paragraph (2)(A) or (C) thereof) by reason of any payment or allocation to the patron based on patronage occurring with respect to a trade or business of the patron; and

(G) Other income identified by the Commissioner as income derived by the taxpayer in the ordinary course of a trade or business.

(iii) Special rules—(A) Income from property held for investment by dealer. For purposes of paragraph (c)(3)(i) of this section, a dealer's income or gain from an item of property is not derived by the dealer in the ordinary course of a trade or business of dealing in such property if the dealer held the property for investment at any time before such income or gain is recognized.

(B) Royalties derived in the ordinary course of the trade or business of licensing intangible property—(1) In general. Royalties received by any person with respect to a license or other transfer of any rights in intangible property shall be considered to be derived in the ordinary course of the trade or business of licensing such property only if such person—

(i) Created such property; or

(ii) Performed substantial services or incurred substantial costs with respect to the development or marketing of such property.

(2) Substantial services or costs—(i) In general. Except as provided in paragraph (c)(3)(iii)(B)(2)(ii) of this section, the determination of whether a person has performed substantial services or incurred substantial costs with respect to the devel-

opment or marketing of an item of intangible property shall be made on the basis of all the facts and circumstances.

(ii) Exception. A person has performed substantial services or incurred substantial costs for a taxable year with respect to the development or marketing of an item of intangible property if—

(a) The expenditures reasonably incurred by such person in such taxable year with respect to the development or marketing of the property exceed 50 percent of the gross royalties from licensing such property that are includible in such person's gross income for the taxable year; or

(b) The expenditures reasonably incurred by such person in such taxable year and all prior taxable years with respect to the development or marketing of the property exceed 25 percent of the aggregate capital expenditures (without any adjustment of amortization) made by such person with respect to the property in all such taxable years.

(iii) Expenditures taken into account. For purposes of paragraph (c)(3)(iii)(B)(2)(ii) of this section, expenditures in a taxable year include amounts chargeable to capital account for such year without regard to the year or years (if any) in which any deduction for such expenditure is allowed.

(3) Passthrough entities. For purposes of this paragraph (c)(3)(iii)(B), in the case of any intangible property held by a partnership, S corporation, estate, or trust, the determination of whether royalties from such property are derived in the ordinary course of a trade or business shall be made by applying the rules of this paragraph (c)(3)(iii)(B) to such entity and not to any holder of an interest in such entity.

(4) Cross reference. For special rules applicable to certain gross income from a trade or business of licensing intangible property, see paragraph (f)(7) of this section.

(C) Mineral production payments. For purposes of section 469 and the regulations thereunder—

(1) If a mineral production payment is treated as a loan under section 636, the portion of any payment in discharge of the production payment that is the equivalent of interest shall be treated as interest; and

(2) If a mineral production payment is not treated as a loan under section 636, payments in discharge of the production payment shall be treated as royalties.

(iv) **Examples**. The following examples illustrate the application of this paragraph (c)(3):

Example (1). A, an individual engaged in the trade or business of farming, disposes of farmland in an installment sale. A is not engaged in a trade or business of selling farmland. Therefore, A's interest income from the installment note is not gross income derived in the ordinary course of a trade or business.
